Mr. HARVEY of Michigan. The gentleman referred to the type of structures to be built under this rent supplement at a modest cost and referred to rent subsidies under the low market interest rate in section 221. But the programs we are talking about are all market interest programs, and I understand the limit on this may go up to \$32,900 per unit. Am I correct?

Mr. BARRETT. I appreciate the gentleman asking that question.

Mr. Chairman, I think we ought to bring this down to a position which everyone can understand it. There is no luxurious housing in this program. There are no apartments that cost \$38,000 or anything close to that figure. For the gentleman's edification I would like to make this very simple, and an easily understood explanation of this section of the bill.

What it is necessary here to understand, Mr. Chairman, is who builds these structures. They are built in this fashion: A nonprofit organization may desire to build 300 or 400 or 500 units. He goes to a private lender and tells the private lender what moneys he wants to borrow. When they agree on the amount, then he goes to the FHA with the private lender and if he meets all the necessary requirements for this modest construction, then the FHA would agree to insure the mortgage. There are no dollars that are put into this by the Government at this point. The mortgage is insured for 40 years.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. If the gentleman will permit me first to explain this more fully, I think it might save many Members of the House from asking a lot of questions relating to the first question that my colleague asked, namely, Will people be able to go into \$38,000 apartments? The answer is—no.

When the owner gets that insurance for the mortgage, then he, the owner and nobody else—no builders, no construction company—but the owner goes to the HHFA and says, I want a contract with you for rent supplements. Then if he meets all of the requirements including the requirement that the construction be of modest design, the HHFA will say to him, All right, we will assure rent supplements in your construction.

Now keep in mind the kind of low-income people who can get rent supplements. First, the individual who wants to occupy this housing as a rent supplement tenant must be in one of these four categories. He must be a displacee, that is, one who is displaced from his home by public action; or second, he must live in substandard housing; or third, he must be an elderly person, or, fourth, he must be a handicapped person.

Now who are these people? In the case of a person considered as a displacee, is that person eligible if he can obtain decent housing for less than one-fourth of his monthly income? No, he is not eligible.

Is he eligible if he lives in a slum and can obtain standard housing—and let me say, decent, safe, and sanitary hous-

ing, for less than one-fourth of his income? That person is not eligible.

Can the elderly obtain this type of apartment? And who are the elderly that we are trying to help here? Is he not the person who may be on social security and who is receiving \$100 a month or so?

If the person does not qualify as being in one of these four categories, then he is not eligible for this type of apartment.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I am glad to yield to my colleague.

Mr. HARVEY of Michigan. I want to say to the gentleman I am somewhat astounded because the gentleman really could not have understood my question because I cannot believe that the chairman of our subcommittee, as knowledgeable as he is on this subject and the gentleman from Pennsylvania is a very able chairman I want to say right here and now.

Mr. BARRETT. I thank the gentleman from Michigan.

Mr. HARVEY of Michigan. The gentleman from Pennsylvania could not and would not possibly want to leave the impression with the Members of the House that the type of structures that the gentleman is talking about is being built under the below-market interest rate for housing.

That is what the gentleman said in his remarks. I say that this rent supplement program is included under the market interest rate program. I am sure, in his vast knowledge, the gentleman will agree that the upper limit under this market interest rate for this housing is \$32,900.

Mr. MOORHEAD. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD. Mr. Chairman, I should like to direct the attention of the gentleman from Michigan to page 5 of the report, to the next to the last paragraph. The second sentence of that paragraph clearly says, as the gentleman from Michigan pointed out, that the financing of these programs would be under market interest loans.

Let me read a portion of the first sentence of that paragraph:

projects containing units for which rent supplement payments could be made would be of modest design, constructed to the standards prescribed for the FHA section 221(d) (3) below-market interest rate insured loan program.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield? Perhaps the gentleman can point out where this appears in the bill. No such language appears anywhere in the bill, to my knowledge. I still say that the limit prescribed by the administrator is \$32,900.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I yield to the gentleman from Ohio.

Mr. VANIK. Will the gentleman from Pennsylvania tell me whether the rent supplement payments could be made to the owner or property used in violation

of either the building code or the zoning code of the local community?

Mr. BARRETT. All of these would have to be built according to zoning requirements and codes and would have to meet FHA minimum property standards.

Mr. VANIK. I take it the payments could not be made where there was a violation of the building code or the zoning code.

Mr. BARRETT. The gentleman is correct.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield? I would ask the gentleman where in the bill that appears? Will the gentleman point out the line or the page?

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I yield to the gentleman from Ohio.

Mr. ASHLEY. Is it not true that the FHA standards require that already? It does not have to be in the bill.

Mr. HARVEY of Michigan. There is certainly nothing in the language of this bill that requires it.

Mr. ASHLEY. The FHA standards require it. We are building these things under FHA standards, it is reasonable to assume.

Mr. HARVEY of Michigan. I assume that the gentleman will agree with me, then, that \$32,900 is the limit?

Mr. WIDNALL. Mr. Chairman, I now yield 20 minutes to the gentleman from New York [Mr. FINO].

(Mr. FINO asked and was given permission to revise and extend his remarks.)

Mr. STANTON. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Fifty-two Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 158]

Andrews,	Gilligan	Morse
N. Dak.	Grabowski	Morton
Arends	Gray	Neisen
Baring	Greigg	Nix
Blatnik	Halleck	Olson, Minn.
Bonner	Halpern	Philbin
Bow	Hansen, Wash.	Powell
Brown, Ohio	Harsha	Race
Broyhill, Va.	Harvey, Ind.	Reid, N.Y.
Byrne, Pa.	Hays	Resnick
Cahill	Holland	Rhodes, Pa.
Chamberlain	Hull	Roosevelt
Chelf	Jacobs	Roybal
Clark	Jennings	Ryan
Conable	Keogh	St Germain
Curtin	Kluczynski	Saylor
Curtis	Lindsay	Senner
Davis, Ga.	Long, La.	Shriver
Dent	Long, Md.	Steed
Derwinski	McDowell	Stratton
Dickinson	McVicker	Tenzer
Diggs	Macdonald	Thomas
Dingell	Mackie	Toll
Donohue	Martin, Ala.	Tupper
Dowdy	Martin, Mass.	Ullman
Evins, Tenn.	Martin, Nebr.	Vigorito
Farnsley	Miller	Watson
Fulton, Pa.	Moore	

Accordingly, the Committee rose; and the Speaker pro tempore, Mr. ALBERT, having assumed the chair, Mr. FLOOD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R.

7984, and finding itself without a quorum, he had directed the roll to be called, when 354 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The gentleman from New York [Mr. FINO] is recognized for 20 minutes.

Mr. FINO. Mr. Chairman, at the very outset, I would like to make my position on this housing bill crystal clear. I have always been a great supporter of housing legislation not only in the Congress of the United States but as a member for 6 years of the New York State Senate.

In the 13 years that I have been privileged to be a Member of this House I have always supported and I have always voted for every housing bill that has come before this House.

Now, let us make no mistakes about my position here today. I still favor and support legislation that will provide adequate, suitable and decent housing for families of low and moderate income.

As for this bill, I will support all of the programs contained in it except for one, and that is the proposal in section 101, commonly referred to as the rent-supplement program, or better known as the rent-subsidy proposal.

Under this section 101, which the Housing Administrator calls an "experiment," massive rent subsidies will be doled out to certain population groups—the elderly, the handicapped, those displaced by urban renewal and those living in substandard housing.

I agree that these people need help, but I seriously question not only the motives but also the real worth of this proposal.

Under this recent supplement or subsidy scheme, persons in four categories may receive rent subsidies if they cannot find standard housing using one-quarter of their annual income. The rent subsidies will then be the difference between the fair market rental and one-quarter of the tenant's income.

At first glance, just looking at the bill this formula might sound reasonable. It might sound fair. But I say to you gentlemen that it is neither reasonable nor fair—it is simply clever.

Let us take a very close look at the eligibility requirements.

First of all, one must be fit into one of the four categories. That sounds fair. Then one must be unable to locate and rent standard housing which is suitable for one-quarter or less of his income. This, too, would seem fair and equitable until—I repeat, until we realize that under this section the Housing Administrator determines and the Housing Administrator defines what is suitable standard housing. By his power of definition he can set standards which suit his purposes.

Let us take an example. Should the Administrator decide that he wants to move a \$6,000 a year family of four persons living in a three-and-a-half room apartment, he would simply define the present accommodation as substandard. He would establish a standard of spacious, air-conditioned, four-room apart-

ments renting at \$150 per month, and then go to work.

The better apartment, at \$150 per month, would cost \$1,800 per year, which is well over the \$1,500 a year which represents one-quarter of the family income. The family in question would qualify for a rent subsidy of \$300 per year, or \$25 per month.

This, my friends, is the kind of power we would give the Housing Administrator under section 101 of this bill.

I say to the Members of this House that there are no safeguards in this legislation. There are no restrictions, and there are no prohibitions.

The rent subsidy proposal is also open to all kinds of abuses. Let us take a closer look at this program.

Under section 101, the Administrator has the power to define and determine what is income. But, what is more important, he has the power to determine what may be excluded from income. He can choose to say that a family with \$10,000 a year income—which could include bank interest, employee bonus, wife's earnings—really has an income of only \$7,000 per year, from which he can exclude \$1,800, under some exclusionary definition the Administrator has the power to draw, thereby leaving a \$5,200 income.

This is the power he has. He can do it, and there is nothing in this section 101 which prohibits the Administrator from doing it.

Now, if this family was eligible under the four categories, it could receive a very nice rent subsidy because obviously with a redefined income of \$5,200 a year it could not afford the apartment it needed for one-fourth of its income as artificially lowered.

I am sure that the proponents of this program will say that things like this will not be done and that such abuses will not occur. I think they will occur because there is nothing in this legislation that prohibits or restricts the Administrator from doing it.

If the proponents of this bill were really concerned with making the rent subsidy program a careful experiment, they could have done a better job on the bill's language. But they did not. They left section 101 loose, ambiguous, and flexible enough to write all kinds of abuses.

I think that is what the Housing Administrator had in mind all the time—far-reaching control that could extend into every nook and corner of American residential patterns. That is why this section does not contain specific protections against the type of abuses that I have mentioned.

As far as I am concerned, the only safeguard we have against the loose language of section 101 is the social philosophy of the Housing Administrator. If he chooses to experiment in reweaving the national social fabric, we will have given him many tools when we give him section 101. Frankly, I am afraid of the power that would be available for such exercise. I am afraid because I do not believe in federalized residential patterns.

As I have already mentioned, this rent subsidy proposal applies to a broad range

of groups—extending well beyond the lower-income group it is supposed to be concentrating on. I seriously doubt that the lower-income group will get much real benefit out of this section.

I think that the low-income group could be better served. I do not believe that the rent subsidy program is intended to put low-income people in appropriate standard housing. I am certain that this program is intended to put certain selected low-income groups in middle-income and near luxury housing. That is what the rent subsidy program is doing in New York State and the people in these middle-income apartments don't like to see people subsidized while they are paying all the rent they can afford on their own initiative and hard work.

I know that the proponents of section 101 will argue that this across-the-board economic integration is a sound idea because it mixes the underprivileged with the privileged. I feel however, that those paying full rent have a valid reason to object to economic integration especially when they additionally have to pay part of the rent of their underprivileged neighbors.

You will also hear it argued that this section 101 will give an incentive to the underprivileged person to improve his lot and will educate the privileged on how the other half lives. As for giving the underprivileged person an incentive for improving his lot, I think the opposite is true because the moment he increases his earnings, he loses his subsidy. So why should he strive to improve himself?

As for educating the privileged person on how the other half lives, it might very well educate him to do exactly what the underprivileged person is doing—cut down on his own initiative and enjoy the same kind of subsidy benefits his neighbor enjoys.

I feel certain that this section is not really concerned with helping people as much as it is with grabbing power. It is a social planning power grab disguised in housing terminology.

This section is more important to the bureaucrats than to the people who it is supposed to help. Let us make no mistake about it—this measure is concerned with power—an extension of Government power to regulate lives and living patterns, and not with people.

Let us not be misled by the arguments of the proponents of this section that this program will help provide housing for those of low incomes. This is only a smokescreen. It is a dense cloud of misinformation. We know and the private builders know that there is no real profit in building low-income housing units—the only housing that will be constructed under this program will be middle-income and upper middle-income housing from which the low-income people will benefit at the added expense of the American taxpayers. The moneys that are to be used on this experimental program could be much better spent in other ways and the Housing Administrator knows it.

If the Administrator was really concerned with people and adequate housing for people in need of help, he would have asked for additional public hous-

ing and a broader rent certificate program. I say this because public housing can do the job for more people and for less money—much less money.

I am fully aware that public housing has shown very real qualitative and numerical shortcomings to date but that merely reflects the sterility of administration programming. The truth of the matter is that a good public housing program would provide more units more quickly at substantially less cost. And, I might point out, it would provide these units for the income ranges that need housing, not the income ranges that the Administrator would like to experiment with.

When Mr. Ira Robbins, president of the National Association of Housing and Redevelopment Officials, testified on section 101 before the Subcommittee on Housing—and incidentally, Mr. Robbins is an expert on housing; he has had 38 years of experience in that field—he was very blunt in his appraisal of the rent subsidy scheme. Mr. Robbins, an expert on housing, said that a \$4,000-a-year family can be subsidized in public housing for \$37 per month while it will cost \$66 per month to subsidize the same family in similar quarters under the rent supplement program. My point is very simple. Nearly twice as many needy families could be provided for by public housing as will be provided for at the same cost by the rent supplement program. But, as I have mentioned before, the Housing Administrator is more concerned with power than with people.

I do not believe that the social planners who drew up this rent subsidy program were really concerned with helping the needy to get housing. If they were, they could have gotten so much more for the same money in other ways. As a matter of fact, the proponents of section 101 have even admitted their lack of interest in low-income groups.

When the Housing Administrator was before the committee he said that the rent supplement program was aimed at low-income groups. Then, 2 days later, he told a Pittsburgh Civic group that only persons with "hearts of gold but heads of lead" would build housing units for low-income families. As I already mentioned, private builders cannot and will not build low-cost housing. I can only conclude that all this talk—all this concern about the needy is sham and trickery. As far as I can see, and I challenge anyone to prove otherwise, this program is an attempt to subsidize rents in middle-income and upper-middle-income housing and thereby impose Federal controls over American residential patterns.

The proponents of this program have urged that this rent subsidy proposal is worth trying on an experimental basis. I might agree that would be worth trying on a small scale under carefully worded legislation. But what we have here is anything but a small-scale experiment. It is a phoney. It is a Trojan horse from which will spring vast Federal control.

Above all, it is not a small, short range experimental program. It is a program that will run for 40 years, involving \$200 million a year for a total of \$8 billion.

Now, Mr. Chairman, how can anyone in his right mind say this is an experiment?

Let us make no mistake about this program. It is a long-range subsidy program that binds this Congress and all of the succeeding Congresses for the next 40 years. That is what this bill does. I ask you, is that what we want?

In voting for section 101 you will not be voting for a small-scale experiment but rather for an incredibly large-scale program which defies the name experiment by its magnitude and longevity. The social planners who have designed section 101 have chosen this Congress, the 89th Congress, as the Congress least likely to assert its rights. They feel that this Congress would insulate and protect their program's future from other Congresses. I am counting on this Congress to prove them wrong.

If the rent subsidy program is not aimed at low-income groups and is not calculated to get low-income housing built, it must have other aims and purposes. I will tell you what they are. Their aim is to put low-income groups in middle-income housing which might be called economic integration and also to subsidize middle-income groups.

Now, I see no financial sense in subsidizing middle-income groups by this rent supplement scheme. We already have housing under section 221(d)(3)—below-market-interest rate loan program which can do the job and should be encouraged to continue to do this job.

Besides, at my suggestion, we have knocked out the 20 percent gap requirement between public housing income ceilings and the lowest rents at which private enterprise is providing an essential supply of standard housing. With the elimination of this 20 percent gap requirement more people will be able to get into public housing.

I know and you know that the rent subsidy scheme does not aim at getting middle income people into appropriate housing any more than it aims at building low-income housing for low-income groups. It should be bluntly obvious that the rent subsidy program aims at social experimentation. Only in this sense is it an experimental plan. The Administrator gets to experiment but the Congress does not get to experiment.

Let me warn you that if this Congress approves this section 101, and I repeat that, if this Congress approves section 101, it will be buying a 40-year program and we can count on an abundance of experiments. Experiments that will cost \$8 billion of the American taxpayers' money.

Let me repeat that under the rent subsidy program, there are no safeguards, no guidelines, no restrictions and no prohibitions that will keep the Housing Administrator from moving the poorest people into the best apartments. It will not concern itself with our primary objective to remove people from substandard housing, it will go far beyond that. As I said before, the Housing Administrator has one aim and purpose and that is to accomplish economic integration through rent subsidies. I do not know whether this is a good sound American idea. All I can say is that we ought

to go very slowly in this sort of direction, and this section 101 is not a safe, go-slow program. It is, and I repeat, a power-grab that the social planners think just might slip by a rubberstamp Congress. It is social legislation not aimed at the housing problem—not aimed at providing low-income housing units—not aimed at providing middle-income housing but aimed at changing social patterns.

If you support section 101, that is exactly what you will be voting for—giving the Housing Administrator vast power to reshape the social and living patterns in this Nation.

To the proponents of the rent subsidy program who say that we need it to deal with our housing problem, I say that is not true.

Let me remind them that we have, in this bill, public housing; we have below-market-interest-rate loans for middle-income housing; and we have rent certificates for privately owned existing structures. These are solid housing measures. The rent subsidy scheme is not. The rent supplement is not a housing measure but a social experiment and nothing else.

In the May 27th issue of the New York Times, Arthur Krock wrote this about the rent supplement:

The real issue is whether the Federal Union is to undergo its greatest transformation thus far into a collectivist state.

These are dire words but they are accurate. The rent subsidy scheme is a tool—a dangerous tool—for the complete federalization of American residential patterns.

I have devoted all of my time to the rent subsidy scheme because I feel—honestly feel—that it is a blemish on a good housing bill. It ought to be wiped away.

Later, a motion will be offered to recommit this bill with instructions to strike out section 101. Your vote on this motion will determine whether or not you want to hand away power to restructure the national social fabric in the guise of housing legislation.

In closing, I would like to quickly recapitulate what section 101 does and does not do.

First. It does not aim at building low-income housing units. The Administrator not only knows it but admits it as well.

Second. It does not aim at providing the most economical standard housing for needy families.

Third. It does not contain effective limitations on the amount of individual subsidies. There is no subsidy ceiling.

Fourth. It does not limit subsidies to the truly needy—those with whom we should be primarily concerned.

Fifth. It does not prohibit rent supplements from amounting to almost all of the rent paid for an apartment.

Sixth. It does not prohibit rent supplements from being used to put low-income families in upper-middle-income housing.

Seventh. Most of all, section 101 does not contain any language that would safeguard against the above abuses.

Look at the bill yourself. Section 101 extends only five pages.

Incidentally, the gentleman from Pennsylvania [Mr. BARRETT] mentioned low-income families. There is nothing in this section that talks about low-income families. It talks about "qualified tenants."

All the safeguards the friends of section 101 talk about do not exist. They will not exist until Dr. Weaver issues regulations, if then. That is not enough for me.

Now, let me say what this bill does do.

First. It runs 40 years, costing \$200 million a year, for a total of \$8 billion—\$8 billion of taxpayers' money.

Let us make no mistakes about what this bill does. It runs for 40 years. If you read the bill—and you do not have to be a lawyer—just read the bill, and then compute those figures. It runs for 40 years because the Administrator has the power to sign up with any builder for 40 years, costing \$200 million a year. That is a total of \$8 billion of the taxpayers' money.

Second. It runs 40 years, so that, once Congress assents to it, Congress loses control over it.

Third. It will build middle-income housing for a select, subsidized low-income group.

Fourth. It will house a select subsidized low-income group far less economically than other low-income groups are provided for in public housing.

Fifth. Its per unit cost will be almost twice as high as public housing because middle-income units will be utilized.

Sixth. It will extend Government control over middle-income housing patterns.

Seventh. It will federalize American residential patterns.

Eighth. It will open the door to Government-enforced economic integration nearly tantamount to collectivism.

Ninth. It will encourage neighbor to spy on neighbor for the amusement of the bureaucrats.

As I said before, I think section 101 is a blot on a good housing bill. I urge you to join with me in opposing it. It is a dangerous provision and has no place in this otherwise good housing bill. In supporting and voting for the motion to recommit you will be striking out only section 101 from this bill—nothing else.

It is a dangerous provision and it has no place in this otherwise good housing bill.

In supporting and voting for this motion to recommit, which will come at the end of the general debate, you will be striking out only section 101 and nothing else. This is the only section we are concerned with and this is the only section that we say is a very dangerous section and should not be in this housing bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PATMAN. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. ASHLEY].

Mr. ASHLEY. Mr. Chairman, I suppose there is bound to be controversy with respect to the rent supplement program. This, after all, is a program that

seeks to provide housing for families whose income prevents them from qualifying for decent housing on the private market. If we have learned anything from the discussions and debates that we have had with respect to public housing over the years, it is that no Government program seeking to make available decent housing for the American people can be debated on the floor without intense controversy.

I think if we are going to argue the merits of the rent subsidy program, we should at least try to agree on the extent of the need for the program.

In 1949 the Congress established a national housing policy, establishing a goal of decent, safe, and sanitary housing for every American family. Since that time, as we know, Mr. Chairman, this Congress has enacted a whole range of programs seeking to achieve this goal. We have not achieved the goal and that is why we are here today with this program. Today in the United States there are 3,100,000 families living in substandard housing who have incomes too low for decent private housing in their community as a monthly rental equal to or less than 25 percent of their monthly income—3.1 million families. Add to that 2,100,000 elderly or handicapped and then add to that 80,000 families who each year are being displaced because of governmental action of one kind or another—and the numbers are growing. This is a measurement of the need. According to the gentleman from New York, the rent supplement program has no restrictions. Well, it does have restrictions and it does have safeguards and, as a matter of fact, it is a limited program.

Mr. FINO. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman.

Mr. FINO. Will the gentleman show me on what page it has restrictions?

Mr. ASHLEY. If the gentleman will wait, I will tell him and he will not need to have any further identification.

Mr. FINO. I would like to know because I made the observation that there was no restriction and no prohibitions in this bill and I ask the gentleman to show me where there are any such restrictions or prohibitions.

Mr. ASHLEY. I am going to do that and must now decline to yield further so that I will have an opportunity to respond to the gentleman.

Mr. MULTER. Mr. Chairman, will the gentleman yield at this point?

Mr. ASHLEY. I yield to the gentleman.

Mr. MULTER. I have asked the gentleman to yield at this point before answering the question of my colleague from New York because I think since we are talking about the number of people who need housing, particularly in the lower income groups, the Record at this point ought to show that in the city of New York from which, of course, the gentleman from New York [Mr. FINO] comes and from which city I come, there are in excess of 100,000 families now on the waiting list for public housing who cannot be accommodated.

Mr. ASHLEY. Presumably, the gentleman from New York will offer an amendment to increase the amount of public housing in the bill to take care of those families in New York.

Mr. MULTER. If you were to take all of the public housing called for in this bill and allocate all of it to the city of New York, you would not be able to accommodate them.

Mr. ASHLEY. I say to the gentleman from New York [Mr. FINO] there are restrictions and there are safeguards to assure that the housing under this program will be at minimum cost and will actually provide shelter for the people it is designed to house.

First, what about the cost? The gentleman totally overlooked in his remarks that the sponsors of this housing must be nonprofit, limited dividend, or cooperative groups. Is this not so?

Mr. FINO. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from New York.

Mr. FINO. If the gentleman will read title I, section (b), line 21, it says:

As used in this section, the term "housing owner" means a private nonprofit corporation or other entity, a limited dividend corporation or other entity, or a cooperative housing corporation.

What did they mean by "other entity"?

Mr. ASHLEY. It would seem to me that the congressional intent is quite manifest with respect to kinds of sponsors intended.

Mr. FINO. These are profit organizations.

Mr. ASHLEY. Would the gentleman please not interrupt me in the middle of a sentence? I will yield to the gentleman at any point, but not in the middle of a sentence.

We have experience, as a matter of fact, do we not, under section 221? Do we not know what kinds of sponsors there have been since the inception of that program? These are the same types of sponsors. It is because of this type of sponsor that low-cost housing can be assured. This is one of the safeguards.

Nor can we dismiss lightly the fact that in order to qualify as a tenant under this program, a family must come from one of the four categories described by previous speakers. They must be displacees, or they must be elderly, or they must be handicapped, or they must be presently living in substandard housing. These are additional safeguards, I say to the gentleman.

Mr. MULTER. Mr. Chairman, will the gentleman yield to me at that point, for clarification?

Mr. ASHLEY. I yield to the gentleman from New York.

Mr. MULTER. The language to which the gentleman from New York [Mr. FINO] referred must be read exactly as it written and not torn apart.

When it say "a private nonprofit corporation or other entity," it means a private nonprofit corporation or a private nonprofit entity, not any other entity which may be for profit. The same is true with respect to the limited dividend corporation or other entity. It is a lim-

ited dividend corporation or other limited dividend entity.

Mr. FINO. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from New York.

Mr. FINO. I ask the gentleman from New York why they did not put that in specific language, if that was intended?

Mr. MULTER. Let us not quibble. If that is what the gentleman is arguing about, we will put it in words, if he will offer an amendment.

Mr. ASHLEY. Mr. Chairman, under the bill the Administrator would be required to determine the lowest rent required in each community to obtain a standard one-, two-, three-, or four-bedroom unit. This determination would be a factual one based on a market analysis, exactly the same as FHA has made in thousands of previous cases. If the market analysis disclosed that in a particular community a standard one-bedroom unit could be rented, for example, for \$80 a month, a family which needed a one-bedroom unit could have a rent supplement payment made on its behalf only if its monthly income were less than four times that required rent for that unit, or \$320. There is no discretion involved in this process. It is simply a case of finding the facts—in this case the rent required to obtain a particular unit—and then multiplying by four.

The gentleman from New York says this is an enormous grant of power to the Administrator. I say, on the contrary, this is no enormous grant of authority or power whatever. This is what has been done with respect to public housing for 30 years, as the gentleman most certainly knows.

On that point, Mr. Chairman, I believe a very interesting fact to consider is the preliminary estimate of income limits for families of different sizes recently issued by the FHA.

It showed, for example, for Toledo, Ohio, the district that I represent, that decent housing is available in the private market for families of two persons earning \$4,000 annually or more. For three or four persons in the family it would require \$4,500 annually or more. For five or six persons it would require \$5,500 a year or more, and for seven or eight in the family \$6,000 or more annually.

What this means, of course, is that a family of seven or eight in Toledo earning \$6,000 a year would not be eligible under this program. If this family is earning \$5,000 a year it would be eligible for a rent supplement determined in the following manner: it would be expected to pay 25 percent of its income for rent, and 25 percent of \$5,000 is \$1,250.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. PATMAN. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. ASHLEY. The FHA survey for Toledo found private housing is available for a seven- to eight-member family earning \$6,000, if they allot 25 percent of their income, or \$1,500, for rent. Subtracting \$1,250 from \$1,500, the rent supplement would be \$250 a year or approximately \$20 a month.

Mr. FINO. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. Yes. I yield to the gentleman from New York.

Mr. FINO. The gentleman is talking and discussing figures and incomes, but where in the report, where in the hearings, where in the bill is there such language as you are alluding to?

Mr. ASHLEY. The hearings clearly describe the method of computation and it is set forth in the bill.

Mr. FINO. There are no figures in this bill, and there are no figures in the hearings or in the report. Let me point out this on page 4.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. Let us see if the chairman of the subcommittee has a comment.

Mr. BARRETT. Since this is a new program, the Housing Administrator did not have firm figures available at the time of the hearings. Since then HHFA has gotten data based on the next supplement plan included in last year's housing bill and has given us estimates for a number of cities.

If the gentleman will yield further, on June 21 I put these 25 cities in the RECORD on page A3213 for the benefit of the Members of the House.

Mr. MULTER. Will the gentleman yield at that point?

Mr. ASHLEY. Yes. I yield to the gentleman from New York.

Mr. MULTER. I am pleased to hear the gentleman from New York [Mr. FINO] say that there is nothing in the record to sustain the figures, because this proves that the minority report, which pretended to give the Congress figures, is completely inaccurate. These figures they have in their minority report, which try to show it is a luxury program, for luxury incomes, are apparently pulled right out of the air.

Mr. ASHLEY. Let me say to the gentleman that the formula is abundantly clear if there are not any figures. Is not the gentleman clear on how the formula works?

Mr. FINO. We are very familiar with the formula, but what disturbs and bothers me is subsection (e), which says that for the purpose of carrying out the provisions of section 101 the Administrator shall establish the criteria and procedures for determining the eligibility of occupants and rental charges, including criteria and procedures which respect to periodic review of tenant incomes and periodic adjustment of rental charges. These are the things that disturb me about this bill.

Mr. ASHLEY. Do you not think there should be a periodic review of incomes that the tenants are receiving?

Mr. FINO. I say we are giving all of this power to the Administrator to determine what is income and what is the ceiling and the rental and everything that goes under this program. That is the objection I have.

Mr. ASHLEY. The gentleman has made quite a case for public housing, and it is a good case. It does not satisfy me, quite frankly. I have been a friend of public housing for a good many years but it simply has not done the job. There is

presently a 500,000 backlog in applications for public housing.

We have only built since the inception of the public housing program a total of some 580,000 units. There are almost as many today on the waiting list as there are units that have been constructed since the program was initiated in 1937. If all of the public housing were constructed that is needed to meet the demand for decent housing for families that cannot afford at this time private housing, we would then have the largest federally-operated housing operation in the world. Is this what the gentleman wants? Why is the gentleman so reluctant, let me ask him, to have this need met by the private sector of our economy as well as by the public?

Mr. FINO. Mr. Chairman, if the gentleman will yield, we do have section 221(3)(d) which is private. We do have the rent certificate proposed by the ranking member of the subcommittee. So it is not a question of objecting to meeting the demand.

The CHAIRMAN. The time of the gentleman from Ohio [Mr. ASHLEY] has expired.

Mr. PATMAN. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman.

Mr. BROCK. I wonder if the gentleman would answer this question. When he mentioned \$6,000 for Toledo, did he mean gross income or net, and under whose standards? By what standards does the gentleman arrive at that \$6,000?

Mr. ASHLEY. Let me make it clear that the Administrator would have discretion and would be expected to write regulations to spell out exactly what is contemplated by income. But again we get to standards and the experience that has been derived under the public housing program.

There has been the comment made that nothing is said specifically about assets of rent-supplement families. Yes, these would be considered, too; there is no question about that. The Administrator has so testified.

Mr. BROCK. Mr. Chairman, if the gentleman will yield further, I should like to comment that there is nothing in the bill which mentions assets at all. Then I would ask him this question. If we apply the standards, as if permissible under this bill, which are applied under public housing rules by giving the Administrator the right to set standards, is it not true that the gross income in Toledo could be \$8,000, with a \$2,400 exclusion, so that there is a gross income of \$8,000 and not \$6,000?

Mr. MULTER. Mr. Chairman, will the gentleman yield to me?

Mr. ASHLEY. I yield to the gentleman.

Mr. MULTER. Mr. Chairman, I know the gentleman has the answer to that question, but I have the record in front of me. I am referring to the report at page 5. It says:

The committee expects that, for the purpose of determining the amount of the income of an individual or family, all income,

from every source, whether taxable or not, of the individual or adult members of the family will be included.

Further, with reference to the figures that have been asked for, they are not only in our hearings, but in addition to that, our distinguished chairman of the subcommittee [Mr. BARRETT] on June 21, placed in the RECORD a letter from the Administrator, Dr. Weaver, together with all the figures. They appear in the RECORD for those who want them.

Mr. WIDNALL. Mr. Chairman, I yield 1 minute to the gentleman from Indiana [Mr. BRAY].

(Mr. BRAY asked and was given permission to revise and extend his remarks.)

Mr. BRAY. Mr. Chairman, there are programs for Federal aid to housing that have been aimed at those Americans who simply cannot pay for the housing that they need. However, the rent-subsidy proposal in the legislation before us is nothing less than an attempt to make the Federal Government the landlord for the entire American middle class. It has been estimated that this plan could eventually cover 40 percent of all American families. Yet, the Government's own census figures show that over 90 percent of all families in the \$4,000 to \$8,000 income group are adequately housed.

Who will police such a program? How will the Government determine that those receiving rent subsidies are not falsifying their income figures? An open invitation to the American people to turn into informers was freely given during the hearings on this bill before the Committee on Banking and Currency. The gentleman from New York [Mr. FINO] asked Robert Weaver, Administrator of the Housing and Home Finance Agency, to explain:

How would I be in difficulty if you do not police it, or investigate it, supervise it and watch me?

Mr. Weaver replied that:

There will be spot checks * * * and there is one other check, too, which I hate to say. Your friends and neighbors would be very much concerned about this. They are the best investigators that you have in these projects.

Mr. Weaver later piously told a newspaper:

We are not encouraging snooping. I was just reporting a fact of life.

How ironic, that this House, which has heard so many ringing speeches denouncing informers, should now be asked to approve legislation that, more than any other bill that has ever come before us, would turn Americans into a collection of snoops and sneaks, running to some Government agency with tales about their neighbors' income. And this has been gratuitously suggested by an administration official who will have a major part to play in the operation of this program if it becomes law.

If this provision becomes law, we can look forward to the day when there is just one landlord for all Americans: the Federal Government. When Nikita Khrushchev visited the United States, he bragged that in the Soviet Union,

the Government took care of everyone's housing. That is true, but by American standards almost all of Russian housing would be classed as slums. A bureaucrat, in Russia called a commissar, determines whether you will live in a house the equal of a pigsty or in one of the better houses. Is this what we want in our country?

Why stop with subsidies for rent? The same distorted logic which seeks to justify this program may be just as easily applied to automobiles, clothes and, for that matter, television sets. Why not subsidize them as well? The Government is already on its way to paying doctor bills and this program would provide for rent. What is next on the list?

With the national debt at an all-time high—and we just voted another "temporary" increase in the debt limit—and the value of the dollar at an all-time low, and with our deficit in the balance of payments threatening to destroy the value of the dollar abroad, I think it is time the administration cut back some of its spending.

The minority report on this bill sums up the rent-subsidy provision very well: it is foreign to American concepts; it kills the incentive of the American family to improve its living accommodations by its own efforts; it kills the incentive for home ownership; it makes renters wards of the Government; it is a system of economic integration of housing through Government subsidy and it is the way of the socialistic state.

Mr. WIDNALL. Mr. Chairman, I now yield 15 minutes to the gentlewoman from New Jersey [Mrs. DWYER.]

(Mrs. DWYER asked and was given permission to revise and extend her remarks.)

Mrs. DWYER. Mr. Chairman, for the most part, the pending bill deserves support in this body. It is one of the best and most constructive housing bills which has been reported by the Banking and Currency Committee since I have been privileged to be a member. As a member, too, of the Subcommittee on Housing, I can testify to the spirit of cooperation and bipartisanship which has gone into this legislation and which helped us to produce a bill which both Republicans and Democrats can support.

We can support this bill, that is, subject to one major qualification—the elimination of section 101, which would establish a new program of rent subsidies for middle-income families.

This proposal, Mr. Chairman, is so thoroughly unjustified that its presence in the housing bill may jeopardize the omnibus measure itself. I hope, therefore, that the House will be able to agree that the rent supplement program must go and, having done this, will then approve the balance of a bill which can benefit millions of our fellow citizens.

I fear, Mr. Chairman, that we shall be hearing so much today and tomorrow about rent supplements that it will be all too easy to overlook the many virtues in the rest of the bill. Since the bill is a composite of proposals advanced by both the majority and the minority, I should like to call special attention to

some of the more significant provisions and, in doing so, to pay tribute to the leadership displayed by the subcommittee chairman, the distinguished gentleman from Pennsylvania [Mr. BARRETT] and the ranking minority member of the subcommittee and the full committee, my distinguished colleague from New Jersey [Mr. WIDNALL]. As one of those who joined with the ranking minority Member in introducing the Republican alternative, I am deeply gratified that so much of our bill is included in the legislation reported by the committee.

In addition to the rent supplement proposal, title I of the bill includes four programs especially designed to help low-income families, the elderly and disabled, and those displaced by government projects to find decent housing.

One of the most useful and successful of these programs is the program of direct loans for housing for the elderly and the handicapped. As a long-time supporter of this and related elderly housing programs, I have been pleased to note the way in which interest in the program has grown and the way in which the program has helped our older people to live their declining years in comfort and security and dignity.

With the above-65 portion of our population growing at a faster than average rate and with retired persons required, in general, to sustain themselves on lower incomes, the need for this program has greatly increased. To meet the need, the committee has extended the authority to make loans to October, 1969, and has removed the existing dollar limitation from the program, thus authorizing Congress to appropriate whatever funds it believes the program needs.

The section 103 program, Mr. Chairman, is a new one and makes a promising new departure from the conventional public housing program, a supplement to low-rent housing which Republicans on the Housing Subcommittee proposed both this year and last. Under this program, local housing authorities would be authorized to lease units in existing privately owned housing and make them available to low-income families whose rental payments would be based on the conventional program. The housing authority would pay the difference between the rent charged by the owner and the amount which the low-income families could afford up to a maximum equivalent to the annual contributions established for newly constructed housing. This program is not to be confused with rent supplement plans.

The advantage of this rent certificates plan would be great. It would introduce valuable flexibility into the low-rent housing program. It would utilize existing housing which would be made immediately available. Use enough for their needs at rental payments they can afford. It would provide a feasible alternative to reliance exclusively on the huge, depersonalized, high-rise buildings which have so often served to keep low-income families separated from their own communities. And it would encourage the conservation and rehabilitation of housing in areas which might, without

special effort, become the slums of tomorrow.

In addition, Mr. Chairman, title I would authorize the acquisition of 60,000 units of low-rent public housing in each of 4 more years. This would include both the conventional public housing and units acquired through the new rent certificate plan. Additional flexibility in the public housing program would also be provided by permitting local housing authorities to use older housing, with or without rehabilitation for periods less than the usual 30 or 40 years required under the present subsidy formula. Here, again, local authorities would be given a useful tool in finding the kind of housing most needed in meeting local situations.

In the area of moderate-income housing, title I would extend for 4 additional years the increasingly successful program under section 221(d)(3) of the Housing Act which provides long-term loans at below-market interest rates. As a result of the special financing provided by this program, low- and moderate-income families are enabled to find housing suited to their needs which they would otherwise not be able to afford.

In another new departure, Mr. Chairman, title I of the committee bill would authorize grants to low-income homeowners in urban renewal areas for the purpose of financing repairs and improvements necessary to bring their homes up to the standards for decent, safe, and sanitary housing. Among other benefits, this program would reduce the cost of property acquisition in urban renewal projects. It would permit residents of the area to save their homes and avoid the hardship of forced dislocation. And it would save the Government the expenses of relocating such homeowners in other housing. The program is both practical and humane.

In order to make the loan programs in title I work more effectively—and these include housing for the elderly and section 221(d)(3) as well as college housing in title V—the committee has recommended that a stable below-market interest rate of 3 percent be established. Steadily rising interest rates under existing formulas are just as steadily reducing the advantages of these low-interest loan programs. If Congress intends these programs to function properly, then we must either maintain a ceiling on interest rates or provide an alternative form of direct subsidy. The committee's recommendation to follow the former course is, I believe, a sound one.

Among other features of the committee bill, Mr. Chairman, I would emphasize especially the improvements we have recommended in the urban renewal program. In addition to providing funds and authority for 4 more years of the program, the bill would tighten up program requirements to minimize relocation hardships and encourage more efficient operation. It would stress the rehabilitation of existing houses as an alternative to the bulldozing of entire project areas. It would encourage better enforcement of building codes as a means

of preventing the growth of slums. It would help local redevelopment agencies plan their projects more realistically and help to minimize such wasteful conditions as the existence of cleared land which is allowed to sit idle and undeveloped for periods up to several years in length.

Properly planned and executed urban renewal projects can be extremely important in preventing the decay of our cities and in encouraging their growth and development as healthy, vital, and attractive places in which to live and work. With the tools Congress has already provided and those recommended in the committee bill, there will be no excuse for local redevelopment agencies to fail to make this program work as Congress has intended it should.

In a related area, Mr. Chairman, the bill would correct a number of inequities of long standing in connection with land acquisition practices under urban renewal and related urban development programs. The bill would establish uniform land acquisition procedures, provide for increased relocation payments to homeowners and businessmen displaced by such projects, and assure more prompt payment and fairer treatment for those whose property is acquired through eminent domain proceedings.

Finally, Mr. Chairman, I should like to add a word about the proposed rent supplement plan—a proposal which is, in my judgment, the major flaw in an otherwise generally sound and progressive bill. The rent supplement proposal not only would cost more than all the other programs in this bill put together but it would also use this money—approximately \$8 billion—for purposes which I believe to be unnecessary, unjustified, and inequitable.

In this very bill, Mr. Chairman, the committee has recommended new or improved programs which would do everything the rent supplement program proposes to accomplish. These include the public housing program, the rent certificate plan, section 221(d)(3) housing loans, and housing for the elderly. The committee has also removed the existing 20-percent gap between the income of persons eligible for public housing and the income necessary for standard available private housing. This action, when combined with the section 221(d)(3) program, should effectively fill the need for which rent supplements were proposed, especially when you add the benefits to be expected from the 3-percent interest rate.

If further efforts are needed to provide suitable housing for families which cannot afford such housing, the way to do it, I believe, is through the wide variety of programs already in existence or otherwise provided in this bill. These programs are directed at those in need. They provide proper standards and criteria. The rent supplement program as proposed by the administration would do neither.

At a time when we have embarked on a massive war against poverty, when millions of American families lag tragically far behind the general prosperity of the country, I cannot believe we would be

justified in providing additional housing subsidies for families with incomes well above the median income of families, nationally.

By means of the committee bill now before us, Congress can take a giant stride forward in meeting the housing needs of all our people. The rent supplement plan would be a retreat, a wasteful retreat, from the direction and objectives pursued by the rest of the bill. I hope, Mr. Chairman, that we can defeat the rent supplement program and go on to enact a housing bill which deserves the approval of the Nation.

Mr. PATMAN. Mr. Chairman, I yield 1 minute to the gentleman from Georgia [Mr. FLYNT].

Mr. FLYNT. Mr. Chairman, after the conclusion of general debate on the bill, H.R. 7984, and at the appropriate point when the bill is being read for amendment, I will offer an amendment which will authorize the transfer of certain land in the city of Macon for urban renewal purposes from the housing authority of the city of Macon, Ga., to the Urban Renewal Department of Macon.

This amendment has been requested by the Macon Council of the city of Macon and is concurred in by the Housing Authority of the city of Macon and the Urban Renewal Department of the city of Macon. The amendment which I referred to is as follows:

On Page 107, after line 14, add the following new section:

"TRANSFER OF LAND FOR URBAN RENEWAL PURPOSES BY HOUSING AUTHORITY OF THE CITY OF MACON, GEORGIA

"SEC. 1010. (a) Notwithstanding the provisions of title I of the Housing Act of 1949 and the United States Housing Act of 1937, the Housing and Home Finance Administrator and the Public Housing Commissioner are authorized and directed to consent to the transfer by the Housing Authority of the City of Macon, Georgia, to the Urban Renewal Department of the City of Macon, Georgia, of all property acquired by the Housing Authority for low-rent housing project numbered Georgia 7-8, on condition that (1) an amount which, together with any funds of the Housing Authority available for the purpose, is sufficient to pay and discharge all obligations incurred by the Housing Authority in connection with such low-rent housing project and owing at the time of transfer, will be paid by the Urban Renewal Department of the City of Macon to the Public Housing Administration to be applied in satisfaction of the Housing Authority's obligations which it cannot meet with its own funds available for the purpose, and (2) the total amount so paid by the Urban Renewal Department of the City of Macon will be included in the gross project cost of its Coliseum Urban Renewal Project, Georgia R-95.

"(b) The Housing and Home Finance Administrator and the Public Housing Commissioner are authorized to modify any contracts heretofore entered into and to take any other appropriate action necessary to carry out the provisions of subsection (a)."

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. FLYNT. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. We have had a chance to study this amendment and I think the committee on this side will have no objection to it.

Mr. FLYNT. I thank the gentleman from Pennsylvania.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. FLYNT. I yield to the gentleman. (Mr. COHELAN asked and was given permission to revise and extend his remarks.)

Mr. COHELAN. Mr. Chairman, this bill before us today does not, in my estimation, accomplish all that it could or should. It will certainly not meet all of our pressing needs in the field of housing and urban development. But it will assist low- and moderate-income families in their quest for adequate housing. It will help our cities to cope with the problems of urban and suburban expansion. It will continue and improve for 4 years our present programs of housing and community development, and I rise in its support.

The pressures on our urban areas today—the pressures which necessitate this bill—are nothing short of tremendous. Not only do we find fully 70 percent of our total population living there; during the next 15 years their number will have been increased by 30 million—enough to equal the present combined population of New York, Los Angeles, Chicago, Philadelphia, Detroit, and Baltimore.

These new city dwellers will need homes, and schools and public services. By 1970 they will need over 2 million new homes each year. Before the close of this century they will need to double their present facilities and services. It is, as President Johnson suggested in his special message to Congress on cities, as if we had 40 years to rebuild the entire urban United States.

And these ever increasing pressures are being imposed upon cities which are already facing difficult problems. We have over 9 million homes today, most of them in cities, which are run down or deteriorated; over 4 million do not have even running water or plumbing. Many of our major population centers are in need of major surgery, to say nothing of the problems posed by suburban sprawl. These problems are particularly severe for the old, the poor, and the minority groups which are increasingly concentrated in our central cities.

This bill provides many of the tools which are necessary for the tasks at hand. Housing for the elderly and the disadvantaged, FHA mortgage insurance, continuation of urban renewal, more adequate compensation for those whose property is condemned, increased authorization for college housing, construction of community and neighborhood facilities, provision for more open spaces and others are all important if we are to wage successful war on poverty.

It is unfortunate that much if not most of the criticism of this bill is directed at its one new instrument—rent supplements for low-income families who cannot qualify for public housing but are unable to afford decent private housing. It is unfortunate for much of the criticism is misdirected and misinformed.

Here is how the program would, in fact, work:

First, the housing would be rental and cooperative housing restricted to non-profit and limited dividend corporations and cooperatives.

Second, the families to be aided would be low-income families who cannot afford decent private housing by paying one-fourth of their income.

Third, the income ceilings would be set individually for each community in order to reflect different cost levels. They would also differ for family size.

Fourth, in addition to being low income, the family would have to be either elderly, handicapped, displaced by Government action, or now living in sub-standard housing.

Fifth, the family would pay one-fourth of its income for rent and the rent supplement would make up the difference between that amount and the fair market rental of the unit. When a family's income rose to the point where one-fourth of its income would cover the rent, the supplement payments would stop.

This program would enable American private enterprise to construct and finance and own over the next 4 years approximately 500,000 decent dwelling units for low-income Americans. It would enlist the energy and imagination of churches, unions, cooperative, and civic minded groups. It would reduce the impact on the Federal budget of direct Government financing on the whole cost of a unit. And it would provide a flexible formula—a formula that would extend aid to families when they need it, that would curtail aid when their incomes rose, and that would terminate it when they could afford housing on their own. It is a sound program and it should be approved.

As I indicated initially, Mr. Chairman, this bill will not solve all of our Nation's housing needs. They, quite properly, are the primary responsibility of private investment and local initiative. But the Federal Government does have a legitimate role to play and responsibility to fill. This role is met by this bill and I urge its support.

(Mr. WIDNALL asked and was given permission to revise and extend his remarks previously made during general debate.)

Mr. RHODES of Arizona. Mr. Chairman, as chairman of the Republican policy committee, I rise to report the position taken by the committee on this bill.

The policy committee cannot endorse this bill in its present form.

Our primary objection to the bill as now written centers around the rent supplement proposal contained in H.R. 7984.

This section of the bill is completely unacceptable to Republicans, as it will be, I am sure, to most Americans.

It would destroy the incentive of low-income families to better their housing situations. It would freeze permanently many low-income families into housing they might try to escape otherwise. It would discriminate against all those Americans not included in the program whose rent dollar would be worth about one-half of that of those in the program.

This proposal is foolish. It is expensive. It is dangerous. It should be stricken from the bill.

Mr. Chairman, I include in the RECORD at this point the statement of the policy committee on this bill:

We cannot endorse H.R. 7984, the Housing and Urban Development Act of 1965, in its present form.

The administration's rent supplement proposal contained in section 101 of this bill is completely unacceptable. The proposal would kill the initiative of the American family to improve its living accommodations by its own efforts. It would kill the incentive for homeownership and would make renters the wards of the Government. It is a complete departure from the ordinary American way of doing things.

From the outset of the hearings on this bill it has been apparent that section 101, rent supplements, was in deep trouble. Even those persons who normally support broader housing legislation have been unrelenting in their criticism.

The proposed program is essentially a subsidy for middle-income families including those well above median income level. It is a program without effective standards and qualifications.

We are certain that the American public will refuse to buy this incredibly wide open subsidy proposal once it is fully advised as to the potential evils of the program. This is a system of making the rent dollar of the beneficiary worth up to double or more the rent dollar of the unassisted taxpayer. It is unequal opportunity in housing by Government fiat. It is legislated discrimination against the self-sufficient citizen.

The Republican policy committee urges that section 101, the rent supplement proposal, be stricken from the bill.

Mr. PATMAN. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. Flood, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7984) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities, had come to no resolution thereon.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 553. Joint resolution making continuing appropriations for the fiscal year 1966, and for other purposes.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7060) entitled "An act making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain inde-

pendent agencies for the fiscal year ending June 30, 1966, and for other purposes."

The message further announced that the Senate agrees to the amendment of the House to Senate amendment numbered 10 to the above-entitled bill.

FARM LABOR IN THIS COUNTRY

(Mr. COHELAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COHELAN. Mr. Speaker, I have asked for a special order of 1 hour at the close of regularly scheduled business today to review the current and objective situation in regard to farm labor in this country.

Unfortunately, a combination of circumstances beyond my control made it impossible for me to make these remarks as originally scheduled last Thursday.

The topic, however, is important. American crops are being harvested this year almost entirely by American farmworkers. Their employment and their income is up significantly and I again encourage all Members who are concerned with this much discussed and frequently misunderstood subject to be present and to participate.

THE NAVAL RESERVE; FIFTY YEARS OF SERVICE

(Mr. HORTON asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous matter.)

Mr. HORTON. Mr. Speaker, as I stand here, over half a million men and women of the Naval Reserve are prepared to defend us, should our national security be threatened. Though we realize it too infrequently, we are continually comforted by this thought. Security seems to be a fact of American life. For 50 years, the Naval Reserve has offered ready reinforcement to our Regular Navy. On the occasion of this golden anniversary, it is especially appropriate that we pause to review the development and honor the achievements of our Naval Reserve.

In 1915, Congress created the Naval Reserve as we know it. Prior to that time the Reserve emerged from its Revolutionary War stage, the "state navy," to the State Naval Militia, used extensively during the Spanish-American War.

By the end of World War I, 30,000 officers and 300,000 enlisted personnel, 60 percent of the total naval forces, were reservists serving in active duty. In World War II the Reserves contributed 87 percent of the active Navy personnel. In the Korean war more than 155,000 reservists, 60 percent of all Navy officers and 23 percent of the Navy enlisted men, were called to serve. Exceptional duty and heroism became the norm for these men. During 1 month of the Korean war, 6,000 of the 8,000 combat

sorties were flown by Naval Reserve fliers.

Since that time, thousands of America's naval reservists have been called to active duty, willing and trained to defend this country at the call of the President. This was true in October of 1961 when 49 ASW ships and 18 ASW air squadrons gave lightning support to our ASW forces of the fleets in the Berlin crisis.

Today there are 126,000 reservists in drill-pay status with thousands of others in nonpay status. Our Naval Reserves man 452 training centers and 18 air squadrons. Thirty-eight destroyer types and twelve minesweepers are ready for immediate mobilization. Two hundred and twenty-six air Reserve squadrons are available on 24-hour notice.

Two fleet Reserve divisions composed of 650 men, the largest per capita Naval Reserve affiliation in the Third Naval Reserve District serve my own community of Rochester, N.Y. Aboard the minesweeper U.S.S. *Prowess*, reservists participate in training maneuvers, and perform vital rescue and search operations on Lake Ontario. There units reinforce our regular naval operations and serve as liaisons to Canadian Reserve components. An inspiration to local citizens, they attract prospective naval officers and enlisted candidates and symbolize the strength of our national defense posture.

Mr. Speaker, we may never be able to reward fully the selfless service of our naval reservists. Yet with pride and sincerity, we salute the advancement of the Naval Reserve in the past 50 years and pledge our support to those who will continue to defend our independence as a nation in the years ahead.

ANNIVERSARY OF BATTLE OF KOSSOVO

(Mr. DERWINSKI (at the request of Mr. BURTON of Utah) was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DERWINSKI. Mr. Speaker, today is the anniversary of a tragic event in the history of the Serbian people. On June 28, 1389, the Battle of Kossovo ended in the Turkish horde destroying the brave forces of the Serbian people, and five centuries of bondage followed.

The Serbs eventually regained their freedom, but since World War II, they have been suffering under the domination of Soviet imperialism.

Therefore, I join the Serbian people in the fervent wish that they may soon realize success in their struggle to achieve independence from their oppressive Communist rulers. All who share and understand their feelings as a captive nation hope that they will once again be free. The Tito dictatorship is not the government these brave people deserve.

Mr. Speaker, may I once again remind the Members of the resolutions pending before the House Rules Committee to establish a Special Committee on the Captive Nations. The resolution which I have introduced, House Resolution 15,

very appropriately includes Yugoslavia as a captive nation. The people of Yugoslavia are certainly denied their freedom by Tito just as much as are the peoples of the Soviet Union and the other captive nations of Eastern Europe.

The Serbian-Americans and all the other American groups working to preserve the spirit of freedom in their own oppressed homelands are united in their desire that Congress act on these resolutions so that the Communist colonization of their countries can be exposed and condemned.

(Mr. ASHBROOK (at the request of Mr. BURTON of Utah) was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

[Mr. ASHBROOK'S remarks will appear hereafter in the Appendix.]

(Mr. ASHBROOK (at the request of Mr. BURTON of Utah) was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

[Mr. ASHBROOK'S remarks will appear hereafter in the Appendix.]

UNITED STATES AND PANAMA— ENDLESS APPEASEMENT?

(Mr. UTT (at the request of Mr. BURTON of Utah) was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. UTT. Mr. Speaker, a year and a half ago, January 9-12, 1964, the people of our country were shocked by the sanguinary violence of attempted Panamanian mob invasions of the Canal Zone that overwhelmed the zone police force and required the use of our Armed Forces to protect the lives of our citizens and to prevent damage to the Panama Canal.

Prior to and subsequent to those attacks, there were many illuminating addresses in the Congress dealing with various angles in the overall interocean canal problem, most notably by my most distinguished and scholarly colleague, the gentleman from Pennsylvania [Mr. FLOOD]. His contributions in the way of carefully documented studies, and prophecies came true, are unsurpassed and are listed in a timely address to the House by my colleague, the gentleman from Texas [Mr. THOMPSON] in a comprehensive bibliography under the title "Isthmian Canal Policy of the United States—Documentation, 1955-64."

Among recent authoritative and analytical articles on United States-Panama relations is one by Prof. J. Fred Rippy, distinguished North American historian specializing in the field of U.S. diplomacy in the Caribbean, published in the summer of 1964 issue of *Modern Age*, the quarterly review of the Foundation for Foreign Affairs of Chicago, Ill.

Because this contribution of Dr. Rippy is a valuable addition to the cumulating literature on interocean canal problems, I quote it as part of these re-

marks and commend it for reading by all concerned with Isthmian policy questions. The indicated article follows:

THE UNITED STATES AND PANAMA— ENDLESS APPEASEMENT?

(By J. Fred Rippy)

A few years ago, in a volume dealing with foreign aid by the Government of the United States ("Globe and Hemisphere," Chicago: Regnery, 1958), I wrote: "To international benevolence, once begun with gallant fanfare, there appears to be no end—or call it mutual aid and the result will be the same if the mutuality is vastly modified by immense disparities in wealth, actual or assumed." The little Republic of Panama is an impressive illustration of the soundness of this statement.

Somewhat smaller in area than the State of South Carolina, Panama has a population (though thrice as numerous as it was 60 years earlier) of scarcely more than 1,100,000. It is composed mainly of mixed elements, Negroes, and mulattoes forming the vast majority. Indians and mestizos have almost disappeared since early colonial times. Pure whites probably account for no more than 6 percent of the total; but, together with a few mulattoes, they own most of the wealth of the country and control its news media and its Government. In fact, until a few years ago, the economy, the Government, and almost everything else in Panama were controlled by 30 or 40 families. As in many countries in Africa, the Orient, and Latin America, the wealthy and moderately affluent are rather scarce, while the great majority live in poverty. But with increasing literacy, the development of modern means of global communication, and the rise of communism, the inhabitants of Panama, like the masses in many other retarded countries, have become discontented and restless, the ready victims of manipulation by demagogues and radical intellectuals, supported by bureaucrats and a few well-to-do politicians who denounce foreigners and foreign nations and blame them for the misfortunes of Panama's poor, thus tragically oversimplifying a very complex problem.

Stated very bluntly, the United States has become the scapegoat in Panama, utilized by the wealthy oligarchy in unnatural alliance with extremists of all types, to divert attention from political and economic inefficiency, greed, corruption, and injustice. And it has been rather easy to assign that role to the United States not only because it is actually one of the most affluent nations in the world but because of the contrast in levels of living in the Canal Zone and in other parts of Panama and adjacent countries. In fact, this contrast serves as a bonanza for the manipulators of popular sentiment during periodic national elections.

Nobody has computed or ever can compute the precise value of the benefits derived by the Republic of Panama from the United States as the result of Theodore Roosevelt's eager acquisition of the Canal Zone that bisects Panama's national domain and the concession to construct the Panama Canal. Benefits that might be measured in dollars cannot be accurately determined because some of them depend upon statistics that no longer exist or may never have been fully recorded or collected, while others—such as national independence (achieved late in 1903 with Roosevelt's aid) and large-scale improvements in sanitation and health—defy measurement in monetary terms. Whatever the value of these benefits—tangible and intangible, material and psychological—they have not satisfied the politicians and some of the intellectuals of Panama, and such of its citizens as have been swayed by the harangues of office-seekers and the propaganda of Communists and other extremists. And yet one significant fact stands out amid

[From the Nashville (Tenn.) Tennessean, Feb. 11, 1965]

ADMIRAL STEPHENSON, STATE NATIVE, DIES

WASHINGTON.—Services for Rear Adm. Charles Scott Stephenson, 76, retired Navy surgeon, will be at 11 a.m. Monday at Fort Myer, Va.

Burial will be in Arlington National Cemetery.

Admiral Stephenson, a native of Hickman County, Tenn., died Tuesday in Bethesda Naval Hospital after a heart attack.

The body is at Hines Funeral Home.

Admiral Stephenson was graduated in 1912 from the Vanderbilt University School of Medicine and joined the Navy the same year.

His overseas duty included tours in the Philippines, China, Japan, and Samoa. During World War II, Admiral Stephenson headed the typhus commission for allied forces.

Since his retirement in 1945 he made his home in Washington.

Survivors include his widow, Mrs. Naomi Ackley Stephenson; a daughter, Mrs. Susan Pellecchia, Portsmouth, Va.; a son, Stephen Stephenson, Alexandria, Va.; two sisters, Mrs. Louise Lovell, Nashville, Tenn., and Miss Elizabeth Stephenson, Centerville, Tenn.; three brothers, C. Douglas, London, England, Claude B., Centerville, Tenn., and C. Guy Stephenson, Goshen, N.Y., and six grandchildren.

[From the Nashville Banner, Feb. 11, 1965]

ADM. C. S. STEPHENSON'S FUNERAL SET MONDAY

Funeral services for Rear Adm. Charles Scott Stephenson, middle Tennessee native considered a world authority on tropical diseases, are to be held at 11 a.m., Monday at Fort Myers Chapel in Arlington National Cemetery near Washington.

Admiral Stephenson, 76, died Tuesday night in Bethesda Naval Hospital, Washington. He was hospitalized Friday night with double pneumonia. The body is at S. H. Hines Funeral Home on 14th Street in Washington.

Admiral Stephenson was born May 22, 1888, at Aetna in Hickman County, the son of the late Dr. Charles Stephenson and Mrs. Frances Byran Stephenson. He attended Hickman County schools and the old Nashville Bible School, now David Lipscomb College.

He graduated from Vanderbilt University Medical School in 1912 and practiced medicine a year with his father at Centerville. In 1913, he entered the Naval Medical Corps and was assigned to the Philippine Islands, later serving in China and Japan. During World War I he received the Purple Heart for action in France, where he served with U.S. Navy artillery units whose batteries were being fired from railroad cars.

Following the war he was stationed at Samoa and served as an official of the military government there, returning to the United States in the 1930's for assignment to the War College in Washington.

During World War II, he served as head of the Typhus Commission for the Allied Nations and was stricken by two heart attacks in Damascus and a third in the Suez Canal while en route to Australia, where he was taken to recuperate.

He was returned to the United States from Australia and retired near the end of the war.

Admiral Stephenson was kept as a Navy consultant after retirement and also worked in pension research activities for the Disabled American Veterans, making his home at 4457 Q Street NW., in Washington.

He was a member of the Episcopal Church.

Admiral Stephenson was recognized throughout the world as a leading scientist in the tropical disease field and especially on typhus research. He received an hon-

orary degree from Duke University and near the time of his retirement was a recipient of the William Gorgas Award.

He was awarded the Legion of Merit in 1947 and also listed among his awards the Mexican Campaign Medal, Yangtze Patrol Medal, and Marine Corps Expeditionary Medal.

He was a member of the Advisory Council to the U.S. Public Health Service and the Tennessee Valley Authority Malarial Control Commission. He served as a representative of the Navy Department on the National Research Council and as a delegate to the Pan-American Scientific Congress at Rio de Janeiro. He was an honorary life member of the American Social Hygiene Association.

He is survived by his wife, Mrs. Sonya Naomi Ackley Stephenson, who under the stage name of Sonya Laten was an understudy at the Metropolitan Opera; a son, Stephen Gordon Stephenson, Alexandria, Va.; a daughter, Mrs. Joseph Pellecchia, Portsmouth, Va.; three brothers, C. W. Stephenson, London, England, a retired squadron leader of the Royal Air Force; Guy Stephenson, owner of the Goshen Laboratories, Goshen, N.Y.; and Claude B. Stephenson, Centerville, Tenn., attorney; two sisters, both retired teachers, Mrs. Louise S. Lovell, 6532 Jocelyn Hollow Road, Nashville, and Miss Frances Elizabeth Stephenson, Centerville; five grandchildren; and several nieces and nephews, including Dr. Charles Stephenson of 871 Rodney Drive, Nashville, and Dr. Joanne Linn, Jocelyn Hollow Road, Nashville.

Another nephew, Douglas Stephenson, was graduated from Vanderbilt University and is chief of staff at a Battle Creek, Mich., hospital.

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

(Mr. GONZALEZ (at the request of Mr. KREBS) was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. GONZALEZ. Mr. Speaker, the war against poverty cannot be won if we lose the battle with the slum and the fight for urban progress. Those who oppose the Housing and Urban Development Act of 1965 would undermine the antipoverty campaign being waged across the land. Poverty cannot be fought unless we fight the slums, the dilapidated and substandard housing, and the urban blight which are the breeding grounds of poverty. The housing program, and H.R. 7984, which extends and improves the housing program, is, in my opinion, the most essential weapon we have in the war against poverty.

In the Housing Act of 1949, Congress declared:

The general welfare and security of the Nation and the health and living standards of its people require housing production and related community development sufficient to remedy the serious housing shortage, the elimination of substandard and other inadequate housing through the clearance of slums and blighted areas, and the realization as soon as feasible of the goal of a decent home and a suitable living environment for every American family, thus contributing to the development and redevelopment of communities and to the advancement of the growth, wealth, and security of the Nation. The Congress further declares that such production is necessary to

enable the housing industry to make its full contribution toward an economy of maximum employment production, and purchasing power.

Mr. Speaker, this Nation can have no other public policy so long as the conditions it is designed to meet exist. We have in the United States today 5 million housing units which are either dilapidated or deteriorating or lacking some or all plumbing units. This is part of the reason why I support the Housing and Urban Development Act of 1965 and why I urge every Member of this House sincerely interested in the plight of the poor and the continued prosperity of the economy to vote for it and against all crippling amendments.

There has been a good deal of criticism of the rent supplement proposal contained in title I of the bill. Some of this criticism has been well-intentioned and constructive. In fact, the original proposal was amended in committee in several respects, and, I believe, strengthened. This is often the result of the free exchange of ideas characterized by public hearings. Representative WILLIAM A. BARRETT, chairman of the housing subcommittee, on which I have the honor to serve, deserves enormous credit and gratitude for the manner in which the hearings on H.R. 7984 were conducted and for the excellent legislation which we have before us today.

But criticism is sometimes ill-intentioned and destructive. Much of what has been said about the rent supplement plan falls in this category. From the beginning, there has been those who would destroy the efforts by our Government to achieve the goal of "a decent home and a suitable living environment for every American family." Those who are of this mind are using the occasion of this bill to slow down and ultimately defeat the Federal housing program which has done so much and which has so much to do.

The duplicity of those who oppose the housing program is exemplified by the criticism of the rent supplement plan. For example, the opponents say that rent supplements are "the way of the socialistic state," and in the next breath proclaim that rent supplements will destroy public housing. This kind of doubletalk reveals the motives behind the criticism and discredits both ends of the argument.

The rent supplement proposal is sound and the rest of the bill is sound. We are providing for 60,000 additional units of low-rent housing annually, more units of public housing than we have had in a long time. We are extending the housing for the elderly program, FHA insurance operations, urban renewal, college housing, and many other facets of the housing program necessary to the maintenance and development of our economy, and to the carrying out of the public policy. It is a good bill.

(Mr. GONZALEZ (at the request of Mr. KREBS) was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

[Mr. GONZALEZ' remarks will appear hereafter in the Appendix.]

GILBERT BILLS—SITUS PICKETING AND REPEAL OF SECTION 14(b) OF TAFT-HARTLEY ACT

(Mr. GILBERT (at the request of Mr. KREBS) was granted permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. GILBERT. Mr. Speaker, I wish to call to the attention of my colleagues in the House, my testimony before the Special Labor Subcommittee of the House Education and Labor Committee on my bill, H.R. 2611, to repeal section 14(b) of the Taft-Hartley Act, and my testimony before the same subcommittee on my bill, H.R. 8994, the situs picketing bill, to amend section 8(b)(4) of the National Labor Relations Act.

TESTIMONY OF HON. JACOB H. GILBERT BEFORE SPECIAL SUBCOMMITTEE ON LABOR, HOUSE COMMITTEE ON EDUCATION AND LABOR, MAY 25, 1965

Mr. Chairman and members of the subcommittee, I appear before you to urge approval of proposals to repeal section 14(b) of the Taft-Hartley Act, which authorizes State laws prohibiting union shop agreements in labor-management contracts. My bill, H.R. 2611, is one of the bills being considered.

Federal law permits the union shop, under which all employees must join the union within a specified period, normally 30 days, after being hired. However, in 1947, by including section 14(b) in the Taft-Hartley Act, Congress yielded over to the States the right to enact right-to-work laws which ban the union shop. I know of no comparable provision in any Federal law where in Federal jurisdiction is yielded to the States. I feel that Congress should make the union shop provision the law of the land, just as other provisions of the Taft-Hartley Act.

State legislation to ban union security has masqueraded under this deceptive title, right-to-work. This is a misleading term used as a weapon to weaken procedures and obstruct institutions established for peaceful, constructive labor-management relations. I quote former Secretary of Labor James Mitchell, when he said several years ago: "They call these right-to-work laws, but that is not what they really are. In the first place, they do not create any jobs at all. Second, they result in undesirable and unnecessary limitations upon the freedom of the working man and their employers to bargain collectively and to agree on conditions of work."

Mr. Chairman, I believe in collective bargaining, and I also believe we must have union security. When a majority of employees join a union, they should be entitled to negotiate a union security with their employers. The rights and interests of the majority should prevail. All workers receive the benefits of collective bargaining whether they are union members or not, and the union is required to deal fairly with all employees in negotiating contracts and handling grievances, regardless of union membership. Under the right-to-work provision, an employee enjoys the fruits of the benefits of the union, but he is not required to join and pay dues. Section 14(b) limits union security agreements; it infringes on the rights of workers to negotiate freely with employers, and makes it possible for the beneficiaries of unionism to refrain from sharing in its responsibilities.

Thus, the union shop is a matter of justice, requiring only that those who share the

benefits and safeguards of the union contract, bear their fair and equal share of the responsibility. In this respect, I want to quote a statement by Samuel Gompers, the father of labor unions, made in 1905 when unions were in their infancy: "The union shop, in agreement with employers, is the application of the principle that those who enjoy the benefits and advantages resulting from an agreement shall also equally bear the moral and financial responsibilities involved."

The repeal of section 14(b) will go a long way toward eliminating wasteful and unproductive conflicts which have divided workers and employers for 18 years. As Mr. George Meany, president of the AFL-CIO, pointed out in his testimony to you, in the past 8 years alone, the AFL-CIO has been engaged in more than 40 battles over right-to-work laws, which were extremely costly in money, and man-hours, and in addition, upset established collective bargaining relationships, bringing conflict into labor and management dealings.

President Lyndon B. Johnson, in his recent Labor Message to Congress, said: " * * * with the hope of reducing conflicts in our national labor policy that for several years have divided Americans in various States, I recommend the repeal of section 14(b)."

I have long felt that one of the main purposes of the right-to-work laws has been to undermine union strength. By draining unions of financial strength, they weaken the ability of unions to participate vigorously in collective bargaining and to fully represent the rights of the workingman. In order to function in an effective and responsible way, a union needs the stability and security of regular dues payments.

The success of President Johnson's Great Society, and especially the war against poverty, depends on adequate wages. Many are of the erroneous opinion that right-to-work laws are responsible for higher wages. However, statistics show that in the right-to-work States, the per capita income is lower than in States which do not have them. I believe it has been shown that the State that undermines legitimate union strength is undermining itself. Thousands of employers have learned the value of good-faith collective bargaining, as is evidenced by the repeal of the right-to-work law in Indiana, and the defeat of the proposal in New Mexico.

Mr. Chairman, in the past I have supported labor legislation which would provide the proper climate for fair bargaining. I urge repeal of section 14(b). This restrictive legislation is out of step with our times; it should be repealed in the interest of our national economy and peaceful labor-management relations.

TESTIMONY OF HON. JACOB H. GILBERT BEFORE SPECIAL LABOR SUBCOMMITTEE OF THE HOUSE EDUCATION AND LABOR COMMITTEE, JUNE 22, 1965

Mr. Chairman and members of the subcommittee, I appear before you in support of H.R. 6363, and my own identical bill, H.R. 8994, referred to as the situs picketing bill, to restore the economic rights of the building and construction trade unions.

In clause (8)(b)(4)(B) of the Taft-Hartley Act, outlawing secondary boycotts, Congress sought to protect neutral employers from labor disputes in which they were not involved. This clause declares it to be an unfair labor practice for a union involved in a dispute with an employer to bring pressure upon another firm with which the employer is doing business.

The bill we are here considering would correct this inequity by adding a provision to that section of the act stating that the secondary boycott clause shall not prohibit picketing or a strike on a construction site in the course of a lawful labor dispute

if such action is not in violation of an existing collective bargaining contract.

This amendment would reverse the Denver Building Trades ruling and would remove inequitable restrictions on activities of the building trades unions at construction sites. It would restore to the building trades the right of peaceful picketing on the site of construction jobs—a right enjoyed by factory employees in a labor dispute.

Let me just briefly recall to you the Denver Building Trades case in 1949. From the time of that decision, of the National Labor Relations Board, the injunctive processes of the courts have been employed to limit seriously the economic rights of the trade unions in the building and construction industry.

Judge Fahy, former NLRB general counsel, who wrote the unanimous opinion of the U.S. Court of Appeals for the District of Columbia, in the Denver case, concluded that the picketing at the site of construction was not a true secondary boycott. I quote Judge Fahy: " * * * the usual secondary boycott or strike is against one who is not a party to the original dispute. It is designed to cause a neutral to cease doing business with, or to bring pressure upon the one with whom labor has the dispute. It seeks to enlist this outside influence to force an employer to make peace with the employees of labor organizations contesting them * * *." He said the situation in the Denver case was not of this character and pointed out precisely why it was not.

In 1951 the Supreme Court reversed the decision of the court of appeals and applied the secondary boycott clause to a labor dispute in a case that arose in Denver. This decision of the Supreme Court constituted an unfair restriction on the economic activities of the building and construction unions at the site of building and construction jobs. The strong dissenting opinions said the ruling virtually eliminated a trade union's right to strike on a construction job, a right guaranteed to all labor by section 13 of the Taft-Hartley Act.

Mr. Chairman, the proposal before this subcommittee is not a new one. It has been before Congress for many years. A number of Members of the House have introduced it, and Senators McNAMARA and KUCHEL have introduced bills in the Senate. It has had bipartisan support in Congress and in the executive branch. Presidents Eisenhower and Kennedy supported it, as does President Johnson.

I would like to quote former President Eisenhower's 1954 message to Congress:

"The true secondary boycott is indefensible and must not be permitted. The act must not, however, prohibit legitimate concerted activities against other than innocent parties. I recommend that the act, be clarified by making it explicit that concerted action against * * * an employer on a construction project, who, together with other employers, is engaged in work on the site of the project, will not be treated as a secondary boycott."

Such legislation was considered by this committee and favorably reported in the 86th Congress, but as you know, certain differences concerning the language of the bill killed its chances of passage. Agreement has now been reached among the various groups within the labor movement, and we have once again offered legislation to correct this inequity.

The 1961 report of the Committee for Economic Development which was compiled by a distinguished group of panelists, stated:

"It is difficult, if not impossible to picket one subcontractor with whom a legitimate dispute exists without affecting the work of the primary or other subcontractors. Insofar as these effects are limited to a prime contractor and the subcontractors respon-

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

JUNE 28 (legislative day, JUNE 25), 1965.—Ordered to be printed

Mr. SPARKMAN, from the Committee on Banking and Currency, submitted the following

REPORT

together with

INDIVIDUAL AND MINORITY VIEWS

[To accompany S. 2213]

The Committee on Banking and Currency, having considered the same, report favorably a committee bill (S. 2213) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, urban mass transportation, and community facilities. and recommend that the bill do pass.

INTRODUCTION

GENERAL

The Subcommittee on Housing held hearings on March 29, 30, 31, April 1, 2, 5, 6, 7, 8, and 9, 1965, to consider some 16 bills ¹ and amendments relating to the various housing programs and other matters dealing with mortgage finance. These hearings resulted in a printed record of over 1,000 pages. Subsequently, the subcommittee met in executive session on April 28 and 29, May 12, 13, and 18, and on June 4, to consider these measures, the testimony received during the hearings, and other matters presented to it in connection with 1965 housing legislation. At the conclusion of these sessions the subcommittee made its recommendations for 1965 housing legislation to the committee. After executive sessions on June 22, 23, and 24, 1965, during

¹ S. 506; S. 519; S. 644; S. 712; S. 786; S. 946; S. 1182; S. 1183; S. 1202; S. 1354; S. 1532; S. 1549; S. 1577; S. 1617 S. 1618; and S. 1720.

which the committee considered the subcommittee's recommendations and other bills and proposals, an original bill was drafted by the committee and is reported for the consideration of the Senate.

In general, the committee bill can be divided into three categories: First, those provisions that would establish new programs; second, those provisions that would continue existing programs either by extending dates, or authorizing additional funds; and, third, those provisions that would amend, either substantively or technically, existing programs. These matters are discussed fully in the main body of the report. The committee bill is a broad and complex one and is, in general, in keeping with the administrations proposals to extend all existing housing programs for a 4-year period, that is until October 1, 1969. The bill can also be viewed as an all encompassing effort to help solve many of the problems of housing and community development in our Nation.

PRESIDENT'S HOUSING AND COMMUNITY DEVELOPMENT MESSAGE

On March 2, 1965, the President sent his housing and community development message to the Congress. In general the committee was impressed by this message for it proposed a program of action to solve not only many of the problems in the field of housing but also in the equally challenging field of urban development. The message indicated that the President is aware of the housing problems of the people of this Nation and that he is aware of the many problems which face the communities of this Nation. The Chief Executive indicated to the committee that he would like to have from the Congress not only the old tools which have been given to the executive branch for combating these problems but also many new tools with which to fight the problems of unbridled growth and of decay that so materially affect the homes, communities, and lives of our people. The President's message, like the committee bill, was broken into three parts. The Executive requested a new rent supplement program to assist in housing disadvantaged persons—the elderly, handicapped, and those displaced or occupying substandard housing. His message requested assistance for homeowners in urban renewal areas by a way of rehabilitation grants. He requested a FHA insurance program for land development. He requested a program of basic water and sewer facilities to help our smaller communities give these services and facilities to their people and to expand such facilities for the needs of the future. He requested a program for neighborhood facilities to help communities add dimensions to daily life and to the family living in those communities, and he requested a broader program of open space land by adding to the existing program the beautification of such land.

In addition, the President asked the Congress to continue, on a modified basis, the existing housing programs which have proven their ability to meet the important needs of the people. The President's message was subsequently followed with his 1965 recommendations for housing and community development legislation. These recommendations were contained in Senate bill S. 1354 which was introduced in the Senate on March 4, 1965.

The committee bill reported to the Senate follows in general the legislation requested by the President.

TITLE I—SPECIAL PROVISIONS FOR DISADVANTAGED PERSONS

FINANCIAL ASSISTANCE TO ENABLE CERTAIN PRIVATE HOUSING TO BE AVAILABLE FOR LOWER INCOME FAMILIES WHO ARE ELDERLY, HANDICAPPED, DISPLACED, VICTIMS OF A NATURAL DISASTER, OR OCCUPANTS OF SUBSTANDARD HOUSING

Section 101 of the bill would establish a new program of Federal assistance through rent supplements to enable private enterprise to build modest housing for low-income families at prices they can afford.

The committee has consistently worked over the years in an attempt to frame legislative aids to provide housing for low-income families. While considerable progress has been made in past legislation, the committee is gratified that in this year's bill we have been able to incorporate new forms of assistance which, with the extensions and improvements of existing programs authorized by the bill, will help provide decent, safe, and sanitary housing for thousands of families presently unable to afford anything but substandard housing.

Since the end of World War II, there has been a remarkable increase in new housing production. This accelerated production pace can be attributed in large part to the energy and resourcefulness of American private enterprise, and it has redounded to the benefit of the Nation.

It has become increasingly clear to the committee, however, that lower income families have not been able to participate fully in the benefits of this great burst of new housing production.

A number of existing Federal and State housing programs have been of significant value in helping low-income families to obtain standard housing. However, as helpful as these programs have been, they reach only a very small part of the total number of these families. Of the approximately 1.6 million housing starts last year, only a small proportion were units assisted under Federal or State programs designed to help low-income families.

There are almost 8 million American families who still live in substandard housing. The great majority of these families are below the income level needed to afford decent housing.

Sixteen years ago, Congress and the American people pledged themselves to—

the realization as soon as feasible of the goal of a decent home and a suitable living environment for every American family.

This is our national housing objective. Commendable strides have been made toward achieving that objective, but for too many American families the pledge remains unredeemed. The committee recognizes that to redeem this pledge requires a comprehensive housing program that will provide a substantial volume of housing designed to serve families of low income. The committee has concluded that housing for lower income families can be produced in sufficient supply only through enlisting the experience and resources of private enterprise.

The committee bill, therefore, contains a new program designed to help meet the housing needs of low-income families by harnessing private enterprise. This is the program of rent supplements. The President has characterized it as "the most crucial new instrument in our effort to improve the American city." The committee is in accord with this view. It is further of the opinion that the program possesses great potential for meeting a housing need long unfulfilled,

and that it will place the country significantly closer to achieving its national housing objective.

How the program would work

Section 101 of the bill would establish a program of rent supplement payments on behalf of lower income families who are elderly or handicapped, who are displaced from their homes by governmental action, who are occupants of substandard housing, or whose homes are extensively damaged or destroyed by a natural disaster. Through rent supplements these families would be able to afford the rentals on privately constructed, privately financed, and privately owned standard housing designed to meet the needs of lower income families.

The rent supplement payments authorized by the bill would be made with respect to housing built by private nonprofit or limited dividend corporations or by cooperatives, and financed by section 221(d)(3) market-interest rate mortgages insured by FHA (profit sponsors would be excluded).

The sponsor would select the occupants, subject to qualifications relating to eligibility, which would be checked by local offices or agencies designated for this purpose by the Housing Administrator.

The amount of the rent supplement payments with respect to any dwelling would be the difference between the full rent for the dwelling unit and 25 percent of the income of the family occupying that dwelling. Incomes of tenants, except the elderly, would be recertified every 2 years, or more frequently if necessary, by local offices and agencies designated for this purpose. A procedure for recognizing significant increases in family income or windfall increments to family assets would also be followed. As the income of a tenant increased, the rent supplement payments would be reduced accordingly, until the tenant could pay the full rent. At that time, rent supplement payments with respect to that tenant would cease, but the family could continue to live in the unit.

The rent supplement payments authorized by the bill could also be made with respect to units rented under a lease with option to purchase. The committee expects that this program will involve cooperative housing projects, and sales type projects where units such as row or detached houses would be rented initially but would be so designed that they later could be transferred to individual ownership, as the income of the tenant rises to the point where he can afford to purchase the unit.

Under the rent supplement program provided by the bill, the Housing Agency would enter into a separate contract with the owner of each project in which tenants are to receive the benefit of rent supplement payments. The contract would provide for rent supplement payments by the Housing Administrator to the owner during the period in which the project is covered by an FHA-insured mortgage with the maximum term for any such contract being set at 40 years.

The contract would specify the number of units in the project to be made available to tenants for whom rent supplement payments would be made, subject to a minimum number established by the Administrator as necessary to carry out the purposes of this section and with the requirement that the units agreed upon be reserved for a reasonable period of time for occupancy by low-income families eligible for rent supplements. It would specify a maximum dollar amount to be paid annually by the Administrator to the owner of the

project based on the total rent for the number of units in the project to be made available for rent supplement payments. The contract would provide that the amount of monthly payments to be made will be determined on the basis of the total of the amounts required by way of a rent supplement payment for each particular tenant. It would also provide that these amounts will be adjusted periodically as tenants move out, as new tenants move in, and as there are changes in the income of tenants receiving the supplement payments.

Experimental program with below-market interest rate housing

This section of the bill would also authorize, on an experimental basis, the payment of rent supplements with respect to housing built by private nonprofit or limited dividend corporations or by cooperatives, and financed with section 221(d)(3) below-market interest rate mortgages. In addition, housing for the elderly would be eligible for rent supplements under this experimental program. This includes all housing constructed under the direct loan senior citizens housing program and FHA section 231 housing where the mortgage financing the housing is endorsed for insurance after enactment of the bill.

Only 10 percent of the amounts appropriated for the purpose of making rent supplement payments could be used in connection with this experimental program and rent supplement payments could not be made with respect to more than 20 percent of the dwelling units in any of the properties.

This experimental program will provide experience as to the kind of rentals that can be achieved by combining below-market interest rate financing with a rent supplement and the feasibility of having in a project a limited number of families eligible to receive rent supplements.

FNMA special assistance could be made available as a backup if needed to finance the housing assisted with Federal payments under the program. A local workable program for community improvement would be required with respect to the housing in any community where Federal assistance is being provided for code enforcement, urban renewal, or public housing, and with respect to such housing in any community for which a workable program was required and in effect at the time Federal assistance was provided for code enforcement, urban renewal, or public housing.

Need for the program

Existing programs cannot alone meet the housing needs of low-income families.

The low-rent public housing program is, and will continue to be, the basic tool for assisting low-income families to obtain decent, safe, and sanitary housing. In the course of its nearly three decades of operation, the public housing program has proven its worth many times over, providing standard housing for nearly 600,000 low-income families who would otherwise have no alternative but to live in slums. Valuable as the public housing program is and has been however, it cannot by itself fully meet the housing needs of low-income families. The current waiting list for low rent units has already reached 500,000 families. It is a harsh fact that in recent years the program has been unable to stimulate the construction of more than 30,000 new low rent units a year. There is clearly a pressing need for new programs in addition to this basic tool for low-income housing.

There are also specific programs already in operation designed to meet the needs of lower income elderly and handicapped families. The public housing program has concentrated more and more in recent years on providing housing designed for these specialized needs. The direct loan senior citizens housing program, initiated in 1959, has been concerned exclusively with this problem. In addition, the FHA section 231 program is aimed at the housing needs of the elderly.

These programs cannot, alone, fully satisfy the housing needs of the more than 2 million lower income elderly and handicapped families who cannot afford standard, privately owned housing. The public housing and direct loan programs to date have been able to provide, in the aggregate, less than 30,000 units designed for this purpose. The FHA program, while it has been of substantial help to more affluent elderly families, is not aimed specifically at assisting those of lower income. The rent supplement program is needed, if we are to meet fully the housing needs of our low-income elderly and handicapped families. In this connection, it has been estimated that fully 25 percent of the units provided under the rent supplement program will be occupied by elderly families.

The rent supplement program would not be a substitute for any of the programs discussed above. The rent supplement program would provide additional new units to supplement those provided by these programs. With its bold new approach and its potential for providing housing units in great volume, this new program would constitute a dynamic and much needed means of meeting the housing needs of lower income families.

The following table on the number of families of low-income living in substandard housing for selected cities gives some idea of the number of families eligible for rent supplements in these cities. In addition to such families, the low-income elderly, the low-income displaced and the low-income affected by a natural disaster, or the low-income physically handicapped would be eligible. The table also contains data on public housing units in the same areas.

Families for whom rent supplements may be paid

Special care has been taken to assure that rent supplements would be available only on behalf of families that need them in order to obtain standard housing, and only for so long as that need continues.

The only families eligible to receive *any* rent supplement would be those who, pursuant to criteria and procedures established by the Housing Administrator, have incomes that do not exceed the maximum amount that can be established for occupancy in public housing under the Federal public housing law, the United States Housing Act of 1937.

Along with a statement of income, an applicant would also be required to present a statement of his assets. Despite the fact that an applicant's income might technically qualify him for a rent supplement, he would nonetheless be ineligible if his assets exceeded established limits.

In addition to the above limitations, families or individuals would also have to demonstrate, as a condition to eligibility, that they have been displaced by governmental action, that they are elderly or physically handicapped, or are occupying substandard housing, or that their home has been destroyed or extensively damaged by a natural disaster.

The amount of the rent supplement that could be paid on behalf of any family found eligible would, under no circumstances, exceed the difference between the full rent for the dwelling unit it would occupy and 25 percent of the income of that family. Thus, if the rent for the particular unit was \$120 a month and the family had an income of \$4,800 a year (or \$400 a month), the maximum rent sup-

plement that could be paid on behalf of that family would be limited to \$20 a month—or the difference between 25 percent of its income (\$100) and the full rent for the unit (\$120). Moreover, as the family's income increased, the rent supplement would be reduced accordingly until, when its income reached \$480 a month (or \$5,520 a year) the supplements would cease entirely.

These safeguards would assure that the rent supplement program would help only those families who are truly in need of assistance in obtaining standard housing and that such assistance would be given only so long as the need continued to exist, and no longer.

Low in cost and of modest design

The rent supplement program would be limited to housing constructed in accordance with the standards set for the existing 221(d)(3) below-market interest rate moderate-income housing program. Under that program, FHA may insure a mortgage only if the rentals required to amortize the mortgage are no greater than the rent that can be paid by a moderate-income family in the area.

Mortgage limits for each community are restricted to what is necessary to build in that community a garden-type project of modest standards. Elevator-type projects are permitted only if they can be built within the cost limitations prescribed for garden-type projects.

There will be no luxury-type apartments provided under this program. The average amount of a mortgage per unit under the existing below-market interest rate program has been approximately \$12,500. This, it can be expected, would be the average mortgage amount under the rent supplement program as well. The aim of this new program is primarily to provide standard housing for families not able to obtain it in the private market. Costs can and would be kept to a minimum, both in terms of the cost of construction itself and the land on which the projects would be built.

Cost of program

The bill would provide a definite dollar limit on the amount to which the Federal Government can be committed under the rent supplement program.

The Federal rent supplement payments contracted to be made under this program prior to July 1, 1966, could not exceed requirements for appropriations of \$50 million per annum and this amount would be increased by \$50 million on July 1 of each of the years 1966, 1967, and 1968. To the extent the incomes of tenant families increase, the rent supplement would decrease, and significantly smaller amounts of the total authorization would be needed and used.

This investment would enable private enterprise to construct and finance, over the next 4 years, 500,000 standard housing units suited to the needs of low-income families.

The volume of housing needed to meet the needs of these families can be supplied best through the resources and initiative of private enterprise. The rent supplement proposal in the bill would use private enterprise.

The committee believes the rent supplement program would make possible many desirable achievements:

- (1) It would allow greater flexibility in helping people with low incomes to obtain standard housing.

(2) The amount of the Federal payment would vary in accordance with the need. It would be larger for those of lower income and smaller for those of higher income.

(3) The amount of the Federal payment would be reduced as family income rises, and would be discontinued when the income is sufficient to pay an economic rent.

(4) Families could continue to occupy their dwelling units and pay the full required rent when they no longer need Federal payments.

(5) The variation in the amount of rent supplement payment, in accordance with income, would permit a mixture of income levels in projects under this program.

(6) It would encourage the active sponsorship of civic-minded lending institutions and business leaders.

EXTENSION OF FHA SECTION 221 PROGRAMS; MODIFICATION OF INTEREST RATE

Extension of programs

Section 102 of the bill would continue for 4 years FHA's authority to insure mortgages under its section 221 programs of housing for low- and moderate-income persons (from September 30, 1965, to October 1, 1969). This includes extension of the (d)(2) low downpayment sales housing program, the (d)(3) below market and market interest rate programs for rental and cooperative housing, and the (d)(4) rental housing program.

The low downpayment and liberal mortgage terms permitted under the section 221(d)(2) program have made homeownership possible for over 140,000 families. Many of them could never have become homeowners without this program. The low rents made possible by the below market interest rate for mortgage loans under the section 221(d)(3) program have helped provide good housing for nearly 13,000 families whose incomes range generally from \$4,000 to \$6,000. The program was slow to get underway but is now moving at a satisfactory rate with about 66,000 units in the pipeline but not yet finally completed.

These programs are FHA's principal programs for assisting housing for low- and moderate-income families, and displaced families. They are an important part of the total package of Federal housing programs.

The following tables demonstrate the family income and monthly rent for units financed with FHA insurance under section 221(d)(3) below market rate.

Median incomes for families living in 221(d)(3) below market rate housing by standard census regions

Modification of interest rate

The section 221(d)(3) below market mortgage insurance program was established by the Housing Act of 1961 to provide long-term, low-interest loan assistance to aid in the financing of rental and cooperative housing for displaced families and families of low and moderate incomes. The loans may be repayable over a period not exceeding 40 years at an interest rate not less than the average current yield on all marketable obligations of the United States, adjusted to the nearest one-eighth of 1 percent. For housing projects financed under this program FHA has waived its mortgage insurance premium.

When the section 221(d)(3) program commenced operations in 1961, the interest rate was 3½ percent. Subsequently the rate was increased to 3¾ percent and in 1964 the rate was raised to 3⅞ percent. The committee is advised that current trends indicate that the program interest rate is expected to rise again on June 30; this time to 4¼ percent.

The rising interest rates, and increasing construction costs, are reflected in a steadily increasing average mortgage amount per unit built under the program. This has had an effect upon rents. The median rent per unit in projects for which commitments were issued in 1963 and 1964 has risen, for all types of units, from \$87 to \$102; for two-bedroom units the median rent has risen from \$90 to \$103.

This committee is determined that the intended objective of low interest rates which help produce moderate rentals for units constructed under this program shall not be frustrated by the erratic fluctuations of an arbitrary interest-rate formula.

Since one of the objectives of the section 221(d)(3) program is to assure the availability of low-interest-rate loans, the committee has concluded that it is justified in taking action to assure the accomplishment of this objective. Accordingly, the bill places an interest-rate ceiling of 3 percent on mortgages which may be insured by FHA under the section 221(d)(3) below-market interest rate program. Should the statutory formula produce a lower interest rate, that rate would apply.

REHABILITATION GRANTS TO HOMEOWNERS IN URBAN RENEWAL AREAS

Section 103 would authorize grants to low-income homeowners in urban renewal areas to finance repairs and improvements necessary to bring their homes up to certain standards. These would be standards for decent, safe, and sanitary housing established by the local housing code or the urban renewal plan for the area.

These grants would be used only in hardship cases, generally to avoid displacement of homeowners who have no other means of financing repairs and improvements which must be made to their homes. The amount of a grant (which would be made from urban renewal capital grant funds) could not exceed \$1,500.

The bill would permit grants to an individual or family whose annual income is not more than \$3,000 in an amount not in excess of the lesser of (1) the actual and approved cost of the repairs and improvements, or (2) \$1,500.

In the case of an individual or family with an annual income in excess of \$3,000, there would be the additional requirement that the grant could only cover that portion of the necessary repairs and improvements which could not be paid for with a loan which could be amortized, along with that individual's or family's other monthly housing expense, with 25 percent of its monthly income. This limitation would require most individuals and families with incomes over \$3,000 to finance the cost of such repairs and improvements with loans. In some cases these loans can be obtained through private financing. For those unable to afford and obtain private financing on comparable terms, direct 3-percent interest loans would be made available under the provisions of section 312 of the Housing Act of 1964.

Repairs and improvements for which grants authorized by this section could be made available include the repair or replacement of plumbing facilities, such as piped hot and cold running water, hot water heaters, flush toilets, or bathtubs, and such other basic rehabilitation work as is necessary to bring the dwelling unit up to the standards for decent, safe, and sanitary housing established by the applicable codes or the urban renewal plan for the area.

Successful execution of an urban renewal rehabilitation project requires bringing all the property in the area up to standard. If homeowners cannot bring their property up to the required standards, it must be acquired and either rehabilitated or torn down by the local public agency. At present, many low-income homeowners cannot afford repairs and improvements necessary to bring their property up to the required standards. The rehabilitation grants authorized by the bill would help these people stay in their upgraded homes as well as help achieve more successfully neighborhoodwide rehabilitation and conservation objectives.

Most important, the grant would help reduce the displacement of longtime residents who would otherwise be required to seek some other place to live where it might be hard for them to adjust and more expensive to the Government to relocate them.

PARITY OF TREATMENT FOR THE HANDICAPPED AND ELDERLY IN PUBLIC HOUSING

Section 104 of the bill would establish parity of treatment between the handicapped and the elderly in low-rent housing by extending to the handicapped the advantages of certain provisions presently applicable to the elderly. Thus, the units occupied by the handicapped would be eligible for the special contribution of up to \$120 per year presently authorized for units occupied by the elderly and displaced. The maximum room cost limits would also be increased by \$1,100 with respect to housing designed specifically for the handicapped, as is presently provided in the case of housing designed for the elderly. In addition, the handicapped would be exempted from the requirement that there be a 20-percent gap between the upper rental limits for admission to a proposed low-rent housing project and the lowest rents at which private enterprise is providing a substantial supply of standard housing.

MODIFICATION OF INTEREST RATE ON LOANS TO PROVIDE HOUSING FOR ELDERLY OR HANDICAPPED

Section 105 of the bill would establish a ceiling of 3 percent on the interest rate under the direct loan program for housing the elderly (sec. 202 of the Housing Act of 1959).

One of the most urgent needs in the field of housing is the provision of suitable accommodations for our elderly citizens. This older age group is growing more rapidly than the population as a whole and, generally speaking, its incomes are substantially lower. To meet this need the Congress in the Housing Act of 1959 authorized a program of direct low-interest rate loans to nonprofit corporations to build housing for the elderly. There has been a rapidly growing interest in the program.

The committee has great faith in the usefulness of this program and has increased the authorization for appropriation of funds to carry out the program from \$350 to \$500 million. In addition, the bill would impose a ceiling of 3 percent on the interest rate applicable to loans under this program. Should the existing statutory interest rate formula produce a lower interest rate, that rate would apply.

The present program lending rate (based on the existing statutory interest rate formula) is $3\frac{3}{4}$ percent and would rise to 4 percent on June 30, 1965. The bill by reducing the interest rate to 3 percent would have the effect of reducing the monthly debt service on a typical \$12,000 dwelling unit from \$44.57 to \$38.87.

By cross-reference in existing law, the interest rate on the rural elderly housing direct loan program (sec. 515 of the Housing Act of 1949) would also be fixed at a maximum of 3 percent.

RELOCATION PAYMENTS UNDER THE URBAN MASS TRANSPORTATION ACT OF 1964

Section 106 of this bill would make available to individuals, families, business concerns, and nonprofit organizations displaced by federally aided urban mass transportation projects after March 4, 1965, the same payments as those provided under the urban renewal and low-rent public housing programs.

Under these provisions, payments to families and individuals could not exceed \$200 for moving costs and property loss. In addition, families and elderly individuals displaced on and after March 4, 1965, could receive a relocation adjustment payment of up to \$500 to assist them in relocating in standard accommodations.

For businesses, the payment could not exceed \$3,000 for moving expenses and loss of property, except that where actual moving expenses are greater than \$3,000 the maximum relocation payment to a business concern could not exceed the total of the actual moving expenses. Independent businesses displaced after March 4, 1965, which have average annual net earnings of less than \$10,000 could receive additional readjustment payments of \$1,500 under present law. This payment is increased by another provision in the bill to \$2,500.

Under the present provisions of the mass transportation law the relocation payments may not exceed \$200 in the case of an individual or family, or \$3,000 (or, if greater, the total certified actual moving expenses) in the case of a business concern or nonprofit organization. By regulation, payments are limited to \$25,000 or actual moving expenses, whichever is less. The subject of actual moving expenses of business is discussed later in this report.

MORTGAGE RELIEF FOR HOMEOWNERS WHO ARE UNEMPLOYED AS THE RESULT OF THE CLOSING OF A FEDERAL INSTALLATION

Section 107 of the bill would require the Federal Housing Commissioner and the Administrator of Veterans' Affairs to provide relief to distressed mortgagors in the event of a closing of a Federal installation.

The committee has been concerned over the problems of servicemen and employees of Federal installations that are being closed. Many of these people have purchased homes with FHA and VA mortgages. They will now be forced to move or be unemployed as a result of the closing or partial closing of these installations.

In many of these areas where installations are being closed a serious impact is being made on the economy of the areas. This means these homeowners may lose all or substantial portions of their equities in their homes. The housing market in these areas may become such that it will be impossible for them to sell their homes at prices that will enable them to recover their equities. In some cases, the homeowners will be faced with deficiency judgments on their mortgages.

Under this provision a moratorium would be provided on payments of principal, and if necessary, interest on FHA-insured and VA-guaranteed mortgages for owner-occupant mortgagors who are unemployed as the result of the closing of a Federal installation. A distressed mortgagor would apply to the FHA or VA, as appropriate, for a certificate of moratorium. This certificate would entitle him to have the principal and interest payments on his mortgage, to the extent provided in the certificate, made by the FHA or VA directly to the mortgagee.

As a condition to the issuance of a certificate, the FHA or VA would have to determine that the mortgagor was not in default with respect to any mortgage requirement other than failure to pay princi-

pal and interest, and that the proposed Federal payments are the only alternative to foreclosure.

The assisted mortgagor would have to agree to reimburse the Federal agency involved after the moratorium period ends. The moratorium payment would be terminated in a year after issuance of the moratorium certificate or 30 days after the mortgagor ceased to qualify as a distressed mortgagor or on the date the mortgagor became in default with respect to any condition in the mortgage other than principal and interest payments, whichever event occurs first.

ACQUISITION OF CERTAIN PROPERTIES SITUATED AT OR NEAR MILITARY BASES WHICH HAVE BEEN ORDERED TO BE CLOSED

Section 108 of the bill would authorize the Secretary of Defense to acquire one- or two-family housing situated at or near a military base or installation which the Department of Defense, subsequent to November 1, 1964, ordered to be closed. To qualify for this relief, the owner of the house would have to establish that he has been employed or performing military duty at the base or installation, that the closing of this base would result in the termination of his employment, and that the base closing has resulted in there being no present market for the sale of his house upon reasonable terms and conditions.

The provisions would be applicable to FHA, VA, or conventionally financed housing.

The price of a property to be acquired by the Department of Defense would be established on the basis of the average price at which comparable properties were sold during a representative period prior to the announcement by the Department of Defense of its intention to close the base.

Properties acquired by the Department of Defense would be transferred to the FHA for disposal. The FHA would be authorized to use any amounts received from the management or sale of these properties to defray its expenses in managing the properties. Any surplus receipts not required for such expenses would be deposited with the Treasury as miscellaneous receipts.

By an amendment to section 223 of the National Housing Act, the FHA Commissioner would be authorized to insure a mortgage financing the purchase of these houses without requiring that the transaction meet the eligibility requirements of FHA's regular home mortgage insurance programs.

TITLE II—FHA INSURANCE OPERATIONS

LAND DEVELOPMENT

Section 201 of the bill would add a new mortgage insurance program to provide assistance to land development. This would consist of a new title X, "Mortgage Insurance for Land Development," which would be added to the National Housing Act.

The new title would provide FHA mortgage insurance of private loans to private subdivision developers who may or may not themselves be homebuilders. This will encourage the provision of a large supply of properly planned and improved residential building sites.

It is expected that the mortgage insurance device, which has proven so helpful in providing a stimulus to the construction of good homes, will prove equally helpful in providing a stimulus to the production of good building sites in good neighborhoods.

The availability of FHA credit assistance during the land development stage will enable private developers to provide a more steady supply of improved building sites in an orderly and more economical manner. It should also open up cheaper suburban land for planned economic and marketable development and help to combat the rapid rise of prices for homebuilding sites.

The new assistance to land development that would be authorized by the new title X would help provide the improved land needed for many homes that must be constructed over the coming decades to meet housing needs. The activities financed with aid under the title involve substantial capital requirements which the mortgage insurance would assist in meeting.

One of the most persistent problems of the small builder (who may wish to build perhaps 10 or 20 houses a year) is the difficulty of securing a steady supply of reasonably priced improved building lots. They simply do not have the cash or credit facilities or even the time needed to undertake a land purchase and land improvement program to supply them with an even flow of good building sites in well-planned large subdivisions. The homebuilding industry as a whole is finding it increasingly important to market houses on the basis that the entire neighborhood or the entire new subdivision will provide unusual attractions for the home buyer. This trend in the industry becomes increasingly apparent every building season. Unless small homebuilders participate in this trend, the danger of their being squeezed out of the market will increase.

The proposed new program of FHA mortgage insurance for land development would be helpful to small builders in a number of ways, and the bill (sec. 1008 of the new title X) requires the Federal Housing Commissioner to administer it with this aim in mind. Basically, this program is a form of credit assistance which would open additional and more generous sources of credit to many types of persons engaged in providing desirable improved building sites. For example, under this provision, the small builder could join with other small builders to acquire and jointly develop a site commensurate with their combined needs and capacities for 1 or more years of home construction. The ability to pool equity, and the eligibility of fees for professional services under the land development mortgage, would enable the small builders to retain competent technical land development staff for the joint operation. Each builder could, however, retain his individual building and sales operation with respect to his own lots within the larger project.

Another way in which small builders may participate is by purchasing the desired number of contiguous lots from land developers who are not themselves homebuilders. Without the benefit of FHA credit assistance, such land developers are often forced (especially when mortgage funds become tight) to obtain credit backing or other participation from large- or medium-size homebuilders in order to enable the land developers to obtain the funds with which to prepare sites in a large subdivision. In return for such backing or other participation, the land developer must normally make firm commitments to the participating homebuilders under which the latter will have

first choice of the best blocks of improved lots, thus leaving random and inferior lots, if any, to smaller builders. The availability of FHA mortgage insurance will in very many cases make it unnecessary for land developers to make such advance commitments to large- and medium-size builders. Instead, the land developer can carry the site preparation stage with the insured FHA mortgage loan; sell lots on the free market; and thereby make additional improved lots available to smaller builders.

The increased availability of credit for rational and orderly development of well-planned suburban subdivisions would result in an increased supply of improved building lots at cheaper prices for all builders. Thus, the benefits to smaller builders would not be at the expense of medium-size and larger builders, but rather would result from overall increased production of good building sites for the market as a whole.

The activities financed under the title would include the acquisition of land and its improvement with water and sewer facilities, roads, streets, sidewalks, storm drainage facilities, and other site improvement work.

(a) Authority to issue mortgage insurance commitments under the title would expire on October 1, 1969.

(b) The mortgagor could not be a public body, thereby limiting the program to private land development.

(c) The insured mortgage loan could not exceed the lesser of (1) 75 percent of the Federal Housing Commissioner's estimate of the value of the property as of the completion of land development or (2) the sum of 50 percent of his estimate of the value of the land before development and 90 percent of his estimate of the cost of the site improvements. The insured mortgage amount outstanding could at no time exceed \$10 million.

(d) The maximum mortgage maturity on the insured mortgage for land development would be 7 years, and the committee expects the FHA Commissioner to set the lowest practicable ceilings on interest rates and premium payments. While the term of the mortgage for land development would be set at 7 years, the committee expressly removed the 7-year limitation on the term of the mortgage or loan to finance sewer and water systems. Such systems could be financed over a term determined by the Federal Housing Commissioner.

(e) The project would be required to represent a good mortgage insurance risk. That is, the risk should be acceptable to the FHA in view of the purpose of the program to provide credit assistance only for land development which contributes to sound and economic urban growth.

(f) The improvements and the development plan would be required to comply with all applicable State and local governmental requirements and the FHA's standards. The land development schedule would in all cases contemplate development within the shortest reasonable period consistent with sound development, and the development plan for the site would be required to be consistent with a comprehensive plan which covers, or with comprehensive planning being carried on for, the area in which the land is situated.

(g) All land development plans would also be required to be acceptable to the Federal Housing Commissioner as providing reasonable assurance that the land development will contribute to good living conditions in the area being developed, and that such area (i) will

have a sound economic base and a long economic life, (ii) will be characterized by sound land use patterns, and (iii) will include or be served by such shopping, school, recreational, transportation, and other facilities as the Commissioner deems adequate or necessary.

The land after development would be expected to be served by community water and sewer systems, whether such systems are privately or publicly owned. In addition, it is expected that such systems would be consistent with other existing or prospective systems within the area. Before insuring any land development mortgage, the bill would require the Commissioner to receive assurances that such systems would be regulated, in a manner acceptable to him, to protect the interest of consumers as to user rates and charges and methods of operation, and also as to terms of any sale or transfer of such systems.

The bill also contains a requirement for certification by the mortgagor of actual development costs to be made from time to time to assure that the outstanding balances of loans insured under the title during the course of land development will be appropriately limited to reflect both the actual costs of development and the release of improved parcels from the lien of the mortgage. The committee expects this to be administered stringently to prevent any "mortgaging out."

The administration's original proposal for the new land development program would have made financial assistance available through the medium of FHA insurance for the development of new communities and towns as well as for the development of larger residential subdivisions. After very careful consideration and deliberation, the committee did not approve the special aids for the development of new towns and therefore eliminated from the bill some \$500 million which would have been needed by the FNMA in its special assistance function to purchase land development mortgages secured by new communities or towns. While the committee believes that the provisions of the bill will be helpful in the development of economic and marketable subdivisions, it does not want this program to be used for land development which would, in fact, create independent new towns.

EXTENSION OF INSURANCE AUTHORIZATIONS

Section 202 of the bill would continue for 4 years (from the present termination date of October 1, 1965, to October 1, 1969) FHA's authority to (1) insure property improvement loans under its title I program, and (2) insure housing loans and mortgages under all of its other programs, except the section 221 program for low- and moderate-income housing which is continued by title I of the bill.

The FHA has now been operating for some 31 years and has, and is now, playing an all-important part in the general economy of this Nation. From 1934 through 1964 the agency has written approximately \$96.5 billion in home mortgage insurance. As of December 31, 1964, the agency had insured mortgages covering more than 7,300,000 homes and more than 1,100,000 dwelling units in multifamily housing projects. In addition, over 27 million property improvement loans (title I) had been insured.

Insurance remains in force on mortgages covering more than 4,600,000 homes and multifamily housing dwelling units with out-

standing mortgage balances of \$46.2 billion and on \$1.4 billion property improvement loans.

After payment of all expenses and loans, insurance reserves have been accumulated from retained earnings totaling more than \$1.1 billion which are available for possible future insurance losses and expenses.

The FHA started in 1934 with some three programs—the property improvement program (title I), the regular single-family sales program (sec. 203(b)), and the regular rental program (sec. 207). Today, the agency is administering some 24 active programs providing mortgage insurance for practically every type of homeownership mortgage as well as practically every type of rental unit mortgage.

The committee believes the FHA plays a very important role in the overall economy of this Nation and has, therefore, extended all FHA programs to October 1, 1969.

DOWNPAYMENT REQUIREMENT IN CASE OF LOW-INCOME-HOUSING DEMONSTRATION HOMES

Section 203 of the bill would permit the downpayment on FHA single-family homes which are proposed to be constructed under the low-income demonstration program to be paid by someone other than the low-income potential mortgagor.

It has come to the attention of the committee that a proposed low-income housing demonstration project involves the proposal that someone other than the mortgagor should be permitted to make the downpayment for a low-income family who is purchasing a home. It is the desire of the demonstration project sponsor that the home purchase should be financed under the FHA section 203(b) program. However, under the present provisions of section 203(b) of the National Housing Act a home purchaser is specifically required to make at least a 3-percent downpayment.

While the proposed demonstration project has not yet been completely worked out, the committee does not want the provisions of existing law to be an obstacle to the plans for the project. In order that there will be no difficulty in this respect, the committee has included a provision in the bill which would permit a downpayment to be made by someone other than the mortgagor where the mortgage is being insured by FHA under its section 203(b) regular home mortgage insurance program and the home purchase is under a low-income housing demonstration program.

MULTIFAMILY MORTGAGE LIMITS FOR FOUR OR MORE BEDROOM UNITS

Section 204 of the bill would permit an increased dollar limitation on the amount of a mortgage financing multifamily housing with dwelling units consisting of four or more bedrooms (except where the mortgage is insured under the sec. 810 program for the military). For example, under the regular rental housing program (sec. 207), the mortgage limit would be \$21,000 per dwelling unit (an increase of \$2,500) in the case of a family unit with four or more bedrooms. No change would be made in the existing limits for dwelling units containing no bedrooms, or one, two, or three bedrooms.

Prior to the Housing Act of 1964, the FHA was able to recognize additional rooms almost without limit as to number in the statutory

per room multifamily mortgage limits. While the former per room limits too often led to superfluous additional rooms to the detriment of design, they did permit the recognition of the cost of additional bedrooms. The committee was informed that the FHA has found, in working with the new family unit limitations added by the 1964 Housing Act, that the 1964 revisions do not contain adequate provisions for financing projects with large units having four or more bedrooms. For this reason, an additional dollar limitation is being proposed for four or more bedroom units. The committee believes this additional dollar limitation would enable the FHA to reflect properly the added cost of large units in the maximum mortgage amount and encourage production of accommodations for larger families where needed.

REHABILITATION IN URBAN RENEWAL AREAS

Section 205 of the bill would encourage more rehabilitation of housing for rent in urban renewal areas by removing an obstacle which unduly restricts the use of the FHA section 220 urban renewal housing program as it applies to nonoccupant owners of 1- to 11-family structures. Under the amendments of section 220 of the National Housing Act provided by this section, a nonoccupant mortgagor who intends to hold 1- to 11-family housing for rent would be entitled to a larger loan amount which would be more in line with that now permitted where the housing consists of larger multifamily structures. The amendments would liberalize and make section 220 more workable for financing the construction, purchase, or rehabilitation of housing in urban renewal areas.

This section of the bill would amend the FHA section 220 program (1) to increase the maximum amount of a mortgage which can be insured where the mortgagor is not an occupant of the property and intends to hold it for rent; and (2) where refinancing is involved, to permit existing indebtedness for improvement of the property to be included in the computation of the amount of a mortgage whether or not the indebtedness is secured by a mortgage against the property. Under existing law only indebtedness secured by the property may be included in the insured mortgage.

Under the proposed amendment, a nonoccupant mortgagor could obtain an insured loan for rehabilitation, purchase, or construction of a 1- to 11-family property for rent in an amount which is 93 percent (now 85 percent) of the amount that an owner-occupant of the property could receive. Under existing law, an owner-occupant may obtain a rehabilitation loan which does not exceed (1) 97 percent of \$15,000 of the estimated value before rehabilitation, plus 90 percent of estimated value above \$15,000 but not above \$20,000, plus 75 percent of value above \$20,000; or (2) the estimated cost of rehabilitation plus cost of refinancing. For new construction the loan can be up to 97 percent of \$15,000 or estimated replacement cost, plus 90 percent of cost above \$15,000 but not above \$20,000, plus 75 percent of the cost above \$20,000.

Since under this section of the bill a nonoccupant mortgagor could obtain 93 percent of the amount that could be obtained under either of these formulas, the amount he would obtain would, in effect, be approximately 90 percent of the value or replacement cost of the property, depending upon the formula applicable. In no case in-

volving refinancing of housing to be rented could the mortgage amount exceed the estimated rehabilitation cost plus refinancing.

Under the present law, a nonoccupant mortgagor of rental housing may obtain a mortgage in an amount only up to 85 percent of that permitted for an owner-occupant. In a case of refinancing and rehabilitation he may have a substantial equity in the property, but the 85 percent limit requires him to increase his cash outlay and equity more than he is willing to do.

A nonoccupant mortgagor who intends to sell the housing would continue, as the law presently provides, to be eligible for a mortgage up to 85 percent of the amount available for an owner-occupant, except that the mortgage amount can be the same as that permitted for an owner-occupant if the mortgagor places 15 percent of the mortgage proceeds in escrow pending sale to an acceptable owner-occupant within 18 months.

NONDWELLING FACILITIES FOR URBAN RENEWAL HOUSING

Section 206 of the bill would amend the provisions governing nondwelling facilities in an FHA section 220 project so as to permit the inclusion of more of such facilities under the mortgage than can be included under existing law.

Under existing law, the mortgage on such a project can cover nondwelling facilities such as stores, restaurants, garages, beauty parlors, doctors' offices, etc., which are judged to be necessary to serve the occupants of the project or other housing in the neighborhood. The law does not provide that general office space and space to be leased to commercial facilities which would serve a wider area can be included within the project. Under the bill, the Federal Housing Commissioner could permit such nondwelling facilities to be included in the project as he deems desirable and consistent with the urban renewal plan. However, the project would have to remain predominantly residential, and the Commissioner would also have to find that any nondwelling facilities included in the project are essential to the economic feasibility of the project and that the financing of these facilities would not result in a disadvantage to other business enterprises in the vicinity of the project.

The committee was informed that one problem in obtaining tenants for a project in an urban renewal area has been that prospective tenants will not move into an area that does not offer the wide variety of goods and services that might be found in an already established area. In many instances, prospective tenants for an urban renewal housing project would expect to find such stores and services which can be found in many of today's shopping centers.

In order to support stores and other services geared to service an area larger than "the neighborhood," these stores and services cannot rely entirely on the limited spending of housing tenants in the immediate area.

Under this proposal, in cases where it can be shown that the nondwelling facilities are essential to the economic feasibility of the project, and that the financing will not result in a disadvantage or unfair competition to other business enterprises in the area, the FHA could insure projects predominantly housing but which could include stores and office space. In this way, the time between initial and self-supporting occupancy of a housing project could be substantially

shortened. Also, this type of undertaking where desirable would serve the better interests of the urban renewal area as a whole.

LARGER INSURED MORTGAGES FOR SERVICEMEN

Section 207 of the bill provides for an increase in the limits on the amount of an FHA section 222 insured mortgage financing the home of a serviceman in the armed services or in the Coast Guard. These limits would be increased from \$20,000 to \$30,000. This larger maximum mortgage was requested by the Department of Defense in order to meet the housing needs of servicemen who cannot obtain public quarters at installations to which they are assigned. The downpayments required would be the lesser of 5 percent of the first \$20,000 of the appraised value of the property or such lesser amount as may be derived by applying the maximum ratio of loan-to-value provided under FHA's regular section 203(b) home mortgage program, and 15 percent of the value of the property in excess of \$20,000.

Under the present provisions of section 222 of the National Housing Act, a mortgage cannot exceed \$20,000 in amount. Housing construction costs and related expenses of homeownership have increased. The effective incomes of many career military members have also been increased by changes in the military compensation system. In high-cost areas in particular, the \$20,000 limit does not provide an adequate or appropriate home.

REFINANCING OF INSURED MORTGAGES

Section 208 of the bill would give the FHA the same authority to insure mortgages executed for the purpose of refinancing existing mortgages insured under any FHA-insured mortgage program as is now available for mortgages insured under sections 220, 221, 903, 908, and certain section 608 mortgages.

The principal amount of any refinancing mortgage cannot exceed the original principal amount or the unexpired term of the existing mortgage, except that if the Commissioner determines that an additional term will inure to the benefit of FHA the refinancing mortgage may have a term of not more than 12 years in excess of the unexpired term of the existing mortgage.

The committee believes this refinancing authority would serve a useful purpose in assisting mortgagors who encounter financial difficulties, especially those owning multifamily housing projects. This amendment would also serve to protect the interests of the mortgagee and of the FHA in marginal cases where the alternative to refinancing may be default and foreclosure. There does not seem to be any sound basis for limiting FHA's refinancing the authority, as is done by present law, to certain specified programs under the act.

CONSOLIDATION OF FHA INSURANCE FUNDS

Section 209 of the bill authorizes the FHA to consolidate all insurance funds into two funds; namely, a mutual mortgage insurance fund and a general insurance fund. The committee was advised that by consolidating the various FHA insurance funds it would streamline accounting procedures and would accomplish substantial economies

in the operations of the FHA, both in Washington and in the Agency's field offices.

The mutual mortgage insurance fund would be continued in its present coverage and form, and all other insurance funds and accounts would be consolidated under a single insurance fund—the general insurance fund. All title I property improvement loans would be registered for insurance, and mortgages under all of FHA's insurance programs would be endorsed for insurance under the general insurance fund, except those mortgages committed and insured under the regular section 203 home mortgage insurance program. The assets and liabilities of all of the current funds and accounts except the mutual mortgage insurance fund would be transferred to and become the responsibility of the general insurance fund.

Since its creation in 1934, the programs of the Federal Housing Administration have from time to time been expanded and broadened in order that it could be of increasing assistance in providing housing to meet the needs of all Americans. These goals have not yet been fully achieved and additional programs will undoubtedly be proposed and enacted into law in the future.

As new insurance programs have been authorized, new insurance funds or accounts have usually been created, thus requiring separate financing and accounting for the programs. These funds and accounts have grown from 2 in 1934 to 15 at the present time.

In the early 1950's it became apparent that, by reason of the small volume of insurance written under some of the special-purpose programs, revenues would be insufficient to maintain those programs on a self-supporting basis. Because of this, and in order to strengthen FHA's overall position and avoid the necessity of calling upon the Congress for operating funds, section 219 was added to the National Housing Act. That authorized the Commissioner to transfer moneys from any one or more insurance funds or accounts to any other fund or account, except the participating reserve account and the general surplus account of the mutual mortgage insurance fund.

The effect of section 219 was to give FHA all of the advantages and flexibility of single fund accounting but it left the agency burdened with the expense and necessity under the act for full and complete accounting for each of its present 15 funds or accounts.

While the maintenance of separate insurance funds affords complete financial information with respect to each of FHA's various insurance programs, such complete accounting and fiscal data on a continuing monthly basis are unnecessary for management purposes. Moreover, the maintenance of the separate funds complicates FHA's financial structure.

Under the proposed consolidation of funds statements would be provided monthly for the general insurance fund and the mutual mortgage insurance fund with respect to the status of the funds. Data would also continue to be supplied which is needed to evaluate the effectiveness of individual programs.

The proposed consolidation would reduce from 15 to 2 the number of monthly entries to be accounted for and later consolidated into a combined balance sheet and statement of income and expense. It would substantially reduce field reporting of expenses. The consolidation would also result in significant savings in the Treasury Department since the recordkeeping, issuance, exchange, and redemption

of debentures would relate to only 2 series of debentures rather than 22 series as at present.

The committee was advised that after consolidation, FHA would still be able to compute with reasonable accuracy the financial experience of individual programs, as the need might arise. The committee was also advised that special attention would continue to be given to income and loss experience under the section 213 cooperative housing program in compliance with the desire expressed in the conference report on the Housing Act of 1964. The semiannual and annual valuation of reserve requirements would continue to be prepared as in the past. In this connection the FHA Commissioner is directed to make a report on the experience of the individual funds and programs to the committee no later than January 31, 1966.

OPTIONAL CASH PAYMENT OF INSURANCE BENEFITS

Section 210 of the bill would authorize the FHA Commissioner to provide, at his option, on or after the enactment of the bill for the payment in cash (in lieu of debentures) of insurance benefits under all or a portion of FHA's insurance programs. The authority to issue debentures instead of paying cash would not be repealed and the Commissioner could use this authority if he determined at any time it was necessary to discontinue cash payments.

In those cases where commitments to insure were issued prior to the enactment of the bill, the mortgagees would be entitled to receive debentures and the settlement of their claim could be made in debentures. Cases where the commitment is issued after the enactment of the bill would be paid either in cash or in debentures at the option of the Commissioner.

Cash payments under this new authority would be in an amount equivalent to the face amount of the debentures that would have been issued, plus an amount equivalent to the interest which the debentures would have earned, computed to a date established by the Commissioner. In those cases where a mortgagee under his mortgage insurance contract is entitled to receive debentures, the mortgagee would still be entitled to receive payment in debentures rather than in cash if the mortgagee does not wish to accept a cash payment. Mortgagees filing insurance claims on mortgages insured under the section 220, 221, or 233 programs (urban renewal housing, low- or moderate-income housing, and experimental housing) after the Housing Act of 1961, now have in their insurance contracts the right to a cash insurance settlement. Also, lenders insuring home improvement loans under sections 203(k) and 220(h) have the right to receive cash insurance benefits.

The present procedure of issuing, reissuing, and redeeming debentures involves considerable administrative expense both to the FHA and to the Treasury Department. Also, the printing of the forms used for debentures is costly. The committee has been informed that if the FHA were to completely discontinue the issuance of debentures and adopt a plan for paying all insurance claims in cash, there would be an estimated annual administrative saving of \$300,000 to the Treasury and \$265,000 to the FHA, or a total of over a half million dollars annually. These savings would be realized insofar as the FHA is able to convert its procedures to paying insurance claims in cash.

APPROVAL OF TECHNICALLY SUITABLE MATERIALS

Section 211 of the bill would include a provision that the Federal Housing Commissioner shall adopt a uniform procedure for the acceptance of materials and products to be used in housing approved for loans it insures. Under this procedure any material or product which is technically suitable for the use proposed shall be accepted.

The committee's purpose in including this provision is to make certain that no materials or products which are technically suitable will be barred from use in FHA-financed housing. The committee believed that present practice often resulted in discrimination against many newly developed products which are either equally as suitable or more suitable than presently accepted materials. This practice has frustrated improvements in materials and the development of new ideas and has thus held back the technological advances in home-building which have been so outstanding in other industries.

By requiring the Commissioner to adopt a uniform procedure for the acceptance of materials, the committee hoped to eliminate many of these restrictions.

This new provision is not intended to require the Commissioner to set up his own laboratories for testing materials and products to determine their technical suitability. The committee believes that the Commissioner should be required to accept the findings of various recognized technical experts and private and governmental testing laboratories, in making his determination. The Commissioner's role in determining technical suitability will be that of evaluating the use of materials and products in connection with residential development. In making this evaluation, he will be expected to take into consideration both the effect that the use of the product or material will have on the marketability of the property and upon his mortgage insurance risk in insuring a mortgage on property where the product or material is to be used. It is not the committee's intention that this provision be used to require the Commissioner to accept products or materials that will increase his insurance risk or will affect the marketability of the property being purchased by the homeowner.

It is expected that the Commissioner will use reasonable judgment in setting up uniform and equitable procedures for evaluating the technical suitability of the products and materials. It is recognized that it will not be possible in all cases to use the same type of procedures in evaluating the different types of products and materials. However, it is expected that the Commissioner's procedures for such evaluation will be as uniform as practicable. It is also not the committee's intention that this provision be used as a means of forcing the Commissioner, through court action, to accept products and materials that he determines on the basis of objective research and testing, are not technically suitable for use in FHA-financed housing.

WATER AND SEWER FACILITIES IN CONNECTION WITH CERTAIN
FEDERALLY ASSISTED HOUSING

Section 212 of the bill would prohibit FHA and VA from financing new home construction if the housing is not served by a public or adequate community water and sewerage system unless (1) the property is served by a system approved by the FHA or VA under the

new mortgage insurance program for land development authorized by the bill, or (2) the property is situated in an area certified by appropriate local officials to be an area where the establishment of public or adequate community water and sewerage systems is not economically feasible.

The economic feasibility of establishing the public or adequate community water and sewerage systems shall be determined without regard to whether such establishment is authorized by law or is subject to approval by one or more local governments or public bodies.

The committee believes this requirement will help prevent water pollution and other health hazards resulting from housing being built without adequate community water and sewerage services. The provision is sufficiently broad, however, to permit the assistance of housing without these services where it is not possible for them to be provided as part of a community system at this time. Existing law provides Federal assistance to the provision of these facilities, and the bill enlarges and supplements these aids.

The committee does feel, however, that the FHA and VA should continue in their efforts toward making mortgage credit available in outlying and rural areas and in connection with such areas should view this section with full consideration given to the need for housing in such areas.

PROPERTY IMPROVEMENT PROGRAM UNDER TITLE I

Section 213 of the bill increases the limit on the amount of an FHA title I property improvement loan from \$3,500 to \$5,000 and permits the term of a loan to be up to 7 years, rather than the present maximum maturity of 5 years.

This liberalization of the program is consistent with the increases in the amounts of insured home mortgages provided in the bill. Just as home construction costs have increased, home repair costs have increased so that it is necessary to permit larger loan amounts if the program is to continue to serve its purpose of assisting homeowners in maintaining their properties and enlarging them to serve their increased needs as families grow in size. The longer term will help to keep the monthly financing costs within the reach of homeowners.

In recognition of some of the questionable experiences presently connected with the FHA title I property improvement program, the committee has included a provision which subjects a lender purchasing a property improvement loan from a dealer or home improvement contractor to the same defenses against payment which might be asserted against the dealer or contractor. Presently, the lender may take the loan instrument as a holder in due course.

The amendment is intended to encourage title I lenders to be more diligent in checking the dealers or contractors from whom they purchase title I loans. Under the present law, a lender can require a homeowner to pay the loan even though it may develop that the dealer or contractor did not perform their contract with the homeowner. The committee believes that the lenders should not rely upon this remedy and should instead be sure that the dealers or contractors are reliable and will perform their responsibilities.

EFFECT OF AMENDMENTS ON HOUSING NOT FINALLY APPROVED

Unless the provisions of the bill indicate otherwise, it is the intent of the committee that any amendments of the National Housing Act be made available, unless it is not practical, to applications for FHA insurance being processed if they have not yet reached final insurance endorsement.

NURSING HOME FACILITIES FOR MENTALLY HANDICAPPED

A proposal was received by the committee that language should be added to section 232 of the National Housing Act to include the mentally handicapped among those for whom nursing homes are provided with the assistance of FHA mortgage insurance.

The committee believes no amendment of this section is necessary and that financial assistance provided for nursing homes under the FHA section 232 program can be, and should be, made available for the mentally handicapped. Such projects would, of course, be subject to all prerequisites of existing law.

TITLE III—URBAN RENEWAL

GENERAL NEIGHBORHOOD RENEWAL PLANS

Section 301 of the bill would (1) eliminate the requirements of existing law that an entire general neighborhood renewal plan area qualify as an urban renewal area; and (2) require that all projects in such areas be initiated in 8 years rather than completed in 10 years, as is required in existing law.

The committee recognizes that the general neighborhood renewal plan provides an effective tool for the overall planning of large areas afflicted with slums and blight. This type of broad planning provides a basis for the staging of individual urban renewal projects consistent with the resources of the locality. Such staging of urban renewal projects can also be helpful in minimizing the social and economic impact of needed renewal activities on the residents of the area.

However, under existing law, the entire area covered by a general neighborhood renewal plan must be slum or blighted, deteriorated, or deteriorating, to be same extent as is required before an urban renewal project can be undertaken in the area. This restriction on including within the general neighborhood renewal plan subareas which are not in themselves so blighted or deteriorated as to require urban renewal activities has, in many instances, prevented the general neighborhood renewal plan from dealing with entire neighborhoods and fragmented the planning process.

The bill would permit the inclusion of such areas which are not in themselves so blighted or deteriorated as to require urban renewal treatment within the general neighborhood renewal plan, but which have problems specially related to those of the project areas. This would permit delineation of a GNRP area which may be more appropriate for overall study and planning than merely that portion where urban renewal activities are proposed. It would make possible, for example, study of the street capacities and requirements of an entire neighborhood rather than only those portions of the neighborhood scheduled to receive urban renewal assistance through an urban renewal project or projects.

In addition, the bill would ease the present requirement that all urban renewal projects in GNRP areas be completed in 10 years. The committee believed that this requirement was too restrictive because of the long time necessarily needed to complete urban renewal projects. However, it believed that a GNRP should not be undertaken unless the local community had feasible plans for carrying out urban renewal activities in the area within a reasonable period of time and believed that in no case should the period for initiating all projects within the area exceed 8 years.

THE COMMUNITY RENEWAL PROGRAM

The committee considered a request to make mandatory a community renewal program for cities of over 50,000 population as a prerequisite for urban renewal assistance. These programs have as their purpose the planning of local urban activities systematically as a program basis rather than merely in terms of individual and often unrelated projects. The Federal Government offers to make grants up to two-thirds of the cost of preparing and completing such programs. The committee decided against a mandatory requirement but recognized the desirability of cities completing such a plan before undertaking urban renewal and, therefore, urges that the Administrator encourage the use of this program as much as possible.

INCREASE IN AUTHORIZATION FOR CAPITAL GRANTS

Section 302 of the bill would increase the urban renewal capital grant authorization by \$2.9 billion, to \$7.625 billion. Of this amount \$675 million would become available upon enactment of the bill, \$725 million would become available July 1, 1966, and \$750 million on July 1 in each of the years 1967 and 1968. This new authority would permit a high level of urban renewal activity over a period of 4 years. It is geared to available local resources for financing and carrying out projects during this period.

The committee reviewed the progress of the program and was satisfied that the ever-increasing participation by American cities speaks for itself on the widespread acceptance that the program is an effective tool for the rebuilding and preservation of cities and therefore should be continued.

The committee recognizes that in spite of the widespread use of the urban renewal program and its many notable achievements, a serious problem of urban blight remains. Cities are caught in a vicious circle. They cannot, unaided, afford to carry out slum clearance, yet their slums are sapping their vitality and financial strength. It is unrealistic to expect cities to have sufficient resources to eliminate their slums entirely on their own. Only in partnership with the Federal Government can most slum clearance projects be carried out.

Nearly all available capital grant authority is now obligated, and the Housing Agency reports that it has a backlog of applications totaling over \$400 million. About 200 new projects requiring \$750 million in contract authority are expected to be ready for approval during fiscal 1966 and an increasing number are expected for 1967, 1968, and 1969.

The steady growth of the urban renewal program has demonstrated its wide acceptance by cities over the Nation, both large and small.

Although nearly all of our large cities are participating, about two-thirds of the communities involved have populations of less than 50,000.

The following table illustrates the growth in terms of the number of localities participating in the program and the number of urban renewal projects being planned or being carried out.

At the end of fiscal year—	Number of localities	Number of projects
1953.....	86	253
1958.....	331	554
1963.....	702	1,310
1964.....	777	1,636
1965 (May 31).....	806	1,783

In agreeing to the \$2.9 billion new authority for the 4-year period, the committee was aware of the large backlog of applications and of the ever-increasing number of new projects and the possibility that the gross aggregate dollar volume of applications would exceed the available obligational authority. Nevertheless, the committee felt that the current level of activity is a reasonable one and that the URA should carefully screen the applications and limit approval to those projects which fully comply with the intent of the law and in which the community fully demonstrates its capacity and willingness to bring about a timely completion of the project. The committee is aware of the poor public image created by too many incomplete projects, particularly those which seem to have come to a dead halt at the demolition stage. The committee strongly urges that the administration tighten its procedures to assure that additional projects for cities already participating in the program are approved only upon an adequate showing that the community is carrying out its existing projects successfully and has the need and capacity to undertake additional projects.

In considering the capital grant authorization, the committee gave serious thought to inserting in the law a tax recapture provision. Such a provision would require a locality to repay a part of the capital grant from increased tax revenues that obviously result from redevelopment financed with urban renewal assistance.

The committee did not accept such a provision because it did not have enough statistics and data on State and local taxing systems nor on the probable impact that such a requirement would have on the ability of cities to undertake such projects in consideration of possible legal and economic barriers. Last year a report was requested of the Housing Agency, which was made and may be found on page 120 of the hearings on S. 1354. The report is informative but is not in depth on this subject. A further study should be made by the Agency as a part of the overall study of urban renewal requested by another section of the bill. It is felt that the Bureau of the Budget as well as the Housing Agency have sufficient interest in the savings to the Government involved to cooperate in making the report sufficient for Congress to make a decision on this matter.

There are problems to be considered such as avoidance of the basic nature of the recapture being a tax, the possible interference with the fundamental purpose of Federal assistance to the cities for

urban renewal, and the complications of exacting a refund from several local sources such as school boards and other instrumentalities that may have benefited from increased local tax benefits. These must be weighed against the fact that recapture provisions could substantially ease the burden which the demand for capital grant funds places on the Federal Treasury, or the reuse of capital grant funds as they are recaptured.

Serious and thorough consideration should be given in the study to the complex problem of a fair allocation of Federal assistance to the cities for urban renewal and other local undertakings, the rationale of the present formula, and possible modifications in the future to reflect differential needs and financial abilities among the cities. A recapture requirement for specific projects without regard to these other considerations could be self-defeating.

Study of slum clearance and urban renewal program

Section 302 of the bill would also require the Housing Administrator to undertake a basic study of the slum clearance and urban renewal program and to report on such studies to the President, for submission to the Congress, not later than 2 years after the appropriation of funds for the study.

The urban renewal program has now been in operation for over 15 years. While the original enabling legislation has been amended on numerous occasions, the basic framework is still substantially that contained in the Housing Act of 1949. The committee believes that this is an appropriate time to conduct an overall reexamination of the program with a view toward making statutory and administrative changes to simplify program operations and to strengthen their effectiveness.

Carrying out urban renewal is admittedly a complex undertaking—probably far more complex than contemplated by the framers of the original legislation. Most of this complexity is intrinsic to the nature of the undertaking and to the legitimate concern to assure that the public purposes of urban renewal are achieved at minimal cost and disadvantage to the persons directly affected by program operations. But even so, this committee is concerned that administrative procedures have possibly proliferated beyond the point of maximum return. The committee is particularly concerned about the problems being faced by smaller cities which do not possess the staff resources to deal with complex procedures.

An effort to simplify administrative procedures is only part of the problem. It is proposed that there be undertaken basic substantive investigations of possible alternative approaches for the prevention and elimination of slums and blight. The present multiplicity of planning mechanisms should be investigated with a view of consolidation and rationalization.

While there have been many who have expressed concern about the length of time required to carry out urban renewal, the committee has never felt that it has had an adequate basis on which to judge this matter. To the extent that it is feasible to determine the length of time involved in private enterprise real estate operations involving the assembly of many parcels of land, the relocation of site occupants, the clearance of structures, and the carrying out of new development, the committee would like to have this done to establish

some base on which to judge the time involved in public urban renewal.

The Federal assistance formula should be studied in depth with consideration being given to new alternatives with more active participation by the States and a possible differential in the percent of Federal contribution based on need rather than on city size as at present.

Funds should be made available for special statistical studies by such organizations as the Census Bureau to obtain factual data on the many imponderable problems related to all facets of the program. For example more information is needed on the effect of displacement relocation on displaced families, elderly persons and business establishments, on the long-range effect of the program on land values, on local and Federal taxes and similar matters.

The study should also examine the special treatment needed for the rejuvenation of central business districts and downtown areas and the proper place of Federal urban renewal assistance in redeveloping such areas. Consideration should be given to establishing a special program for central business districts based on Federal loans repayable from increased tax receipts resulting from the redevelopment.

The subject of noncash grant-in-aid credit is one of the most troublesome that the Federal agency has to deal with. The fundamental theory upon which the present law is based, that such credits are necessary to the success of urban renewal and that they are the means of spurring the local communities to make necessary public improvements, should be reexamined. Data on the actual percent of urban renewal costs which are borne by the Federal Government plus an objective evaluation of the public improvement incentive theory may lead to a recommendation for a new approach to this subject.

Rehabilitation is another part of urban renewal which needs intensive study to develop more effective techniques for carrying it out. There is a great deal of support for avoidance of the bulldozers' approach through rehabilitation but despite the years of effort there are still very few illustrations of a successful rehabilitation project. Consideration needs to be given to the public relations aspect of the program and other devices for getting more support from the residents of the rehabilitation area without whom success is impossible.

The study should also come up with techniques which can be used to measure objectively the results of urban renewal activities in terms that are meaningful to the public and to the policy makers. If the Federal Government is to continue spending billions of dollars for this activity, more meaningful reports should be made to the Congress on the results rather than a mere recitation of dollars spent or projects started.

The committee recognizes that the scale and scope of the studies it would like to have carried out are far beyond the present capacities of the Housing Agency within the limits of its administrative appropriations. Therefore, the bill authorizes a special appropriation for this purpose in recognition that the success of such an undertaking depends upon its being adequately financed.

INCREASE IN NONRESIDENTIAL EXCEPTION

Section 303 of the bill would permit 40 percent of the new capital grant authority provided by the bill to be used for projects in areas

which are predominantly nonresidential both before and after renewal. Under present law, 30 percent of the aggregate amount of grants authorized after the Housing Act by 1959 may be used for nonresidential urban renewal.

During its consideration of the 1964 housing legislation, the committee expressed its concern about the proper relationship of renewal for residential purposes and renewal for nonresidential purposes. The committee deferred action on various proposals relating to nonresidential renewal and requested the Housing Administrator to submit a further report on experience with nonresidential renewal for consideration in connection with the 1965 legislation.

Based on that report, and on further testimony and observations of the urban renewal program, the committee understands that many of the so-called nonresidential projects involve substantial elimination of residential slums and blight and redevelopment for residential purposes. It is also clear that the improvement of residential conditions is dependent upon the overall economic viability of the community. Urban renewal is clearly needed to eliminate nonresidential blight and to provide for the orderly development of the institutional, commercial, and industrial functions of the community.

Because a tight limitation on projects being undertaken under the nonresidential exception would have a tendency to distort local urban renewal efforts, the committee believes that it is desirable to liberalize the present limitation and to depend more on other control factors to obtain the proper mix of residential and nonresidential redevelopment within each local community. It agreed, therefore, to increase the present limitation from 30 percent of aggregate grants not yet contracted for as of the acts of the 1959 Housing Act to 40 percent of the new funds authorized by the 1965 legislation. This will make available nearly \$1.2 billion of the new funds for this purpose.

THE CENTRAL BUSINESS DISTRICT

One very important aspect of the nonresidential exception issue is its application to the use of urban renewal funds for the redevelopment of central business districts or downtown areas. The committee considered a proposal which would change the basic law in several respects for the redevelopment of central business districts. The first of these relates to the eligibility criteria of the central business district for urban renewal assistance. Under present law an area must be a slum area or a blighted, deteriorated, or deteriorating area to qualify. Because of the peculiar nature of a central business district, the traditional interpretation of these terms do not usually fit the factors that are present in a functionally obsolete business district. Second, the public improvements that are usually built in a central business district generally serve the entire community rather than a local area as would be the case of a school, park, or recreation area in a traditional residential urban renewal area, thus they are not eligible as noncash grant-in-aid credits. Third, the viability of a community and, thus, the general welfare of its residents often depend on the presence of a strong economic base and the vitality of its centers of commerce, trade, and finance which are usually located in the central business district. Under the present 30-percent nonresidential exceptions, may such areas would be denied urban renewal assistance,

not because of standards applied to those specific areas but because of the arbitrary limitation applied at the national level.

The committee recognized the merits of the arguments in support of more attention being given to central business districts but was not ready to approve the proposed amendment which it believed would represent a sharp change in the direction of the program.

It is sympathetic to a reasonable use of the funds for this type of redevelopment and believed that a level represented by 40 percent of the new capital grant funds would provide the guidelines needed by the Administrator to provide assistance to such areas and at the same time keep the program closely identified with redevelopment areas which are predominately residential.

On the proposed changes relative to eligibility of central business districts, the committee did not have sufficient information to justify a change in the law, but on the contrary seemed to be satisfied that the law as now written is sufficiently flexible to qualify most "deteriorating" business districts as project areas.

On the question of noncash grant-in-aid credit, the committee was opposed to such a significant change in the law relative to the Federal share of the use of the central business district project until it had more data to make a decision. Projects in downtown areas are very costly undertakings involving tens of millions of dollars. Local expenditures for citywide improvements likewise involve very large sums of money which if fully accepted as grants-in-aid would result in the Federal Government paying nearly full share for the project.

The committee requests that the Housing Agency include this subject in its study and present recommendations to the Congress, and among other things consider the possibility of establishing a separate program having a separate capital grant fund and possibly a different Federal share formula insofar as central business district projects are concerned.

RELOCATION ADJUSTMENT PAYMENTS

Section 304 of the bill would increase from \$1,500 to \$2,500 the amount of the relocation adjustment payment authorized to be made to small business concerns displaced by urban renewal and public housing activities.

In the Housing Act of 1964, the Congress adopted a system of relocation adjustment payments which provided for a \$1,500 payment to such displaced businesses whose earnings were under \$10,000 per year. After further consideration, the committee believes this amount to be inadequate.

In the long run one of the most significant effects of urban renewal activities is the provision of a better environment for small businesses. However, the committee has a continuing concern about the immediate burdensome effect that relocation places on a small business and believes that a readjustment payment up to \$2,500 will help to compensate it for the losses sustained because of the displacement which are not otherwise compensated for.

MOVING EXPENSES FOR DISPLACED BUSINESSES AND NONPROFIT ORGANIZATIONS

The Housing Act of 1961 authorized the Housing Agency to pay to business concerns and nonprofit organizations displaced from an urban

renewal area their reasonable and necessary moving expenses and any actual direct losses of property (except goodwill or profit) up to \$3,000, or if greater, the total certified actual moving expenses. The Housing Agency has issued regulations limiting the maximum amount of the total certified actual moving expenses that may be paid with respect to any business displacement to \$25,000.

The committee recognizes the need within the Housing Agency for establishing administrative limits on the size of any business payment.

However, the committee is concerned that this flat dollar ceiling can result in hardship in certain cases and expects the Housing Agency to provide sufficient flexibility in its regulations to enable it to pay moving expenses in excess of \$25,000 when necessary to avoid undue hardship or an inequitable financial burden. In such a case the Administrator may wish to issue regulations to share the cost of the excess above \$25,000 in an appropriate ratio.

A bill, S. 1201, to implement the recommendations of a report by the Committee on Public Works of the House of Representatives, is now pending before the Senate Subcommittee on Intergovernmental Relations. It is hoped that after consideration this legislation will be passed to compensate properly families and business establishments in a fair and just manner for their expenses and losses suffered as a consequence of their displacement by urban renewal and other governmental activities.

DEMOLITION OF UNSAFE STRUCTURES AND CODE ENFORCEMENT

Demolition of unsafe structures

Section 305 of the bill would authorize the Housing Agency to make grants to communities to assist them in demolishing structures which, under State or local laws, have been determined to be structurally unsound or unfit for human habitation and which the community has the authority to demolish. The amount of any grant could not exceed two-thirds of the cost of the demolition of structures demolished.

The community may receive assistance for structures to be demolished and which are located in an urban renewal area. The community may also receive assistance for structures to be demolished and which are in areas not urban areas if (1) the community has an approved workable program for community improvement, (2) the demolition to be assisted will be carried out on a planned neighborhood basis and will further the urban renewal objectives of the community, (3) the community is carrying on a program of enforcement of its housing and related codes, (4) the structures to be demolished constitute a public nuisance and a serious hazard to public health and welfare, and (5) the governing body of the community has determined that all other available legal procedures have been exhausted to secure remedial action by the owners of the structures involved and that demolition by governmental action is required.

The committee has required that the demolition of structures located outside of urban renewal areas can be assisted only when the demolition is being carried out on a planned neighborhood basis to assure that Federal funds provided for such demolition are used only as part of a systematic plan to protect or improve a designated neighborhood in which the community is making an intensive effort to prevent the onset of slums and blight through code enforcement or other means.

Federal funds should not be used to support casual, sporadic, and intermittent demolitions which may benefit individual owners of property next to, or near, nuisances, but which are not part of a systematic plan to protect or improve a designated neighborhood and do not further the urban renewal objectives of the community.

In many cities throughout the country, the problem of dealing with dilapidated and unsafe structures, which constitute a blighting effect on their environment, has become a serious problem. These structures, which are frequently located in neighborhoods not yet slum or blighted can start a neighborhood on the road to becoming a slum unless they are eliminated.

The committee believes that the assistance authorized by this provision of the bill will enable communities to undertake and carry out demolition programs to remove structures which are unsound and unfit for human habitation in otherwise good neighborhoods, which may be adversely affected by the existence of a number of such seriously substandard structures.

Code enforcement

Section 305 of the bill also would amend the code enforcement provisions of existing law to make them more workable.

In the Housing Act of 1964, the Congress authorized for the first time Federal assistance to localities for a new type of urban renewal project consisting primarily of code enforcement activities. The committee indicated then its belief that this type of project could effectively be authorized in those areas which are basically sound (do not require extensive clearance or rehabilitation activities) but which, principally because of noncompliance with the housing code and related codes of the community have begun to show signs of deterioration or blight.

In approving the 1964 provision, the committee had hopes that the cities would welcome the Federal assistance and proceed to tackle one of the most difficult problems of urban development. Unfortunately, this did not happen. In the first place, the Housing Agency's long drawn out study of the language of the 1964 statute delayed publication of the regulations and once they were reviewed by the city officials, the reaction was almost unanimous that they were unworkable. The committee was impressed by a statement from the U.S. Conference of Mayors, as follows: "The present language in the Housing Act relating to code enforcement is totally inadequate" and "No projects have been undertaken and none are in prospect" under the existing language.

This is mainly because the existing provisions require localities to go through the entire title I urban renewal process for code enforcement projects in the same way that they are required to process the more complex urban renewal redevelopment and rehabilitation projects. Whereas these regular programs involve many complex activities, such as major land acquisition and disposition and major land-use changes, code enforcement programs do not and it is not necessary to require communities to go through the complex title I process in order to receive code enforcement assistance.

The committee sees no need for requiring the cities to go through the cumbersome urban renewal process in order to get Federal assistance for code enforcement and therefore agreed to amend the language to permit direct Federal assistance to the cities for concentrated code

enforcement programs on a neighborhood basis consistent with the overall renewal objectives of the community.

Grant assistance provided for under the new language would follow the existing urban renewal cost-sharing formula and would cover the cost of planning and carrying out concentrated housing code enforcement programs. Such costs would include, but not be limited to: (1) The full range of activities recognized as necessary to encourage voluntary compliance, or otherwise achieve full compliance with the code; and (2) the provision or repair of necessary streets, curbs, sidewalks, street lighting, tree planting, and similar improvements.

The committee believes that these code enforcement activities should be included as eligible costs in such programs only if the community agrees to continue its normal level of expenditures of code enforcement. In addition, of course, the city would meet its one-third share of the cost of the stepped-up codes program in the concentrated code enforcement areas. This will assure that Federal funds are not used merely to replace local funds in providing code enforcement activities.

This section would also permit the use of the low-interest rate rehabilitation loans, provided under section 312(a) of the Housing Act of 1964, in areas where a concentrated code enforcement program under section 117 is being carried out. The committee believes that these loans as well as those provided under section 220 of the National Housing Act are necessary to achieve full compliance of housing codes because a serious impediment to compliance has been recognized as a lack of adequate financing at low interest rates for low-income property owners.

ELIGIBILITY OF CERTAIN GRANTS-IN-AID

Section 306 of the bill would permit expenditures to be counted as local grants-in-aid for the following respective urban renewal projects:

- (a) Expenditures made in connection with a collector sanitary sewer system at Jasper, Ala. (Ala-R-49).
- (b) Expenditures made in connection with creek improvement and construction of a high school at Joliet, Ill. (South-Central project).
- (c) Expenditures made in connection with the installation of certain underground electrical wiring in Johnson City, Tenn. (Tenn. R-80).
- (d) Expenditures made in connection with projects in New Brunswick, N.J., for which final capital grant payments have not been made.
- (e) Certain expenditures made by the city of St. Louis in connection with a downtown sports stadium project in St. Louis, Mo.

AMENDMENT OF SECTION 316 OF THE HOUSING ACT OF 1954

Section 307 of the bill would clarify the authority of the Redevelopment Land Agency of the District of Columbia to undertake urban renewal projects in areas which are not residential or predominantly residential at the outset. It would amend section 316(2) of the Housing Act of 1954 (which inserted a new sec. 20 in the District of Columbia Redevelopment Act of 1945) to provide unmistakable au-

thority for the Redevelopment Land Agency to undertake nonresidential projects as contemplated by title I of the Housing Act of 1949.

It should be clearly understood that if the District of Columbia is made eligible for this phase of the national program, applicable to all other jurisdictions that legally seek aid, then all of the benefits applicable under national law, such as relocation payments to individuals and families and adequate and increased aid to small business concerns, would be made available to projects in the District of Columbia.

REHABILITATION LOANS

Section 308 of the bill provides that the low interest rate (3 percent) rehabilitation loans that can be made for the improvement of properties in an urban renewal area can be made if the Housing Administrator finds that the applicant for a loan is unable to secure the necessary funds from other sources upon comparable terms rather than reasonable terms, as the law now provides.

In order to demonstrate that he is unable to obtain a loan on reasonable terms it is necessary, under the present provisions of section 312 of the Housing Act of 1964, to determine whether the property owner can obtain an FHA-insured rehabilitation loan. In many cases this requires needless expenditures of time required in processing the application to make this determination, when it is obvious that the applicant needs the assistance of the lower interest rate.

The provisions of section 312 of the Housing Act of 1964 which authorize this program are also amended to make it clear that moneys in the revolving fund established for the rehabilitation loan program can be used for the necessary expenses of servicing the loans.

TITLE IV.—LOW-RENT PUBLIC HOUSING

ACCEPTANCE OF LOCAL CERTIFICATION OF EQUIVALENT ELIMINATION

Section 401 of the bill would permit acceptance of certifications by local governing bodies that they have complied with the equivalent elimination requirements of the United States Housing Act of 1937.

Under the act, where a low-rent housing project is undertaken in a locality, the local governing body must enter into an agreement providing for the elimination, within 5 years, of a number of substandard dwelling units equal to the new low-rent housing units included in the project. Extensions of the 5-year period for elimination can be granted where there is an acute shortage of decent low-income housing in the community. Administration of this provision now involves direct Federal supervision over the carrying out of the equivalent elimination agreement, even though the act provides no specific penalties for noncompliance.

GREATER USE OF EXISTING HOUSING

Section 402 of the bill would perfect the annual contributions formula to permit local housing authorities to make greater use of the existing housing supply through the purchase, purchase and rehabilitation, or lease of existing units, which are available on the local market and suitable for low-rent housing purposes.

The present annual contributions formula establishes a maximum contribution in terms of a specified percentage (the going Federal rate

plus 2 percent) of the acquisition or development cost of a project. Under this formula, use can only be made of housing with an economic life extending over a sufficient period to allow the amortization of the capital cost at the statutory rate. This rate was designed to permit amortization of bonded indebtedness over a long period, and the established practice has been to contract for periods of 40 years. Such a period is too long to permit utilization of many kinds of existing housing that may be suitable for low-rent housing, or to permit the leasing of units desirable for relatively short-term use.

This section would authorize an alternative formula under which the annual contribution for an acquired or leased unit could be fixed, as a maximum, at the same dollar amount as would be established as the annual contribution under the conventional formula for a new low-rent housing project consisting of units designed for the comparable number, types, and sizes of families. Because it is not stated in terms of a specific percentage of capital cost, the formula would permit the acquisition, or acquisition and rehabilitation, of structures, over whatever period may be appropriate considering the condition and nature of the property, as well as the leasing of units for short-term use in meeting particular needs.

The new formula is intended to promote economies in the use of such housing through its requirement that the annual Federal contribution could never exceed the fixed contribution that would be established for comparable housing in a new project. Where a project or dwelling is acquired for use over a substantially shorter period than is required for units in the regular program, this would mean that the capital cost would have to be reduced according to the reduction in amortization period, since the maximum contribution available annually to amortize that cost could be no greater than in the case of a comparable conventional newly constructed project, but this annual amount would be available for substantially fewer years than in the case of the newly constructed project. The same limitation on the dollar amount of the annual contribution would apply to leased units, and would operate to preclude the excessive rentals that might otherwise result from efforts to secure housing for lease in a housing market where vacancies are low.

There has been a growing awareness in recent years that the subsidized low-rent housing program has suffered because it has not utilized the existing housing supply. Under this new authorization the PHA would be enabled to finance the leasing for any term of existing units in individual houses and in multifamily structures. It would be able to finance joint private-public owned or leased units. It would be able to subsidize units financed through other means such as FHA-insured, conventional financing, or State or municipal financing.

An important source of existing housing is the supply of FHA- and VA-acquired properties. Despite high vacancy rates among such units, there are many low-income families in communities where vacancies exist who continue to live in slum conditions because they are unable to pay the economic rent which the vacant properties warrant.

In many cases local authorities should be able to provide units more quickly under this section, than through new construction and meet more readily the special problems presented by large numbers of low-income displacees. The new formula also provide greater flexibility in providing housing for different sizes of families, as in obtaining

units for larger families and providing conveniently located units for elderly families.

Projects involving the purchase of existing housing would, of course, be subject to the same requirements of approval and cooperation by the local governing body as in the case of new construction. As in the case of the regular program, there will be local selection of the properties and sites to be used.

Since the units which are leased will be existing housing and subject to tax, the required local contribution, normally provided through tax exemption, would have to be provided by other means. The required local contribution, when property is not tax exempt, is the amount by which the taxes paid exceed 10 percent of the shelter rents charged in the project or dwelling. Local communities can easily meet this requirement by authorizing the housing authority to retain from payments in lieu of taxes to be paid with respect to its tax-exempt properties the amount required to meet this local contribution with respect to the existing units.

Use of existing housing will constitute a valuable supplement—but nevertheless merely a supplement—to new construction. Existing housing can be effectively used for low-income families only where a combination of certain conditions exist. There must, first, be a supply of vacant housing on the local market, and that housing must freely be made available, since eminent domain will, of course, not be used under the new program. Moreover, the vacant housing, especially that owned by the FHA and VA, could meet the needs of the low-income families. Its cost, design, and physical condition must be appropriate, and its use should be consistent with the community plans and urban renewal programs and in accord with the wishes of the local governing body.

The committee wishes to make it clear that a public housing program is a local option and this bill does not remove any of the autonomy found in existing law which is left to local governing bodies in public housing undertakings.

Supplemental testimony of Administrator on greater use of existing housing

The chairman of the Subcommittee on Housing received a self-explanatory letter from the Administrator of the Housing and Home Finance Agency in which he desired to supplement his committee testimony in connection with the greater use of existing private housing. Since this letter is not a part of the record of the hearings on the bill, it is as follows:

MAY 7, 1965.

HON. JOHN SPARKMAN,
*Chairman, Subcommittee on Housing, Committee on Banking and
Currency, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: As a result of discussions with members of your subcommittee staff I would like to supplement my testimony with respect to a provision in the housing and urban development bill of 1965 (S. 1354) which would make the use of existing private housing as low-rent public housing more feasible by permitting the amortization of a public housing indebtedness over a period of less than 40 years. While this is merely a technical change in the law, it is important in that it will facilitate the purchase or leasing of older housing for use as low-rent public housing. Existing housing is being used to

some extent under the present law but because in many cases its expected life is not as long as 40 years, the present period of financing of public housing, the financing formula needs revision, as proposed in the bill, to make the Federal assistance provisions more workable for such housing.

The proposed provision would be particularly useful in areas where there are substantial vacancies in privately owned housing. In addition, FHA- and VA-acquired housing can, where the housing is appropriate, more easily be used for low-rent housing under this revised provision.

In many areas it will mean that public housing can be made available for large families that could not otherwise be provided because of the high cost that would necessarily be involved in providing such large units by new construction. This proposal can also expedite the provision of public housing for relocation purposes, since public housing can be provided more quickly by utilization of existing housing than by new construction.

One point in particular I should like to make clear, and that is that any public housing involving the purchase or leasing of existing housing will be subject to the same local governing body approval as is required in the case of a new public housing project.

The governing body of a locality is required by section 15(7)(a) of the Federal public housing law (the United States Housing Act of 1937) to approve by formal resolution the application of a local housing authority for Federal assistance for public housing. In addition, before any Federal contract for annual contributions or for loans (other than preliminary loans) can be entered into by the Federal Government, the governing body must enter into an agreement with the local housing authority to provide local cooperation by the governing body with respect to a public housing project. These provisions are applicable to the use of existing housing as well as new housing.

Under these provisions of the Federal law, the local governing body can, therefore, insist both at the initial point of approval of the application, and again when it enters into the cooperation agreement with the local housing authority, on any degree of specificity as to the nature of the public housing that is to be provided by the local housing authority. The governing body exercises complete control in this regard because it has absolute power by virtue of these Federal statutory requirements to veto any proposed project unless the local housing authority conforms to any requirements imposed by the local governing body. The local governing body, insofar as the Federal law is concerned, has complete discretion in detailing the nature and location of a project to which its consent is given. This discretion would continue with respect to the use of existing housing under the provisions of S. 1354, since the revised provisions would be carried on under the same Federal requirements for local approval and cooperation.

It may also be desirable to emphasize that the power of eminent domain will not be used to acquire existing housing units and make them available for public housing use under the proposed new provisions.

Our proposals are in fact specifically limited to the acquisition and lease of housing which is "obtainable in the local market." By this it is intended that regardless of what power a local housing authority may have to employ governmental condemnation procedures, Federal

assistance should be limited to projects consisting of housing secured through the market channels open to private parties as well as public bodies.

Sincerely yours,

ROBERT C. WEAVER, *Administrator.*

INCREASE IN AUTHORIZATION FOR ANNUAL CONTRIBUTIONS

Section 403 of the bill would increase the authorization for annual contributions contracts under the low-rent public housing program by \$47 million immediately, and by an additional \$47 million in each of the years 1966 through 1968. This increase would provide an estimated 60,000 additional units of low-rent housing annually over this period. This housing would be available both for conventional low-rent housing projects and for the new approaches to low-rent housing contained in the bill.

For conventional units, the increase contemplates a program level of 35,000 units a year. For new approaches (purchase, leasing, and rehabilitation) the increase would provide for an additional 100,000 units over the 4-year period. The law would not, however, prescribe specific levels for the different approaches.

This authorization would cover the amounts needed for relocation costs and the special contribution for the elderly, the handicapped, and displacees, as well as the regular annual contribution.

The authorization for 37,500 additional units for low-rent housing contained in the Housing Act of 1964 was an interim increase. The Housing Agency reported to the committee that the local communities' accumulated demands, based on the needs of their low-income families and elderly, have reached about 90,000 units, well over twice the number authorized. This leaves a backlog in the neighborhood of 50,000 for which no annual contributions contracting authority exists.

REALLOCATION OF UNITS

Section 404 of the bill would authorize the reallocation of units not placed under construction within 5 years from date reserved without regard to the State limitations.

Agency testimony reveals that there have been long delays in placing some low-rent housing projects under construction and, in some cases, eventual abandonment of the project. On the other hand, in other areas the statutory limit on funds for any one State may be reached even though there is an urgent need for more low-rent housing and the local housing authorities could proceed without delay in providing such additional low-rent housing. The bill would amend existing law to permit the Agency to transfer reservations which have not been placed under construction within 5 years from the date of reservation to another housing authority in any State, whether or not the aggregate State limitation has been reached. This authorization, however, would be subject to any annual contributions contractual obligations in effect on the date of enactment of the Housing and Urban Development Act of 1965.

The sales price would be the appraised value of the property to be acquired, at the time the purchase contract is entered into. In no case, however, would the sales price be less than the pro rata share of the housing authority's unamortized debt. The purchaser may be given

a credit toward the purchase price, under terms and conditions to be prescribed by the housing authority, based upon the rent paid for his dwelling unit over a period of 3 years or less prior to the purchase contract. Such terms and conditions would, among other things, adjust the amount of the credit so as to exclude the local authority's cost of services and expenses for the rent paying period.

The interest rate would be not less than the average interest cost of loans outstanding on the project or, where this is not appropriate, not less than the applicable going Federal rate. The principal payments would be not less than one-half of 1 percent of the sales price during the first 5 years, 1 percent during the next 5 years, 1½ percent during the third 5 years, and thereafter a level debt service of interest and principal over the balance of the payment period.

The combined amount of interest and principal payments would never be less than the pro rata share of the fixed debt service of interest and principal of the local housing authority. The specified rates would be established as minimum rates so that they could be set high enough administratively as needed to accomplish the result of making the interest and principal payments not less than the debt service of the local authority.

Purchases are authorized under this section to provide homes for the purchaser or members of his family. Consistent with this objective, the bill provides that the local housing authority would have an option to acquire the purchaser's interest if at any time (i) the purchaser fails to carry out his contract and no member of his family who resides in the dwelling assumes the contract, or (ii) the purchaser or a member of his family who assumes the contract does not reside in the dwelling.

Under such option, the local housing authority would pay to the purchaser or his estate an amount equal to his aggregate principal payments plus the value to the local authority of any improvements made by him, less an amount equal to 2½ percent of the sales price.

The contract between the PHA and the local housing authority would contain provisions concerning the use of the payments made by the contract purchaser, including provisions concerning payments on principal, so that such payments, or their equivalent, might be available to the local authority if needed for purposes of exercising this option. This option, of course, would not preclude the housing authority from exercising any other rights and remedies, including foreclosure, which may be available under law.

The committee commends existing efforts to promote policies and programs providing homeownership possibilities for low-income tenants, such as the mutual-help housing plan for Indian reservations. The provisions of the bill are intended to provide specific authority for sale of public housing units to its tenants, under appropriate circumstances and conditions and subject to prescribed standards, which might not otherwise be authorized by the other provisions of the U.S. Housing Act. They are intended to supplement and not to inhibit the efforts of the PHA to provide other homeownership incentives and possibilities for low-income families.

SALE OF FEDERALLY OWNED PROJECTS TO PRIVATE PURCHASERS

Section 405 of the bill would remove the restriction that federally owned low-rent housing projects may be sold only to public housing

agencies. It would permit disposal to a nonprofit organization, but any sale would have to be for continued use by low-income families.

There are two remaining federally owned low-rent housing projects, both of which are located in Oklahoma. Disposal of these projects has been blocked by the restriction permitting sale only to a public housing agency, since Oklahoma law until recently, did not authorize creation of local public housing authorities. The Oklahoma Legislature has just enacted a public housing law which enables the creation of local housing authorities, but there is no assurance when, or whether, public housing authorities will be created in Oklahoma City and Enid, where the projects are located.

Removal of the restriction would permit consideration to be given to disposal to a purchaser such as a nonprofit organization. The projects would continue to be subject to the requirement that they be used only for low-income families.

INCREASE IN PER ROOM LIMITATIONS

Section 406 of the bill would increase the limitations per room on the cost of construction of low-rent public housing from \$2,000 to \$2,400 for regular-type units, and from \$3,000 to \$3,500 in the case of units constructed in Alaska or housing especially designed for the elderly. The per room limit in the case of housing for the elderly in Alaska is also increased from \$3,500 to \$4,000.

The committee included these increases in provisions in the bill to permit an increase in the statutory limitations per room on the cost of construction and equipment of low-rent public housing. These increases are based on the higher construction costs of today as shown by the Boechk index.

The Public Housing Administration will, of course, use its discretion in permitting individual low-rent public housing project costs to go to these new limits. The committee will expect PHA to insist on lower costs where they can be attained without sacrifice of livability and meeting the needs of the low-income families for whom the housing is intended.

It has come to the attention of the committee that the use of some materials or products that are manufactured or mined in whole or in part in other countries may help to keep construction costs down. Where PHA can approve these materials or products under the provisions of the Buy America Act the committee would expect it to do so. Where the end product contains 50 percent or more materials which are not mined or produced in this country, it is the committee's view that the PHA may consider this as presumptive evidence that the approval of such end product is not prohibited by the Buy America Act even though imported from abroad. Further, if there is any way PHA can legally put these materials or products it has approved on a blanket list or order that would obviate the necessity of their approval for use on a project-by-project basis, the committee would suggest that this be done. This would eliminate administrative expense by PHA of project-by-project approvals of foreign materials. It would also save the time now consumed in obtaining these approvals. Architects and others involved could take this approval into consideration in making their plans for new projects.

PURCHASE OF UNITS BY TENANTS

Section 407 of the bill would authorize any local housing authority assisted under the U.S. Housing Act of 1937 to permit any member of a tenant family to enter into a contract for the acquisition of a dwelling unit in a project of the local housing authority that is suitable for purchase by reason of its being detached, semidetached, or row construction.

The tenant family could acquire the unit on terms and conditions designed to make such acquisition financially feasible for the contemplated purchasers and, at the same time, fair and equitable to the Federal and local governmental interests involved. All such contracting would be in accordance with appropriate provisions in the annual contributions contracts between the local housing authority and the Public Housing Administration. No rights or obligations under existing contracts, including the rights of bondholders, would be affected unless agreed to by the parties involved.

Under such a contract, the purchaser would pay at least (1) a pro rata share of the cost of services continuing to be furnished by the local housing authority, (2) local taxes on his property, and (3) monthly payments of interest and principal to amortize the sales price in not more than 40 years.

The pro rata share of the cost of services includes such items as administration, insurance, maintenance, repairs, utilities, provision of reserves, and other expenses. These expenses might include costs incident to or necessary to make the property available for sale, including such other expenses as platting, filing, and recording costs.

TITLE V—COLLEGE HOUSING

INCREASE IN AUTHORIZATION FOR COLLEGE HOUSING LOANS

Section 501 of the bill would increase the college housing loan authorization by \$110 million upon the enactment of the bill, with further increases of \$285 million on July 1 in each of the years 1966 and 1967, and \$275 million on July 1, 1968.

This section would also increase the two separate limitations on the dollar amount of college housing loans which can be outstanding for "other educational facilities" (such as dining halls, cafeterias, student centers, and other facilities related to housing) and for the housing of student nurses and interns. The limitation on "other educational facilities" would be increased by \$30 million, and the limitation on housing for student nurses and interns by \$15 million, on July 1 of each of the years 1965 through 1968.

The authorization for the college housing loan program now totals \$2,875 million with ceilings of \$295 million for other educational facilities and \$220 million for student nurse and intern housing. In addition, loan repayments, bond sales, and net income through the end of March 31, 1965, totaled \$147 million, bringing total funds available for commitment to \$3,022 million. Through the end of March 31, 1965, a total of 2,393 loans for \$2,576 million have been approved under this program. As of that date there were 169 applications for \$272 million for which funds had been reserved, bringing the total funds committed to \$2,849 million.

Through March 31, 1965, funds committed under the program provide assistance for about 2,570 projects, including housing accommodations for about 661,000 students and faculty (including student nurses and interns) and also 249 projects for related facilities such as student unions, dining halls, and health centers.

There have been no defaults under the program in payment of principal and interest.

The Office of Education's college and university enrollment and facilities survey indicates an increase in college enrollments from 5.2 million in 1965 to 6.7 million in 1969. It is also estimated that about 25 percent of the increased enrollment will require college housing accommodations. Your committee believes that a 4-year program will best enable colleges and universities to plan for their requirements in the context of available college housing funds and to proceed with the orderly development and construction of the housing accommodations necessary to meet this flood of new students.

PARTICIPATION BY NEW COLLEGES

Section 502 of the bill would clarify the definition of "educational institution" in existing law in order to make new colleges eligible for loans under the college housing program.

College enrollment has increased from 1.5 million in 1940 to 5.2 million this year. It is projected to climb to 8.6 million by 1975. The need for additional colleges has been obvious for some time. Yet of approximately 1,400 colleges and universities in the United States, fewer than 100 have been started since 1940. The overwhelming portion of the increased enrollment has been met by expanding existing schools, many of which have reached their absolute limit.

When the college housing program was first passed by Congress in 1950, it was not the intention of Congress that the program be limited to existing colleges. Yet in 15 years the college housing program has been in existence, the Housing and Home Finance Agency has not financed any housing for a new college. The reason stems from an administrative interpretation limiting the program to accredited institutions. As a college cannot be accredited until it has been in operation several years, this regulation, in effect, bars new colleges since they are caught in the situation of not being able to get into operation without facilities and being unable to get the facilities because they are not in operation.

The committee has therefore included a provision in the bill which will make it clear that new colleges are eligible for loans if they provide assurance satisfactory to the Housing Administrator that they will offer a baccalaureate degree within a reasonable time after completion of the housing or facilities that will be assisted with their loans.

TITLE VI—GRANTS FOR BASIC PUBLIC WORKS, NEIGHBORHOOD FACILITIES, AND THE ADVANCE ACQUISITION OF LAND

PURPOSE

The purpose of this title is to assist and encourage local communities to meet the needs of their citizens by making it possible, with Federal grant assistance, for their governmental bodies (1) to construct adequate basic water and sewer facilities needed to promote the effi-

cient and orderly growth and development of their communities, (2) to construct neighborhood facilities needed to enable them to carry on programs of necessary social services, and (3) to acquire, in a planned and orderly fashion, land to be utilized for the future construction of public works and facilities.

Need for increased investment in water and sewer facilities

The most pressing problem facing many American communities is the provision of adequate water and sewer facilities. This has been testified to repeatedly in hearings held by the committee in recent years. While the committee finds that local governments have not been able to keep pace with the rising need, it does not intend to imply in any way that local governments have not made every effort to meet their responsibilities. It is simply that our towns and cities are hard pressed to meet their financial responsibilities. Sources of tax revenue are under heavy strain. Moreover, individual government units are at a disadvantage in imposing additional tax burdens because this often has the effect of driving industry and employment to other locations.

This shortage of water and sewer facilities is not only a major impediment to orderly and healthy community growth, but it has a special importance to the objectives in the housing field because of its impact on land prices. The sharp increase in land prices in recent years is one of the most serious problems facing the homebuilding industry. According to a recent study by the National Association of Home Builders, average lot prices over the past 5 years jumped over 60 percent from an average of \$2,800 to \$4,500. This rise in cost is not due to a shortage of land as such—our total built-up urban land constitutes only 2 percent of the whole land area of the country—but rather it reflects a shortage of land provided with the public investment in community facilities necessary for residential development.

The special importance of this rapid rise in land costs for housing is the fact that not only does it add directly to the cost of homes but also it has a leverage effect because of the rule of thumb that land costs should not exceed one-fifth of the final price of the house. A building site which is overdeveloped or underdeveloped has limited marketability and lenders will reduce their appraisals and the amount of the loan which they will extend on such a property. For example, a builder may put an \$8,000 house on a \$2,000 lot, but if his land cost jumps to \$4,000, he will have to construct a house costing in the neighborhood of \$16,000 to obtain maximum mortgage terms and market acceptance. While rising incomes and larger families have been an important factor in the upward trend of housing prices, they are not an adequate explanation for the fact that private industry today is unable to adequately serve the many families of modest income. Moreover, we must prepare for the obvious change in the housing market which will come in the next few years when the well-known "baby boom" of the late 1940's reaches the family forming stage. Between 1945 and 1947, the number of births jumped by 1 million, and this will soon be reflected in the housing market as a demand for homes at modest prices. We must prepare now to assure that the homebuilding industry can meet this demand with homes at reasonable prices in well-planned developments.

GRANTS FOR BASIC WATER AND SEWER FACILITIES

Section 602 of the bill would authorize the Housing and Home Finance Administrator to make grants to local public bodies and agencies to finance 50 percent of the cost of projects for basic public water and sewer facilities.

This grant assistance would be available to all communities large or small. The committee expects the Housing Administrator to take into account the special needs of smaller communities which do not ordinarily have the staff of technicians and experts which would enable them to move quickly under a program of this nature and as a result are not always able to share fully in the benefits. However, HHFA through its Community Facilities Administration now operates the public facility loan program limited to cities of 50,000 population or less with a priority for towns of less than 10,000 people. The agency should draw on the experience under this program to assure that small towns are dealt with on an equal footing with larger cities.

Water facilities would include facilities to store, supply, treat, purify, or distribute safe, potable water for domestic, commercial, and industrial use. Sewer facilities (other than "treatment works" presently assisted under the Federal Water Pollution Control Act) would include sanitary sewer systems for the collection, transmission, and discharge of liquid wastes; storm sewer systems for the collection, transmission, and discharge of storm water caused by rainfall or ground water runoff; and other facilities for the collection and disposal of other categories of wastes. The basic parts of a water or sewer facility for which a grant may be made would include all the parts of the water or sewer facility except household connections and the local collection or distribution laterals.

The grants authorized by this title would be available for projects to expand, enlarge, or improve existing water and sewer facilities but the committee does not intend that the grants be used to finance ordinary repairs or maintenance of existing facilities.

To assure that facilities constructed, expanded, or improved with grant assistance under this title are adequate for the maintenance of health and control of water pollution, the committee has inserted a provision in the bill prohibiting grant assistance for any sewer facility unless the Secretary of Health, Education, and Welfare certifies to the Administrator that any waste material carried by the facility will be adequately treated before it is discharged into any public waterway.

Under this section of the bill no grant could be made for any project unless the Administrator determines that the project is necessary to provide adequate water or sewer facilities for, and will contribute to the improvement of the health or living standards of, the people in the community to be served and the project is (1) designed so that adequate capacity will be available to serve the reasonably foreseeable growth needs of the area, (2) consistent with a program for a unified or officially coordinated areawide water or sewer facilities system as part of the comprehensively planned development of the area, and (3) necessary to orderly community development. Prior to July 1, 1968, grants, in the discretion of the Administrator, could be made if a program for an areawide water and sewer facility system is under active preparation but not yet completed, if the facility for which assistance is sought can reasonably be expected to be required as part of such program, and there is an urgent need for the facility.

The areawide system for basic water and sewer facilities would be required to be a part of the comprehensively planned development of the area. The requirement that a basic water and sewer facility assisted with a grant be part of a unified or officially coordinated areawide water or sewer facility system would assure that Federal grant funds do not finance uncoordinated or fractionated water or sewer facilities. Where there are no existing areawide water or sewer systems, the committee expects that the Administrator would require, as a condition to a grant for a single, independent water or sewer project, that the project be designed so that it can be linked with other independent water or sewer facilities or a proposed areawide system.

In addition, requiring that the areawide water or sewer facility be related to the comprehensively planned development of the area would assure that grant funds available under the proposal would be available only for facilities which help promote orderly community development and are consistent with a coordinated scheduling of other public works in the area. Such orderly development and coordination would minimize waste and unnecessary costs which are the result of the unplanned and haphazard construction of basic community facilities.

The requirement that a facility assisted with grants have adequate capacity to serve the reasonably foreseeable growth needs of the area would avoid the duplication of costs often occasioned by having to rebuild undersized facilities at a later date.

The committee wishes to make it clear that the expectation of growth is not a prerequisite for this aid but only that in planning a system the plans should take into account future demands as well as present requirements.

In addition the committee further takes cognizance in section 602(b) of the bill of communities in dire need of basic sewer systems when such communities have a population of less than 10,000, are unable to finance the construction of such basic facilities, and the unemployment rate has been continuously for the preceding calendar year 100 percent above the national average. Such cases are extreme and the committee feels it is incredible that heretofore a community suffering under almost unbelievable hardships could find no avenue to avail itself of the most elementary sanitary facilities. The committee, therefore, has inserted in the bill a provision for grants not to exceed 90 percent of the cost of the development of such facilities for communities that fall into the criteria described above.

GRANTS FOR NEIGHBORHOOD FACILITIES

Section 603 of the bill would authorize the Administrator to make grants to local public bodies and agencies to finance specific projects for neighborhood facilities, including neighborhood or community centers, youth centers, health stations, and other public buildings to provide health or recreational or similar social services. The grants generally would be limited to 66½ percent of the cost of the project, but could be up to 75 percent of the cost in the case of a project located in an area designated as a redevelopment area under section 5 of the Area Redevelopment Act.

A neighborhood facility project could also be undertaken by a public body or agency directly or through a nonprofit organization approved by the local public body or agency, if the Administrator determines that the nonprofit organization has the legal, financial,

and technical capacity to carry out the project, and that the public body or agency will have satisfactory control over the use of the facility. The committee intends that the Administrator should have assurance that the facility will be available to all the people in the community.

Before making a grant under this proposal, the Administrator would be required to determine that the project would provide a neighborhood facility which is necessary for carrying out a program of health, recreational, or similar community services. The project must be consistent with comprehensive planning for the development of the community in which the neighborhood facility is to be located.

These Federal grants would help to stimulate a concerted effort by local public bodies, possibly in cooperation with private groups, to provide systematically for often long-neglected needs of the community. Since most of these needs are largely those of low- and moderate-income families and individuals, the neighborhood facility projects would have to be so located as to be available for use by a significant portion (or number in the case of large urban places) of the area's low- or moderate-income residents. In addition, a priority would be given to applications for projects that will primarily benefit members of low-income families or otherwise further the objectives of a community action program approved under title II of the Economic Opportunity Act of 1964. The committee expects that the great majority of the neighborhood centers for which grants are made under this bill would be used in connection with such community action programs.

Much of the heavy costs of ill health and juvenile delinquency, and many of the problems of old age, could be avoided by preventive measures such as local preventive health, recreational, and related services. The costs of these services are small when compared to the tremendous economic and social losses resulting from illness and deprivation and the mounting expenditures in curing sickness, making welfare payments, combating crime, and accommodating the needs of the elderly. The committee believes that the availability of Federal grants for neighborhood facilities (many of which can be multipurpose facilities which can serve the needs of different groups) would assist communities to expand, and in some instances initiate, a group of community services which hitherto have been neglected.

ADVANCE ACQUISITION OF LAND

Section 604 of the bill would authorize the Housing Administrator to make grants to State and local public bodies and agencies to assist in financing the acquisition of sites planned to be utilized in connection with the future construction of public works or facilities. The grant could not exceed the aggregate amount of reasonable interest charges on a loan or other financial obligation incurred to finance the acquisition of such land for a period not exceeding the lesser of (1) 5 years from the date the loan is made or (2) the period between the date the loan is made and the date on which construction of the public work or facility is begun.

Before making such grants the Administrator would be required to determine that the public work or facility for which the land is to be utilized is planned to be constructed or initiated within a reasonable period of time, not to exceed 5 years after the grant contract is entered

into. He also would have to determine that construction of such public work or facility will contribute to economy, efficiency, and the comprehensively planned development of the area.

On some occasions, circumstances arising after the acquisition of land purchased with assistance under this section of the bill may make construction of the facility planned to be placed on such land no longer feasible or desirable. A community which has acquired land with grant assistance may then wish to divert the land to other uses. In such a circumstance the Administrator would be authorized to require the repayment of the grant and prescribe the terms and conditions of such repayment.

To qualify for Federal financial assistance, a community would have to be engaged in comprehensive planning appropriate to its size and location. Larger urban areas and communities experiencing rapid growth would have to be engaged in comprehensive planning for the development of the entire urban area. The public work or facility for which the advance acquisition of land is to be made would have to be consistent with a communitywide and areawide system of such facilities.

GENERAL PROVISIONS AND DEFINITIONS

Sections 605 and 606 of the bill would add certain technical and conforming amendments as well as definitions necessary for the three new programs contained in this title of the bill, i.e., the grants for basic water and sewer facilities program added by section 602; the grants for neighborhood facilities program added by section 603 and the grants for advance acquisition of land program added by section 604.

LABOR STANDARDS

Section 607 of the bill would require that the prevailing wage requirements determined in accordance with the provisions of the Davis-Bacon Act would be applicable to construction work financed with grants for basic public works or for neighborhood facilities.

APPROPRIATIONS

Section 607 of the bill would authorize appropriations of not to exceed—

(1) \$100 million on July 1, 1965, and \$200 million per year for the 3 years commencing on July 1, 1966, 1967, and 1968, for basic public works grants,

(2) \$50 million per year for the next 4 fiscal years for neighborhood facilities grants, and

(3) \$25 million per year for the next 4 fiscal years for advance acquisition of land grants.

This section would also provide that all funds appropriated would remain available until expended.

Any amounts authorized to be appropriated for any year but not appropriated may be appropriated for any succeeding year commencing prior to July 1, 1969.

In smaller isolated communities it would not be necessary that the entire planning process be underway. For such places, it would be enough to have a clear indication that the community had examined its probable future size, public facility needs, and financial capacity

and that the proposed facility would be an efficient element in its efforts to meet its future needs. In addition, to the extent that there is an overall plan for the development of the community, the public work or facility for which advance acquisition of land is to be made would have to be consistent with the existing overall plan.

The objective of this Federal assistance is to encourage communities to plan ahead, in connection with their future public works needs, with respect to land acquisition as well as preparation of construction plans. Under section 702 of the Housing Act of 1954, the Housing Administrator is authorized to make interest-free advances to finance the planning of specific works. But the advance acquisition of sites is equally important in helping to attain maximum economy and efficiency in the construction of public works. Such advance site acquisition would be assisted by the new program.

The committee believes that by encouraging communities to anticipate the site requirements for future public works construction and by assisting them in the timely acquisition of the land that would be used in such future construction, the new program would help produce a number of savings. Local public bodies would be assured of the availability of appropriate sites and would save by acquiring sites before the rising trend of land prices increases their cost. Advance acquisition before there is further construction on a site would avoid the costs of demolishing such construction, relocating the occupants of the buildings and disrupting businesses. Advance knowledge regarding the site location of future public works would enable private land developers and builders to make appropriate adjustments in their construction plans or schedules, which would lead to more orderly growth in the area.

TITLE VII—FEDERAL NATIONAL MORTGAGE ASSOCIATION

INCREASE IN SPECIAL ASSISTANCE AUTHORITY

Section 701 of the bill would provide for increases in the revolving authority under which the President authorizes FNMA to furnish special assistance to mortgage financing of certain housing. Under its special assistance programs, FNMA makes commitments to purchase and purchases mortgages underwritten by the Government that finance housing for low- and moderate-income families, housing in urban renewal areas, housing for the elderly and for disaster victims, and other special types of housing designated by the President as being housing that needs special assistance.

The new increases of authority total \$1,625 million. They would be provided by increasing the authorization by \$100 million on the date of enactment of the bill, by \$450 million on July 1, 1966, by \$550 million on July 1, 1967, and by \$525 million on July 1, 1968.

Further increases in the amount of Presidential special assistance authority would be provided by transferring and adding to such authority on the date of enactment of the bill and on each July 1 thereafter, the then available portions of the special assistance authorization provided separately for FHA title VIII insured mortgages on housing for military, NASA, and AEC personnel. However, as under existing law, not less than \$58,750,000 of the authorization for FHA title VIII mortgages would remain available for mortgages insured under section 809 on housing for certain employees at research or

development installations of the military departments, NASA, and AEC. The committee is currently informed that approximately \$300 million of this authorization will be available for transfer on the date of enactment of the bill. These transfers would not be new special assistance fund authorizations as they would come from special assistance authority previously provided by the Congress.

Of the total special assistance authority that would be made available under control of the President, the committee understands that the administration plans to utilize a major part for rental housing for low- and moderate-income families that will be financed with FHA-insured below-market interest rate mortgages, and that the balance of the authority will be needed for urban renewal housing and other special financing needs.

In connection with the Administration's projected use of additional special assistance authority for FHA-insured section 221(d)(3) below-market interest rate mortgages, the Housing Administrator's statement in the hearings on the bill made mention of the direct relationship between the amount of FNMA's commitment and purchasing authority and the scope of FHA's operations under the 221(d)(3) program for low- and moderate-income housing. Because of their below-market interest rate, it is expected that all of the mortgages will be offered to FNMA for purchase.

PURCHASE OF MORTGAGES HELD BY FEDERAL INSTRUMENTALITIES

Section 702(a) of the bill would eliminate from the FNMA Charter Act a provision of general application that prohibits FNMA from purchasing any mortgages offered by or covering property held by a Federal instrumentality. The elimination of this provision would constitute recognition, in principle, that such mortgages should not affirmatively be barred from purchase by FNMA under any of its operations. Especially, however, this change would enable FNMA, under its regular secondary market operations, to purchase marketable Government-underwritten mortgages from such Federal instrumentalities as have authority both to effect such sales and to acquire FNMA common stock. These purchases of mortgages of acceptable quality would benefit the budget, of course, as contrasted to no budgetary benefit resulting from acquisition under FNMA's management and liquidating functions.

This section would also amend the fiduciary powers of FNMA. Under its management and liquidating functions, FNMA furnishes fiduciary services that provide an effective means of substituting private investment funds for Government funds in the financing of first mortgages in which the United States or an agency or instrumentality thereof has a financial interest, through sales to private investors of beneficial interests, or participations, related to such mortgages. The amendment would enable FNMA similarly to provide a means of refinancing, with private investment funds, any obligations offered to it by the Housing and Home Finance Agency and its constituents. These obligations would not necessarily be mortgages.

Section 702(b) of the bill would authorize FNMA "to purchase * * * any obligations offered to it" by the Housing Agency or its constituents, "or any mortgages covering residential property offered to it" by any Federal instrumentality under its management and

liquidating functions that is contained in section 306(e) of the FNMA Charter Act. Under the existing section 306(e), FNMA is now expressly authorized "to purchase * * * any mortgages offered to it" by the Housing Agency or its constituents. Pursuant to this authorization FNMA has acquired, primarily, mortgages covering residential properties and, incidentally, some other-than-residential types of mortgages, all covering real property.

The committee added authority for the purchase of obligations from the Housing Agency or its constituents in order that savings through centralization in FNMA of the financing of the obligations might be attained. These obligations would not necessarily be mortgages.

The section would permit acquisitions from "any Federal instrumentality" having authority to sell its mortgages, rather than from only the Housing Agency and its constituents. It would not be necessary that the mortgages be FHA-insured or VA-guaranteed.

The modifications of FNMA's authority to purchase mortgages under section 306(e) would permit steps to centralize the Government's ownership, management (servicing), and sale of mortgages to the extent determined desirable from time to time. The committee believes that efficiency and economy would generally be promoted to the extent the FNMA facilities are taken advantage of. Both FNMA and the selling agency would be expected to exercise discretion as to whether there should be any purchase-sale transaction and, if so, discretion would be exercised as to all related factors, including the pricing of the mortgages.

In view of the new authority provided by this section to broaden FNMA's authority to purchase mortgages from other Government agencies, concern was expressed by the committee that authority given in this section would be used by Government agencies to increase their available funds above the limits established either through appropriations or otherwise.

It should be made clear that the intent of the committee in including authority for FNMA to purchase residential mortgages held by any Federal instrumentality was not to enable them to expand their authorized lending limits but to substitute private investment funds for Government funds and thus help reduce the Federal budget.

PURCHASE OF BELOW-MARKET-INTEREST-RATE MORTGAGES COVERING PROPERTIES LOCATED IN URBAN RENEWAL AREAS

Section 703 of the bill would exempt below-market-interest-rate FHA section 221(d)(3) mortgages covering property located in urban renewal areas from a statutory \$17,500 per dwelling unit limitation on the amount of a mortgage that can be purchased by FNMA under its special assistance functions.

The law presently exempts from this limitation all mortgages insured by FHA under the section 220 urban renewal housing program; the title VIII housing program for military, NASA, and AEC personnel; and the section 213 cooperative housing program on properties in urban renewal areas, and also all FHA-insured and VA-guaranteed mortgages on properties in Alaska, Guam, or Hawaii.

Having in mind that it sets the dollar ceilings on the mortgages that FHA insures, the Congress determined that it would authorize FNMA to purchase any mortgages insured by FHA under section 220 and 213 on properties in urban renewal areas, in order to encourage the pro-

vision of housing in those areas, and thereby facilitate the proper redevelopment of such areas.

The committee believes that the same principle should be applied to mortgages insured under the section 221(d)(3) below-market-interest-rate program that finance housing in urban renewal areas for low- and moderate-income families. The bill as reported by the committee therefore provides that FNMA and FHA shall have identical ceilings for such mortgages.

TITLE VIII—OPEN-SPACE LAND AND URBAN BEAUTIFICATION AND IMPROVEMENT

CHANGE IN NAME OF PROGRAM; FINDINGS AND PURPOSE

This title would continue the open-space land program authorized by title VII of the Housing Act of 1961 in an expanded and more liberal form to provide aid for built-up areas as well as the suburbs and to encourage communities to increase their expenditures for park improvement and other urban beautification activities that will make towns and cities more attractive and better places in which to live.

Section 801 of the bill would redesignate title VII in existing law as "Title VII—Open-Space Land and Urban Beautification," and would make such other technical and conforming amendments as are necessary to show that the purpose of this title would be expanded and liberalized by this bill.

DEVELOPMENTS GRANTS FOR OPEN-SPACE USES

Section 802 of the bill would make the necessary amendments to title VII to provide that Federal grants could be used to develop open-space land as well as to acquire such land.

In order to assist State and local agencies to realize the full potential of the land acquired with assistance under the open-space land program, the bill contains a provision permitting 50 percent grants for the development of such land for open-space uses. Open-space uses are defined as any use of open-space land for park and recreational purposes, conservation of land and other natural resources, or historic or scenic purposes. Grants could be made for developing land acquired under both the present program and the new program, described above, of assistance in acquiring developed land in built-up areas.

The committee was informed that in many instances local governing bodies desiring to use the open-space land program lacked sufficient funds, once they have acquired land to be left open, to make such minor development of the land as would be necessary for public enjoyment. The committee has therefore amended title VII to permit the use of the Federal grant funds to be used for the development of such land as well as the acquisition of the land.

In considering this amendment, the committee did feel, however, that the development of the land should not include major development such as outdoor amphitheaters, dock facilities, swimming pools, golf courses, major buildings, and so on, but would include such items as basic sanitary facilities, paths, walks, landscaping, shelters, and other such similar facilities as are normally and usually associated with parks and open-space recreational areas.

INCREASED GRANT LEVEL FOR PRESERVATION AND DEVELOPMENT OF
OPEN-SPACE LAND

Section 803 of the bill would increase the grant level for open-space land grants to 50 percent of the total cost of acquisition and development as approved by the Administrator.

Under the present open-space land program, grants may be made to public bodies for 20 percent of the total cost of acquisition of open-space lands in urban areas, or 30 percent of the cost if the public body exercises open-space responsibilities for all or a substantial portion (60 percent or more) of the entire urban area. This section of the bill would substitute a single 50-percent grant level for the "double grant level" contained in existing law.

The proposed grant increase would strengthen the ability of State and local agencies to acquire urban land that is still undeveloped or predominantly undeveloped and has value for park, recreation, conservation, scenic, or historic purposes. In many urban areas, undeveloped land is rapidly disappearing or greatly increasing in cost. Prompt action must be taken to acquire suitable land while it is still available. This will not only help to conserve public funds in the face of sharply increasing land costs, but will also assist in shaping urban development to allow the provision of transportation and other public facilities at minimum cost.

The present program has been in operation over 3 years, and in that time has assisted in the preservation of over 120,000 acres of open space land in urban areas within 36 States. This is an encouraging beginning. However, increased efforts are needed. Our urban population is growing considerably more rapidly than parks and other urban open spaces are being provided, so that the backlog of unmet needs is actually expanding rather than decreasing. An increase in the Federal grant level is vital if communities are to be given adequate assistance in preserving open space land.

It is important, also, to raise the grant percentage at this time so that the Federal assistance made available for the acquisition of parks and other open space in urban areas through this program may be more effectively coordinated with that made available through the new outdoor recreation programs authorized by the Land and Water Conservation Fund Act of 1965. That act authorizes grants of up to 50 percent for acquisition and development of recreation areas which serve a complementary purpose at the State level.

CONTRACT AUTHORIZATION

Section 804 of the bill would increase the general authority for which the Administrator of the Housing and Home Finance Agency may enter into grants contracts under title VII by \$235 million, from \$75 to \$310 million. Of the new contract authority, not to exceed \$64 million would specifically be earmarked for grants for the provision of open space land in built-up urban areas, and not to exceed \$36 million would be earmarked for grants for urban beautification and improvement.

OPEN SPACE PLANNING AND PROGRAM REQUIREMENTS

Section 805 of the bill would establish revised local open space planning and program requirements. Under the present legislation open space grant may be made only where a program of comprehensive planning is being carried on for the entire metropolitan or other urban area, and the locality in which the land is located has completed a comprehensive plan meeting criteria established by the Housing Administrator.

The proposed new language, which would be applicable to both the present and proposed open space programs, would require that open space acquisition or development assistance be "needed for carrying out a unified or officially coordinated program, meeting criteria established by the Administrator for the provision and development of open space land as part of the comprehensively planned development of the urban area." Its application to the open space programs would greatly facilitate proper coordination among these closely related urban development programs, on both the Federal and local levels.

Under the quoted provision, emphasis would be placed on an open space acquisition and development program to serve as a link between comprehensive planning for the area and individual open space projects. The intergovernmental agreements for which the 10-percent grant bonus is provided under the present law have generally proved valuable in encouraging coordinated local open space acquisitions. However, this requirement has tended to be unnecessarily rigid in some areas—particularly large multijurisdictional urban areas—in that failure to obtain cooperation from an adequate number of local jurisdictions has restricted assistance even for projects of primarily local significance. It is intended that, under the proposed new language, acquisition and development of open space areas would be assisted on the basis of comprehensive planning and open space acquisition and development program requirements which are more closely related to the nature of the individual project.

Where a locality proposes acquisition of a large regional park or other open space having areawide or regional importance, assistance would be provided only on the basis of areawide or regional comprehensive planning and open space programs.

On the other hand, where a locality proposes open space projects involving small parks or other open space areas of primarily local significance, assistance would be provided on the basis of local comprehensive planning and open space programs, adequately coordinated with areawide planning and programing, which must be actively underway. Appropriate criteria for coordinating local planning and programs with such areawide planning and programs would be established by the Administrator, taking into account the type and character of the proposed open space project.

In either case, it is intended to extend the acquisition and development program requirements considerably beyond the present approach, which even at the higher grant level emphasizes intergovernmental review of land acquisitions on a parcel-by-parcel basis. Applicants would be encouraged to establish 5-to 10-year programs of open space acquisition, backed by capital budget planning and based on projections of need made as part of comprehensive urban planning. Similarly, they would be encouraged to work out arrangements for coordinating both the location and type of open space acquisitions by

interested local public agencies. Under such a program, for example, public bodies within a metropolitan area might work out criteria and procedures under with an areawide agency assumed responsibility for providing larger parks and other recreation areas, while the individual localities concentrated on the provision of neighborhood and other local facilities.

The proposed statutory language would allow flexibility in the application of such program requirements, to take into account for example the varying needs and abilities of large and small areas, and also to provide for initial gradual application of the new requirements.

GRANTS FOR PROVISION OF OPEN-SPACE LAND IN BUILT-UP URBAN AREAS AND FOR URBAN BEAUTIFICATION AND IMPROVEMENT

Section 806 of the bill would broaden the existing open-space land program to permit grants to be made for the acquisition and clearance of developed lands in built-up portions of urban areas for the creation of small parks, squares, playgrounds, pedestrian malls, and similar open-space uses. Grants could not exceed 50 percent of the cost of acquiring the land and demolishing and removing improvements which would be inappropriate to the intended open-space uses.

The present program is limited to assisting in the acquisition of land that is undeveloped or predominantly undeveloped. Although land may be acquired under the program anywhere within the urban area, this has tended to limit the operation of the program to outlying areas of cities and their suburbs. Thus, while over 90 percent of open-space funds have been allocated for the acquisition of lands in metropolitan areas, less than 15 percent of the lands acquired have been located in built-up portions of these areas.

Sufficient undeveloped land is often not available to meet the open-space needs of built-up areas. Yet the high value of developed land makes it nearly impossible for local governments to acquire and clear such land for open-space uses without substantial assistance. The park and open-space acquisition programs of many major cities have been intermittent and desultory for the past several decades, with few properties being acquired in built-up sections of the city. The committee believes that the proposed new program is essential to help correct this situation.

The committee sees this program as meeting several urgent needs in our cities and other urban areas. It could assist, for example, in the acquisition of land for pedestrian malls, waterfront restoration, and neighborhood play areas, as well as the usual form of parks. More such areas are needed to enhance the physical environment of our urban communities and to make them more attractive places in which to live and work.

In many cases this program would be especially useful in connection with projects of rehabilitation and code enforcement. Often one key to neighborhood decay is a lack of parks and playgrounds. The provision of properly located and well-designed open-space areas would be a useful catalyst in encouraging and supporting rehabilitation efforts.

In all instances, assistance would be limited to those situations where the governing body of the locality determines that adequate open-space needs cannot be met through existing undeveloped or

predominantly undeveloped land. Such a finding would be based on the locality's assessment of its own long-term needs.

As with the present open-space program, land acquired under the program would have to be permanently retained as open space, except under certain strictly specified conditions. These allow necessary conversions, but only under strict requirements for substitution of other open-space land of at least equal market value and equivalent usefulness and location. These requirements assure that no locality will sell or otherwise convert open-space land without urgent cause.

Relocation payments

This section of the bill also authorizes relocation payments to persons, families, businesses, and nonprofit organizations displaced by projects assisted under this title. These would be 100-percent financed by the Federal Government, the same as in the urban renewal and other Housing Agency programs.

Section 806 of the bill would also add another new program to provide partial grants to assist in carrying out local programs of beautification and improvement of open-space and other public land in urban areas. The need for such assistance was emphasized by the President in his message on the state of the Union, and more recently in both his messages on natural beauty and on the central city and its suburbs.

Programs are already available for dealing with neighborhoods that have deteriorated to the point where rehabilitation or clearance is required. But large areas of our cities, while not yet blighted, are overcrowded and uninviting—lacking in the basic street, park, and other improvements so important to a sense of community spirit. The proposed community beautification and improvement program would, at moderate cost, enable localities to increase their activities which improve the attractiveness of their streets and public places. This could produce real dollars-and-cents benefits in encouraging the kind of neighborhood and community pride which is the best defense against blight and decay.

Local programs would, under criteria established by the Housing Administrator, be required (1) to represent significant and effective efforts, involving all available public and private resources, for the beautification and improvement of open space and other public land in the community; and (2) to be important to the comprehensively planned development of the locality. The community would be encouraged to make maximum use of other urban beautification means in addition to the activities assisted with the Federal grants. Examples of other measures might be the regulation of signs and utility wires, zoning to prevent auto graveyards in inappropriate areas, and school programs to foster pride in maintaining and improving the appearance of the community.

The responsibility for preparing and carrying out local programs would be primarily that of the local public bodies receiving the grants. However, it is contemplated that the programs would provide for appropriate participation by private groups and individuals; for example, garden clubs, business and civic groups, store owner associations, and chambers of commerce. Coordination would also be required with related public programs bearing upon urban improvement and beautification.

Assisted activities would have to be capable of providing long-term benefits to the locality. Assistance would not, for example, be provided for the increased operating costs of keeping parks better lighted or more tidy. On the other hand, assistance could be provided for the cost of additional lighting fixtures. Thus, it is anticipated that many of the assisted activities would be "routine" improvements, but improvements which the proposed Federal assistance would enable the localities to undertake on a broader scale. Examples of activities eligible for assistance would include the following:

(1) Park development, including basic water and sanitary facilities, interior paths and walks, landscaping, shelters, recreation equipment, and other similar facilities associated with neighborhood park use. While the bill provides grants of up to 50 percent for development of lands acquired under this title, many existing park facilities are either entirely undeveloped or contain equipment and facilities which are long overdue for replacement. A city or community could receive a grant under this program to assist in the development or refurbishment of such park areas. Generally, no assistance would be provided for the construction of buildings. Only those small structures would be eligible for assistance which are incidental to proposed park or other open space uses. Toilet facilities or rain shelters might be assisted, but an activities center, museum building, swimming pool, golf course, or other specialized major recreation facility could not be.

(2) Substantial upgrading and improvement of other public areas such as malls, squares, and waterfront areas.

(3) Street improvements such as lighting, benches, tree planting, and imaginative use of pavement and other outdoor "flooring."

(4) Activities in behalf of the arts, such as construction of facilities for outdoor exhibits.

A Federal grant could not exceed 50 percent of the amount by which the cost of activities carried on by the applicant, during its fiscal year, under a local program has exceeded its usual expenditures for comparable activities.

The usual expenditures of the applicant for such activities would be determined in accordance with administrative regulations based on the previous expenditures of the applicant but taking into account, to the extent feasible, unusual circumstances affecting those expenditures.

Approval would be given in advance for the types of activities to be carried out and the overall amounts which could be spent. Partial payments of the grant would be made as the work progresses, but a portion of each grant would be withheld until the required accounting at the end of the year. This procedure would help to assure that the Federal assistance is in fact provided only for additional local efforts.

Regulations would be established to assure that assistance under this program is not provided where grants were available under other Federal programs, for example, landscaping in connection with construction of federally assisted highways. It is assumed, however, that projects undertaken under the auspices of this program will often be part of a larger local effort involving cooperation and coordination with other Federal and State programs.

Demonstration program

This new section would also authorize a \$5 million demonstration grant program for urban beautification and improvement.

An important aim of the beautification provisions is to encourage and assist local experimentation and innovation. To facilitate this, the Housing Administrator would be authorized to make up to \$5 million of grants for projects which he determines to have special value in developing and demonstrating new and improved methods and materials for use in beautification and improvement activities.

Grants under this provision would be limited to a maximum of two-thirds of the total cost expended by the locality for the particular project.

The experience gained in these special demonstration projects could, in turn, be made available to other localities through the authority of the Administrator to undertake studies and publish information to carry out the purposes of the open space land and urban beautification provisions.

Demonstration projects would be selected on the basis of their value for demonstrating a technique or facility having broad applicability to other communities. Assistance ordinarily would not be made available for regular continuing activities under an urban improvement and beautification program.

The committee believes that this demonstration program can play a major role in developing new and imaginative approaches for meeting the goals of the urban beautification program. It can also help avoid costly mistakes by other communities, as well as suggesting those activities and programs most likely to achieve desired results and describing how they can be carried out most efficiently and economically.

USE OF FUNDS FOR STUDIES AND PUBLICATION

Section 807 of the bill would permit the use of open space grant appropriations, not to exceed \$50,000 per year, for undertaking and publishing open space surveys and other studies in connection with activities under the open space land and urban beautification programs. This will help to provide much-needed information and data on such problems as the kind and location of open space which most helps to create more vital and livable cities, new means for preserving open space, less-than-fee acquisition experience, and an analysis of the operation of State open space programs.

CONFORMING AMENDMENTS

Section 808 of the bill is a conforming amendment necessary to make the proper changes in title VII to reflect the amendments made to that title of by this bill.

TITLE IX—RURAL HOUSING

Insured rural housing loans

The hearings clearly demonstrated the need for greatly expanding the rural housing program. Almost half of the substandard housing of this Nation is in rural areas although only 30 percent of our population lives there.

A widespread housing credit gap continues to exist in rural areas despite the efforts of the Federal Housing Administration to reach

farther and more effectively into rural areas with its existing insured loan programs.

The new rural housing insured loan program of the Farmers Home Administration authorized by title IX will increase the opportunities available to those rural families who cannot qualify for housing loans from other sources. Under this new program, loans up to \$300 million a year could be insured for families in low- and moderate-income levels who would pay interest at a rate not exceeding 5 percent per annum. Additional loans could be insured for families with incomes above the moderate level. These families would pay rates on their loans comparable to the rates paid on insured Federal Housing Administration loans. The new authority will serve to reduce in some degree the inequality between urban and rural families in the field of housing, without increasing the strain on the Federal budget.

The amount of funds made available under existing law for regular section 502 rural housing loans during the 1965 fiscal year was \$122 million. On March 31, 1965, the Farmers Home Administration had on hand more than 15,000 applications. For several years, the agency has not had sufficient loan funds to reduce its backlog of loan applications from eligible applicants aggregating more than \$100 million.

The applications on hand, moreover, are only a small indication of the need for raising to an adequate level the housing of millions of rural families. Almost 3 million rural families live in houses that need major repairs. More than a million live in homes that are in such a dilapidated condition that they endanger the health and safety of the occupants as well as the community in which they live. One out of three rural homes has no bath facilities.

Another important fact that came to the attention of the committee is that housing needs among the low-income rural families are particularly acute. Half of the rural families who, in 1959, had incomes of less than \$3,000 were living in houses that were so run down that they needed replacement or major repairs to make them habitable. These are the families who do not have enough income to repair their homes and cannot even qualify for a modest home improvement loan from most creditors.

The committee believes that the rural housing loan program of the Farmers Home Administration has been administered in an outstanding manner. This program has, in a modest way, demonstrated that it can effectively improve the quality of housing on farms and in rural nonfarm areas.

The committee also noted the experience the Farmers Home Administration has had in the successful operation of the agricultural credit insurance fund under the Consolidated Farmers Home Administration Act of 1961. The committee therefore recommends an insured program for rural housing loans similar to the one that has proved to be successful under the 1961 act.

There are several important differences between the two programs. One is that the proposed bill would establish no repurchase period, whereas the 1961 act requires a 3-year minimum period. Another difference is that any amount withheld as a loan insurance charge is discretionary with the Secretary under the proposed bill. The Consolidated Farmers Home Administration Act requires a minimum charge of one-half of 1 percent. The greater latitude in the bill in these respects is designed to provide more flexibility to the Secretary

in establishing the interest rate and minimum repurchase periods to investors in insured loans and thus improve their salability.

Authority to buy previously occupied homes and building sites

Throughout rural America are many vacant houses that are structurally sound and can be purchased and modernized at a cost considerably below the cost of building a new house. Under present law, rural housing loans to buy previously occupied dwellings and the sites may be made only to elderly persons.

The committee believes that extending this authority to all age groups in rural areas will be a way of effectively utilizing existing structures and will be particularly useful in helping low-income families acquire a decent home of their own within their capacity to pay.

Authority to buy sites upon which to build also will be useful in helping more low-income families acquire homes of their own.

Limitations on interest rate

The bill sets a 5-percent maximum interest rate for insured loans to families in low- and moderate-income levels. For families with incomes above the moderate level, rates will be comparable to the interest rates and insurance charges paid by families who receive Federal Housing Administration insured loans. The committee also recognizes, however, that many families have such low incomes that they cannot pay the higher rates that are necessary to make insured loans salable. For this reason the bill provides that on direct loans to senior citizens for single-family housing and on the specialized direct loans under sections 503 and 504 the maximum interest rate will remain at 4 percent.

The bill also retains in the Secretary discretionary authority set rates at less than the statutory maximum for direct loans to families in distress situations, such as those whose buildings were destroyed or damaged by natural disasters and families with low incomes who cannot afford to pay 5 percent interest. An example of the latter group would be farm laborers or other low-income families who participate in a self-help approach to obtain decent homes of their own. Such a family could have a low-cost home by obtaining a modest loan within their ability to repay and constructing the home with their own or exchange labor in order to keep the cash cost at a minimum.

With respect to direct loans for senior citizens rental housing, the maximum rate would be 3 percent. This results from a change which section 105 of the bill would make in section 202(a)(3) of the Housing Act of 1959. The ceiling on interest provided for in that section is made applicable to direct loans for rental housing for rural senior citizens by section 515(a)(2) of the Housing Act of 1949.

Extension of rural housing loan program

The committee recommends an extension to October 1, 1969, of existing authorizations that expire September 30, 1965, to permit an orderly administration of the rural housing program.

The bill also will increase from \$10 million to \$50 million the total amount of appropriations authorized for section 516 grants to help nonprofit sponsors provide low-rent housing for domestic farm labor. This increase is needed to provide an effective approach to improving the housing of our farm labor. The harsh economic facts are that, because of the short period of occupancy of housing by farm laborers,

growers cannot afford to invest the total cost of adequate housing and, because of the low wages received by most farmworkers, they are unable to pay the rent that would be needed to provide the income necessary to repay a loan for the full cost of the housing. These section 516 grants, which may be made up to two-thirds of the cost of the housing, should greatly accelerate the rate of replacing the existing labor slum housing with housing that is adequate but modest and economical.

Federal National Mortgage Association—Purchase of rural housing loans

The Federal National Mortgage Association is authorized to purchase loans insured under the new provisions of title V of the Housing Act of 1949 in its secondary market operations.

The committee urges the Farmers Home Administration to continue its vigilance to assure that the authorizations in this title are not employed to make credit available to any applicants who may be able to qualify for loans from and meet the requirements of responsible local lenders.

CREDIT ABILITY TEST

The statute requires that before making a direct loan or an insured loan to a nonfarm owner the Farmers Home Administration must satisfy itself that the applicant is “* * * unable to secure the credit necessary for such housing and buildings from other sources upon terms and conditions which he could reasonably be expected to fulfill.”¹

The committee has heard testimony that the present procedures used by the Farmers Home Administration to secure this determination that private credit is not available prior to making a direct rural nonfarm housing loan have not carried out the intent of the law in some parts of the country. The committee directs the Secretary to review the present procedures or develop new ones to assure that prior to his approval of a loan (1) institutions such as local banks normally lending in the county where the property is located will not make a loan on their normal lending terms, and (2) lenders such as approved FHA mortgagee offering Federal Housing Administration insured loans will not make a satisfactory loan under the FHA program.

The committee notes that FHA has recently instructed all its regional offices to recognize that FHA loans must be available to citizens in small farm and rural areas and to redirect their procedures to accomplish this purpose. This, of course, means that FHA loans for 93 percent of value and for terms of up to 35 years can be offered. The committee considers that if such FHA financing is available, the Farmers Home Administration should not make a direct or insured loan to the borrower under the rural housing program.

“PUT” FEATURE OF INSURED RURAL HOUSING

In devising the insured loan feature for rural housing loans in lieu of the former direct loan program, the committee was faced with a choice of alternatives to provide means of assuring that these long-term loans will be readily marketable to the investing public. This could be done either (1) by authorizing the sale of such obliga-

¹ Sec. 501(c) of title B, Housing Act of 1949, Public Law 171, 81st Cong.

tions at a discount below the face value so that the yield to the investor throughout the maturity period will be attractive as compared with other available investments, or (2) by authorizing sale at face value with agreements that the Secretary would repurchase the obligation at the option of the investor at the end of an agreed period. This latter alternative would have the same effect insofar as the investor is concerned as shortening the maturity period of the borrower's obligation. The Secretary would agree to repurchase the insured notes at the end of the agreed period if so requested by the holder. This feature is sometimes called the put. While this method may involve the expenditure of some Federal funds, the difficulties envisioned in the financing of the "put" are, in the opinion of the committee, exaggerated because the Secretary would immediately sell the paper so acquired on terms and with additional repurchase agreements which the market would then take. Whatever Federal financing is involved would be of a general temporary nature.

In order to give the Secretary the flexibility to meet changing investment market conditions in the sale of these obligations, the committee has not in the statute fixed the time at which the private holder may elect to resell them to the Secretary. But the absence of such a provision in the act should not be construed as the choice of the committee that this paper should normally be sold by the Secretary at a discount in lieu of entering into a "put" agreement. On the contrary, the committee expects that such repurchase agreements will be used and that the length of the period will vary from time to time to the end that these obligations will readily move in the fluctuating private investment market at all times.

TITLE X—MISCELLANEOUS

URBAN PLANNING GRANTS—AUTHORIZATION

Section 1001 of the bill would raise the existing \$105 million ceiling on the authorization for appropriation of funds for urban planning grants under section 701 of the Housing Act of 1954 to \$230 million.

The committee has also added a provision to section 701 of the Housing Act of 1954 which will permit up to 5 percent of any funds appropriated under the authorization to be used by the Housing Administrator for studies and for demonstration projects for the development and improvement of techniques and methods for comprehensive planning and for the advancement of the purposes of the urban planning grant program.

Under the section 701 urban planning grant program, the Housing Administrator is authorized to make grants (generally not to exceed two-thirds of the estimated costs) to States and local planning agencies to assist in preparing comprehensive development plans and programs. The program is designed to encourage and facilitate comprehensive planning for urban development on a continuing basis, including planning for open space land and urban transportation. Surveys and analyses of population, economy, physiography, land use, transportation, and similar factors may be financed, as well as preparation of comprehensive development plans for the areas involved and maintenance of data on a current basis. Since its inception, more than 4,500 different localities have participated in the program.

This section would also provide assistance to the solution of metropolitan or regional problems.

One of the most urgent needs in developing and carrying out plans and programs for coordinated development of a metropolitan or other urban area is administrative machinery for cooperation among the jurisdictions within the area. An organization of policy and decision makers representing the various local governments within the area can serve as an effective forum for studying and resolving issues raised by metropolitan problems, for developing action programs for carrying out metropolitan comprehensive plans, and for determining regional policies affecting governmental and functional activities.

The need for such organizations is receiving increasing recognition by the political leaders within metropolitan regions, and within the past few years several areas have formed associations or conferences of elected officials—such as the metropolitan areas including Atlanta; Washington, D.C.; San Francisco, Calif.; Detroit, Mich.; Salem, Oreg.; Philadelphia, Pa.; and Seattle, Wash.

Because of the basic importance of this general kind of organization to achieving metropolitan cooperation and implementing comprehensive overall plans, including plans for many federally assisted facilities and programs, it is proposed that Federal financial assistance be made available to support their operations. Assistance is particularly needed to create an incentive for their establishment and to assist them during their early, formative years when adequate financing is a crucial problem.

The bill therefore authorizes Federal grants to be made by the Housing Administrator to metropolitan or regional organizations of local governmental representatives to assist them in working out mutually acceptable solutions to common problems affecting multi-jurisdictional urban areas.

This assistance would complement, and in some cases anticipate comprehensive metropolitan planning now eligible for assistance under the section 701 urban planning grant program.

The grants could cover up to two-thirds of the cost of a broad range of activities including, but not limited to, studies of legal, governmental, and administrative problems affecting the cooperating jurisdictions, the development of uniform coordinated regulatory measures, the development of interjurisdictional agreements and arrangements for jointly providing public services, and the development of programs, on a unified metropolitan basis where necessary, for providing and operating facilities proposed in comprehensive metropolitan plans. However, the main objective would be to foster metropolitan cooperation on a broad front, rather than being limited to comprehensive planning authorized by other parts of section 701 of the Housing Act of 1954. Hence, financial assistance would not be restricted to those urban areas that had developed a comprehensive plan or were carrying out a comprehensive metropolitan planning program.

Administrative procedures should be established: (1) to assure coordination of comprehensive planning activities carried out by a separate metropolitan or regional planning agency with those activities of the same metropolitan or urban area's organization of governmental officials supported by grants made under this new provision;

and (2) to avoid duplication of planning activities financed under the section 701 urban planning grant program.

The administrative criteria governing eligibility for a grant under these provisions that should be directed at permitting a diversity of organizational structure and composition. However, it is the intent of this provision that the grants would be made only to organizations consisting of representatives of the general governmental authority of the participating jurisdictions, rather than to organizations of representatives of limited functional activities. Although the grants would be made to the eligible organization, it might, as is customary with the existing section 701 urban planning program, carry out the proposed work either with its own staff or by contracting with private consultants or operating or functional agencies such as park departments, sewer and water commissions, or organizations of administrative officials.

AUTHORIZATION FOR FEDERAL-STATE TRAINING PROGRAMS

Section 1002 of the bill would increase the amount authorized to be appropriated for the Federal-State training program by \$20 million, from \$10 to \$30 million.

Under part 1 of title VIII of the Housing Act of 1964, the Housing Administrator is authorized to make matching grants to States to assist them in developing special training programs for technical and professional people who are, or are likely to be, employed by a governmental or public body which has responsibilities for community development. These matching grants may also be used to support State and local research on housing, public improvement programs, code problems, efficient land use, urban transportation, and similar community development problems.

This program is needed to help local programs become more effective and economical, and to strengthen generally the capabilities of local government. Your committee wishes to express its concern that although the Housing Act of 1964 authorized \$10 million for grants under this program, funds have not yet been appropriated.

AUTHORIZATION FOR PUBLIC WORKS PLANNING ADVANCES

Section 1003 of the bill would increase the amount authorized to be appropriated for public works planning advances by \$50 million, from \$20 million to \$70 million.

Under this program the Housing Administrator advances interest-free funds to States, municipalities, and other public agencies to help finance the cost of planning various public works and facilities. These advances become repayable in whole or in part when construction is started.

As of the end of 1964, a total of 3,817 applications for approximately \$92 million have been approved under the program. The estimated cost of the projects aided through these public works planning advances totals \$5.56 billion. As of the same date, 3,360 plans involving Federal advances of \$84 billion have been completed and 1,186 advances for \$31 million have been repaid.

AUTHORIZATION FOR HOUSING FOR THE ELDERLY OR HANDICAPPED

Section 1004 of the bill would increase the amount authorized to be appropriated for the elderly housing and handicapped direct loan program (sec. 202 of the Housing Act of 1959) by \$150 million, from \$350 million to \$500 million.

One of the most urgent needs in the field of housing is the provision of suitable accommodations for our elderly citizens. This older age group is growing more rapidly than the population as a whole and, generally speaking, its incomes are substantially lower. To meet this need the Congress in the Housing Act of 1959 authorized a program of direct low-interest-rate loans to nonprofit corporations to build housing for the elderly. There has been a rapidly growing interest in the program.

AUTHORIZATION FOR LOW-INCOME HOUSING DEMONSTRATION PROGRAMS

Section 1005 of the bill provides an additional \$5 million in authorization for grants under the low-income housing demonstration program authorized by the Housing Act of 1961.

The committee believes that the low-income housing demonstration program has been very beneficial in developing new ideas and ways to meet the housing needs of low-income families. In this connection, the committee was impressed with the experience gained from several low-income demonstration programs being carried out presently. The committee feels that the low-income demonstration program should be continued in order that new ideas and methods for housing individuals and families of low income might be developed and tried out.

ADVISORY COMMITTEES, TECHNICAL PROVISION

Section 1006 of the bill would delete an obsolete provision from section 601 of the Housing Act of 1949. The provision deleted exempts a member of an advisory committee appointed by the Housing and Home Finance Administrator or the heads of any of the constituents of the Housing Agency from certain cited conflict of interest laws. This provision was made obsolete and no longer necessary by section 2 of Public Law 87-849. That law enacted new provisions which accomplish the same purpose.

PUBLIC FACILITY LOANS

Section 1007 of the bill would permit the Administrator to make loans under the public facility loans program to private nonprofit corporations to finance the construction of works for the storage, treatment, purification, or distribution of water, sewage, sewage treatment, and sewer facilities needed to serve small communities and rural areas (with a population of less than 10,000) if he determines no existing public body is able to construct and operate such facilities.

In general, under the existing public facility loan program (title II of the Housing Amendments of 1955), loans can only be made to "municipalities and other political subdivisions and instrumentalities of one or more States * * *" to finance certain types of public works or facilities, including basic water and sewage facilities. The com-

mittee has been advised that there are many smaller communities and rural areas where there is no existing public body which is able to construct and operate such facilities. The committee was further advised that these areas are suffering from an acute shortage of water. Sources of water in many communities, as well as private wells, have gone dry or have become contaminated. In some instances, potable water must be obtained from distant sources. Similarly, septic tanks are no longer functioning in some areas and the discharge of sewage is causing a health hazard to the people of these small communities and rural areas.

The committee has been told that there are (or could be created), in some of these areas, private nonprofit organizations that are able to construct and operate water and sewage systems for the benefit of the smaller communities and rural areas needing such systems, but that these organizations have difficulty in financing such undertakings. The committee has therefore included a provision in the bill to make such organizations eligible to obtain financial assistance under the public facility loan program.

This section would also make certain federally impacted areas in which there is located a research or development installation of the National Aeronautics and Space Administration eligible for a loan under the public facility loan program, regardless of the population of that area. Present law permits such communities having a population of up to 150,000 to participate in the public facility loan program, if such communities are impacted because of NASA activities.

Because of stepped-up activity in space exploration, there has been a great influx of scientists, technicians, and other highly skilled personnel connected with research and development activities of space programs into communities in which there located a research or development installation of the National Aeronautics and Space Administration. In addition, industries related to space research, development, and exploration have moved into these communities. This influx has overburdened existing public works and facilities and the population "sprawl" and "explosion" have far exceeded the ability of these communities to keep up with and to finance the necessary public works and facilities to care for the needs of the people. In order to help these communities, the committee has included a provision in this bill that would eliminate the hardship being caused on such communities to obtain assistance under the public facility loan program.

LEASE GUARANTEES FOR CERTAIN SMALL BUSINESS CONCERNS

Section 1008 of the bill would add a new title IV to the Small Business Investment Act to establish a new program of lease guarantees for certain small business concerns. The Small Business Administration would be authorized, under this program, to assist small business concerns which have been displaced by Federal or federally assisted construction projects, or which are eligible for assistance under title IV of the Economic Opportunity Act of 1964, by guaranteeing the payment of rentals under leases of commercial and industrial property entered into by such concerns.

The Administration would be authorized to issue such guarantees directly or in participation with private surety companies or other qualified companies; but the bill expressly provides that no direct

guarantees could be made except upon a showing that comparable guarantees at reasonable rates were not available from private sources, and no guarantee could be made unless there existed reasonable expectation that the small business concern aided thereby would not default on its lease.

The Administration would be directed to fix a uniform annual fee for its share of any guarantee issued. The amount of the fee, to the extent practicable, would be determined in accordance with sound actuarial principles; but in no case could it exceed 2½ percent of the minimum annual guaranteed rental payable under a guaranteed lease. As experience justified, the fee would be lowered. Fees for processing applications would also be authorized.

Various provisions to minimize losses are included in the proposed program. The Administrator of the Small Business Administration would be given discretionary authority to require that a lessee whose lease was guaranteed should deposit into escrow 3 months' advance rental payments. This fund would be utilized to meet rental charges accruing during periods of default, or, if no default occurred, would be applied (with accrued interest) toward final rental payments under the lease. In consideration of this advance rental payment, where required, lessors would be obligated to utilize the entire period for which escrow funds were available in reasonably diligent efforts to release the property on which lease default had occurred, to another qualified tenant, and no claim could be made under the guarantee until this effort had been made. Other loss-minimization provisions could be imposed by the Administrator by regulation.

Functions of the Administrator and the Administration under the program would be subject to the same powers and conditions as are set forth in section 201 of the Small Business Investment Act and section 5(b) of the Small Business Act.

There would be established in the Small Business Administration, as initial capital for the lease guarantee program, a special revolving fund of \$5 million, with funds therefor transferred from the Administration's general revolving fund, the authorized total of which would be raised in a like amount. Transfers to the special \$5 million lease guarantee fund from the SBA revolving fund would be exempted from the general obligation to pay interest to the Treasury made applicable to other outstanding cash disbursements from the revolving fund by the final sentence of section 4(c) of the Small Business Act. The lease guarantee fund would also be excepted from the \$341 million ceiling on outstanding transfers from the SBA revolving fund for exercise of the functions of the Small Business Investment Act. In addition, subsection (b) of this section would amend section 201 of the Small Business Act to exempt operations of the SBA under title IV, the lease guarantee program, and also the State and local development company program established under title V of the Small Business Investment Act, from the requirement that all programs under that act be conducted by the Deputy Administrator for Investment.

The Senate Select Committee on Small Business held hearings in 1959 and 1961 on the extreme difficulties experienced by many small business concerns in obtaining leases of prime commercial and industrial locations, in competition with larger concerns having higher credit ratings. In a report issued in 1962 (S. Rept. 1532, 87th Cong., 2d sess.), the Small Business Committee strongly recommended establishment of a lease guarantee program in SBA, and a bill to

implement that recommendation was introduced (S. 3345, 87th Cong., 2d sess.). Section 1008 of the present bill is patterned on the 1962 bill, except that the initial capital of the program has been reduced from \$50 million to \$5 million and eligibility for lease guarantees thereunder has been limited to small business concerns displaced by Federal or federally aided urban renewal, highway, or other construction projects and those eligible for assistance under title IV of the Economic Opportunity Act of 1964, rather than all qualifying small business concerns, as originally proposed.

In its 14th annual report (S. Rept. 1180, 88th Cong., 2d sess., p. 93), the Senate Small Business Committee conceded that the evidence was conflicting as to need and demand for a lease guarantee program applicable to small business concerns generally. Accordingly, the committee believes that a pilot program, limited to those classes of small business covered by this bill, will not only make such benefits immediately available to those in most urgent need of assistance in obtaining improved facilities, but will afford opportunity for evaluation of the feasibility and effectiveness of such aid, at modest cost and on a small scale. If the theories of the original proponents are borne out in practice, the program will be self-supporting and may well be taken over eventually by private enterprise.

FHA CONFORMING AMENDMENTS

Section 1009 of the bill would amend various sections of the National Housing Act to make their provisions conform to the provisions in title II of this bill with respect to the consolidation of FHA insurance funds.

REPEAL OF SPECIAL PROVISION IN URBAN MASS TRANSPORTATION ACT

Section 1010 of the bill would repeal a provision in the Urban Mass Transportation Act of 1964 which requires that contractors, in providing facilities or equipment financed with loan or grant assistance under the act, "shall use only such manufactured articles as have been manufactured in the United States."

There is no other Federal matching grant program which contains such a requirement. Even the Buy-American Act, which is in general limited to direct Federal procurement, permits use of foreign materials if comparable domestic materials are not available or are available only at an unreasonable price differential.

The President, in approving the Urban Mass Transportation Act, expressed hope that this provision would be repealed and said that it is incompatible with the trade policy this Nation is pursuing under the Trade Expansion Act. The committee heard testimony from State Department officials that the provision could damage our foreign trade relations out of all proportion to the small volume of materials it might protect.

REDEVELOPMENT AREAS—TECHNICAL PROVISION

Section 1011 amends section 103(a)(2)(B) of the Housing Act of 1949 and section 701(b) of the Housing Act of 1954 in order to make a technical amendment to these two acts.

FEDERAL RESERVE ACT

Section 1012 amends section 24 of the Federal Reserve Act which authorizes national banks to make real estate loans—loans secured by first liens on improved real estate—under certain conditions specified in that section.

Under the present law a national bank may purchase an existing obligation secured by a real estate loan if it purchases the entire obligation but the wording governing purchase of participations requires further clarification. The first amendment would remove any doubt as to the authority of national banks to purchase participations in existing real estate loans.

This section also amends such act to authorize construction loans up to 30 months in length as an exception to the limitations on real estate loans. Under the present law such construction loans may not exceed 18 months.

SAVINGS AND LOAN ASSOCIATIONS

Section 1013 of this bill would authorize Federal savings and loan associations to make mortgage loans secured by fraternity or sorority houses, or college dormitories, outside of the 20-percent limitation.

The committee believes that this additional lending authority by Federal savings and loan associations will encourage more financial support for the construction of college housing and related facilities.

Section 1013 of the bill would also add a new provision to title IV of the National Housing Act, under which the Federal Savings and Loan Insurance Corporation was created. This would give the Federal Home Loan Bank Board standby authority to require insured savings and loan associations to make deposits up to 1 percent of their savings in the Federal Savings and Loan Insurance Corporation. These deposits would receive a return equal to the rate of return on the Corporation's investments in obligations of or guaranteed by the Government, and they might be repaid by the Corporation in whole or in part at its choice.

This provision follows section 2 of S. 2081, introduced by Senator Robertson, at the request of the Federal Home Loan Bank Board. Letters supporting this bill, and particularly endorsing section 2, were received from the U.S. Savings and Loan League and the National League of Insured Savings and Loan Associations and are printed below:

UNITED STATES SAVINGS & LOAN LEAGUE,
Washington, D.C., June 15, 1965.

Hon. A. WILLIS ROBERTSON,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The United States Savings & Loan League would like to go on record in support of S. 2081, which you introduced by request.

There has been a substantial increase—especially in the past 15 years—in the insured deposits and savings in the institutions which the FDIC and the FSLIC insure. This increase suggests that Congress in this session might give serious consideration to the statutory arrangements by which these corporations would have additional access to funds in emergencies. S. 2081 would approach this objective in two ways.

In section 1, it would increase the power of the FDIC to borrow from the U.S. Treasury from \$3 billion to \$4 billion and the authority of the FSLIC to borrow from the Treasury of \$750 million to \$2 billion. Such an increase merely updates the ratio of this borrowing authority to the outstanding obligations in institutions insured by the corporations.

The second approach, which is confined to the FSLIC but which the league believes to be equally important, would give the insured savings and loan associations themselves an opportunity to provide emergency funds to their insurance corporation. Under section 2 of the bill, it is provided that the Federal Savings and Loan Insurance Corporation could require of the associations which it insures cash deposits up to 1 percent of each institution's savings accounts. This section, if used to the maximum, would add approximately \$1 billion of liquidity to the Insurance Corporation. It would, in effect, place this \$1 billion ahead of any borrowings from the Federal Government, because it is assumed that such a right would be exercised by the Corporation before it made any call on the Treasury's borrowing authority. This approach is in line with the longstanding position of the savings and loan associations that insofar as possible they should pay their own way in their Insurance Corporation.

If the Senate Banking and Currency Committee has reservations at this time about increasing the Treasury borrowing authority of the two insurance corporations as provided in the first section of S. 2081, the second section might still be enacted on its own. The league would support a decision of the Banking Committee to make section 2 of S. 2081 part of the pending Housing and Urban Development Act of 1965. The original FSLIC statute was enacted as part of the National Housing Act and is still included in title IV of that act. An amendment relating to the Corporation could thus appropriately, it seems, go into the Housing Act this year. If enacted, this would give the Federal Savings and Loan Insurance Corporation ample liquidity for any unusual demands in the foreseeable future.

Sincerely,

C. R. MITCHELL,
Legislative Committee Chairman.

NATIONAL LEAGUE OF INSURED SAVINGS ASSOCIATION,
Washington, D.C., June 16, 1965.

HON. A. WILLIS ROBERTSON,
Chairman, Committee on Banking and Currency,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The National League of Insured Savings Associations endorses the objectives of S. 2081, a bill designed to update and improve the liquidity position of the Federal Savings and Loan Insurance Corporation.

Section 1 of the bill would increase from \$750 million to \$2 billion the authority of the FSLIC to borrow funds from the Treasury Department. This so-called emergency line of credit to the Treasury has never been used in the 30-year history of the Corporation, and it is doubtful that the time would ever come when such a call would be necessary due to numerous safeguards written into the Nation's savings and loan system.

Among these safeguards are the reserves of FSLIC member associations which now exceed \$7.6 billion and are accumulating at an annual rate of \$700 million. In addition, the primary and secondary reserves of the FSLIC total more than \$1.3 billion—which represents a doubling in the Corporation's loss reserves during the past 4 years.

The league believes that the FSLIC should rely primarily upon the industry in the unlikely event that the Corporation would require additional liquidity. However, if the administration and the Congress believe an increase in the line of credit to the Treasury for the FSLIC and the Federal Deposit Insurance Corporation is appropriate, the league would register no objection.

Section 2 of the bill would grant the FSLIC standby power to call upon insured associations for deposits not exceeding 1 percent of their aggregate obligations on withdrawable or repurchasable shares, investment certificates, and deposits. The league endorses this provision.

The record of the Insurance Corporation in helping to protect the savings of the people is unmatched in modern financial history. It is our belief that provision for the proposed 1-percent call for deposits would further strengthen the Corporation and inspire still greater confidence in the savings and loan system of the Nation.

The league believes firmly that the industry should continue its historic practice of underwriting the cost of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation and not rely on taxpayer funds for this purpose.

Accordingly, the league would favor enactment of section 2 of the bill.

The league believes that any prospective call on the industry should be handled in such a way as to minimize the impact upon insured associations and the liquidity position of these institutions.

For example, during the construction season, insured institutions are under pressure to provide funds for homebuilding and sales financing. Usually, in this period, the liquidity position of the industry is under pressure as commitments are fulfilled. Thus we would urge the Board to provide adequate notice to the industry prior to making a call for deposits from the industry and take any other steps which would ease the obvious strain upon the industry's liquidity at the time of the call.

It is our understanding that the authority sought by the Board would be in fact exercised only at such time as the Corporation might be required to acquire a substantial volume of mortgage assets and thereby deplete its liquidity. The League hopes that the FSLIC would follow a policy of expediting the orderly liquidation of mortgage assets which accumulate in its portfolio in order to provide additional liquidity and minimize the Corporation's reliance upon the authority provided in S. 2081.

The League wishes to express its appreciation to you and the committee for the opportunity to present these views.

Sincerely yours,

KENNETH G. HEISLER,
Executive Director.

This provision was included in order to make available additional financial resources for the Corporation, within the traditional framework through which the industry has financed the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation by premiums and assessments on insured institutions, and has built up a reserve fund which now amounts to more than \$1.3 billion.

The new provision would provide additional liquidity for the Corporation; it would give standby authority for use if the Insurance Corporation's liquidity falls below a reasonable level. In this connection, the committee noted the distinction between shortrun pressures on liquidity, which this proposal is designed to meet, and adequacy of the reserve fund to bear ultimate losses, as to which the committee discerned no problem. It is believed that there would ordinarily be no need to require any deposits as long as the Corporation's resources in the form of cash and Government obligations are not below 1 percent of insured liabilities.

The committee intends that calls for deposits would be made only when and to the extent needed to provide liquidity for the Corporation. The committee expects that the Board will give reasonable notice of payment of calls to insured institutions, and hopes that the Board will not ordinarily find it necessary to call for deposits in increments greater than one-fourth of 1 percent in 90 days. Deposits would, of course, be returned to the member institutions, in whole or in part, as soon as the need for them ends. The committee also expects the Board to take into consideration this new authority to require deposits, and the extent to which it has been exercised from time to time, when determining the overall liquidity regulations of the Board

SECTION-BY-SECTION SUMMARY

Section 1.—Provides that the bill shall be cited as the “Housing and Urban Development Act of 1965.”

TITLE I—SPECIAL PROVISIONS FOR DISADVANTAGED PERSONS

Financial assistance to enable certain private housing to be available for lower income families who are elderly, handicapped, displaced, victims of a natural disaster, or occupants of substandard housing

Section 101. Authorizes the Housing and Home Finance Administrator to make rent supplement payments to help make housing available to individuals and families who are elderly, handicapped, displaced, victims of a natural disaster, or occupants of substandard housing and who have incomes that do not exceed the maximum amount that can be established for occupancy in public housing under the Federal public housing law.

The annual rent supplement payment for any dwelling unit cannot exceed the amount by which the fair market rental for the unit exceeds one-fourth of the tenant's income.

The housing owner can be a private nonprofit or limited dividend corporation or organization, or a cooperative housing corporation who is a mortgagor of housing financed with market interest rate mortgages under the FHA section 221(d)(3) mortgage insurance program. Annual rent supplements can be paid over periods of up to 40 years.

The aggregate amount of the payments that can be contracted for is limited to amounts prescribed in annual appropriation acts but could not exceed \$50 million a year prior to July 1, 1966. The \$50 million limit is increased by \$50 million a year on July 1 in each of the years 1966, 1967, and 1968.

An experimental program of rent supplements is permitted for housing financed with below market interest rates. This includes the FHA section 221(d)(3) below market housing, and housing for the elderly financed under the direct loan program. Another provision of the bill reduces the interest rate to 3 percent on the housing for the elderly loans and the (d)(3) below market mortgages. The experimental program will also be available for FHA section 231 mortgage insurance housing if the mortgage is endorsed for insurance after the date of enactment of the bill.

Under the experimental program not more than 20 percent of the dwelling units in the project can be eligible for rent supplements. Also, not more than 10 percent of the amounts approved in annual appropriation acts for rent supplement payments can be utilized for rent supplements in the below market projects.

The Administrator will provide for certification to the housing owners of eligibility of the tenants. The incomes of the occupants (except the elderly tenants) will be reexamined at least every 2 years.

Tenants may receive rent supplements where they occupy units under leases with an option to purchase their dwelling unit.

The workable program for community improvement requirement for FHA section 221(d)(3) mortgage insurance does not apply in the case of housing to be used under the rent supplement program unless the program was already required and in effect in the community.

On or before January 1, 1968, the Administrator is required to submit a report to the Congress on the rent supplement program, together with his recommendations with respect to the program.

Extension of FHA section 221 programs; modification of interest rate

Section 102(a).—Amends section 221(f) of the National Housing Act to continue for 4 years (from September 30, 1965, to October 1, 1969) the authority of FHA to insure mortgages under its section 221 programs of housing for lower income families. This includes extension of the (d)(3) below market rental housing and the (d)(2) low downpayment sales housing programs.

Subsection (b) amends section 221(d)(5) of the act to place an interest rate ceiling of 3 percent (or the rate derived under the existing formula, if lower) on mortgages which may be insured by FHA under the section 221(d)(3) below market interest rate program. (The rate is now $3\frac{7}{8}$ percent and is expected to rise to 4 percent or higher on June 30, 1965.

Rehabilitation grants to homeowners in urban renewal areas

Section 103.—Adds a new section 115 to the Housing Act of 1949 to authorize the limited use of urban renewal capital grant funds for rehabilitation grants to certain homeowners in urban renewal areas whose income does not exceed \$3,000 a year. Such grants may be in an amount up to the lesser of \$1,500 or the cost of the repairs. If the income exceeds \$3,000 a year, grant cannot exceed that portion of cost of repairs which can be paid for with a loan which could be amortized, along with the borrower's other monthly housing expense, with 25 percent of his monthly income.

Existing contracts for Federal assistance to urban renewal can be amended to provide for these rehabilitation grants.

Parity of treatment for the handicapped and elderly in public housing

Section 104.—Amends section 2(2) of the United States Housing Act of 1937 to establish parity of treatment between the handicapped and elderly in low-rent public housing. It increases by \$1,000 (\$500 in the case of Alaska) the maximum room cost limits applicable to public housing designed specifically for the handicapped; authorizes a special contribution of up to \$120 per unit per year to dwelling units occupied by the handicapped; and exempts the handicapped from the requirement that there be a 20-percent gap between the upper rental limits for admission to a proposed low-rent housing project and the lowest rents at which private enterprise is providing a substantial supply of standard housing.

Modification of interest rate on loans to provide housing for elderly or handicapped

Section 105.—Amends section 202(a)(3) of the Housing Act of 1959 to fix the ceiling on interest rates of loans made under the elderly and handicapped direct loan program at a maximum of 3 percent. (By cross-reference in existing law, also fixes 3 percent maximum on rural elderly housing direct loan program; sec. 515, Housing Act of 1949).

Relocation payments under the Urban Mass Transportation Act of 1964

Section 106.—Amends section 7(b) of the Mass Transportation Act of 1964 to make the payments to individuals, families, business concerns, and nonprofit organizations displaced by federally aided urban mass transportation projects after March 4, 1965, the same as those provided under the urban renewal and low-rent public housing programs.

Mortgage relief for homeowners who are unemployed as the result of the closing of a Federal installation

Section 107.—Authorizes FHA and VA to pay for not more than 1 year the principal and interest payments on FHA or VA mortgages where the mortgagors are unemployed as a result of the closing of a Federal installation and such action is the only means whereby a foreclosure can be avoided. The mortgagor must be the occupant of the housing, and he must agree to reimburse the FHA or VA for the payments made by them.

Acquisition of certain properties situated at or near military bases which have been ordered to be closed

Section 108.—Authorizes the Secretary of Defense to acquire one- or two-family dwellings situated at or near a military base or installation which is closed or partially closed after November 1, 1964, if he determines that there is no present market for the sale of the property upon reasonable terms and conditions and that the owner's employment at the base or installation is terminated by its closing.

The purchase price shall be equal to the average price at which similar properties in the locality were sold prior to announcement of the closing of the base or installation.

The properties acquired shall be transferred to the Federal Housing Commissioner for disposal. Any net receipts remaining after disposal shall be covered into the U.S. Treasury as miscellaneous receipts.

Appropriations are authorized to carry out the provisions of this section and any sums appropriated shall remain available until expended.

TITLE II—FHA INSURANCE OPERATIONS

Land development

Section 201(a).—Adds to the National Housing Act a new title X to authorize a new program of FHA mortgage insurance for land improvement and site development for subdivisions.

FHA would be authorized to insure mortgages to finance the acquisition of land and the installation of improvements such as water and sewer lines, streets, curbs, sidewalks, and storm drainage facilities.

Commissioner would be directed to adopt appropriate requirements to encourage the maintenance of a diversified local home-building industry, broad participation by builders, and a proper balance of housing for low- and moderate-income families.

The maximum mortgage for a single land insurance undertaking could not exceed \$10 million. The mortgage maximum would be limited to 50 percent of the Commissioner's estimate of the value of the land before development plus 90 percent of his estimate of the cost of such development, subject to an overall ceiling of 75 percent of the value upon completion.

The maximum maturity of the mortgage would be limited to 7 years, or such longer maturity as the Commissioner deems reasonable in the case of a privately owned system for water or sewerage. The Commissioner is authorized to prescribe maximum interest rates and the premium charges.

To be eligible, the mortgage would have to represent a good mortgage insurance risk in the Commissioner's estimation, and the development would have to be consistent with sound land use patterns and consistent with comprehensive planning being carried on for the area in which the land is situated. It would also have to be served by such shopping, school, recreational, transportation, and other facilities as the Commissioner deems adequate or necessary.

Cost certification would be required to assure that the amount of the mortgage loan outstanding at reasonable intervals during construction does not exceed the maximum loan ratios described above.

No mortgage could be insured under the new program after October 1, 1969, except pursuant to a commitment to insure issued before that date.

(b) Amends various provisions of existing law to make land development mortgages insured under the new title X eligible for FNMA's regular secondary market program and for investments by national banks and Federal savings and loan associations.

Extension of insurance authorizations

Section 202.—Amends sections 2(a), 217, 809(f) and 810(k) of the National Housing Act to continue for 4 years (until October 1, 1969) FHA's authority to insure property improvement loans under the title I program and to insure housing loans and mortgages under all of its programs except the section 221 program which is continued by section 102 of the bill.

Downpayment requirement in case of low-income housing demonstration homes

Section 203.—Amends section 203(b)(9) of the National Housing Act to permit the downpayment on the purchase of a home financed with a mortgage insured by FHA under the regular section 203(b) home mortgage insurance program to be made by someone other than the mortgagor in the case of a home being purchased under the low-income housing demonstration program assisted pursuant to section 207 of the Housing Act of 1961.

Multifamily mortgage limits for four or more bedroom units

Section 204.—Amends sections 207, 213, 220, 221, 231, and 234 of the National Housing Act to increase the dollar limitation on the amount of an insurable mortgage in the case of dwelling units having four or more bedrooms. The amount of the increase would range from \$2,250 to \$2,500 per family unit. No change would be made in the existing limits for dwelling units having less than four bedrooms.

Rehabilitation in urban renewal areas

Section 205.—Amends section 220 of the National Housing Act (FHA's urban renewal housing program) to increase the maximum amount of an insurable mortgage in a case where the mortgagor is not the occupant of the property but intends to hold it for rental purposes from 85 percent of the amount which an owner-occupant

could receive to 93 percent of such amount. The existing 85-percent limit would continue to apply where the nonoccupant mortgagor intends to hold the property for sale rather than rental. Where refinancing is involved, existing indebtedness for improvement of the property could be included in the computation of the mortgage amount whether or not the indebtedness is secured by a mortgage against the property.

Nondwelling facilities for urban renewal housing

Section 206.—Amends section 220 of the National Housing Act (FHA's urban renewal housing program) to permit more nondwelling facilities to be included in a rental housing project financed with a mortgage insured under the section 220 program.

Under the amendment the project could include such nondwelling facilities as the Commissioner deems desirable and consistent with the urban renewal plan. However, the project must be predominantly residential and the Commissioner must find that any nondwelling facility included in the project is essential to the economic feasibility of the project, and that its financing will not result in a disadvantage to other business enterprises in the vicinity of the project.

Larger insured mortgages for servicemen

Section 207.—Amends section 222 of the National Housing Act (the FHA mortgage insurance program for servicemen) to increase from \$20,000 to \$30,000 the maximum amount of a mortgage which can be insured by FHA under that program.

The downpayment required would be 5 percent of the first \$20,000 of the appraised value of the property (or the amount required under the regular sec. 203(b) home mortgage program, whichever is lesser), and 15 percent of the value in excess of \$20,000.

Refinancing of insured mortgages

Section 208.—Amends section 223 of the National Housing Act to give FHA the authority to insure mortgages executed for the purpose of refinancing existing mortgages insured under any of FHA's programs. This authority is now available only for mortgages insured under sections 220, 221, 903, 908, and (in certain cases) 608.

Consolidation of FHA insurance funds

Section 209.—Adds a new section 519 to title V of the National Housing Act to provide for the consolidation into a single general insurance fund of all of FHA's existing insurance funds except the mutual mortgage insurance fund, which would continue without change in its present coverage of section 203 mortgages (although sec. 203(k) home improvement loans would be transferred to the new fund).

Optional cash payment of insurance benefits

Section 210.—Adds a new section 520 to title V of the National Housing Act to authorize the FHA Commissioner in his discretion to pay either in cash or in debentures any insurance claim filed by a mortgagee under any of FHA's programs after the enactment of the bill. (Under existing law payment must be in debentures, except in the case of mortgages insured under secs. 220, 221, and 233 after the enactment of the 1961 Housing Act and loans insured under sec. 203(k) after the enactment of the 1964 act.)

Any such cash payment would be in an amount equivalent to the face amount of the debentures which would otherwise be issued plus the interest such debentures would have earned.

Approval of technically suitable materials

Section 211.—Adds a new section 521 to title V of the National Housing Act to require the FHA Commissioner to adopt a uniform procedure for the acceptance of materials and products to be used in housing approved for mortgages or loans insured by the FHA. Under the procedure any material or product which is technically suitable for the use proposed shall be accepted.

Water and sewer facilities in connection with certain federally assisted housing

Section 212(a).—Adds a new section 522 to the National Housing Act to prohibit the insurance of any mortgage which covers new construction (except pursuant to a commitment to insure made prior to the date of enactment of the bill) if the housing is not served by a public or adequate community water and sewerage system unless (1) the property is served by a system approved by the Federal Housing Commissioner under the new mortgage insurance program for land development authorized by the bill, or (2) the property is situated in an area certified by appropriate local officials to be an area where the establishment of public or adequate community water and sewerage systems is not economically feasible.

(b) Adds similar provisions to title 38 of the United States Code to be applicable to housing loans under the veterans' housing program administered by the Veterans' Administration.

Property improvement program under title I

Section 213(a).—Amends section 2(b) of the National Housing Act to increase the limit on the amount of a property improvement loan that can be insured by the FHA under its title I property improvement program from \$3,500 to \$5,000, and to permit the loans to have a maturity of up to 7 years rather than the present 5 years.

(b) Subjects a lender purchasing FHA title I property improvement loans from a dealer or contractor to the same defenses against payment which might be asserted against the dealer or contractor. Presently, the lender may take as a holder in due course.

TITLE III—URBAN RENEWAL

General neighborhood renewal plans

Section 301.—Amends section 102(d) of the Housing Act of 1949 to permit a general neighborhood renewal plan to cover adjoining areas having specially related problems as well as the urban renewal area itself, thereby eliminating the present requirement that the whole area covered by a general neighborhood renewal plan be an urban renewal area, and authorizes such a plan even though the area involved includes subareas which are not themselves so blighted or deteriorated as to require urban renewal treatment.

Increase in authorization for capital grants

Section 302.—Amends section 103(b) of the Housing Act of 1949 to increase the urban capital grant authorization by \$2.9 billion in the following manner: \$675 million on enactment, by \$725 million on July

1, 1966, and by \$750 million on July 1 in each of the years 1967 and 1968.

The Housing Administrator is also directed to undertake a study of the existing urban renewal program with a view to making recommendations for strengthening the program, or for establishing a new or alternative program.

Increase in nonresidential exception

Section 303.—Amends section 110(c) of the Housing Act of 1949 to increase the limit on nonresidential capital grant authority by permitting, after the date of enactment of the bill, up to 40 percent of the amount of grants authorized by the bill to be available for projects in areas which are predominantly nonresidential both before and after renewal. Under present law 30 percent of the aggregate amount of grants authorized after the Housing Act of 1959 can be used for non-residential projects.

Relocation payments

Section 304.—Amends section 114(b)(2) of the Housing Act of 1949 to increase the relocation adjustment payment for small businesses displaced by urban renewal or public housing activities from \$1,500 to \$2,500.

Demolition of unsafe structures and code enforcement

Section 305(a).—Adds a new section 116 to the Housing Act of 1949 to authorize the Housing Administrator to make grants to cities, other municipalities, and counties to assist in financing the cost of demolishing structures which have been determined to be structurally unsound or unfit for human habitation. The amount of the grant cannot exceed two-thirds of the cost of the demolition.

The section also adds a new section 117 to the Housing Act of 1949 to authorize the Housing Administrator to make grants to cities, other municipalities, and counties to assist them in carrying out programs of concentrated code enforcement in deteriorating areas in which the code enforcement, together with public improvements to be provided by the locality, may be expected to arrest the decline of the area. The grants cannot exceed two-thirds (or three-fourths in the case of a city or county having a population of 50,000 or less) of the cost of carrying out a code enforcement program over and above its normal code enforcement program.

(b) Amends section 110(c) of such act to remove existing provisions relating to code enforcement which are inconsistent with the provisions of the bill.

(c) and (d) Amends section 220 of the National Housing Act to make FHA-insured housing mortgages and home improvement loans insured under that section available for the code enforcement areas assisted under the bill.

(e) Amends section 312(a) of the Housing Act of 1964 to permit the low interest rate rehabilitation loans authorized by that section to be made for property located in the code enforcement areas assisted under this section of the bill.

Eligibility of certain local grants-in-aid

Section 306.—Makes certain local expenditures available as local grants-in-aid to urban renewal in the cities of Jasper, Ala., Joliet, Ill., Johnson City, Tenn., New Brunswick, N.J., and St. Louis, Mo.

Amendment of section 316 of the Housing Act of 1954

Section 307.—Amends section 316 of the Housing Act of 1954 to clarify the authority of the Redevelopment Land Agency of the District of Columbia to undertake urban renewal projects in non-residential areas.

Rehabilitation loans

Section 308(a).—Amends section 312 of the Housing Act of 1964 to provide that a rehabilitation loan can be made under that section if the Housing Administrator finds that the applicant is unable to secure the necessary funds from other sources upon comparable terms rather than reasonable terms as now provided.

(b) Amends section 312 of the 1964 act to make it clear that moneys in the revolving fund for the rehabilitation loan program can be used for the necessary expenses of servicing the loans.

TITLE IV—LOW-RENT PUBLIC HOUSING

Acceptance of local certification of equivalent elimination

Section 401.—Amends section 10(a) of the United States Housing Act of 1937 to permit acceptance of certifications by local governing bodies that they have complied with the equivalent slum housing elimination requirements of that act.

Greater use of existing housing

Section 402.—Amends section 10(c) of the United States Housing Act of 1937 by perfecting the annual contributions formula to permit local housing authorities to make greater use of the existing housing supply through the purchase, purchase and rehabilitation, or lease of units which are available on the local market and suitable for low-rent housing purposes.

Increase in authorization for annual contributions

Section 403.—Amends section 10(e) of the United States Housing Act of 1937 to increase by \$47 million immediately, and by an additional \$47 million in each of the years 1966 through 1968, the existing limit on the aggregate amount of contracts for annual contributions which may be entered into by PHA under the low-rent housing program. This increase would provide an estimated 60,000 additional units of low-rent housing annually over the 4-year period, to be available both for conventional low-rent housing projects and for the new approaches to low-rent housing contained in the bill.

Reallocation of units

Section 404.—Amends section 10(e) of the United States Housing Act of 1937 to provide that, subject to any contractual obligation outstanding on the date of enactment of the bill, any low-rent public housing units not under construction within 5 years from the date they were reserved to a public housing agency may be reallocated and placed under contract for annual contributions in any State without limitation as to the aggregate amount of units which may be placed under contract in any one State.

Sale of federally owned projects to private purchasers

Section 405.—Amends section 12(c) of the United States Housing Act of 1937 to permit sale of a federally owned public housing project to a nonprofit organization for continued use as low-rent housing.

Increase in per room limitations

Section 406.—Amends section 15 of the United States Housing Act of 1937 to increase the limitations per room on the cost of construction and equipment of low-rent public housing from \$2,000 to \$2,400 for regular units and from \$3,000 to \$3,500 in the case of Alaska or housing designed specifically for the elderly. The per room limit in the case of housing for the elderly in Alaska is also increased from \$3,500 to \$4,000.

Purchase of units by tenants

Section 407.—Amends section 15 of the United States Housing Act of 1937 to permit any member of a tenant family in a low-rent public housing project to purchase a dwelling unit which is detached, semi-detached, or a row house for his occupancy or occupancy by a member or members of his family.

TITLE V—COLLEGE HOUSING

Increase in authorization for college housing loans

Section 501.—Amends section 491(d) of the Housing Act of 1950 to increase the college housing loan authorization by \$110 million upon the enactment of the bill, with further increases of \$285 million on July 1 in each of the years 1966 and 1967, and \$275 million on July 1, 1968. This section would also increase on July 1 in each of the years 1965 through 1968 (1) by \$30 million the ceiling on loans for other educational facilities (such as dining halls, health facilities, and student unions); and (2) by \$15 million the ceiling on loans to hospitals for nurses and intern housing.

Participation by new colleges

Section 502.—Amends section 404 of the Housing Act of 1950 to make it clear that a college housing loan can be made to a new educational institution if such institutions provide satisfactory assurance to the Housing Administrator that it will offer a baccalaureate degree within a reasonable time after completion of the facilities for which the loan is requested.

TITLE VI—GRANTS FOR BASIC PUBLIC WORKS, NEIGHBORHOOD FACILITIES, AND THE ADVANCE ACQUISITION OF LAND

Purpose

Section 601.—States that the purpose of title VI is to assist and encourage the communities of the Nation (1) to construct adequate basic water and sewer facilities needed to promote their efficient and orderly growth and development; (2) to construct neighborhood facilities needed to enable them to carry on programs of necessary social services; and (3) to acquire, in a planned and orderly fashion, land to be utilized in connection with the future construction of public works and facilities.

Grants for basic water and sewer facilities

Section 602. Authorizes the Housing Administrator to make grants (up to 50 percent of the development cost) to local public bodies and agencies to finance basic public water facilities (including works for the storage, treatment, purification, and distribution of water), and basic public sewer facilities (other than "treatment works" as defined

in the Federal Water Pollution Control Act). No grant can be made for any sewer facilities unless the Secretary of Health, Education, and Welfare certifies to the Administrator that any waste material carried by the facilities will be adequately treated before it is discharged into any public waterway.

In the case of a community having a population of less than 10,000 which is in dire need of such facilities because of special prescribed circumstances, the Housing Administrator may increase the amount of a grant for a basic public sewer facility to not more than 90 percent of the development cost of the facility.

Grants for neighborhood facilities

Section 603.—Authorizes the Housing Administrator to make grants of up to two-thirds of the development cost of the project (except grant could be 75 percent of development cost in case of a project located in a redevelopment area under sec. 5 of the Area Redevelopment Act) to local public bodies and agencies (or through them to private nonprofit organizations) to finance specific projects for neighborhood facilities, including neighborhood of community centers, youth centers, health stations, and other public buildings to provide health or recreational or similar social services.

Advance acquisition of land

Section 604.—Authorizes the Housing Administrator to make grants to local public bodies and agencies to assist in financing the acquisition of land to be utilized in connection with the future construction of public works or facilities.

The Administrator may require an applicant for a grant to agree to repay the grant if (1) the land is not utilized within 5 years after the grant agreement is entered into for construction of the public work or facility for which the land was acquired, or (2) the land is diverted to other uses.

General provisions

Section 605.—Confers upon the Administrator the usual functions, powers, and duties, and authorizes him to make advance or progress payments on account of any grant made under this title of the bill.

Definitions

Section 606.—Defines the terms used in the title.

Labor standards

Section 607.—Makes applicable to construction work financed with assistance under sections 602 and 603 the prevailing wage requirements of the Davis-Bacon Act (and the usual time and a half overtime provisions), along with the authority generally available to the Secretary of Labor with respect to the enforcement of the requirements.

Appropriations

Section 608 (a).—Authorizes appropriations for grants for basic public water and sewer facilities not to exceed \$100 million for the fiscal year commencing July 1, 1965, and \$200 million for each fiscal year commencing after June 30, 1966, and ending prior to July 1, 1969.

(b) Authorizes appropriations for each fiscal year commencing after June 30, 1965, and ending prior to July 1, 1969, not to exceed \$50 million for grants for neighborhood facilities, and not to exceed

\$25 million for grants for advance acquisition of land. This section also provides that any amounts appropriated shall remain available until expended, and that any amounts authorized for any fiscal year under the section but not appropriated may be appropriated for any succeeding fiscal year commencing prior to July 1, 1969.

TITLE VII—FEDERAL NATIONAL MORTGAGE ASSOCIATION

Increase in special assistance authority

Section 701(a).—Amends section 305(c) of the National Housing Act to increase by \$1,625 million the amount of special assistance that the President of the United States can authorize the Federal National Mortgage Association to provide for housing and urban development.

(b) Amends section 305(f) of the National Housing Act to increase the President's special assistance authority further by transferring the special assistance authority remaining from a special authorization in that section for FHA title VIII housing for the military, AEC, and NASA, except \$58,750,000 which is required to be reserved for section 809 mortgages.

Purchase of mortgages held by Federal instrumentalities

Section 702.—Amends section 302 of the National Housing Act to authorize FNMA to purchase, service, or sell mortgages covering residential property offered to it by other Federal agencies, and other obligations offered to it by the Housing and Home Finance Agency or by any of that Agency's constituent agencies or units. FNMA is also authorized in its fiduciary capacity to deal in obligations of the Housing Agency which are not first mortgages.

Purchase of below-market interest rate mortgages covering properties located in urban renewal areas

Section 703.—Amends section 302(b) of the National Housing Act to except FHA section 221(d)(3) below-market interest rate mortgages financing housing in urban renewal areas from the \$17,500 per dwelling unit limit imposed by section 302(b) of the National Housing Act on the amount of a mortgage that can be purchased by FNMA under its special assistance operations.

TITLE III—OPEN SPACE LAND AND URBAN BEAUTIFICATION AND IMPROVEMENT

Change in name of program, findings and purpose

Section 801.—Amends title VII of the Housing Act of 1961 to make changes in the name of the existing open space land program so that it will include a reference to "urban beautification and improvement." It also expands the existing statement of congressional findings and purpose.

Development grants for open space uses

Section 802 (a) and (b).—Amends section 702 of the Housing Act of 1961 to permit grants under that section to be used to assist in the development, for open space uses, of land acquired under title VII.

(c) Adds provisions to section 706 of the Housing Act of 1961 which define the term "open space uses" to mean any use of open space land

for (A) park and recreational purposes, (B) conservation of land and other natural resources, or (C) historic or scenic purposes.

Increased grant level for preservation and development of open space land

Section 803.—Amends section 702(a) of the Housing Act of 1961 to permit grants for the acquisition of land and its development for open space uses to be up to 50 percent of the total cost of the acquisition and development. Under existing law, the grant limit is 20 percent, except that grants may be made for up to 30 percent where the applicant exercises open space responsibility for all or a substantial part of the urban area.

Contract authorization

Section 804.—Amends section 702(b) of the Housing Act of 1961 to increase the limit on grants that can be made for open space land and urban beautification and improvement (as authorized by subsequent sections) from \$75 to \$310 million. Grants for the provision of open space land in built-up urban areas would be limited to \$64 million, and grants for urban beautification and improvement would be limited to \$36 million.

Open space planning and program requirements

Section 805.—Amends section 703(a) of the Housing Act of 1961 to require a finding by the Housing Administrator that each grant for the acquisition and development of open space land is needed for carrying out a unified or officially coordinated program, meeting criteria established by the Housing Administrator, for the provision and development of open space land as part of the comprehensively planned development of the urban area. Under existing law the Administrator must find that (1) the proposed use of the land for open space is important to the execution of a comprehensive plan for the urban area, and (2) a program of comprehensive planning is being actively carried on for the urban area.

Grants for provision of open-space land in built-up urban areas and for urban beautification and improvement

Section 806.—Adds new sections 705 and 706 to the Housing Act of 1961. The new section 705 authorizes grants to States and local public bodies to assist in financing the acquisition of developed land in built-up portions of urban areas to be cleared and used as permanent open-space land. The grants cannot exceed 50 percent of the cost of acquiring the interests in the land and of necessary demolition and removal of improvements, and can be made only where the local governing body determines that adequate open-space land cannot effectively be provided through the use of existing undeveloped or predominantly undeveloped land.

(b) Authorizes financial assistance extended under title VII of the Housing Act of 1961 (all open-space land and urban beautification and improvement assistance) to include grants for relocation payments like those provided under the urban renewal program. They will be available to those displaced after March 4, 1965.

The new section 706 authorizes grants to States and local public bodies to assist in carrying out local programs for the greater use and enjoyment of open-space and other public land in urban areas, including beautification of the land and its improvement for open-space

uses. The local programs must be important to the comprehensively planned development of the locality.

Grants shall not exceed 50 percent of the amount by which the cost of the activities carried on by an applicant during a year under an approved program exceeds its usual expenditures for comparable activities. However, the Housing Administrator may use up to \$5 million for grants covering two-thirds of the cost of activities that have special value in developing and demonstrating new and improved methods and materials for use in carrying out urban beautification and improvement.

Use of funds for studies and publication

Section 807.—Amends section 702 of the Housing Act of 1961 to authorize the Housing Administrator to use not more than \$50,000 of the title VII grant funds to undertake studies of open-space land and urban beautification and improvement problems and activities and to publish information relating thereto.

Conforming amendments

Section 808.—Makes technical amendments in title VII of the Housing Act of 1961 to conform to the new provisions added to that title by this title of the bill.

TITLE IX—RURAL HOUSING

Loans for previously occupied buildings and minimum site acquisition

Section 901.—This section amends section 501 of the Housing Act of 1949 to authorize the Secretary of Agriculture to make loans to farmers and rural residents for the purchase of previously occupied dwellings and related facilities and farm service buildings and for minimum adequate building sites.

Interest rate on direct rural housing loans

Section 902.—This section amends section 502(a) of the Housing Act of 1949 to increase to 5 percent the maximum interest rate on direct loans under section 502, except for loans to elderly persons in accordance with section 501(a)(3) and loans in accordance with sections 503 and 504, which would remain at 4 percent. It would also authorize the Secretary to charge fees on all title V loans.

Insured rural housing loans

Section 903.—Subsection (a) of this section adds to title V of the Housing Act of 1949 two new sections (517 and 518).

The new section 517 would authorize the Secretary of Agriculture to insure loans, and make loans to be sold insured, in accordance with section 502; except that such loans to persons of low or moderate income would bear interest not above 5 percent and be limited to adequate housing modest in size, design, and cost and to an aggregate of \$300 million per year, and such loans to other persons would be made at rates and charges comparable to those in effect under FHA's section 203 program. To assure the marketability of these loans to private investors within the interest ceiling set by this section, it is further provided that the Secretary may enter into repurchase agreements with investors.

The new section 517 would also establish a new rural housing insurance fund to finance insured section 502 loans and to be utilized by the

Secretary for various specified purposes. The new fund would be used in lieu of the agricultural credit insurance fund for section 514 domestic farm labor housing and section 515(b) elderly rental housing loans. Loans made out of the fund and held unsold could not exceed \$100 million at any one time. The Secretary would be authorized to borrow from the Treasury to meet loan insurance obligations and to make other authorized expenditures from the fund.

The new section 518 would establish a rural housing direct loan account, and would transfer to such account all rural housing direct loans made under sections 502, 503, 504, and 515(a) of the 1949 act, all collections therefrom, and any funds available from appropriations or Treasury borrowings for such loans. Amounts transferred to the account and such further amounts as may be appropriated would be available for making loans under the above sections and for making repayments to the Treasury.

Subsection (b) of section 903 of the bill amends section 511 of the Housing Act of 1949 to extend for 4 years (to October 1, 1969) the unused balance (approximately \$101 million) of the existing borrowing authority under section 511, and to remove the existing special reservation of \$50 million exclusively for loans to elderly persons in accordance with section 501(a)(3).

Purchase of rural housing loans by the Federal National Mortgage Association

Section 904.—This section amends title III of the National Housing Act to authorize FNMA to purchase loans insured under the new provisions of title V of the Housing Act of 1949 in its secondary market operations.

Extension of rural housing authorizations

Section 905.—This section amends title V of the Housing Act of 1949 to extend for 4 years (to October 1, 1969) the authority of the Secretary of Agriculture to make section 503 loan contribution commitments, the authority for appropriations to finance assistance under sections 504(a), 504(b), 506, and 516, and the authority of the Secretary to make section 515(b) rental housing loans for elderly persons. It would also increase from \$10 to \$50 million the total amount of appropriations authorized for section 516 assistance to provide low-rent housing for domestic farm labor, and would extend the construction standards and technical services provisions of section 506(a) to operations under the new provisions added to title V by the bill.

Sums excess to the needs of the rural housing insurance for the rural housing direct loan account

Section 906.—This section adds to title V of the Housing Act of 1949 a new section 519, directing the Secretary of Agriculture to pay into miscellaneous receipts of the Treasury any surpluses from the new rural housing insurance fund or the new rural housing direct loan account.

TITLE X—MISCELLANEOUS

Urban planning grants

Section 1001(a).—Amends section 701(b) of the Housing Act of 1954 to increase the limit on appropriations for urban planning grants from \$105 million to \$230 million.

(b) Amends section 701(b) of the Housing Act of 1954 to permit up to 5 percent of funds appropriated for urban planning grants to be used for studies, research, and demonstration projects for the development and improvement of techniques and methods for comprehensive planning and for the advancement of the purposes of the urban planning grant program.

(c) Amends section 701 of the Housing Act of 1954 to authorize the Housing Administrator to make two-thirds grants to organizations composed of elected officials who represent political jurisdictions within a metropolitan area to assist them to undertake studies, collect data, develop regional plans and programs, and engage in other activities desirable for the solution of the metropolitan or regional problems.

Authorization for Federal-State training programs

Section 1002(a).—Amends section 802(d) of the Housing Act of 1964 to increase the limit on appropriations for grants to assist Federal-State training programs from \$10 to \$30 million.

(b) Amends section 803 of the Housing Act of 1964 to provide that the limit per State on grants for Federal-State training programs shall be not more than 10 percent of the total amount appropriated for that purpose rather than 10 percent of the amount authorized to the appropriated as now provided.

Authorization for public works planning advances

Section 1003.—Amends section 702(e) of the Housing Act of 1954 to increase the limit on appropriations for public works planning advances from \$20 million to \$70 million.

Authorization for housing for the elderly or handicapped

Section 1004.—Amends section 202(a)(4) of the Housing Act of 1959 to increase the limit on appropriations for loans for housing for the elderly or handicapped from \$350 million to \$500 million.

Authorization for low-income housing demonstration programs

Section 1005.—Amends section 207 of the Housing Act of 1961 to increase the authorization for grants for low-income housing demonstrations from \$10 million to \$15 million.

Advisory committees—Technical provision

Section 1006.—Deletes an obsolete provision from section 601 of the Housing Act of 1949 relating to advisory committees.

Public facility loans

Section 1007(a).—Adds a provision to section 202(c) of the Housing Amendments of 1955 to authorize the Housing Administrator to make public facility loans to a private nonprofit corporation for the construction of works for the storage, treatment, purification, or distribution of water or the construction of sewage, sewage treatment, and sewer facilities, if the works or facilities are needed to serve a smaller municipality or rural area, and there is no existing public body able to construct and operate the works or facilities.

(b) Amends section 202(c) of the amendments to make a technical change made necessary by amendments of the Area Redevelopment Act.

(c) Amends section 203(c) of the amendments to permit a public facility loan to be made to a community without regard to its population if a research or development installation of the National

Aeronautics and Space Administration is located in or near the community.

Lease guarantees for certain small business concerns

Section 1008.—Adds a new title IV to the Small Business Investment Act of 1958 to authorize the Small Business Administration to guarantee payment of rentals under leases of commercial and industrial property entered into by small business concerns that are (1) eligible for loans under section 7(b)(3) of the Small Business Act or (2) eligible for loans under title IV of the Economic Opportunity Act of 1964.

The guarantee powers shall be exercised to the greatest extent practicable in cooperation with qualified surety or other companies on a participation basis.

A uniform annual fee shall be payable for the Administration's share of any guarantee. The fee shall not exceed 2½ percent per annum of the minimum annual guaranteed rental payable under the guaranteed lease. Fees may also be charged for the processing of applications for guarantees.

A revolving fund is established for carrying out the guarantee program. Initial capital of \$5 million for the fund is transferred from the fund established under section 4(c) of the Small Business Act. All receipts from the guarantee program shall be deposited in the fund. The initial capital shall be returned to its source in such amounts and at such times as the Small Business Administrator determines to be appropriate.

FHA conforming amendments

Section 1009.—Makes conforming amendments in the National Housing Act made necessary by provisions in the bill which consolidate FHA insurance funds into the general insurance fund.

Repeal of special provision in Urban Mass Transportation Act

Section 1010.—Repeals section 9(c) of the Urban Mass Transportation Act of 1964 which requires that contractors, in providing facilities or equipment which have received loan or grant assistance under the act, "shall use only such manufactured articles as have been manufactured in the United States."

Redevelopment areas—Technical provision

Section 1011.—Amends sections 103 of the Housing Act of 1949 and 701 of the Housing Act of 1954 to add references to acts supplementary to the Area Redevelopment Act.

Federal Reserve Act

Section 1012.—Amends section 24 of the Federal Reserve Act to permit national banks to (1) purchase participations in loans secured by real estate and (2) make loans for the construction of industrial or commercial buildings to have maturities up to 30 months (now 18 months).

Savings and loan associations

Section 1013(a).—Amends section 5(c) of the Home Owners Loan Act of 1933 to authorize Federal savings and loan associations to make loans outside of their 20-percent limitation secured by college dormitories or fraternity or sorority houses, or housing for staffs of colleges or hospitals.

(b) Amends section 404 of the National Housing Act to require an association to make deposits in FSLIC up to 1 percent of the association's savings as required by call of the Federal Home Loan Bank Board.

CORDON RULE

In the opinion of the committee, it is necessary to dispense with the requirements of subsection 4 of rule XXIX of the Standing Rules of the Senate in order to expedite the business of the Senate in connection with this report.

INDIVIDUAL VIEWS OF SENATOR ROBERTSON

RENT SUPPLEMENTS

I oppose the proposal to start out on a program which will involve up to \$8 billion over the next 40 years, requiring the Federal Government to pay part of the rent of low-income individuals and families. This is a vast amount of money and, in any event, the principle of the proposal is wrong. It will breed and foster reliance on the Government and discourage private initiative.

PUBLIC HOUSING

I oppose adding 240,000 more units at a rate of 60,000 per year to the already too large Federal low-rent public housing program, duplicating the rent supplement program, which has now been restricted to low-income tenants. At a time when we should be concentrating on economy in Government, it is not consistent with sound fiscal and monetary policy to authorize contract authority in a form of back-door Treasury financing that would require appropriations of up to \$7.5 billion over the next 40 years just to provide for these 60,000 units.

3-PERCENT INTEREST

The bill as reported proposes to set a 3-percent maximum interest rate on direct loans for elderly housing and on below-market rate non-profit or limited dividend sponsored FHA loans, generally called the section 221(d)(3) program. This would be a dangerous precedent and is contrary to the principles of sound banking and fair government.

Government competition to private enterprise is unfair and is getting more unfair with each passing year. The interest rate proposed here is less even than the average Federal Reserve bank discount rate. It is not only unfair to banks and other lending institutions, but, in the long run, the proposal is unfair to the Nation.

I voted against reporting this bill from the committee.

A. WILLIS ROBERTSON.

MINORITY VIEWS OF MR. BENNETT, MR. TOWER, MR. THURMOND, AND MR. HICKENLOOPER

BILLIONS IN NEW SPENDING OBLIGATIONS

New and enlarged urban programs bulging with money and power, designed to step up the pace of creeping federalism, are wrapped in the omnibus package approved by this committee as the Housing and Urban Development Act of 1965.

They are—

An \$8 billion, 40-year contract to experiment with rent-supplementals as a new approach to housing low-income families.

Seven hundred million dollars in 4 years to pay half the cost of extending and enlarging water and sewer facilities to meet the anticipated growth of urban communities to be determined by the crystal ball of the HHFA Administrator.

Fifty million dollars a year to develop neighborhood social and recreational facilities to take care of the population growth anticipated by the HHFA Administrator.

Twenty-five million dollars a year to pay the financing costs of the acquisition of land for public works needs anticipated by the HHFA Administrator to meet the expected growth of the community. The location of the land must also coincide with the Administrator's guess as to which direction the community will expand.

These are additions to existing federally controlled urban assistance programs which are constantly being continued and expanded to the point where any local participation in funds or direction is only token in importance.

ADDITIONAL FUNDS FOR EXISTING PROGRAMS

Some of the existing and expanded programs are—

Two billion and nine hundred million dollars more in 4-year authority for urban renewal capital grants; \$125 more in 4-year authority for urban renewal planning grants; a greater share of urban renewal funds permitted for rebuilding the core of cities and less for homes; agreement to talk soon about a complete revision of the concept of "urban renewal" to involve only the desire of cities to rebuild with no other "qualifications" necessary to obtain Federal funds.

An increase of \$225 million in 4-year, 50-percent grant contract authority to broaden the open-space program in urban areas to include beautification, purchase of land, demolition of buildings, and the relocation of people; a \$50 million increase for 4 years of grants to urban areas for public works planning, and the authority to pay two-thirds of the cost of removing unsafe and unsightly buildings in any part of an urban community under certain conditions.

In every instance of Federal financial participation in urban activities, the HHFA Administrator calls the signals and determines the conditions which must be met before the Federal funds are made available, thus usurping the previously inherent right, duty, and responsibility of the locally elected officials.

RENT SUPPLEMENT AND PUBLIC HOUSING

The new form of the rent supplement program as reported by this committee establishes two systems by which homes are to be provided for low-income groups. Rent supplement is expected to provide 500,000 units. At the same time the bill calls for 240,000 additional units to be used in the "public housing" program. All families which qualify as low-income families will be eligible for either of the programs.

Under the plan for rent supplements, the housing units may be scattered throughout the community, and it is possible that the rental market in some communities might provide better housing for those under the rent supplement program than under the other low-income housing programs.

Of the 240,000 "public housing" units requested, 140,000 will be of the conventional type which will be subject to site selection by authorities in the community. There are another 170,000 units of this type still in the so-called pipeline awaiting some action at the local level.

ASK MORE PUBLIC HOUSING UNITS

The remaining 100,000 units in the bill are to be divided between the purchasing and leasing of existing homes; 15,000 per year for 4 years in the first category and 10,000 per year in the latter. These units will not be subject to site selection at the local level and therefore will be scattered helter-skelter through the community.

In view of the Administration's expression that it has wanted for some time to devise a low-income housing program which would free it from the charge that it has been creating public housing ghettos, the question arises as to how selection of families will be made for the "ghetto type" low-income housing as opposed to the scattered-type, low-income housing. Who will get the rent supplements and who will not? If there is a difference in the standard of housing available under each of these programs, who will get the highest standard?

It seems that such a radical change from the historic "public housing" approach to the problem of low-income housing needs should move more slowly and be more carefully tested than is possible under this bill which would begin immediately to set up contract obligations that could total \$8 billion over 40 years.

It is our hope that if the Senate approves the rent-supplement system as a substitute for "public housing," safeguards will be written into the act whereby new 40-year contracting can be halted at any time in the next 4 years in the event there are indications that the program will not produce the intended results.

RENT SUPPLEMENT DESTROYS INCENTIVE

We opposed the original Administration rent supplement plan for several reasons, one of which was the very fact it did not offer assist-

ance where we felt assistance is most needed—the lower income groups. The Administration sought to pay rent supplements for families above the “public housing” level whose annual incomes, by formula, could be in the neighborhood of \$10,000.

We also opposed the Administration proposal because it would place under Federal obligation and control families whose income levels should inspire incentive rather than Government assistance. It would have created an income class, part of which would have been assisted by the Federal Government in its living standards, and part of which would have made sacrifices and used incentive to improve its living standards.

Even the Administration sponsors of the rent supplement idea question its potential although they ask for \$8 billion to try it. HHFA Administrator Robert C. Weaver, in his testimony before the committee, used the phrase: “If this program works * * *.”

In answering questions raised by Senator Wallace F. Bennett concerning the form of contracts to be signed with landlords Dr. Weaver admitted the contracts must enable the sponsors of the buildings to meet their mortgage obligations over a period of 40 years.

Dr. Weaver said the assurance of sufficient tenants for that length of time would be ascertained by surveys.

SURVEY REPORTS QUESTIONABLE

It seems questionable that in the period of 4 years of contract making provided in this bill a survey could be made that would determine the exact number of eligible families needed 40 years hence to fill the available units under contract.

Dr. Weaver also explained that from 20 to 30 percent of the sponsored units in each project would be placed under rent supplement contracts. The remaining 70 to 80 percent of the units would be nonsupplemented with tenants paying full economic rent. We question whether these projects can succeed with 70 to 80 percent occupancy. Therefore, the entire project is dependent on Federal subsidy for its success.

It is also conceivable that assignment of more eligible tenants to one project than to another in the same areas could hasten failure of the less favored one.

It is quite obvious to us that no matter what income class is to be the beneficiary, such a program is not desirable, is not in keeping with American tradition of inspiring incentive in peoples of all classes, and sets up a Villein tenure for those eligible for such bondage.

URBAN RENEWAL

In 1954 the Congress adopted the program name of “urban renewal” to replace that of “slum clearance” and thereby forecast the total rebuilding of the Nation’s so-called central cities with Federal funds.

The 1965 housing legislation has added a completely new theory, which holds that the Federal Government should assist in paying for increased city services, such as street maintenance, fire and police protection, etc.

An amendment was offered whereby the Federal Government might recapture some of the Federal urban renewal funds from city tax increments that will undoubtedly soar as a result of urban renewal

property improvement. In objecting to this amendment, Housing and Home Finance Agency officials listed a number of reasons, among them:

First, localities are faced with an immense and increasing demand for services. This demand is straining their financial resources—resources largely tied to property taxes.

ORDER STUDY OF TAX PROFITS

However, sufficient interest was expressed by the committee in this plan that it ordered a thorough study be made toward creating a practicable means for recovery of Federal funds from city tax profits on urban renewal projects.

The great tax benefits to the cities are largely due to the removal of low-tax buildings by means of an urban renewal project that provides high-tax evaluation buildings as replacement. It is understandable that high-value central city property cannot be used for housing the families who previously lived there.

We find that each housing bill takes the urban renewal program further away from a means of more housing for low-income groups and more toward the new luxurious central city. The original Urban Renewal Act restricted nondwelling funds to 10 percent of the total. By now, as provided in this bill, the restricted nondwelling funds percentage has risen to 40 percent. Actually, an attempt was made to waive all restrictions, and, while this effort was rejected, it did result in a committee recommendation that a study be made of the feasibility of rewriting the formula in a manner directing more urban renewal funds for use in rebuilding the central cities without regard to additional dwellings.

NEED TO BE CLOSE TO WORK

It is our opinion that the growth of low-income population within cities should be high in any reconsideration of Federal assistance priorities. The trend to open spaces and beautification, both of which are given new and extended priorities in this Housing bill, may be worthy projects if considered alone, but we believe that the need for close-in dwellings for the lower income classes should be kept in mind because many of those families must rely on employment in the core of the cities.

If the land is made too valuable for low-income housing because of urban renewal, as seems to be the case in many cities, then perhaps a portion of the increased local tax benefits might be used by the cities to assist in the transportation costs of the low-income workers between homes on less valuable land and sources of downtown employment, which might be some distance away.

In its consideration of the 1964 housing bill and again this year, the committee has been urged to increase the room-ceiling costs for the building of low-rent housing in the larger cities because of higher land values and higher building costs. At the present time, through statutory authority and administrative interpretation the top limit on per room costs is \$2,750 and the ceiling on unit construction, including land and other preparations, is \$20,000.

Several of the larger cities are using these top building allowance figures and still find it difficult to provide the dwelling units because of the constant rise in land values and building costs. Further in-

creases in the allowance would force the cost levels for low-income tenants in the large cities up to levels only those with normal medium incomes can pay.

PROGRAM TO HELP BACKFIRES

It is at this point a paradox sets in. Urban renewal has been removing undesirable slums and blighted areas from cities while at the same time making the land too valuable for use by the persons who previously had homes or businesses in the renewed areas—and economical only for commercial or industrial uses—or for high-rent apartments. Those who were to have been helped have been forced out.

Congress now is being asked to realize that the central cities can no longer house the poor or the little businesses, and city authorities want to be divorced from the concept of slum clearance as a basis of eligibility for Federal funds.

Next year perhaps we will be asked to approve programs for the development of special suburbs for those formerly living in the central cities and forced out of them by urban renewal.

GRANTS FOR THE FUTURE

The HHFA Administrator will obviously have to resort to his crystal ball to properly administer three grant programs which are new this year to the national housing program. He must determine, for benefit of proper administration, the future growth of communities; the direction of that growth, and the proper location within the communities of neighborhood facilities sufficient to provide for the population growth.

Notwithstanding historical experiences of boom-busts, the most recent occurring in Federal Government installations and procurement areas, the HHFA Administrator is authorized under section 602 of the bill to grant 50 percent of the cost of improving and enlarging basic water and sewer facilities in those communities where he foresees a "significant population growth." He would have \$400 million to give away for this purpose during the next 4 years.

Grants are also available in the bill to assist communities to acquire land in advance for future use for public works. The grants would cover the financing charges for the land.

MUST PREDICT GROWTH DIRECTION

In this instance, the Administrator would approve the site selection for the anticipated public works which would necessitate a prediction as to the direction of the future growth of the community. Private land developers would certainly profit by the Commissioner's decision as to which way the community should grow. For this program the Commissioner will have \$700 million to give away in 4 years.

The signers of this report were able to gain approval for an amendment which would make it necessary for the community to renew its application for Federal assistance if the land has not been used for the intended purpose within 5 years.

The third new grant program for communities would authorize the Administrator to give away \$200 million in 4 years to provide the cities with neighborhood facilities including community centers, youth

centers, health stations, and other social services. Operations costs would be met with local funds, but the Administrator would control the use of the facilities for 20 years.

MAKE ELDERLY CENTERS ELIGIBLE

Signers of this report supported a provision in the report on the bill recommending that local official bodies make centers for elderly eligible for Federal assistance.

We feel these three grant programs further exemplify the tendency of the Federal Government to take over the responsibilities of the cities. It is our opinion that the governing forces in the larger cities are welcoming the Federal control programs as a means of escaping the responsibility of assessing their citizens the taxes necessary to meet the costs of increased services.

OVERLAPPING AUTHORITY

The ever-growing tentacles of Federal authority seem to have become entangled now that the Farmers Home Administration and the Federal Housing Administration are both concerned with insuring rural home mortgages.

We feel that no deserving applicant for Federal home mortgage assistance has been neglected through the crossing paths of the two FHA's, but we believe a more clearly cut line of jurisdiction between the two would be helpful.

At present the Farmers Home Administration, by statute, reaches into rural areas, defined as open country, and small towns up to 2,500 population. At the same time, the Federal Housing Administration has authority to reach any prospective borrower. Commissioner Philip N. Brownstein says the following of the Federal Housing Administration's authority:

It is our continuing responsibility to make FHA-insured mortgage financing available to all eligible borrowers wherever they may reside. * * * FHA has the programs and the procedures to serve all areas.

RESPONSIBILITY NEEDS TO BE DEFINED

We recommend that during the period covered by this bill some effort be made by agency officials and staff members of the Senate Subcommittee on Housing to draft language which will more clearly define the areas of responsibility for the two agencies.

We are pleased to note that the Federal Housing Administration this year urged its approved mortgagees to become more active in the mortgage needs in smaller towns. However, this newly inspired interest in the smaller towns may further the need for a clear definition of authority between the two FHA's.

There appears to be another area of possible overlapping of Federal assistance in the housing bill now before the Senate. There is a provision to grant \$700 million over 4 years toward the payment of 50 percent of the cost of improving, extending, and enlarging basic sewer and water systems.

In the recently approved Public Works and Economic Development Act of 1965 funds are made available for the same purpose. While

the Public Works Act is assumed to be directed toward industrial development, the Committee on Public Works said in its report:

For example, if a community has an inadequate sewage treatment plant it can hardly hope to induce industrial development which would further overload its disposal plant, thus creating a health and welfare problem.

REPORT INDICATES POSSIBLE DUPLICATION

The report further sets out that "water and sewage facilities related to residential development" would be eligible for grants and loan under the bill.

Such an intent expressed in the report would indicate the public works assistance could be obtained without the requirement of urgent or existent industrial need. In that case funds would be available from two sources, the public works bill and the housing bill, with grants of 50 percent of cost in each case, plus a low-interest loan possibility under the public works bill.

The Administration requested in the housing bill that \$100 million per year for 4 years to be authorized for this program, and we believe the \$700 million total for 4 years now in the Housing bill should be reduced to the original request for \$400 million with \$100 million authorized for each year.

SUBSIDIZED INTEREST RATES

We bring to the attention of the Senate a growing tendency to incorporate fixed subsidized interest rates in direct loan programs in the Housing Act, which have been operating without fault or complaint for years with interest rates that are tied to the actual cost of money to the U.S. Treasury.

Two programs in this bill will begin operating on fixed subsidized rates if the bill is enacted into law. They are: Elderly housing under the section 202 program and section 221(d)(3) low-rent housing.

We believe that all direct loan programs should carry interest rates of not less than the interest rates on Treasury bonds of comparable maturity.

Our thinking on this subject coincides with the Administration's reasoning in objecting to subsidized interest rates in this bill. Secretary of the Treasury Henry H. Fowler, in a letter to Senator Bennett on May 18, said:

I am concerned over the implication of those provisions that a flat 3-percent rate should be established on loans under these programs (college housing, elderly housing, and moderate income rental housing). Past experience suggests that rigid rates of this kind for Federal credit programs have perverse and unintended budgetary, program, and economic effects.

We feel it is morally as well as fiscally wrong to loan to selected elements of the population the taxpayers' money at less interest than the Treasury must pay to replace those funds.

STROM THURMOND.
BOURKE B. HICKENLOOPER.

INDIVIDUAL VIEWS OF SENATOR JOHN G. TOWER

INTRODUCTION

In addition to my individual views given here, I have joined in presentation of minority views, since I share in general a number of grave reservations therein expressed.

MERITORIOUS PROVISIONS IN BILL

I voted to report the housing bill out of committee, primarily because of its continuance of several meritorious programs, as for example, the Federal Housing Administration, the Federal National Mortgage Association, housing for the elderly and handicapped, college housing, the low income housing demonstration program, and the rural housing program.

Also, I voted to report the bill since I wish to accord the Senate the full opportunity to give its consideration to this Nation's housing programs.

IMPROVEMENTS IN MAJOR PROGRAMS

In addition to the meritorious provisions above referred to, bill improvements, though now somewhat tenuous in nature, show promise of marked, advantageous effect on the urban renewal and public housing programs.

URBAN RENEWAL

I am most pleased the minority, with majority support, succeeded in securing the inclusion into the bill, language requiring the HHFA Administrator to make a thorough study of the overall urban renewal program and to report its findings within 2 years.

Urban renewal has been only partially successful in alleviating the problems it was supposed to solve. In some cases, problems have been created instead, as for example, the displacement of low-income families and individuals without adequate provision for housing them elsewhere. The so-called bulldozer approach, whereby comparatively new, structurally sound buildings have been demolished under the guise of slum clearance, has been costly and wasteful.

The HHFA has recently reported an improvement in housing project displacees. Perhaps with the reasonable rehabilitation grants to homeowners in urban renewal areas provided for under this bill, hopefully we will see the beginning of more responsibility in renewal construction.

RECAPTURE OF URBAN RENEWAL GRANTS

Bipartisan, favorable committee interest was expressed in my amendment to require the repayment of urban grants, out of additional tax revenues generated by renewal projects.

Increased tax benefits now inure to the cities, largely through the replacement of low-tax valuation buildings with those of much higher tax valuation. Based on recent figures, on some 403 projects in which renewal development had begun or was completed, there was a 427-percent increase in assessed valuation, from \$575 million to \$3.031 billion.

Recognizing the weighty constitutional and legal problems raised by my proposal, I withdrew it, upon assurances that a study would be recommended in the majority report toward legislative feasibility of Federal urban grant recapture.

It would be best, I believe, that such study be conducted by the Bureau of the Budget, the General Accounting Office, the Housing and Home Finance Agency, and the committee.

Nonresidential restriction

I am opposed to the increase in the bill of the nonresidential restriction, from 30 to 40 percent. The urban renewal program was initiated primarily, and it should remain so, as a slum clearance program to more adequately house low-income groups, and not as a means to provide a luxurious central city business community.

RENT SUPPLEMENT

As inconceivable as it may seem, the rent supplement program originally offered by the Administration was totally void of assistance provisions to those of the public housing level.

This original proposal provided for the Federal expenditure of rent supplement payments said to average about \$50, and up to \$75 per month, for families of moderate-income means, such means generally being between \$4,800 and \$8,000 (but possibly up to \$10,000) per year.

Census figures of 1960 show there were some 19 million families with incomes of \$4,000 to \$8,000, and of this number, only 8.4 percent lived in substandard housing. In contrast, of the 12 million nonfarm families earning incomes of less than \$4,000, 23.8 percent of those owning their homes lived in substandard housing, while one-third of those renting occupied substandard dwelling units. And the original rent supplement program totally ignored any low-income need.

I am, of course, most pleased that the committee flatly refused to accept the administration's moderate-income supplement concept, and instead directed the program to the use of those most in need of it, particularly since the rejection of my earlier suggestion that broad-based demonstration projects be initiated, in lieu of the proposed massive, virtually unlimited administration approach.

However, regardless of the redirection of the rent supplement program, I remain opposed to it.

This country, through its vast store of free enterprise and individual initiative, has produced for our citizenry the finest housing of any country in the world.

I fear such a rent supplement program will be construed as hope to millions now adequately housed that they too are entitled to have a portion of their rent paid by the taxpayer.

But most of all, I fear a stifling of the incentive for homeownership, a trend toward giving to renters the status of Government wards. This is a departure indeed from the American way.

PUBLIC HOUSING

The present public housing program, I believe, tends to destroy the desire or interest of thousands of families to participate in the great American privilege of homeownership.

I am hopeful my proposal, now incorporated into the bill, to allow a public housing tenant to purchase his individual unit by counting monthly rentals over a 3-year period as a downpayment, will be a welcome and practical inducement to affected public housing occupants to buy a home.

RELIEF FOR HOMEOWNERS AFFECTED BY CLOSING OF FEDERAL INSTALLATIONS

The committee, in recognizing the hardship caused to some homeowners by Federal base closings, wisely provided for the following:

(1) A moratorium on payments under FHA and VA mortgages for distressed homeowners who are unemployed as a result of such base closing.

(2) Authorization by the Secretary of Defense to acquire title to homes near closed military bases at a price equal to value of property at time of announcement of base closing.

These provisions, I believe, will be of much assistance to the applicable distressed homeowner, in that he will be spared loss of home or severe financial loss.

NEW PROGRAM STATUS

I am desirous of the Housing and Home Finance Agency initiating periodic reporting measures, which would result in more comprehensive information concerning Agency operations, being furnished the committee.

I am particularly interested in scrutinizing most carefully various new programs provided for in the bill:

Land development.

Grants for basic water and sewer facilities.

Grants for neighborhood facilities.

Advance acquisition of land.

Each of these programs, as additions to existing federally controlled urban assistance programs, must be administered sparingly and judiciously, lest they deter private initiative and local participation in solving problems primarily of local concern.

JOHN S. TOWER.

INDIVIDUAL VIEWS OF SENATOR STROM THURMOND

In addition to the objections to this bill contained in the minority views which I signed, I have serious reservations concerning one section which was not contained in the administration bill as introduced, but was added in the Housing Subcommittee. This is section 211 of the bill which adds a new section, section 521, to title V of the National Housing Act. This section would require the Administrator of the Housing and Home Finance Agency to adopt a uniform procedure for the acceptance of materials and products which are found to be technically suitable for the use proposed in structures approved for mortgages and loans under the Housing Act.

I share the concern that has been expressed by members of the committee concerning the seeming reluctance of the FHA, and certain commodity standards groups, to approve new materials which are the result of technological advances in the industry. This is a matter which deserves a searching study by the appropriate congressional committees to assure that new materials can be taken advantage of to reduce the costs of housing to the American public where these materials are as good as, or better than, those presently in use.

Nevertheless, I am disturbed about the words "technically suitable," because the fear has been expressed to me that this amendment could open the door to the FHA accepting substandard items that might be classified as "technically suitable." It is not clear in the wording of the amendment who is to determine if any material is "technically suitable," but it seems apparent that the Administrator of the HHFA would be required to make an independent judgment as to each and every product concerned. This would place an onerous burden upon the Administrator, one that he is not capable of adequately performing at the present time. The cost to the HHFA of testing the materials could greatly increase the administrative expenses of the Agency.

These objections have been well expressed by the Administrator of the HHFA in his letter addressed to the chairman of the subcommittee, as follows:

JUNE 21, 1965.

HON. JOHN SPARKMAN,
Chairman, Subcommittee on Housing.

DEAR MR. CHAIRMAN: This letter concerns the proposal to insert in the Housing and Urban Development Act of 1965 the following provision:

"SEC. 521. The Commissioner shall adopt a uniform *procedure for the acceptance of materials and products* to be used in structures approved for mortgages or loans insured under this Act. Under such procedure any material or product which is *technically suitable for the use proposed* shall be accepted." [Emphasis supplied.]

The HHFA would not favor such legislation because it is neither necessary nor desirable. Now, and since the beginning of FHA, an

effective "procedure for the acceptance of materials and products" has been in use. Minimum property standards have been established for different types of structures built under varying programs as a means of encouraging improvement in housing standards and conditions and as a guide for judging the soundness for insurance of a mortgage transaction. These standards are derived or patterned after, wherever suitable, industry promulgated standards which have been nationally recognized by architects, engineers, builders, or other interested groups.

The proposal would require the enlarging of present FHA procedure to a point which could duplicate or interfere with the aims and the work of the Office of Commodity Standards of the Department of Commerce and the work of industrywide trade groups. The Office of Commodity Standards, through industry conferences, assists industries in the voluntary adopting of standards. The objective of the industries is the elimination of avoidable waste through voluntary adherence to standards of practice for sizes, dimensions, varieties, or other characteristics of specific products. If the FHA were to accept any "technically suitable" product, it would lead to acceptance of a far wider and confusing variety of product characteristics and sizes. This could nullify the efforts of the industry groups and the Department of Commerce to eliminate waste through standardization with eventual extra cost to be paid for by consumers.

The FHA establishes minimum property standards as a guide to mortgage insurance risk. The exercise of the usual administrative judgment function would be removed from the FHA if the provision were interpreted as giving a legally enforceable right to a proponent of a "technically suitable" product to demand its acceptance. Formalized adversary hearings would be required to determine whether a product is "technically suitable" if the FHA administratively decided not to list it as meeting minimum standards. The ultimate test of whether a product is "technically suitable" would be dependent upon a decision by the courts.

Under present procedures, the FHA adopts a minimum standard and decides only whether a material or product meets that standard. The mandatory acceptance of a "technically suitable" product might be misleading in that it would suggest endorsement of a product by the FHA, whereas, the use of a similar product would be more desirable when all factors are considered.

A requirement that FHA accept any product which is "technically suitable" could work to the detriment of nationally recognized industry standards. For example, there is a nationally recognized standard of sizes and grades for softwood framing lumber used in housing. These various sizes and grades are used by the FHA as references in describing minimum acceptable grades and sizes for particular uses. If FHA accepted all of the infinite variations in size and grade which might be proposed as "technically suitable," it would render the present industry standards meaningless. Each variant would have to be considered separately. Competition between manufacturers could lead to a proliferation of sizes and company standards with little or no control over the quality of the product other than that provided by the producer. Any trend away from standardization of sizes would lead to extra costs in architectural design.

Where industry groups have established grade marking or other labeling devices the FHA is able to determine readily whether particular products meet its minimum standards. Inspections by FHA on a construction site are greatly simplified. Without grade marking or labeling adhering to present industry standards FHA inspection procedures would necessarily become more complicated and burdensome to the homebuilder. Building materials without generally accepted industry labels or grade markings would have to be examined closely on the job site to determine whether these materials meet FHA's minimum property standards.

Adopting this amendment would increase demands upon the FHA to accept materials produced here and abroad without benefit of established standards of sizes and quality. If samples of such products meet a test of "technically suitable," the FHA would then have to rely on its own continuous close inspections, rather than voluntary policing within an industry, to protect the home buyers' interest. The benefits of standardization and resultant cost savings would be lost. Homeowners are benefited much more by standardization than they would be by this amendment.

I am told that the purpose of this amendment is to require the FHA to make its own decisions with respect to the acceptability of a material or product. This it does now. But, if it could not rely on the work of other agencies and organizations it could result in the FHA being required to establish elaborate research facilities. This duplication of effort would add to FHA's administrative costs. The amendment could produce an unnecessary expense for the Federal Government and add to the costs borne by the home buyer.

In my opinion, adoption of the amendment could seriously impede efforts to house low- and moderate-income families and jeopardize the success of FHA programs in a most drastic way. I am opposed to this amendment and urge that your committee recommend against its adoption.

Sincerely yours,

ROBERT C. WEAVER, *Administrator*.

It is my belief that the committee should conduct full and open hearings on this proposal before including it in any bill. Until such hearings are held, I cannot support this provision.

STROM THURMOND.

Calendar No. 366

89TH CONGRESS
1ST SESSION

S. 2213

[Report No. 378]

IN THE SENATE OF THE UNITED STATES

JUNE 28 (legislative day, JUNE 25), 1965

Mr. SPARKMAN, from the Committee on Banking and Currency, reported the following bill; which was read twice and ordered to be placed on the calendar

A BILL

To assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, urban mass transportation, and community facilities.

- 1 *Be it enacted by the Senate and House of Representa-*
- 2 *tives of the United States of America in Congress assembled,*
- 3 That this Act may be cited as the "Housing and Urban
- 4 Development Act of 1965".

1 TITLE I—SPECIAL PROVISIONS FOR DISAD-
2 VANTAGED PERSONS

3 FINANCIAL ASSISTANCE TO ENABLE CERTAIN PRIVATE
4 HOUSING TO BE AVAILABLE FOR LOWER INCOME FAMI-
5 LIES WHO ARE ELDERLY, HANDICAPPED, DISPLACED,
6 VICTIMS OF A NATURAL DISASTER, OR OCCUPANTS OF
7 SUBSTANDARD HOUSING

8 SEC. 101. (a) The Housing and Home Finance Ad-
9 ministrator (hereinafter referred to as the "Administrator")
10 is authorized to make, and contract to make, annual pay-
11 ments to a "housing owner" on behalf of "qualified tenants",
12 as those terms are defined herein, in such amounts and under
13 such circumstances as are prescribed in or pursuant to this
14 section. In no case shall a contract provide for such pay-
15 ments with respect to any housing for a period exceeding
16 forty years. The aggregate amount of the contracts to make
17 such payments shall not exceed amounts approved in appro-
18 priation Acts, and payments pursuant to such contracts shall
19 not exceed \$50,000,000 per annum prior to July 1, 1966,
20 which maximum dollar amount shall be increased by \$50,-
21 000,000 on July 1 in each of the years 1966, 1967, and
22 1968.

23 (b) As used in this section, the term “housing owner”
24 means—

25 (1) a private nonprofit corporation or other entity,

1 a limited dividend corporation or other entity, or a co-
2 operative housing corporation, which is a mortgagor
3 under section 221 (d) (3) of the National Housing Act
4 and which, after the date of enactment of this Act, has
5 been approved for mortgage insurance thereunder and
6 has been approved for receiving the benefits of this
7 section;

8 (2) a private nonprofit corporation, a public body
9 or agency, or a cooperative housing corporation which
10 is a borrower under section 202 of the Housing Act of
11 1959 and has been approved for receiving the benefits
12 of this section; and

13 (3) a private nonprofit corporation or other entity
14 which is the mortgagor under a mortgage insured under
15 section 231 (c) (3) of the National Housing Act and
16 which, after the date of enactment of this Act, has ob-
17 tained final endorsement of such mortgage for mortgage
18 insurance and has been approved for receiving the bene-
19 fits of this section.

20 (c) As used in this section, the term "qualified tenant"
21 means any individual or family who has, pursuant to criteria
22 and procedures established by the Administrator, been
23 determined—

24 (1) to have an income below the maximum amount
25 which can be established for occupancy in public hous-

1 ing dwellings pursuant to the limitations prescribed in
2 sections 2 (2) and 15 (7) (b) (ii) of the United States
3 Housing Act of 1937; and

4 (2) to be one of the following—

5 (A) displaced by governmental action;

6 (B) sixty-two years of age or older (or, in the
7 case of a family, to have a head who is, or whose
8 spouse is, sixty-two years of age or over) ;

9 (C) physically handicapped (or, in the case
10 of a family, to have a head who is, or whose spouse
11 is, physically handicapped) ;

12 (D) occupying substandard housing; or

13 (E) an occupant or former occupant of a
14 dwelling which is (or was) situated in an area
15 determined by the Small Business Administration,
16 subsequent to April 1, 1965, to have been affected
17 by a natural disaster, and which has been ex-
18 tensively damaged or destroyed as the result of
19 such disaster.

20 (d) (1) Payments under this section with respect to
21 properties financed with mortgages insured under section
22 221 (d) (3) of the National Housing Act shall be made
23 only if such mortgages do not receive the benefits of the
24 interest rate provided for in the proviso in section 221 (d)
25 (5) of that Act; except that the Administrator may make,

1 and contract to make, such payments, on an experimental
2 basis, with respect to properties financed with mortgages
3 receiving such benefits subject to the condition that such
4 payments shall not be made with respect to more than
5 20 per centum of the dwelling units in any property so
6 financed.

7 (2) Payments under this section with respect to prop-
8 erties financed under section 202 of the Housing Act of
9 1959 or section 231 (c) (3) of the National Housing Act
10 shall be made on an experimental basis subject to the condi-
11 tion that such payments shall not be made with respect to
12 more than 20 per centum of the dwelling units in any
13 property so financed.

14 (3) With respect to properties financed (A) with mort-
15 gages receiving the benefits of the interest rate provided
16 for in the proviso in section 221 (d) (5) of the National
17 Housing Act, (B) with mortgages receiving the benefits
18 of section 231 (c) (3) of such Act, and (C) under section
19 202 of the Housing Act of 1959, the Administrator may
20 make, and contract to make, payments under this section
21 subject to the condition that not more than 10 per centum
22 of the amounts approved in appropriation Acts, pursuant to
23 subsection (a), for payments under this section in any year
24 shall be utilized for payments with respect to properties so
25 financed.

1 (4) The Administrator shall include in the report sub-
2 mitted to the Congress, pursuant to subsection (k), a full
3 report concerning the experimental programs authorized
4 under this subsection, together with his recommendations
5 with respect thereto.

6 (e) The amount of the annual payment with respect
7 to any dwelling unit shall not exceed the amount by which
8 the fair market rental for such unit exceeds one-fourth of the
9 tenant's income as determined by the Administrator pur-
10 suant to procedures and regulations established by him.

11 (f) (1) For purposes of carrying out the provisions of
12 this section, the Administrator shall establish criteria and
13 procedures for determining the eligibility of occupants and
14 rental charges, including criteria and procedures with respect
15 to periodic review of tenant incomes and periodic adjustment
16 of rental charges. The Administrator shall issue, upon the
17 request of a housing owner, certificates as to the following
18 facts concerning the individuals and families applying for
19 admission to, or residing in, dwellings of such owner:

20 (A) the income of the individual or family; and

21 (B) whether the individual or family was dis-
22 placed by government action, is elderly, is physically
23 handicapped, or is (or was) occupying substandard
24 housing or housing extensively damaged or destroyed
25 as the result of a natural disaster.

1 (2) Procedures adopted by the Administrator here-
2 under shall provide for recertifications of the incomes of
3 occupants, except the elderly, at intervals of two years (or
4 at shorter intervals in cases where the Administrator may
5 deem it desirable) for the purpose of adjusting rental charges
6 and annual payments on the basis of occupants' incomes,
7 but in no event shall rental charges adjusted under this sec-
8 tion for any dwelling exceed the fair market rental of the
9 dwelling.

10 (3) The Administrator may enter into agreements, or
11 authorize housing owners to enter into agreements, with
12 public or private agencies for services required in the selec-
13 tion of qualified tenants, including those who may be ap-
14 proved, on the basis of the probability of future increases in
15 their incomes, as lessees under an option to purchase dwell-
16 ings or cooperative ownership interests therein, and in the
17 establishment of rentals. The Administrator is authorized
18 (without limiting his authority under any other provision
19 of law) to delegate to any such public or private agency his
20 authority to issue certificates pursuant to this subsection.

21 (g) Section 101(c) of the Housing Act of 1949 is
22 amended by inserting "(i)" after "a mortgage under" in
23 the first proviso and by inserting immediately before the
24 colon at the end of such proviso the following: ", or (ii)

1 section 221 (d) (3) of the National Housing Act if pay-
2 ments with respect to the mortgaged property are made or
3 are to be made under section 101 of the Housing and Urban
4 Development Act of 1965, except that no such mortgage
5 shall be insured, and no commitment to insure such a mort-
6 gage shall be issued, with respect to property in any com-
7 munity for which a workable program for community
8 improvement was required and in effect at the time a contract
9 for a loan or capital grant was entered into under this title,
10 or a contract for annual contributions or capital grants was
11 entered into pursuant to the United States Housing Act of
12 1937, unless there is a workable program for community
13 improvement which meets the requirements of this subsec-
14 tion in effect in such community at the time of such insurance
15 or commitment”.

16 (h) The Administrator is authorized to make such rules
17 and regulations, to enter into such agreements, and to adopt
18 such procedures as he may deem necessary or desirable to
19 carry out the provisions of this section. Nothing contained
20 in this section shall affect the authority of (1) the Federal
21 Housing Commissioner with respect to any housing assisted
22 under this section and under sections 221 (d) (3) and 231
23 (c) (3) of the National Housing Act, or (2) the Housing
24 and Home Finance Administrator with respect to any hous-
25 ing assisted under this section and under section 202 of the

1 Housing Act of 1959, including the authority to prescribe
2 occupancy requirements under other provisions of law or to
3 determine the portion of any such housing which may be
4 occupied by qualified tenants.

5 (i) There are authorized to be appropriated such sums
6 as may be necessary to carry out the provisions of this sec-
7 tion, including, but not limited to, such sums as may be
8 necessary to make annual payments, pay for services pro-
9 vided under (or pursuant to agreements entered into under)
10 subsection (f), and provide administrative expenses.

11 (j) Section 114 (c) (2) of the Housing Act of 1949
12 is amended by inserting before the colon at the end of the
13 first proviso the following: “, or a dwelling unit assisted
14 under section 101 of the Housing and Urban Development
15 Act of 1965”.

16 (k) On or before January 1, 1968, the Administrator
17 shall submit to the Congress a full report of operations under
18 this section, together with his recommendations with respect
19 thereto.

20 EXTENSION OF FHA SECTION 221 PROGRAMS; MODIFICA-
21 TION OF INTEREST RATE

22 SEC. 102. (a) The fifth sentence of section 221 (f) of
23 the National Housing Act is amended by striking out “sub-
24 section (d) (2) or (d) (4) after September 30, 1965, or

1 under subsection (d) (3) after September 30, 1965," and
 2 inserting in lieu thereof "this section after October 1, 1969,".

3 (b) The proviso in section 221 (d) (5) of such Act is
 4 amended by striking out "not less than the annual rate of
 5 interest determined" and inserting in lieu thereof "not less
 6 than the lower of (A) 3 per centum per annum, or (B) the
 7 annual rate of interest determined".

8 REHABILITATION GRANTS TO HOMEOWNERS IN URBAN
 9 RENEWAL AREAS

10 SEC. 103. (a) Title I of the Housing Act of 1949 is
 11 amended by adding at the end thereof the following new
 12 section:

13 "REHABILITATION GRANTS

14 "SEC. 115. (a) Notwithstanding any other provision
 15 of this title, the Administrator may authorize a local public
 16 agency to make grants (and the urban renewal project may
 17 include the making of such grants) as prescribed in this sec-
 18 tion. Any such grant may be made only to an individual or
 19 family, as described in subsection (b), who owns and oc-
 20 cupies a structure in the urban renewal area and for the pur-
 21 pose of covering the cost of repairs and improvements
 22 necessary to make such structure conform to public standards
 23 for decent, safe, and sanitary housing as required by applica-
 24 ble codes or other requirements of the urban renewal plan
 25 for the area. Any contract for financial assistance under this

1 title shall provide that the capital grant otherwise payable
2 for the project shall be increased by an amount equal to the
3 total amount of such grants and that no part of the total
4 amount of such grants shall be required to be contributed as
5 part of the local grant-in-aid.

6 “(b) A grant authorized by this section may be made
7 to an individual or family whose income does not exceed
8 \$3,000 a year, and such grant may be in an amount which
9 does not exceed the lesser of (1) the actual (and approved)
10 cost of the repairs and improvements, or (2) \$1,500. In
11 case the income of the individual or family exceeds \$3,000 a
12 year, a grant may be made under this section, subject to the
13 limitations specified in clauses (1) and (2) of the preceding
14 sentence, in an amount not to exceed that portion of the cost
15 of such repairs and improvements as cannot be paid for with
16 any available loan which can be amortized as part of such
17 individual's or family's monthly housing expense without
18 requiring such monthly housing expense to exceed 25 per
19 centum of such individual's or family's monthly income.”

20 (b) Any contract with a local public agency which was
21 executed under title I of the Housing Act of 1949 before the
22 date of enactment of this Act may be amended to provide for
23 grants authorized by section 115 of the Housing Act of
24 1949.

1 PARITY OF TREATMENT FOR THE HANDICAPPED AND
2 ELDERLY IN PUBLIC HOUSING

3 SEC. 104. Section 2 (2) of the United States Housing
4 Act of 1937 is amended to read as follows:

5 “(2) The term ‘families of low income’ means families
6 (including elderly and displaced families) who are in the
7 lowest income group and who cannot afford to pay enough
8 to cause private enterprise in their locality or metropolitan
9 area to build an adequate supply of decent, safe, and sanitary
10 dwellings for their use. The term ‘families’ includes families
11 consisting of a single person in the case of elderly families
12 and displaced families, and includes the remaining member
13 of a tenant family. The term ‘elderly families’ means families
14 whose heads (or their spouses), or whose sole members, have
15 attained the age at which an individual may elect to receive
16 an old-age benefit under title II of the Social Security Act,
17 or are under a disability as defined in section 223 of that
18 Act, or are handicapped within the meaning of section 202
19 of the Housing Act of 1959. The term ‘displaced fami-
20 lies’ means families displaced by urban renewal or other
21 governmental action.”

22 MODIFICATION OF INTEREST RATE ON LOANS TO PROVIDE
23 HOUSING FOR ELDERLY OR HANDICAPPED

24 SEC. 105. Section 202 (a) (3) of the Housing Act of
25 1959 is amended by striking out "the higher of (A) $2\frac{3}{4}$

1 per centum per annum, or” and inserting in lieu thereof
 2 “the lower of (A) 3 per centum per annum, or”.

3 RELOCATION PAYMENTS UNDER THE URBAN MASS

4 TRANSPORTATION ACT OF 1964

5 SEC. 106. Section 7 (b) of the Urban Mass Transporta-
 6 tion Act of 1964 is amended by striking out all that follows
 7 the second sentence and inserting in lieu thereof the follow-
 8 ing: “The term ‘relocation payments’ means payments by the
 9 applicant which are (1) made to an individual, family, busi-
 10 ness concern, or nonprofit organization displaced by a project
 11 on or after March 4, 1965, (2) not otherwise authorized
 12 under any Federal law, and (3) made only on such terms
 13 and conditions and subject to such limitations (as applicable,
 14 but not including the date of displacement) as are provided
 15 for relocation payments, at the time such payment is ap-
 16 proved, by sections 114 (b) and (c) of the Housing Act of
 17 1949. Relocation payments authorized by this subsection
 18 shall be made subject to such rules and regulations as may
 19 be prescribed by the Administrator.”

20 MORTGAGE RELIEF FOR HOMEOWNERS WHO ARE UNEM-

21 PLOYED AS THE RESULT OF THE CLOSING OF A FED- 22 ERAL INSTALLATION

23 SEC. 107. (a) For the purposes of this section—

24 (1) The term “mortgage” means a mortgage which
 25 (A) is insured under the National Housing Act, or (B)

1 secures a home loan guaranteed or insured under the Service-
2 men's Readjustment Act of 1944 or chapter 37 of title 38,
3 United States Code.

4 (2) The term "Federal mortgage agency" means—

5 (A) the Federal Housing Commissioner when used
6 in connection with mortgages insured under the National
7 Housing Act, and

8 (B) the Administrator of Veterans' Affairs when
9 used in connection with mortgages securing home loans
10 guaranteed or insured under the Servicemen's Readjust-
11 ment Act of 1944 or chapter 37 of title 38, United
12 States Code.

13 (3) The term "distressed mortgagor" means an indi-
14 vidual who—

15 (A) is unemployed, although willing to work, as
16 the result of the closing (in whole or in part) of a
17 Federal installation, and

18 (B) is the owner-occupant of a dwelling upon
19 which there is a mortgage securing a loan which is in
20 default because of the inability of such individual to
21 make payments of principal and/or interest under such
22 mortgage.

23 (b) (1) Any distressed mortgagor, for the purpose
24 of avoiding foreclosure of his mortgage, may apply to the
25 appropriate Federal mortgage agency for a determination

1 that suspension of his obligation to make payments of prin-
2 cipal and/or interest under such mortgage during a tem-
3 porary period is necessary in order to avoid such foreclosure.

4 (2) Upon receipt of an application made under this sub-
5 section by a distressed mortgagor, the Federal mortgage
6 agency shall issue to such mortgagor a certificate of mora-
7 torium if it determines, after consultation with the interested
8 mortgagee, that—

9 (A) the mortgagor is not in default with respect to
10 any condition or covenant of the mortgage other than
11 that requiring the payment of installments of principal
12 and/or interest under the mortgage, and

13 (B) such action is the only available means where-
14 by a foreclosure of such mortgage can be avoided.

15 (3) Prior to the issuance to any distressed mortgagor of
16 a certificate of moratorium under paragraph (2), the Fed-
17 eral mortgage agency shall require such mortgagor to enter
18 into a binding agreement under which he will be required to
19 make payments to such agency, after the expiration of such
20 certificate, in an aggregate amount equal to the amount paid
21 by such agency in behalf of such mortgagor as provided in
22 subsection (c). The manner and time in which such pay-
23 ments shall be made shall be determined by the Federal mort-
24 gage agency having due regard to the purposes sought to be
25 achieved by this section.

1 (4) Any certificate of moratorium issued under this
2 subsection shall expire on whichever of the following dates
3 is the earliest—

4 (A) one year from the date on which such certifi-
5 cate is issued;

6 (B) thirty days after the date on which the mort-
7 gator to whom such certificate is issued ceases to be a
8 distressed mortgagor as defined in subsection (a) ; or

9 (C) the date on which such mortgagor becomes in
10 default with respect to any condition or covenant in his
11 mortgage other than that requiring the payment by him
12 of installments of principal and/or interest under the
13 mortgage.

14 (c) (1) Whenever a Federal mortgage agency issues
15 a certificate of moratorium to any distressed mortgagor
16 with respect to any mortgage, it shall transmit to the mort-
17 gagee a copy of such certificate, together with a notice stat-
18 ing that, while such certificate is in effect, such agency will
19 assume the obligation of such mortgagor to make payments
20 of principal, and if so specified in the certificate, of interest,
21 under the mortgage.

22 (2) Payments made by any Federal mortgage agency
23 pursuant to a certificate of moratorium issued under this
24 section with respect to the mortgage of any distressed mort-
25 gator shall include, in addition to the payments referred to

1 in paragraph (1), an amount equal to the unpaid principal
2 and interest charges which had accrued under such mort-
3 gage prior to the issuance of such certificate and subsequent
4 to the date on which such mortgagor became a distressed
5 mortgagor as defined in subsection (a).

6 (3) While any certificate of moratorium issued under
7 this section is in effect with respect to the mortgage of any
8 distressed mortgagor, no further payments of principal, and
9 if so specified in the certificate, of interest, under the mort-
10 gage shall be required of such mortgagor, and no action
11 (legal or otherwise) shall be taken or maintained by the
12 mortgagee to enforce or collect such payments. Upon the
13 expiration of such certificate, the mortgagor shall again be
14 liable for the payment of all amounts due under the mort-
15 gage in accordance with its terms.

16 (4) Each Federal mortgage agency shall give prompt
17 notice in writing to the interested mortgagor and mortgagee
18 of the expiration of any certificate of moratorium issued by
19 it under this section.

20 (d) The Federal mortgage agencies are authorized
21 to issue such individual and joint regulations as may be
22 necessary to carry out this section and to insure the uniform
23 administration thereof.

24 (e) There shall be in the Treasury (1) a fund which

1 shall be available to the Federal Housing Commissioner for
2 the purpose of extending financial assistance in behalf of
3 distressed mortgagors as provided in subsection (c), and (2)
4 a fund which shall be available to the Administrator of Vet-
5 erans' Affairs for the same purpose. The capital of each
6 such fund shall consist of such sums as may, from time to
7 time, be appropriated thereto, and any sums so appropriated
8 shall remain available until expended. Receipts arising
9 from the programs of assistance under subsection (c) shall
10 be credited to the fund from which such assistance was
11 extended. Moneys in either of such funds not needed for
12 current operations, as determined by the Federal Housing
13 Commissioner, or the Administrator of Veterans' Affairs,
14 as the case may be, shall be invested in bonds or other
15 obligations of the United States, or paid into the Treasury
16 as miscellaneous receipts.

17 (f) Section 1816 of title 38, United States Code, is
18 amended by inserting "(a)" before the text of such section,
19 and by adding at the end thereof a new subsection as
20 follows:

21 "(b) With respect to any loan made under section
22 1811 which has not been sold as provided in subsection
23 (g) of such section, if the Administrator finds after there
24 has been a default in the payment of any installment of
25 principal or interest owing on such loan, that the default

1 was due to the fact that the veteran who is obligated under
2 the loan has become unemployed as the result of the closing
3 (in whole or in part) of a Federal installation, he shall
4 (1) extend the time for curing the default to such time
5 as he determines is necessary and desirable to enable such
6 veteran to complete payments on such loan, including an
7 extension of time beyond the stated maturity thereof, or
8 (2) modify the terms of such loan for the purpose of chang-
9 ing the amortization provisions thereof by recasting, over
10 the remaining term of the loan, or over such longer period
11 as he may determine, the total unpaid amount then due
12 with the modification to become effective currently or upon
13 the termination of an agreed-upon extension of the period
14 for curing the default.”

15 ACQUISITION OF CERTAIN PROPERTIES SITUATED AT OR
16 NEAR MILITARY BASES WHICH HAVE BEEN ORDERED TO
17 BE CLOSED

18 SEC. 108. (a) The Secretary of Defense is authorized
19 to acquire title to any property, improved with a one- or
20 two-family dwelling, which is situated at or near a military
21 base or installation which the Department of Defense has,
22 subsequent to November 1, 1964, ordered to be closed in
23 whole or in part, if he determines—

24 (1) that the owner of such property is, or has been,

1 employed or performing military service at such base
2 or installation;

3 (2) that the closing of such base or installation, in
4 whole or in part, has required or will require the ter-
5 mination of such owner's employment or service at
6 such base or installation; and

7 (3) that as the result of the actual or pending
8 closing of such base or installation there is no present
9 market for the sale of such property upon reasonable
10 terms and conditions.

11 (b) The purchase price of any property which is situ-
12 ated at or near a military base or installation and is acquired
13 under this section shall be equal to an amount determined by
14 the Secretary of Defense to be the average price at which
15 properties, similar in size, construction, condition, and loca-
16 tion to that of the property to be acquired, were sold during
17 a representative period, as determined by the Secretary,
18 prior to the announcement of the intention of the Depart-
19 ment of Defense to close all or part of such base or
20 installation.

21 (c) The title to any property acquired under this sec-
22 tion shall be free and clear of any outstanding liens or encum-
23 brances and shall conform to such requirements as the
24 Secretary of Defense shall by regulation require. Such reg-
25 ulations shall also prescribe the terms and conditions under

1 which payments may be made under this section, and deci-
2 sions by the Secretary regarding such payments, and the
3 terms and conditions under which the same are approved or
4 disapproved, shall be final and conclusive and shall not be
5 subject to judicial review.

6 (d) Properties acquired under this section shall be
7 transferred to the Federal Housing Commissioner, and the
8 Federal Housing Commissioner shall have power to deal
9 with, rent, renovate, or sell for cash or credit any properties
10 so transferred. Receipts from the management or sale of
11 any such properties may be utilized by the Commissioner
12 to defray expenses arising in connection with the manage-
13 ment of such properties, and any part of such receipts not
14 required for such expenses shall be covered into the Treas-
15 ury as miscellaneous receipts.

16 (e) Section 223 (a) of the National Housing Act is
17 amended—

18 (1) by striking out the period at the end of para-
19 graph (7) and inserting in lieu thereof “; or”; and

20 (2) by inserting after paragraph (7) a new para-
21 graph as follows:

22 “(8) executed in connection with the sale by the
23 Commissioner of any housing acquired pursuant to sec-
24 tion 108 of the Housing and Urban Development Act
25 of 1965.”

1 (f) Such sums as may be necessary to carry out the
2 provisions of this section are hereby authorized to be appro-
3 priated, and any sums so appropriated shall remain available
4 until expended.

5 TITLE II—FHA INSURANCE OPERATIONS

6 LAND DEVELOPMENT

7 SEC. 201. (a) The National Housing Act is amended
8 by adding at the end thereof the following new title:

9 "TITLE X—MORTGAGE INSURANCE FOR LAND 10 DEVELOPMENT

11 "DEFINITIONS

12 "SEC. 1001. As used in this title—

13 "(a) the term 'mortgage' means a lien or liens on
14 real estate in fee simple, or on a leasehold (1) under a
15 lease for not less than ninety-nine years which is renew-
16 able or (2) under a lease having a period of not less
17 than fifty years to run from the date the mortgage was
18 executed;

19 "(b) the term 'first mortgage' includes such classes
20 of first liens as are commonly given to secure advances
21 (including but not limited to advances during construc-
22 tion) on, or the unpaid purchase price of, real estate
23 under the laws of the State in which the real estate is
24 located, together with the credit instrument or instru-
25 ments, if any, secured thereby, and may be in the form

1 of trust mortgages or mortgage indentures or deeds of
2 trusts securing notes, bonds, or other credit instruments;

3 “(c) the terms ‘mortgagee’, ‘mortgagor’, and
4 ‘State’ have the same meaning as in section 207 of
5 this Act;

6 “(d) the term ‘improvements’ means waterlines and
7 water supply installations, sewerlines and sewage dis-
8 posal installations, roads, streets, curbs, gutters, side-
9 walks, storm drainage facilities, and other installations
10 or work, whether on or off the site, which the Com-
11 missioner deems necessary or desirable to prepare land
12 primarily for residential and related uses or to provide
13 facilities for public or common use; but such term shall
14 not include any building unless it is (1) a building
15 which is needed in connection with a water supply or
16 sewage disposal installation, or (2) a building, other
17 than a school, which is to be owned and maintained
18 jointly by the property owners; and

19 “(e) the term ‘land development’ means the process
20 of making, installing, or constructing improvements.

21 “BASIC CONDITIONS FOR INSURANCE

22 “SEC. 1002. (a) The Commissioner is authorized (1)
23 to insure, upon such terms and conditions as he may pre-
24 scribe, any first mortgage (including advances on such

1 mortgage) in accordance with the provisions of this title,
2 and (2) to make a commitment for the insurance of such
3 mortgage prior to the date of execution of such mortgage
4 or prior to the date of disbursement of the mortgage pro-
5 ceeds. No mortgage shall be insured under this title after
6 October 1, 1969, except pursuant to a commitment to insure
7 issued before such date.

8 “(b) The mortgage shall—

9 “(1) be executed by a mortgagor, other than a
10 public body, approved by the Commissioner;

11 “(2) be made to and held by a mortgagee approved
12 by the Commissioner; and

13 “(3) cover the land to be developed and the im-
14 provements to be made with the assistance of the mort-
15 gage insurance under this title, except facilities intended
16 for public use and in public ownership.

17 “(c) The principal obligation of the mortgage shall
18 (1) not exceed 75 per centum of the Commissioner’s esti-
19 mate of the value of the property upon completion of the
20 land development, and (2) not exceed the sum of 50 per
21 centum of the Commissioner’s estimate of the value of the
22 land before development and 90 per centum of his estimate
23 of the cost of such development. The outstanding principal
24 obligations of mortgages involving a single land development

1 undertaking, as defined by the Commissioner, shall at no
2 time exceed \$10,000,000.

3 “(d) The mortgage shall—

4 “(1) have a maturity, not to exceed seven years
5 or such longer maturity as the Commissioner deems
6 reasonable in the case of a privately owned system for
7 water or sewerage, and contain repayment provisions
8 satisfactory to the Commissioner;

9 “(2) bear interest at a rate satisfactory to the Com-
10 missioner, and such interest shall be exclusive of premium
11 charges for mortgage insurance and such service charges
12 and fees as may be approved by the Commissioner; and

13 “(3) contain such terms and provisions with respect
14 to protection of the security, payment of taxes, de-
15 linquency charges, prepayment, additional and secondary
16 liens, and other matters as the Commissioner may in his
17 discretion prescribe.

18 “(e) A property or project to be financed by a mort-
19 gage insured under this title shall—

20 “(1) represent a good mortgage insurance risk;
21 and

22 “(2) involve improvements that comply with all
23 applicable State and local governmental requirements

1 and with minimum standards approved by the Com-
2 missioner.

3 "LAND PLANNING

4 "SEC. 1003. (a) The land development covered by a
5 mortgage insured under this title shall be undertaken pur-
6 suant to a schedule, conforming to such requirements and
7 procedures as the Commissioner may prescribe, that will
8 assure the use of the land for the purposes for which it is to
9 be developed within the shortest reasonable period consistent
10 with the objectives of sound and economic community growth
11 or urban development.

12 "(b) The land development shall be undertaken in
13 accordance with an overall development plan, appropriate
14 to the scope and character of the undertaking, which—

15 "(1) has received all governmental approvals re-
16 quired by State or local law or by the Commissioner;

17 "(2) is acceptable to the Commissioner as provid-
18 ing reasonable assurance that the land development will
19 contribute to good living conditions in the area being
20 developed, which area (i) will have a sound economic
21 base and a long economic life, (ii) will be characterized
22 by sound land-use patterns, and (iii) will include or be
23 served by such shopping, school, recreational, transpor-

tation, and other facilities as the Commissioner deems adequate or necessary; and

“(3) is consistent with a comprehensive plan which covers, or with comprehensive planning being carried on for, the area in which the land is situated, and which meets criteria established by the Housing and Home Finance Administrator for such plans or planning.

“ENCOURAGEMENT OF SMALL BUILDERS AND MODERATE
COST HOUSING

“SEC. 1004. The Commissioner shall adopt such requirements as he deems necessary in land development covered by mortgages insured under this title to encourage the maintenance of a diversified local homebuilding industry, broad participation by builders, and the inclusion of a proper balance of housing for families of moderate or low income.

“WATER AND SEWERAGE FACILITIES

“SEC. 1005. After development of the land it shall be served by public systems for water and sewerage which are consistent with other existing or prospective systems within the area, except that the Commissioner may approve an adequate privately or cooperatively owned system which will be regulated in a manner acceptable to him with respect to user rates and charges, capital structure, methods of

1 operation, rate of return, and conditions and terms of any
2 sale or transfer.

3 "RELEASES

4 "SEC. 1006. The Commissioner may, on such terms and
5 conditions as he may prescribe, consent to the release or
6 subordination of a part or parts of the mortgaged property
7 from the lien of the mortgage.

8 "PREMIUMS AND FEES

9 "SEC. 1007. The Commissioner shall collect reasonable
10 premiums for the insurance of any mortgage under this title
11 and make such charges as he determines are reasonable for
12 the analysis of the land development plan and the appraisal
13 and inspection of the property and improvements. On or
14 before January 1, 1967, the Commissioner shall make a
15 report to the Congress concerning the premium rates and
16 other charges under this title that he estimates will be ade-
17 quate to provide income sufficient for a self-supporting pro-
18 gram.

19 "INSURANCE BENEFITS

20 "SEC. 1008. The provisions of subsections (e), (g),
21 (h), (i), (j), (k), (l), and (n) of section 207 of this
22 Act shall be applicable to mortgages insured under this
23 title, except that as applied to such mortgages (1) any
24 reference therein to section 207 shall be deemed to refer to
25 this title, and (2) any reference to an annual premium shall

1 be deemed to refer to such premiums as the Commissioner
2 may designate under this title.

3 "INCONTESTABILITY PROVISIONS

4 "SEC. 1009. Any contract of insurance executed by the
5 Commissioner under this title shall be conclusive evidence of
6 the eligibility of the mortgage for insurance, and the validity
7 of any contract of insurance so executed shall be incontest-
8 able in the hands of an approved mortgagee from the date of
9 the execution of such contract, except for fraud or material
10 misrepresentation on the part of such approved mortgagee.

11 "RULES AND REGULATIONS

12 "SEC. 1010. The Commissioner is authorized to make
13 such rules and regulations and to require such agreements
14 as he may deem necessary or desirable to carry out the pro-
15 visions of this title.

16 "TAXATION PROVISIONS

17 "SEC. 1011. Nothing in this title shall be construed to
18 exempt any real property acquired and held by the Com-
19 missioner under this title from taxation by any State or
20 political subdivision thereof to the same extent, according
21 to its value, as other real property is taxed.

22 "COST CERTIFICATION

23 "SEC. 1012. (a) The Commissioner shall adopt such re-
24 quirements as he determines necessary to assure, at reason-
25 able intervals of time during land development and upon

1 completion of such development, that the amount of the
2 mortgage loan outstanding at each such interval does not
3 exceed with respect to that portion of the land remaining
4 under the lien of the mortgage (1) 50 per centum of the
5 Commissioner's estimate of the value of such remaining
6 land before development, plus (2) 90 per centum of the
7 actual costs of the development allocated by the Commis-
8 sioner to such remaining land.

9 “(b) From time to time during, and upon completion
10 of, the development, the Commissioner shall require the
11 mortgagor to certify as to the actual costs of development
12 of the land.

13 “(c) Certifications required pursuant to this section
14 shall be accompanied by such data and records as the Com-
15 missioner shall prescribe.

16 “(d) A mortgagor's certification approved by the Com-
17 missioner shall be final and incontestable except for fraud
18 or material misrepresentation on the part of the mortgagor.

19 “(e) As used in this section, the term ‘actual costs’
20 means the costs (exclusive of kickbacks, rebates, or trade
21 discounts) to the mortgagor of the improvements involved.
22 These costs may include amounts paid for labor, materials,
23 construction contracts, land planning, engineers' and archi-
24 tect's fees, surveys, taxes, and interest during development,
25 organizational and legal expenses, such allocation of general

1 overhead expenses as are acceptable to the Commissioner,
2 and other items of expense incidental to development which
3 may be approved by the Commissioner. If the Commis-
4 sioner determines there is an identity of interest between
5 the mortgagor and the contractor, there may be included
6 an allowance for contractor's profit in an amount deemed
7 reasonable by the Commissioner."

8 (b) (1) Section 302 (b) of the National Housing Act is
9 amended by striking out "the term 'mortgages' " in the last
10 sentence and inserting in lieu thereof "the terms 'mortgages'
11 and 'home mortgages' ".
12

13 (2) The first paragraph of section 24 of the Federal
14 Reserve Act is amended by inserting before the next to last
15 sentence the following new sentence: "Notwithstanding the
16 foregoing limitations and restrictions in this section, any na-
17 tional banking association may make loans for land develop-
18 ment which are secured by mortgages insured under title X
19 of the National Housing Act."

20 (3) Section 5 (c) of the Home Owners Loan Act of
21 1933 is amended by adding at the end thereof the following
22 new paragraph:

23 "Without regard to any other provision of this sub-
24 section, any such association may, to such extent as the
Federal Home Loan Bank Board may by regulation permit,

1 invest in loans, and interests in loans, secured by mortgages
 2 as to which the association has the benefit of insurance under
 3 title X of the National Housing Act or of a commitment or
 4 agreement for such insurance, and investments under this
 5 sentence shall not be included in any percentage of assets
 6 or other percentage referred to in this subsection.”

7 EXTENSION OF INSURANCE AUTHORIZATIONS

8 SEC. 202. (a) Section 2 (a) of the National Housing
 9 Act is amended by striking out “October 1, 1965” and insert-
 10 ing in lieu thereof “October 1, 1969”.

11 (b) Section 217 of such Act is amended by—

12 (1) striking out “title VIII” and inserting in lieu
 13 thereof “titles VIII or X”, and

14 (2) striking out “October 1, 1965” and inserting
 15 in lieu thereof “October 1, 1969”.

16 (c) The second sentences of sections 809 (f) and 810
 17 (k) of such Act are each amended by striking out “October
 18 1, 1965” and inserting in lieu thereof “October 1, 1969”.

19 DOWNPAYMENT REQUIREMENT IN CASE OF LOW-INCOME

20 HOUSING DEMONSTRATION HOMES

21 SEC. 203. Section 203 (b) (9) of the National Housing
 22 Act is amended by inserting after “a mortgage meeting the
 23 requirements of subsection (i) of this section,” the follow-
 24 ing: “or with respect to a mortgage covering a single-family
 25 home being purchased under the low-income housing dem-

1 onstration project assisted pursuant to section 207 of the
2 Housing Act of 1961,”.

3 MULTIFAMILY MORTGAGE LIMITS FOR FOUR OR MORE
4 BEDROOM UNITS

5 SEC. 204. (a) Section 207 (c) (3) of the National
6 Housing Act is amended by—

7 (1) striking out “and \$18,500 per family unit with
8 three or more bedrooms” and inserting in lieu thereof
9 “\$18,500 per family unit with three bedrooms, and
10 \$21,000 per family unit with four or more bedrooms”;
11 and

12 (2) striking out “and \$22,500 per family unit with
13 three or more bedrooms” and inserting in lieu thereof
14 “\$22,500 per family unit with three bedrooms, and
15 \$25,500 per family unit with four or more bedrooms”.

16 (b) (1) Section 213 (b) (2) of such Act is amended
17 by—

18 (A) striking out “and \$18,500 per family unit with
19 three or more bedrooms” and inserting in lieu thereof
20 “\$18,500 per family unit with three bedrooms, and
21 \$21,000 per family unit with four or more bedrooms”;
22 and

23 (B) striking out “and \$22,500 per family unit with
24 three or more bedrooms” and inserting in lieu thereof

1 “\$22,500 per family unit with three bedrooms, and
2 \$25,500 per family unit with four or more bedrooms”.

3 (2) Section 213 (c) of such Act is amended by striking
4 out all that follows “and not to exceed” and inserting in lieu
5 thereof the following: “a sum computed on the basis of a
6 separate mortgage for each family dwelling (irrespective of
7 whether such dwelling has a party wall or is otherwise
8 physically connected with another dwelling or dwellings)
9 comprising the property or project, equal to the total of each
10 of the maximum principal obligations of such mortgages
11 which would meet the requirements of section 203 (b) (2) of
12 this Act if the mortgagor were the owner and occupant who
13 had made any required payment on account of the property
14 prescribed in such paragraph.”

15 (c) Section 220 (d) (3) (B) (iii) of such Act is
16 amended by—

17 (1) striking out “and \$18,500 per family unit with
18 three or more bedrooms” and inserting in lieu thereof
19 “\$18,500 per family unit with three bedrooms, and
20 \$21,000 per family unit with four or more bedrooms”;
21 and

22 (2) striking out “and \$22,500 per family unit with
23 three or more bedrooms” and inserting in lieu thereof
24 “\$22,500 per family unit with three bedrooms, and
25 \$25,500 per family unit with four or more bedrooms”.

1 (d) Subsections (d) (3) (ii) and (d) (4) (ii) of sec-
2 tion 221 of such Act are amended by—

3 (1) striking out “and \$17,000 per family unit with
4 three or more bedrooms” and inserting in lieu thereof
5 “\$17,000 per family unit with three bedrooms, and
6 \$19,250 per family unit with four or more bedrooms”;
7 and

8 (2) striking out “and \$20,000 per family unit with
9 three or more bedrooms” and inserting in lieu thereof
10 “\$20,000 per family unit with three bedrooms, and
11 \$22,750 per family unit with four or more bedrooms”.

12 (e) Section 231 (c) (2) of such Act is amended by—

13 (1) striking out “and \$17,000 per family unit with
14 three or more bedrooms” and inserting in lieu thereof
15 “\$17,000 per family unit with three bedrooms, and
16 \$19,250 per family unit with four or more bedrooms”;
17 and

18 (2) striking out “and \$20,000 per family unit with
19 three or more bedrooms” and inserting in lieu thereof
20 “\$20,000 per family unit with three bedrooms, and
21 \$22,750 per family unit with four or more bedrooms”.

22 (f) Section 234 (e) (3) of such Act is amended by—

23 (1) striking out “and \$18,500 per family unit with
24 three or more bedrooms” and inserting in lieu thereof
25 “\$18,500 per family unit with three bedrooms, and

1 \$21,000 per family unit with four or more bedrooms”;
2 and

3 (2) striking out “and \$22,500 per family unit with
4 three or more bedrooms” and inserting in lieu thereof
5 “\$22,500 per family unit with three bedrooms, and
6 \$25,500 per family unit with four or more bedrooms”.

7 REHABILITATION IN URBAN RENEWAL AREAS

8 SEC. 205. Section 220 (d) (3) (A) of the National
9 Housing Act is amended by—

10 (1) striking out the second proviso in clause (i) ;
11 and

12 (2) striking out clause (ii) and inserting in lieu
13 thereof the following:

14 “(ii) in a case where the mortgagor is not the
15 occupant of the property and the mortgagor intends to
16 hold the property for rental purposes, have a principal
17 obligation in an amount not to exceed 93 per centum
18 of the amount available to a mortgagor who is the
19 occupant of the property computed under the provisions
20 of clause (i) ;

21 “(iii) in a case where the mortgagor is not the
22 occupant of the property and intends to hold the prop-
23 erty for the purpose of sale, have a principal obligation
24 in an amount not to exceed 85 per centum of the amount
25 computed under the provisions of clause (i) , or in the

1 alternative, in an amount computed under the provisions
2 of clause (i) if the mortgagor and mortgagee assume
3 responsibility in a manner satisfactory to the Com-
4 missioner for the reduction of the mortgage by an
5 amount not less than 15 per centum of the outstanding
6 principal amount thereof, or by such greater amount as
7 may be required to meet the limitations of clause (iv),
8 in the event the mortgaged property is not, prior to
9 the due date of the eighteenth amortization payment of
10 the mortgage, sold to a purchaser acceptable to the
11 Commissioner who is the occupant of the property and
12 who assumes and agrees to pay the mortgage indebted-
13 ness; and

14 “(iv) in no case involving refinancing (except as
15 provided in clause (iii)), have a principal obligation
16 in an amount exceeding the sum of the estimated cost
17 of repair and rehabilitation and the amount (as deter-
18 mined by the Commissioner) required to refinance
19 existing indebtedness secured by the property or project
20 and any existing indebtedness incurred in connection
21 with improving, repairing, or rehabilitating the prop-
22 erty; or”.

23 NONDWELLING FACILITIES FOR URBAN RENEWAL HOUSING.

24 SEC. 206. Section 220 (d) (3) (B) of the National

1 Housing Act is amended by striking out clause (iv) and
2 inserting in lieu thereof the following:

3 “(iv) include such nondwelling facilities as the
4 Commissioner deems desirable and consistent with the
5 urban renewal plan: *Provided*, That the project shall
6 be predominantly residential and the Commissioner shall
7 find that any nondwelling facility included in the project
8 is essential to the economic feasibility of the project,
9 and that its financing under this section will not result
10 in an unfair disadvantage to other business enterprises in
11 the vicinity of the project.”

12 LARGER INSURED MORTGAGES FOR SERVICEMEN

13 SEC. 207. Section 222 (b) of the National Housing Act
14 is amended by—

15 (1) striking out “\$20,000” in paragraph (2) and
16 inserting in lieu thereof “\$30,000”; and

17 (2) striking out paragraph (3) and inserting in
18 lieu thereof the following:

19 “(3) have a principal obligation equal to the sum
20 of (i) 95 per centum of \$20,000 of the appraised value
21 of the property (or such higher amount as may be
22 derived by applying the maximum ratio of loan to value
23 prescribed in section 203 (b) (2)), and (ii) 85 per
24 centum of such value in excess of \$20,000; and”.

REFINANCING OF INSURED MORTGAGES

SEC. 208. Section 223 (a) (7) of the National Housing Act is amended by striking out "section 608 of title VI prior to the effective date of the Housing Act of 1954 or under section 220, 221, 903, or section 908" and inserting in lieu thereof "this Act".

CONSOLIDATION OF FHA INSURANCE FUNDS

SEC. 209. Title V of the National Housing Act is amended by adding at the end thereof the following new section:

"ESTABLISHMENT OF GENERAL INSURANCE FUND

"SEC. 519. (a) There is hereby created a General Insurance Fund which shall be used by the Commissioner, on and after the date of the enactment of the Housing and Urban Development Act of 1965, as a revolving fund for carrying out all the insurance provisions of this Act with the exception of the provisions of sections 203 (b), 203 (h), and 203 (i). All mortgages or loans insured under this Act pursuant to commitments issued on or after the date of the enactment of the Housing and Urban Development Act of 1965, except those insured under sections 203 (b), 203 (h), and 203 (i), and all loans reported for insurance under section 2 on and after the date of the enactment of the Housing and Urban Development Act of 1965, shall be insured under the Gen-

1 eral Insurance Fund. The Commissioner shall transfer to the
2 General Insurance Fund—

3 “(1) the assets and liabilities of all insurance ac-
4 counts and funds, except the Mutual Mortgage Insurance
5 Fund, existing under this Act immediately prior to the
6 date of the enactment of the Housing and Urban De-
7 velopment Act of 1965;

8 “(2) all outstanding commitments for insurance
9 issued prior to the date of the enactment of the Housing
10 and Urban Development Act of 1965, except commit-
11 ments issued under sections 203 (b), 203 (h), and
12 203 (i) ;

13 “(3) the insurance on all mortgages and loans in-
14 sured prior to the date of the enactment of the Housing
15 and Urban Development Act of 1965, except the in-
16 surance under sections 203 (b), 203 (h), and 203 (i) ;
17 and

18 “(4) the insurance of loans made by approved
19 financial institutions pursuant to section 2 prior to the
20 date of the enactment of the Housing and Urban De-
21 velopment Act of 1965.

22 “(b) The general expenses of the operations of the
23 Federal Housing Administration relating to mortgages and
24 loans which are the obligation of the General Insurance
25 Fund may be charged to the General Insurance Fund.

1 “(c) Moneys in the General Insurance Fund not needed
2 for the current operations of the Federal Housing Admin-
3 istration with respect to mortgages and loans which are the
4 obligation of the General Insurance Fund shall be deposited
5 with the Treasurer of the United States to the credit of such
6 Fund, or invested in bonds or other obligations of, or in
7 bonds or other obligations guaranteed as to principal and
8 interest by, the United States. The Commissioner may,
9 with the approval of the Secretary of the Treasury, purchase
10 in the open market debentures issued as obligations of the
11 Fund created by this section or issued prior to the date of
12 enactment of the Housing and Urban Development Act of
13 1965 under other provisions of this Act, except debentures
14 issued under the Mutual Mortgage Insurance Fund. Such
15 purchases shall be made at a price which will provide an
16 investment yield of not less than the yield obtainable from
17 other investments authorized by this section. Debentures
18 so purchased shall be canceled and not reissued.

19 “(d) Premium charges, adjusted premium charges, and
20 appraisal and other fees received on account of the insurance
21 of any mortgage or loan which is the obligation of the Gen-
22 eral Insurance Fund, the receipts derived from the property
23 covered by such mortgages and loans and from the claims,
24 debts, contracts, property, and security assigned to the Com-

1 missioner in connection therewith, and all earnings on the
2 assets of such Fund shall be credited to the General Insurance
3 Fund. The principal of, and interest paid and to be paid on,
4 debentures which are the obligation of such Fund, cash in-
5 surance payments and adjustments, and expenses incurred in
6 the handling, management, renovation, and disposal of prop-
7 erties acquired in connection with mortgages and loans which
8 are the obligation of such Fund, shall be charged to such
9 Fund.”

10 OPTIONAL CASH PAYMENT OF INSURANCE BENEFITS

11 SEC. 210. Title V of the National Housing Act is
12 amended by inserting after section 519 (added by section
13 209 of this Act) a new section as follows:

14 “OPTIONAL CASH PAYMENT OF INSURANCE BENEFITS

15 “SEC. 520. Notwithstanding any other provision of
16 this Act with respect to the payment of insurance benefits,
17 the Commissioner is authorized, in his discretion, to pay in
18 cash or in debentures any insurance claim or part thereof
19 which is paid on or after the date of enactment of the Hous-
20 ing and Urban Development Act of 1965 on a mortgage or a
21 loan which was insured under any section of this Act either
22 before or after such date. If payment is made in cash, it
23 shall be in an amount equivalent to the face amount of
24 the debentures that would otherwise be issued plus an amount
25 equivalent to the interest which the debentures would have

1 earned, computed to a date to be established pursuant to regu-
2 lations issued by the Commissioner.”

3 APPROVAL OF TECHNICALLY SUITABLE MATERIALS

4 SEC. 211. Title V of the National Housing Act is
5 amended by inserting after section 520 (added by section
6 210 of this Act) a new section as follows:

7 “APPROVAL OF TECHNICALLY SUITABLE MATERIALS

8 “SEC. 521. The Commissioner shall adopt a uniform
9 procedure for the acceptance of materials and products to be
10 used in structures approved for mortgages or loans insured
11 under this Act. Under such procedure any material or
12 product which is technically suitable for the use proposed
13 shall be accepted.”

14 WATER AND SEWER FACILITIES IN CONNECTION WITH
15 CERTAIN FEDERALLY ASSISTED HOUSING

16 SEC. 212. (a) Title V of the National Housing Act is
17 amended by inserting after section 521 (added by section
18 211 of this Act) a new section as follows:

19 “WATER AND SEWER FACILITIES

20 “SEC. 522. Notwithstanding any other provision of this
21 Act, no mortgage which covers new construction shall be
22 approved for insurance under this Act (except pursuant to
23 a commitment made prior to the date of the enactment of
24 the Housing and Urban Development Act of 1965) if the

1 mortgaged property includes housing which is not served by
2 a public or adequate community water and sewerage system:
3 *Provided*, That this limitation shall be applicable only to
4 property which is not served by a system approved by the
5 Commissioner pursuant to title X of this Act and which
6 is situated in an area certified by appropriate local officials
7 to be an area where the establishment of public or adequate
8 community water and sewerage systems is economically
9 feasible: *Provided further*, That for purposes of this section
10 the economic feasibility of establishing such public or ade-
11 quate community water and sewerage systems shall be
12 determined without regard to whether such establishment is
13 authorized by law or is subject to approval by one or more
14 local governments or public bodies.”

15 (b) Section 1804 of title 38, United States Code, is
16 amended by adding at the end thereof a new subsection as
17 follows:

18 “(e) No loan for the purchase or construction of new
19 residential property (other than property served by a water
20 and sewerage system approved by the Federal Housing
21 Commissioner pursuant to title X of the National Housing
22 Act) shall be financed through the assistance of this chap-
23 ter, except pursuant to a commitment made prior to the
24 date of enactment of the Housing and Urban Development
25 Act of 1965, if such property is not served by a public or

1 adequate community water and sewerage system and is
2 located in an area where the appropriate local officials
3 certify that the establishment of such systems is economically
4 feasible. For purposes of this subsection, the economic
5 feasibility of establishing public or adequate community
6 water and sewerage systems shall be determined without
7 regard to whether such establishment is authorized by law
8 or is subject to approval by one or more local governments
9 or public bodies.”

10 PROPERTY IMPROVEMENT PROGRAM UNDER TITLE I

11 SEC. 213. (a) Section 2 (b) of the National Housing
12 Act is amended by—

13 (1) striking out “\$3,500” and inserting in lieu
14 thereof “\$5,000”; and

15 (2) striking out “five years” and inserting in lieu
16 thereof “seven years”.

17 (b) Effective on January 1, 1966, section 2 (a) of
18 such Act is amended by—

19 (1) striking out “purchases of obligations” in the
20 first sentence and inserting in lieu thereof “purchases
21 of transferrable but nonnegotiable obligations”; and

22 (2) inserting after the first sentence a new sen-
23 tence as follows: “The instrument evidencing any
24 purchased obligation with respect to which insurance

1 is provided under this section shall have printed on the
2 face thereof a statement indicating that any defense
3 against payment which may be available to the maker
4 thereof against the original payee will be available
5 against any subsequent transferee from the original
6 payee.”

7 TITLE III—URBAN RENEWAL

8 GENERAL NEIGHBORHOOD RENEWAL PLANS

9 SEC. 301. Section 102 (d) of the Housing Act of 1949
10 is amended by—

11 (1) striking out the first sentence of the second
12 paragraph and inserting in lieu thereof the following:

13 “In order to facilitate proper preliminary planning for
14 the attainment of the urban renewal objectives of this title,
15 the Administrator may also make advances of funds (in addi-
16 tion to those authorized above) to local public agencies for
17 the preparation of General Neighborhood Renewal Plans (as
18 herein defined). A General Neighborhood Renewal Plan
19 may be prepared for an area consisting of an urban renewal
20 area or areas, together with any adjoining areas having spe-
21 cially related problems, and which is of such size that the
22 urban renewal activities in the urban renewal area or areas
23 may have to be initiated in stages, consistent with the capac-
24 ity and resources of the respective local public agency or

1 agencies, over an estimated period of not more than eight
2 years.”; and

3 (2) striking out the first numbered paragraph and
4 inserting in lieu thereof the following:

5 “(1) in the interest of sound community planning,
6 it is desirable that the urban renewal activities proposed
7 for the area be planned in their entirety;”.

8 INCREASE IN AUTHORIZATION FOR CAPITAL GRANTS

9 SEC. 302. (a) Section 103 (b) of the Housing Act of
10 1949 is amended by striking out “\$4,725,000,000” and
11 inserting in lieu thereof “\$4,700,000,000, which amount
12 shall be increased by \$675,000,000 on the date of enact-
13 ment of the Housing and Urban Development Act of 1965,
14 by \$725,000,000 on July 1, 1966, and by \$750,000,000
15 on July 1 in each of the years 1967 and 1968”.

16 (b) The first proviso in section 103 (b) of such Act,
17 and the second sentence of section 6 (b) of the Urban Mass
18 Transportation Act of 1964, are repealed.

19 (c) The Housing and Home Finance Administrator
20 shall undertake a study of the existing slum clearance and
21 urban renewal program under title I of the Housing Act of
22 1949 with a view to making recommendations for strength-
23 ening such program, or for establishing a new or alternative
24 program to assist the States and their communities in slum

1 clearance and urban renewal activities. Such study shall
2 include, among other relevant matters, a consideration of
3 ways in which (1) more effective assistance can be given to
4 meet the special problems of smaller communities undertak-
5 ing or proposing to undertake urban renewal projects, and
6 (2) the time required to complete urban renewal projects
7 can be shortened. Findings and recommendations resulting
8 from such study shall be reported to the President for sub-
9 mission to the Congress not later than two years after the
10 appropriation of funds for such study. Such sums as may be
11 necessary to carry out the provisions of this subsection are
12 hereby authorized to be appropriated.

13 INCREASE IN NONRESIDENTIAL EXCEPTION

14 SEC. 303. The sixth sentence of section 110 (c) of the
15 Housing Act of 1949 is amended by striking out the period
16 and inserting in lieu thereof the following: “: *And provided*
17 *further*, That the aggregate amount of capital grants avail-
18 able under this title with respect to such projects after the
19 date of the enactment of the Housing and Urban Develop-
20 ment Act of 1965 (which amount shall not include any
21 amounts previously authorized for such projects) shall not
22 exceed 40 per centum of the amount of grants authorized
23 under this title by such Act.”

RELOCATION PAYMENTS

SEC. 304. Section 114 (b) (2) of the Housing Act of 1949 is amended by striking out "\$1,500" and inserting in lieu thereof "\$2,500".

DEMOLITION OF UNSAFE STRUCTURES AND CODE

ENFORCEMENT

SEC. 305. (a) Title I of the Housing Act of 1949 is amended by inserting after section 115 (added by section 103 of this Act) two new sections as follows:

"DEMOLITION

"SEC. 116. (a) Notwithstanding any other provision of this title, the Administrator is authorized to enter into contracts to make, and to make, grants as provided in this section (payable from any grant funds provided under section 103 (b)) to cities, other municipalities, and counties to assist in financing the cost of demolishing structures which under State or local law have been determined to be structurally unsound or unfit for human habitation, and which such city, municipality, or county has authority to demolish. The amount of any grant under this section shall not exceed two-thirds of the cost of the demolition of such structures.

"(b) No grant shall be made under this section unless the structures to be demolished are located in an urban re-

1 newal area, or, in the case of structures outside an urban
2 renewal area, (1) the locality involved has an approved
3 workable program for community improvement in accord-
4 ance with the requirements of section 101 (c) of this title, as
5 determined by the Administrator, (2) the demolition to be
6 assisted will be on a planned neighborhood basis and will
7 further the over-all renewal objectives of such locality, (3)
8 there is in such locality a program of enforcement of existing
9 local housing and related codes, (4) the structures to be
10 demolished constitute a public nuisance and a serious hazard
11 to the public health or welfare, and (5) the governing body
12 of such locality has determined that other available legal pro-
13 cedures have been exhausted to secure remedial action by the
14 owner of the structures involved and that demolition by
15 governmental action is required.

16 "CODE ENFORCEMENT

17 "SEC. 117. Notwithstanding any other provision of this
18 title, the Administrator is authorized to enter into contracts
19 to make, and to make, grants as provided in this section
20 (payable from any grant funds provided under section 103
21 (b)) to cities, other municipalities, and counties for the
22 purpose of assisting such localities in carrying out programs
23 of concentrated code enforcement in deteriorated or deterior-
24 ating areas in which such enforcement, together with those
25 public improvements to be provided by the locality, may be

1 expected to arrest the decline of the area. Such grants shall
2 not exceed two-thirds (or three-fourths in the case of any
3 city, other municipality, or county having a population of
4 50,000 or less according to the most recent decennial
5 census) of the cost of planning and carrying out such pro-
6 grams which may include the provision and repair of neces-
7 sary streets, curbs, sidewalks, street lighting, tree planting,
8 and similar improvements within such areas. The Adminis-
9 trator shall not make any grant under this section unless he
10 has obtained adequate assurances (1) that the locality will
11 maintain during the period of the contract, in addition to its
12 expenditures for planning and carrying out any program
13 assisted under this section, a level of expenditures for sode
14 enforcement activities at not less than its normal expendi-
15 tures for such activities prior to the execution of such con-
16 tract, and (2) that the locality has a satisfactory program
17 for the provision of all necessary public improvements for
18 such areas. The provisions of sections 101 (c), 106, 114,
19 and 115 shall be applicable to the programs assisted under
20 this section."

21 (b) Section 110 (c) of such Act is amended by—

22 (1) striking out "or a program of code enforce-
23 ment in an urban renewal area," in the first sentence;
24 and

25 (2) striking out the proviso in paragraph (5).

1 (c) Section 220 (d) (1) (A) of the National Housing
2 Act is amended by inserting before the first proviso the
3 following: “, or (iv) an area in which a program of con-
4 centrated code enforcement activities is being carried out
5 pursuant to section 117 of the Housing Act of 1949”.

6 (d) Section 220 (h) (1) of the National Housing Act
7 is amended by inserting after “urban renewal project” in
8 the first sentence the following: “or in an area in which a
9 program of concentrated code enforcement activities is being
10 carried out pursuant to section 117 of the Housing Act of
11 1949”.

12 (e) Section 312 (a) of the Housing Act of 1964 is
13 amended by inserting after “urban renewal area” in the first
14 sentence the following: “or an area in which a program of
15 concentrated code enforcement activities is being carried out
16 pursuant to section 117 of the Housing Act of 1949”.

17 ELIGIBILITY OF CERTAIN LOCAL GRANTS-IN-AID

18 SEC. 306. (a) Notwithstanding the date of the com-
19 mencement of construction of the Tanyard Creek collector
20 sanitary sewer in Jasper, Alabama, local expenditures made
21 in connection with this collector sanitary sewer system shall,
22 to the extent otherwise eligible, be counted as a local grant-
23 in-aid to the downtown urban renewal project (Alabama
24 R-49) in accordance with the provisions of title I of the
25 Housing Act of 1949.

1 (b) Notwithstanding the date of the commencement of
2 construction of the East Side High School and the start of
3 construction of the improvements to Hickory Creek in Joliet,
4 Illinois, expenditures made in connection with such high
5 school and such creek improvements shall, to the extent
6 otherwise eligible, be counted as a local grant-in-aid to the
7 proposed south central urban renewal project in accordance
8 with the provisions of title I of the Housing Act of 1949.

9 (c) Notwithstanding the date of commencement of the
10 installation of certain underground electrical wiring in John-
11 son City, Tennessee, expenditures made in connection with
12 such installation shall, to the extent otherwise eligible, be
13 counted as a local grant-in-aid to Johnson City's proposed
14 downtown urban renewal project (Tennessee R-80) in
15 accordance with the provisions of title I of the Housing Act
16 of 1949.

17 (d) Notwithstanding the provisions of section 312 of
18 the Housing Act of 1954 or any request previously made
19 pursuant to such section, upon request of the local public
20 agency the eligibility of the local grants-in-aid for any proj-
21 ect in the city of New Brunswick, New Jersey, in connec-
22 tion with which the final capital grant payment has not been
23 made, shall be determined in accordance with the provisions
24 of section 110 (d) of the Housing Act of 1949.

25 (e) Two thirds of all expenditures by the city of Saint

1 Louis, Missouri, in connection with its Downtown Sports
2 Stadium project, to the extent such expenditures would have
3 been eligible under the provisions of section 110 (d) of the
4 Housing Act of 1949 to be counted as non-cash grants-in-
5 aid toward such project if it had received Federal assistance
6 as an urban renewal project pursuant to the provisions of
7 title I of such Act, shall be eligible to be counted as a grant-
8 in-aid toward any Federally-assisted urban renewal projects
9 in Saint Louis.

10 AMENDMENT OF SECTION 316 OF THE HOUSING ACT

11 OF 1954

12 SEC. 307. The first full paragraph of section 316 (2) of
13 the Housing Act of 1954 is amended by striking out the first
14 parenthetical clause and inserting in lieu thereof the follow-
15 ing: “(as such projects are now or may hereafter be defined
16 in title I of the Housing Act of 1949, including but not
17 limited to projects authorized without regard to the resi-
18 dential or nonresidential character or reuse of the urban
19 renewal area)”.

20 REHABILITATION LOANS

21 SEC. 308. (a) Section 312 (a) of the Housing Act of
22 1964 is amended by striking out “reasonable” in the second
23 sentence and inserting in lieu thereof “comparable”.

24 (b) Section 312 (d) of such Act is amended by adding
25 at the end thereof a new sentence as follows: “All moneys

1 in such revolving fund shall be available for necessary
2 expenses of servicing loans made pursuant to this section,
3 including reimbursement or payment for services and facil-
4 ities of the Federal National Mortgage Association and of
5 any public or private agency for the servicing of such loans.”

6 TITLE IV—LOW-RENT PUBLIC HOUSING

7 ACCEPTANCE OF LOCAL CERTIFICATION OF EQUIVALENT

8 ELIMINATION

9 SEC. 401. The fourth sentence of section 10 (a) of the
10 United States Housing Act of 1937 is amended by inserting
11 immediately before the comma after the word “elimination”,
12 where the word first appears, the following: “, as certified
13 by the local governing body”.

14 GREATER USE OF EXISTING HOUSING

15 SEC. 402. Section 10 (c) of the United States Housing
16 Act of 1937 is amended by striking out “*And provided*”
17 and inserting in lieu thereof “*Provided*”, and by inserting a
18 colon and the following proviso before the period at the
19 end thereof: “*And provided further*, That the amount of the
20 fixed annual contribution which would be established under
21 this Act for a newly constructed project by a public housing
22 agency designed to accommodate a number of families of
23 a given size and kind may be established, as a maximum
24 annual contribution in lieu of any other guaranteed con-
25 tribution authorized under this section, for a project by such

1 public housing agency which would provide housing for the
2 comparable number, sizes and kinds of families through the
3 acquisition, acquisition and rehabilitation, or use under lease
4 of existing structures which are suitable for low-rent housing
5 use and obtainable in the local market”.

6 INCREASE IN AUTHORIZATION FOR ANNUAL
7 CONTRIBUTIONS

8 SEC. 403. Section 10 (e) of the United States Housing
9 Act of 1937 is amended by inserting immediately following
10 “per annum”, the following: “, which limit shall be in-
11 creased by \$47,000,000 on the date of enactment of the
12 Housing and Urban Development Act of 1965, and by fur-
13 ther amounts of \$47,000,000 on July 1 in each of the years
14 1966, 1967, and 1968, respectively,”.

15 REALLOCATION OF UNITS

16 SEC. 404. Section 10 (e) of the United States Housing
17 Act of 1937 is amended by striking out “*Provided,*” and
18 inserting in lieu thereof the following: “*Provided, That*
19 subject to any contractual obligation outstanding on the date
20 of enactment of the Housing and Urban Development Act
21 of 1965, any units not under construction within five years
22 from the date they were reserved to a public housing agency
23 may be reserved, allocated, or placed under contract for
24 annual contributions in any State without limitation as to
25 the aggregate amount of units which may be placed under

1 contract for annual contributions in any one State: *Provided*
2 *further,*".

3 SALE OF FEDERALLY OWNED PROJECTS TO PRIVATE
4 PURCHASERS

5 SEC. 405. The first sentence of section 12 (c) of the
6 United States Housing Act of 1937 is amended to read as
7 follows: "The Authority may sell a Federal project only
8 to a public housing agency or to a nonprofit body for use
9 as low-rent housing."

10 INCREASE IN PER ROOM LIMITATIONS

11 SEC. 406. Paragraph (5) of section 15 of the United
12 States Housing Act of 1937 is amended by—

13 (1) striking out "\$2,000" and inserting in lieu
14 thereof "\$2,400";

15 (2) striking out "\$3,000", each place it appears,
16 and inserting in lieu thereof "\$3,500"; and

17 (3) striking out "\$3,500" and inserting in lieu
18 thereof "\$4,000".

19 PURCHASE OF UNITS BY TENANTS

20 SEC. 407. (a) Section 15 of the United States Housing
21 Act is amended by adding after paragraph (8) a new par-
22 agraph as follows:

23 "(9) Notwithstanding any other provision of this Act,
24 but subject to the provisions of any contract with the Author-
25 ity, any public housing agency may permit any member of a

1 tenant family to enter into a contract (either individually or
2 as a member of a group) for the acquisition of a dwelling
3 unit in any project of the public housing agency which is
4 suitable by reason of its detached, semidetached, or row
5 construction for sale and for occupancy by such purchaser
6 or a member or members of his family, upon the following
7 terms:

8 “(A) The purchaser shall pay at least (i) a pro rata
9 share cost of any services furnished him by the public agency,
10 including but not limited to, administration, maintenance,
11 repairs, utilities, insurance, provision of reserves, and other
12 expenses, (ii) local taxes on his dwelling unit, and (iii)
13 monthly payments of interest and principal sufficient to
14 amortize a sales price, equal to the greater of the unamor-
15 tized debt or the appraised value (at the time such purchase
16 contract is entered into) of the dwelling unit, in not more
17 than forty years: *Provided*, That the public housing agency
18 may, under terms and conditions to be prescribed by it,
19 permit a purchaser to apply an amount equal to the net
20 rent paid for his dwelling unit, over a period not exceeding
21 three years prior to the entering into of any such contract,
22 toward the purchase price of such unit;

23 “(B) The interest rate shall be fixed at not less than
24 the average interest cost of loans outstanding on the project,
25 except that in the case of a project on which bonds are not

1 outstanding the interest rate shall be fixed at not less than
2 the going Federal rate applicable to such project;

3 “(C) The principal payments shall be not less than
4 one-half of 1 per centum per annum of the sales price during
5 the first five years after purchase, 1 per centum per annum
6 during the next five years, $1\frac{1}{2}$ per centum per annum during
7 the third five years, and thereafter not less than the principal
8 payments resulting from a level debt service of interest and
9 principal over the balance of the payment period; and

10 “(D) If at any time (i) a purchaser fails to carry out
11 his contract with the public housing agency and if no mem-
12 ber of his family who resides in the dwelling assumes such
13 contract, or (ii) if the purchaser or a member of his family
14 who assumes the contract does not reside in the dwelling, the
15 public housing agency shall have an option to acquire his
16 interest under such contract upon payment to him or his
17 estate of an amount equal to his aggregate principal pay-
18 ments plus the value to the public housing agency of any
19 improvements made by him, less an amount equal to $2\frac{1}{2}$ per
20 centum of the sales price.”

21 (b) Such Act is further amended—

22 (1) by inserting in the parenthetical phrase in sec-
23 tion 10 (h) after the words “exclusive of” the following:

24 “any part thereof covered by a contract or conveyed

1 pursuant to paragraph (9) of section 15, and exclusive
2 of”;

3 (2) by inserting after “may be made” in section
4 10 (1) the following: “, subject to any outstanding con-
5 tracts made pursuant to paragraph (9) of section 15,”;

6 (3) by inserting after “acquisition”, the first place
7 it appears in paragraphs (1), (2), and (3) of section
8 15, the following: “(except pursuant to paragraph (9)
9 of section 15) ”; and

10 (4) by inserting before the semicolon at the end
11 of paragraph (1) of section 22 (a) a colon and the
12 following: “*Provided*, That such conveyance or delivery
13 of title shall be subject to the rights of third parties
14 vested pursuant to paragraph (9) of section 15”.

15 TITLE V—COLLEGE HOUSING

16 INCREASE IN AUTHORIZATION FOR COLLEGE HOUSING

17 LOANS

18 SEC. 501. Section 401 (d) of the Housing Act of 1950
19 is amended to read as follows:

20 “(d) To obtain funds for loans under subsection (a)
21 of this section, the Administrator may issue and have out-
22 standing at any one time notes and obligations for purchase
23 by the Secretary of the Treasury in an amount not to ex-
24 ceed \$2,985,000,000, which amount shall be increased by
25 \$285,000,000 on July 1 in each of the years 1966 and

1 1967, and by \$275,000,000 on July 1, 1968: *Provided*,
 2 That the amount outstanding for other educational facilities,
 3 as defined herein, shall not exceed \$295,000,000, which
 4 limit shall be increased by \$30,000,000 on July 1 in each
 5 of the years 1965 through 1968: *Provided further*, That
 6 the amount outstanding for hospitals, referred to in clause
 7 (2) of section 404 (b) of this title, shall not exceed
 8 \$220,000,000, which limit shall be increased by \$15,000,000
 9 on July 1 in each of the years 1965 through 1968.”

10 PARTICIPATION BY NEW COLLEGES

11 SEC. 502. Section 404 (b) of the Housing Act of 1950
 12 is amended by striking out “institution offering” in clause
 13 (1) and inserting in lieu thereof the following: “institution
 14 which offers, or provides satisfactory assurance to the Ad-
 15 ministrator that it will offer within a reasonable time after
 16 completion of a facility for which assistance is requested
 17 under this title,”.

18 TITLE VI—GRANTS FOR BASIC PUBLIC WORKS, 19 NEIGHBORHOOD FACILITIES, AND THE AD- 20 VANCE ACQUISITION OF LAND

21 PURPOSE

22 SEC. 601. The purpose of this title is to assist and en-
 23 courage the communities of the Nation fully to meet the needs
 24 of their citizens by making it possible, with Federal grant
 25 assistance, for their governmental bodies (1) to construct

1 adequate basic water and sewer facilities needed to promote
2 the efficient and orderly growth and development of our com-
3 munities, (2) to construct neighborhood facilities needed to
4 enable them to carry on programs of necessary social serv-
5 ices, and (3) to acquire, in a planned and orderly fashion,
6 land to be utilized in connection with the future construction
7 of public works and facilities.

8 GRANTS FOR BASIC WATER AND SEWER FACILITIES

9 SEC. 602. (a) The Housing and Home Finance Ad-
10 ministrator (hereinafter in this title referred to as the "Ad-
11 ministrator") is authorized to make grants to local public
12 bodies and agencies to finance specific projects for basic
13 public water facilities (including works for the storage, treat-
14 ment, purification, and distribution of water), and for basic
15 public sewer facilities (other than "treatment works" as
16 defined in the Federal Water Pollution Control Act) : *Pro-*
17 *vided*, That no grant shall be made under this section for
18 any sewer facilities unless the Secretary of Health, Educa-
19 tion, and Welfare certifies to the Administrator that any
20 waste material carried by such facilities will be adequately
21 treated before it is discharged into any public waterway so
22 as to meet applicable Federal, State, interstate, or local
23 water quality standards.

24 (b) The amount of any grant made under the authority
25 of this section shall not exceed 50 per centum of the develop-

1 ment cost of the project: *Provided*, That in the case of a
2 community having a population of less than ten thousand,
3 according to the most recent decennial census, which is
4 situated within a metropolitan area, the Administrator may
5 increase the amount of a grant for a basic public sewer
6 facility assisted under this section to not more than 90 per
7 centum of the development cost of such facility, if the com-
8 munity is unable to finance the construction of such facility
9 without the increased grant authorized under this subsection,
10 and if in such community (1) there does not exist a public
11 or other adequate sewer facility which serves a substantial
12 portion of the inhabitants of the community, and (2) the
13 rate of unemployment is, and has been continuously for
14 the preceding calendar year, 100 per centum above the
15 national average: *And provided further*, That the limitations
16 and restrictions contained in subsection (c) of this section
17 shall not be applicable to any community applying for an
18 increased grant under this subsection.

19 (c) No grant shall be made under this section in con-
20 nection with any project unless the Administrator determines
21 that the project is necessary to provide adequate water or
22 sewer facilities for, and will contribute to the improvement
23 of the health or living standards of, the people in the com-
24 munity to be served, and that the project is (1) designed so
25 that an adequate capacity will be available to serve the rea-

1 sonably foreseeable growth needs of the area; (2) consistent
2 with a program meeting criteria, established by the Admin-
3 istrator, for a unified or officially coordinated areawide water
4 or sewer facilities system as part of the comprehensively
5 planned development of the area, except that prior to July 1,
6 1968, grants may, in the discretion of the Administrator, be
7 made under this section when such a program for an area-
8 wide water and sewer facilities system is under active prep-
9 aration, although not yet completed, if the facility or facilities
10 for which assistance is sought can reasonably be expected
11 to be required as a part of such program, and there is urgent
12 need for the facility or facilities; and (3) necessary to
13 orderly community development.

14 GRANTS FOR NEIGHBORHOOD FACILITIES

15 SEC. 603. (a) In accordance with the provisions of this
16 section, the Administrator is authorized to make grants to
17 any local public body or agency to assist in financing specific
18 projects for neighborhood facilities. Any such project may
19 be undertaken by such body or agency directly or through
20 a nonprofit organization approved by it: *Provided*, That
21 no grant shall be provided under this section for any project
22 to be undertaken through a nonprofit organization unless the
23 Administrator determines (1) that such organization has
24 or will have the legal, financial, and technical capacity to
25 carry out the project, and (2) that the public body or agency

1 to which the grant is made will have satisfactory continuing
2 control over the use of the proposed facilities.

3 (b) The amount of any grant made under the authority
4 of this section shall not exceed $66\frac{2}{3}$ per centum of the devel-
5 opment cost of the project for which the grant is made (or 75
6 per centum of such cost in the case of a project located in
7 an area which at the time the grant is made is designated
8 as a redevelopment area under the Area Redevelopment
9 Act or any Act supplementary thereto.

10 (c) No grant shall be made under this section for any
11 project unless the Administrator determines that the project
12 will provide a neighborhood facility which is (1) necessary
13 for carrying out a program of health, recreational, social, or
14 similar community service (including a community action
15 program approved under title II of the Economic Opportu-
16 nity Act of 1964) in the area, (2) consistent with compre-
17 hensive planning for the development of the community, and
18 (3) so located as to be available for use by a significant por-
19 tion (or number in the case of large urban places) of the
20 area's low- or moderate-income residents.

21 (d) For a period of twenty years after a grant has been
22 made under this section for a neighborhood facility, such
23 facility shall not, without the approval of the Administrator,
24 be converted to uses other than those proposed by the ap-

1 plicant in its application for a grant. The Administrator
2 shall not approve any conversion in the use of such a neigh-
3 borhood facility during such twenty-year period unless he
4 finds that such conversion is in accordance with the then
5 applicable program of health, recreational, social, or similar
6 community services in the area and consistent with com-
7 prehensive planning for the development of the community
8 in which the facility is located. In approving any such
9 conversion, the Administrator may impose such additional
10 conditions and requirements as he deems necessary.

11 (e) The Administrator shall give priority to applica-
12 tions for projects designed primarily to benefit members of
13 low-income families or otherwise substantially further the
14 objectives of a community action program approved under
15 title II of the Economic Opportunity Act of 1964.

16 ADVANCE ACQUISITION OF LAND

17 SEC. 604. (a) In order to encourage and assist in the
18 timely acquisition of land planned to be utilized in connection
19 with the future construction of public works or facilities, the
20 Administrator is authorized to make grants to local public
21 bodies and agencies to assist in financing the acquisition of
22 a fee simple estate or other interest in such land.

23 (b) The amount of any grant made under the authority
24 of this section shall not exceed the aggregate amount of
25 reasonable interest charges on the loan or other financial

1 obligation incurred to finance the acquisition of such land
2 for a period not exceeding the lesser of (1) five years
3 from the date such loan was made or such financial obliga-
4 tion was incurred, or (2) the period of time between the
5 date such loan was made or such financial obligation was
6 incurred and the date construction is begun on the public
7 work or facility for which the land acquired was planned
8 to be utilized.

9 (c) No grant shall be made under this section for any
10 project for the acquisition of land unless the Administrator
11 determines that the public work or facility for which such
12 land is to be utilized is planned to be constructed or initiated
13 within a reasonable period of time (not to exceed five years
14 after a contract to make such grant is entered into) and
15 that construction of such public work or facility will contrib-
16 ute to economy, efficiency, and the comprehensively planned
17 development of the area.

18 (d) As a condition to providing assistance under this
19 section, the Administrator may, under terms and conditions
20 prescribed by him, require an applicant to agree to repay
21 such assistance, if (1) the land purchased with such assist-
22 ance is not utilized within five years after the agreement
23 is entered into in connection with the construction of the
24 public work or facility for which such land was acquired
25 or (2) such land is diverted to other uses.

1

GENERAL PROVISIONS

2

SEC. 605. (a) In the performance of, and with respect
3 to, the functions, powers, and duties vested in him by this
4 title, the Administrator shall (in addition to any authority
5 otherwise vested in him) have the functions, powers, and
6 duties set forth in section 402, except subsections (a), (c)
7 (2), and (f) of the Housing Act of 1950.

8

(b) The Administrator is authorized, notwithstanding
9 the provisions of section 3648 of the Revised Statutes, to
10 make advance or progress payments on account of any grant
11 made pursuant to this title. No part of any grant authorized
12 to be made by the provisions of this title shall be used for the
13 payment of ordinary governmental operating expenses.

14

DEFINITIONS

15

SEC. 606. As used in this title—

16

(a) The term "State" means the several States, the Dis-
17 trict of Columbia, the Commonwealth of Puerto Rico, and
18 the territories and possessions of the United States.

19

(b) The term "local public bodies and agencies" in-
20 cludes public corporate bodies or political subdivisions; public
21 agencies or instrumentalities of one or more States, munici-
22 palities, or political subdivisions of one or more States (in-
23 cluding public agencies and instrumentalities of one or more
24 municipalities or other political subdivisions of one or more
25 States); Indian tribes; and boards or commissions estab-

1 lished under the laws of any State to finance specific capital
2 improvement projects.

3 (c) The term "development cost" means the cost of
4 constructing the facility and of acquiring the land on which
5 it is located, including necessary site improvements to permit
6 its use as a site for the facility.

7 LABOR STANDARDS

8 SEC. 607. All laborers and mechanics employed by con-
9 tractors or subcontractors on projects assisted under sections
10 602 and 603 shall be paid wages at rates not less
11 than those prevailing on similar construction in the locality
12 as determined by the Secretary of Labor in accordance
13 with the Davis-Bacon Act, as amended (40 U.S.C. 276a—
14 276a-5). No such project shall be approved without first
15 obtaining adequate assurance that these labor standards will
16 be maintained upon the construction work. The Secretary
17 of Labor shall have, with respect to the labor standards speci-
18 fied in this section, the authority and functions set forth
19 in Reorganization Plan Numbered 14 of 1950 (15 F.R.
20 3176; 64 Stat. 1267; 5 U.S.C. 133z-15), and section 2
21 of the Act of June 13, 1934, as amended (48 Stat. 948;
22 40 U.S.C. 276c).

23 APPROPRIATIONS

24 SEC. 608. (a) There are authorized to be appropriated
25 for grants under section 602 not to exceed (1) \$100,000,000

1 for the fiscal year commencing July 1, 1965, and (2)
2 \$200,000,000 for each fiscal year commencing after June
3 30, 1966, and ending prior to July 1, 1969.

4 (b) There are authorized to be appropriated for each
5 fiscal year commencing after June 30, 1965, and ending
6 prior to July 1, 1969, not to exceed (1) \$50,000,000 for
7 grants under section 603, and (2) \$25,000,000 for grants
8 under section 604.

9 (c) Any amounts appropriated under this section shall
10 remain available until expended, and any amounts authorized
11 for any fiscal year under this section but not appropriated
12 may be appropriated for any succeeding fiscal year com-
13 mencing prior to July 1, 1969.

14 TITLE VII—FEDERAL NATIONAL MORTGAGE
15 ASSOCIATION

16 INCREASE IN SPECIAL ASSISTANCE AUTHORITY

17 SEC. 701. (a) Section 305 (c) of the National Housing
18 Act is amended by inserting before the period at the end
19 thereof a comma and the following: “, which limit shall be
20 increased by \$100,000,000 on the date of enactment of the
21 Housing and Urban Development Act of 1965, by \$450,-
22 000,000 on July 1, 1966, by \$550,000,000 on July 1, 1967,
23 and by \$525,000,000 on July 1, 1968”.

24 (b) Section 305 (f) of such Act is amended by inserting
25 before the period at the end thereof the following: “:

1 *Provided further*, That any portion of the total amount
 2 of authority set forth in the first proviso of this subsection,
 3 which (1) is not required under the second proviso of this
 4 subsection to be kept available for purchases and commit-
 5 ments with respect to mortgages insured under section 809,
 6 and (2), on the date of enactment of the Housing and Urban
 7 Development Act of 1965 and on each July 1 thereafter,
 8 would otherwise be available for making new purchases and
 9 commitments pursuant to this subsection, shall be transferred
 10 to and merged with the authority granted by subsection (a)
 11 and added to the amount of such authority which is available,
 12 as of the date of the transfer, for purchases and commitments
 13 under subsection (c) ; and the total amount of authority as
 14 set forth in the first proviso of this subsection shall pro-
 15 gressively be reduced by the amount of each such transfer”.

16 PURCHASE OF MORTGAGES HELD BY FEDERAL

17 INSTRUMENTALITIES

18 SEC. 702. (a) Section 302 of the National Housing
 19 Act is amended by—

20 (1) striking out “Federal,” in clause (2) in sub-
 21 section (b) ;

22 (2) inserting before “first mortgages” in the first
 23 sentence of subsection (c) the following: “obligations
 24 offered to it by the Housing and Home Finance Agency

1 or its Administrator, or by such Agency's constituent
2 units or agencies or the heads thereof, or any"; and

3 (3) inserting "and other obligations" after "mort-
4 gages" in the last sentence of subsection (c).

5 (b) Section 306 (e) of such Act is amended to read
6 as follows:

7 “(e) Notwithstanding any other provision of law, the
8 Association is authorized, under the aforesaid separate ac-
9 countability, to make commitments to purchase, and to pur-
10 chase, service, or sell any obligations offered to it by the
11 Housing and Home Finance Agency or its Administrator, or
12 by such Agency's constituent units or agencies or the heads
13 thereof, or any mortgages covering residential property
14 offered to it by any Federal instrumentality, or the head
15 thereof. There shall be excluded from the total amounts
16 set forth in subsection (c) the amounts of any obligations or
17 mortgages purchased by the Association pursuant to this
18 subsection.”

19 PURCHASE OF BELOW-MARKET INTEREST RATE MORTGAGES
20 COVERING PROPERTIES LOCATED IN URBAN RENEWAL
21 AREAS

22 SEC. 703. Section 302 (b) of the National Housing Act
23 is amended by inserting after "urban renewal area," in clause
24 (3) the following: "or a below-market interest rate mortgage

1 insured under section 221 (d) (3) and covering property
2 located in an urban renewal area.”.

3 TITLE VIII—OPEN-SPACE LAND AND URBAN
4 BEAUTIFICATION AND IMPROVEMENT

5 CHANGE IN NAME OF PROGRAM; FINDINGS AND PURPOSE

6 SEC. 801. (a) The heading of title VII of the Housing
7 Act of 1961 is amended to read as follows: “TITLE VII—
8 OPEN-SPACE LAND AND URBAN BEAUTIFICA-
9 TION AND IMPROVEMENT”.

10 (b) Section 701 of such Act is amended by redesignig-
11 nating subsection (b) as subsection (c) and inserting after
12 subsection (a) a new subsection as follows:

13 “(b) The Congress further finds that there is an urgent
14 need both for the additional provision of parks and other
15 open-space areas in the developed portions of the Nation’s
16 urban areas and for greater and better coordinated local
17 efforts to beautify and improve open space and other public
18 land throughout urban areas to facilitate their increased use
19 and enjoyment by the Nation’s urban population.”

20 (c) Section 701 (c) of such Act (as redesignated by
21 subsection (b) of this section) is amended by—

22 (1) striking out “preserve” and inserting in lieu
23 thereof “(1) provide, preserve, and develop”; and

24 (2) striking out “purposes.” and inserting in lieu

1 thereof “uses, and (2) beautify and improve open space
2 and other public urban land, in accordance with pro-
3 grams to encourage and coordinate local public and
4 private efforts toward this end.”

5 DEVELOPMENT GRANTS FOR OPEN-SPACE USES

6 SEC. 802. (a) The first sentence of section 702 (a) of
7 the Housing Act of 1961 is amended—

8 (1) by inserting “and development” after “acqui-
9 sition” the first place it appears; and

10 (2) by inserting before the period the following:
11 “, and the development, for open-space uses, of land
12 acquired under this title”.

13 (b) Section 702 (c) of such Act is amended by strik-
14 ing out “development costs or”.

15 (c) Section 706 of such Act is amended by adding at
16 the end thereof the following:

17 “(4) The term ‘open-space uses’ means any use
18 of open-space land for (A) park and recreational pur-
19 poses, (B) conservation of land and other natural re-
20 sources, or (C) historic or scenic purposes.”

21 INCREASED GRANT LEVEL FOR PRESERVATION AND DEVEL-
22 OPMENT OF OPEN-SPACE LAND

23 SEC. 803. The second sentence of section 702 (a) of the
24 Housing Act of 1961 is amended to read as follows: “The
25 amount of any such grant shall not exceed 50 per centum

1 of the total cost, as approved by the Administrator, of
2 such acquisition and development."

3 CONTRACT AUTHORIZATION

4 SEC. 804. Section 702 (b) of the Housing Act of 1961
5 is amended by striking out "\$75,000,000" and inserting in
6 lieu thereof the following: "\$310,000,000: *Provided*, That
7 of such sum the Administrator may contract to make
8 grants under section 705 aggregating not to exceed \$64,-
9 000,000, and grants under section 706 aggregating not to
10 exceed \$36,000,000".

11 OPEN-SPACE PLANNING AND PROGRAM REQUIREMENTS

12 SEC. 805. Section 703 (a) of the Housing Act of 1961
13 is amended to read as follows:

14 "SEC. 703. (a) The Administrator shall enter into con-
15 tracts to make grants under sections 702 and 705 of this title
16 only if he finds that such assistance is needed for carrying out
17 a unified or officially coordinated program, meeting criteria
18 established by him, for the provision and development of
19 open-space land as part of the comprehensively planned
20 development of the urban area."

21 GRANTS FOR PROVISION OF OPEN-SPACE LAND IN BUILT-UP

22 URBAN AREAS AND FOR URBAN BEAUTIFICATION AND

23 IMPROVEMENT

24 SEC. 806. Title VII of the Housing Act of 1961 is
25 amended by redesignating sections 705 and 706 as sections

1 707 and 708, respectively, and by inserting after section 704
2 two new sections as follows:

3 "GRANTS FOR PROVISION OF OPEN-SPACE LAND IN BUILT-
4 UP URBAN AREAS

5 "SEC. 705. (a) The Administrator is further authorized
6 to enter into contracts to make grants to States and local
7 public bodies to help finance the acquisition of title to, or
8 other permanent interests in, developed land in built-up
9 portions of urban areas to be cleared and used as permanent
10 open-space land. The Administrator shall make such grants
11 only where the local governing body determines that ade-
12 quate open-space land cannot effectively be provided through
13 the use of existing undeveloped or predominantly undevel-
14 oped land. Grants under this section shall not exceed 50
15 per centum of the cost of acquiring such interests and of neces-
16 sary demolition and removal of improvements.

17 " (b) Financial assistance extended to any project under
18 this title may include grants for relocation payments, as
19 herein defined. Such grants may be in addition to other
20 financial assistance under this title, and no part of the
21 amount of such relocation payments shall be required to be
22 contributed as a local grant. The term 'relocation payments'
23 means payments by the applicant which are (1) made to
24 an individual, family, business concern, or nonprofit organi-
25 zation displaced, after March 4, 1965, by a project assisted

1 under this title; (2) not otherwise authorized under any
2 Federal law; and (3) made only on such terms and condi-
3 tions and subject to such limitations (to the extent appli-
4 cable, but not including the date of displacement) as are
5 provided for relocation payments, at the time such payments
6 are approved, by sections 114 (b) and (c) of the Housing
7 Act of 1949. Relocation payments authorized by this sub-
8 section shall be made subject to such rules and regulations
9 as may be prescribed by the Administrator.

10 "GRANTS FOR URBAN BEAUTIFICATION AND IMPROVEMENT

11 "SEC. 706. The Administrator is authorized to enter
12 into contracts to make grants, as herein provided, to
13 States and local public bodies to assist in carrying out
14 local programs for the greater use and enjoyment of
15 open-space and other public land in urban areas. The
16 Administrator shall establish criteria for such programs
17 to assure that each program (1) represents significant
18 and effective efforts, involving all available public and
19 private resources, for the beautification of such land and
20 its improvement for open-space uses; and (2) is important
21 to the comprehensively planned development of the locality.
22 Grants made under this section shall not exceed 50 per
23 centum of the amount by which the cost of the activities
24 carried on by an applicant during a fiscal year under an
25 approved program exceeds its usual expenditures for com-

1 parable activities: *Provided*, That, notwithstanding any
 2 other provision of this section, the Administrator may use
 3 not to exceed \$5,000,000 of the sum authorized for contracts
 4 under this section for the purpose of entering into contracts to
 5 make grants in amounts not to exceed two-thirds of the cost
 6 of activities which he determines have special value in devel-
 7 oping and demonstrating new and improved methods and
 8 materials for use in carrying out the purposes of this section."

9 USE OF FUNDS FOR STUDIES AND PUBLICATION

10 SEC. 807. The second sentence of section 707 of the
 11 Housing Act of 1961 (as redesignated by section 806 of
 12 this Act) is amended to read as follows: "The Administra-
 13 tor is authorized to use during any fiscal year not to exceed
 14 \$50,000 of the funds available for grants under this title to
 15 undertake such studies and publish such information."

16 CONFORMING AMENDMENTS

17 SEC. 808. (a) The heading of section 702 of the Hous-
 18 ing Act of 1961 is amended to read as follows: "GRANTS
 19 FOR PRESERVATION AND DEVELOPMENT OF OPEN-SPACE
 20 LAND".

21 (b) Section 702 (a) of such Act is amended by striking
 22 out "acceptable to the Administrator as capable of carrying
 23 out the provisions of this title".

24 (c) Section 702 (e) of such Act is amended by striking

1 out in the second sentence “served by the open-space land
2 acquired” and inserting in lieu thereof “assisted”.

3 (d) Section 704 of such Act is amended by striking
4 out in the first sentence “for which” and inserting in lieu
5 thereof “for the acquisition of which”.

6 TITLE IX—RURAL HOUSING

7 LOANS FOR PREVIOUSLY OCCUPIED BUILDINGS AND

8 MINIMUM SITE ACQUISITION

9 SEC. 901. (a) Section 501 (a) of the Housing Act of
10 1949 is amended by—

11 (1) inserting after “their farms” in clause (1)
12 the following: “and to purchase previously occupied
13 buildings and land constituting a minimum adequate
14 site, in order”; and

15 (2) inserting after “rural areas” in clause (2) the
16 following: “for the construction, improvement, altera-
17 tion, or repair of dwellings, related facilities, and farm
18 buildings and to rural residents for the same purposes
19 and for the purchase of previously occupied buildings
20 and the purchase of land constituting a minimum ade-
21 quate site, in order”.

22 (b) Section 501 (c) of such Act is amended by in-
23 serting after “rural area”, the first place it appears in clause
24 (1), the following: “or is a rural resident”.

1 INTEREST RATE ON DIRECT RURAL HOUSING LOANS

2 SEC. 902. Section 502 (a) of the Housing Act of 1949
3 is amended by striking out “with interest at a rate not to
4 exceed 4 per centum per annum on the unpaid balance of
5 principal” and inserting in lieu thereof the following: “with
6 interest, in the case of applicants described in clauses (1)
7 and (2) of section 501 (a), at a rate not to exceed 5 per
8 centum per annum on the unpaid balance of principal, and,
9 in the case of applicants described in clause (3) of section
10 501 (a) and applicants under sections 503 and 504, at a
11 rate not to exceed 4 per centum per annum on such unpaid
12 balance. Loans made or insured under this title shall be
13 conditioned on the borrower paying such fees and other
14 charges as the Secretary may require”.

15 INSURED RURAL HOUSING LOANS

16 SEC. 903. (a) Title V of the Housing Act of 1949 is
17 amended by adding at the end thereof the following new
18 sections:

19 “INSURED RURAL HOUSING LOANS

20 “SEC. 517. (a) The Secretary may insure loans meeting
21 the requirements of section 502, and may make loans in
22 accordance with the requirements of such section to be sold
23 and insured; except that such loans shall—

24 “(1) if the borrowers are persons of low or mod-
25 erate income (as defined by the Secretary), (A) not

1 exceed amounts necessary to provide adequate housing,
2 modest in size, design, and cost (as determined by the
3 Secretary), (B) bear interest at a rate not to exceed
4 5 per centum per annum, and (C) not exceed in the
5 aggregate \$300,000,000 of new loans made or insured
6 in any one fiscal year; and

7 “(2) if the borrowers are persons other than those
8 described in clause (1), bear interest and provide for
9 insurance or service charges at rates comparable to the
10 combined rate of interest and premium charges in effect
11 under section 203 of the National Housing Act, as deter-
12 mined by the Secretary.

13 “(b) The Secretary may insure loans in accordance with
14 the requirements of sections 514 (exclusive of subsections
15 (a) (3), (a) (5), and (b)) and 515 (exclusive of subsec-
16 tions (a) and (b) (4)), and may make loans meeting such
17 requirements to be sold and insured. Upon the expiration of
18 ninety days after the original capitalization of the Rural
19 Housing Insurance Fund, created by subsection (e) of this
20 section, no new loans shall be made or insured under section
21 514 or 515 (b), except in conformity with this section.

22 “(c) The Secretary may use the Rural Housing In-
23 surance Fund for the purpose of making loans to be sold
24 and insured under this section, but the aggregate of such

1 loans which are held by the Secretary at any one time shall
2 not exceed \$100,000,000.

3 “(d) The Secretary may, in conformity with subsec-
4 tions (a) and (b), insure the payment of principal and in-
5 terest as it becomes due on loans made by lenders other
6 than the United States, and on loans made from the Rural
7 Housing Insurance Fund which are sold by the Secretary.
8 Any contract of insurance executed by the Secretary here-
9 under shall be an obligation supported by the full faith and
10 credit of the United States, and shall be incontestable except
11 for fraud or misrepresentation of which the holder has actual
12 knowledge. In connection with loans insured under this sec-
13 tion, the Secretary may take liens running to the United
14 States notwithstanding the fact that the notes evidencing such
15 loans may be held by lenders other than the United States.
16 Notes evidencing such loans shall be freely assignable, but
17 the Secretary shall not be bound by any such assignment
18 until notice thereof is given to and acknowledged by him.

19 “(e) There is hereby created the Rural Housing In-
20 surance Fund (hereinafter referred to as the ‘Fund’) which
21 shall be used by the Secretary as a revolving fund for carry-
22 ing out the provisions of this section. There are authorized
23 to be appropriated to the Secretary such sums as may be
24 necessary for the purposes of the Fund.

25 “(f) Money in the Fund not needed for current opera-

1 tions shall be invested in direct obligations of the United
2 States or obligations guaranteed by the United States.

3 “(g) All funds, claims, notes, mortgages, contracts, and
4 property acquired by the Secretary under this section, and
5 all collections and proceeds therefrom, shall constitute assets
6 of the Fund; and all liabilities and obligations of such assets
7 shall be liabilities and obligations of the Fund. Loans may
8 be held in the Fund and collected in accordance with their
9 terms or may be sold by the Secretary with or without agree-
10 ments for insurance thereof. The Secretary is authorized to
11 make agreements with respect to servicing loans held or in-
12 sured by him under this section and purchasing such insured
13 loans on such terms and conditions as he may prescribe.

14 “(h) The Secretary is authorized to issue notes to the
15 Secretary of the Treasury to obtain funds necessary for
16 discharging obligations under this section and for author-
17 ized expenditures out of the Fund, but, except as may be
18 authorized in appropriation Acts, not for the original or
19 any additional capital of the Fund. Such notes shall be
20 in such form and denominations and have such maturities
21 and be subject to such terms and conditions as may be pre-
22 scribed by the Secretary with the approval of the Secretary
23 of the Treasury. Each note shall bear interest at the average
24 rate, as determined by the Secretary of the Treasury, pay-

1 able by the Treasury upon its marketable public obligations
2 outstanding at the beginning of the fiscal year in which such
3 note is issued, which are neither due nor callable for redemp-
4 tion for fifteen years from their date of issue. The Secretary
5 of the Treasury is authorized and directed to purchase any
6 notes of the Secretary issued hereunder, and for that purpose
7 the Secretary of the Treasury is authorized to use as a public
8 debt transaction the proceeds from the sale of any securities
9 issued under the Second Liberty Bond Act, as amended, and
10 the purposes for which such securities may be issued under
11 such Act are extended to include purchases of notes issued by
12 the Secretary. All redemptions, purchases, and sales by the
13 Secretary of the Treasury of such notes shall be treated as
14 public debt transactions of the United States. The notes
15 issued by the Secretary to the Secretary of the Treasury
16 shall constitute obligations of the Fund.

17 “(i) The Secretary may retain out of interest payments
18 by the borrower an annual charge in an amount specified
19 in the insurance or sale agreement applicable to the loan.
20 Of the charges retained by the Secretary, if any, not to
21 exceed 1 per centum per annum of the unpaid balance of the
22 loan shall be deposited in the Fund. Any retained charges
23 not deposited in the Fund shall be available for administrative
24 expenses in carrying out the provisions of this title, to be
25 transferred annually and become merged with any appro-

1 priation for administrative expenses of the Farmers Home
2 Administration, when and in such amounts as may be
3 authorized in appropriation Acts.

4 “(j) The Secretary may also utilize the Fund—

5 “(1) to pay amounts to which the holder of the
6 note is entitled in accordance with an insurance or sale
7 agreement under this section accruing between the date
8 of any prepayment by the borrower to the Secretary and
9 the date of transmittal of any such prepayments to the
10 holder of the note; and in the discretion of the Secretary,
11 prepayments other than final payments need not be
12 remitted to the holder until due;

13 “(2) to pay the holder of any note insured under
14 this section any defaulted installment or, upon assign-
15 ment of the note to the Secretary at the Secretary’s
16 request, or pursuant to a purchase agreement, the entire
17 balance outstanding on the note; and

18 “(3) to pay taxes, insurance, prior liens, expenses
19 necessary to make fiscal adjustments in connection with
20 the application and transmittal of collections, and other
21 expenses and advances to protect the security for loans
22 which are insured under this section or held in the Fund,
23 and to acquire such security property at foreclosure sale
24 or otherwise.

1 “RURAL HOUSING DIRECT LOAN ACCOUNT

2 “SEC. 518. (a) There is hereby created the Rural Hous-
3 ing Direct Loan Account (hereinafter referred to as the
4 ‘Account’) which shall be used by the Secretary for carry-
5 ing out the provisions of this section. There are authorized
6 to be appropriated to the Secretary such sums as may be
7 necessary for the purposes of the Account.

8 “(b) There are transferred to the Account (1) all
9 funds, claims, notes, mortgages, contracts, and property,
10 and all collections and proceeds therefrom, held by the
11 Secretary under the direct loan provisions of this title, in-
12 cluding those securing notes issued by the Secretary to the
13 Secretary of the Treasury under section 511 and any un-
14 expended balance of amounts borrowed upon such notes,
15 and (2) all unexpended balances of appropriations for direct
16 loans under this title, including the fund authorized by sec-
17 tion 515 (a). All amounts hereafter borrowed by the
18 Secretary from the Secretary of the Treasury under section
19 511 shall be deposited in the Account. All collections and
20 proceeds from assets acquired by the Account shall be
21 deposited in the Account.

22 “(c) When and in such amounts as may be authorized
23 in appropriation Acts, the Secretary may issue notes to the
24 Secretary of the Treasury to obtain funds to be deposited in
25 the Account. The form, denominations, maturities, and other

1 terms and conditions of such notes shall be prescribed by
2 the Secretary with the approval of the Secretary of the
3 Treasury. Each note shall bear interest at the average rate
4 determined by the Secretary of the Treasury, payable by the
5 Treasury upon its marketable public obligations outstanding
6 at the beginning of the fiscal year in which such note is is-
7 sued, which are neither due nor callable for redemption for
8 fifteen years from their date of issue. The Secretary of the
9 Treasury is authorized and directed to purchase any notes of
10 the Secretary issued hereunder, and for that purpose the
11 Secretary of the Treasury is authorized to use as a public
12 debt transaction the proceeds from the sale of any securities
13 issued under the Second Liberty Bond Act, as amended, and
14 the purposes for which such securities may be issued under
15 such Act are extended to include the purchase of notes issued
16 by the Secretary. All redemptions, purchases, and sales by
17 the Secretary of the Treasury of such notes shall be treated
18 as public debt transactions of the United States.

19 “(d) The Account shall remain available to the Secre-
20 tary for the payment of interest and principal on notes issued
21 by the Secretary to the Secretary of the Treasury under sec-
22 tion 511 or this section, and for direct loans and related ad-
23 vances under this title in such amounts as are now author-
24 ized by law and in such further amounts as shall be authorized

1 in appropriation Acts. Amounts so authorized for such loans
2 and advances shall remain available until expended.”

3 (b) Section 511 of such Act is amended by—

4 (1) striking out the first sentence and inserting in
5 lieu thereof “The Secretary may issue notes and other
6 obligations for purchase by the Secretary of the Treas-
7 ury for the purpose of making direct loans under this
8 title.”;

9 (2) striking out the second sentence and inserting
10 in lieu thereof “The total principal amount of such
11 notes and obligations issued pursuant to this section dur-
12 ing the period beginning July 1, 1956, and ending
13 October 1, 1969, shall not exceed \$850,000,000.”; and

14 (3) striking out the fifth sentence and inserting in
15 lieu thereof the following “Each such note or other
16 obligation shall bear interest at the average rate, as
17 determined by the Secretary of the Treasury, payable
18 by the Treasury upon its marketable public obligations
19 outstanding at the beginning of the fiscal year in which
20 such note or other obligation is issued, which are neither
21 due nor callable for redemption for 15 years from their
22 date of issue.”

1 PURCHASE OF RURAL HOUSING LOANS BY THE FEDERAL
2 NATIONAL MORTGAGE ASSOCIATION

3 SEC. 904. Section 302 (b) of the National Housing Act
4 is amended by inserting in the last sentence before the
5 period the following: "or title V of the Housing Act of
6 1949".

7 EXTENSION OF RURAL HOUSING AUTHORIZATIONS

8 SEC. 905. (a) Section 512 of the Housing Act of 1949
9 is amended by striking out "September 30, 1965" and in-
10 serting in lieu thereof "October 1, 1969".

11 (b) Section 513 of such Act is amended by—

12 (1) striking out "September 30, 1965" in clause

13 (b) and inserting in lieu thereof "October 1, 1969";

14 (2) striking out "\$10,000,000" and "September
15 30, 1965" in clause (c) and inserting in lieu thereof
16 "\$50,000,000" and "October 1, 1969", respectively;

17 and

18 (3) striking out "September 30, 1965" in clause

19 (d) and inserting in lieu thereof "October 1, 1969".

20 (c) Section 515 (b) (5) of such Act is amended by
21 striking out "September 30, 1965" and inserting in lieu
22 thereof "October 1, 1969".

1 (d) Section 506 (a) of such Act is amended by strik-
 2 ing out “sections 501 to 504, inclusive, and sections 514-
 3 516”, each place it occurs, and inserting in lieu thereof “this
 4 title”.

5 SUMS EXCESS TO THE NEEDS OF THE RURAL HOUSING
 6 INSURANCE FUND OR THE RURAL HOUSING DIRECT
 7 LOAN ACCOUNT

8 SEC. 906. Title V of the Housing Act of 1949 is
 9 amended by adding after section 518 (added by section 903
 10 of this Act) a new section as follows:

11 “SUMS EXCESS TO THE NEEDS OF THE RURAL HOUSING
 12 INSURANCE FUND OR THE RURAL HOUSING DIRECT
 13 LOAN ACCOUNT

14 “SEC. 519. Any sums in the Rural Housing Insurance
 15 Fund or the Rural Housing Direct Loan Account which the
 16 Secretary determines are in excess of amounts needed to
 17 meet the obligations and carry out the purposes of such Fund
 18 or Account shall be returned to miscellaneous receipts of the
 19 Treasury.”

20 TITLE X—MISCELLANEOUS

21 URBAN PLANNING GRANTS

22 SEC. 1001. (a) The fifth sentence of section 701 (b)
 23 of the Housing Act of 1954 is amended by striking out
 24 “\$105,000,000” and inserting in lieu thereof “\$230,000,-
 25 000”.

1 (b) Section 701 (b) of such Act is amended by striking
2 out the period at the end and inserting in lieu thereof the
3 following: “: *Provided*, That not to exceed 5 per centum
4 of any funds so appropriated may be used by the Adminis-
5 trator for studies, research, and demonstration projects for
6 the development and improvement of techniques and meth-
7 ods for comprehensive planning and for the advancement of
8 the purposes of this section.”

9 (c) (1) Section 701 of such Act is amended by adding
10 at the end thereof a new subsection as follows:

11 “(g) In addition to the planning grants authorized by
12 subsection (a), the Administrator is further authorized to
13 make grants to organizations composed of elected officials
14 whom he finds to be representative of the political jurisdic-
15 tions within a metropolitan area or urban region for the
16 purpose of assisting such organizations to undertake studies,
17 collect data, develop regional plans and programs, and en-
18 gage in such other activities as the Administrator finds nec-
19 essary or desirable for the solution of the metropolitan or
20 regional problems in such areas or regions. To the maxi-
21 mum extent feasible, all grants under this subsection shall
22 be for activities relating to all the developmental aspects of
23 the total metropolitan area or urban region, including, but
24 not limited to, land use, transportation, housing, economic

1 development, natural resources development, community fa-
 2 cilities, and the general improvement of living environments.
 3 A grant under this subsection shall not exceed two-thirds of
 4 the estimated cost of the work for which the grant is made.”

5 (2) Section 701 (b) of such Act is amended by strik-
 6 ing out “planning” in the fourth sentence.

7 AUTHORIZATION FOR FEDERAL-STATE TRAINING PROGRAMS

8 SEC. 1002. (a) Section 802 (d) of the Housing Act of
 9 1964 is amended by striking out “\$10,000,000” and insert-
 10 ing in lieu thereof “\$30,000,000”.

11 (b) The text of section 803 of such Act is amended to
 12 read as follows: “Not more than 10 per centum of the total
 13 amount appropriated for the purposes of this part may be
 14 used for making grants to any one State.”

15 AUTHORIZATION FOR PUBLIC WORKS PLANNING ADVANCES

16 SEC. 1003. The second sentence of section 702 (e) of
 17 the Housing Act of 1954 is amended by striking out
 18 “\$20,000,000” and inserting in lieu thereof “\$70,000,000”.

19 AUTHORIZATION FOR HOUSING FOR THE ELDERLY OR

20 HANDICAPPED

21 SEC. 1004. Section 202 (a) (4) of the Housing Act of
 22 1959 is amended by striking out “\$350,000,000” and insert-
 23 ing in lieu thereof “\$500,000,000”.

1 AUTHORIZATION FOR LOW-INCOME HOUSING DEMONSTRA-
2 TION PROGRAMS

3 SEC. 1005. Section 207 of the Housing Act of 1961 is
4 amended by striking out "\$10,000,000" and inserting in
5 lieu thereof "\$15,000,000".

6 ADVISORY COMMITTEES—TECHNICAL PROVISION

7 SEC. 1006. Section 601 of the Housing Act of 1949
8 is amended by striking out the second sentence.

9 PUBLIC FACILITY LOANS

10 SEC. 1007. (a) Section 202 (c) of the Housing Amend-
11 ments of 1955 is amended by adding at the end thereof the
12 following new sentence: "Notwithstanding any other provi-
13 sion of this title, the Administrator may extend financial
14 assistance, as otherwise authorized by clause (1) of subsec-
15 tion (a) of this section, to any private nonprofit corporation
16 to finance the construction of works for the storage, treat-
17 ment, purification, or distribution of water or the construc-
18 tion of sewage, sewage treatment, and sewer facilities, if
19 such works or facilities are needed to serve a smaller munic-
20 ipality or rural area, and there is no existing public body able
21 to construct and operate such works or facilities."

22 (b) Section 202 (b) (4) of such Amendments is
23 amended—

1 (1) by striking out the parenthetical phrase in
 2 clause (A) and inserting in lieu thereof the following:
 3 “(one hundred and fifty thousand or more in the case of
 4 a community situated in an area designated as a redevelop-
 5 ment area under the Area Redevelopment Act or any
 6 Act supplementary thereto)”; and

7 (2) by inserting after “public works or facilities”
 8 in the second sentence the following: “(i) in a com-
 9 munity in or near which is located a research or develop-
 10 ment installation of the National Aeronautics and Space
 11 Administration, or (ii)”.

12 LEASE GUARANTEES FOR CERTAIN SMALL BUSINESS

13 CONCERNS

14 SEC. 1008. (a) The Small Business Investment Act of
 15 1958 is amended by adding after title III a new title as
 16 follows:

17 “TITLE IV—LEASE GUARANTEES

18 “AUTHORITY OF THE ADMINISTRATION

19 “SEC. 401. (a) The Administration may, whenever it
 20 determines such action to be necessary or desirable, and
 21 upon such terms and conditions as it may prescribe, guarantee
 22 the payment of rentals under leases of commercial and in-
 23 dustrial property entered into by small business concerns
 24 that are (1) eligible for loans under section 7(b)(3) of
 25 the Small Business Act, or (2) eligible for loans under title

1 IV of the Economic Opportunity Act of 1964, to enable such
2 concerns to obtain such leases. Any such guarantee may be
3 made or effected either directly or in cooperation with any
4 qualified surety company or other qualified company through
5 a participation agreement with such company. The fore-
6 going powers shall be subject, however, to the following
7 restrictions and limitations:

8 “(1) No guarantee shall be issued by the Adminis-
9 tration (A) if a guarantee meeting the requirements
10 of the applicant is otherwise available on reasonable
11 terms, and (B) unless the Administration determines
12 that there exists a reasonable expectation that the small
13 business concern in behalf of which the guarantee is
14 issued will perform the covenants and conditions of
15 the lease.

16 “(2) The Administration shall, to the greatest ex-
17 tent practicable, exercise the powers conferred by this
18 section in cooperation with qualified surety or other
19 companies on a participation basis.

20 “(b) The Administration shall fix a uniform annual fee
21 for its share of any guarantee under this section which shall
22 be payable in advance at such time as may be prescribed by
23 the Administrator. The amount of any such fee shall be
24 determined in accordance with sound actuarial practices and

1 procedures, to the extent practicable, but in no case shall
2 such amount exceed, on the Administration's share of any
3 guarantee made under this title, $2\frac{1}{2}$ per centum per annum of
4 the minimum annual guaranteed rental payable under any
5 guaranteed lease: *Provided*, That the Administration shall
6 fix the lowest fee that experience under the program estab-
7 lished hereby has shown to be justified. The Administration
8 may also fix such uniform fees for the processing of applica-
9 tions for guarantees under this section as the Administrator
10 determines are reasonable and necessary to pay the adminis-
11 trative expenses that are incurred in connection therewith.

12 “(c) In connection with the guarantee of rentals under
13 any lease pursuant to authority conferred by this section, the
14 Administrator may require, in order to minimize the finan-
15 cial risk assumed under such guarantee—

16 “(1) that the lessee pay an amount, not to exceed
17 one-fourth of the minimum guaranteed annual rental
18 required under the lease, which shall be held in escrow
19 and shall be available (A) to meet rental charges accru-
20 ing in any month for which the lessee is in default, or
21 (B) if no default occurs during the term of the lease, for
22 application (with accrued interest) toward final pay-
23 ments of rental charges under the lease;

24 “(2) that upon occurrence of a default under the
25 lease, the lessor shall, as a condition precedent to enforce-

ing any claim under the lease guarantee, utilize the entire period, for which there are funds available in escrow for payment of rentals, in reasonably diligent efforts to eliminate or minimize losses, by releasing the commercial or industrial property covered by the lease to another qualified tenant, and no claim shall be made or paid under the guarantee until such effort has been made and such escrow funds have been exhausted;

“(3) that any guarantor of the lease will become a successor of the lessor for the purpose of collecting from a lessee in default rentals which are in arrears and with respect to which the lessor has received payment under a guarantee made pursuant to this section; and

“(4) such other provisions, not inconsistent with the purposes of this title, as the Administrator may in his discretion require.

“POWERS

“SEC. 402. Without limiting the authority conferred upon the Administrator and the Administration by section 201 of this Act, the Administrator and the Administration shall have, in the performance of and with respect to the functions, powers, and duties conferred by this title, all the authority and be subject to the same conditions prescribed in section 5 (b) of the Small Business Act with respect to

1 loans, including the authority to execute subleases, assign-
2 ments of lease and new leases with any person, firm, orga-
3 nization, or other entity, in order to aid in the liquidation of
4 obligations of the Administration hereunder.

5 "FUND

6 "SEC. 403. There is hereby established a revolving fund
7 for use by the Administration in carrying out the provisions
8 of this title. Initial capital for such fund shall consist of not
9 to exceed \$5,000,000 transferred from the fund established
10 under section 4 (c) of the Small Business Act: *Provided*,
11 That the last sentence of such section 4 (c) shall not apply
12 to any amounts so transferred. Into the fund established by
13 this section there shall be deposited all receipts from the guar-
14 antee program authorized by this title. Moneys in such
15 fund not needed for the payment of current operating ex-
16 penses or for the payment of claims arising under such pro-
17 gram may be invested in bonds or other obligations of, or
18 bonds or other obligations guaranteed as to principal and in-
19 terest by, the United States; except that moneys provided as
20 initial capital for such fund shall be returned to the fund
21 established by section 4 (c) of the Small Business Act, in
22 such amounts and at such times as the Administration deter-
23 mines to be appropriate, whenever the level of the fund
24 herein established is sufficiently high to permit the return of

1 such moneys without danger to the solvency of the program
2 under this title.”

3 (b) Section 201 of such Act is amended by striking
4 out the third sentence and inserting in lieu thereof the fol-
5 lowing: “The powers conferred by this Act upon the Ad-
6 ministration and upon the Administrator, with the exception
7 of those conferred by titles IV and V hereof, shall be exer-
8 cised through the Small Business Investment Division and
9 through the Deputy Administrator appointed hereunder.
10 The powers conferred by this Act upon the Administration
11 and upon the Administrator by titles IV and V hereof shall
12 be exercised through such division, section, or other personnel
13 as the Administrator in his discretion shall determine.”

14 (c) The table of contents of such Act is amended by
15 inserting after the analysis of title III the following:

“TITLE IV—LEASE GUARANTEES

“Sec. 401. Authority of the Administration.

“Sec. 402. Powers.

“Sec. 403. Fund.”

16 (d) Section 4(c) of the Small Business Act is
17 amended—

18 (1) by striking out “\$1,666,000,000” and insert-
19 ing in lieu thereof “\$1,671,000,000,”; and

20 (2) by striking out the period at the end of the

1 fifth sentence and inserting in lieu thereof the following:
2 “: *Provided*, That such limitation shall not apply to
3 functions under title IV thereof.”

4 FHA CONFORMING AMENDMENTS

5 SEC. 1009. (a) Section 2 (f) of the National Housing
6 Act is amended by striking out all that follows the first
7 sentence.

8 (b) Section 8 of such Act is amended by—

9 (1) striking out in subsection (g) “Title I Housing
10 Insurance Fund” and inserting in lieu thereof “General
11 Insurance Fund”; and

12 (2) striking out subsections (h) and (i).

13 (c) Section 203 (k) of such Act is amended by—

14 (1) striking out in clause (3) of the first sentence
15 “a separate Section 203 Home Improvement Account
16 to be maintained as hereinafter provided under the Mu-
17 tual Mortgage Insurance Fund” and inserting in lieu
18 thereof “the General Insurance Fund”;

19 (2) striking out in clause (4) of the first sentence
20 “the Section 203 Home Improvement Account or in
21 debentures executed in the name of such Account” and
22 inserting in lieu thereof “the General Insurance Fund or
23 in debentures executed in the name of such Fund”;

24 (3) striking out in the third sentence all that follows
25 “203 (k)” and inserting in lieu thereof a period; and

1 (4) striking out the fourth, fifth, and sixth sentences.

2 (d) Section 204 of such Act is amended by—

3 (1) striking out in the first sentence of subsection

4 (a) “or section 210”;

5 (2) striking out that part of the second sentence of

6 subsection (c) which follows “the mortgagee” and

7 inserting in lieu thereof “from the Mutual Mortgage

8 Insurance Fund.”;

9 (3) striking out in the first sentence of subsection

10 (d) all that follows “negotiable”, the first place it

11 appears, and inserting in lieu thereof a period.

12 (4) striking out in subsection (d) “the Fund”,

13 each place it appears, and inserting in lieu thereof “the

14 Mutual Mortgage Insurance Fund”;

15 (5) striking out in the fifth sentence of subsection

16 (d) “or the Housing Fund, as the case may be,”;

17 (6) striking out in the sixth sentence of subsection

18 (d) “or the Housing Fund”; and

19 (7) striking out that part of subsection (f) (1) (i)

20 which follows “203” and precedes the colon.

21 (e) Section 207 of such Act is amended by—

22 (1) striking out in the first sentence of subsection

23 (d) “and section 210”;

24 (2) striking out in the first sentence of subsection

1 (d) “of the Housing Insurance Fund issued by the
 2 Commissioner under this title” and inserting in lieu
 3 thereof “issued by the Commissioner under any title
 4 and section of this Act, except debentures of the Mutual
 5 Mortgage Insurance Fund”;

6 (3) striking out subsections (f), (m), and (p);
 7 and

8 (4) striking out “the Housing Insurance Fund”
 9 and “the Housing Fund”, each place they appear in
 10 subsections (b), (h), (i), (j), (k), and (l), and
 11 inserting in lieu thereof “the General Insurance Fund”.

12 (f) Section 209 of such Act is amended by striking out
 13 in the second sentence “or account or accounts,”.

14 (g) Section 213 of such Act is amended by—

15 (1) striking out in subsection (a) (3) “the Hous-
 16 ing Fund” and inserting in lieu thereof “the General
 17 Insurance Fund”; and

18 (2) striking out “(l), (m), (n), and (p)” in
 19 subsection (e) and inserting in lieu thereof “(l), and
 20 (n)”.

21 (h) Section 220 of such Act is amended by—

22 (1) striking out “the Section 220 Housing Insur-
 23 ance Fund”, each place it appears in subsections (d) (2)
 24 and (f), and inserting in lieu thereof “the General
 25 Insurance Fund”;

(2) inserting “and” immediately before clause (B) in the second full sentence of subsection (f) (3), and striking out the comma and the remainder of the sentence following such clause (B) and inserting in lieu thereof a period;

(3) striking out subsections (g) and (h) (4) ; and

(4) striking out “the Section 220 Home Improvement Account”, each place it appears in subsections (h) (5) and (h) (7), and inserting in lieu thereof “the General Insurance Fund”.

(i) Section 221 of such Act is amended by—

(1) striking out “the Section 221 Housing Insurance Fund”, each place it appears in subsections (d) (4), (f), (g) (1), and (g) (3), and inserting in lieu thereof “the General Insurance Fund”;

(2) striking out that part of subsection (g) (2) which follows “insured under this section” and precedes the semicolon;

(3) inserting “and” immediately before clause (B) in the first full sentence of subsection (g) (3), and striking out the comma and the remainder of the sentence following such clause (B) and inserting in lieu thereof a period; and

(4) striking out subsection (h).

1 (j) Section 222 of such Act is amended by—

2 (1) striking out in subsection (e) “Servicemen’s
3 Mortgage Insurance Fund” and inserting in lieu thereof
4 “General Insurance Fund”; and

5 (2) striking out subsection (f).

6 (k) Section 229 of such Act is amended by striking out
7 “and Accounts” in the first sentence.

8 (l) Section 231 of such Act is amended by—

9 (1) striking out in subsection (c) (4) “the Section
10 207 Housing Insurance Fund” and inserting in lieu
11 thereof “the General Insurance Fund”; and

12 (2) striking out “(f), (g), (h), (i), (j), (k),
13 (l), (m), (n), and (p)” in subsection (e) and insert-
14 ing in lieu thereof “(g), (h), (i), (j), (k), (l),
15 and (n)”.

16 (m) Section 232 of such Act is amended by—

17 (1) striking out in subsection (d) (1) “the Section
18 207 Housing Insurance Fund” and inserting in lieu
19 thereof “the General Insurance Fund”; and

20 (2) striking out “(f), (g), (h), (i), (j), (k),
21 (l), (m), (n), and (p)” in subsection (f) and insert-
22 ing in lieu thereof “(g), (h), (i), (j), (k), (l),
23 and (n)”.

24 (n) Section 233 of such Act is amended by—

25 (1) striking out “the Experimental Housing Insur-

1 "ance Fund" in clause (1) of the third sentence of
2 subsection (f) and inserting in lieu thereof "the General
3 Insurance Fund";

4 (2) inserting "and" immediately before clause (2)
5 in the third sentence of subsection (f), and striking out
6 the comma and the remainder of the sentence following
7 such clause (2) and inserting in lieu thereof a period;
8 and

9 (3) striking out subsection (g).

10 (o) Section 234 of such Act is amended by—

11 (1) striking out "the Apartment Unit Insurance
12 Fund", each place it appears in subsections (d) (2)
13 and (g), and inserting in lieu thereof "the General
14 Insurance Fund";

15 (2) striking out subsection (h) and inserting in
16 lieu thereof the following:

17 “(h) The provisions of subsections (d), (e), (g),
18 (h), (i), (j), (k), (l), and (n) of section 207 shall be
19 applicable to mortgages insured under subsection (d) of this
20 section.”; and

21 (3) striking out subsection (i) and redesignating
22 subsection (j) as subsection (i).

23 (p) Section 604 of such Act is amended by striking out
24 “the War Housing Insurance Fund, each place it appears in

1 subsections (c), (d), and (f) (1) (i), and inserting in lieu
2 thereof “the General Insurance Fund”.

3 (q) Section 608 of such Act is amended by—

4 (1) striking out “the War Housing Insurance
5 Fund”, each place it appears in subsections (b) (1) and
6 (d), and inserting in lieu thereof “the General Insur-
7 ance Fund”; and

8 (2) striking out subsection (f) and inserting in
9 lieu thereof the following:

10 “(f) The provisions of section 207 (k) of this Act shall
11 be applicable to mortgages insured under this section, except
12 that, as applied to such mortgages, the reference therein to
13 subsection (g) shall be construed to refer to subsection (c)
14 of this section.”.

15 (r) Section 609 (f) of such Act is amended by striking
16 out clause (1) and redesignating clauses (2), (3), and
17 (4) as clauses (1), (2), and (3), respectively.

18 (s) Section 707 of such Act is amended by striking
19 out “the Housing Investment Insurance Fund” and insert-
20 ing in lieu thereof “the General Insurance Fund”.

21 (t) Section 708 of such Act is amended by striking out
22 “the Housing Investment Insurance Fund”, each place it
23 appears in subsections (c), (e), (g), and (h), and inserting
24 in lieu thereof “the General Insurance Fund”.

25 (u) Section 803 of such Act is amended by—

(1) striking out “the Armed Services Housing Mortgage Insurance Fund”, each place it appears in subsections (b) (1), (b) (2), (e), (f), and (g), and inserting in lieu thereof “the General Insurance Fund”; and

(2) striking out subsection (h) and inserting in lieu thereof the following:

“(h) The provisions of section 207 (k) and section 207 (l) of this Act shall be applicable to mortgages insured under this title and to property acquired by the Commissioner hereunder, except that, as applied to such mortgages and property, the reference in section 207 (k) to subsection (g) shall be construed to refer to subsection (d) of this section.”

(v) Section 809 of such Act is amended by striking out “the Armed Services Housing Mortgage Insurance Fund”, each place it appears in subsections (b), (e), and (g), and inserting in lieu thereof “the General Insurance Fund”.

(w) Section 810 of such Act is amended by—

(1) striking out “the Armed Services Housing Mortgage Insurance Fund” in subsection (e) and inserting in lieu thereof “General Insurance Fund”;

(2) striking out “(l), (m), (n), and (p)” in subsection (j) and inserting in lieu thereof “(l), and (n)”; and

1 (3) striking out the proviso in subsection (j) and
2 inserting in lieu thereof the following: “: *Provided*, That
3 wherever the words ‘Fund’ or ‘Mutual Mortgage Insur-
4 ance Fund’ appear in section 204, such reference shall
5 refer to the General Insurance Fund with respect to
6 mortgages insured under this section”.

7 (x) Section 903 of such Act is amended by striking
8 out “the National Defense Housing Insurance Fund”, each
9 place it appears in subsection (a), and inserting in lieu
10 thereof “the General Insurance Fund”.

11 (y) Section 904 of such Act is amended by—

12 (1) striking out “the National Defense Housing
13 Insurance Fund”, each place it appears in subsections
14 (c) and (d), and inserting in lieu thereof “the General
15 Insurance Fund”; and

16 (2) striking out that part of subsection (e) which
17 follows “Act” and inserting in lieu thereof a period.

18 (z) Section 908 of such Act is amended by—

19 (1) striking out “the National Defense Housing
20 Insurance Fund” in subsection (b) (1) and inserting
21 in lieu thereof “the General Insurance Fund”;

22 (2) striking out that part of subsection (d) which
23 follows “Act” and inserting in lieu thereof a period; and

24 (3) striking out subsection (f) and inserting in lieu
25 thereof the following:

1 “(f) The provisions of section 207 (k) and section
2 207 (1) of this Act shall be applicable to mortgages insured
3 under this section and to property acquired by the Com-
4 missioner hereunder, except that as applied to such mortgages
5 and property, the reference therein to subsection (g) shall
6 be construed to refer to subsection (c) of this section.”

7 (aa) Sections 219, 602, 605, 710, 802, 804, 902, and
8 905 of such Act are repealed.

9 (bb) Section 1 of such Act is amended by striking out
10 “titles II, III, VI, VII, VIII, and IX”, each place it ap-
11 pears, and inserting in lieu thereof “titles II, III, V, VI,
12 VII, VIII, IX, and X”.

13 REPEAL OF SPECIAL PROVISION IN URBAN MASS

14 TRANSPORTATION ACT

15 SEC. 1010. Section 9 of the Urban Mass Transportation
16 Act of 1964 is amended by striking out subsection (c) and
17 redesignating subsections (d), (e), and (f) as subsections
18 (c), (d), and (e), respectively.

19 REDEVELOPMENT AREAS—TECHNICAL PROVISION

20 SEC. 1011. (a) Section 103 (a) (2) (B) of the Hous-
21 ing Act of 1949 is amended by inserting after “Area
22 Redevelopment Act” the following: “or under any Act
23 supplementary thereto”.

24 (b) Section 701 (b) of the Housing Act of 1954 is

1 amended by inserting after "Area Redevelopment Act" the
2 following: "(or under any Act supplementary thereto)".

3 **FEDERAL RESERVE ACT**

4 SEC. 1012. Section 24 of the Federal Reserve Act is
5 amended—

6 (1) by striking out in the second sentence "when
7 the entire amount of such obligation is sold to the asso-
8 ciation" and inserting in lieu thereof "in its entirety,
9 or it may purchase participations in any such obliga-
10 tion"; and

11 (2) by striking out "eighteen months", wherever
12 it appears in the third paragraph, and inserting in lieu
13 thereof "thirty months".

14 **SAVINGS AND LOAN ASSOCIATIONS**

15 SEC. 1013. (a) Section 5(c) of the Home Owners'
16 Loan Act of 1933 is amended by adding at the end of the
17 first paragraph a new sentence as follows: "Structures or
18 parts thereof designed or used as fraternity or sorority houses
19 which include sleeping accommodations for students of a
20 college or university, or designed or used principally for the
21 provision of living accommodations for persons who are stu-
22 dents, employees, or members of the staff of a college, uni-
23 versity, or hospital, shall be considered, subject to such

1 regulations as the Board may prescribe, 'other dwelling
2 units' for the purposes of this subsection."

3 (b) Section 404 of the National Housing Act is
4 amended by adding at the end thereof the following new
5 subsection:

6 " (h) (1) Each insured institution shall make such
7 deposits in the Corporation as may from time to time be
8 required by call of the Federal Home Loan Bank Board.
9 Any such call shall be calculated by applying a specified
10 percentage, which shall be the same for all insured institu-
11 tions, to the total amount of all withdrawable or repurchas-
12 able shares, investment certificates, and deposits in each
13 insured institution. No such call shall be made unless such
14 Board determines that the total amount of such call, plus
15 the outstanding deposits previously made pursuant to such
16 calls, does not exceed 1 per centum of the total amount of
17 all withdrawable or repurchasable shares, investment cer-
18 tificates, and deposits in all insured institutions. For the
19 purposes of this subsection, the total amounts hereinabove
20 referred to shall be determined or estimated by such Board
21 or in such manner as it may prescribe.

22 " (2) The Corporation, in accordance with such regula-
23 tions as it may prescribe, shall credit as of the close of each

1 calendar year, to each deposit outstanding at such close, a
2 return on the outstanding balance, as determined by the
3 Corporation, of such deposit during such calendar year, at
4 a rate equal to the average annual rate of return, as deter-
5 mined by the Corporation, to the Corporation during the
6 year ending at the close of November 30 of such calendar
7 year, on the investments held by the Corporation in obliga-
8 tions of, or guaranteed as to principal and interest by, the
9 United States.

10 “(3) The Corporation in its discretion may at any time
11 repay all such deposits, or repay pro rata a portion of each
12 of such deposits, in such manner and under such procedure
13 as the Corporation may prescribe by regulation or other-
14 wise. Any procedure for such pro rata repayment may pro-
15 vide for total repayment of any deposit, if total repayment
16 of any and all deposits of equal or smaller amount is like-
17 wise provided for.

18 “(4) The provisions of subsection (f) of this section
19 and of the last sentence of subsection (e) of this section
20 shall be applicable to deposits under this subsection, and
21 for the purposes of this subsection the references in such sub-
22 section (f) and such last sentence to the prepayments and
23 the pro rata shares therein mentioned shall be deemed instead
24 to be references respectively to the deposits under this sub-
25 section and the pro rata shares of the holders thereof, and

1 the references in such subsection (f) to that subsection (ex-
2 cept the last such reference) and to subsection (d) of this
3 section shall be deemed instead to be references to this sub-
4 section.”

89TH CONGRESS
1ST SESSION

S. 2213

[Report No. 378]

A BILL

To assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, urban mass transportation, and community facilities.

By Mr. SPARKMAN

HIGHLIGHTS: House debated housing bill. House committee voted to report dairy bill.

HOUSE

1. HOUSING LOANS. Continued debate on H. R. 7984, the housing and urban development bill, which includes a title on rural-housing loans. Concluded general debate and began reading the bill for amendment. pp. 14588-622
2. DAIRY PROGRAM. The Agriculture Committee voted to report (but did not actually report) H. R. 8674, the dairy bill (amended). p. D591
3. WHEAT. Rep. Ashbrook criticized the President's proposals to increase what the Congressman called a "bread tax." pp. 14633-4
4. DISASTER RELIEF; TAXATION. The Ways and Means Committee reported with amendment H. R. 7502, relating to income-tax treatment of certain casualty losses attributable to major disasters (H. Rept. 556). p. 14663

5. PUERTO RICO. A subcommittee of the Interior and Insular Affairs Committee voted to report to the full committee H. R. 9137, to amend the act establishing the Commission on the Status of Puerto Rico. p. D592
6. PERSONNEL. A subcommittee of the Post Office and Civil Service Committee voted to report to the full committee H. R. 6165, to repeal 5 U. S. C. 33, which gives department heads discretion as to whether to appoint women. p. D592
7. LEGISLATIVE PROGRAM. Agreed to call the Consent Calendar and have suspensions on July 12 rather than July 5, and to call the Private Calendar July 13 rather than July 6. p. 14588

SENATE

8. TARIFF. Passed without amendment H. R. 4493, to continue through June 30, 1967, the existing suspension of duties for metal scrap (p. 14538). This bill was earlier reported by the Finance Committee without amendment (S. Rept. 379) (p. 14497). This bill will now be sent to the President.
9. TRADE FAIRS. The Commerce Committee reported without amendment H. R. 4525, to continue authority to develop American-flag carriers and promote the foreign commerce of the U. S. through the use of mobile trade fairs (S. Rept. 380). pp. 14497-8
10. APPROPRIATIONS. A subcommittee of the Appropriations Committee approved for full committee consideration with amendments H. R. 7997, the independent offices appropriations bill, 1966, and H. R. 8775, the legislative appropriation bill, 1966. p. D589
11. ELECTRIFICATION. The Commerce Committee voted to report (but did not actually report) S. 1459, to exempt certain cooperatives engaged in rural electrification from Federal Power Commission jurisdiction. p. D589
12. FARM PROGRAM. Sen. Symington commended and inserted the testimony of the President of the Missouri Farmers Assoc. in support of the farm bill. pp. 14512-14
13. NATURAL BEAUTY. Sen. Morton inserted a letter from a Kentucky judge urging that any highway beautification program be financed from general funds rather than from a diversion of highway funds. p. 14514
14. RECREATION. Sen. Yarborough spoke in support of his bill to establish a national recreational area in connection with the Amistad Dam, and inserted supporting articles. pp. 14526-8
15. COTTON. Sen. Tower inserted an AFL-CIO resolution urging Congress "to enact cotton legislation which will free the price of American cotton from governmental restrictions so that it can meet competition in the marketplaces of the world." p. 14530

BILLS INTRODUCED

16. FABRICS. S. 2227 by Sen. Mondale, to make bedding subject to the provisions of the Flammable Fabrics Act; to Commerce Committee. Remarks of author p. 14584-5

COMMITTEE ON WAYS AND MEANS

Mr. MILLS. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight Wednesday, July 7, 1965, to file a report on the bill H.R. 4750, to provide a 2-year extension of the interest equalization tax and for other purposes, as amended.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

PRESIDENTIAL INABILITY AND VACANCIES IN THE OFFICE OF THE VICE PRESIDENT

Mr. CELLER submitted the following conference report and statement on the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to succession to the Presidency and Vice-Presidency and to cases where the President is unable to discharge the powers and duties of his office:

CONFERENCE REPORT (H. REPT. NO. 584)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to succession to the Presidency and Vice Presidency and to cases where the President is unable to discharge the powers and duties of his office, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

"ARTICLE —

"SECTION 1. In case of the removal of the President from office or of his death or resignation, the Vice President shall become President.

"SEC. 2. Whenever there is a vacancy in the office of the Vice President, the President shall nominate a Vice President who shall take office upon confirmation by a majority vote of both Houses of Congress.

"SEC. 3. Whenever the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that he is unable to discharge the powers and duties of his office, and until he transmits to them a written declaration to the contrary, such powers and duties shall be discharged by the Vice President as Acting President.

"SEC. 4. Whenever the Vice President and a majority of either the principal officers of the executive departments or of such other body as Congress may by law provide, transmit to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office, the Vice President shall immediately assume the powers and duties of the office as Acting President.

"Thereafter, when the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that no inability exists, he shall resume the powers and duties of his office unless the Vice President and a majority of either the principal officers of the executive department or of such other body as Congress may by law provide, trans-

mit within four days to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office. Thereupon Congress shall decide the issue, assembling within forty-eight hours for that purpose if not in session. If the Congress, within twenty-one days after receipt of the latter written declaration, or, if Congress is not in session, within twenty-one days after Congress is required to assemble, determines by two-thirds vote of both Houses that the President is unable to discharge the powers and duties of his office, the Vice President shall continue to discharge the same as acting President; otherwise, the President shall resume the powers and duties of his office."

And the House agree to the same.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to succession to the Presidency and Vice-Presidency and to cases where the President is unable to discharge the powers and duties of his office, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The House passed House Joint Resolution 1 and then substituted the provisions it had adopted by striking out all after the enacting clause and inserting all of its provisions in Senate Joint Resolution 1. The Senate insisted upon its version and requested a conference; the House then agreed to the conference. The conference report recommends that the Senate recede from its disagreement to the House amendment and agree to the same with an amendment, the amendment being to insert in lieu of the matter inserted by the House amendment the matter agreed to by the conferees and that the House agree thereto.

In substance, the conference report contains substantially the language of the House amendment with a few exceptions.

Sections 1 and 2 of the proposed constitutional amendment were not in disagreement. However, in sections 3 and 4, the Senate provided that the transmittal of the notification of a President's inability be to the President of the Senate and the Speaker of the House of Representatives. The House version provided that the transmittal be to the President pro tempore of the Senate and the Speaker of the House of Representatives. The conference report provides that the transmittal be to the President pro tempore of the Senate and the Speaker of the House of Representatives.

In section 3, the Senate provided that after receipt of the President's written declaration of his inability that such powers and duties would then be discharged by the Vice President as Acting President. The House version provided the same provision except it added the clause "and until he transmits a written declaration to the contrary." The conference report adopts the House language with one minor change for purposes of clarification by adding the phrase "to them," meaning the President pro tempore of the Senate and the Speaker of the House.

The first paragraph of section 4, outside of adopting the language of the House designating the recipient of the letter of transmittal be the President pro tempore of the Senate and the Speaker of the House of Representatives, minor change in language was made for purposes of clarification.

In the Senate version there was a specific section—namely, section 5—dealing with the procedure that, when the President sent to the Congress his written declaration that he was no longer disabled, he could resume the powers and duties of his office unless the Vice President and a majority of the principal officers of the executive departments, or such other body as the Congress might by law provide, transmit within 7 days to the designated officers of the Congress their written declaration that the President is unable to discharge the powers and duties of his office. Thereupon, the Congress would immediately proceed to decide the issue. It further provided that, if the Congress determines by two-thirds vote of both Houses that the President is unable to discharge the powers and duties of his office, the Vice President would continue to discharge the same as Acting President; otherwise, the President would resume the powers and duties of his office.

The House version combined sections 4 and 5 into one section, now section 4. Under the House version, the Vice President had 2 days in which to decide whether or not to send a letter stating that he and a majority of the officers of the executive departments, or such other body as Congress may by law provide, that the President is unable to discharge the powers and duties of his office. The conference report provides that the period of time for the transmittal of the letter must be within 4 days.

The Senate provision did not provide for the convening of the Congress to decide this issue if it was not in session; the House provided that the Congress must convene for this specific purpose of deciding the issue within 48 hours after the receipt of the written declaration that the President is still disabled. The conference report adopts the language of the House.

The Senate provision placed no time limitation on the Congress for determining whether or not the President was still disabled. The House version provided that determination by the Congress must be made within 10 days after the receipt of the written declaration of the Vice President and a majority of the principal officers of the executive departments, or such other body as Congress may by law provide. The conference report adopts the principle of limiting the period of time within which the Congress must determine the issue, and while the House original version was 10 days and the Senate version an unlimited period of time, the report requires a final determination within 21 days. The 21-day period, if the Congress is in session, runs from the date of receipt of the letter. It further provides that if the Congress is not in session the 21-day period runs from the time that the Congress convenes.

A vote of less than two-thirds by either House would immediately authorize the President to assume the powers and duties of his office.

EMANUEL CELLER,
BYRON G. ROGERS,
JAMES C. CORMAN,
WILLIAM M. McCULLOCH,
RICHARD H. POFF,

Managers on the Part of the House.

SUBCOMMITTEE ON LABOR, COMMITTEE ON EDUCATION AND LABOR

Mr. ALBERT. Mr. Speaker, I have three unanimous-consent requests. First

I ask unanimous consent that the Subcommittee on Labor of the Committee on Education and Labor may sit while the House is in session today during general debate.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. GERALD R. FORD. Mr. Speaker, reserving the right to object, has this been cleared with the subcommittee ranking minority member?

Mr. ALBERT. I have been advised that it has been cleared with the gentleman from Ohio [Mr. AYRES] and the gentleman from California [Mr. LEGGETT].

Mr. GERALD R. FORD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

SUBCOMMITTEE ON IMMIGRATION, COMMITTEE ON THE JUDICIARY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Subcommittee on Immigration of the Committee on the Judiciary may sit while the House is in session today during general debate. I have been advised it has been cleared with the gentleman from Ohio [Mr. McCULLOCH].

Mr. HALL. Mr. Speaker, I object.

SUBCOMMITTEE NO. 3 ON COPYRIGHTS, COMMITTEE ON THE JUDICIARY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that Subcommittee No. 3 on Copyrights of the Committee on the Judiciary may sit while the House is in session during general debate on Wednesday, June 30, I understand this has been cleared.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

TRANSFERRING CALL OF CONSENT CALENDAR, MOTIONS TO SUSPEND RULES AND CALL OF PRIVATE CALENDAR

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the call of the Consent Calendar and the authority for the Speaker to recognize for motions to suspend the rules, in order on July 5, 1965, may be transferred to Monday, July 12, 1965; and that the call of the Private Calendar, in order on Tuesday, July 6, 1965, may be transferred to Tuesday, July 13, 1965.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

CALL OF THE HOUSE

Mr. CEDERBERG. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 159]

Ashley	Holland	Resnick
Baring	Keogh	Roosevelt
Bonner	King, Calif.	Scheuer
Bow	Lindsay	Springer
Brown, Ohio	Long, Md.	Teague, Tex.
Broyhill, Va.	Martin, Mass.	Thomas
Dent	Miller	Toll
Evins, Tenn.	Morse	Tupper
Green, Oreg.	Morton	Utt
Harvey, Ind.	Moss	Willis
Hays	Powell	
Holifield	Reinecke	

The SPEAKER. On this rollcall 399 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

GENERAL LEAVE TO EXTEND

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend or to revise their remarks on the housing bill and to include any germane extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

Mr. PATMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7984) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 7984, with Mr. FLOOD in the chair.

The CHAIRMAN. When the Committee rose on yesterday the gentleman from Texas [Mr. PATMAN] had 1 hour and 39 minutes remaining. The gentleman from New Jersey [Mr. WIDNALL] had 2 hours and 4 minutes remaining.

Mr. PATMAN. Mr. Chairman, I yield 15 minutes to the gentlewoman from Missouri [Mrs. SULLIVAN].

(Mrs. SULLIVAN asked and was given permission to revise and extend her remarks.)

MEETING NEW PROBLEMS IN AMERICAN HOUSING

Mrs. SULLIVAN. Mr. Chairman, as the ranking member of the Subcommittee on Housing of the Committee on Banking and Currency, I am proud of the hard work which has gone into this legislation, and I am going to support the bill. For many years, we had Repre-

sentative ALBERT RAINS, of Alabama, as the chairman of our subcommittee, painstakingly developing the concepts of our steadily widening and improving housing legislation, and when he decided last year not to run for reelection, we all felt keenly disappointed that we would no longer have his excellent leadership on housing legislation. But it is the strength of our system of Government that when the mantle of responsibility is passed, we characteristically build on what is already there, not tear down and try to start over. In that spirit, the gentleman from Pennsylvania, Mr. BARRETT, has succeeded to the chairmanship of the subcommittee and has done an outstanding job of building on the foundations of the accomplishments and achievements of this subcommittee during the years which went before. I salute him, Mr. Chairman, for his energy and devotion on this legislation.

Mr. Chairman, this is a good bill. It is a big bill, with many important provisions, but like most of our housing legislation of the past, it only succeeds in doing part of the job. For the job is a constantly expanding one. It is never finished. We do not have a static population and we do not have static communities. No housing bill, no matter how comprehensive, can possibly solve all of the problems involved in the housing of our people. We must meet new problems as they arise. This bill tackles some of those new problems, and also improves our handling of some of the older problems we've been trying to cope with in this field.

My great concern during the hearings on this bill, and a continuing interest of mine for years, has been the urgent necessity of assuring adequate housing for low- and medium-income families, and for the elderly. A major test of a good housing bill, to my mind, is how well it meets these problems.

CITIES HAVE LARGER PERCENTAGES OF LOW-INCOME FAMILIES

There are good reasons for this concern.

We have become acutely aware during the past few years that, in spite of a booming national economy, one out of every six families in our country still lives in substandard housing. Three-fourths of these families have incomes of less than \$4,000 a year. This is a national figure.

But in many of our large central cities the problem is even more acute. As higher income families move to the open spaces of the suburbs, an increasing number of the poor and the disadvantaged come from rural areas to the central city. The city of St. Louis has been particularly effected by this changing population pattern. Almost 40 percent of the households in my city—about 100,000 families out of 238,000—have a net income of less than \$4,000 annually and over 21 percent of the households have a net income of less than \$2,500 a year. That is one family out of five in St. Louis, with incomes of less than \$50 a week, and two out of five with incomes of less than \$80 a week. Too many of them live in very bad housing.

I am particularly concerned about decent housing for larger families. We have at present 6,776 units of public housing in St. Louis and that has helped considerably. There is a possibility that three more projects of 2,313 units will be constructed in the future. We have the authorization for them.

But I have always opposed high-rise public housing as a place to rear a family of children, yet, this is about the only kind of public housing we can build in a big city where land costs are so high. This bill would give local housing authorities the authority to buy or lease good but old existing housing and rehabilitate it, if necessary. I think this is a very good proposal. It would upgrade the existing inventory of housing and would be particularly advantageous for families with a large number of children. My interest in this is understandable. I grew up in a family of nine children. On a low income, housing for large families has always been difficult to find. These problems are particularly acute in the large cities. I know that from painful personal experience as a youngster.

AN OPPORTUNITY FOR PRIVATE ENTERPRISE

Another solution to help meet the need for housing for lower income families is included in the rent supplement program, the most-discussed new proposal in this bill. In the manner in which we amended the bill in committee to limit it to those needing help the most, I favor it because it would for the first time bring private resources into the lower income housing market on a mass scale. Private enterprise has been asking for such an opportunity for years. This bill provides this opportunity—and gives them a chance to make the plan work. I am pleased that this legislation can help families to be housed in rehabilitated existing housing as well as new housing.

You may notice that I place particular emphasis in my remarks on the importance of rehabilitation of existing housing. There has been a good deal of clearance through federally assisted urban renewal projects in St. Louis. The Land Clearance Authority has six projects in various stages of development, and has received \$53,673,000 in Federal funds for this purpose. Some very bad slums have been razed in St. Louis, and this is good. But I believe we should put more emphasis now on rehabilitating our basically sound older housing. For this reason, I strongly favor the provision in the bill that would authorize direct grants to low-income families in urban renewal areas for the purpose of rehabilitating the homes they now own and occupy.

I am certainly in favor of continuing the urban renewal program at the level proposed in this bill. This program has enabled our great cities to make a good start in attacking the massive problems of blight and decay. But we have only started. It is essential that we press onward with this attack. I would like to make the observation that this program is being used by more than the large cities. It has had a considerable impact in many smaller communities throughout the country. I am glad to

have had a role in helping smaller cities and towns to share in this program.

HOUSING NEEDS OF THE ELDERLY

I must make reference to a group which is of special concern to me—the elderly citizen. Figures given us in testimony indicate that income levels for this group are much lower than for other categories.

The public housing program has been particularly successful in meeting the needs of the elderly in my city, and has made a real contribution to the well-being and peace of mind of these deserving people. I believe that at least 27 percent of existing public housing in St. Louis is occupied by elderly, and there is a long waiting list. High-rise public housing seems to be most successful where it is used by the elderly. It was my amendment several years ago which made it possible for single or widowed persons to qualify for such housing. I shall always be proud of that.

The direct loan program for nonprofit groups providing housing for the elderly has not flourished as it might because of lack of participation by organizations which could qualify. However, during our hearings we were informed that churches, particularly, are moving into this program and it therefore shows signs of attaining considerably more momentum. The bill as reported should make this program more effective by lowering the interest rate a bit more.

I hope that we can continue to increase the units for the elderly because the demand is there, the need is there, and we must do all in our power to meet it. I am pleased also that the language of the rent supplement proposal pays particular attention to the elderly.

MOST BENEFICIARIES OF HOUSING PROGRAMS PAY THEIR OWN WAY

I would like to reiterate my long-standing support for the college housing loan program. It has resulted in good dormitory housing in colleges throughout the Nation, and Missouri colleges have made very good use of the program. I received a complaint from an investment banker on the low interest rate on this program, but when I discussed the scope of this program with him, he acknowledged its great need.

Primarily, in all of our housing legislation we have put great emphasis on highly successful programs which help those of our people who are able to pay for their own good housing on the private market. Of more than 16 million homes and apartments built or financed with Federal financial assistance, 95 percent have been bought or rented by families able to meet the full costs of housing on the private market. Without FHA and other Federal programs, this record could not have been achieved. Because of them, our people are the best housed in the world and I am proud of that fact.

But let us keep in perspective the fact that only 5 percent of federally assisted housing has been made available to meet the urgent needs of low- and medium-income families, who cannot afford the full cost of private housing.

Mr. Chairman, we have come a long way in our housing legislation since the

first housing bills of the New Deal—the Home Owners Loan Corporation Act and the Federal Housing Act. All of the housing laws since then have opened up new avenues of home ownership, or of housing opportunity, for our citizens.

REHABILITATION OF OLDER HOUSING

I believe more emphasis, in future years has to be in the direction of restoring, modernizing, and improving older housing on a vast scale. Georgetown has shown us what can be done with good basic housing in older neighborhoods. But we are not looking toward making every older area of our cities into a Georgetown—for those Georgetown houses, of course, are no longer for the moderate income family.

But I feel we can save our neighborhoods from blight, and rehabilitate our low income families more effectively, if church groups and other nonprofit groups can be encouraged—through low-interest loans—to help poorer families to help themselves, by turning over to them the reconstructed structure of an older house and then letting the low-income family finish the interior, the painting and so on. Some excellent results along this line have been achieved by some of the church groups already. But it is only a tiny fraction of the need.

Interest rates and the availability of credit are the main factors limiting the spread of this idea. All of our lending institutions should join in setting aside some of their resources for this form of upgrading of the existing housing market, and of the people who live in neighborhoods whose future is in the balance—which can go either down or up. The objective must be to help the neighborhoods which are good, stable communities to survive the march of urban progress and change. I intend to work toward that objective in future housing bills as I have in the past.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentlewoman yield?

Mrs. SULLIVAN. I am happy to yield to the gentleman.

Mr. HARVEY of Michigan. I would like to tell my friend, the gentlewoman from Missouri, how much I have enjoyed serving with her on the Subcommittee on Housing and to say what a worthy member of the committee she is. I have asked the gentlewoman if she would yield to express my surprise at her support of this program in view of her questions on March 25, the first day of our hearings. I would remind the gentlewoman from Missouri, and I would like to read just this one question if I could and the answer she received, and I am reading from page 235 of the hearings, as follows:

Mrs. SULLIVAN. One other thing that bothers me, Dr. Weaver, about the new proposed rent supplement program is the emphasis upon Government controls and supervision. I can understand that you need to have some reliable check for purposes of initial eligibility, for example, to determine income or whether the family was an elderly family or whether it was a displaced family, or whether it was a family living in substandard housing. But I am worried about what will undoubtedly be called Federal policing, for example, the review at least every 2 years of the tenants' income. Since the sponsoring organization in this new program you propose would be bona fide nonprofit organi-

zations, do you not think you could change your regulations, and we could change the bill if necessary, to allow more discretion and more "self-policing" in these matters for the sponsoring nonprofit corporation?

That is the end of the question. Then Dr. Weaver's answer was as follows:

Mr. WEAVER. I think the degree of surveillance would be much less than would be assumed.

Then he goes on at quite some length and I will not read his answer further.

But I would point out that what bothers me, and I can just say it in one sentence here, is the fact that this requirement still requires for the first time the use of W-2 forms to determine a tenant's income, as I understand it. As Dr. Weaver testified, it requires then that the agency on public housing write to the employer to find out what the tenant's income would be; and if the bill provides this, this can be done by either a public or private agency. Still it has not been changed so far as I know, so I was astonished at what my good friend is endorsing so wholeheartedly on this rent support program, and these, it would seem to me, very harsh provisions providing for a means test and nothing less than a means test.

Mrs. SULLIVAN. In reply to the gentleman, may I say that perhaps I did not do my homework as thoroughly as one would like to do before coming to the first day of the hearings back in March, because I did not at that time know the way in which the nonprofit groups were to investigate and pass on the applicants. Of course, the purpose of hearings is to raise critical questions in order to get all of the facts. Since then it has been explained and I think adequately explained, that any nonprofit group that applies and is granted permission to build this housing will give the rental contract to the prospective tenant if they meet the eligibility requirements that have been set up under the bill and under the regulations that will have to be established by the agency. Of course, also, there has to be adequate information obtained before these apartments are rented. If the tenants do not give adequate information, they cannot have a lease for the housing unit that they want to occupy and they would not be able to get the rent supplement. After all, we are dealing with Federal funds, and, as in public housing, we have to be certain there is no fraud or cheating.

Mr. HARVEY of Michigan. Well, I concur in that, if the gentlewoman will yield further just for a comment, we do not mean to limit this to nonprofit corporations because, of course, limited dividend corporations are not too different from the nonprofit corporations, and I am sure they probably are provided for here as well. I understand that certainly. But they still require the use of a W-2 form and they still require the ascertaining of what a person's salary or income is.

Mrs. SULLIVAN. I ask the gentleman if it is wrong to require proof of income and proof that their assets are not excessive when these people make application?

Mr. HARVEY of Michigan. I would answer the gentlewoman by saying that I talked to a staff member of the Internal Revenue Service the other day and he said that to the best of his knowledge this was the first time W-2 forms had been required in a comparable situation to this.

The CHAIRMAN. The time of the gentlewoman from Missouri has again expired.

Mr. BARRETT. Mr. Chairman, I yield the gentlewoman 5 additional minutes.

Mrs. SULLIVAN. Such information is required when people go to the welfare office for welfare or for food stamps. If they have some sort of earnings form—and what is better than a W-2 form—they can be qualified and passed on much faster than if they have no proof at all.

Mr. HARVEY of Michigan. It seems to me that there is a vast difference between using such checks to ascertain the income or the wealth of any person on welfare and determining this, for example, for people who are going to get rent supplements, as Mrs. McGuire testified, in New York City receiving salaries up to \$8,100. We are talking about entirely different income categories. That is where we differ.

Mrs. SULLIVAN. I believe we differ, also, in our estimate of what the limit is going to be. We have been pretty well convinced that this limit not be up to \$8,000. The maximum income would be substantially below that figure, even for very large families.

Mr. BARRETT. Mr. Chairman, will the gentlewoman yield?

Mrs. SULLIVAN. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. Is it not true that we now have the relocation service to check on families living in substandard housing or who are displaced? Is it not also true that in last year's housing bill we voted a rent supplement program for displaced families? And was not the final vote 308 to 68?

Mrs. SULLIVAN. Yes, that is true, and I thank the gentleman for bringing out that important fact.

Mr. FINO. Mr. Chairman, will the gentlewoman yield?

Mrs. SULLIVAN. I yield to the gentleman from New York.

Mr. FINO. First, I wish to compliment the gentlewoman from Missouri for supporting this bill. The only area as to which we disagree is section 101. I appreciate the gentlewoman's expression of great concern for families with incomes of \$4,000 or less in need of housing. That is fine.

Is the gentlewoman aware of the fact that under section 101 there will be no low-cost housing units built?

Mrs. SULLIVAN. No, I am not aware of that, because I do not believe that is true. The whole purpose of the program is to provide low-cost housing for low-income families.

Mr. FINO. The Administrator, Mr. Weaver, did say that those builders who would build low-income housing units would have to have hearts of gold and heads of lead.

Mrs. SULLIVAN. I ask the gentleman this question: I wonder if, over these

years, the gentleman has not had the same discussions I have had with builders, real estate groups, and others who have always opposed public housing. Their whole cry has been, "Help us to find some way we can provide housing for low-income families in private housing."

I believe this is their opportunity. I do not know if it is going to be the entire answer, or the best answer, but I am willing to give it a chance.

Mr. FINO. But, as I said, there will be no low-cost housing project built under section 101.

Mrs. SULLIVAN. Can the gentleman tell me what is the limit in building a public housing unit?

Mr. FINO. What is the limit? I understand there is no limit.

Mrs. SULLIVAN. There is a dwelling unit cost limitation, taking the land costs and other things into consideration. Otherwise we would not have these high-rise apartments in cities. I think the limit is \$20,000 per unit.

Mr. BARRETT. Mr. Chairman, will the gentlewoman yield?

Mrs. SULLIVAN. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. The gentleman from New York knows that Mr. WIDNALL's amendment would give a rent certificate under section 103. Also under section 104 there would be built 240,000 low-rent housing units under the public housing program over the next 4 years. The gentleman knows that as well as I and everybody else on the committee.

Mr. FINO. Mr. Chairman, will the gentlewoman yield?

Mrs. SULLIVAN. I am happy to yield to the gentleman from New York.

Mr. FINO. Directing my remarks to the gentleman from Pennsylvania, the chairman of the subcommittee, I should like to apprise him of the fact that the Widnall amendment affects existing structures.

The Widnall amendment affects existing structures, not new buildings. It affects existing structures, whereas 101 confines itself to new buildings primarily.

Mr. BARRETT. Mr. Chairman, will the gentlewoman yield?

Mrs. SULLIVAN. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. The gentleman from New York is putting his question to the gentlewoman on the basis of section 101. The gentleman from New York knows the low rent public housing program is in section 104.

Mr. FINO. I am just trying to make the point that under section 101 there will be no low-cost housing units built. This does not come from me but from the Administrator himself.

Mr. ASHLEY. Mr. Chairman, will the gentlewoman yield?

Mrs. SULLIVAN. I yield to the gentleman from Ohio.

Mr. ASHLEY. The Administrator did not so testify.

Mr. FINO. He did not testify, but 2 days after he did testify before the committee he appeared before a Pittsburgh civic audience and told them that there would be no low-cost housing built under section 101.

Mr. ASHLEY. And it was subsequent to his trip to Pittsburgh, at which time he made that statement, that we amended the bill. I would like to point that out.

Mr. FINO. In what respect, may I ask the gentleman, was the bill amended?

Mr. ASHLEY. If the gentlewoman will yield further, the gentleman from New York states that there will be no low-cost housing under section 101. I would like to point out that under essentially the same vehicle, the 221(d)(3) program, there have been constructed some 109 projects by nonprofit corporations, 174 projects by limited-dividend corporations, and 142 by cooperatives.

The CHAIRMAN. The time of the gentlewoman has again expired.

Mr. BARRETT. I yield to the gentleman 1 additional minute.

Mr. ASHLEY. If the gentlewoman will yield further, for these 3 categories the total units involved are 18,531 for the 109 projects supported by nonprofit organizations, 26,000 units in the 174 projects by the limited-dividend groups, and 14,681 units in the 142 cooperative ventures. If the gentleman from New York wants to say that these types of sponsors, the church groups and the union groups and others, will cease their interest that they have in this, I say the experience has been exactly contrary to that.

Mr. FINO. I say to the gentleman from Ohio that they have not built low-cost housing units under section 221 (d) (3).

Mr. ASHLEY. What do those units rent for?

Mr. FINO. A little higher, much higher, than public housing projects.

Mr. ASHLEY. Ninety-seven dollars a month. That is why we need this new program.

Mrs. SULLIVAN. Mr. Chairman, before my time again expires, I want to make a final comment. We have been arguing back and forth here in the House for 2 days over the rent supplement idea; before that, we argued over it in the subcommittee and in the full committee. It has been thoroughly and comprehensively examined, debated, analyzed, dissected, and evaluated. It is a different approach from that we have followed generally for low-income families up to now, although, as the subcommittee chairman, Mr. BARRETT, pointed out a moment ago, we voted for something of this nature last year for displaced families and the House approved it then 308 to 68. But it is new; it is another type of approach from that we have followed before. That does not automatically make it either good or bad. We will watch this program carefully as it progresses. That is what our subcommittee traditionally has done on ever new type of program. I think our record of surveillance is a good one. And, I might add, we have more often than not had bipartisan harmony in our investigations into the various programs.

The rent supplement is not by any means the only important provision of this bill and I stress the fact that this House, through the Housing Subcommittee, has a conscientious group, armed

with a very competent staff, devoting endless hours of effort and study year round to the housing problems of our country and to the operation of the many complex housing laws. I think our work speaks for itself. I am proud of my membership on the Housing Subcommittee, proud of the caliber of leadership we have enjoyed in the subcommittee, proud of the staff, and proud of the results of our labors since the subcommittee was formed in 1955. We can argue endlessly over what might or could happen under this new type of program. But, believe me, the Housing Subcommittee will be first to recognize any shortcomings which might develop, and any provisions which would require changes. I am willing to see the idea put to the test, just as we had to test urban renewal, college housing loans, and all other new ideas which turned out to be successful housing programs.

Mr. WIDNALL. Mr. Chairman, I yield 20 minutes to the gentleman from Michigan [Mr. HARVEY].

(Mr. HARVEY of Michigan asked and was given permission to revise and extend his remarks.)

Mr. HARVEY of Michigan. Mr. Chairman, I want to use the time I have today to talk about some of the things that I think are in disagreement on both sides of the aisle and both sides of the committee as I have heard the statements yesterday and today as well.

I want to say something first of all about the ceilings on rent supplements. I served as a member of the Housing Subcommittee along with my good friends on the other side of the aisle, and I can remember sitting in executive session on this particular bill. I remember a member of our committee in executive session asking the question, and I will quote, "What is the maximum income limit for eligibility of the rent supplement program?" I can recall the answer provided by the majority staff member who was there that day. After reference to a memorandum or a table which he held in his hand, his answer was very simple, and I will quote again, "\$8,900 for a seven-or-more-person family in New York City."

This was the answer. After the subcommittee completed its deliberations that afternoon a press conference was held by the majority staff. I recall that press conference because I was there. I went outside the door for a little while but then came back and I heard the statements that were made. From the aforementioned memorandum or table referred to, you can refer to press stories that appeared in the papers on the following day, in several papers, and you can find the same figures that appeared on that memorandum a copy of which I hold in my hand at the present time and which I shall put in the RECORD when I obtain permission after we go back into the House, so that it will be available to everybody. But it is the same memorandum from which these figures on maximum income limits for a large family were taken, that were used as shown on page 179 of our minority views.

The matter alluded to as memorandum or table is as follows:

The following table shows the present income ceiling under the section 221(d)(3) below-market interest rate program and the ceiling under the proposed rent supplement program if an amendment is adopted to base it on 25 percent of income for housing:

City	1 person	3 and 4 persons	7 or more persons
Philadelphia:			
Below market.....	\$4, 600	\$6, 600	\$8, 600
Rent supplement.....	3, 700	5, 300	6, 900
Toledo:			
Below market.....	5, 540	7, 750	10, 100
Rent supplement.....	4, 350	6, 200	8, 050
Pittsburgh:			
Below market.....	4, 850	6, 900	8, 950
Rent supplement.....	3, 900	6, 500	7, 150
Macon, Ga.:			
Below market.....	4, 450	6, 350	8, 250
Rent supplement.....	3, 550	5, 050	6, 600
Providence:			
Below market.....	5, 000	7, 150	8, 300
Rent supplement.....	4, 000	5, 700	6, 650
San Antonio:			
Below market.....	4, 350	6, 200	8, 050
Rent supplement.....	3, 500	4, 950	6, 450
Milwaukee:			
Below market.....	5, 600	8, 000	10, 400
Rent supplement.....	4, 500	6, 400	8, 300
Paterson, N.J.:			
Below market.....	5, 450	7, 800	10, 150
Rent supplement.....	4, 350	6, 250	8, 100
New York City:			
Below market.....	6, 000	8, 550	11, 100
Rent supplement.....	4, 800	6, 850	8, 900
Newark:			
Below market.....	5, 900	8, 400	10, 900
Rent supplement.....	4, 700	6, 700	8, 750
Saginaw:			
Below market.....	5, 300	7, 550	9, 800
Rent supplement.....	4, 250	6, 050	7, 850
Hearne, Tex.:			
Below market.....	3, 150	4, 500	5, 800
Rent supplement.....	2, 500	3, 600	4, 700

¹ Lowest ceiling established under (d)(3).

NOTE.—There are no 221(d)(3) projects in the districts of Mr. STEPHENS, Mr. WIDNALL, or Mrs. DWYER.

Mr. Chairman, let me call your attention first of all to what this memorandum says. Just look at the top of it. What does it say? It purports to show—and it is dated April 21, 1965—"the income ceiling under section 221(d)(3) below market interest rate programs and the ceiling under the proposed rent supplement program if an amendment is adopted to base it on 25 percent of income for housing."

Obviously the Housing Administrator is the only one who has this sort of information, who could put out the memorandum and a table such as this, so it had to come from the agency. Either that or a member of the majority staff misled the members of the subcommittee when he gave that answer, and mislead the members of the press as well.

The table, or the memorandum, whichever you want to call it, also shows income limits for the 221(d)(3) below market interest program. Who sets these limits? The Housing Administrator and the housing agency set these limits. This information could come from no other source. It goes on, for example, to point out that the town of Hearne, Tex.—I never heard of Hearne, Tex.—has the lowest ceilings established under the 221(d)(3) program. Who but the housing agency has the information about the lowest ceiling under the housing program?

I might point out that in the memorandum there is a footnote and I would like to read the footnote:

There are no 221(d)(3) projects in the districts of Mr. STEPHENS, Mr. WIDNALL, or Mrs. DWYER.

Who other than the Housing Agency would have this particular information so peculiarly relevant to the members of our special subcommittee on which I serve? Who but the Housing Agency would have that?

Mr. Chairman, I submit on the record that the memorandum itself leaves no question but that the Housing Agency provided this information. Reference to this memorandum will show the figures used in the minority report are identical on page 179.

I would like to make one other observation on this subject. On June 21, 1965, the distinguished gentleman from Pennsylvania, who is the chairman of our subcommittee, put in the RECORD—put in the CONGRESSIONAL RECORD, that is—a table of income limits for the rent supplement program, showing a top of \$6,500 that could be paid out under the rent supplement program, supposedly for a seven- or eight-person family, and a top of \$5,000 for a four-person family. That is according to the table put in by the gentleman from Pennsylvania [Mr. BARRETT]. We do not have anything comparable in our hearings, of course, because we had a dickens of a time getting this information out of Dr. Weaver. But I would point out one very relevant question, on page 237, which was asked of Mrs. McGuire, our Housing Administrator.

I quote here from page 237 of the hearings when the question was put by the gentleman from New Jersey [Mrs. DWYER], as follows:

What is the present highest income that is being serviced in the public housing program today?

Mrs. MCGUIRE. The possible top for admittance of a four-person family with many exemptions is \$8,100.

Mr. Chairman, I believe you have here a ridiculous impression that is being created by the Housing Administrator, that \$5,000 is the upper limit for the rent supplement program for a four-person family and that this limit is somehow \$3,100 less than would be possible under the public housing program.

Mr. Chairman, this does not make the least bit of sense to me whatsoever.

What are the true figures? I would suggest again that you might look at page—I would say by the way that just recently, in the last week, we have all received a letter from the representative of the AFL-CIO in support of this rent supplement program—I would suggest for that reason you might want to look at page 503 where Mr. Shishkin testified for the AFL-CIO as to what he thought the limit should realistically be.

I asked this question of Mr. Shishkin:

If I understand you correctly, your statement is, citing two areas, either San Francisco or New York City, that it is entirely realistic for a person earning between \$10,000 or \$11,000 a year to still be receiving rent supplements under this program?

Mr. SHISHKIN. I would say so; yes.

That is his view as to what he thinks it realistically should be.

Now, Mr. Chairman, I heard the distinguished chairman of our committee, the gentleman from Texas [Mr. PATMAN] speak yesterday in his opening state-

ment of how much less this particular program was going to cost, this rent supplement program about which I am speaking now, as compared to a comparable public housing program. This had a peculiar ring to me because it just did not sound right at all. Further, I can remember serving on this subcommittee on March 4, 1965, when the distinguished gentleman from Texas, our chairman, introduced his bill. The peculiar thing about the cost—the peculiar thing about his bill when he introduced it originally on March 4, is that it had in it a limitation on the amount of rent supplements. It had a limitation so that we could not pay any more under rent supplements than we pay under public housing.

Now, Mr. Chairman, I refer the members of the Committee to that particular bill, H.R. 5840, introduced on March 4, 1965, page 4, section 101(d) (2):

Amount of payment: The amount of annual payment with respect to any dwelling unit shall not exceed (2) the estimated amount of subsidy contracted for under the U.S. Housing Act of 1937 with respect to a dwelling unit of a comparable size and type, in the same or comparable locality.

Mr. Chairman, if this program is going to be so much less than public housing, then why did we take this limitation out? Why is it not found in the present bill?

I suggest to the members of the Committee that they look at section 101(d), and you will not find it in the present bill, because it has been taken out. And yet the gentleman from Texas would have you believe that this program is going to cost less. I just cannot believe that, Mr. Chairman.

I want to say something, also, about a subject that came up yesterday involving the cost of these particular units when I had a colloquy with my good friend and distinguished chairman of the subcommittee, the gentleman from Pennsylvania [Mr. BARRETT]. Then we were talking about how much these individual units under the rent supplement program were going to cost.

The figure that stood out in my mind was that the maximum they could cost was the sum of \$32,900. I brought up this matter yesterday afternoon. I would refer you to pages 30 and 31 of the bill where we are talking about the costs of section 221(d) (3) either at the interest rate or below the interest rate, and where we are requested to increase the cost to families of four so they are permitted to go to \$22,750 for a four-person family or more. I suggest that you look at page 90 of the report where it speaks of existing law. Existing law permits the Administrator to increase this limit of \$22,750 by 45 percent. If we are going to believe the Housing Administrator, who says he only wants to build 12,500 apartments, why in the world is he trying to increase these up to possibly \$32,900? When you multiply \$22,750 by 45 percent, the figure you get is \$10,237.50, and when you add that to the \$22,750 which they are allowed to cost, your maximum is \$32,987.50, which is the maximum cost of one of these rent supplemental units.

You might consider this to be a modest construction unit. I do not think so. I

do not think when we are paying out a rent supplemental this qualifies as a modest unit. Up in Michigan where I come from it would not.

Why are they increasing the limits of the bill? I want to refer to my good friend, the distinguished chairman of the subcommittee. I say sincerely that he has been a good chairman, though we might have had our differences. He has been a fine chairman. At that time when he spoke of the bill, and the gentleman from Texas as well, they spoke in glowing terms about free enterprise and what this bill was going to do for free enterprise in America. They tell you they are privately built, privately owned, privately financed apartments. Even our beloved Speaker himself made some comment in this regard.

I would like to make a few comments on this because, as was pointed out in the hearings, this program does differ from public housing. At the end of 40 years these apartments are not owned by the United States; they are owned by private owners, so the money we spend is not reflected as an asset on the books of the U.S. Government. It has been paid out in the form of rent. These 5,000 apartment units that we are talking about are going to be built by big contractors, they are going to be operated by big landlords as well. You talk about private enterprise. These landlords never had it so good. For 40 years they can carry on without any risk whatsoever. They have no chance of default. They do not have to worry because their apartment rentals are guaranteed. They have no chance of decreased rentals because these apartments are guaranteed by a 40-year contract. Show me any other landlord in this country who has it so good.

The closest thing in this to free enterprise, or as close as this bill comes to free enterprise, is about as close as our farm subsidy program comes to free enterprise. You may take your choice.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. HARVEY of Michigan. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. I think the gentleman deserves a commendation from the gentleman from Pennsylvania. He is really respected as a member of our committee, and certainly he is very highly respected by me. I think we ought to look at the thing sensibly. The structure of incomes is going to be comparable to the public housing structure. I think the gentleman knows that in this the individual units will cost an average of \$12,500. The gentleman knows you cannot get a \$30,000 apartment in a structure of this type with that kind of expenditure for construction.

Mr. HARVEY of Michigan. Well, just a minute now, on that point, would the gentleman point out to me anywhere in the bill that this is limited? Because the way I have read this bill, and my interpretation is that you can build up to \$32,900 apartments—and that is not a modest apartment by any means.

Mr. BARRETT. I am glad the gentleman has brought up that point. I say to you very honestly, if the gentleman can show anybody where they can get a

\$30,000 or a \$38,000 or a \$39,000 apartment in a structure that is limited to \$12,500—

Mr. HARVEY of Michigan. Where is the limit of \$12,500?

Mr. BARRETT. I will indicate to you where we have answered your criticism and misunderstanding in our report. If the gentleman will get the report that we used; namely, the committee print, we show the facts there where they were distorted, as we claim they were.

Mr. HARVEY of Michigan. Now, now, I refuse to yield further. The gentleman is referring here to an unauthorized committee print. The gentleman stated himself before the Rules Committee that this report was prepared by the Housing and Home Finance Agency and that he brushed it up a little bit. I will quote to the gentleman here and read—and this is covered by the newspapers, about his appearance before the Rules Committee. I will quote from the Newark Evening News of Wednesday, June 16, 1965. I will quote here and this is from their Washington Bureau:

Under questioning by Representative HOWARD W. SMITH, Democrat of Virginia, Rules Committee Chairman BARRETT said the information for the document had been prepared by the Housing and Home Finance Agency, which would administer the rent subsidy, and that he "brushed it up." Then he went on to take full responsibility for it.

You point out to me where any committee met and considered that document. Point out to me where any committee member signed it. I cannot believe my good friend from Pennsylvania—let alone my other good friends on that committee would accuse me as a member of the committee of making false or misleading or intentionally calculated statements to deceive. I cannot believe my friend from Pennsylvania would make those statements and I am sure other Members of this House or Committee would not. Only somebody in the Housing and Home Finance Agency would make statements such as that and that is precisely what the gentleman from Pennsylvania told the Rules Committee as it was reported in the Newark Evening News.

Mr. BARRETT. Now will the gentleman yield to me again.

Mr. HARVEY of Michigan. Yes, I am delighted to yield to the gentleman again.

Mr. BARRETT. I just want to tell the gentleman I have taken the responsibility for the report. I told the House, as I have told the Committee on Rules, and the gentleman knows that, he sat there when I said this and I was speaking to the chairman of the Committee on Rules, it is true that I asked for the staff to help me on this and it is true that when I felt I needed some assistance, I went to the Agency and I said, "What would be your answer to this?" And the only reason the gentleman from Michigan is in the well today making these remarks apparently is because they failed to come and ask the committee, "What about this section—and if there is anything wrong, will you put us straight?"

This is the only thing we asked them to do or asked anybody else to do.

Mr. HARVEY of Michigan. Right there I would say to the gentleman this, that I asked the Housing Administrator before our committee what were the limits on this program and the gentleman from New Jersey [Mrs. DWYER] asked what the limits on this program were. I tried to get information, but I am not going to stand here and let the gentleman quote from a report that is now submitted by the Housing and Home Finance Agency, handed to him, and which he has given some form of authenticity, when the committee never issued that in a committee print. No, sir, I refuse to acknowledge that. I submit that it is possible to build \$32,900 housing units which he is asking authority for. Look at page 30 and page 31 of the bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WIDNALL. Mr. Chairman, I yield myself 5 additional minutes.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. HARVEY of Michigan. I yield to my chairman.

Mr. BARRETT. Now the gentleman knows, as I pointed out before, you cannot get luxurious apartments in this type of program. It is just utterly impossible.

Mr. HARVEY of Michigan. Where does it say that in the bill? Where does it say that in the bill? I ask my chairman to show me where it says that in the bill?

Mr. BARRETT. This is modest construction comparable to the public housing construction.

Mr. HARVEY of Michigan. No, no, I refuse to yield until my chairman points out in the bill to me where it says that they cannot get a \$32,900 apartment because I am telling my chairman that on page 31 of the bill it says that you can construct apartments which will be used in the rent supplement program that will cost \$32,900. The bill says differently—than the committee print—which Dr. Weaver said a little bit later on in reflection.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. HARVEY of Michigan. I yield to the gentleman from Ohio.

Mr. ASHLEY. The gentleman is correct: there is nothing in the law that puts on a ceiling.

Mr. HARVEY of Michigan. The gentleman would agree that pages 30 and 31 of the bill before us would permit construction of apartments costing \$32,000, as this would be used in the program; is that correct?

Mr. ASHLEY. What I am saying is different.

Mr. HARVEY of Michigan. If I am wrong I hope my good friend will tell me where I am wrong.

Mr. ASHLEY. I beg the gentleman's pardon.

Mr. HARVEY of Michigan. If I am wrong, I hope my good friend will tell me where I am wrong.

Mr. ASHLEY. That is what I am trying to suggest. Under the 221(d)(3) program, the average cost per unit has been \$12,500.

Mr. HARVEY of Michigan. Now we

are talking about average cost. I am talking about what apartments can be built for. I do not know where the average costs came into this, other than Dr. Weaver's reflections, again.

Mr. ASHLEY. I should like to say to the gentleman that no evidence has been adduced in the hearings or otherwise to indicate that under the 221(d)(3) program units costing \$32,000 have been constructed.

Mr. HARVEY of Michigan. Let me ask my friend a question. Why are you asking for that authority on pages 30 and 31? You are asking for authority to build apartments costing \$32,900. You are asking for authority to use these in that rent-supplement program.

Mr. ASHLEY. No. What the gentleman is doing—

Mr. HARVEY of Michigan. Wait a minute. Is my friend saying that it is not requested on page 31? I ask the gentleman to pick up a copy of the bill and look at it.

Mr. ASHLEY. I say to the gentleman the authority is there because of the limit the Congress set with respect to the 221 program generally, which up to now have caused no argument, even from the gentleman from Michigan. I might add that nothing could be more clear than the fact that the program in question is intended to produce modest priced housing.

Mr. HARVEY of Michigan. I am glad to hear someone on that side of the aisle finally admit the authority is there to build \$32,900 apartments under this program, because I have had a difficult time getting that out.

Mr. ASHLEY. I would say to the gentleman—and he knows this, because he is a very able legislator—that we do not write into each and every bill each and every detail. One might say, "but this is no detail when we are talking about the possibility of a unit costing \$32,000." Is it not true that in the report we make it abundantly clear that what is intended is moderate cost or modest-cost housing and not the \$32,000 unit which theoretically somehow is possible under the authority that does exist?

Mr. HARVEY of Michigan. I would say to my friend, I am not nearly so concerned with what is put in the report as with what is put in the bill. All I know is that on page 31 you ask for authority to build that sort of apartment. It seems to me we can only place that interpretation upon it.

Mr. ASHLEY. The gentleman is very perceptive and he is also aggressive. I believe this is a very interesting combination.

But let me ask the gentleman: Is there any evidence that he has come upon which would indicate, under the 221(d)(3) program, which is credited with being a very successful program, that this type of construction has taken place?

Mr. HARVEY of Michigan. I should like to answer the gentleman by repeating what I said in my remarks yesterday. I believe we could summarize all of section 101 with the one statement found on page 4, line 3, where they talk about the definition of the amount of the annual payment and so forth, and they conclude

with these words: "as determined by the Administrator pursuant to procedures and regulations established by him."

This is the story of this whole rent-supplement program. It is the story of section 101, for that matter, because we would turn over our entire authority to the Housing Administrator. I do not like to draft legislation in that way. If you want \$12,500 units, then I should like to write the \$12,500 units into the bill.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

Mr. WIDNALL. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. FINO. Mr. Chairman, will the gentleman yield?

Mr. HARVEY of Michigan. I yield to the gentleman from New York [Mr. FINO].

Mr. FINO. I thank the gentleman from Michigan for yielding to me.

I should like to clarify the picture a little in regard to the \$12,500 per unit. I should like to bring this up to date. I do not know when the figures were promulgated, or what figures we are talking about, concerning the \$12,500.

In the April 26 edition of the Evening Star, an article was written by Robert J. Lewis.

Speaking of public housing projects, he said:

But before some new projects can go ahead, a \$20,000 limitation on the cost of public housing per unit will have to be scrapped, officials indicated.

Then he goes on to say:

Recent low bids pushed total estimates on one project, for which contracts have not yet been let, to more than \$21,000 per dwelling unit.

Mr. HARVEY of Michigan. I do not yield any further. I want to say to my good friend from New York [Mr. FINO], in response to his statement that he does not know where this \$12,500 figure come from. As far as I know, the only reference to that came long after the hearings were held and just before we were to go into the Committee on Rules when a very scurrilous document was issued accusing minority members of false and misleading statements where there is discussion that housing must be of modest standards and the intent of the Housing Administrator is mentioned, and that is where he speaks of \$12,500. That is where that is used. But as I heard the gentleman from Pennsylvania [Mr. BARRETT] say before the Committee on Rules and I quoted before, he told the Committee on Rules that this document was apparently prepared, as we suspect, by the Housing and Home Finance Agency.

Mr. BARRETT. The gentleman has used my name. Will he yield to me?

Mr. HARVEY of Michigan. Yes. I will yield to my good friend and our chairman because I did use his name.

Mr. BARRETT. I am sure the gentleman does not want to give any implication of doubting my honesty?

Mr. HARVEY of Michigan. My good friend knows I would never doubt his honesty and veracity.

Mr. BARRETT. Will you take the article published in the paper in place of my statement?

Mr. HARVEY of Michigan. No, no. I sat there and heard the gentleman make the statement himself.

Mr. BARRETT. I said to the gentlemen on the Rules Committee and I said to you that I was responsible for this because I needed a fact sheet, because the minority report you people put out distorted the facts.

Mr. HARVEY of Michigan. I refuse to yield further. I will say to my good friend, whose friendship I value highly and who has been a good chairman, that I sat in the same Committee on Rules and we apparently had a disagreement because I drew evidently the same conclusion from what my friend from Pennsylvania told the members of the Committee on Rules, and specifically the chairman, Judge SMITH, as the reporter from the Newark Evening News that I quoted did. I understood him to say exactly the same thing, that this document had been prepared in this way.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. PATMAN. Mr. Chairman, I would like to yield to the gentleman from New York [Mr. MULTER] for 5 minutes.

Mr. MULTER. Mr. Chairman, I will give the opponents of section 101 credit for not having deliberately misled anybody. I will give them credit for not having intentionally distorted anything. But I want to assure you, Mr. Chairman, that they certainly succeeded in confusing the entire issue. We have talked about the evidence adduced before the subcommittee and the facts submitted to us by the agency which is responsible for giving us the true facts. Nobody has controverted those facts. Nobody controverted what was adduced as evidence before the subcommittee. But you have heard a lot of reading from newspapers. Most of the items against section 101 were inspired by opponents of the section. Instead of sticking to the facts, we get all of this confusion. We have very patiently listened to the gentleman from Michigan [Mr. HARVEY] attacking section 101. I will yield to him now to tell us and to tell this committee, Mr. Chairman, how he would improve section 101, or is it not a fact that no matter how we improve it he will still vote to strike it out and vote against the bill if it is in the bill? I yield to the gentleman for an answer.

Mr. HARVEY of Michigan. I thank the gentleman for yielding.

I thought I had made clear yesterday my own position on this exactly, or at least I tried to make it clear exactly, but I will state now, first, I support the concept of urban renewal; and, second, I support the concept of urban housing and point out that I served as a mayor of a substantial community.

Mr. MULTER. I will not yield further unless you answer that one question. I refuse to yield to you unless you tell this committee whether or not you will support section 101 if we put in the limitations that you say are missing. Will

you or will you not support section 101 if we put in the limitations you say are not in the bill? Yes or no. I yield only for that. Yes or no, please.

Mr. HARVEY of Michigan. What are the limitations?

Mr. MULTER. Your limitations. Yes or no.

Mr. HARVEY of Michigan. What limitations is my friend talking about?

Mr. MULTER. The limitations you were talking about. If we put the limitations in that you say are missing from section 101—if we put them in, will you or will you not support 101? Yes or no, please.

Mr. HARVEY of Michigan. I do not know what limitations my friend is talking about.

Mr. MULTER. That is enough.

Mr. HARVEY of Michigan. Wait a minute.

Mr. MULTER. I refuse to yield further, Mr. Chairman.

Mr. FINO. Mr. Chairman, will the gentleman from New York yield?

Mr. MULTER. I will yield in a moment; not just now.

Mr. HARVEY of Michigan. Mr. Chairman, the gentleman does not want an answer.

Mr. MULTER. Mr. Chairman, I want an answer, but I do not want the gentleman to confuse the answer instead of meeting the issue. I am willing to yield to him again, if he will give this Committee an answer to this question: Will you or will you not support section 101 if we write into section 101 the limitations that you say are missing?

Mr. HARVEY of Michigan. The gentleman asked me that before, and he asked me if I would support the bill.

Mr. MULTER. Mr. Chairman, I decline to yield further; I yield only for a "yes" or "no" answer.

Mr. HARVEY of Michigan. Now the gentleman is changing the question. The gentleman asked me if I would support the bill—

Mr. MULTER. Mr. Chairman, I decline to yield further. Obviously the gentleman does not intend to answer the question.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman let me answer the question?

Mr. MULTER. Mr. Chairman, I will yield for a "yes" or "no" answer.

The CHAIRMAN. The gentleman will suspend. Does the gentleman yield, and if so, to whom?

Mr. MULTER. Mr. Chairman, I yield to the gentleman for only one purpose, and that is for him to answer "yes" or "no," whether he will support section 101 if we write into section 101 the limitations which he says are missing from section 101.

Mr. HARVEY of Michigan. The question cannot be answered "yes" or "no."

Mr. MULTER. Mr. Chairman, I refuse to yield further.

Mr. HARVEY of Michigan. Mr. Chairman, I shall make my statement in my own time.

Mr. FINO. Mr. Chairman, will the gentleman yield?

Mr. MULTER. I shall yield in a moment. I think it is perfectly evident that the talk about missing limitations in this bill is given to this committee merely to confuse the issue. Those who are supporting section 101 say that the bill has the limitations. We have explained them in the report. We have explained them in the debate. I think it should be perfectly clear that those who do not want section 101 will raise a lot of fog and spread a lot of camouflage to hide the real issue. The fact still remains that section 101 is a good provision. If you can improve it, we are willing to improve it.

Now, Mr. Chairman, I yield to the gentleman from New York [Mr. FINO].

Mr. FINO. Mr. Chairman, I thank the gentleman for yielding to me. I am sorry that he has picked on the press for confusing the issue. I do not think the press has confused the issue.

Mr. MULTER. I have gone beyond the press. I said that the gentlemen who are opposing section 101 have confused the issue.

Mr. FINO. If I recall correctly—and we can go back and check the record—the gentleman mentioned that the press had confused the issue.

Mr. MULTER. No; I did not. I said that the gentlemen who oppose section 101 had confused the issue.

Mr. FINO. The gentleman who is a very respected member of the Committee on Banking and Currency tried to create that impression.

Mr. MULTER. The RECORD will disclose what I did say. But let no one think that all of the press is opposed to section 101. Much of the responsible press have supported it. Your attention has been called to it. Another item is the editorial from today's New York Times as follows:

RENT SUBSIDY

The rent subsidy, a key provision of the administration's housing bill, is expected to come under sharp attack in a House vote today. If it is rejected, the action will be a triumph for semantics and a defeat for logic.

Almost every kind of housing now receives a Federal subsidy, direct or indirect. Housing for veterans, for old people and for farmers is subsidized.

There are public housing programs for the very poor; the Federal Housing Administration provides mortgage insurance for one-family dwellings for the middle class; even luxury apartments for upper-income citizens often get an indirect subsidy under the urban renewal program.

Under these circumstances, the opposition that has flared up against the rent subsidy idea seems almost bizarre. The administration's proposal would simply enable the Government to pay the difference in rent between one-quarter of an impoverished family's income and the fair rental value of its apartment. This subsidy would be paid on housing constructed or rehabilitated by limited-dividend corporations. Since there are 500,000 families already on the waiting list for admission to public housing, a supplementary approach is badly needed. The rent subsidy provides that approach.

The plan has the great advantage that it would enable low-income families to continue living in buildings that have been made fit for living. Up to now, the renovation of a slum has usually meant that a sizable number of tenants who could not pay the new rents had to move elsewhere, often to even worse quarters.

The rent subsidy can become a critical component in the war against poverty. According to the 1960 census, three-fourths of families with an income of less than \$2,000 paid 35 percent or more of their incomes for rent. Among families earning \$2,000 to \$3,000 a year, one-third paid 35 percent or more for rent.

The old guard administrators of public housing who oppose this rent subsidy program because it intrudes upon their long-standing monopoly have scarcely displayed the compassion and disinterestedness appropriate to those dedicated to aiding low-income families. The Republicans in the House have likewise proved more partisan than constructive in making an issue out of this program. They have gone counter to the leadership of Representative WILLIAM B. WIDNALL, of New Jersey, the ranking minority member on the Housing Subcommittee and the GOP's foremost housing expert.

A vote against the rent subsidy program would be a vote against some of the most defenseless members of society. The House ought not place this black mark against the good record of the 89th Congress.

Let us not overlook the following from the Washington Post June 28, 1965:

PUBLIC HOUSING STAND

The June 23 "Inside Report," by Rowland Evans and Robert Novak, contains the statement that the public housing lobby is opposing the rent supplement proposal in President Johnson's housing and urban development program and has made an "alliance with old enemies on the right" to fight this proposal.

While the column did not identify the public housing lobby by name, this statement has evidently caused some confusion as to the position of the National Housing Conference on this issue, since the conference is the only overall lobbying organization which over the years has supported the liberal position on housing, urban renewal and community development legislation.

The President's proposal for rent supplements was carefully considered by the National Housing Conference at its annual convention in Washington in mid-March this year. The recommendation of our resolutions committee, which was ratified by our membership, was to support the rent supplement proposal as an experimental program, in no sense as a substitute for the public housing program, but as a promising additional tool for meeting the housing needs of families and individuals of low and moderate income.

In testifying before the Housing Subcommittee of the House and Senate Banking and Currency Committee in general support of the proposed Housing and Urban Development Act of 1965, I presented the position of the National Housing Conference on the rent supplement proposal. I can also state from personal knowledge that the conference's support for rent supplements is shared by a broad consensus of the other public interest organizations which cooperate with us.

Admittedly the rent supplement proposal is opposed by some persons active in public housing at the local level. However, I know of no "public housing lobby" other than the National Housing Conference and I believe the record should show that the conference is strongly supporting this and other provisions of the pending housing and urban development legislation.

NATHANIEL S. KEITH,

President, National Housing Conference.
WASHINGTON.

Section 101 is a good program. We should try it. The sooner, the better.

The CHAIRMAN. The time of the gentleman from New York [Mr. MULTER] has expired.

Mr. PATMAN. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, a number of comments and accusations have been made concerning the publication of a document which sets the record straight on the rent supplements section 101 of the Housing and Urban Development Act of 1965. Due to the severity of the comments made about this document and their overall caustic, if not disrespectful tone, I feel obligated to make these remarks.

Your Banking and Currency Committee filed its report, No. 365, on the Housing and Urban Development Act of May 21. This report included the report of the majority, minority views signed by eight members of the minority party, and additional individual views filed by a total of five other members of the minority party.

The main thrust of the minority views was to attempt to condemn that portion of the Housing and Urban Development Act of 1965 which establishes the rent supplements program. The attack upon the rent supplements program can only be characterized as disrespectful to the Members of this body and vitriolic. As has been true so many times in the past, some members of the minority party desire to oppose every social program that ever comes before this body. The opposition to such proposals, and namely the rent supplements program under consideration in this bill, would deserve consideration if couched in unemotional terms and if based upon valid assumptions and facts. However, as has been the case in the past, and as is true in their criticism of the rent supplement proposal, the entire approach of the minority is one which attempts to appeal only to emotional fear and not to fact and logic.

It has been charged that the rebuttal to these emotional charges was strong. This is a correct statement. Why, Mr. Chairman, was it necessary for the rebuttal to be couched in strong terms? I believe a reading of the minority views on this matter will make the answer to this question unavoidably obvious and plain. Let me just read some excerpts from the minority views and some of the chosen emotional phrases which they insisted upon using.

In the introduction to their minority views they state that the rent supplement proposal is "foreign to American concepts." The minority states that the proposal "kills the incentive of American families," that it "makes renters wards of the Government."

These emotional scare words are bad enough, Mr. Chairman, but they do not begin to approach the scare words used in subsequent parts of the report.

Let me further quote from the verbiage used by those signing the minority report.

The minority state that the rent supplements proposal "is the way of the socialist state." The minority further say that the proposal is a "threat to homeownership." The minority charge those approving the majority report, which includes members of the minority party, that we have proposed an "absurd formula." The minority state in their

report that the results of the formula are "fantastic." That they are ridiculous" and they repeat that the formula proposed by the majority of the members of the committee is a "wide open, socialistic subsidy formula."

Let no one believe, Mr. Chairman, that this is the end of the emotion-laden vitriolic language used by the signers of the minority in their report. Those signing the minority report, Mr. Chairman, are saying to those of us who support this proposal that we, the majority members, are absurd, that we are ridiculous, and that we support and foster socialism.

The minority report states, and I quote:

Under date of April 21, 1965, the Housing Agency submitted to the subcommittee a table showing income ceilings which would be set for individual cities in administering the rent supplements program.

The minority report then goes on to list the income limits for various cities in the United States. In my opinion, if there is any attempt at unemotional, logical presentation in the minority report it is contained in this section. The case for the charges made that this is an "absurd and ridiculous formula" rests or falls on the accuracy of these figures used.

But what are the facts in the case, Mr. Chairman? The simple fact is this. The Housing Agency categorically denies that it prepared the data contained in the statement of the minority views on page 179 of the housing report. To my knowledge there is no document in existence written on the letterhead of any housing agency or signed by any responsible official of any housing agency which contains any such figures as those presented in the minority report. This, Mr. Chairman, is a fact.

This is not the end of the emotion-laden verbiage which the minority hurls at the majority in their report. Let me just quote a few more of their phrases. One reads as follows: "Who is hoodwinking whom?" as if we of the majority are trying to deceive everyone. And perhaps the most indefensible of all is contained in the following quote from the minority report:

In our opinion the President has been sold a bill of goods. We cannot believe that he would "buy" such an incredibly wide-open subsidy proposal had he been fully advised as to the potential evils of the program. We are certain the American people will not "buy" such nonsense as is contained in this proposal.

Mr. Chairman, those who agreed with the majority report, to sum it all up, have been accused of being absurd, have been accused of being ridiculous, have been accused of proposing nonsense formulas and attempting to hoodwink the American public. We have been accused of trying to take the American public down the path of socialism, that we are making a proposal that is a threat to home ownership. And finally those who agree with the majority position are condemned for proposing all of this based on a letter concocted out of the whole cloth.

Mr. Chairman, the language contained in the rebuttal report to the minority

views is accurate and unemotional. The language is factual and correct. The words chosen in the rebuttal report are clear and unequivocal.

It has been stated that the integrity and veracity of the members of the minority signing the minority report has been questioned in the rebuttal report. There is no truth to this statement. No one questions the honesty and integrity of any Member of this body.

The rebuttal report attempts and succeeds in this attempt to do nothing more than point out statements which cannot be supported by concrete facts or reasonable observable assumptions.

The rent supplements program is a good one. One which I am convinced will work. It is one which every Member who desires to assist in providing every American with a decent home must support.

Mr. WIDNALL. Mr. Chairman, at this time I yield 10 minutes to the gentleman from Tennessee [Mr. Brock].

(Mr. Brock asked and was given permission to revise and extend his remarks.)

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. I would like to address my comment to the gentleman from Texas so far as concerns his remarks about the committee print that was issued.

I would point out in my judgment there are a couple of items which distinguish this document from any other document. First of all, even though we on the minority side may be accused of being ridiculous, which he would like to have anyone conclude, nevertheless we had the courage of our convictions to sign our minority report. Each one of us has put our name below the statement. We read that over before we signed it. We did not put out on the floor a scurrilous document unsigned by anyone. That is what appears in the committee print. Certainly this is something that should be fair on the face of it to every lawyer in this body and all of those in the Home Finance Agency who wrote this document. There is a tremendous difference between accusing someone of ridiculous acts or absurd acts, yet putting in a document that the minority members are guilty of false statements. That is a connotation so far as the lawyers are concerned. I have never been accused of putting out a false statement, and I have never been accused of putting out a misleading statement as a minority member.

Aside from accusing people of false statements and misleading statements and those who are in the Housing and Home Finance Agency, you accuse them of making a complete and possibly calculated misunderstanding of the provision. I have never been accused before of attempting to create a calculated misunderstanding. All of you who are lawyers know that there is a big difference. Besides that, we are willing to sign our names to the report.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. I want to say to the gentleman I have never been used to being accused of using anything falsely.

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman from New York.

Mr. MULTER. This may not be in order to comment on the document and talk about misunderstandings, and the like. I do hope somebody will tell us if they want to improve section 101 and how we can improve it.

Let us go to work on the bill instead of talking about documents, and whether they are good, bad, or indifferent.

Mr. BROCK. I thank the gentleman.

I would like to state that the way I would improve section 101 is to take it out of the Housing Act altogether.

Mr. MULTER. I would like to compliment the gentleman for his frankness.

Mr. BROCK. I thank the gentleman. I want to make it clear I am opposed to section 101, and everything it stands for. It is a new concept in legislation. Let us be honest about it. In the past we have in Federal programs endeavored to help those people who cannot help themselves, the handicapped, the unemployed, the widows.

What are we doing in this bill? We are coming out with a program which is specifically for the benefit of the middle-income citizens of this country. The thing that disturbs me is we are going to subsidize the middle-income taxpayers with a Federal program without talking about who is going to pay the bill.

A cursory examination of our tax structure will show you that of all the income tax taken in by the United States in any given year over 75 percent of that money is paid by people whose income fell in the less-than-\$10,000-per-year category.

These are the very people that this bill purports to help with a direct Federal subsidy. In other words, the middle income citizen pays the taxes so we can subsidize him with his own dollars.

In the area of need, you can go into statistics which show that with families of all types in urbanized areas, over 97.6 percent of the owners and 91.5 percent of the renters occupy standard housing or better.

I do not want to take up much time on the need. I think it is fairly obvious that the middle-income citizen of this country does not need a Federal hand-out.

I think the thing that disturbs me more than any other single feature about this bill is the fact that invariably and without any question, it must of its own weight kill the basic incentive of the average American citizen to own his own home and to exert his greatest effort to improve his standard of living. The average median family income in the United States today is \$6,249 per family. Could they, if they are in this average family category receive a Federal subsidy? Absolutely. Let us take a family with five children earning a \$6,250

income in San Antonio, Tex. If they are in an apartment that costs \$200 per month they would receive \$70 a month or \$840 a year on a Federal subsidy. Of course, if the income goes up \$200 a year, they are thrown out unless the administration allows some exemptions from income such as union dues and so forth. What is the incentive to improve their income?

We have also heard a great deal of debate about the strict regulations in this law such as the supposed limit of \$12,500 on construction. There is no such limit. It is not in the bill.

What is the limit on family income? There is not any limit that we can find in specific terms. It is up to the administrator to determine the income. In the bill the only words are "tenant's income as determined by the administrator pursuant to procedures and regulations established by him. It is also up to the administrator to determine those items which would be deductible from income. If we apply the same standards that are applied by the public housing officials in New York City, maximum exemptions from gross income figures could be as much as \$2,400. That is the maximum amount of exemptions you can get in New York City. These standards are left up to the administrator. This House is evading its responsibilities when it leaves this latitude up to the administrator—to set any standards that he wishes within these broad ranges.

We are not meeting our legislative responsibility when we do not apply detailed standards in a program of this type.

This bill concerns me because in essence, it is a one-lobby bill. It is a big-builders bill. There is not any question about that. I am getting a little bit tired of these people who hypocritically come in and say, "I am for free enterprise but I want to get a piece of the pie."

Finally, I was delighted that the chairman read our minority views. I will make no apologies for them. This bill is foreign to American concepts. It does kill the incentive of the American family to improve its living accommodations by their own efforts. It does kill the incentive for homeownership. It does make renters the wards of the Government. It is a system of economic integration of housing through Government subsidy. It is the way of the socialistic state. In sum I am flatly opposed to section 101 and everything it stands for.

Mr. WIDNALL. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. TALCOTT].

Mr. TALCOTT. Mr. Chairman, I will take just a few minutes to discuss a very limited part of the Housing Act, namely section 101, the rent-supplement program.

My views are based on two beliefs. The United States, through the free enterprise system, and individual pride and self-respect also, has produced the best housing of any nation on earth, developing from primitive to very superior in 200 years. Nevertheless, there are some families who live in substandard homes, and I do favor Federal assistance for housing for families with low incomes.

Having said that, I believe that governmental housing should not be a vehicle for irrelevant purposes—to force integration, whether it is racial or economic; to depress private home values; to promote a new Cabinet position; to buy votes; or to provide a temporary "shot in the arm" for the big builders.

Mr. Chairman, I rise to bring out only a few of several dozen objections to the ill-considered and ill-advised rent supplement proposal.

Firstly, a number of us oppose the rent supplement proposal because there is absolutely no provision in the bill for including family assets in the formula for determining eligibility. According to the bill, annual income is the sole determining factor.

During the hearings, in response to questions, the administrator suggested that family assets would be a factor limiting eligibility to be spelled out in regulation. Administrators and regulations can and do change. This question is too important to be left to regulation. We should know and set out in the bill the policy in regard to assets and eligibility.

Secondly, the language in section 101(e) is very clear that the administrator may delegate his authority to certify persons eligible for the benefits of the rent supplement program to private agencies. The private agency could be any type of agency, including debt collection agencies. This is an unprecedented and unwarranted delegation of governmental function to private agencies and is an infringement of an individual's right to keep personal income information between himself and his Government.

Another major defect of the rent supplement proposal is the request that only new projects may participate. The majority claims that some existing housing may qualify if it is rehabilitated, but the possibility is quite remote.

With a housing vacancy rate of over 7 percent, private housing available within the rent limits which will be subsidized under section 101, should be eligible for rent supplements. If the purpose of the new program is to provide adequate housing for lower and middle income families, it should be done as economically as possible. Use of existing housing is more economical than subsidizing new. The Federal Government should not encourage the construction of new housing if adequate, vacant, private, taxpaying housing is available. The discrimination against existing vacant housing does not square with the avowed purpose of the rent supplement program.

My colleagues are detailing other reasons for defeating this section; therefore, I am restricting my comments to three objections to the rent supplement program, any one of which would be sufficient for striking this proposal from the bill.

Mr. Chairman, in my individual minority views on this bill, beginning on page 188 of the House report, I listed 20 reasons why I believed the rent supplement program should be rejected by the Congress. I will not reiterate all now. Reason No. 20 states that this rent sup-

plement program "provides the mechanism for extending rent doles to more than half of the families of America.

On page 8 of the document, erroneously labeled as a "committee print," the author—whoever he or they may be—said that the minority contention that the rent supplement program payments could be made for more than 50 percent of the Nation's families represents a false allegation. This was not the minority view, but my view. I want to explain.

I would like to remind the author or authors of this so-called committee print that my individual views expressed the belief that the program provided a mechanism for extending these rent doles to more than half of the families of America.

The committee print in reply states that the rent supplement program would benefit only 10 percent of the Nation's families. Nevertheless, I contend that it provides the mechanism for extending these rent doles to more than half of the Nation's families. Let me explain. The national median family income, according to the 1960 census, is \$6,249.

On April 21, 1965, the Housing Agency submitted to the Subcommittee on Housing a table showing income ceilings for the rent supplement program in 11 large cities as ranging from \$6,450 to \$8,900, clearly above the national median income.

The supporters of this fantastic scheme will reply that nevertheless the program will be limited to the elderly, handicapped, displaced families, and those who live in substandard housing, and that this would prevent extension of the program to families whose incomes are above the national median.

However, I suggest that, once the United States pays a rent dole to a family earning \$6,600 or \$8,000 who happens to be living in substandard housing, then surely as night follows day the Congress will be called upon to do something for the families earning \$6,000 to \$8,000 who through personal sacrifice are occupying standard housing. That is why I contend that this program provides a mechanism—a politically impressive mechanism—which will manifest itself in a few years in pressures to take care of the presently ineligible family—with the same income—who, according to the Housing and Home Finance Agency, may be paying too much for his shelter.

The committee print states that my prediction is exaggerated and inaccurate. On the contrary, it is an inevitable result which will flow from this program.

Also, there is ample basis for the opinion of the opponents of this rent subsidy program that the incomes of those eligible may very likely be higher than those mentioned by both the majority and the minority.

Section 101 does not define "income." Neither does the basic public housing statute. Here is what the Public Housing Agency did by regulation to tailor "family income" to the "income eligibility" requirements. There are seven deductions for determining eligibility for admission, and four additional deductions from net income in determining eligibility for continued occupancy. These deductions are:

First, expenses for special tools, uniforms, and transportation in excess of that normal to employment in the locality; second, deductions for social security, pensions, retirement, occupational taxes, and union dues; third, amounts payable for the support of dependents residing elsewhere where there is a legal or moral responsibility for such payments; fourth, amounts payable for care of children or aged or incapacitated family members; fifth, amounts payable for medical care of family members with continuing illnesses; sixth, personal expenses of heads of families who are in the armed services and stationed away from home; seventh, personal expenses of heads of families who are veterans attending school away from home and are receiving Government allowances for education and training.

Some of these deductions are limited, others are completely without limit.

In addition, there are deductions of \$100 for each minor child or adult member having no income, and from \$600 to \$1,000 deductions from the incomes of adult members who are not principal income recipients.

I am quoting from a GAO report dated April 1963. The report concluded that these deductions were permitting families to live in public housing who earned in excess of the national median income.

Page 23 of the report gives an example of a family consisting of two employed adults with combined income of \$8,841, yet the computed income for continued occupancy in public housing, after deductions was \$3,893—less than one-half.

On the same page the GAO cites tenant families with incomes in excess of \$12,000 who were occupying public housing because of these deductions and exemptions.

Just think what a monstrosity we have here in section 101 if the Administrator, who acquiesces in these deductions and exemptions for public housing tenants, extends the same principle to "rent supplement" families. No small wonder that the bill contains no limit on the annual subsidy per unit under the rent supplement program.

I take the time of the House to underscore the absence in this section 101 of any restriction on the Administrator in determining what is family income.

If these deductions are valid for public housing, then they are valid for rent supplements. These are expenses which are the life of all families of low and moderate income.

The point I want to make is that the Administrator under this bill would have the authority to extend these same deductions in determining the size of the rent subsidy. Indeed it would be highly unusual, if not discriminatory, to apply these deductions to a public housing family whose gross income is \$5,000 and not to the family of the same income applying for a rent supplement.

This is why I contend that it would be naive in the extreme to accept the majority position that we are talking about rent supplements for 10 percent of the Nation's families.

The most modest acceptance of political reality leads inescapably to the con-

clusion that we are soon to make a decision on a program of rent subsidies which provides a mechanism for subsidizing the rents of more than half of the Nation's families.

(Mr. TALCOTT asked and was given permission to revise and extend his remarks.)

Mr. TALCOTT. Mr. Chairman, if I may, I would like to ask the chairman of the subcommittee [Mr. BARRETT] if he can explain to me what the word "handicapped" in section 101 means.

Mr. BARRETT. Yes. I am glad that the gentleman asked that question, because it is a very good question.

Mr. TALCOTT. May I interrupt for just a moment?

I am certain the definition would include people with no arms, for instance. That would be considered a handicapped person, would it not?

Mr. BARRETT. Well, we considered "handicapped" in the language of the bill to mean that person who is unable to obtain decent, safe, and sanitary housing at up to one-fourth of his monthly income. It does not make any difference how he is handicapped.

Mr. TALCOTT. Then, that would include everyone without reference to any handicap.

Mr. BARRETT. Only those who are not able to obtain standard housing with one-fourth of their income and are handicapped.

Mr. TALCOTT. But what is the purpose of having four definitions: those who are elderly, handicapped, displaced, and those in substandard housing?

Mr. BARRETT. For this reason, not everyone who is elderly is eligible.

Mr. TALCOTT. I am not talking about elderly. I am talking about handicapped. I am seeking a definition of handicapped.

Mr. BARRETT. Everyone who is handicapped is not eligible. It is only that person who is handicapped in that category.

Mr. TALCOTT. Who are the handicapped persons who are eligible?

Mr. BARRETT. Well, of course "handicapped" means just that—unfortunate people whose physical disability reduces their earning power.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. WIDNALL. Mr. Chairman, I yield 15 minutes to the gentleman from California [Mr. DEL CLAWSON].

(Mr. DEL CLAWSON asked and was given permission to revise and extend his remarks.)

Mr. DEL CLAWSON. Mr. Chairman, some weeks ago, together with the majority of the minority members of the Banking and Currency Committee, I signed a report containing the view we held with respect to section 101 of H.R. 7984, the measure now before us.

Subsequently, in my absence from the city on official business, a committee print, unsigned and without notice to the members of the minority, was issued in an attempt to discredit those views. The language of this committee print was, to say the least, intemperate. The views of the minority were said to be misleading and false.

In the short time that I have, I want to speak to that very point. Very simply, rather than the minority views being misleading and false, the committee print is misleading and false and is proved so by its very language.

The committee print was issued by the chairman of the Banking and Currency Committee together with a press release that was placed in the House press gallery the Friday before the Monday when it was sent to members of the minority. I know the honorable gentleman from Texas takes a great interest in housing matters, almost as much interest as he does in banking matters. I also know that the housing subcommittee chairman, the honorable gentleman from Pennsylvania, has taken complete responsibility for the contents of the committee print. But it comes to me as a complete surprise that either of the honorable gentlemen could be so misled after their long service in this honorable body to rely on the misleading statements contained in the committee print.

On page 2, the committee print refers to the 70,000 families who are displaced annually by federally assisted public improvement programs. On page 9, the same "document," if the House will excuse the term, refers to the 80,000 families displaced by governmental action. This is a discrepancy of 10,000 families. The information conveyed by the committee print is misleading, if not false.

On page 15 of this thin document, it says that the housing programs have been able to provide less than 30,000 units designed for the elderly. Now this supposed fact counts none of the elderly living in normal FHA insured dwellings. It deals only with those units especially designed for the elderly. But even so, the arithmetic is faulty. There are 55,405 units available for the elderly that are especially designed for that purpose. There are 109,000 more especially designed and programmed units for the elderly. And by conservative estimates there are more than 270,000 elderly persons living in public housing, and the FHA and CFA housing programs for the elderly. These figures differ considerably from the impression conveyed by the committee print. They are factual.

Once again, the information conveyed by the committee print is misleading, if not false.

On page 6 of this thin document, it says, "The argument that Federal subsidies under the rent supplement program would be greater than those under public housing is completely unfounded." On page 10, it emphasizes this statement, saying:

The maximum subsidy needed for a particular family would never be greater in the rent supplement program than under the public housing program.

When the honorable chairman of the committee and the honorable chairman of the subcommittee introduced their original bills, H.R. 5840 and H.R. 5841, it was specifically stated:

The amount of the annual payment with respect to a dwelling unit shall not exceed the estimated amount of subsidy contracted for under the U.S. Housing Act of 1937 with respect to a dwelling unit of comparable

size and type in the same or a comparable community.

This language, which can be found on page 4, lines 5 through 16, of the bills mentioned was not retained when H.R. 7984 was introduced. On pages 3 and 4 of H.R. 7984, it says as to the payment to be made:

(d) The amount of the annual payment with respect to any dwelling unit shall not exceed the amount by which the fair market rental for such unit exceeds one-fourth of the tenant's income as determined by the Administrator pursuant to procedures and regulations established by him.

Note carefully the last words "as determined by the Administrator pursuant to procedures and regulations established by him." This means that the Administrator is free to pay in any manner and in any amounts he sees fit. If there was not an intent to enable the Administrator to pay above the public housing subsidy, then why was the language of the original bills changed?

I have checked with the honorable gentleman from New Jersey, the ranking minority member of the Banking and Currency Committee. He tells me he did not propose this change, although it was included in the companion bill that he introduced. The honorable chairman of the committee, and the honorable chairman of the subcommittee must, therefore, have proposed it, unless we are going to fall back on the fact that this was an agency proposal which they were persuaded to adopt as their own.

There is only one unmistakable conclusion—there is intent to be free from any tie to the amount of subsidy paid under the public housing program. There is intent to leave the Administrator free to pay more than the public housing subsidy. At what cost to the Government may we ask?

For the third time, the information conveyed by the "committee print," this "thin document," is misleading, if not false.

The "committee print" also quarrels with the minority as to the range of incomes that would be subsidized. Information has been made available as to the agency's intentions. They indicate, as does the "committee print," that payments would not be made to families earning much in excess of \$6,000. The committee print labels as false a statement they attribute to the minority that "the Administrator can decide, for example, that a family with four children making \$8,000 ought to be eligible."

Mr. Chairman, the Administrator originally proposed rent supplement program for families above the public housing level. He excluded all those in the communities eligible for public housing. The committee, led by the honorable gentleman from New Jersey, moved the eligibility floor for the program down to include those eligible for public housing. Testifying for the revised bill, the Administrator said it would still include families above the public housing level.

What is the top range of public housing eligibility? Mrs. McGuire, the Public Housing Commissioner, answered—and you will find her statement on page 237 of part 1 of the published hearings of

the Subcommittee on Housing for March 25, 1965.

Mr. CABELL. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and two Members are present, a quorum.

Mr. DEL CLAWSON. Mr. Chairman, to resume the quotation to which I referred, I read as follows:

The possible top for admittance of a four-person family with many exemptions is \$8,100.

So if the Administrator is going to pay above the public housing level, he is going to be able to pay above \$8,100. Further, in the locality where this income limit applies, the \$8,100 is complemented by permission granted by the local housing authority for deductions up to \$2,400 to be allowed before income is counted. There is also an extra \$700 that the family may add to its income before it loses its eligibility. It is conceivable, therefore, that a family could be living in public housing and earning \$11,200.

Consequently, it follows that the minority erred, but on the side of understatement when it placed rent supplement payments as possible to families earning as much as \$8,000. As a matter of fact, its original estimates were based on figures released to the press by the subcommittee staff of the majority. These figures have appeared in print. The administration may wish to revise its calculations. They have been generally faulty in concept and execution. The statements of the HHFA Administrator and the PHA Commissioner stand in the record. So do the income limits of public housing of which documentary proof is available.

For the fourth time, therefore, the information conveyed in the "committee print," this thin document, is misleading, if not false.

During the hearings on the housing bill, the administration witnesses very carefully shied away from putting an estimate on the total costs of the rent supplement program. Nowhere in the hearings was any mention made of the total dollars that would be required during the 40 years that the Government would be obligated to pay rent supplements under the plan. The fact that within 4 years, the agency would be able to pay out \$200 million annually was carefully concealed. The language of the bill on page 2, however, authorizes that amount beginning July 1, 1968.

The minority views in which I participated applied simple arithmetic to the \$200 million and multiplied that amount by 40, the number of years that the program was to run. That gave us a simple figure of \$8 billion. Not million—billion.

The Housing Administrator is said by the "committee print" to now admit to a cost of \$4.7 billion. The "committee print" claims this is realistic, that the average annual cost of the program will be only \$117 million. It has used an adjective, not facts. If the program will average only \$117 million in subsidy rent payments annually, why is the admin-

istration seeking an authorization after only 4 years of \$200 million annually.

There can be only one reason. The administration knows it is going to cost at least that much if it accomplishes its program.

How does it know? It knows because it has the experience of the public housing program at hand. In 1949, when both the honorable chairman of the Banking and Currency Committee and the chairman of the Housing Subcommittee were in this House, the Housing Act of 1949 was enacted. They were told then that \$308 million in subsidy payments would be sufficient to support 810,000 public housing units. They were told we would have the units in 6 years.

We do not have half of those 810,000 public housing units completed for use. We have perhaps 170,000 awaiting action—action that has been a long time in coming. We are authorizing another 240,000 in this bill under section 104. When we get those built we will be paying not the \$308 million that the Housing Act of 1949 contemplated, but \$526 million, a 70-percent increase. Inflation, rising construction costs, and dilatory action have produced this increase in costs. And there is nothing in the record to indicate that inflation, rising construction costs, and dilatory action in this field will not also be the portion of the rent supplement program if it is enacted.

So the \$117 million average annual cost mentioned on page 12 of the committee print is misleading, if not false, which is what we have, for the fifth time, come to expect of this "thin document."

The committee print also rails at the minority for revealing the fact that construction costs would be possible up to a level of \$29,000 for a three-bedroom unit under present law and up to \$32,987.50 under raises which this bill contemplates. It says the average cost will only be \$12,500.

The construction costs given by the minority are perfectly possible. On page 31 of H.R. 7984, construction costs for the 221(d)(3) program which will be used in the rent supplement program are allowed to rise to a high of \$22,750. Added to this can be another 45 percent in costs allowed by the FHA Commissioner or the HHFA Administrator, if the urban affairs bill becomes law. This is possible under legislation enacted in the Housing Act of 1964 where it was enacted "that the FHA Commissioner may, by regulation, increase any of the foregoing total amount limitations contained in this paragraph but not to exceed 45 per centum in any geographical area where he find that cost levels so require."

But let us, for the moment, take the majority at its word that the average costs of these units will be \$12,500. I think I have proved to the honorable Members that the 40-year cost of this program under the policy of inflation and delay will be \$8 billion. I would suggest at this point a simple arithmetic problem. Divide the alleged \$12,500 cost into the \$8 billion. That will give you 660,000 homes which can be given away free and clear to those needing them. That is 160,000 more units of housing

than will result from the majority's proposal.

Mr. PATMAN. Mr. Chairman, I yield 15 minutes to the gentleman from Wisconsin [Mr. REUSS].

(Mr. REUSS asked and was given permission to revise and extend his remarks.)

Mr. REUSS. Mr. Chairman, this is an excellent housing bill and I have great praise for the constructive labors of the subcommittee and particularly for its great chairman, the gentleman from Pennsylvania [Mr. BARRETT] and the equally outstanding minority Member, the gentleman from New Jersey [Mr. WIDNALL].

Mr. Chairman, I wish I had the time to discuss the many forward-looking features of this bill, the lowered interest rate on college housing and cooperative housing, the fine additions to the open-space program, but since most of the heat this afternoon seems to have been generated in connection with the rent supplement program that is what I will address myself to.

What is this rent supplement program all about? Well, very simply it is designed to meet the needs of the people who can now afford to live only in substandard or slum housing and to give them a decent but modest place in which to live using private enterprise to the maximum possible extent.

Public housing alone cannot begin to do the job of taking care of the millions and millions of Americans who are now condemned to live in substandard slums, crummy, rundown, dilapidated housing.

In 1964 only 24,000 public housing units were constructed in the entire country and in 21 of 25 of our largest cities, none at all were constructed. The reason is very largely because it is no longer possible to find good sites for public housing projects and because of local opposition in many communities.

Here is how the rent supplement program would work. The supplements would be payable only to cooperatives and nonprofit organizations. To be eligible, a family would have to be a low-income family—a family which, under its income, could not find housing that was not a slum house. In addition to that, they would have to be elderly, handicapped, displaced, or now living in slum housing.

The supplement would be the difference between one-quarter of their income and the rent of the new cooperative unit.

Let us take a look at some of the figures, to see how this would work.

Mr. WAGGONER. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Fifty-one Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 160]

Baring	Gibbons	Jacobs
Bonner	Greigg	Keogh
Bow	Harvey, Ind.	Lindsay
Brown, Ohio	Hays	Mackay
Dent	Hollifield	Martin, Mass.
Evins, Tenn.	Holland	Morse

Morton
Passman
Powell
Reid, N.Y.

Rivers, Alaska
Roosevelt
Springer
Steed

Thomas
Toll
Tupper

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. Flood, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 7984, and finding itself without a quorum, he had directed the roll to be called, when 404 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The gentleman from Wisconsin has 12½ minutes remaining.

Mr. REUSS. Mr. Chairman, I was proceeding, in a low pressure and uncontroversial manner, to explain the rent-supplement program when the quorum was called, not by me, but I am very grateful for the attendance and the attention both, because this is an important matter.

This is a comprehensive bill. It contains three features which particularly strengthen it.

By insuring an interest rate of 3 percent on cooperative, college, and elderly housing, it will give a much-needed boost to the middle-income housing market.

It greatly improves our existing open space law, by permitting open space grants for areas that contain buildings which need to be torn down for parks or plazas, and by grants for beautification of open areas, as by providing garden plots for senior citizens.

Thirdly, there is the rent supplement program of section 101—what President Johnson has called the most crucial new instrument in our effort to improve the American city. It was approved by the Housing Subcommittee by a bipartisan 10-to-1 vote. The rent supplement program is designed to provide a program, additional to public housing, for meeting the needs of those who now live in slums.

Public housing cannot do the job alone. In 1964, only 24,000 public housing units were constructed—which is the average for the last 5 years—and 15,000 of these were for the elderly. In 21 of the 25 largest northern cities, no public housing units were constructed in 1964. In Baltimore, Cleveland, Detroit, and Boston no public housing projects for families at all have been constructed in the last 3 years.

Public housing can do only a limited part of the job of meeting the needs of the 500,000 families now on its waiting lists. This is because sites are difficult to find, and because of opposition in many areas to public housing.

Likewise, the subsidized cooperative housing program last year produced only 14,000 new units. And even these were for moderate, rather than low-income families. A typical rent under this program for a two-bedroom unit is \$100 a month. For a regular FHA unit, it is close to \$200.

Here is how rent supplements would work. They can be payable only to privately sponsored, financed, and built cooperatives, limited dividend and non-

profit corporations. To be eligible, a family must be in the low-income public housing range—four times the minimum rent in the community for a nonslum unit; in addition, they must be elderly, handicapped, displaced, or now living in slum housing. The supplement will be the difference between one-fourth of the family's income and the fair market rental of the cooperative unit. These units must be modest in design.

Suppose the minimum rent in the community for a nonslum two-bedroom unit is \$110 a month. A family making \$400 a month, or \$4,800 a year, would be eligible for a rent supplement in a 221 (b) (3) project renting for \$120 a month. The rent supplement would be \$20 monthly—the difference between one-fourth of the family's income and the market rental.

There are today more than 5 million families with incomes too low to afford decent housing, and are elderly, handicapped, displaced, or living in slums. We hope to take care of 500,000 of these over the next 4 years. They would not be built without the rental supplement program. When built, they will provide good housing for many times the number of rent supplement recipients.

SUPPORT FOR THE RENT SUPPLEMENT PROGRAM

Mr. Chairman, the rent supplement program has been the most widely discussed and seriously considered of all the proposals in this bill.

The rent supplement program was endorsed by housing spokesmen for the AFL-CIO. It was endorsed by the spokesmen for America's homebuilders, the National Association of Home Builders. It was endorsed by the spokesmen for those largely responsible for investing private capital in the homebuilding industry, the Mortgage Bankers Association of America, the American Bankers Association, and the National Association of Mutual Savings Banks.

The rent supplement program was favored by a number of groups representing the elderly, including the American Association of Homes for the Aging, the National Council on the Aging, and the National Council of Senior Citizens.

The cooperative movement supported the program with the strong endorsement by the Cooperative League of the U.S.A.

Social service people who know the problems of the poor supported the program through the favorable testimony of the National Federation of Settlements, the National Conference of Catholic Charities, the Community Service Society, and others.

Many of the mayors of our cities who know at first hand the need for additional housing for low-income people endorsed the rent supplement program. It was recommended to the Committee by housing experts of the National Housing Conference and the Joint Center for Urban Studies of MIT and Harvard University.

These groups support the rent supplement program because they recognize the need for new and additional tools to stimulate the construction of decent housing for people who now live in slums.

OPPOSITION TO RENT SUPPLEMENT PROGRAM

Of course, there is opposition to the rent supplement program. Most of it comes from those who have, over the years, fought every program to provide additional decent housing—from the creation of the FHA, through public housing, and the 221(d)(3) program.

Many of the arguments used against the rent supplement program have an old familiar ring. We have heard them every time Congress has voted on enactment of a new program to help the poor.

Let me quote to you, Mr. Chairman, from the statement of minority views in the Report of the Committee on Banking and Currency, the words we have heard so often and have come to know so well.

The rent supplement program they say is, and I quote, "Foreign to American concepts." They say it is, and again I quote, "The way of the socialistic state."

These are the same words—"un-American" and "socialistic"—that the Republican Party has applied to the social security program, minimum wage legislation, the Agricultural Adjustment Act, the Wagner Act, the unemployment insurance program, and just about every other piece of legislation designed to benefit the American people enacted by this House in the last 32 years.

The American Bankers Association is for rent supplements. Bankers are Socialists?

The Catholic Charities support rent supplements. Catholics are un-American?

Let me say to my friends who have seen the wonderful things that public housing has done and can do that the public housing program has nothing to fear from the rent supplement program. There is no shortage of poor families who need standard housing. This bill has more in it for public housing than any bill enacted by this Congress in the last 16 years. And it is needed. And the rent supplement program is needed. Both are needed to provide decent housing at rentals that poor people can afford.

Mr. Chairman, I say to my friends that those poor families who now live in slum housing, and cannot afford decent housing, are not concerned with the name we give to the program which can provide decent housing for them. They do not care whether the decent housing they need will be constructed under the public housing program or the rent supplement program.

The poor cannot afford to be doctrinaire. They are not interested in jurisdictional disputes among bureaucrats.

The slum housing they now occupy does not cease to grind and oppress them because their names are on a waiting list for a public housing unit. They are no longer patient with the very real problems of selecting a site for a public housing unit.

To provide decent housing for the poor, we need both the expanded and improved public housing program this bill would provide and the rent supplemental program.

DISTORTIONS AND ERRONEOUS STATEMENTS OF FACT

Erroneous data and distortions are being used to confuse the Congress and the American people on the facts of the rent supplement program.

With a straight face, the opponents of the rent supplement program have alleged that under this program there will be built three-bedroom units that cost \$29,000; four-bedroom units that will cost \$32,987; and penthouses that will cost \$100,000.

They have drawn for us the specter of the Federal Government paying subsidies of \$252 a month for families living in four-bedroom units which rent for \$315 a month. They have painted a picture of a family with no income, which is on relief, living in a \$100,000 penthouse for which the Government will pay \$800 a month in rent.

Such wild distortions may amuse those who dream them up. But they are not true.

The rent supplement payments authorized by the bill could be made only with respect to housing of modest design. Under the bill, rent supplement payments can be made only with respect to housing constructed in accordance with the standards that have been set for the existing 221(d)(3) moderate-income housing program. Under that program, the Federal Housing Administration cannot insure a mortgage if the rentals required to amortize the mortgage are greater than the rent that can be paid by a family whose income is less than the median income in the area.

In the 4 years that the 221(d)(3) program has been in operation, the average amount of a mortgage per unit under that program has been approximately \$12,500. If the rent supplement program had been in operation during this 4-year period, the average amount of a mortgage per unit under the program would have been just about the same amount.

These are the facts the opponents of the rent supplement program want to avoid. No hundred-thousand-dollar penthouses—no four-bedroom units renting for \$315 a month—just modestly designed, decent housing that families in the community who make less than the median income in the community can afford to rent.

Mr. Chairman, the facts are not as amusing as the tale told by the opponents of the program—they do not make for catchy headlines—but they have the virtue of truth.

The opponents of the rent supplement program have alleged that this program will serve upper middle income families. They have alleged that the setting of income ceilings for families for whom rent supplement payments may be made will be purely discretionary with the housing administrator—and, at the same time, they have published a table—which, Mr. Chairman, you will find in the statement of minority views, on page 179 of the committee report—that purports to show the income ceilings to be set for families in a number of cities. To lend credence to this table, the opponents of

the rent supplement program allege it was submitted by the Housing and Home Finance Agency.

Here is the truth of the matter. The Housing Agency submitted no such table. Further, data in the table are completely inaccurate.

Let us examine the facts as they actually are with respect to several of the cities covered by this phony table.

In Milwaukee, the table indicates a large family with an income of \$8,300 may have a rent supplement payment made on its behalf.

Mr. Chairman, the Housing Agency has informed me that at present no family in Milwaukee—no matter how large—could have a rent supplement payment made on its behalf if its income exceeded \$6,000. And, Mr. Chairman, the Housing Agency has informed me, that in Milwaukee, at present:

No family requiring a three-bedroom unit could have a rent supplement payment made on its behalf if its income exceeded \$4,560 a year.

No family which required a two-bedroom unit could have a rent supplement payment made on its behalf if its income exceeded \$4,080 a year.

And no family which required only a one-bedroom unit could have a rent supplement payment made on its behalf if its income exceeded \$3,600 a year.

The same phony table indicates that in Newark, N.J., a large family with an income of \$8,750 may have a rent supplement payment made on its behalf.

The Housing Agency has informed me that at present no family in Newark could have a rent supplement payment made on its behalf if its income exceeded \$6,000. And, Mr. Chairman, the Housing Agency has informed me, that in Newark, today:

No family requiring a three-bedroom unit could have a rent supplement payment made on its behalf if its income exceeded \$5,520 a year;

No family which required a two-bedroom unit could have a rent supplement payment made on its behalf if its income exceeded \$5,040 a year; and

No family which required only a one-bedroom unit could have a rent supplement payment made on its behalf if its income exceeded \$4,560 a year.

I could go on through each of these cities listed in the table and show how the data set forth in the table overstates by very substantial amounts the maximum income a family may have and still have a rent supplement payment made on its behalf.

Mr. Chairman, the opponents of the rent supplement program have also completely misstated the manner in which income ceilings in the various communities will be established. They have alleged that the setting of such ceilings is purely discretionary with the Housing Administrator.

This is not true. The bill is very precise as to the amount of income a family may have and still be eligible to have a rent supplement payment made on its behalf.

Under the bill, the Administrator, as we have seen, would be required to de-

termine the lowest rent required, in different areas of the country, to obtain a standard one-bedroom, two-bedroom, three-bedroom, or four-bedroom unit. This type of finding is not new. It is a purely factual finding which must be made administratively and cannot be prescribed in the statute, simply because the facts vary from time to time and from place to place. Similar findings now have to be made in other Federal housing programs.

If in a community a standard one-bedroom unit can be rented for, say \$75 a month, a family which needs a one-bedroom unit can have a rent supplement payment made on its behalf only if its income is less than \$3,600. In other words, any family which, in its own community, can with 25 percent of its monthly income obtain standard housing is not eligible to participate in the rent supplement program.

The Housing Administrator has no authority to make any rent supplement payment on behalf of a family which, with one-fourth of its monthly income, can pay the monthly rental required for standard housing in the area.

As I said a moment ago, there simply is no document issued by the Housing Agency, as set forth on page 179 of the minority report, which in any way gives higher figures. These are the proper figures. These are the figures issued by the Housing Agency. But because there has been mention of such a document, I would like to call on anyone here right now and particularly some of the members of the minority to produce this Housing Agency document so I can see what it says, because I have never been privileged to see that document.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I will be glad to yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. I hand the gentleman the document I described on the floor and which I intend to get permission from the Speaker to introduce and put in the RECORD.

Mr. REUSS. I now look at the document which I see for the first time and I note that it is a carbon copy of a type-written document with the date April 21, 1965, at the top and no indication whatever of who prepared this document; no indication whatever that it was prepared by the Housing Agency. Indeed, I have the assurance of the Housing Agency that they had nothing to do with this document and have never seen it.

I ask the gentleman from Michigan where he gets this information that the Housing Agency prepared this document.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman.

Mr. HARVEY of Michigan. I thank the gentleman for yielding. I would point out to the gentleman, as I pointed out in my original remarks describing this document, that it was first used by a majority staff member. I think the gentleman would agree that we on the minority cannot be expected to have the original of a document. After all, we are the minority. We do well to get copies.

I would point out to the gentleman further that I pointed out the peculiar information contained in this document, the peculiar information relative only to members of the Subcommittee on Housing itself. Then I pointed out the peculiar comparison of figures contained in this particular memorandum. I would cite to the gentleman, showing the authenticity of this and showing that it was used at the press conference held by the majority on the day that this housing bill was reported out of our subcommittee, the article which appeared in the Wall Street Journal of Friday, May 7, 1965, wherein appeared the identical figures for rent supplement areas in Philadelphia, Toledo, Pittsburgh, Macon, Providence, San Antonio, Milwaukee, Paterson, New York, Newark, and even Saginaw, Mich., where I come from—it so happens the Housing Director knows that I come from Saginaw, Mich., and I thank him for that.

Mr. REUSS. I thank the gentleman, but I defy the gentleman to point out any word or designation on the piece of paper which he has just shown me—and this is the first time I have seen it—which indicates that the Housing Agency had anything to do with it.

Let me say to the gentleman that I have been reading in the press recently about various activities carried on in the home office of the Republican National Committee, consisting largely of the pilfering and filching of documents and papers from various desks in that establishment. I would like some assurance, if anyone can give it, that this paper was not among those that were carted away from that place.

Mr. HARVEY of Michigan. I can assure the gentleman that this was not pilfered or filched from any place.

Mr. REUSS. I am glad to have that assurance. That makes the document, so far as I am concerned, worth about 1 plug nickel, because it was not issued by the Housing Agency as alleged. I am glad to have the assurance that it was not taken from the Republican National Committee headquarters.

Mr. HARVEY of Michigan. Mr. Chairman, if the gentleman will yield further, as long as the term "filching" has been brought into this, it seems to me that it makes no difference whether this document was prepared by the Housing and Home Finance Agency itself, as another scurrilous document was, which was admitted, or whether it was prepared by the majority staff; regardless of that fact, I sat at the press conference when this document and these figures were used, and these figures appeared in the Wall Street Journal of the next day.

Mr. REUSS. Mr. Chairman, the Members of this House will shortly have an opportunity to be recorded for or against the rent supplement program. The issues are very clear. The Members will be indicating whether they are for or against more decent housing for low-income people; for or against harnessing the energies and abilities of private enterprise to provide this housing; for or against the poor.

I urge Members to heed the call of

their minds and their hearts and their conscience and support the rent supplement program.

Mr. FEIGHAN. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman.

Mr. FEIGHAN. In estimating the family income will the income of all adult members of the family be included?

Mr. REUSS. Yes, the income of all adult members of the family will be included.

And, there also will be included in that any public payments, relief, or social security which they receive, the purpose of the law and regulations being to see that only genuinely low-income people can benefit from this program, because that is exactly what it is for.

Mr. FINO. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from New York.

Mr. FINO. The gentleman has made reference to section 101 and has devoted a great deal of time to that section.

Would the gentleman show me where in that section there is any reference to low-income families?

Mr. REUSS. Yes; the gentleman from Wisconsin will be delighted to do that. There are references to this throughout the bill and, specifically, on page 5 of the report.

Mr. FINO. Not the report.

Mr. REUSS. This is the legislative intent and it is just as binding as if it were written in the bill. If the gentleman will move to put these words in the report which I am about to read into the RECORD and put them in the bill, I shall be the first to vote for them. These words are—

Mr. FINO. Mr. Chairman, will the gentleman yield further?

Mr. REUSS. The gentleman from New York will have to listen to me, and I read as follows:

In order to help achieve low rents, projects containing units for which rent supplement payments could be made would be of modest design, constructed to the standards prescribed for the FHA section 221(d) (3) below-market interest rate insured loan program.

These words specify that this is not luxury housing, but spare, austere housing designed to help the low-income people of this country.

Mr. WIDNALL. Mr. Chairman, I yield 5 minutes to the gentlewoman from Ohio [Mrs. BOLTON].

(Mrs. BOLTON asked and was given permission to revise and extend her remarks.)

Mrs. BOLTON. Mr. Chairman, I do not very often trouble the Members of this House with my words but today I am impelled to do so.

Mr. Chairman, I feel that this bill instead of just dealing with superficial things, serious as they may be—the housing of our people—deals with something infinitely deeper and more serious.

Mr. Chairman, during the war there were paragraphs or phrases and sentences in some of the high school books, particularly those that went to our soldiers that said in effect:

Don't be troubled about your homes. It is no longer necessary for you to save money to buy your own home, because if you don't have a home the Government will give it to you.

Mr. Chairman, at that time feeling ran high about the Government doing everything for everybody. However, a group of men and women were able to have that expunged. Now here it is again in full force.

What does it do? Well, I have watched the march from the limbo into which we hoped we had thrown it, coming up bit by bit closer to achievement. Has the American man become so spineless that he can no longer provide a home for his family?

Mr. Chairman, I am not ignorant of poverty. I know what it is. I have worked in the thick of it. It is not a matter of which I am ignorant.

Mr. Chairman, I am not speaking against the people who have been unable to have a happy, carefree life. I work constantly to build their weaknesses into strength. But I am speaking of those who are in danger of losing the morale that means life to the country and to themselves as well.

Mr. Chairman, if a man is not interested in building his own home how can we expect to have him interested in building his country? What is he willing to do for his country?

Mr. Chairman, the home is the center of life in our country. It has been and I certainly hope it will be again. It really is now.

It is very difficult for me to believe, even with the 2-to-1 majority, that you Members across the aisle have—that you are so deeply absorbed in this doctrine, this new doctrine, of “let George do it, and do not bother,” that you are ready to take from free men the very basic fundamental desire to be responsible for their homes.

Away back when we came over from the Old Country, if a man had an ax to put in his belt he could start out. He would build a home. Out in Cleveland our men built cabins of three sides with the fire on the fourth side. We did not have any schools, we did not have things like that. My great-grandmother took her two children, one in front and one behind her on a horse over the Indian trails back to New Haven where there were schools. I do not know whether we could do that today even if there were Indian trails available. But those were the times when men respected each other and themselves, and they knew something about what real life was all about.

I am wondering if you are at all aware of the dangers of this new doctrine. Are you quite certain that when you make it possible for a man to feel little if any responsibility for his home, you are not endangering the very foundation stones of our free land?

I am wondering also whether such an attitude can hold a real woman's love and earn the respect of children.

I urge you to think well before you vote.

Mr. BARRETT. Mr. Chairman, I yield 8 minutes to the gentleman from Pennsylvania [Mr. MOORHEAD].

(Mr. MOORHEAD asked and was given permission to revise and extend his remarks.)

Mr. MOORHEAD. Mr. Chairman, I rise not only to support this housing legislation but also to pay tribute to your Housing Subcommittee, especially to the chairman and ranking minority member of the Housing Subcommittee. All of the members of the subcommittee, but especially these two gentlemen, worked manfully to bring out a bill that could be supported on a bipartisan basis.

In view of the heated debate today, this proposition may be hard to believe but, Mr. Chairman, I submit I can prove it to you. A measure of the success of these two gentlemen was the fact that the members of your Housing Subcommittee, the members who heard the witnesses, and the members who marked up the bill, voted for the bill by a vote of 10 to 1.

Another measure of the success of this bipartisan approach is that there are some 70 sections in this 107-page bill and there is serious controversy over only one section of the bill.

Now this success was accomplished by combining portions of the administration bill, as it was amended, with portions of H.R. 6501. Sometimes similar programs from each bill were adopted even though they differed more in name than in basic philosophy.

Mr. Chairman, more than 300 years ago William Shakespeare said:

What's in a name? That which we call a rose by any other name would smell as sweet.

If Mr. William Shakespeare could attend our debate here today, he would doubt his prowess as a prophet.

Today we are told that the administration's section 101, rent subsidy program, does not smell as sweet as the Republican section 103, the rent subsidy program. On page 185 of the committee report the gentlewoman from New Jersey [Mrs. DWYER] points with justifiable Republican pride to the rent certificate program saying:

We incorporated our own rent certificate plan as a less expensive substitute for a portion of the conventional public housing program.

In another minority report, not signed, I might add, by the gentlewoman from New Jersey, there is an attack on the philosophy of that very same rent certificate program.

Now if someone would propose to amend section 101 by substituting the word “supplement” with the word “certificate” I would urge our chairman to accept it because, Mr. Chairman, I believe that Gertrude Stein echoed William Shakespeare's sentiments when she said, “A rose is a rose is a rose.”

Mr. Chairman, your Subcommittee on Housing unanimously agreed that there was a need for something—some program in addition to the public housing program to meet the needs of low-income families. To meet these needs the Republicans on the housing subcommittee proposed a “rose” which they call rent certificates. To meet these same needs, the Democratic members proposed

a “rose” which they call rent supplements.

Both of these programs are new programs. None of us, Mr. Chairman, on your Subcommittee on Housing can guarantee that either the rent certificate or the rent supplement program will work, but, Mr. Chairman, the members of your Subcommittee on Housing decided that the housing needs in America should be met in a bipartisan way.

Mr. Chairman, what your Subcommittee on Housing by a nearly unanimous vote decided was to try both the rent supplement and the rent certificate program.

After a few years the Congress can review the administration of both these programs, and then in the light of actual experience, determine whether one or the other or both of these programs should be continued or discontinued or modified.

I stand here in the well of this House in support of the bipartisan accord that was reached in the Subcommittee on Housing. I must confess, however, Mr. Chairman, that when this legislation reached your full Committee on Banking and Currency, the bipartisan accord began to come apart at the seams. Some of the Republican members mounted an attack on the rose named “rent supplement” although they maintained a discreet silence insofar as its twin brother called rent certificate was concerned.

Mr. Chairman, there are some 70 sections in this bill and on all of these sections except for section 101 there is almost unanimous bipartisan support.

I recognize the partisan political problems of the minority party here today. They feel the necessity of finding something that they can oppose.

But I say to my friends on this side of the aisle, let us recognize that this is the attack that we are facing—it is a partisan, political attack.

And I say to my friends on the other side of the aisle, reconsider your opposition. I think that the American people are firmly committed to the bipartisan principle of the Taft-Ellender-Wagner Housing Act of 1949 of a “decent home and suitable living environment for every American family.”

Both section 101, rent supplements, and section 103, the rent certificate programs, are designed to accomplish this objective.

As the New York Times said in its editorial published today:

The rent subsidy, a key provision of the administration's housing bill, is expected to come under sharp attack in a House vote today.

The Times continued:

If it is rejected, the action will be a triumph for semantics and a defeat for logic.

The New York Times continued:

The Republicans in the House have likewise proved more partisan than constructive in making an issue out of this program. They have gone counter to the leadership of Representative WILLIAM B. WIDNALL, of New Jersey, the ranking minority member on the Housing Subcommittee and the GOP's foremost housing expert.

The New York Times continued:

A vote against the rent subsidy program would be a vote against some of the most defenseless members of society. The House ought not to place this black mark against the good record of the 89th Congress.

Mr. Chairman, we on the Democratic side are willing to give bipartisan support to the Republican rent certificate program. I ask you to consider whether you are making a political mistake by refusing to give bipartisan support to the section 101 rent-supplement program.

Mr. Chairman, under previous consent obtained in the House, I will extend the full New York Times editorial in the RECORD following my remarks.

RENT SUBSIDY

The rent subsidy, a key provision of the administration's housing bill, is expected to come under sharp attack in a House vote today. If it is rejected, the action will be a triumph for semantics and a defeat for logic.

Almost every kind of housing now receives a Federal subsidy, direct or indirect. Housing for veterans, for old people, and for farmers is subsidized. There are public housing programs for the very poor; the Federal Housing Administration provides mortgage insurance for one-family dwellings for the middle class; even luxury apartments for upper-income citizens often get an indirect subsidy under the urban renewal program.

Under these circumstances, the opposition that has flared up against the rent subsidy idea seems almost bizarre. The administration's proposal would simply enable the Government to pay the difference in rent between one-quarter of an impoverished family's income and the fair rental value of its apartment. This subsidy would be paid on housing constructed or rehabilitated by limited-dividend corporations. Since there are 500,000 families already on the waiting list for admission to public housing, a supplementary approach is badly needed. The rent subsidy provides that approach.

The plan has the great advantage that it would enable low-income families to continue living in buildings that have been made fit for living. Up to now, the renovation of a slum has usually meant that a sizable number of tenants who could not pay the new rents had to move elsewhere, often to even worse quarters.

The rent subsidy can become a critical component in the war against poverty. According to the 1960 census, three-fourths of families with an income of less than \$2,000 paid 35 percent or more of their incomes for rent. Of families earning \$2,000 to \$3,000 a year, one-third paid 35 percent or more for rent.

The old guard administrators of public housing who oppose this rent subsidy program because it intrudes upon their long-standing monopoly have scarcely displayed the compassion and disinterestedness appropriate to those dedicated to aiding low-income families. The Republicans in the House have likewise proved more partisan than constructive in making an issue out of this program. They have gone counter to the leadership of Representative WILLIAM B. WIDNALL, of New Jersey, the ranking minority member on the Housing Subcommittee and the GOP's foremost housing expert.

A vote against the rent subsidy program would be a vote against some of the most defenseless members of society. The House ought not place this black mark against the good record of the 89th Congress.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. The gentleman created two impressions which I believe are erroneous.

I served with the distinguished gentleman from Pennsylvania, whom I regard very highly, on the subcommittee.

Mr. MOORHEAD. I thank my friend from Michigan, and I wish to say that I have a very high regard for him, too.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. BARRETT. Mr. Chairman, I wonder if the gentleman from New Jersey would be willing to allocate some time to the gentleman in the well?

Mr. WIDNALL. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I am glad to yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. The impression created was that we are opposed to all this housing bill.

Mr. MOORHEAD. I did not mean to leave that impression.

Mr. HARVEY of Michigan. Let me say, about that, I stood up yesterday and I thought I made clear that we were very grateful for the more than 20 minority proposals in this bill.

Mr. MOORHEAD. I said there was bipartisan support for all of the bill except the one section.

Mr. HARVEY of Michigan. As the gentleman knows, I support all of the bill except one section.

Mr. MOORHEAD. If I left the impression, I certainly retract it. There is bipartisan support, except for one section.

Mr. HARVEY of Michigan. The other erroneous impression was that the rent-supplement program in section 101 and the rent certificate program in section 103 are the same. I would point out to the gentleman that as he was talking I started looking over section 103 again, and I noted at least eight places where the words "low income" and "low rent" appear. They do not appear anywhere in section 101, because that is a program not designed for low-income people, as Dr. Weaver said.

Mr. MOORHEAD. I decline to yield further, until I have an opportunity to answer the contention about low income.

The words "low income" appear first in the title of the bill. Then they appear in the title of title I. Then there is a computation on page 3, lines 12 through 15. This computation on page 3, lines 12 through 15, says that rent supplements shall go only to people who have to live in slums unless they pay more than one-quarter of their income for rent. That to me is a computation of lower income, and follows the title of the section.

Mr. HARVEY of Michigan. The gentleman has not pointed out one place where the words "low income" appear in the bill.

Mr. MOORHEAD. Page 2, line 4.

Mr. HARVEY of Michigan. The gentleman is talking about "lower" income. Lower than what?

The gentleman from Wisconsin referred to families on Park Avenue, which I wanted to discuss with him. In the hearings he said that everybody even living on Park Avenue would be getting a supplement.

I should like to point out one other big difference between section 101 and section 103; that is, the contracts under section 103 would run only 12 to 36 months.

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

Mr. WIDNALL. Mr. Chairman, I yield 1 minute to the gentleman from Michigan [Mr. HARVEY].

Mr. HARVEY of Michigan. Mr. Chairman, continuing my colloquy with the gentleman from Pennsylvania, who had the floor, the length of the contract is a very significant difference indeed. The rent certificates under the proposal of the gentleman from New Jersey [Mr. WIDNALL] are to be used for existing dwellings, of which we have a surplus in this country—a tremendous surplus—and the contracts will run for 12 to 36 months.

Now, one of our basic objections to your rent supplement program in section 101 is that you have contracts running for 40 years; \$200 million for 40 years. You are talking about expenditures of \$8 billion. That is one of the differences we object to right there.

Mr. MOORHEAD. Does the gentleman yield?

Mr. HARVEY of Michigan. No, I do not yield. You refused to yield to me.

Mr. MOORHEAD. I did not refuse to yield to you.

Mr. HARVEY of Michigan. I decline to yield.

I refer you to another difference found on page 11, if you have it, where the duties of the landlord are spelled out. I suggest you contrast those duties of the landlord as he is permitted to select his own tenants to those of the housing administrator as we know it today. You will find there is a tremendous difference indeed between the rent certificates under section 103 and the rent supplements under section 101.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. BARRETT. Mr. Chairman, I yield the gentleman from Pennsylvania [Mr. MOORHEAD], 1 additional minute.

Mr. MOORHEAD. Mr. Chairman, I thank the chairman of the subcommittee for yielding me this additional time.

I would like to explain to the gentleman that what I said was this: both sides of the aisle in the Housing Subcommittee recognized there was a need and the two programs were both designed to meet this identical need. Naturally there is a difference in detail. The section 103 program is not a free enterprise program but run by the public housing authorities across the country.

Mr. HARVEY of Michigan. But it usually—

Mr. MOORHEAD. I decline to yield to the gentleman.

There have been claims made about the leeway in the income limitation

under the two programs. Under the 103 program the public housing administrators can have these exemptions from income and additional expenses, because nothing is said in the report about that under section 103. But under 101, it is said that we must consider all of the income of all adult members of the family. The section 103 program—and I think it is a good program—has some difficulties. It is centralizing control in the local public housing authorities.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I decline to yield.

The section 101 program is the decentralizing of control in private agencies and private charities and nonprofit and private limited dividend groups.

(Mr. ST GERMAIN asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ST GERMAIN. Mr. Chairman, I rise in support of H.R. 7984—the Housing and Urban Development Act of 1965—a bill which merits the support of all concerned with the future of our communities.

We are growing at an unprecedented rate. Five years ago, some 125 million people were living in our urban areas. Five years from now the total will reach 150 million. By the year 2000, our urban population will near the 300 million mark.

All of us who, like myself, represent rapidly growing urban areas and communities are acutely aware of the pressures for housing, public works, schools, business and industrial facilities, transportation, and recreational needs that confront the local and State governments—and we know that without national support and resources this national growth cannot be effectively met or efficiently served.

We cannot afford to ignore these basic needs—we must plan ahead. And this is precisely what H.R. 7984 will do. Its primary objective is to keep up with the housing needs and the growth of cities and communities of all sizes. It also recognizes that Federal assistance is essential to reaching effective solutions to the problems of urban blight, and the improvement of the Nation's housing supply.

The bill launches a major assault on the problems faced by low-income families unable to afford anything but substandard housing. It establishes a new program of rent supplements for low-income families who are elderly or handicapped, who are displaced from their homes by public action, or who live in substandard housing. With such rent supplements some half million such families will be able to live in decent, safe, and sanitary privately built housing.

The housing needs of low- and moderate-income families would be further met by an extension of the Federal Housing Administration's mortgage insurance programs covering low-downpayment sales housing, and the below market and market interest rate programs for rental and cooperative housing.

The long-established low-rent public housing program, created by the Housing Act of 1937 would be extended and strengthened by permitting local hous-

ing authorities to lease existing privately owned structures—an authorization that would enable them to absorb vacant housing into their existing programs. This would also permit them to serve large low-income families who cannot pay the economic rents charged for larger accommodations on the private market. Think of the sociological impact here—I look upon this as having the potential of uplifting way of these people.

The existing urban renewal program, which over the past 16 years has been an effective deterrent to the spread of slums and blight in hundreds of American communities throughout the Nation, has been extended for 4 years at an increased rate of Federal aid. This bill authorizes more effective help for businesses and people displaced by redevelopment. The record of the federally aided urban renewal program over the years is a bright one—and it shows promise of continuing so.

The bill also includes various Federal aids to help communities meet the needs of a growing America, and provides special help for those faced with economic and unemployment problems. It calls for Federal grants to communities to provide adequate basic sewer and water facilities, as well as health, recreation, or similar community services.

The proposed legislation continues the open space land program of Federal grants under which urban communities are acquiring and developing land for parks and recreation facilities, while a related program would provide partial Federal grants to assist in carrying out local programs of beautification and improvement of open space and other public land in urban areas.

Finally, the problems faced by urban communities in planning for future growth and development are also recognized by the continuation of the existing programs of urban planning assistance grants, and by providing new aids to develop land for housing under FHA and to provide help to urban areas in meeting the need for expanded sewer, water, and other public facilities.

Mr. Chairman, in this brief sketch, I have tried to indicate the bill's importance to a rapidly growing America. These measures represent what this Congress must do now to serve that growth.

Mr. WIDNALL. Mr. Chairman, at this time I yield 5 minutes to the gentleman from Ohio [Mr. STANTON].

Mr. STANTON. Mr. Chairman, I rise in the well of this House to speak to my colleagues about an aspect of the 1965 housing bill which they might not have had time to study or to have brought to their attention before. I think it is my duty as a member of the Committee on Banking and Currency to do this.

I simply rise to point out to them a dangerous facet of this particular bill. I was always brought up to believe that the Constitution of the United States clearly left to the authority of Congress the purpose of legislating and the purpose of providing the money and the appropriation of money. My first doubts about this particular bill came when the administrator appeared before our committee and seemed to have very little backup material suggesting how this bill

would be carried out in its provisions and how it would be administered. His often-used remark was, "That will have to be determined." My colleagues, this statement from our administrator led me to take a very close look at this bill. I have read it over a dozen times. It is 107 pages in length. In these 107 pages you will find over 50 times in which this House delegates to the administrative branch of the Government an authority that I believe belongs in this room. To be very specific, there are 58 times in these 107 pages in which we find such remarks as the following: "pursuant to criteria or procedures established by the Administrator" or "where the Administrator may deem it desirable" or "as the Administrator considers appropriate."

Mr. Chairman, I think we have to realize in many types of legislation, especially in housing legislation and in urban renewal, in many sections of this bill we do have to delegate our authority, and to this I do not see much objection.

But I do object to the new section 101, a section which in reality consists of 5½ pages. In these 5½ pages we find eight times the following language persisting. First of all, we have heard considerable debate on the subject of what is called a qualified tenant. The great distinguished Member from the State of Ohio, the ranking majority member of the Subcommittee on Immigration asked the question, and the only place that I could find the answer in the bill, concerning a qualified tenant, is where it says it might mean any individual or tenant who qualifies "pursuant to criteria and procedures established by the Administrator."

On page 4 you find such statements in section 101—"as determined by the Administrator pursuant to procedures and regulations established by him."

Further on you see the statement:

The Administrator shall establish criteria and procedures for determining the eligibility of occupants and rental charges, including criteria and procedures with respect to periodic review of tenant incomes and periodic adjustment of rental charges.

I believe in the 4 hours that have been consumed in this debate thus far, 3½ hours have been spent on the one subject of section 101. We heard testimony which I was quite surprised to hear, that the committee report is in many ways equal to the bill itself. The debate I think could be very definitely limited if we considered one further statement. I believe it would be very clear to whom we were delegating authority.

On page 6, in section 101, we find the following:

The Administrator is authorized to make such rules and regulations, to enter into such agreements, and to adopt such procedures as he may deem necessary or desirable to carry out the provisions of this section.

Mr. Chairman, I think what we have in section 101 is an idea. Forgetting about the principle, which I am against, let us accept the premise for a minute and assume that it is a great idea. All we have is an idea and we are asked to delegate the authority of the Congress of the United States to the Administrator of a Federal branch of the Government, and

I ask the gentlemen on both sides of the aisle, whether or not they are for or against rent supplements, what they think of that. I point this out as a great principle.

I say to you at this time that we ought to stop and think for just a minute before we delegate our authority away in a bill that contains 107 pages, and in that bill 58 times we give our authority away.

Mr. WIDNALL. Mr. Chairman, I yield 10 minutes to the gentleman from Kansas [Mr. MIZE].

(Mr. MIZE asked and was given permission to revise and extend his remarks.)

Mr. PIRNIE. Mr. Chairman, will the gentleman yield?

Mr. MIZE. I would be happy to yield to the gentleman from New York.

Mr. PIRNIE. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to H.R. 7984.

(Mr. PIRNIE asked and was given permission to revise and extend his remarks.)

Mr. PIRNIE. Mr. Chairman, today I find myself in opposition to a measure that in name and objective I would gladly support. I speak, of course, of the housing bill that is now before us.

Shortly after coming to Congress, I was among those who helped to pass the Housing Act of 1959 and, on last August 13, I again voted for a major housing measure that was passed in this Chamber.

Throughout my years in Congress, I have been an advocate of limited Federal housing programs because of my sincere belief that one of our main tasks is to develop sensible and realistic programs to aid those who cannot help themselves and to give assistance and encouragement to those who need a helping hand, not a handout, as they attempt to improve their living conditions.

The bill before us represents a startling departure from the theory of the housing measures which have preceded it. The area of the measure that has been the subject of the widest criticism—criticism that, in my opinion, is justified—is that section dealing with the proposed program of rent subsidies for middle income housing.

Personal conviction about the role of the Federal Government, combined with a deep sense of responsibility to those I have been elected to represent, prompts me to vigorously oppose this rent supplement proposal.

I would like my colleagues to know that the people of New York State have already spoken on this issue. In 1962, a proposal to provide rent subsidies for middle-income housing was passed by the State legislature and placed on the ballot, for voter decision, in the November election. That proposal was defeated by the voters of New York State in every county outside of New York City and in four of the five counties that comprise New York City.

Closer to home, for me, the voters in my 32d Congressional District, comprised of Herkimer, Madison, and Oneida Counties, were overwhelming in their opposition to the proposal. In Herkimer County, the vote was 8,371 to 2,180, in

Madison County, 9,075 to 1,488 and in Oneida County 33,762 to 10,105—all against. The people of my district and my State have spoken and I believe their decision to be soundly based.

To me, we have come to a crossroad. Shall we continue in the same direction that has served us so well in the past, or shall we turn sharply to the left and proceed down an avenue that most likely will lead to a program of direct Federal control over all housing programs. I see this latter choice as a dangerous one indeed.

Mr. Chairman, the idea of Federal subsidization of rents is not new, but up until the present, it has been limited to the low income families residing in public housing. I have supported such a program as a means of preventing slums and as a way to promote healthier community life. This approach has proven effective and should be continued. There is no valid reason to do otherwise.

Mr. MIZE. Mr. Chairman, in this bill there is a great deal to support. For example, the whole of title IX dealing with farm and rural housing. Howard Bertsch, Administrator of the Farmer's Home Administration, U.S. Department of Agriculture, pointed out in his testimony before the subcommittee that rural housing has been and still is inferior to city housing. Nearly half of the families who live in substandard housing are on farms, in the open country, or in small towns and villages although only one third of our population is there. Thus, the percentage of rural families living in substandard housing is twice as great as city families. He pointed out that in 1960, there were close to 15 million families living on farms, in the open country and in small towns and villages. Almost 3 million of them lived in deteriorating homes that needed more repairs than could be provided in the course of regular maintenance. One of three homes in rural area did not have bath facilities. One out of five did not have water piped into the house. Three out of five did not have central heat. About a third of the Nation's elderly men and women live on farms and in small towns and villages. Yet—this deplorable housing in which millions of rural people live has received considerably less attention than the slums in cities. Less has been done to give rural families an opportunity to live in a decent home. Since 1949, when the rural housing program started, only about 90,000 loans have been made to repair or build homes. During the same period, more than 3 million homes have been financed with FHA insured loans. Another major handicap rural families face is the adequacy of housing credit to rural area and the terms of such credit when it is available. Here equality of opportunity does not exist and this bill will help bridge the housing credit gap. I feel the role of the Farmers Home Administration should be expanded in this area—because while we are completely sympathetic with housing problems in urban areas if more attention was paid to the rural areas and smaller communities, more people would stay there and not

flock to the cities and compound the already serious problem in many cities.

Title V, dealing with college housing which will be largely concerned with providing dormitories is worthy of full support.

Title IV, which will considerably ease the problems inherent in condemnation proceedings in connection with land acquisition—for federally assisted development programs under the act.

Title III, dealing with urban renewal and many other sections dealing with programs of the Federal Housing Administration are desirable proposals and extensions of programs which can be supported by this Congress.

Unfortunately, all that I have listed and more besides is dwarfed by the expenditures and philosophy of section 101—the rent supplement concept. In my individual views to the committee report I pointed out—and I quote:

The costs of section 101 alone, however, which commits the Federal taxpayer to payments of \$200 million annually for 40 years, if the plans expressed in the bill are enacted into law and carried out will amount \$8 billion.

Further I said in my individual views, and I quote:

Another factor not considered in our deliberations, is the rising cost of construction—we are no longer committed to units for low income and disabled—we are committed to dollars.

In answer to these contentions—in paragraph 13 of the so-called committee print, dated June 11, 1965, titled "Correction of Misleading and False Statements Concerning Rent Supplement Program," the administration admits, and I quote:

The bill provides a definite dollar limit to which the Federal Government can be committed—that is, \$50 million annually during the first year and an additional \$50 million authorized for each of the next 3 years—a total of \$200 million annually. The cost of this program over the 40 years could hardly be \$8 billion suggested by some, unless of course, we accept their total lack of confidence in the potential of the American economy to increase incomes and reduce the need for rent supplements.

Please note that even their response to my contention that the cost of the program can be \$8 billion—does not deny that contention—and does not refute the simple arithmetic problem that 40 years time \$200 million per years adds up to \$8 billion. And Mr. Chairman, may I ask if they do not intend to use \$200 million annually—why do they ask for it?

Now as to their implication that I lack confidence that the need will be reduced in time—I have only the obvious comment that the entire Federal housing program has grown in size and cost ever since it was started in 1937. Why anyone has any illusions it will reduce in size is whistling in the dark in my modest opinion. In this bill alone there are increases in the entire program included in 34 of the some 70 sections. Costs of construction are bound to increase as years go by, as they have in the past. Thus the money being stated as needed presently—\$200 million annually—simply will not accomplish what the administration says they want accom-

plished. The recognition of increased building costs is evidenced in this bill in the following sections.

Section 203: FHA's multifamily housing mortgage limits have been increased.

Section 206: Increase in maximum of mortgage limit for GI's \$20,000 to \$30,000.

Section 212: Mortgage limit for homes in outlying areas increase \$11,000 to \$12,500.

Section 702: Increases limitation on mortgages for dwelling units having four or more bedrooms from \$17,500 to \$20,000.

Yes, Mr. Chairman, the experience of the public housing program indicates that rising costs alone might very easily render the estimates of 1965 wrong within a matter of a decade. Also—if we now accept this new concept of rent supplements for those which the administrator determines are living in substandard housing—we must be prepared to eventually extend rent supplements to treat equitably all families whose housing costs exceed 25 percent of their income. Wow. What an exciting and costly prospect.

I would like to ask the distinguished chairman of the Subcommittee on Housing a couple of questions merely to clarify some things in my own mind.

To qualify for rent supplement in a community, do the communities—the towns and the cities—have to have an urban renewal program underway, or a public housing authority?

Mr. BARRETT. No. He qualifies on the basis of his being able to pay more than one-fourth of his income. He does not have to be in an urban renewal area.

Mr. MIZE. And people in communities, regardless of size, all over the country, when they read in the newspapers tomorrow of the passage of this bill, can start looking for a place to apply for rent supplement, whether it is Podunk, Okla., Oklahoma City, Chicago, or wherever it is.

Mr. BARRETT. They must meet all the requirements provided in the bill in order to qualify.

Mr. MIZE. Assuming they meet all of the requirements—I am talking about location—whether they live in Sharon Springs, Kans., Podunk, Okla., or Chicago, Ill.

Mr. BARRETT. This will be a choice made by the agency on the basis of the greater need of the area.

Mr. MIZE. I thank the gentleman.

Under section 106, which is a section that has not been alluded to in the debate thus far, the HHFA may make outright grants of \$1,500 to people whose incomes are less than \$2,000 to fix up their home. They can put a new toilet in, they can put on a new roof, and so forth. That is basically what is involved in section 106?

Mr. BARRETT. Yes.

Mr. MIZE. It says:

The Administrator may authorize a local public agency to make grants. Any such grant may be made only to an individual or family who owns and occupies a structure in an urban renewal area.

Will the gentleman tell me that to be eligible for one of these grants must he live in a community where they have an urban renewal project?

Mr. BARRETT. That is correct.

Mr. MIZE. I live in a town called Atchison, Kans. We have an urban renewal project, one of only four in the entire State of Kansas. Some person can come to our local urban renewal agency and make application for this loan. Can he get it if he qualifies?

Mr. BARRETT. If he lives in the urban renewal area.

Mr. MIZE. Down the river is Leavenworth, Kans. They do not have urban renewal projects and they do not have a public housing authority either. Some of the friends of the individual who are going to make an application and get a grant up in Atchison come from Leavenworth and ask his Atchison friend "Where do I have to go to get my grant to fix up my home?" He lives in equally unpleasant surroundings.

Mr. BARRETT. We would have to say, if he lives in an urban renewal area and the income does not exceed \$2,000 he is entitled to a grant up to a maximum of \$1,500.

Mr. MIZE. But a person living in Leavenworth would not be eligible for these grants because he does not live within a community having an urban renewal agency. Is that correct? I just want to be able to answer my constituents when they ask these kinds of questions.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PATMAN. Mr. Chairman, I yield 10 minutes to the gentleman from Georgia [Mr. STEPHENS].

(Mr. STEPHENS asked and was given permission to revise and extend his remarks.)

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the gentleman.

Mr. MULTER. I have asked the gentleman to yield so that I may comment on one point not mentioned by the last speaker. The gentleman did not mention that in order to get these grants, one person must meet all of the requirements—not some of them—but all of the requirements set forth in this bill, one of which is that he must have an income which would not permit to bring up the home to the standards of a decent house.

Mr. STEPHENS. Mr. Chairman, as a member of the Housing Subcommittee, I have enjoyed very much the opportunity to go into the details of the bill. I feel I have learned a great deal.

The housing bill for 1965, as now proposed, is comprised of a great number of compromises between the Democratic leadership on the committee and the Republican leadership on that committee. There are not portions of the bill which constitute great departures from the housing programs that we have developed in the past.

In only four particulars out of the many sections are there any really new ideas. The ideas themselves are not necessarily new but there is an expansion or an extension of ideas already in the housing bill. The first of the more or less "new" ideas is to provide machinery for a rent supplement to other than displaced persons who have been in urban

renewal projects. In other words, the idea of a rent supplement was in the 1964 housing bill.

The second departure, is not a new procedure for the Government to employ. It is to allow Federal participation in rehabilitating existing housing whereas heretofore it was limited to new construction except for the elderly. We had that in the 1964 bill too.

The third program is the farm program. The need for assistance in our farm areas has been ably described by my colleague from Kansas who just preceded me. That has been the program that will move the farm loan program, under the Farmers' Home Administration, into a lending program that will be backed up by the same type of insurance that has been utilized in the Federal housing program all along.

There is \$300 million authorized in the bill for the purpose of financing, on an insurance basis, farm loans. As Members realize, these are vitally and badly needed in the sections of the country I represent, in my district and in my State.

I might mention a few things with respect to title IX, which deals with the farm program, because Members will find that on the housing subcommittee I am the only Member who has a blade of grass in his district. The other Members are primarily from urban districts.

I am addressing myself to this because so much has been said about the rent subsidy. I intend to get around to my ideas on that, also, but I feel a little more should be told about the farm program than has been told.

One of my children at one time was being bragged about by me, and I heard my other little child say, "Daddy, tell them about me." I believe the other parts of this bill are persuasive. They are good parts. If we must take some not so good with the great parts of this bill, then I say to take some of the things we might not be able to like as much as we like the other things.

The fourth point of difference is that this bill will provide direct loans for water and sewer grants in other than depressed areas on a basis we have had only under the accelerated public works program.

As has been pointed out, about two-thirds of the Nation's people live in urban areas, but about 50 percent of the substandard housing is in the country. The money expended in housing, as shown from the hearings, by insurance investors only is almost \$58 million. Of that, only 12 percent of the total has been put in rural housing.

We have here a bill that will only help to break down what has happened in our rural communities. There has been only 1 rural loan for every 34 in the urban communities.

I want the people in the urban communities to help me on this, and I want to help them on what they need in the cities. If you help to make the farm a fine place to live, the city problems will not be as great, because people will not come to the city to crowd you and make further demands for housing.

But there is another thing I must be candid in admitting. As a Representative from a district which has only one county in it of over 100,000 and no town in it of over 75,000 people I am called upon to support farm programs, and I am happy and glad and willing to vote for cotton subsidies and for peanut and tobacco subsidies. But, how can I ask my friends from the city to help me with my subsidies unless I help on a subsidy that is needed, and badly needed, in the urban communities?

It is estimated by the U.S. Census Bureau that at least 1 million homes in rural areas, now occupied, are unfit to live in and should be condemned as hazards to the health and safety of the people living in them and to the communities where these houses stand.

Another 3 million rural homes are in need of major repairs and have no water or sewage facilities.

While it is true that there has been a rural housing program in existence since 1949, the original program was limited solely to farm families. During the first 4 years of that program, it made modest but encouraging progress—more than 16,000 homes were financed for farm families.

Then, in 1955, during the previous administration, the program was completely abandoned for 1 year and thereafter until 1961 it amounted to very little.

Upon administration recommendation in 1961 and by subsequent congressional action, the rural housing program was greatly expanded to include financing of homes for rural nonfarm people as well as farm families. It also included provisions for rural senior citizens, low-rent housing units for elderly people, and loans for construction of housing for domestic farm labor.

Since fiscal 1962 to the present time, Farmers Home Administration has made nearly 57,000 loans to rural people—or more than double the number of loans made between 1949 and 1961.

While this must be considered as encouraging progress in improving rural housing as compared to previous years, this progress as compared to the magnitude of the existing problem is distressingly slow. At the present rate of rural home building under this program, it will take more than 60 years just to replace the 1 million rural slum homes now in existence and now being occupied. And what about the 3 million rural homes that are now in need of major repairs, many of which rapidly deteriorate into the condemned condition each year?

I would also like to point out again that during the 16 years we have had a rural housing program, for every rural home built by Farmers Home Administration financing, some 34 urban homes have been built by Federal Housing Administration loans. At this point, I would again remind you that rural America has almost as many substandard homes as urban America—yet the ratio of progress is 1 to 34. This is not to say that I object to the progress being made in raising the standard of housing in our cities and suburbs—it should be greatly accelerated and it will be under this new

housing program. The point I am making is that similar progress should be made in our rural areas.

The President recognized this disparity of housing opportunity in rural areas, and now, so has our committee. On February 4, of this year, the President recommended in his farm message that Congress:

Enact legislation to equalize the availability of home mortgage credit in rural areas. This can be done by supplementing the mortgage insurance progress of the Federal Housing Administration with a rural mortgage insurance program to be administered by the Department of Agriculture. The Department has administered a direct housing loan program since 1949. But an insurance program will enable the Government to assist effectively a far greater volume of home building with a minimum of budget costs.

We have the opportunity now to provide the means by which people in rural towns and on inadequate farms can join the march toward a better life. We must seize this opportunity.

Title IX of this new housing program was drafted to try to carry out the President's recommendation and the majority of our committee believes it will. The principal objection to title IX voiced during the hearings was that the \$300 million authorization for low- and moderate-income rural people was too modest—that it was not adequate to meet the needs and demands of rural people. They pointed out repeatedly that Farmers Home Administration has been ending up in recent years with a backlog of more than 10,000 loan applications which they could not handle because of lack of funds. With new emphasis by the President for the revitalization of rural America, this backlog will grow even larger.

There was overwhelming consensus among the committee members and those that testified that the Farmers Home Administration was admirably qualified to handle this expanded rural housing program. It has had years of experience handling insured loans and its record has been little short of phenomenal.

That improvements in title IX of this bill can and should be made, I have no doubt. But this program is a great step forward and after a year or two of experience we shall be in a sound position to enact necessary improvements to meet the great housing gap which plagues rural America.

Except for title I, which deals with the rent-supplement features, there is no real opposition to the bill. As Members have seen from the debate, there has been a great deal of misunderstanding about the rent-supplement proposal.

The purpose of the legislation should be remembered. The entire purpose of the subsidy legislation is to provide better housing for a class of citizens who have been in a gap between public housing and private low-rent housing. That is the purpose of the rent subsidy. Do not forget the purpose.

It has been said that the legislation would pay a rent subsidy to people in this general class and would be a windfall to landlords of various types and classes of housing, including the so-

called luxury housing. This is not true. There are detailed restrictions which must be understood.

First, as to who may be a beneficiary of rent supplements; second, restrictions on income of beneficiaries; third, restrictions on who may be the landlord of the housing unit.

The first of these restrictions limits beneficiaries of the rent supplement further by saying only four categories may be involved—the elderly, the handicapped, and those displaced by governmental action. The intent of the committee, I am sure, when they said displaced by governmental action was those displaced under urban renewal programs and under the Federal highway program. That is the intent when you use that terminology. The fourth category, which is the category, of course, that creates the most controversy, is the fact that it applies to people who are currently living in substandard housing.

There is in the philosophy of housing a justification for the Federal Government assisting all of these categories of persons. The general justification is the ambition of all of us to assist by providing Americans with a good place in which to live and to rear their children. As far as aiding people displaced in urban renewal projects is concerned, the Housing Act of 1964 recognizes the justice of giving a rent supplement because these people were dislocated by action of the Federal Government. Our humanitarian interests impel us to recognize the elderly and disabled persons and it justifies assistance here. The next justification is in the rent supplement section with the income limitation. Before any persons in the category of eligibility can participate they must be making less annually than would enable them to live in standard housing in a local community.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I will yield for a question.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. PATMAN. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. BROCK. If the gentleman will yield, I appreciate this opportunity of asking him this question.

Did I understand the statement of the gentleman correctly when he said that a person would receive a supplement if they were unable to live in standard housing?

Mr. STEPHENS. That is exactly my understanding.

Mr. BROCK. I would like to see one section in this bill that relates to that subject. Anywhere in the bill.

Mr. STEPHENS. It says a person cannot be eligible unless he is living in substandard housing.

Mr. BROCK. That is an entirely different thing. There is nothing in this bill that says whether he is able to live in standard housing or not, but the only criterion in the bill is if he is in substandard housing and if better housing is available in excess of 25 percent.

Mr. STEPHENS. I think the answer to your question is the person who would move into substandard housing should be made subject to penalties under regulation just as they do in the social security system where, when they tell you a lie, they lose their social security.

Mr. BROCK. Mr. Chairman, will the gentleman yield further?

Mr. STEPHENS. Let me finish my statement. I have a little more time, and I do not want to get left here without finishing what I have to say.

The cost of living may vary from place to place in America in respect to the formula that is used. The cost of rentals may vary, also. A percentage formula is the only feasible way to make a rent supplement plan function. The formula is a simple one. You know, you have heard economists, domestic advisers, and people in family relations squabbles tell people, "You live beyond your means." They have always said that you should never spend more than 20 to 25 percent of your income for living purposes. If you go beyond that, you may be in difficulty. I say that there are sufficient information collection agencies of the local, State, and Federal Government where exact cost of living and rent standards in a housing situation can be specifically ascertained. There are also present methods in the public housing authorities and welfare departments for ascertaining the true income of applicants for assistance. So the ascertainment by a formula is not uncertain and indefinite.

The final restriction is one that should appeal to all of us, because the method for financing the housing that would be eligible for the rent supplement assistance is by private enterprise. There is a requirement, however, that the legal entity constructing the housing for rent supplement benefits or acquiring such housing shall be a nonprofit corporation, a cooperative association, or a limited dividend corporation.

All of the legal entities and their objectives shall be approved by the Administrator of Housing and Home Finance to assure conformity with these requirements. The proposal will not only be constructed with private capital, but it will remain on the tax digest to be subject to local government ad valorem taxes just as any other private enterprise. The construction will be privately owned, privately run, privately built, and privately financed.

The assistance to people who fell largely in this gap between public housing and standard low-rent private housing could be done by an expansion of public housing. This, of course, would be at public expense and with no possibility of local ad valorem tax revenue.

The other alternative is chosen. The choice of private enterprise. Providing this assistance in this way to the people in need of standard housing is a step away from public housing and should be acceptable and hailed by people who would like to see no further expansion at public expense.

There is one other thing I would like to mention at this time. There will be offered by my colleague, the gentleman

from Georgia [Mr. FLYNT], a perfecting amendment. It will deal with the city of Macon, Ga. It is the same thing that we had in Philadelphia last year. It will provide authority for Urban Renewal and the Housing Authority together to swap lands that they could not do unless we gave them that authority. No money is involved.

Mr. TALCOTT. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the gentleman.

Mr. TALCOTT. I thank the gentleman for yielding. I commend the gentleman for his interest in rural and farm people. I have heard and I believe that the migrant farmworker probably enjoys the worst housing in America. I am wondering if there is anything in this bill that would help the migrant farmworker.

Mr. STEPHENS. There is. There is a provision in this bill that does that, that takes care of that type of housing.

Mr. TALCOTT. Where is it in the bill?

Mr. STEPHENS. It is in title IX; I do not know the exact section offhand.

Mr. TALCOTT. I thank the gentleman. I am anxious to see what provision is made for the migrant farmworker who needs assistance badly.

Mr. WIDNALL. Mr. Chairman, I yield 1 minute to the gentleman from Missouri [Mr. HALL].

(Mr. HALL asked and was given permission to revise and extend his remarks.)

Mr. HALL. Mr. Chairman, as written I oppose H.R. 7984 due primarily to section 101, the so-called middle income rental subsidy; or "supplement" to landowner of taxpayers' expense for families earning up to nearly \$10,000 per year. This is in my opinion nonprudent use of such moneys; it will deter homeownership in the United States and I feel it will destroy incentive and moral fiber while emulating experiments in social concepts which have failed elsewhere. I do not believe in one-man control of formulas or centralized government. I believe it is our duty to legislate such detailed uses of the taxpayers' moneys, or leave it to the various States or communities.

Second, I oppose the bill because it was my privilege to spend a summer late in the last decade in a northern European nation where they underwent a national housing scandal and indeed floated debentures yielding income greater than legally allowed incomes from stocks and bonds—resulting in a closure of the Bourse for a time. Such housing was predicated in turn on required certificates for housing, premarital requirements, abortion notes and illegitimacy. When one, such as collectivized and centralized government, assumes all prerogatives of the individual, the personal and national character perishes. The nation I visited solved its problem. Why should we invite it?

I believe H.R. 7984 to be the most "extreme" proposal to come before the 89th Congress. The bill would authorize a new housing subsidy, which has a future annual cost potential greater than the

current cost of all existing Federal housing programs. But even far more serious than the cost, is the new philosophy—socialized housing. The bill—sponsored by the administration—would extend Federal rent subsidies to private housing for middle, not low but middle, income families.

While Federal subsidization of rents is not new, it has heretofore been limited to aid for those without adequate income to secure even low-rent housing for themselves, or for special circumstances, such as military.

But the proposal now advanced to the Congress, for the first time would establish the principles of direct rent subsidies to families with middle incomes ranging as high as \$10,000 a year.

The authorization proposed for this fiscal year is \$200 million. But the subsidy measure would authorize expenditure commitments of up to \$8 billion over the next 40 years for this new "experiment in socializing rents."

The last Federal census revealed that a large majority of families in our Seventh Congressional District own the homes in which they live. Most citizens agree that homeownership is a desirable family goal. But this proposal would tend to discourage homeownership; and, instead, encourage families to seek rented living accommodations, subsidized by the general public as in most European countries, including those who are attempting to buy their homes.

According to the plan, if you earn too much to qualify for the low-rent public housing, the Nation's taxpayers will pay part of your rent bill; provided you can convince the Government that you do not earn enough to afford what the Government determines is "decent private" housing. The bureaucrats figure about 4 million families fall into this category, and they have asked for \$500 million for cash payments to landlords for the first 4 years of the 40-year program.

Federal Housing Administrator Robert Weaver has said that, although there would be a ceiling on the income of families to be eligible, the ceiling could exceed \$8,000 a year, and in some cases this could go as high as \$10,000 a year. He has sole authority, in the bill, to establish the "formulas."

I cannot believe that our citizens go along with the idea that citizens who are making an effort to buy their own homes should—under Government compulsion—help finance the personal housing of other middle-income citizens. In simple terms, this proposal in the housing bill is a way of "keeping up with the Joneses" via Federal subsidies, and would lead to discrimination against citizens who are trying to make their own way. It even discriminates against sections. Ozark taxpayers would be subsidizing New York and Detroit.

With present housing and urban renewal costs already headed for \$1.5 billion annual rate, it is time to ask: Where does the Federal housing responsibility end? Should it include subsidizing rents of middle-income families? And, if rents of those of moderate income are to be subsidized, how could Congress justify

not subsidizing the rents of 9 million families with less than \$3,000 per year incomes? In this sense it is a crash "squeeze" play. If, we should also place them under subsidy, the cost would go up to \$5 billion a year. That is where Congress will be headed, if it once opens the door with enactment of the "rent supplement plan."

Whether the administration can muster the votes necessary to get the proposal through Congress is the \$8 billion question. The issue is still in doubt, but depends on the middle-income supplemental rental section removal by amendment. I strongly advocate its removal.

Mr. WIDNALL. Mr. Chairman, I yield 10 minutes to the gentleman from North Carolina [Mr. JONAS].

Mr. JONAS. Mr. Chairman, I regret that the distinguished author of the bill, the chairman of the great Committee on Banking and Currency, is not in his seat. I had intended to ask him some questions about a section in this bill which, although I have listened to the debate as carefully as I could consistent with my responsibilities on certain committees which are holding conferences today with the Senate, I have not heard even referred to during the debate, and it strikes me that it needs some consideration.

Mr. Chairman, I have elected to ask for this time in order to raise these questions while we are in general debate so as not to take anyone by surprise when the bill is being read under the 5-minute rule. The Clerk has a habit occasionally of reading these sections rather fast and I would suspect that if my interpretation of this section is correct the author of the bill will want to offer an amendment to either strike it or modify it substantially. Of course I could be wrong in my interpretation. I do not have the privilege of serving on this important and distinguished committee. However, I can read the English language and I hope I can interpret it. If I am misinterpreting this particular section, I hope a member of the committee will correct me. I feel that the record should be clear and we should know whether there is a sleeper in this bill which should be eliminated.

Mr. Chairman, I refer to section 102 which deals with FNMA. This section purports to authorize appropriations to FNMA, the Federal National Mortgage Association, to reimburse that agency for the difference between what FNMA receives in the way of interest on submarket-interest-rate mortgages pledged for participating certificates sold to the public and the interest rate that has to be paid on those participating certificates.

So far, so good, Mr. Chairman. I do not have any objection to investment bankers making a reasonable profit or receiving a fair return on their money. But it just so happens that the last issue of participating certificates issued by FNMA a few weeks ago were sold at discounts amounting to \$1.5 million.

Mr. Chairman, as I interpret this section it would not apply to that transaction because the section is prospective in effect. However, it would provide in the future that Congress would be author-

ized to appropriate the taxpayers' money in order to make up these subsidies or discounts which are allowed by FNMA in selling participating certificates secured by mortgages placed in the trust.

Mr. Chairman, I have a clipping in my hand which came from the Wall Street Journal on the day after this \$525 million issue of participating certificates were marketed. I would like to read what this article says:

Sales of \$525 million in mortgage certificates—transactions which will have a favorable impact on the Federal budget—

And the "favorable impact" will be to reduce the deficit next year by \$525 million—

were announced today by the Federal National Mortgage Association.

The certificates were sold in New York at discounts which will make the yields range from 4.35 percent on 1-year securities to 4.5 percent on those running 15 years.

This was a substantial increase in interest return on this series of certificates over those that were sold last fall, the \$300 million issue of certificates.

Last fall FNMA sold \$300 million of similar securities at yields of only 4.10 to 4.375 percent.

Now, Mr. Chairman, the thing that worries me about the language contained in this section, if the Chairman will bear with me, is this. The language in the section authorizes appropriations to make this differential between what FNMA receives in the way of interest on mortgages held by it and placed in the trust and the interest it will have to pay on the participating certificates, but the language goes far beyond that and covers any differential in principal.

I will explain why that is important. These participating certificates run for only 15 years, but the security pledged for them are 40-year mortgages. Obviously Fanny May will not receive in principal and interest payments on mortgages that run for 40 years a sufficient amount to pay off these certificates in 15 years unless Fanny May does one of two things: Puts into the trust a very substantially larger number or amount of face value mortgages than the certificates amount to, or comes back to us and asks the Congress, under the authority of this section, to appropriate money to make up the differentials in both interest and principal.

Do I properly interpret this section?

Mr. PATMAN. Yes. The money will have to be appropriated to make up that fund. I would like to state to the gentleman that of course we are accepting the financing as we have it now. I do not think any of us are too pleased with this method of financing at all.

Mr. JONAS. I would be surprised if the distinguished chairman of this committee is pleased with it, because of the speeches I have heard him make on this floor in which he has opposed this sort of financing.

Mr. PATMAN. We have the question of these home mortgages not being permitted to sell at below par. The homeowners have lost billions of dollars in the practice that has grown up of selling below par.

Mr. JONAS. The homeowners are not going to lose any money here because the mortgages are in the hands of Fanny May. Fanny May is going to lose the money in the discount, and the taxpayers are going to have to make it up.

Mr. PATMAN. We are going to take a new look at Fanny May.

Mr. JONAS. Is there any reason under the sun why Fanny May could not absorb this itself?

Mr. PATMAN. I cannot say that.

Mr. JONAS. The gentleman knows that Fanny May operates at a big profit.

Mr. PATMAN. That is my understanding.

Mr. JONAS. Here is a million and a half dollars of discount. There will be other discounts in the future if Fanny May continues this practice. I think they have sufficient earnings to absorb these discounts without asking us to appropriate taxpayers' money to reimburse Fanny May for these discounts. The objection I have to this section is that it not only covers any interest differential but it actually goes so far as to cover differentials in principal.

Mr. PATMAN. They do not make money on this. They make money on the secondary market if Fanny May is able to stand this cost. We could do it according to present contracts and conditions.

Mr. JONAS. I am surprised there has been no discussion of this section, because this is a very important provision. There is no way for anyone to tell how much this section may cost the taxpayers but the potential cost is substantial. This is an additional guarantee, superimposed on the guarantee that already exists by virtue of FHA insurance of these mortgages, and VA guarantees.

And this one will come out of the taxpayer's pockets to make up any discounts allowed by Fanny May in its sales of participating certificates and any differences between flow of funds from the mortgages on account of principal and the funds required to discharge the certificates when they come due.

I urge the committee to give the language in this section very close consideration because there is a potential heavy liability on the taxpayers.

Mr. PATMAN. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. HANNA].

(Mr. HANNA asked and was given permission to revise and extend his remarks.)

Mr. HANNA. Mr. Chairman, I should like to emphasize in the short time allotted to me that I think it was implicit in the statements of the gentleman from Georgia, and which I think have been entirely missed in this House up to this point, that this legislation, as is true in all legislation passed by this body, does not happen in a vacuum. It did not arise out of a vacuum. It arose out of the experiences with previous legislation passed by this House and the experiences of the people who live under this Government.

We have been talking about section 101. I do not want to bring into my discussion the talk about semantics be-

cause I am somewhat limited in linguistics. I do not want to talk about the battle of the documents as I am a poor scrivener. But I do know the common-sense facts of life, and that we have had experiences in exactly this kind of program for a long period of time. We have been trying to respond to a great need in our society in our times. There are hundreds of thousands of persons who are being denied decent housing in America today. Those people expect us to do something about it.

The programs that we have had have not developed to the point where they meet their needs. This bill carries in section 101 the only innovation in the total housing picture. Each of the sections is an extension of or an amendment to an existing program. Section 101 brings us what amounts to the only innovation. Yet it is not a complete innovation for, as has been pointed out by the gentleman from Georgia, in 1964 we placed ourselves into a rent supplement program. As was pointed out by the gentleman from Pennsylvania, we have previously seen that step advocated in the Republican rent certificate program. So this is nothing that is absolutely new. It is simply an innovation in a program that has already shown some promise.

Now where do we stand today? Today the people to whom we are addressing ourselves have only been barely reached by the program under section 221(d) 3. Right?

There are right now private enterprise people who are trying to help us with this need for housing of the people of America. Is this new? Is this new, I ask the gentlemen on the other side of the aisle? Think for a moment what we have done in the field of public utilities. Have we had any advantage by having a public arm in public utilities along with the private arm in public utilities? We have. I have defended in the State Legislature of California, and I will here in the Congress of the United States, the great partnership of public and private enterprise in trying to meet the needs of the people for public utilities. How has this dual system worked? Have we helped the people in the private enterprise section in the electrical field of utilities, for instance? Certainly, we have. We have asked our people to build great dams and to attach public utilities to those great dams to deliver electricity through public agencies and private companies because we felt there was a great need to put up public money to get that job done which the private profit-seeking business could not do without this help. Furthermore, we have supported with our taxes the building of facilities and we have assured the private people in the utility business that we will protect their investment by an assured profit set by public utilities commissions.

I ask you, what is the difference to the citizens whether they are supporting the one out of their taxes or the other out of the rate system? It is all based upon the law. The money comes out of the same pocket.

We have been for years laboriously attempting to work out a program which will allow private interests of a selective

nature to assist our national effort to provide decent housing for low-and moderate-income families. Originally these efforts were financed solely by charitable foundations and organizations such as churches and unions which used their own funds to subsidize their projects. Gradually government assistance has been given to encourage the expansion of their abilities—first through tax benefits then through low-interest loans under section 221(d) (3) of the Housing Act.

Now those experienced in the program in both the private and public sectors of our society have convinced our Housing Subcommittee that the rent supplement approach is really the vital, meaningful tool that will allow them to do the job and make the contribution we expect of them. The program is not the creature of a group of socialistic kooks. The committee report shows it has the backing of the National Home Builders Association; the American Bankers Association; the National Association of Housing and Renewal Agencies; the HHFA; countless mayors and Governor's, including my own Governor from California, and agencies and organizations within churches, foundations, and unions long experienced in housing.

May I say to the gentlemen who fear the language of the bill that the terms used have long been defined and understood by the people who will be guided by them. May I suggest that we have supported the endeavors of these private citizens and private organizations precisely for the same reason we have supported private operators of public utilities. They provide a source of innovation, and a constant challenge to the quality and the cost of services and products being created and operated by a purely public agency.

The proponents of this measure base their case on the proposition that given the cover of the rent supplement program they can do better and cheaper under private building, private ownership and private management the job all of us agree America in the 1960's should be doing in creating a decent environment, i.e., a decent home for every American.

The other point I would like to make here is that we have a great need for housing in the United States for a group of people who are stuck between what we have provided in public housing and what is now available in private housing and who cannot really qualify for either. They are thus consigned to the slums. Estimates are that some 600,000 to 750,000 families are involved in this group across this great land.

I suggest to you that we have built into public housing that thing which always happens where you have only public agencies in the field. It becomes too stereotyped. It becomes too strict. It causes burdens that cannot be overcome because innovation will not come when there is not some one challenging the establishment.

In public housing what do we have? Look at Los Angeles. In public housing they can get a public unit for \$30 less

than the average price for the same quality private housing. What happens to the fellow who is working with an income that will permit him to be in public housing? If he gets a \$10 raise, can he afford to take it? The \$10 raise would put him out of public housing. Then he would have to pay \$20 extra for private housing. He will say, "do not give me a \$10 raise. That will cost me \$20, and I can only pay that by taking food from the mouths of my children."

Section 101 is a flexible program. It allows people to take economic advances a step at a time. A man is not evicted from the project because he has improved himself.

We talk about building a better environment for the people of the United States. We have here a great tool we can use to do this.

Poverty is a state of mind; an attitude created by environment. Public housing has not provided the proper ladder for social advancement because it is predicated on a limited income. This means that the very factors you are trying to correct tend to dominate the environment. This bill before us offers an opportunity to mix persons of varying income and at the same time it removes the lid on economic advancement. I do not agree, Mr. Chairman, that all the poor and lower income Americans are alike. They have the same percentage of thinkers, drinkers, and stinkers as any other segment of society and after the passage of this or any other bill seeking to assist them, the thinkers will continue to think, the drinkers to drink, and the stinkers to stink.

I do not agree, Mr. Chairman, that life is getting any easier for the poor of our land. On the contrary, it is getting tougher; tougher in a mean hard way. But there are strivers and there are deadbeats. After the passage of this bill the strivers will have new hope and that is a gain. The deadbeats will still be on their collective duffs and that is no loss.

We do not have much support from certain gentlemen over on the other side of the House. The people who are going to operate, the people who are going to build, the people who are going to control this particular program from private enterprise assure us the program will work. The FHA, who have been in business some 30-odd years, have given us the assurances that this is the program which will take their agency from where they are to where they want to be in carrying out our great policies for housing in America.

I do not believe we need stand here and raise "bugaboos." We need to use commonsense. This is not happening in a vacuum.

We have confidence in the FHA. We have confidence in the builders. We have confidence in the bankers. We have confidence in the people who are going to own and operate these projects. And we have confidence in ourselves. We can change this program if it does not work out right.

Gentleman, we here are in the position of the young lad whose grandfather took him out to the back lot in the days of

wood-burning stoves. There they faced a formidable pile of logs in need of splitting. The grandfather said, "Son, that pile is high and the day is short. I do not expect you to get the job done on the first day, but neither will I expect you to stop hacking away at it."

Mr. WIDNALL. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. MICHEL].

(Mr. MICHEL asked and was given permission to revise and extend his remarks.)

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I gladly yield to the gentleman from Iowa.

Mr. GROSS. I wonder when it is proposed to quit tonight. I have noticed some very strenuous White House lobbying activity outside the Chamber this afternoon, apparently in an effort to pressure this bill through. If this goes on much longer there may be too many Members with too many strained armpits and twisted arms to do business tomorrow. Perhaps we ought to get out of here quickly this evening.

Mr. MICHEL. I will try not to detain the gentleman too long.

Mr. GROSS. Do not worry about the gentleman from Iowa. His arm has not yet been twisted by the White House lobbyists.

Mr. MICHEL. I hope it never will be.

Mr. Chairman, of course, in an omnibus housing bill of this magnitude there are as many good provisions as there are bad. I should like to address my remarks to section 101 of this bill.

Mr. Chairman, section 101 of this bill poses a simple question: Is the United States ready for socialism? No other interpretation can be placed on this section, which proposes to subsidize some at the expense of the many. It seeks to make an American who has practiced ambition, frugality, and initiative, pay for an expensive experiment in federalized housing. Not only must he pay for his own home, taxes, and maintenance, but he must also pay taxes so that his neighbor can live in a bigger house, and pay much less for his housing. This is socialism. It penalizes thrift. It threatens to create a class of professional federalized tenants. It will foster concealment of income, and, of course, a monstrous bureaucracy to supervise and investigate the incomes of those living in Government-subsidized housing.

This bill is not progressive. It is a throwback to one of the most often-tried and always-found-wanting types of social experimentation. It is a thinly disguised revival of a socialistic scheme tried a century ago.

I propose that we change the name of part of this bill to the Brook Farm Act of 1965. Its modern trappings, the Housing and Urban Development Act of 1965, do not tell a true story. Let us look at Brook Farm. More than 100 years ago, Francois Fourier, a French social reformer, proposed to mass people into what he called phalanges. These were to be subdivided into beautiful tracts. The idea was that the members would derive their support from the

labors of all. The project got underway in 1846. The Encyclopedia Americana reports that the first unit burned, and the venture into communal living failed. Luckily the group did not have access to tax funds.

Section 101(d), the rent subsidy section of the bill before us, is merely a revival of the Brook Farm principle. Separated from its utopian concept, it provides that people making up to \$8,900 could move into bigger houses with their taxpaying neighbors picking up part of the tab. Statistics show that the costs could be astronomical. There are 190 million people in the United States. At an average of 4 per family, this creates a potential of 47 million families. Some 40 percent of them, or more than 18 million families, could qualify under the formula of eligibility concocted by Housing and Home Finance Director Robert Weaver. Should a family with earnings of \$8,000 choose to live in a \$220 per month home—maximum under the bill—their annual housing cost would be \$2,640. The Federal Government would pick up the difference between the costs and one-fourth of their income, or \$640 per year.

Aside from the home dwellers, how about the homebuilders and the home promoters and the apartment builders? I jog your memories to the immediate postwar years when we had the famed 608 projects. I used to live in an apartment building in Washington constructed under that program with a limitation of \$5 million per unit. Today it is double the size. They built two buildings one inch apart with \$5 million for each one, and it is known as the Woodner apartment building in Washington. There have been all kinds of windfall profits to builders under the old 608. What you have in this program is just one on a broader and grander scale.

Some time ago when we were considering the agricultural appropriation bill I think I made reference to the soil bank program and the land retirement program and said if we would be smart, we would go out and mortgage ourselves up to the hilt and buy all of the farmland we could and put it in a soil bank and have the Government pay us for keeping it idle. I submit under the rent housing proposition you might do the same thing here. I am thinking seriously, if this legislation is enacted, to sell everything we have and go into the apartment unit building business and make yourself a killing. You cannot help but do it.

It is obvious that this utopian plan would discourage homeownership. Why sacrifice and save, why build up an equity when the Federal Government stands ready to provide a dole of thousands of dollars per family over the course of 40 years? This bill would pyramid in cost as more and more families abandoned ownership in favor of subsidized rental.

This bill is clearly intended to make Uncle Sam the Nation's landlord. It, of course, is designed as a politically motivated effort to bring more people under the umbrella of paternalism. Behind the proposal, cloaked in the high-sounding phrases that the bill is aimed at the

elderly, disadvantaged, and the poor, is a provision that it applies to those living in substandard housing. What is substandard is a matter of interpretation.

The slogan for this new excursion into mass dependency might well be "A check in every mailbox means a vote in every ballot box." Once relieved of the basic responsibility to provide housing by their own initiative, the desire of beneficiaries to continue this domiciliary dole would be automatic—as, hopefully, would be the tenure in office of those who supply it.

This legislation would be a giant step backward. It would be the antithesis of the American spirit. It penalizes thrift, narrows ambition, destroys initiative and the pride of self-sufficiency. It is bad legislation.

Columnist Arthur Krock put it this way:

It is merely the latest, though the most extreme, expression of the political philosophy which would create an egalitarian socio-economy, irrespective of individual merit, with subsidies financed by the ambitious, the industrious, and the worthy * * * the real issue is whether the Federal Union is to undergo its greatest transformation thus far into a collectivist state.

The House today could do yeoman service to the American system by striking down this radical departure from our national heritage. Every American family that owns, or is buying, a home will be penalized by this ill-founded section of the bill. I would warn those zealots whose arms have been twisted to cast a vote for this fiscal fiasco that robbing Peter to pay Paul may not be good politics at all—there has been no groundswell of public demand for our Nation to go back 100 years in the housing field.

Mr. WIDNALL. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota [Mr. NELSEN].

Mr. NELSEN. Mr. Chairman, I should like to ask a question with reference to the rent supplement provided in this bill where an individual's income falls below a certain level. Now I refer to the rural housing section of the bill. Is there any provision in this bill, for example, if a farmer's income falls below this level, that provides a rent supplement for that farm population?

Mr. BARRETT. We have a subsidy under the farm program, that comes under the Farm Home Administration.

Mr. NELSEN. The question I ask is, Is there a rental subsidy for a farmer whose income falls below the level as specified for other people in the country?

Mr. BARRETT. No, although on farm improvement there is a subsidy.

Mr. NELSEN. In what manner?

Mr. BARRETT. Under sections 503 and 504 of the Housing Act of 1949 there are loans and grants for marginal farms. Under the rent supplement program, a project would have to be built in the area under section 221(d)(3) to make the benefits available.

Mr. NELSEN. Suppose his income falls below the specified level which is set out in your large city; what happens in the rural communities?

Mr. BARRETT. The income ceilings would be set city by city to reflect differing cost of living and housing cost levels.

Mr. FARBERSTEIN. Mr. Chairman, I would like to say a few words in favor of H.R. 7984, and urge my colleagues on both sides of the aisle to support it.

Legislation to provide housing for the inhabitants of our cities has in the past been fragmented and piecemeal at best. There have been definite advances; there is no question about that. But today, with the passage of this housing bill, we have an opportunity to strike a sweeping blow for the revitalization of our cities, an opportunity to provide decent housing for millions of our citizens, many of whom have never had a wholesome place to live in their entire lives.

The most advanced and farsighted proposal in this bill is the provision in section 101 for rent supplements to needy families. President Johnson has called the rent supplement "The most crucial new instrument in our effort to improve the American city."

Mr. Chairman, there is not enough public housing provided in the United States today. And much of what is provided is austere and cold and inadequate—not the kind of home we all would like to see for every American.

The wonderful thing about rent supplements is that they permit us to aid a broad spectrum of the population to find comfortable homes in moderate-income, privately operated housing. No longer will there be segregation of low-income families in ghettos of public housing. Instead, there will be a healthy mixing of people from different environments and age groups which will help, as President Johnson said, preserve "the variety and quality of urban life."

As all my colleagues are aware, the main purpose of section 101 of this bill is to make it possible for limited dividend corporations and community-sponsored cooperatives, and rental projects, to admit families who currently could not afford the carrying charges or monthly rental of a typical middle-income apartment. For example, many large families cannot afford the monthly carrying charge of about \$200 for a typical four-bedroom middle-income apartment in New York; the rent supplement plan would enable them to have such an apartment for \$120 a month.

Similarly, many old people cannot afford \$80 or \$85 for an efficiency apartment in a middle-income project. The rent supplement plan would enable them to pay approximately \$40 or \$50 a month for such an apartment.

And, of course, if a family becomes, by virtue of a rise in income, better able to pay for its apartment, this bill provides that the amount of rent supplement can be adjusted accordingly.

I have heard objections to this program from various quarters, from persons who are under the impression that rent supplements somehow will be used to aid families not truly in need of assistance. I cannot believe these persons have acquainted themselves with the facts.

I will introduce into the RECORD at the end of this statement a table I received from the Honorable Robert C. Weaver, Administrator of the Housing and Home Finance Agency. It shows preliminary estimates of maximum income limits for families of different sizes under this proposed program in 25 selected cities.

For example, the table shows that a family of three or four persons will be permitted to have an income of no more than \$3,700 per year in cities like Waco, Tex.; Utica, N.Y.; or Columbia, S.C., to qualify for assistance under the rent supplement program. The maximum income permitted to a three- or four-person family, \$5,000, is only applicable to such urban concentrations as Chicago, Ill., and Newark, N.J., where the cost of living is, of course, much higher than elsewhere.

I think this chart gives the lie to any of the perorations which have been forthcoming lately as to how the rent supplement program will dole out money to people who are getting along fine by themselves. Anyone who thinks that \$5,000 for a family of four goes very far in a city like Chicago ought to try it some time. The experience would no doubt be educational.

Mr. Chairman, there are gentlemen who are horrified by the prospect of rent supplements. They somehow see in this farsighted program the specter of creeping socialism. They view direct payment of rent supplements to needy families as somehow immoral or un-American.

Mr. Chairman, how can this be? Is it socialism to make it possible for more people to live in privately operated housing rather than in public projects? Is it socialism to provide a sliding scale

of rent supplements in order that people may pay as much toward their own support as they possibly can? Mr. Chairman, rent supplements will benefit private builders, not harm them. Anyone who has taken the trouble to find out knows that this program involves housing which is privately owned, privately constructed, and privately financed under FHA market interest rate mortgage provided for by section 221(d)(3) of the National Housing Act. We have here a prime example of the enlistment of private enterprise and private resources to help achieve national objectives. Rent supplements will induce tenants to live in private housing when they might otherwise be forced into public projects—if public projects are available, which as this House knows, they often are not. New York City alone, Mr. Chairman, receives 100,000 applications for public housing a year. And there are waiting lists in every city. The truth is, Mr. Chairman, that many builders oppose this bill because they fear any Federal involvement in the low-income housing field. But I have no patience with those who cry out "socialism" from their FHA-insured homes, nor those guardians of the public integrity who see the poor as millions of cases of individual failure.

The Nation needs housing, Mr. Chairman. Low-income families all over the land are asking that we make good the promise of 1949 to house Americans decently. Today we have the opportunity to fulfill that promise by passing H.R. 7984. I intend to vote for this measure and I urge all my honorable colleagues in this Chamber to do the same.

The table referred to follows:

Preliminary estimates of income limits for families of different sizes under proposed rent supplement program in 25 cities

Cities	2 persons (1 bedroom)	3 or 4 persons (2 bedrooms)	5 or 6 persons (3 bedrooms)	7 or 8 persons (4 bedrooms)
Atlanta, Ga.	\$3,100	\$3,800	\$4,900	\$5,500
Bangor, Maine	3,400	4,300	4,800	5,700
Batavia, N.Y.	3,400	4,100	4,800	6,000
Boston, Mass.	4,400	4,800	5,300	6,000
Bridgeport, Conn.	4,100	4,600	4,800	5,300
Chicago, Ill.	4,300	5,000	5,800	6,500
Columbia, S.C.	3,400	3,700	4,600	5,000
Columbus, Ohio	3,700	3,900	4,500	4,900
Fresno, Calif.	3,900	4,400	5,100	6,100
Huntington, W. Va.	3,200	3,700	4,200	4,700
Jefferson City, Mo.	3,600	4,100	4,600	5,500
Kansas City, Mo.	3,700	4,300	5,600	6,200
Louisville, Ky.	3,600	4,100	4,600	6,000
Milwaukee, Wis.	4,600	5,000	5,500	6,000
Newark, N.J.	3,200	3,700	4,300	4,800
Providence, R.I.	4,300	4,800	5,300	5,800
Paterson, N.J.	4,200	4,600	5,000	5,600
Pittsburgh, Pa.	2,400	3,700	4,300	5,800
Port Arthur, Tex.	3,300	3,700	4,400	4,800
San Antonio, Tex.	4,000	4,500	5,500	6,300
St. Louis, Mo.	3,600	3,900	4,300	4,900
Terre Haute, Ind.	4,000	4,500	5,500	6,000
Toledo, Ohio	3,400	3,700	4,600	5,800
Waco, Tex.	2,900	3,700	4,500	5,300
Utica, N.Y.				

Mr. ROOSEVELT. Mr. Chairman, I rise in support of H.R. 7984, the Housing and Urban Development Bill of 1965, for I am firmly convinced that this legislation is essential to our future and to fulfilling the urgent needs of our people.

Much of the legislation proposed continues and expands unquestioned commitments long since made to the housing and growth of our urban society—

the programs of FHA mortgage insurance, of urban renewal and planning, of community facilities, college housing, and so forth. In fact, we must enact this bill merely to stand still.

But to merely stand still is to move backward. The newer measures and provisions for enlarging those already existing are essential to enable use to move ahead.

We are in a crucial period in our history, a period when we must, as indeed we can, fulfill the promise of opportunity to all Americans. We have not done that for millions of people left in substandard housing, for ever-growing numbers of our elderly, and for submerged minorities only beginning to share in the common benefits of a democratic society.

The effect of this legislative proposal will help us to achieve the goal envisioned by the President in his dream of a Great Society. But that Great Society cannot be an exclusive one which excludes large groups from its benefits. Poverty is a dangerous virus, but it is no longer an incurable one. H.R. 7984 is a vital measure to expedite the reality of the Great Society, and to win the war on poverty, for it not only speeds up the improvement and growth of our urban communities, but it launches the first mass attack on the housing problems of the elderly, the displaced, and the ill-housed of low income.

My own State of California has a great stake in this bill. We carry a larger share of national responsibility for the housing and urban needs of our growing population. We are the hope and destination for large numbers of older people who migrate from all over this country, seeking a good life in their later years, and for even greater numbers of young people seeking new and growing opportunity. For many years California has been the leading State in homebuilding and community growth, accounting for a large percentage of our expanding housing economy and investment. We have made extensive use of both regular and special programs to provide better housing and better communities. But the benefits of these programs have sometimes been seriously out of balance.

In California, for example, we have built or improved more than 3½ million homes and apartments under Federal programs, involving more than \$13 billion of investment. But despite our large demands, only 10,000 of those units have been especially for the elderly, and only 30,000 for low income families. This is merely nibbling at the edges. We must now move much faster to meet the needs of the ill-housed, the elderly, the displaced, the disadvantaged, and the poor, and this bill provides some of the means to do so.

It gives us a program of public housing that increases from 35,000 to 60,000 units a year for the next 4 years which is far more adaptable and usable in that it applies to all types of suitable housing, new and old, publicly and privately owned. Public housing continues to be recognized as the indispensable tool it has long been and will continue to be for the urban poor.

The bill also offers us a bold new proposal to supplement the rents of the much larger number of elderly, displaced, and badly housed who cannot find decent housing they can afford. Such supplements would enable private capital to invest in this market and generate decent housing for half a million families in the next 4 years. This is one of the most meaningful proposals to come before the Congress in some years, and I applaud its innovation.

Of significance to many thousands of my constituents are the provisions of title III which authorizes an additional \$2.9 billion over 4 years for urban renewal grants, and requires HHFA to conduct a study of building codes, zoning, tax policies, and development standards. Although falling within the urban renewal program, it permits inclusion of areas which are not so blighted as to require urban renewal treatment, and thus will cover the so-called gray areas to permit many to retain and rehabilitate their homes. The humanitarian aspect, while not measured in dollars and cents, is considerable, for these are in many instances years-long home owners who are eager to remain in the community they know and like but who for one economic reason or another, are precluded from making capital investments in older homes.

I am particularly pleased to note this bill embodies a proposal which is contained in H.R. 1573 which I introduced at the opening of this Congress. This same proposal was also contained in bills introduced by me in the past two Congresses. H.R. 1573 provided that qualified small business concerns could obtain from the Small Business Administration guarantees for the payment of rental under leasing of commercial and industrial property in those instances where stringent credit requirements make it impossible for well-established, sound small businessmen to obtain leases. The bill before us limits this assistance to only those small businesses displaced by urban renewal. I am pleased to support this provision. Hearings by my Small Business Subcommittee during the last Congress and by the newly formed Subcommittee on Urban Small Business Problems chaired by my good friend Congressman JOHN C. KLUCZYNSKI during the current Congress have revealed an acute need for legislation providing this assistance. It is my hope, however, that in the near future the Congress will see fit to make lease guarantees available to all small businessmen regardless of reason for seeking entry into shopping centers or similar spaces.

Let me point out that if we fail to enact this legislation, more than three quarters of a million families will have no hope of leaving the slums for decent homes. Our communities will be blocked in their efforts to build and rebuild a better environment. This is a national problem, and it is the result of large population movements to urban centers. This is especially evident in my State of California, but the condition is identical in all urban areas of the country.

Let me urge you to give this legislation your affirmative vote. You will thereby replace ugliness with beauty, despair with hope, and make the Great Society a fact instead of a phrase.

Mr. WALKER of Mississippi. Mr. Chairman, as I view title I of the omnibus housing bill, I find it most objectionable. To me, the entire idea of rent subsidization by the Federal Government is one not worthy of adoption. I would like to remind my colleagues that this great Nation of ours was built on

individual incentive, and not on the Federal handout. Title I of H.R. 7984 is not merely rent subsidization, but I am sure that if viewed in the proper perspective, most anyone would admit that it is income subsidization.

As has been stated previously, by my colleagues who oppose this section of the bill, the proposed rent subsidization will kill the incentive of the individual who participates in this Government handout, the very same individual that the bill is designed to help.

For years now, our great country has been fighting not only the Communist Party, but the entire philosophy of communism. Mr. Speaker, while we condemn this ideology on one hand, some of my colleagues on the other hand are, in my opinion, encouraging it by legislating some of the same socialistic principles that are advocated by the Communist doctrine. Let me point out just a few of the frightening pieces of legislation that are leading us down the road to socialism and ultimately to communism.

First, there is the Federal aid to education bill which opens the door to Federal control of our longstanding system of public education. Next is the proposed medicare bill which is the first step toward socialized medicine. The voting rights legislation, already passed by the Senate and soon to come before this House, will again move us a little closer to the Communist's doctrines through its discriminatory application, and now, this proposed rent supplement program that may destroy the individuals desire for self-improvement.

Mr. Chairman, in each of the above mentioned pieces of legislation, more authority is taken away from the individual; whether he be a doctor, a voter, a property owner, or an educator—and more power placed into the hands of a strong, centralized, bureaucratic government. In the case of the rent subsidization program, the bureaucratic enforcer is the Housing Administrator, who will have discretionary powers to approve or reject petitions of the individual.

As a newcomer to this great legislative body, I am shocked at the great risks Congress is taking—the risk of abolishing individual incentive in the name of helping the poor, and, I might add, it does not take a great deal of seniority to see the immense dangers that legislation of this nature poses to our way of life.

How long must our country travel down the road toward collectivism and welfareism before it is awakened to the dangers that lie ahead? President Johnson recently made a statement to the effect that the 89th Congress would go down in history as the most effective Congress our country has ever had. I fear that instead, history may well record the 89th Congress as the most destructive to the American way of life.

As a Representative of the people of my district, I cannot, in good faith, bring myself to support this Great Society handout.

Mr. EDWARDS of Alabama. Mr. Chairman, we need in this country today not so much in new housing schemes of various kinds but rather a clarification

and coordination of existing housing programs.

We are building the Washington bureaucracy into a gigantic and uncontrollable monster where housing and various urban programs are concerned. Already the right hand cannot and does not know what the left hand is doing, and for us to continue today in this same direction is a tragedy for all Americans.

I have to oppose the establishment of a 3-percent interest rate for three of the housing programs in this bill. The Government should not borrow money at an interest rate higher than that at which it lends.

Even in times of fiscal solvency this practice adds unnecessarily to the taxpayers' burdens and complicates the Government's monetary problems. It is pure folly at a time when we are operating with huge deficits and in the face of a serious balance-of-payments problem.

The bill involves spending of anywhere from \$6 to \$13 billion and commitments of up to 40 years in time whether housing needs over that period warrant further action or not.

Experience in recent years has shown that public housing authorizations have not been fully utilized by local authorities. Why, then, are we asked today to authorize 140,000 additional units?

The rent supplement plan as proposed by the President is especially objectionable. Shortly after it was first proposed I included the following question in a questionnaire sent to homes in the First Congressional District of Alabama: "Would you support a program of Federal rent subsidies to low and middle income families?"

Of the many thousands who responded 82 percent indicated they would not support the program. Several respondents wrote in comments asking if the question was some kind of joke.

We are told this rent supplement plan would be an experiment. But what kind of experiment is it that calls for 40 years of trial at a cost of \$8 billion?

The rent plan would not provide the housing help where it is needed most crucially. The greater part of the assistance would go to those who least need it. This kind of Federal aid without regard to valid need characterizes several administration programs of these past 4 years, and I wonder if some of us will not encounter some difficulties in making explanations to citizens who will some day learn what is happening.

The rent supplement plan would kill the incentive of American families to improve their living conditions through their own efforts. It would discriminate against people who do not want this kind of handout.

And there is considerable cause for concern in the methods which might have to be used to enforce provisions of the system. Intrusion of Federal agents into the private lives of American citizens has already progressed to an alarming point. All of those who, like myself, are concerned with individual liberties and freedom from an oppressive Government tyranny, should be alert to the new growth of Federal

Government power which is wrapped up in this bill.

The bill takes another giant step toward putting the Federal Government in charge of local housing development and individual enterprise.

It is a step which each one of us ought to consider very carefully.

Mr. BETTS. Mr. Chairman, of all the New Frontier and Great Society programs, few have disturbed me more than the rent-supplement provisions of the Housing Act of 1965. This subsidy scheme is one of the most far-reaching and dangerous plans to come before the House in a generation. I believe it has been rightly described as foreign to American concepts. It goes to the root of private ownership—killing the incentive of the American family to improve its living accommodations by its own efforts. This cynical device virtually destroys the normal desire for homeownership; it makes renters wards of the Government. My Republican colleagues on the Banking and Currency Committee, on which I served for 8 years, have referred to this proposal as "the way of the socialistic state."

Many of my distinguished colleagues on both sides of the aisle have presented an analysis and salient comments on the rent subsidy plan. I leave the intricate line-by-line examination to them. My purpose in present these remarks is to firmly establish my opposition to what Housing Administrator Weaver has termed "a vital part of the proposed administration bill."

Some of the best reasons for the defeat of this provision have been discussed by my friend and colleague from Ohio [Mr. STANTON]. At the risk of repetition I would like to review them as he has presented them.

It is a new program ostensibly directed at providing housing assistance for low-income families. Yet the same bill provides 60,000 additional public housing units for each of the next 4 years—almost twice the public housing rate for the past several years.

It holds out a false hope to 8 million low-income families—presently living in adequate shelter—that they, too, are entitled to have part of their shelter costs paid by the American taxpayers.

The upper income limits for determining eligibility for rent supplements are vague and subject to arbitrary decision by government officials as to the ability or inability of a family or individual to obtain standard shelter with 25 percent of income. The bill contains no maximum rent supplement for any one family or individual.

It would propose a "means test" on low-income families and cause Government employees and neighbors (according to HHFA Administrator Weaver's testimony) to pry into family income sources to make sure that the rent supplement is of proper amount.

It was advocated by the Administration to permit the phasing out of the FHA section 221(d)(3) below-market interest rate program (presently 3½ percent)—an objective sought by the Budget Bureau because of the impact of the latter program on the budget. Yet the committee has approved a 4-year extension of the program with a 3-percent rate, thereby removing the primary motivation for the rent supplement program.

It would authorize the Housing Administrator to contract with private agencies for

services in the selection of tenants and delegate to such private agencies the authority to issue certificates of eligibility to receive Federal rent supplements. This delegation of Government responsibility to non-Government entities in selecting the beneficiaries and the amount of a Federal rent dole is without precedent.

It would provide rent supplements for elderly and handicapped persons, yet there are three Federal housing programs for such persons already in existence, i.e., (1) public housing, (2) direct submarket interest rate loans, and (3) FHA section 231 housing.

It would provide rent supplements for persons displaced by Government action notwithstanding the existence at present of a variety of housing programs and other benefits for these people, i.e., public housing, FHA section 221 (d) (2), (d) (3), and (d) (4), and relocation allowances.

In its inception the rent supplement program was not intended for low-income families. To insist now on the program as one limited to low-income families is to cling to the form when the objective is no longer in sight. A new multi-billion-dollar housing program, committing the American taxpayers to 40 years of disbursing a rent dole, should rest on firmer foundation and be the product of more thorough staff preparation.

By making rent supplements a permanent long-range (40 years) housing program to neutralize high rent levels flowing from high interest rates, the Congress would materially impair the many years' effort by some industry and public interest groups to bring about a reduction in interest rate levels. The proposed rent supplement program reflects a surrender to high mortgage interest rates.

It is limited to new construction, yet the largest source of housing for low-income families is the existing housing inventory. The rent supplement program is premised on the mistaken belief that this group must have new dwellings.

With these arguments in mind, it seems incredible that this subsidy scheme should be approved by this House.

Mr. McDOWELL. Mr. Chairman, it is my intention to vote for H.R. 7984, for I firmly believe that its many advantages far outweigh those few areas where it may need further improvement. This bill merits the prediction the President made some weeks ago, at the convention of the National Association of Home Builders in Washington, that it will be one of the finest housing bills ever developed.

This bill includes a number of suggestions put forward by leaders in our home building industry. Some of these suggestions were included in the bill which President Johnson sent to Congress, and more of their suggestions were included by the Housing Subcommittee after extensive hearings, at which industry leaders testified.

Perry E. Willits, president of the National Association of Home Builders, sees the need for preserving old neighborhoods as centers of modern urban life and activity, and he calls for the retention of the inherent individuality and character of neighborhoods, with the emphasis on rehabilitation instead of the bulldozer and clearance. This is in line with President Johnson's views, and the intent of the Congress, for, in signing the Housing Act of 1964, the President declared that:

The plight of property owners in urban renewal areas is recognized in this measure. Provision is made so that they can rehabilitate their homes and businesses instead of having to move from the path of the bulldozer. Looking ahead, this measure assists local communities in enforcing housing codes so blight does not develop or persist in the future.

It would be helpful to recall President Johnson's view of the goals of this bill we are considering here today, as set out in his message to the Congress on March 2 of this year, on the Problems and Future of the Central City. In that great message he said:

We hope to achieve a large increase of homes for low- and moderate-income families—those in greatest need of assistance—through an array of old and new instruments designed to work together toward a single goal—to insist on stricter enforcement of housing codes by communities receiving Federal aid, thus mounting an intensified attack on slums. Using both urban renewal funds and public housing funds to rehabilitate existing housing and make it available to low- and moderate-income families. There is no reason to tear down and rebuild if existing housing can be improved and made desirable.

We have concentrated almost all our past effort on building new units, when it is often possible to improve, rebuild, and rehabilitate existing homes with less cost and less human dislocation. Even some areas now classed as slums can be made decent places to live with intensive rehabilitation. In this way it may often be possible to meet our housing objectives without tearing people away from their familiar neighborhoods and friends.

I am deeply impressed not only by the tools provided by this administration and by Congress in the Housing Act of 1964 and in the present bill, H.R. 7984, but by the support which the homebuilding industry as a whole is giving the President and our Democratic administration in the development of a new, more realistic, and more humane approach to the housing problem. In fact, the Housing Act of 1964 was so good that it was supported by an overwhelming bipartisan majority of 5 to 1 in the House last year. The present bill will also have overwhelming support in the House because it, too, is a good bill.

Before I leave the subject I would like to point out the similarity of approach of President Johnson and the homebuilding industry to the problems of housing with a reference to the testimony given by Perry E. Willits before the Subcommittee on Urban Small Business Problems of the House Select Committee on Small Business on June 8 this year. He told the subcommittee members that:

It is increasingly believed that complete redevelopment through removal of existing structures and the building of huge new projects should be reserved only for those areas so hopelessly blighted as to be beyond the possibility of restoration.

Not only does the "bulldozer approach" require vast expenditures, but in the process small businesses—the corner pharmacy and the tobacco shop, the neighborhood restaurant, perhaps in business for a generation or more—are uprooted and destroyed.

Their successors will most necessarily be units of farflung chainstore operations, since satisfactory mortgage financing for the new redevelopment commercial project can only be obtained on the basis of long-term leases with national, triple-A rated tenants.

Complete renewal of our cities, of course, is not the answer. In fact, the cost, which is estimated at \$1 trillion, is so staggering as to immobilize us, preventing any kind of action.

We might well study, investigate, and research these problems on at least some modest scale in contrast to the almost nonexistent scale to which we have become accustomed. If we can afford billions for space research, we can certainly afford millions for urban research.

The present bill, H.R. 7984, builds on these views of President Johnson's administration and leaders in the homebuilding industry, and emphasizes rehabilitation, code enforcement, relocation assistance, and provides a new concept of fair and just compensation for businessmen and homeowners whose property is taken in urban renewal projects. A number of the provisions of H.R. 7984 are similar to provisions in my own housing bill, H.R. 7041. The need for such provisions to advance the rehabilitation process is widely recognized, and the failure of the present system to provide fair, just, and evenhanded compensation for property taken in Federal and federally aided programs has been shown by a number of studies; such as, for instance, that by the Select Subcommittee on Real Property Acquisition of the House Public Works Committee. This study of compensation and assistance for persons affected by real property acquisition covered a 2-year period and hearings were held throughout the country. Significant work, as in this area, was also done by the Advisory Commission on Intergovernmental Relations, which showed that in the next 4 to 8 years Federal and federally aided programs, including housing and urban renewal, will displace annually an average of 111,000 families and individuals, 18,000 businesses, and 4,000 farm operators. Eugene F. Foley, Administrator of the Small Business Administration, told the House Select Committee on Small Business that studies by the Select Subcommittee on Real Property Acquisition of the House Public Works Committee showed that nearly 35 percent of the businesses displaced by urban renewal fail to reopen their doors. Mr. Foley and Mr. Willits are to be commended for calling the attention of the Nation to these problems faced by small business.

President Johnson in his message to Congress has urged us to take steps to meet the needs of those millions of families in our cities, towns, on farms, and in rural areas who live in substandard housing. The Housing and Home Finance Agency has declared that "our existing housing programs cannot fully cope with the problem" of the 13 million substandard homes in our country. I confidently believe that this bill, H.R. 7984, and the earlier bill, H.R. 6927, to establish a new Department of Housing and Urban Development, are long steps forward and do provide the means to enable us to cope with the problems of blighted and slum housing.

In conclusion, I would express the hope, as I did last year, that the best features of both the Senate and House bills will be retained by the House and Senate conferees, as they did last year,

which made the Housing Act of 1964 such a great legislative enactment. The spectacular success of our national homebuilding industry to provide homeownership to millions of our citizens is one in which we can all take pride. We have failed, however, to solve the problem of providing homes within the reach of the poorer families. Public housing has failed to meet this need; new tools must be forged, tested, and perfected, so that in our time and for the future, we as a Nation can house all of our people in safe, sanitary, decent housing.

I commend Chairman BARRETT and all of the members of the great Subcommittee on Housing of the Committee on Banking and Currency who have developed such an effective housing bill, and I am glad to give my wholehearted support of this legislation contained in H.R. 7984.

Mr. O'NEAL of Georgia. Mr. Chairman, I would like to go on record as being opposed to the Housing and Urban Development Act of 1965. Any merits contained in the proposal do not justify passage of this unsound piece of legislation.

In the interest of time, I will restrict my objections to the most diabolical section—the rent supplement proposal.

The formula for providing rent supplements would allow a low- to moderate-income family to occupy the same accommodations as it could if its income increased substantially. Yet, the Government subsidy would be taken away if the family income should reach a certain level. It is therefore apparent that the tenant would not be encouraged to work hard only to lose his Federal dole. In fact, the rent supplement would be decreased in proportion to an increase in family income.

Also to be considered is the family of adequate means whose neighbors are receiving the dole. The rent supplement proposal would provide reverse incentive for such a family to earn less but get more from the Federal Government. Why should that family be forced to pay taxes which in effect are applied to the neighbor's rent bill?

This absurd proposal not only kills family incentive to improve rental accommodations by its own efforts, but it also destroys the cherished goal of homeownership. Commonsense will tell you that high rent cost is a stimulant to homeownership. The average American family realizes that the rent dollar can be applied to mortgage payments as an investment for the future. However, a family receiving rent supplement would not be encouraged to purchase a reasonably priced house when it can live in a more expensive apartment. The rent subsidy, of course, could not be applied to house payments.

The reasons I have briefly outlined provide sufficient justification for my opposition to the housing bill under consideration. But I should add that inestimable amounts of money obligated for up to 40 years to implement the rent subsidy scheme is equally distasteful and disturbing.

Mr. ANNUNZIO. Mr. Chairman, I rise in support of the Housing and Urban Development Act of 1965, H.R. 7984.

As a member of the Banking and Currency Committee which reported the bill, I wish to express my unqualified support for the measure. I also want to extend my congratulations to the chairman of the Subcommittee on Housing, my distinguished colleague from Pennsylvania, the Honorable WILLIAM A. BARRETT, for the outstanding job done by him and the members of his Housing Subcommittee.

I want also to compliment the distinguished chairman of the full committee, the Honorable WRIGHT PATMAN of Texas, for the fair manner in which this bill was handled in executive session. All members of the full committee were given an opportunity by the chairman to participate in the hearings and to fully discuss the bill.

I am proud to have participated in the deliberations which produced a measure of such vision and understanding.

Not since the landmark Housing Act of 1949 has the Congress had before it housing legislation with such great potential for improving the physical environment of the American people.

It is above all, a realistic bill—one that recognizes the housing problems of the American people as they are, and comes to grips with them in a bold and meaningful way.

It recognizes, first of all, that building more and more brand new housing units—essential though that is—cannot be the sole answer to the problems posed by the deterioration of existing housing. The bulldozer and the luxury high rise cannot be the only response to urban decay.

Like most other American cities, my own city of Chicago has been confronted with all the problems of urban blight. Our past programs combined with the unstinting efforts of civic leaders and private enterprise have succeeded in the rehabilitation of large areas of our central cities as shown by Chicago and other cities.

All across the country, millions of dollars of private capital have been poured into the task of rebuilding the core business districts of the Nation's cities; and today we can see magnificent structures housing thousands of office workers and business establishments in every major urban area. From New York to Pittsburgh to Cleveland to Chicago to Los Angeles, the central core of the city has undergone a remarkable renaissance.

But our responsibility and our concern must extend beyond the business district of the core city. Grave housing problems remain in both the core and fringe areas of our cities with over 4 million substandard housing units throughout the Nation's urban areas. If we are to attain our goal of a decent home for every American family, we need to press the attack on the slums with a whole new arsenal of weapons.

It is not enough—and this bill recognizes that it is not enough—simply to barge in with a bulldozer and level entire neighborhoods. We must have a hous-

ing policy that is sufficiently flexible to discriminate between those areas where there are growing spots of decay and those which are irreparably blighted.

The measure before us directs the urban renewal program into a greater emphasis on conservation and rehabilitation. It provides for greater housing code enforcement, for a program of low interest loans to improve property, and one of grants to finance needed repairs.

In short, this bill throws up a whole series of new barriers to the galloping process of urban decay. And in so doing, it seeks to avoid the waste of material resources and the personal tragedies that are sometimes involved in the displacement of whole communities from dearly loved neighborhoods.

The bill also recognizes the critical housing shortages that exist on the campuses of American colleges and universities. Action in this area is an integral part of the overall effort we must make to meet the Nation's educational needs if we are to keep faith with the youth of America.

College enrollment over the last 25 years has more than tripled—to better than 5 million this year. By 1975, it will have increased to 8.6 million. All of these students must be housed while they are acquiring their education. And the institutions of higher learning which are struggling so valiantly to meet this challenge must have assistance.

Consequently, the college housing program which has already served the Nation so well for 15 years receives a deserved reaffirmation under this bill. It provides for increases of \$300 million in the college housing loan program for each of the next 4 years, and it lowers the interest rate on these loans to 3 percent.

Finally, the bill also expands the program so as to permit loans to provide parking facilities for students and faculty.

Most importantly, the bill recognizes that while there has been a gratifying increase in housing production over the years, the needs of low- and moderate-income families have been largely overlooked. The bill faces up to this problem squarely and, for the first time, undertakes a massive program to meet these needs.

For example, the public housing program, which, for so many years, has been the sole instrument for providing housing for low-income families, is extended with a substantially increased authorization of funds. Over the next 4 years, an additional 240,000 low-rent public housing units will be built.

The bill would also harness the energies and genius of American private enterprise by initiating a rent supplement program to help meet the housing needs of low- and moderate-income families. The essence of the rent supplement program is housing that is privately constructed, privately financed, and privately owned, with Government assistance in the form of FHA mortgage insurance and rent supplements to help families which cannot find standard housing, even with 25 percent of its income.

This program is, beyond question, the most significant feature of this outstanding bill. I can well understand why the President has called rent supplements "the most crucial new instrument to improve the American city."

I said earlier that this bill expresses vision and understanding. It is one of the finest bills that I have been privileged to support. It encourages vigorous housing production; it comes to grips with the need for conservation and rehabilitation of our urban resources; it provides needed assistance to our institutions of higher learning; and it faces up to the housing needs of low- and moderate-income families in a compassionate and effective way.

I urge that the Congress enact this bill into law.

Mr. MINISH. Mr. Chairman, I rise in support of H.R. 7984, the Housing and Urban Development Act of 1965.

This bill will continue vitally needed assistance to our cities for housing and urban development and authorize important new programs to increase the supply of housing, particularly for low-income groups.

I support this bill because of what it will do to help the cities meet the enormous problems they are facing as a result of urban growth and the move to the suburbs, and the decay of central cities.

As a member of the Banking and Currency Committee I am proud that we have reported such a far-reaching bill which will stand as a landmark in the history of housing and urban legislation.

The prevention of slums, the clearance of slums, the provision of housing for our lower income families, and the provision of community facilities are essential to the growth and prosperity of our cities and to the well being of our people.

The bill will help to do all these things. Without it, they simply cannot be accomplished.

The bill would continue a high level of Federal assistance to urban renewal for another 4 years. It would amend the law providing this assistance so that more emphasis will be placed on rehabilitation and conservation. This will help prevent the future growth of slums. It will also help avoid the displacement of families and businesses that occurs when slums have to be cleared. Nevertheless, where cities have to clear slums, the bill will help them to do so by continuing the availability of capital grants for urban renewal.

More generous assistance will be provided under the bill to those who are displaced by slum clearance. For example, small businesses who are forced to move could be given lease guarantees. This will help them find another place in which to carry on their businesses and reestablish themselves. The amount of readjustment payment that can be made to these small businesses by the Federal Government will also be increased from \$1,500 to \$2,500, and the amount they can receive for moving expenses will be much more realistic than it is now. These provisions will do a great deal to

preserve the small businesses that make up a large portion of the commercial activities of our cities.

Under a new program authorized by the bill, a homeowner in an urban renewal area, who cannot afford to do the repair work necessary to bring his home up to the urban renewal requirements, could be given a grant to finance the cost of these improvements. This should prove of special benefit to elderly homeowners. The 3-percent rehabilitation loan program for both business and residential properties in urban renewal areas will also be continued with an increased authorization. These aids will help prevent displacement and the growth of slums.

The rent supplement program in the bill will provide a new and important tool for helping lower income families find decent housing that they can afford. The housing will be privately built, privately owned, privately managed, and privately financed. This provision has received much discussion here and I need not go into it further, except to say that I thoroughly support it.

The changes made in the low-rent public housing program will make it easier for cities to provide low rental housing for low-income families. Under the bill, existing housing in the community, which is suitable for public housing, could be utilized for this purpose rather than building large new projects. This means that low-income housing can be provided much more quickly. In many cases, existing housing can be better suited for large families. Additional new public housing would also be authorized.

The provision of community facilities, and health, recreation and community centers continues to be a grave problem for our cities. This bill would authorize new programs of grants to help them provide these facilities which are so essential to complete urban living.

New grant assistance would also be provided to help cities acquire and preserve open space land, and to beautify their streets and public places. Because open space land is so scarce in the cities, grants could also be made available for the acquisition for land that has to be cleared in order to make it suitable for use as parks, playgrounds, and other open space purposes.

Because I come from a big city and know firsthand of the great need of the cities for the help provided by this bill, I am an enthusiastic supporter of this bill. I hope it will receive the overwhelming support of the House of Representatives.

Mr. BENNETT. Mr. Chairman, the legislation before the House today includes a provision subject to grave question, and one which I believe needs further study. This is the recommendation for a new program of rent supplements for moderate-income families.

Federal subsidies for rent are not new, but prior to this legislation, it was limited to low-rent public housing for the poor and to military and other Federal personnel in special circumstances.

This bill today provides a comprehensive program in the new, moderate-in-

come field for the next 4 years. The provision for rent subsidies seems to me to be a program which demands more concrete study by the Congress, mainly because of the question of who will be helped and who discriminated against by this program, and because of the estimated cost to the taxpayers.

The cost to the taxpayer ranges from the Housing Administrator's conservative estimate of \$4.7 billion as the 40-year cost, to the estimate by a more conservative element to \$8 billion for the entire 40-year period. The Council of State Chambers of Commerce views the program as one of doles, costing ultimately \$5 billion annually.

These are shocking figures to me, especially when we realize we have a planned deficit of \$5 billion this year and a national debt reaching \$318 billion. Although many causes for the current adverse fluctuations in the stock market have been stated; personally, I feel that this may in fact be because of a lack of public confidence in the ability of Congress to say "No" to unrealistic, fiscally unsound proposals which may appear politically attractive. If this be the fact, the strength of our economy might well be served by negative action on this proposal, at least until its limits are more definitely ascertained.

I believe we may have rushed into this program too fast, offering in some areas too much, and in others perhaps not enough.

A more realistic approach to the problem would be to provide assistance to individuals with low incomes by reducing the amount of income tax they pay to the Federal Government.

A tax reduction to a bare minimum for low-income families is the basic tenet of my bill, H.R. 6872, introduced earlier this year, which would reduce the income tax to \$5 for those citizens classed in the poverty status to eliminate the need for handouts from the Federal Government, such as the proposed rent supplement program.

This legislation of mine is designed to halt the tendency of Government to tax low-income groups while keeping them in the subsidy and welfare class. It could take the place of a major spending program, such as the one before the House today.

I hope the Congress will seriously consider this tax reduction idea, and I also hope further study and attention will be given to the rent supplement plan—a program, which at the least, makes the individual more dependent on a paternal Federal Government.

Mr. GILBERT. Mr. Chairman, the growth and decay of our cities, the rising population, and the health and welfare of the people of our Nation require the vastly expanded program of housing provided in H.R. 7984, the Housing and Urban Development Act of 1965. We must eliminate the critical housing shortage and eradicate substandard housing through clearance of slums and blighted areas.

The bill before us is vitally important to the people of my 22d Congressional District of New York, as it is to every densely populated area. Eight million

American families now live in substandard housing, many of whom cannot afford decent housing. One-half of these are either elderly or handicapped.

In New York we still have a very critical shortage of housing in spite of many new units in recent years, one-third of which have been low-rent housing projects. New York has about 250,000 units of substandard housing, a large portion of which is slum housing. We have had a substantial amount of construction, repairs, and rehabilitation. Much remains to be done, however. We need to convert neighborhoods where the poor live into better places for them—making them more livable with small parks, health centers, shops, and social facilities. The housing need is most urgent in areas where the poor live. The competition for housing they can afford is too great, and the housing they do get is the very worst.

I receive letters almost daily from families in my congressional district, requesting assistance in locating better housing because of crowded conditions and rents they cannot afford, but are forced to pay, for very inadequate and substandard living quarters. In New York City, we now have over 650,000 on the New York City Housing Authority waiting lists. Some 1.25 million live in substandard housing. They feel trapped with little or no hope of improving their housing conditions. It is no exaggeration to say the lives of the children of these families are being ruined and they will pay dearly for this neglect of their plight.

Mr. Chairman, public housing remains the only means by which families of low income can obtain suitable housing and at rents they can afford. Although we have made progress, there still exists a grave shortage. Any investment our Federal Government makes in providing good, low-rent housing will be amply repaid in many ways; it will provide needed improvement in the morale of our citizens and will lessen the many serious problems created by substandard housing. Suitable housing, as we all know, is an extremely important factor in combating juvenile delinquency, crime, and disease.

Mr. Chairman, I support section 101, the rent supplements program, which would complement the existing public housing program and offer low-income families another alternative to the choice between slums and regular public housing. The rent supplement payments would be made in behalf of a family unable to obtain standard privately owned housing in his community at a monthly rental which is equal to or less than one-fourth of his monthly income. Low-income families spend more proportionately per unit for housing than other families; often a family with a low income is forced to spend as much as 35 percent of its income on housing. The rent supplements program would be made with respect to privately built, privately financed, and privately owned housing. In addition to being low income, the family would have to be either elderly or handicapped, displaced by

government action, or now living in sub-standard housing.

Other desirable features of H.R. 7984 are the continuation of public housing and urban renewal, the highly successful college housing program, housing for the elderly, the continuation of the below-market-rate loan insurance program for middle-income housing and rural housing.

With regard to middle-income housing, I have felt that we have neglected those people in moderate income brackets who earn too much for public housing and yet cannot afford privately built, nonassisted housing.

Mr. Chairman, the urban renewal program continued by this legislation is of utmost importance. It will assist housing authorities in providing housing for very low income displacees at below average rentals; it will continue to make low-income displaced single persons eligible for public housing, will assist small businesses displaced by urban renewal, and will authorize the FHA to continue to insure below-market interest rate loans for moderate-income elderly persons who own homes in urban renewal areas, to enable them to rehabilitate instead of being forced to sell. President Johnson said, in his Housing Message:

We must continue to use urban renewal to help revitalize the business and industrial districts which are the economic base of the city * * * but this program should be more and more concentrated on the development of residential areas.

In New York there are many thousands of elderly of low incomes who need housing desperately. The provisions of this bill which will help our elderly are sorely needed.

I am pleased the bill contains a provision which I recommended for insurance mutuality for 213-management-type housing cooperatives. This would be done by the creation of a separate mortgage insurance fund for this type of housing.

I had hoped the bill would contain a provision that would allow New York State to participate in the public housing program with greater references to need than in the present formula which limits each State to no more than 15 percent of the annual contribution contracts a year. Our present need for public housing in New York City alone is estimated to be more than 250,000 units.

H.R. 7984 has a new program for matching grants to local public bodies for the construction of water and sewer facilities, and new programs for grants to build community centers to provide urban parks and beautification. I am glad that priority here is to be given to projects that would benefit low-income areas. The provision of adequate community services will make economic and social contributions toward communities by reducing the heavy costs of ill health and juvenile delinquency.

Mr. Chairman, aside from the many important provisions of this bill, another benefit will be the boost it will give to employment. Unemployment still is a serious problem, and the construction this legislation will provide will give jobs

and incomes to many, thereby helping our entire economy.

I commend Chairman PATMAN of the Banking and Currency Committee and Chairman BARRETT of the Housing Subcommittee and other members of the committee for their untiring efforts and accomplishments in reporting what I consider a practical and workable housing bill.

Mr. Chairman, I support H.R. 7984, the Housing and Urban Development Act of 1965, and urge approval by the House. We must make every effort to remedy the serious housing shortage and eliminate substandard housing through slum clearance; we must work toward the goal of a decent home and suitable living environment for every American family.

Mr. RYAN. Mr. Chairman, during my three terms in Congress, I have spoken many times in support of progressive housing legislation. I have introduced a number of bills to improve our present programs and to create new ones. Throughout the years, I have testified before the Housing Subcommittee of the Banking and Currency Committee. This year I testified in regard to the bill before us. I am pleased to say that many of the concepts that I have proposed have been incorporated.

However, Mr. Chairman, although far more has been accomplished during the past 5 years than in the previous 10, I cannot in good conscience view either the Housing Acts of 1961, 1962, or 1964 as adequate to meet our housing need. While I support the Housing Act of 1965, H.R. 7984, I must reflect on the apparent lack of congressional responsibility in meeting the housing needs of the Nation.

Mr. Chairman, we face a critical housing shortage today just as we did in 1937 when Congress passed the landmark bill that created our present public housing program. Congress passed the Housing Act of 1949, which was intended to guarantee a decent home and living environment for every American. But the full support of the Federal Government has not been placed behind our Nation's housing efforts. We have failed to admit and act upon the fact that the housing problem is one of severe housing shortage.

Mr. Chairman, I do not hesitate to say that New York City needs Federal help in its housing problems and needs it desperately.

I know the housing problems of New York City firsthand. They will not be met by H.R. 7984. It is more a palliative for our consciences than a fulfillment of our promises.

Although I speak of New York City, my comments apply to all cities. Urbanization and migration have not been absent from Atlanta or Detroit, Cleveland or Los Angeles. The primary force of growth is common to all cities—large and small. Decay is also found in all urban areas, but it is a major problem in a large metropolis.

The answer to the problem of housing in relation to urban growth is simple. We need more housing and lots of it. We need millions of units more than are now being built.

Current data indicate that housing starts are running at 1.5 million annually. This is far too few. Even the most conservative estimates indicate that at least 1.7 million units are needed in 1965. Some sources estimate a need of 2 million units in 1965 and an average of 2.2 million by 1970.

Actually, new housing production is down 100,000 units a year from its average of 1.6 million in 1963 and 1964.

The Dodge Corp., Dun & Bradstreet, and the McGraw-Hill Publishing Co. all agree that we must be averaging 1.8 million new units of housing annually by 1970 if we are just to keep pace with new household formation and normal housing removal. If we are to substantially upgrade our housing stock, we will have to do much better than that. The HHFA estimates that we will need at least 2 million new housing units a year by 1970 and the Committee for Economic Progress says that we must have 2.2 million a year if we are to provide a modicum of decent housing to all Americans.

Housing starts are now ranging around 1.5 million annually—half a million less than the HHFA estimated annual need in 1970—and industry spokesmen are talking about a possible downturn. Moreover far too many of these new units are in luxury apartments that do not meet present needs.

It is generally accepted that there has been some overbuilding in the high-income housing market and there is reason to believe that New York City has experienced this trend.

Fortune magazine, after mentioning that some New York City developers were offering 4 months' free rent in order to reduce vacancies, recently stated that the "most serious problems of oversupply in apartments are concentrated in one price range, in the so-called luxury buildings."

The New York Times commented early last year:

All are looking for better housing, but very few can find it. Private developers no longer build apartments within the reach of the poor because they would be unprofitable.

Thus the aggregate new housing construction in the Nation is short of the minimum amount needed, and, furthermore, the portion of that already inadequate supply available to low- and middle-income groups is grossly insufficient.

There is but one solution. The Federal Government must make good on its long-outstanding obligation by adopting policies that will drastically increase our housing stock by 1975.

We must start by enacting the Housing Act of 1965. The provisions of this act, which extend present programs, enlarge some authorizations, and provide for new programs of rent supplements, public facilities grants, and land development insurance, can be used as the framework on which to build a comprehensive Federal housing program that can realistically deal with our housing responsibilities.

Under H.R. 7984, the public housing program will be expanded—but not enough. Congress must recognize that

the public housing program is, and has been since 1937, the heart of the Federal housing program.

We cannot turn our backs on the poor.

There is a desperate shortage of housing in some areas of our Nation and those most disadvantaged by this shortage are our poor.

Dr. Robert Weaver, HHFA Administrator, has stated that a principal tool in the new program will "continue to be the public housing program." H.R. 7984 proposes 60,000 units per year for the next 4 years—or 240,000 units over that period.

Let us put those figures in proper perspective. Under this new program there would be—for the whole Nation—60,000 units of public housing a year. But only 35,000 of those would be new units. For 100,000 of the total 4-year program, or 25,000 a year, is to be in existing housing. This is important for the flexibility of the program, and I favor this approach. But what is the value of this concept in areas that already have an acute housing shortage? How will 35,000 new units a year for 4 years make a dent in the need for new housing?

There are millions of families with incomes below \$3,000 that are living in substandard housing. It has been estimated that four out of every five consumer units with incomes under \$2,000 are living in substandard housing.

For example, in New York City, out of 222,000 substandard renter-occupied housing units in 1960, 126,000 units were occupied by families or individuals with a 1959 income of less than \$3,000.

These families will find no immediate relief in the proposed rent subsidy program—they need public housing, and they need it now.

There is an effort to make the public believe that there is presently a massive public housing program underway.

U.S. News & World Report of a few weeks back stated that New York City's "public housing program—although massive—has come nowhere near solving housing problems."

I would like to point out that this massive effort which has failed to solve our housing problem in New York City had, as of the end of 1963, produced 124,700 units of public housing—4.3 percent of the 2,896,000 housing units in the city of New York.

In its own words, U.S. News points out that at the present rate of construction—roughly 6,000 units a year "a family applying now would have to wait 10 years for quarters in a public-housing project."

This is hardly a massive effort. It appears to me that we are deluding ourselves, and believing our critics, when we extol present and past efforts at housing the poor. Actually the performance is shameful.

New York City alone could use the entire authorization for public housing in this bill. As I pointed out in my testimony before the Housing Subcommittee, New York State can expect no more than 4,200 new public housing units a year under the present proposal while the New York City Housing Authority alone receives 100,000 applications a year for public housing.

New York City has over 1½ million residents living in substandard housing. Most of these are children. The adults are Negroes; they are Puerto Ricans; they are old; they are sick; they are unemployed; sometimes they are a combination of these. These are the people that must have public housing. Mr. Chairman, H.R. 7984, as it now stands, will not give it to them. Part of the reason is the statutory provision that no State may receive more than 15 percent of the amount of Federal assistance available for low-income public housing. I have introduced H.R. 3968 to repeal this provision, and I strongly urge its consideration in the near future by the Housing Subcommittee.

Mr. Chairman, I do recognize that the limited expansion of the present program is a step forward from the persistent inertia that restricts Federal activity in housing the citizens of this Nation.

The bill before us provides something that I have advocated for many years—an increase in payments to small businesses relocated from urban renewal projects. This bill increases relocation adjustment payments to businesses which net less than \$10,000 a year by increasing such payments from \$1,500 to \$2,500. I welcome this increase but must point out that it is far from adequate.

I have introduced H.R. 3967 which recognizes the real loss a businessman suffers in relocating. The bill provides for compensation for loss of good will. It also increases compensation to relocated tenants. I hope the Housing Subcommittee will consider this bill in the near future.

Another step in the right direction in H.R. 7984 is the provision for matching grants for public facilities, and still another is the increase of the Federal share of the open space land grant from 20 percent to 30 or 40 percent.

In fact, Mr. Chairman, if this were the 79th Congress instead of the 89th Congress, this would be a fine display of congressional responsibility in the area of housing. This bill is just about 20 years behind the needs of the American people. I want to see it passed, and I am sure that it will pass, but I see no reason to continue the myth that we are fulfilling our responsibilities to the people of this Nation.

Mr. Chairman, the President has called the rent supplement the most crucial new instrument in our effort to improve the American city. With proper application, it could become an important weapon in combating our present housing need.

Although criticism has arisen against the proposal, a careful consideration of the facts will show its advantages. The FHA will, under section 221(d)3 of the National Housing Act, insure mortgages for nonprofit and limited dividend sponsors on privately financed and built housing.

The Federal Government would then supplement the incomes of certain groups of persons—the low-income elderly and handicapped, low-income families displaced by public action, and

low-income families unable to get into decent housing in the existing private market—so that they could afford to live in this newly built or rehabilitated 221(d)3 housing. The supplement would be equal to the difference between their rents and 25 percent of their earnings.

Mr. Chairman, I support this proposal. In many areas it will be useful. But I am concerned that it may not be administered to help alleviate the housing shortage in New York.

Despite the promise of the Housing Act of 1961, the 221(d)3 housing program has not been implemented in New York City. No 221(d)3 housing has been built. FHA regulations are drawn so as to prevent it. Unless the Agency adopts realistic administrative rules, the supplement plan will not be available for New York City individuals and families.

There is another point I want to make. It concerns the method of tenant selection. The commitment of this Congress and of the President to an America in which equal opportunity for all is a way of life has become increasingly apparent. Discrimination in housing is as insidious and obnoxious as discrimination in voting. It perpetuates racial ghettos; it perpetuates de facto segregation in public education. It denies the promise of America. The authority for Federal action to eliminate discrimination in federally supported housing is as clear as the authority to eliminate racial disenfranchisement. The tenant selection process under the Federal rent supplement program should not only be free from racial discrimination, but it should promote integrated housing. Dr. Weaver has said that discrimination on the basis of race, color, or creed will be barred, but it is with deep regret that I note that the rent supplement plan will not be a tool for positive action for racial integration.

And now, Mr. Chairman, I would like to turn to the urban renewal section in H.R. 7984.

Section 303 of title III increases the authorization for capital grants to an aggregate of \$2.9 billion, released over the next 4 years at the rate of \$675 million on enactment; \$725 million on July 1, 1966; \$750 million on July 1, 1967, and another \$750 million on July 1, 1968.

There is no question of the importance of the urban renewal program to the future of our cities, and Congress must insure that the program benefits the people that Congress intended to help.

Every effort should be made to encourage families to remain in the inner city. Great flexibility in the urban renewal insurance program for small rehabilitation projects would be of tremendous assistance.

The Federal urban renewal program has a role to play in the development of our cities. No one could have stated this better than the President when he stated:

Whatever the scale of its programs, the Federal Government will only be able to do a small part of what is required. The vast bulk of resources and energy, of talent and toil, will have to come from State and local gov-

ernments, private interests, and individual citizens. But the Federal Government does have a responsibility.

As the President later pointed out, the role of the Federal Government is to serve as a catalyst for local action. In large part that role requires the expenditure of Federal funds to local communities that have the will to develop, but lack the wherewithal.

Our urban renewal program is a fine example of this principle, but I regret to say that it has not always achieved its objective.

I am particularly distressed over the continued reports of land reuse in the form of luxury housing and inadequate relocation practices.

As I pointed out earlier in my remarks, luxury housing has been overbuilt in New York City. The reason for this is the obvious high cost of land inside the central city. But what is less obvious is why luxury apartments have been constructed on urban renewal land that was cleared with a significant Federal write-down. It is one thing to build luxury apartments on private market land; it is something else again to build a luxury apartment on subsidized land that was formerly occupied by our less fortunate citizens.

I would like to point out that slum clearance and public housing were at one time intimately related. They worked together for the betterment of the low-income family.

In a 1937 pamphlet published by the Housing Division of the Federal Emergency Administration of Public Works, we find it clearly stated that "in any big slum clearance movement, homes must be provided for workers before the slums are wrecked."

It was the policy of the first Government housing authority to build public housing for slum dwellers on vacant land or on the land that was cleared. The whole operation was geared to the resettlement of slum dwellers in decent public housing.

However, there has been a departure from this practice. During the 1950's land was cleared for luxury housing, while a holding action against the construction of public housing was taking place. This distorted the intentions of the original slum clearance program, which was to rehouse the former slum dwellers in public housing. Although massive clearances is no longer the policy of the HHFA, we are still faced with the problems wrought by the practices of the 1950's. The emphasis should be placed, once again, on the close relationship between the urban renewal program and the provision of low-income housing.

Mr. Chairman, while this bill does not go far enough to meet the Nation's housing requirements, I support H.R. 7984 for two reasons. First, it will provide many services that are needed and many communities, especially middle-sized ones will benefit greatly from its passage. Second, I can support H.R. 7984 because it commits the Federal Government to an expanded program. It is a step in the right direction. Each time that a housing bill passes, no matter how inadequate, it brings nearer the day when

Congress will pass housing legislation that is of a magnitude sufficient to do the job.

I am squarely behind this bill. It is a building block, as were the Housing Acts of 1961, 1962, and 1964. This year we are pushing the forces of reaction a little further into the oblivion that they so rightly deserve. Next year, who knows, we might get a housing bill equal to the responsibilities of a modern government to its constituents.

Mr. ASHLEY. Mr. Chairman, the present college housing loan program authorizes the HHFA to make loans to finance college dormitories and related facilities at an interest rate—presently 3¾ percent—determined annually under a formula in the law—the average market yield on all interest-bearing obligations of the United States, adjusted to the nearest one-eighth of 1 percent, plus one-fourth of 1 percent—if the financing is not available from other sources on equally favorable terms. President Johnson requested \$300 million additional authorization for such loans in each of the next 4 years but he did not request any change in the interest rate for such loans. Section 502 of H.R. 7984, the proposed Housing and Urban Development Act of 1965 as reported in the House, would reduce the interest rate on such loans to 3 percent.

College housing bonds sold to non-Government purchasers in 1964 aggregated over \$222 million. College housing bonds sold to non-Government purchasers from February to May 1965 aggregated almost \$100 million. All of these bonds were sold at interest rates above 3 percent but below 4 percent. If the proposed 3-percent rate had been in effect all of these bonds would have been eligible for purchase by the Federal Government, although the fact that they were sold in the private market demonstrates that there was no need for Government purchase of them at a 3-percent rate.

The present 3¾-percent rate under the program is so low, compared to the yield of about 4.2 percent on obligations of the U.S. Government of comparable maturities or 4.5 to 4.6 percent on top-quality corporate bonds, that practically all college dormitory financing by private institutions is eligible at the present rate and part of the dormitory financing by public institutions through tax-exempt bonds is also eligible at the present rate.

The committee report on H.R. 7984 suggests as the only reasons for the proposed reduction in the rate that, first, the assistance intended by Congress has been greatly reduced and, second, typical dormitory quarters financed with money at 3 percent can be rented to a student at \$380 a year while the same quarters financed with money borrowed at 4 percent must be rented for \$430 a year. Available data suggests that neither reason is a correct basis for reducing the interest rate.

First, the rate under the program has fluctuated with the yield on U.S. obligations and as of March 31, 1965, funds had been reserved for a total commitment of \$2.849 billion from an authorized aggregate of \$2.875 billion—with an ad-

ditional \$147 million available through repayments, bond sales, and net income. The program has provided substantially all of the dormitory financing by private institutions and a large part of the financing through tax-exempt bonds by public institutions.

Second, the example of an annual dormitory rental fee of \$380 a year at 3 percent or \$430 a year at 4 percent is based on a false premise because many bond issues sold to non-Government purchasers at rates close to 3¾ percent have financed dormitories where the rental fee will be substantially less than \$300 per year. For example, annual dormitory rental fees will be as follows:

First, \$208 for men and \$248 for women in dormitories financed by the \$4,750,000 issue by Louisiana Polytechnical on May 20, 1965, at a net interest cost of 3.68 percent.

Second, \$192 in dormitories financed by the \$2,544,000 issue by the University of North Carolina on May 14, 1965, at a net interest cost of 3.458 percent.

Third, \$240 in dormitories financed by the \$1,520,000 issue by Central State College of Oklahoma on April 18, 1965, at a net interest cost of 3.67 percent.

Fourth, \$216 for dormitories financed by the \$645,000 issue by Glenville State College, W. Va., on June 11, 1964, at a net interest cost of 3.711 percent.

Fifth, \$290 for dormitories financed by the \$9.6 million issue by Wyoming University on May 26, 1965, at a net interest cost of 3.78 percent.

I urge support of an amendment to strike section 502 of H.R. 7984, thereby eliminating the provision to reduce the interest rate under the college housing program to 3 percent and leaving the rate as determined under the present formula because:

The proposed 3-percent rate would actually delay construction of needed college dormitories because many institutions which would otherwise obtain financing immediately in the private market will wait to obtain 3-percent funds and the proposed authorization would not satisfy this increased demand.

The proposed 3-percent rate would simply substitute Federal financing for private financing for a large volume of dormitory issues which could be sold in the private market at reasonable rates which would permit reasonable rental fees.

The proposed 3-percent rate would be less than the average yield of interest-bearing obligations of the U.S. Government.

The proposed 3-percent rate would effect complete preemption of college dormitory financing by the Federal Government so that there would be little investor interest in such financing and this would impair the acceptance of such bonds in the private market whenever an institution found it necessary to resort to the private market.

Mr. WIDNALL. Mr. Chairman, I ask unanimous consent that Members who have spoken today have permission to revise and extend their remarks.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. PATMAN. Mr. Chairman, permission was granted in the House for all Members to extend their remarks and to include extraneous matter if germane.

Mr. WIDNALL. Mr. Chairman, I yield back the balance of my time.

Mr. PATMAN. Mr. Chairman, I ask the Clerk to read.

The CHAIRMAN. There being no further requests for time, the Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Housing and Urban Development Act of 1965".

TITLE I—HOUSING FOR DISADVANTAGED PERSONS
Financial assistance to enable certain private housing to be available for lower income families who are elderly, handicapped, displaced, or occupants of substandard housing

SEC. 101. (a) The Housing and Home Finance Administrator (hereinafter referred to as the "Administrator") is authorized to make, and contract to make, annual payments to a "housing owner" on behalf of "qualified tenants," as those terms are defined herein, in such amounts and under such circumstances as are prescribed in or pursuant to this section. In no case shall a contract provide for such payments with respect to any housing for a period exceeding forty years. The aggregate amount of the contracts to make such payments shall not exceed amounts approved in appropriation acts and shall not exceed \$50,000,000 per annum prior to July 1, 1966, which maximum dollar amount shall be increased by \$50,000,000 on July 1, in each of the years 1966, 1967, and 1968.

(b) As used in this section, the term "housing owner" means a private nonprofit corporation or other entity, a limited dividend corporation or other entity, or a cooperative housing corporation, which is a mortgagor under section 221(d)(3) of the National Housing Act and which, after the enactment of this section, has been approved for mortgage insurance thereunder and has been approved for receiving the benefits of this section: *Provided*, That no payments under this section may be made with respect to any property financed with a mortgage receiving the benefits of the interest rate provided for in the proviso in section 221(d)(5) of that Act.

(c) As used in this section, the term "qualified tenant" means any individual or family who has, pursuant to criteria and procedures established by the Administrator, been determined—

(1) to be unable to obtain standard privately owned housing in the area at a rental which is equal to or less than one-fourth of the income of such individual or family; and

(2) to be one of the following—

(A) displaced by governmental action;

(B) sixty-two years of age or older (or, in the case of a family, to have a head who is, or whose spouse is, sixty-two years of age or over);

(C) physically handicapped (or, in the case of a family, to have a head who is, or whose spouse is, physically handicapped); or

(D) occupying substandard housing.

(d) The amount of the annual payment with respect to any dwelling unit shall not exceed the amount by which the fair market rental for such unit exceeds one-fourth of the tenant's income as determined by the Administrator pursuant to procedures and regulations established by him.

(e) (1) For purposes of carrying out the provisions of this section, the Administrator shall establish criteria and procedures for

determining the eligibility of occupants and rental charges, including criteria and procedures with respect to periodic review of tenant incomes and periodic adjustment of rental charges. The Administrator shall issue, upon the request of a housing owner, certificates as to the following facts concerning the individuals and families applying for admission to, or residing in, dwellings of such owner:

(A) the income of the individual or family; and

(B) whether the individual or family was displaced by governmental action, is elderly, is physically handicapped, or is (or was) occupying substandard housing.

(2) Procedures adopted by the Administrator hereunder shall provide for recertifications of the incomes of occupants, except the elderly, at intervals of two years (or at shorter intervals in cases where the Administrator may deem it desirable) for the purpose of adjusting rental charges and annual payments on the basis of occupants' incomes, but in no event shall rental charges adjusted under this section for any dwelling exceed the fair market rental of the dwelling.

(3) The Administrator may enter into agreements, or authorize housing owners to enter into agreements, with public or private agencies for services required in the selection of qualified tenants, including those who may be approved, on the basis of the probability of future increases in their incomes, as lessees under an option to purchase dwellings or cooperative ownership interests therein, and in the establishment of rentals. The Administrator is authorized (without limiting his authority under any other provision of law) to delegate to any such public or private agency his authority to issue certificates pursuant to this subsection.

(f) Section 101(c) of the Housing Act of 1949 is amended by inserting "(1)" after "a mortgage under" in the first proviso and by inserting immediately before the colon at the end of such proviso the following: ", or (1) section 221(d)(3) of the National Housing Act if payments with respect to the mortgaged property are made or are to be made under section 101 of the Housing and Urban Development Act of 1965, except that no such mortgage shall be insured, and no commitment to insure such a mortgage shall be issued, with respect to property in any community for which a workable program for community improvement was required and in effect at the time a contract for a loan or capital grant was entered into under this title, or a contract for annual contributions or capital grants was entered into pursuant to the United States Housing Act of 1937, unless there is a workable program for community improvement which meets the requirements of this subsection in effect in such community at the time of such insurance or commitment".

(g) The Administrator is authorized to make such rules and regulations, to enter into such agreements, and to adopt such procedures as he may deem necessary or desirable to carry out the provisions of this section. Nothing contained in this section shall affect the authority of the Federal Housing Commissioner with respect to any housing assisted under this section and under section 221(d)(3) of the National Housing Act, including his authority to prescribe occupancy requirements under other provisions of law or to determine the portion of any such housing which may be occupied by qualified tenants.

(h) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section, including, but not limited to, such sums as may be necessary to make annual payments, pay for services provided under (or pursuant to agreements entered into under) subsection (e), and provide administrative expenses.

(i) Section 114(c)(2) of the Housing Act of 1949 is amended by inserting before the colon at the end of the first proviso the following: ", or a dwelling unit assisted under section 101 of the Housing and Urban Development Act of 1965".

(j) On or before January 1, 1968, the Administrator shall submit to the Congress a full report of operations under this section, together with his recommendations with respect thereto.

Mr. WIDNALL (interrupting the reading of the bill). Mr. Chairman, I understood we were going to read just the title and then rise and go over.

Mr. PATMAN. Mr. Chairman, I ask unanimous consent that the first section be considered as read.

Mr. WIDNALL. Mr. Chairman, I should have to object to that unanimous-consent request. I think the section should be read.

Mr. PATMAN. We expect to read the first section and then move that the Committee rise.

Mr. WIDNALL. I had understood that we were going to read the title and then rise.

Mr. PATMAN. I am sorry there was a misunderstanding.

Mr. Chairman, I move that the Committee do now rise.

Mr. WIDNALL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. Will the gentleman from Texas withhold the motion until we have the parliamentary inquiry?

Mr. PATMAN. I will, Mr. Chairman.

Mr. WIDNALL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WIDNALL. With the reading of this section, does that mean that if we adjourn over until tomorrow at this time there will still be the possibility of amendment of this section?

The CHAIRMAN. Section 101 will be subject to amendment.

Mr. PATMAN. Mr. Chairman, I now move that the Committee do rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore, Mr. ALBERT, having assumed the chair, Mr. FLOOD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7984) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities, had come to no resolution thereon.

THE IMPORTANT WORK OF KEN BELIEU

(Mr. SIKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIKES. Mr. Speaker, it is with great regret that I note the resignation of the Honorable Kenneth Belieu, Under Secretary of the Navy. I consider him one of the ablest members of

HIGHLIGHTS: House passed housing bill. Senate Committee voted to report USDA appropriation bill. House committee reported bill to postpone wheat referendum.

HOUSE

1. HOUSING LOANS. Passed, 245-169, with amendments H. R. 7984, the housing and urban development bill (pp. 14669-714). Agreed to an amendment by Rep. Hagen, Calif., to increase from 2,500 to 5,500 the population of a community which may be eligible for rural home loans through the Farmers Home Administration (pp. 14704-5). Title IX of the bill would provide a new \$300,000,000-per-year program of insured housing loans under the Farmers Home Administration in rural areas.
2. WHEAT. The Agriculture Committee reported without amendment H. R. 9497, to extend until not later than 30 days after adjournment of the current session of Congress the date for conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning July 1, 1966 (H. Rept. 571). p. 14764

3. EXPORT CONTROL. Concurred in the Senate amendments to H. R. 7105, to continue the Export Control Act for 4 years. This bill will now be sent to the President. p. 14716
4. SALT-WATER RESEARCH. The Interior and Insular Affairs Committee voted to report (but did not actually report), amended, H. R. 7092, to expand, extend, and accelerate the saline water conversion program of the Interior Department. p. D600
5. PUERTO RICO. The Interior and Insular Affairs Committee voted to report (but did not actually report) S. 2154, to amend the act establishing the Commission on the Status of Puerto Rico. p. D600
6. WATER RESOURCES. The conferees agreed to file (but did not actually file) a report on S. 21, the proposed Water Resources Planning Act. p. D601
7. TAXATION. The Judiciary Committee submitted a report on "State taxation of interstate commerce" (H. Rept. 565). p. 14764
8. D. C. APPROPRIATION BILL. Received the conference report on this bill, H. R. 6453 (H. Rept. 568). pp. 14762-3
9. BEEF EXPORTS. Rep. Olsen, Mont., reviewed and commended the efforts of producers, this Department, and others, to increase beef exports, stating that beef does not get its share of our export market. pp. 14761-2
10. FOREIGN AID. Rep. Ryan objected to wheat aid to Egypt. p. 14738
11. LABOR STANDARDS. Rep. Roosevelt inserted responses given the subcommittee by the Labor Department in the course of hearings on amendments to the Fair Labor Standards Act including data on wages paid for work relating to agriculture. pp. 14724-8
12. TARIFFS. Rep. Sikes spoke in favor of his bill to amend the Trade Expansion Act, stating that we should reshape our trade policy to support the better health of our economy. pp. 14738-9

SENATE

13. AGRICULTURAL APPROPRIATION BILL, 1966. The "Daily Digest" states that the Appropriation Committee voted to report (but did not actually report_ this bill H. R. 8370. p. D597
14. APPROPRIATIONS. The Appropriations Committee reported with amendments H. R. 7997 the independent offices appropriations bill, 1966, (S. Rept. 384). p. 14790
15. TRANSPORTATION. Passed as reported S. 1098, to amend the Interstate Commerce Act to insure the adequacy of the national railroad freight car supply (pp. 14827-9). This bill was earlier reported with amendment (S. Rept. 386) (p. 14790).
The Commerce Committee reported with amendments S. 1727, to provide for strengthening and improving the national transportation system (S. Rept. 387). p. 14791

tion his fairness and his great love for the House of Representatives.

So I am proud, indeed, to join in this tribute.

Mr. ALBERT. Mr. Speaker, I thank the gentleman.

Mr. Speaker, along with commending our great chairman, I should also like to commend all members of the Committee on the Judiciary on both sides of the House who have performed a great service to the Congress and to the country.

HAPPY BIRTHDAY, MR. GROSS

(Mr. HALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HALL. Mr. Speaker, when one addresses his remarks to the 10th birthday of the Republic of the Congo, such remarks might well "scoop me" on the subject of the birthday of a great Republican in the Congress. However, quite properly the gentleman from Ohio [Mrs. BOLTON] did "scoop me" in my remarks about the great Iowan's [Mr. GROSS] natal date; in which all have so enthusiastically responded to the arrival of his 66th year, which is over and above the call of service and the age of retirement. This droll gentleman, this watchdog of the Treasury, this radio reporter of early and extraordinary vintage, this stanch advocate, considered irascible by some but loved by all, and particularly his lovely wife and fine sons, son of the soil from the great farm State of Iowa, trained in Missouri, this friendly statesman, leads me to honor his birthday, by further leave of the Speaker, to make a point of order that there is no quorum present.

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman from Missouri yield to me?

Mr. HALL. I am glad to yield to the distinguished minority leader.

Mr. GERALD R. FORD. Mr. Speaker, unfortunately, because of minority business I was not present when remarks were made by many Members on the floor concerning the birthday anniversary of our colleague, H. R. GROSS, from the State of Iowa. I should like to join with all who have spoken on his behalf. I wish him well for many, many more years both in the House and otherwise.

CALL OF THE HOUSE

Mr. HALL. Mr. Speaker, I make the point or order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 161]

Addabbo	Holland	Rostenkowski
Bonner	Keogh	Shipley
Bow	Long, La.	Springer
Brown, Ohio	Martin, Mass.	Steed
Cahill	Morrison	Thomas
Chelf	Morton	Toll
Dent	Passman	Tupper
Evins, Tenn.	Pool	Willis
Harvey, Ind.	Powell	

The SPEAKER. On this rollcall 406 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

Mr. PATMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7984) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7984), with Mr. FLOOD in the chair.

The CHAIRMAN. When the Committee rose on yesterday the Clerk had read through section 101, ending on line 7, page 7 of the bill.

AMENDMENT OFFERED BY MR. STEPHENS

Mr. STEPHENS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STEPHENS: Strike out section 101 (beginning on page 2, line 3, and ending page 7, line 7) and insert the following:

"FINANCIAL ASSISTANCE TO ENABLE CERTAIN PRIVATE HOUSING TO BE AVAILABLE FOR LOWER INCOME FAMILIES WHO ARE ELDERLY, HANDICAPPED, DISPLACED, OR OCCUPANTS OF SUBSTANDARD HOUSING

"SEC. 101. (a) The Housing and Home Finance Administrator (hereinafter referred to as the 'Administrator' is authorized to make, and contract to make, annual payments to a 'housing owner' on behalf of 'qualified tenants', as those terms are defined herein, in such amounts and under such circumstances as are prescribed in or pursuant to this section. In no case shall a contract provide for such payments with respect to any housing for a period exceeding forty years. The aggregate amount of the contracts to make such payments shall not exceed amounts approved in appropriation Acts and shall not exceed \$30,000,000 per annum prior to July 1, 1966, which maximum dollar amount shall be increased by \$35,000,000 on July 1, 1966, by \$40,000,000 on July 1, 1967, and by \$45,000,000 on July 1, 1968.

"(b) As used in this section, the term 'housing owner' means a private nonprofit corporation or other private nonprofit legal entity, a limited dividend corporation or other limited dividend legal entity, or a cooperative housing corporation, which is a mortgagor under section 221(d)(3) of the National Housing Act and which, after the enactment of this section, has been approved for mortgage insurance thereunder and has been approved for receiving the benefits of this section: *Provided*, That no payments under this section may be made with respect to any property financed with a mortgage receiving the benefits of the interest rate provided for in the proviso in section 221(d)(5) of that Act.

"(c) As used in this section, the term 'qualified tenant' means any individual or

family who has, pursuant to criteria and procedures established by the Administrator, been determined—

"(1) to have an income below the maximum amount which can be established in the area, pursuant to the limitations prescribed in section 2(2) of the United States Housing Act of 1937, for occupancy in public housing dwellings; and

"(2) to be one of the following—

"(A) displaced by governmental action;

"(B) sixty-two years of age or older (or, in the case of a family, to have a head who is, or whose spouse is, sixty-two years of age or over);

"(C) physically handicapped (or, in the case of a family, to have a head who is, or whose spouse is, physically handicapped); or

"(D) occupying substandard housing.

"(d) The amount of the annual payment with respect to any dwelling unit shall not exceed the amount by which the fair market rental for such unit exceeds one-fourth of the tenant's income as determined by the Administrator pursuant to procedures and regulations established by him.

"(e) (1) For purposes of carrying out the provisions of this section, the Administrator shall establish criteria and procedures for determining the eligibility of occupants and rental charges, including criteria and procedures with respect to periodic review of tenant incomes and periodic adjustment of rental charges. The Administrator shall issue, upon the request of a housing owner, certificates as to the following facts concerning the individuals and families applying for admission to, or residing in, dwellings of such owner:

"(A) the income of the individual or family; and

"(B) whether the individual or family was displaced by governmental action, is elderly, is physically handicapped, or is (or was) occupying substandard housing.

"(2) Procedures adopted by the Administrator hereunder shall provide for recertifications of the incomes of occupants, except the elderly, at intervals of two years (or at shorter intervals in cases where the Administrator may deem it desirable) for the purpose of adjusting rental charges and annual payments on the basis of occupants' incomes, but in no event shall rental charges adjusted under this section for any dwelling exceed the fair market rental of the dwelling.

"(3) The Administrator may enter into agreements, or authorize housing owners to enter into agreements, with public or private agencies for services required in the selection of qualified tenants, including those who may be approved, on the basis of the probability of future increases in their incomes, as lessees under an option to purchase (which will give such approved qualified tenants an exclusive right to purchase at a price established or determined as provided in the option) dwellings or cooperative ownership interests therein, and in the establishment of rentals. The Administrator is authorized (without limiting his authority under any other provision of law) to delegate to any such public or private agency his authority to issue certificates pursuant to this subsection.

"(f) Section 101(c) of the Housing Act of 1949 is amended by inserting '(i)' after 'a mortgage under' in the first proviso and by inserting immediately before the colon at the end of such proviso the following: ', or (ii) section 221(d)(3) of the National Housing Act if payments with respect to the mortgaged property are made or are to be made under section 101 of the Housing and Urban Development Act of 1965, except that no such mortgage shall be insured, and no commitment to insure such a mortgage shall be issued, with respect to property in any community for which a workable program for community improvement was re-

quired and in effect at the time a contract for a loan or capital grant was entered into under this title, or a contract for annual contributions or capital grants was entered into pursuant to the United States Housing Act of 1937, unless there is a workable program for community improvement which meets the requirements of this subsection in effect in such community at the time of such insurance or commitment'.

"(g) The Administrator is authorized to make such rules and regulations, to enter into such agreements, and to adopt such procedures as he may deem necessary or desirable to carry out the provisions of this section. Nothing contained in this section shall affect the authority of the Federal Housing Commissioner with respect to any housing assisted under this section and under section 221(d)(3) of the National Housing Act, including his authority to prescribe occupancy requirements under other provisions of law or to determine the portion of any such housing which may be occupied by qualified tenants.

"(h) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section, including, but not limited to, such sums as may be necessary to make annual payments as prescribed in this section, pay for services provided under (or pursuant to agreements entered into under) subsection (e), and provide administrative expenses.

"(i) Section 114(c)(2) of the Housing Act of 1949 is amended by inserting before the colon at the end of the first proviso the following: ', or a dwelling unit assisted under section 101 of the Housing and Urban Development Act of 1965.'

"(j) On or before January 1, 1968, the Administrator shall submit to the Congress a full report of operations under this section, together with his recommendations with respect thereto."

Mr. STEPHENS. Mr. Chairman, I ask unanimous consent to have an additional 5 minutes to explain my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

(Mr. STEPHENS asked and was given permission to revise and extend his remarks.)

Mr. STEPHENS. Mr. Chairman, for the 5 years I have been here I have had people come up here many times and ask of me: "What good does debate do on the floor of the House?"

Many times they find people not here or not listening. These are during periods of unimportance. But I think we have an example today in this amendment of what good debate does accomplish on the floor of the House in a discussion and a thorough airing before the Members of the House on a bill which was voted out of committee by ten to one. We thought we had a good bill.

This was a bill we thought we had perfected. What my amendment does is to establish five points. Those five points are points that have been brought to my attention and to the attention of the Members in debate on this side, and by Members on the other side. These are not necessarily in the order in which they appear in the amendment.

The first point is that we are offering a reduction of the cost of the subsidy in section 101 by reducing by an average

of \$50 million per year, or a reduction of \$200 million during the life of the bill.

The second thing we are proposing is to limit the eligibility of people who need a rent subsidy to people who are eligible for public housing.

There is no change so far as the other provisions are concerned which are still in the bill that requires them to have a 25-percent income level which makes them eligible. They have to be elderly, they have to be handicapped, they have to be in substandard housing or in the category of one who has been displaced by public action.

The third proposal is the proposal that was made in the Rules Committee. There was discussion there and objection made by others. The proposal was made by the gentleman from California [Mr. SISK]. He wanted put in the bill, which the amendment will put in, terminology that would give the person who goes in under a subsidy the right and encouragement to buy that house by having an option to buy the house at a specified price.

The fourth point meets an objection that was made. It is a point that is important. It is a definition further of what is a legal entity. We have provided in the main part of the bill, in the original part of section 101, that a non-profit corporation or a limited dividend corporation would be the sponsor. But it was not quite clear what was meant by a legal entity because some people thought that might include a partnership or something of that nature.

The language that we propose in this amendment, and the majority of the committee are proposing in this amendment, is that if it is a partnership or other legal entity it also must be a non-profit partnership.

The fifth is to clarify another point made on the floor of the House, a point that was made when we discussed this in the Rules Committee. The point made was that it seemed in another section of the bill that the subsidy had no top to it. The doubt was expressed that the money could be utilized for the rent subsidy over what was authorized in section 101 of the bill.

We are putting language in by this amendment that clarifies that. It says that the authorization of the \$150 million annually is the amount and it will not be more than that and the other sections of the bill do not pertain to this at all. It is clearly put in that language.

We think by bringing this amendment to the floor of the House and looking at it in the light of the debate that you have heard, it will correct many of the misinterpretations and misunderstandings with reference to this.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the gentleman.

Mr. PATMAN. Is it not a fact that the principal changes are the Muskie amendment, as passed by the Senate committee?

Mr. STEPHENS. That is correct.

Mr. PATMAN. And the substantial reductions in the amount of money involved?

Mr. STEPHENS. Those are the two major amendments. But I will say this also, Mr. Chairman, the other three are highly important. They are important because they meet the questions that other Members of the House have had. But those, as our chairman has pointed out, are the two main and important parts of the amendment here. The other three correct some of the more or less minor parts of the bill.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the gentleman.

Mr. BARRETT. Mr. Chairman, frankly I do not see any real basis for the misunderstanding since we are convinced that the bill and the committee report made it clear that eligible families and individuals would be in the lowest income category.

But I do think your amendment pours oil on these troubled waters by clearly specifying the eligible families and individuals could not have incomes higher than those permitted in low-rent public housing under the public housing program.

With this amendment I hope we can resolve the lingering doubts that apparently exist in the minds of some of the Members and make it perfectly clear that this body intends that the benefits of the rent supplement program would go to families and individuals in the public housing range.

I certainly support the gentleman's amendment.

Mr. STEPHENS. I thank the gentleman.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield to the distinguished minority leader of the Subcommittee on Housing.

Mr. WIDNALL. I think the distinguished chairman of our full committee made the statement that the second part of this was the Muskie amendment that was passed by the Senate Committee on Banking and Currency. I have the Senate bill in front of me and I think there are very many major distinctions between the Muskie amendment and what you are offering today. I might say I do not think this is the way to legislate—what is taking place at the present time. It seems to me you are presenting something of very major importance in the housing field, something that is supposed to take care of the low-income groups and give them a better deal than they have had in the past. Yet, there are three copies of your proposal on this side which we have just received and I venture to say that not more than three or four have read it on your own side—and this should be a subject of major hearings before our committee.

Mr. STEPHENS. Let me answer what you have to say in this way. The amendment has been read in its entirety on the floor of the House. The amendment is not new to any of you on this side because these proposals—not as an amendment—but these proposals, as individual propositions, are propositions

that you have made, or which have been here in cloakroom discussion or made on the floor of the House yesterday as proposals for perfecting this bill. So you are just as familiar with it as I am so far as the intent of the language and the text of the amendment is concerned.

Mr. WIDNALL. I will admit I am as familiar with it as you are. That is how new it is.

Mr. STEPHENS. Good. I am familiar with the principles involved in it regardless of the language you are talking about. Now what we are saying so far as this being the Muskie amendment is concerned is this: My amendment provides that those who are qualified as tenants must be qualified in addition to all the other things pursuant to the limitations prescribed in section 2, subparagraph 2, U.S. Housing Act of 1937, for occupancy in public housing dwellings.

Now we are limiting this to the point where we have received criticism, not that we deserve it, but criticism that we are trying to help people who have high incomes and we are saying that this meets the argument that we should help poor people.

If we are going to pass this bill, that is the objective: To help the poor people in America.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I yield for a question.

Mr. BROCK. I believe we all share the objective of helping poor people. Let me ask the gentleman a question. Under the amendment would not tenants be eligible to receive rent supplements in this type of program, under section 101, having incomes as high as \$10,500 a year?

Mr. STEPHENS. I cannot answer that specifically. My first thought would be "no," because I do not believe we will find that to be true in public housing anywhere. As I say, from my own information the average income in public housing is an income of around \$4,000. It will vary from community to community according to the standard of living and the cost of living in those communities.

Mr. BROCK. If the gentleman will yield further, he knows full well we are not talking about averages. I asked him if it could not be as high as \$10,500.

Mr. STEPHENS. I believe I answered that.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. FINO. Mr. Chairman, I rise in opposition to the amendment.

(Mr. FINO, by unanimous consent, was granted permission to proceed for an additional 5 minutes.)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. FINO. I yield to the gentleman from New York.

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the Record.)

Mr. OTTINGER. Mr. Chairman, the legislation before us today—the Housing and Urban Development Act of 1965—is not perfect. No legislation is. But this is a good bill, containing many

worthwhile and necessary programs, and it certainly deserves our support.

As a member of the Committee on Banking and Currency, I know how much time and bipartisan effort went into making this bill as good as it is. I want to particularly commend the chairman of the committee, the gentleman from Texas [Mr. PATMAN], the chairman of the Subcommittee on Housing, the gentleman from Pennsylvania [Mr. BARRETT], and the ranking minority member of the committee, the gentleman from New Jersey [Mr. WIDNALL], for their leadership in working out an effective, comprehensive program.

There has been considerable controversy, both in and out of Congress, over section 101 of this bill, the rent subsidy provision. When this provision was discussed in committee, I voiced reservations about it, mainly because I felt at that time the legislation did not contain adequate safeguards against the subsidy program being applied too broadly. We just do not have money enough to subsidize housing for everyone in this country, and while I can support assistance to provide housing for the very poor, I did not think, with hundreds of thousands of impoverished people still in slum housing, we should go further.

In response to my reservations and those of other Congressmen, the administration has revised the bill so that now only those persons who qualify for public housing will be eligible for rent supplements. This satisfies my objections and makes this section a very worthy experiment to better deal with the housing needs of the poor.

It is important to note that the present public housing program simply has failed to do the job of providing decent, safe, and sanitary housing for American families afflicted with poverty. Today in the United States there are more than 3 million families living in substandard housing who have incomes too low for decent private housing in their communities.

In addition, there are more than 2 million elderly or handicapped lacking decent housing, and each year 80,000 families are displaced by some kind of Government action.

Since the public housing program started, only 580,000 units have been built. Today, 500,000 families are on waiting lists for public housing units. The rent supplement program gives us another tool to meet the need for housing without getting us into a federally operated housing program of incredible proportions. The rent supplement program enables us to meet the housing needs of low-income families through the private sector of the economy, and this is certainly a laudable approach.

Despite the fact that Westchester County, N.Y., which I represent, is one of the Nation's three most affluent counties on a per capita basis, for many years it has been confronted with the problem of slums and decay and poverty in the midst of gracious, attractive communities. The 1960 census revealed that 6.5 percent of the dwellings in the county, housing some 50,000 persons, were substandard. It also revealed an

unfortunate connection between substandard housing, old housing, rental housing, nonwhite occupancy, and low income. In the three largest cities of Westchester—Yonkers, Mount Vernon, and New Rochelle—32 percent of the nonwhite rental units were classified as substandard and 7½ percent of the rental units occupied by whites were substandard.

Mr. Chairman, a program which provides housing that is privately sponsored, privately built, and privately financed under FHA will meet important needs in New York's 25th Congressional District, as I am sure it will in many areas of the Nation.

A vote for this program is a vote for breaking the vicious, continuing cycle of poverty in the world's richest nation.

Mr. FINO. Mr. Chairman and Members of the Committee I rise in opposition to this amendment. I am very sorry to see an amendment of this great importance, of this great magnitude, offered at the last minute without any consultation with the minority. We learned for the first time the contents of this amendment 5 minutes ago.

This section 101 is the crux of the whole argument on the housing bill, and the amendment is a 6-page amendment, yet we are expected to legislate within 5 minutes and determine the substance of the amendment, the value of the amendment, and what it would do or propose to do.

I say that this amendment offered by the majority is a meaningless, do-nothing, red herring amendment offered at this time. So far as I am concerned, it shows that fear of defeat has gripped the majority. They are disturbed about this section 101. They are so disturbed about it that they have come in with an amendment to try to camouflage the whole picture, to try to deceive the Members. If anything, it is an exercise in deceit of the type we have become used to during general debate of this section.

This is an amendment which is another trick from the Housing Administrator's big bag of tricks.

This amendment purports to limit rent-supplement payments to persons with incomes falling below the public housing maximum under the Federal public housing laws. This is a very clever way to try to deceive the Members of this House.

The bill as originally written, the bill we have discussed here for 2 days, talked of \$50 million now, \$50 million in 1966, in 1967, in 1968. So what they did was to come in and chop off \$20 million the first year, \$15 million the second year, \$10 the third year, and \$5 million the fourth year, so that instead of having \$200 million, the figure would be \$150 million. This is supposed to be the bait for you people to swallow.

So, instead of trying to sell the Congress of the United States an \$8 billion program, we are trying to soft-soap the whole deal and say, "Well, we will accept a \$6 billion program." No matter how you slice it and twist it and turn it, it will turn out to be a \$6 billion program, because I notice under the amendment we still have a 40-year program here.

We bind and obligate the U.S. Government for 40 years. Multiplication of 40 times \$150 million comes to \$6 billion.

The Housing Administrator has said time and time again that he is not concerned merely with the opening of new housing avenues to families eligible for public housing, but what he wants to do is to experiment with a larger group of our population so as to keep open his opportunities—I repeat that—so that he can keep open his opportunities for so-called economic integration.

Anyone who thinks this amendment has any substance as a safeguard of the income ceiling has another look coming. The rent subsidy proposal, as offered by this proposed amendment, would still leave section 101 wide open for abuse, and there will be plenty of abuses. If this amendment is adopted, it would still qualify for rent subsidies many families of unduly high- and middle-income levels. Low-income families could still be placed in semiluxury housing and subsidies could still be used to pay 99 percent of the family rent. There is still no limit as to the amount of the rent subsidy a family can receive. This is one of the main objections I have to this rent subsidy program.

Equally important under this proposed amendment is the definition of "income." Let us make no mistake about it. The definition of "income" is still left to the discretion of the Housing Administrator. If you look at the bill, this amendment is just like a rent subsidy program. It is a trap for the unwary. It does not and it will not do what the proponents would like you to think it will do. It is simply designed to trick the Members of this House who have expressed some misgivings about this program and who have expressed some deep concern about this type of program into thinking all or most of the loopholes in section 101 are being plugged. Let us not be confused and let us not be misled. No loopholes are being plugged. The Housing Administrator wants every loophole, every loophole he can get. That is how he gets to experiment. The whole reason for this program is so that he can experiment. I repeat, the whole reason behind section 101 is so that the Housing Administrator can experiment with American residential patterns.

This is a sucker bait amendment. It will not remove the serious objections to this program. It still leaves the amount of rent subsidy without any limitation. I might point out in my attempt to have a discussion of this particular point with the gentleman from New York, who is not a member of the Subcommittee on Housing, I wanted to point out that in subcommittee I offered an amendment to limit the amount of the subsidy and I got nowhere with it. So I say it will not remove the serious objection to it. It still leaves the amount of rent subsidy without limitation and it still leaves the determination of the income ceiling, notwithstanding this amendment that has been offered, to the Administrator. It still remains a 40-year program. So instead of having a 40-year program at \$8 billion, it will be a 40-year program at \$6

billion. And let us make no mistake about it. We are binding ourselves in this Congress and in the Congress to follow and in the next Congress up until the 21st century on this program.

I urge those of you who have serious doubts about this rent subsidy program to stick to your guns. Do not be influenced, do not be pressured, and oppose this do nothing, red herring amendment that has been offered at this time.

Mr. ALBERT. Mr. Chairman, I rise in support of this amendment which would rewrite the rent supplement provisions of the bill to meet a number of objections which were heard in the arguments on yesterday and the day before. Before proceeding, I cannot pass up the opportunity to congratulate my distinguished colleague who has just addressed the House. He is an able legislator. He has stated that he has just received a copy of this amendment a few minutes ago, and, yet he has come up with one of the best prepared speech in speaking against it that I have heard in a long time.

I was in hopes that our distinguished friend, after this amendment was offered, would support it, and that he would not support a motion to recommit which would undertake to strike this very important section from the bill. The most important part of the amendment would change the income formula in the reported bill and set the ceiling at whatever level is established in the community for public housing.

This provision cuts through all the uncertainty raised by the new formula proposed for this program. It makes it abundantly clear that only the lowest income families would benefit from the rent supplement program. This has been our intention and this amendment should still any lingering doubts about this fact.

This program, Mr. Chairman, enables private enterprise and private capital to work with the Government, really to come to grips with the problem of providing decent housing for low-income families in the cities and towns of this country. We all know that the low-rent public housing program, while it has done a tremendous job, has not provided a sufficient number of units to house our low-income families.

Repeatedly during the debate we have heard that some 500,000 applications are now on file with various public housing authorities to try to obtain apartments or quarters or units in public housing projects. No one has suggested that these applicants are not just as qualified, are not just as much in need as those who already occupy such units. Nor has anyone suggested that this Congress would provide the necessary funds to implement the public housing program sufficiently to take care of these 500,000 applications.

The President's proposal for the new rent supplement program has the highest potential for a break-through in harnessing the energies of private enterprise to produce low-cost housing in large quantities. The critics of the new proposal have tried to imply that the public housing lobby is opposed to it.

This is not the case. It recognizes, as we recognize, that this new program will provide not a substitute for public housing; it will supplement public housing instead.

Mr. Chairman, as I listened to the debate over the last few days there was one aspect that I felt was not given specific emphasis. This came to my mind when I heard almost incredulously the words "socialistic" and "foreign to American concepts."

Mr. Chairman, everyone who has been here as long as I have knows that these terms have been used with respect to public housing, social security and other progressive legislation which we have undertaken to pass for the benefit of the people of our country, particularly the poor people of our country.

Mr. Chairman, I want to remind my colleagues on both sides of the aisle that this rent supplement proposal has been called the most crucial new instrument in our fight to provide better housing by the President of the United States.

Mr. Chairman, I want to remind my colleagues in both sides of the aisle of that fact, that this is the most important factor. I hope sincerely that the changes which have been made will increase the support of the President's rent supplement program, because if we fail to enact it into law, the real victims will not be the President of the United States or his prestige. The real victims will be the several hundred thousand families of lowest incomes who are the elderly, the handicapped, the displaced by Government activities, and those who are living in slums.

Mr. HARVEY of Michigan. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

(Mr. HARVEY of Michigan asked and was given permission to revise and extend his remarks.)

(Mr. HARVEY of Michigan asked and was given permission to proceed for 5 additional minutes.)

Mr. HARVEY of Michigan. Mr. Chairman and Members of the House, I have been sitting here astounded to hear the very distinguished majority leader of this House of Representatives, the gentleman from Oklahoma [Mr. ALBERT] who has behind him such an illustrious career of which we on both sides of the aisle are tremendously proud, as we are of both the majority and minority leaders, to hear him stand up here and recommend this type of legislation.

Mr. Chairman, I serve as a member of the very Select Subcommittee on Housing of the Committee on Banking and Currency. I have been proud to do it. We have had days of laborious hearings on this matter.

Mr. Chairman, I know I do not have to tell anyone who serves on that subcommittee that housing legislation is just as complicated, if not more so, than any legislation to come before this body.

I do not have to tell them that in an authorization bill, whether it be for \$6 billion now as they have reduced it, or the original \$8 billion as it was yesterday, it is still one of the largest domestic authorization bills to come before this

House in many years; and, that is only the section pertaining to rent supplements.

Mr. Chairman, if we added the public housing costs and other estimates contained in the bill, the cost of this bill is now \$19 billion rather than \$21 billion.

Mr. Chairman, also I listened with considerable interest as the distinguished majority leader stood up here and expressed the fact that this was now a very low income bill.

I wonder if the Members of the Committee know what the public housing limit in the city of New York is?

How many in this body know what the housing limit in the city of New York is right now? We would call that low income. I have here a letter from Marie McGuire, Commissioner of the Public Housing Authority, in which she sets this matter up. She signs that letter. This has been signed by her.

I would point out to the distinguished majority leader that a person earning \$11,200 per year can now live in this supposedly low-income housing that we are now authorizing in the city of New York. If you do not believe me I hold up to you this letter, and I will submit it to anybody for examination. This is a statement of Marie McGuire, the Housing Commissioner, where she points out where the limit is \$8,800 per year at the present time, and of course with the permissible exemption—that is, income which is not included—could go up \$2,400 more, making a total of \$11,200 per year.

I submit to you that is not low-income housing, at least, not where I come from. What does this mean, this amendment of four pages? We have had only a few minutes to look over the amendment, but notwithstanding that we sat down and looked it over, and I quickly figured out what this means to public housing at the present time.

In the last 28 years, since 1937, in this country we have built a total of 580,000 units of completed public housing. If you reduce the original 500,000 by 25 percent in the same proportion you are reducing the amount of the authorization, it would provide for an additional 375,000 units under the rent supplement program in addition to 240,000 units under the public housing section.

So what are we doing? Over the next 4 years we are providing for public housing, 615,000 over the 4 years, or at the rate of 153,000 per year, which is 5 times as fast as we have provided public housing since 1961 when I came to the Congress. And we still cannot complete the public housing units we have authorized up to now.

So I would point out to the majority leader this does not make the least bit of sense to me. In addition to what this means to public housing, I would point out to my friends on the other side of the aisle, particularly the chairman of our distinguished Committee on Banking and Currency, who has so often been the champion of low interest rates, just what this amendment means in terms of interest rates as compared to public hous-

ing. Those of you even with the most scant knowledge realize we finance public housing today with 40-year bonds that carry an interest rate of 3½ percent. How are you going to finance these additional 375,000 units of rent supplement for the same low-rent income category?

You are going to finance them not with 3½-percent interest. You are going to finance them with a 40-year—and just coincidentally the same period of time the FHA mortgages bearing an interest rate of 5½ percent, together with an insurance premium of one-half of 1 percent, for the astounding rate of 5¾ percent—in contrast to 3½ percent.

You say, Oh, that does not matter. Uncle Sam has all the money in the world to burn. What difference does it make whether it is 5¾ percent or 3½ percent? Do you know what the difference is, my friends, in relation to the cost of a \$20,000 unit? I just stopped to figure out what it would cost in relation to a \$20,000 unit. It is a difference of \$32 per month in rent. You talk about rent supplements being for the low-income group. Don't kid me, my friends. I cannot believe that for 1 minute. You can see that this should properly be called a bankers' amendment. That is what this is—a contractors' windfall. That is what it is, to build not 100,000 units but to build 375,000 brand-new sparkling homes at 5¾ percent interest.

The majority members of the committee talk about private enterprise—with the rent guaranteed and no defaults possible. This is about as much private enterprise as the farm subsidy program. That is the kind of private enterprise that this is.

Now let us look for a moment at how this is going to work. My friends on the other side of the aisle are so disturbed about this reaching into the high-income categories, the way Mr. Weaver said, and apparently they have ignored Mr. Weaver's testimony itself. For Mr. Weaver has said:

This just will not work when you limit it to low-income groups.

I do not have the Pittsburgh quote here with me where he said that you would have to have a heart of gold and a head of lead to be a businessman and support this rent-supplement program for low-income groups. But I have it here at my desk if any of you care to examine it.

Then I would refer you to, I believe it is page 183 of our testimony where Mr. Weaver just said, "This just will not work"—in so many words for the low-income, low-rent public housing units. That is all there is to it.

Now my friend, the gentleman from Georgia, brings out a 6-page amendment which we are supposed to consider here in just a few minutes and he brags about the fact that it solves the problem of confusion and that for once we have defined the words "legal entity" and what a legal entity is. Because now we know, of course, what a nonprofit corporation is and we know what a legal entity is.

This sort of astounds me, too, because the chairman of our committee, you know, has been a real crusader against the tax exempt foundations. Well, I would refer you, if you will kindly look at title II, section 202(d) where they happen to define the word "corporation." Now what do you suppose that this nasty word "corporation" includes? Why it includes tax exempt foundations. Can you believe the chairman of our committee would have this committee come in with an amendment that is going to approve rent supplement buildings—375,000 of them at 5¾-percent interest being built by these evil, tax exempt corporations and tax exempt foundations?

Look at section 202—look at section 202—that is what the law says. This amendment is a sham. It is a sham because those on this side of the aisle handling this argument knew that there were fallacies in their argument and they knew that it could not work. They knew that it could not take the place of public housing because they listened to their own people.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. ALBERT. Mr. Chairman, I ask unanimous consent that the gentleman from Michigan may proceed for 5 additional minutes.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. HARVEY of Michigan. I am delighted at the fairmindedness of the distinguished majority leader.

Mr. MULTER. Mr. Chairman, will the gentleman now yield for some questions?

Mr. HARVEY of Michigan. I am happy to yield to the gentleman, yes.

Mr. MULTER. Will the gentleman tell us what limitations you would put into this amendment so that it will cover the low-income groups that you believe should be covered by this bill?

Mr. HARVEY of Michigan. I thought I made that clear to the gentleman from New York when I stood up on Monday, which seems like an awfully long time ago now. I explained my attitude toward public housing then. I said that as a former mayor—I am controlling the time now.

Mr. MULTER. I know you are.

Mr. HARVEY of Michigan. I am going to tell the gentleman this, so that he will remember it. He would not give me an opportunity yesterday.

Mr. MULTER. I gave you every opportunity.

Mr. HARVEY of Michigan. I decline to yield further, until I answer the gentleman's question.

I want to tell the gentleman that I have a high regard for public housing. I intend to support this bill if, as I hope will be the case, this section on rent supplements, including this amendment, is eliminated.

I would tell the gentleman quite frankly, I do not believe in the rent-supplement program. I do not believe it is a good deal for America. I believe it is a good deal for the big bankers, with whom the gentleman is very familiar. I

believe it is a good deal for the savings and loan institutions. I believe it is a good deal for the big builders.

I believe that we are talking about big contractors and big landlords. When we are considering up to 375,000 new apartments being built by big builders, we are not talking about the little man. When we are considering increasing rent \$32 a month, we are not talking about the little man.

Do not try to kid those of us on this side of the aisle. This is a big bankers' bill. That is what it is. It is a big contractors' bill.

If you did not believe that—if you were truly sincere in wanting to experiment with this program—then I suggest to the gentleman, why not try to use section 103? Section 103 pertains to existing housing.

Mr. MULTER. I thought we were talking about section 101.

Mr. HARVEY of Michigan. We are.

Mr. MULTER. I respect the gentleman's opinion, when he says, "I am opposed to section 101," but he should not come to this floor and tell us that section 101 can be improved, or lacks this, that or the other thing, when he does not intend to support it no matter how good we make it.

Mr. STEPHENS. Mr. Chairman, will the gentleman yield?

Mr. HARVEY of Michigan. I am happy to yield to the gentleman from Georgia.

Mr. STEPHENS. I should like to get a better definition than I seem to have of "private enterprise."

Mr. HARVEY of Michigan. I would agree with the gentleman that this is the furthest thing from private enterprise he could get into.

Mr. STEPHENS. At home the bankers and contractors and real estate people are all in private enterprise. If it is to benefit them only, then certainly we would be benefiting private enterprise. I have no objection to benefiting private enterprise while we are also benefiting the poor.

Mr. HARVEY of Michigan. Will the gentleman answer a question? Does the gentleman believe it is private enterprise when we guarantee that the landlord will receive his rent over a 40-year period? Is it private enterprise to guarantee against the possibility of default?

That is not the private enterprise of which I know. That is an outright subsidy.

I think this is a pretty good "risk."

That is why Ira Robbins, whose testimony is shown on page 425 of the hearings, told the committee this just would not work. He said that this program of rent supplements would be much more expensive than the program of public housing ever could be.

Look, my friends—I have lived with public housing as a mayor. I am for it. I support it. I think that is a good program. I do not think this rent supplement is.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. HARVEY of Michigan. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. I thank the gentleman for yielding.

Very adroitly here today, yesterday, and the day before, the gentleman has been demonstrating his outstanding ability for muddying the waters.

Mr. HARVEY of Michigan. Well, now, I decline to yield right now.

If the gentleman contends that I am muddying up the waters, I submit to the House: Who is it who comes in with a six-page amendment in the final and closing hours, after the subcommittee sat for weeks hearing testimony? Who is it that is coming in with a clarifying amendment for corporations, which puts in tax exempt foundations, if you can imagine that? Who is muddying the waters?

I submit to the gentleman, it is not this side of the aisle.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. HARVEY of Michigan. I am glad to yield to the gentleman from Pennsylvania.

Mr. BARRETT. The gentleman said he was interested in public housing. The gentleman said he wants to help people get decent, safe, and sanitary housing. I agree with him on that score.

Let me point out who gets the benefit of these public housing subsidies. Let me point out a mother and one child in New York, who get \$149.50—and this is called the basic standard. Please do not muddy the waters on this.

Mr. HARVEY of Michigan. Mr. Chairman, I decline to yield at this point to my friend, because he is making a real case for poverty here, which I hope the President's program is going to take care of.

I decline to yield. I will tell my friend that is why we have public housing in New York. It is precisely why we have an income level of \$11,200 where a person is still eligible for public housing in New York.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

Mr. PATMAN. Mr. Chairman, I rise in support of the amendment.

(Mr. PATMAN asked and was given permission to revise and extend his remarks.)

Mr. PATMAN. Mr. Chairman, every time we bring a bill to the floor of the House providing for public housing arguments are made by those who are really against any kind of housing, for the poor that we should have another kind—we should have an alternative—we should have a private enterprise system to help the poor. We have before use a bill to help the poor.

The distinguished gentleman from Michigan says that he favors public housing over rent supplements because of the interest rate factor. Well, he is all wrong about that. That argument is not sound. If you use a 3¼-percent rate in public housing, to the average investor that is an income of about 7 percent. Yet here he is fighting 5¾ percent, saying it is too high, too high. He wants a 3¼-percent rate. A 3¼-percent rate. The 3¼-percent rate is a tax-exempt rate and, therefore, it is the equivalent to the average investor of a return of some 7 percent. So his argument is very illogical.

Mr. Chairman, I rise to speak in favor of the Stephens amendment—the rent supplement program.

Mr. Chairman, the rent supplement program is the key provision of this bill. No other provision of the bill offers as much to the poor people of this country who cannot afford decent housing.

President Johnson has said this program for rent supplements "in the long run may prove the most effective instrument of our new housing policy." It is a program of enormous importance. It constitutes a major breakthrough toward the national goal established many years ago—a decent home in a suitable environment for all Americans.

In public hearings, the rent supplement program was thoroughly examined by the Housing Subcommittee of the Banking and Currency Committee, and again by the full committee. Over the last 30 years and longer that I have been a Member of this body, no major new housing program considered by the Congress, has received wider and more enthusiastic support than this program.

The homebuilding industry supports the rent supplement program. Labor supports this proposal. The spokesmen for the members of the financial community who invest the Nation's savings in homebuilding support this proposal. Those who work with and know the needs of the elderly support this proposal, as do those who work with and understand the great need for additional housing among the poor.

The hearings and the general debate here on the bill have established the great need for additional housing for our low-income families. I believe that the great strength of the rent supplement program is that it will enable the American private enterprise system to meet this need.

The rent supplement program is a private enterprise program. The housing constructed under the program will be privately owned, privately constructed, privately financed, and privately operated.

Mr. Chairman, the hearings and the debate have shown that the rent supplement program can, over the next 4 years, enable American private enterprise to provide 500,000 units—units of modest design, geared to the needs of low-income families, and available to these families.

The poor people in this country living in slums need this housing. The entire country will benefit from the jobs that the construction of these units will create.

Mr. Chairman, I have followed the debate and I have heard the arguments made against the rent supplement program. I do not understand why the opponents of this bill have chosen to single out this proposal as the focal point of their attack on the bill and certainly they should support the Stephens amendment. The poor people in this country living in slum housing are the ones who would gain most from the rent supplement program, and the program is fully, completely, and exclusively a private enterprise program.

I am amazed at the bitterness and the inconsistency of some of the arguments

made against this program. In one breath we are told that it will provide rent supplements for upper-middle-income families, and in the next breath that the program will put public housing out of business.

In one breath we are told that the program is "foreign to American concepts" and "the way of the socialistic state" and in the next breath we are told that the program is a "sell out" to the builders. In one breath we are told that the program will permit people with substantial assets to have rent supplements paid on their behalf, and in the next breath we hear objection that the program will establish a means test for determining whether or not one needs rent supplements.

Mr. Chairman, I believe that the debate here today has convincingly refuted the arguments of the opponents of the rent supplement program. It has been established:

First. That the program will provide modest—not luxury housing.

Second. That it will authorize rent supplements only for those in the lowest income groups.

Third. That the rent supplement payment will be keyed to the need of the family, with the amount of the payment being reduced as family income rises.

I urge my friends to vote for this amendment. A vote for this amendment is a vote for the President—for the committee which adopted this proposal with bipartisan support after long and extensive hearings—and it is a vote to assist the poor who need the housing that would be constructed under this program.

I hope all Members from both sides of the aisle will cast their votes in favor of assisting poor people to acquire decent and sanitary housing.

Mr. WIDNALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I came to the House today prepared to support the rent supplement program as originally offered in similar bills that were proposed by the gentleman from Texas, Congressman PATMAN, the gentleman from Pennsylvania, Congressman BARRETT, and myself. They are exactly alike. I was prepared to vote for that measure.

We are now being asked to consider something that is a very major change from the original rent supplement program. I think it is most unwise. This is the craziest way to legislate that I can think of when, on the floor of the House, after no opportunity for examination either by the minority or the majority Members, we are asked to substitute for the rent supplement proposal an entirely new section which changes many things as contrasted to the original rent supplement proposal.

Our distinguished chairman, the gentleman from Texas [Mr. PATMAN] cited the support of various organizations for the rent supplement proposal. I would like to ask my chairman; do all these organizations know about the Stephens amendment? Do they approve the Stephens amendment? Because that is what we are legislating on today and not the original rent supplement proposal.

Mr. PATMAN. All I can say is that they will not disapprove it.

Mr. WIDNALL. I just want to call the attention of the chairman to this.

Mr. Chairman, if they have had the same kind of notice that we have had, they have not the faintest idea what will be going into the bill today and you certainly cannot take as approval what their testimony might have been at the time the subcommittee had hearings.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman from Texas.

Mr. PATMAN. There are only five changes. Read this entire amendment and go back and notice the ones which I have checked with red. There are only five small changes. It would not take the gentleman from New Jersey long to acquaint himself with them. They represent the only changes in it.

Mr. WIDNALL. Mr. Chairman, I have now had the opportunity to read through it, thanks to the fact that we have been in session long enough so that I have had that opportunity.

Mr. Chairman, I have noted that this amendment is being offered to the House with the representation that it is the same as the Muskie amendment in the Senate bill. There are some very substantial differences between the two. If the Members on the majority side of the aisle are being told that they are voting for the Muskie amendment, that is not a fact. There are substantial differences. If this amendment is adopted, of course we would go to conference with what is in the Muskie amendment, which substantially changes a great deal of the rent supplement proposal, as would this amendment, but in a different direction.

Mr. Chairman, I have always been very proud of being a Member of the House of Representatives. For 16 years the people of my district have been pretty good to me in affording me the opportunity to be here in Congress to represent them and to try to do what I felt was best for the Nation's welfare, as well as my own congressional district.

However, Mr. Chairman, I do not believe they sent me down here to legislate on major proposals on the floor of the House with no examination—no true examination—as to what is contained in a major substitute proposal.

Mr. Chairman, this will, as has been pointed out already by the gentleman from Michigan [Mr. HARVEY], set as a ceiling \$11,200 income, a far cry—a very far cry—from trying to take care of those who are now ill-housed, low-income people, as originally we were told this legislation would attempt to do.

Mr. Chairman, I urge the Members of this House to defeat this amendment if for no other reason than that you cannot properly consider an amendment of this nature without even having an opportunity to examine the same and relate it to other programs.

Mr. Chairman, I venture to say without fear of contradiction that there are very few on the majority side of the House who have had an opportunity to look at this amendment.

Mr. Chairman, I concur completely in

what the gentleman from Georgia [Mr. STEPHENS] has said with reference to both of us being rather ignorant about what is contained in the amendment. There certainly has been no opportunity for the majority members of the subcommittee to look this over, to have a meeting to decide what was best.

Mr. Chairman, I hope this does not mean that this just represents a confession of failure as far as the majority is concerned as to their own rent supplement proposal to which I agreed and offered my support and have been supporting and would have voted for if given the opportunity.

Mr. ASHLEY. Mr. Chairman, I move to strike the requisite number of words.

(Mr. ASHLEY asked and was given permission to revise and extend his remarks.)

Mr. ASHLEY. Mr. Chairman, there are today in the United States some 6 million families living in substandard housing because they have incomes that are not sufficient to allow them to live in decent standard housing supplied by the private market.

Now, Mr. Chairman, the position of the opponents of this bill becomes clear that these 6 million families must continue to live in slums and in substandard housing until such time as they can get into public housing. That is the position that they have taken, and let there be no question about it.

We have a whole range of programs that have been passed upon by Congress to achieve a national goal of decent, safe and sanitary housing for all American families. The fact is, however, that the vast majority of these programs are designed exclusively for the well-to-do, for those people who can afford housing at the going rates on the private market. There is only one program of all of the programs that we have adopted which is designed to meet the needs of the poor and distressed families that do not have income sufficient to participate in the private market. That is the public housing program.

It is too bad, Mr. Chairman, but the fact is that the public housing program has not met the need. We all recognize that. The fact is, too, there is no chance, no possibility, that the public housing program will meet the needs that face this country today or in days ahead, and I say that they cannot be expected to meet these needs, because there is today a backlog of 500,000 applicants for public housing. These 500,000 families today are living in slums, waiting for decent housing they can afford or for a vacancy in one of the 580,000 public housing units built since inception of the program in 1937.

Are we kidding ourselves that public housing can do the job? I say, Mr. Chairman, let us be honest. If we have any intention of upgrading the environment of these families we have no alternative but to explore new ideas and new programs. That is what we are doing today.

I might say to those on the Republican side who have attacked the rent supplement so vigorously that while I respect their honest difference of opin-

ion I do regret their criticism has been so destructive and not in any sense constructive. We have heard the gentleman from New York [Mr. FINO] assert that the program offers no inducement to private sponsors. We have heard from the gentleman from Illinois [Mr. MICHEL] that it will result in the biggest building bonanza of modern times. The truth of the matter is it will attract public-spirited sponsors just as the 221(d) (3) program has attracted private funds. There will be no bonanza because the bill specifically provides the sponsors can only be nonprofit, limited dividend or cooperative groups.

Mr. Chairman, the time has come to decide whether private enterprise is going to be allowed to assist in supplying low-cost housing for the millions of American families whose incomes do not enable them to obtain decent shelter on the private market.

For many years, Mr. Chairman, public housing has been attacked as a Federal intrusion into private enterprise. Now we find these same people, the very same individuals who have made this charge in the past, asserting that the rent supplement program is contrary to the American way of doing things; that it is foreign oriented, and so forth. I submit that they are wrong on both counts.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(Mr. ASHLEY asked and was given permission to proceed for 2 additional minutes.)

Mr. ASHLEY. Mr. Chairman, nothing could really be more clear than that an enormous need exists and that that need must be met by the combined efforts of public housing and the private market. In the final analysis the vote today on section 101 will be an accurate measure of the extent to which this Congress cares about the physical environment of the 5 to 6 million American families who need this help so badly. No one voting against this program can say that public housing is doing the job. We know better than that. If we vote against this program it is simply because we are not willing to provide the new tools that are necessary.

I say we must, as a matter of conscience, make a commitment and that commitment must be to the 5 to 6 million American families who today need our help.

Mr. FINO. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman.

Mr. FINO. I agree with the gentleman from Ohio that the poor, needy families with low incomes are deserving of and need adequate and decent houses. But you know, I know, and the Housing Administrator knows that under section 101 you cannot build low-cost housing. That is the point I want to make.

Mr. ASHLEY. I will only say this to the gentleman with respect to that point. The gentleman should retire to the cloakroom with the gentleman from Illinois [Mr. MICHEL]. He says this will result in the biggest building bonanza of

all time. I think both gentlemen are wrong. I say that under this program there will be no building bonanza for the very reason that it is limited to sponsors that are nonprofit, limited dividend or cooperative groups.

Mr. FINO. The gentleman knows that in addition to public housing, which is trying to do a job although it is not doing it fully and not completely—

Mr. ASHLEY. The gentleman will agree that public housing has not done the job and cannot be expected to do the whole job. Will the gentleman not admit that?

Mr. FINO. I say that public housing has made a very good attempt to solve this problem.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BROCK. Mr. Chairman, I move to strike out the last word and rise in opposition to the amendment.

(Mr. BROCK asked and was given permission to revise and extend his remarks.)

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman.

Mr. HARVEY of Michigan. The gentleman from Ohio has just pointed out in theory what this program is going to do for the lower income groups in America. I would just call his attention to what Dr. Weaver, the head of the Home and Housing Finance Agency had to say to the Senate subcommittee about this precise subject and how this program would work for the low-rental program and I quote this one sentence:

You are not going to get the limited dividend companies building and adequately managing houses in the low-income segment.

Mr. BROCK. I thank the gentleman.

Mr. Chairman, I want to compliment the gentleman from Michigan for the presentation he has made on the floor of this House. It represents one of the finer efforts I have seen, and it is something that I would be proud to associate myself with.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. BROCK. I yield to the gentleman.

Mr. BARRETT. I want to call the attention of the House to the fact that public housing has now been in existence for 3 decades and ever the last 30 years 718,000 units have been built. We now have, after 30 years, 500,000 families waiting to get into public housing. New York has 100,000 people waiting to be admitted to public housing.

The State of the gentleman now in the well has 10,800 families waiting to get into public housing.

Mr. FINO. Mr. Chairman, will the gentleman yield for a question?

Mr. BROCK. I yield to the gentleman from New York.

Mr. FINO. I should like to ask the gentleman from Pennsylvania a question.

The gentleman from Pennsylvania expressed great concern about low-cost housing, housing for needy people, and so forth and so on. There is a committee print, which the gentleman took full

credit for, in which he accused the minority of having made misleading and false statements. On page 6 of the committee print, which is attributed to the gentleman from Pennsylvania, it is stated:

The type of construction that would be permitted under the rent-supplement program would be restricted to that which is appropriate for a moderate income family.

It does not say "low," but it says "moderate-income family."

Mr. BROCK. Mr. Chairman, let me bring the issue back to the amendment itself, if I may, for a moment.

The argument was made by the gentleman from Georgia that his amendment is designed to resolve the objections those of us who are opposed to section 101 have made.

Let us take the objections we have had point by point.

The first objection is that the income limit is far beyond what is necessary to solve the housing problem for low-income people. Under this amendment, regardless of what the gentleman said, the limit is still \$10,500 for a family. A family can have an income up to \$10,500 per year and still receive a subsidy under the Housing Act as amended. That is \$4,000 per year more than the median average income for the average American family. The amendment offers no change from the bill as proposed.

The second objection we had was the fact that there was virtually no limit on construction costs. This amendment does not pertain to construction costs. This amendment offers no change from the bill as proposed.

The third objection we had is that we feel the House is being asked to abdicate its responsibility and to let the Administrator virtually write the total law.

The bill, on lines 3 and 4 of page 4, defines income solely as "income as determined by the Administrator pursuant to procedures and regulations established by him."

There is no change in that. The Administrator still will have total authority to make his own law. Thus the amendment offers no change from the bill as proposed.

This is not just a dollars and cents bill. We do not care whether you cut this program from \$50 million to \$30 million or \$20 million or \$10 million. There is a principle involved. I do not appreciate being thrown a bone from the administration's table in an effort to purchase my vote, when I disagree totally with the principle involved.

I believe we have an obligation to vote down this amendment just as we must strike the entire rent supplement section.

Mr. MULTER. Mr. Chairman, I move to strike the requisite number of words.

(Mr. MULTER asked and was given permission to revise and extend his remarks.)

Mr. MULTER. Mr. Chairman, I want to address my remarks now to the country club set who, for the first time in the history of public housing, have joined with the advocates of public housing.

I remember, some 15 years ago, when we were considering a public housing

provision of a bill, I offered to supply them with crying towels when they were crying so bitterly for the poor, whom they would not help except by their empty words. I am glad to see that today they are not only crying but trying to help the poor and the distressed who need help. But again they will only go part of the way. Now they say give them public housing but nothing to keep them out of it by supplying a good alternative. Let us see who is supporting this big banker, big business bill. Yes, the builders are supporting it. The homebuilders are advocating it.

The bankers are advocating it, but I also have a few telegrams in my hand from nonbankers and nonbuilders. One is from Rabbi Soloff, secretary of the East Midtown Conservation & Development Corp. Another is from Althea Gould, president of the Presbyterian Senior Services of New York City. The third is from Msgr. Harry J. Byrne, office of housing and urban renewal, archdiocese of New York. These clergymen are genuinely interested in helping to solve this problem and in doing something for these people who need some help and who cannot help themselves.

I asked that the distinguished gentleman from Michigan [Mr. HARVEY] send to our committee table the paper that he waved at us and did not offer to put in the RECORD with his figures. He did not do so. But if you will look at the printed record, you will find table after table showing the very little income that is the maximum that is earned by the people who will be served by this program when we enact it. They are the elderly, the physically handicapped, those living in substandard housing, and those who are displaced from the slums as we clear them. You will find that the maximum income of these poor people, who will be the only ones who can get into this program, providing that they meet all of the other criteria set up in the bill—the maximum income of these people, these families, is \$2,500 to \$3,000 a year, depending on the area they live in.

If you look at the printed record of the hearings and the CONGRESSIONAL RECORD both of which already contain the tables, you will find the figures and you will find also a table of the 20 largest cities in the country in which we give the maximum income of a family that may be admitted or that can qualify for public housing. The lowest amount is in Houston, Tex. The maximum there is \$2,720. The largest of these 20 largest cities of the country is New York City. The largest family income—not individual income but family income, and that means everybody working in the family—for admission to public housing in New York City is \$5,760. It is true that after they move in, this family that had \$5,760 of annual income for all of the earners of the family, may have an increase in their income. If the income increases too much, they must get out, but in the meantime, while living there, they must pay an increased rent based on their increased earnings.

Mr. COHELAN. Mr. Chairman, will the gentleman yield?

Mr. MULTER. I yield to the gentleman.

Mr. COHELAN. And elaborate on the point about the \$10,500.

Mr. MULTER. I cannot elaborate on a figure that has not been submitted to me.

Mr. COHELAN. Where did the figure come from?

Mr. MULTER. He said he got it from somebody in the city of New York, and probably he did.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MULTER. I will extend the same courtesy to the gentleman that he extended to me. When you raised that point I wanted to ask you some questions about it. You refused to yield for that purpose. Now you get your own time to answer it.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. MULTER. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. I want to call the attention of the House to the figures, which I tried to do on the time of the gentleman from Michigan. Here is a mother and one child who gets \$149.50 as a basic standard. They get \$60 rent added to it, which brings it to a total of \$209.50. A mother and three children in New York gets \$249.50. Their rent is \$80, and it brings it up to a total of \$329.50. Here is a father and mother and two children in New York. For their basic standard they get \$242.90 and get \$80 for their rent, which brings it up to \$322.90. This is what we are trying to do, to put these 5 million people into decent, safe, and sanitary housing. I do not think there is any other approach that is going to accomplish this than the program we have established in section 101.

This is a sensible way to approach this problem. All this talk is merely a method to muddy the waters.

Mr. MULTER. I am very proud that in the largest and wealthiest city in the country we are trying to do something for our poor and our less fortunate. I beg my colleagues to do as much for theirs.

Mr. GURNEY. Mr. Chairman, I rise in opposition to the amendment.

(Mr. GURNEY asked and was given permission to revise and extend his remarks.)

Mr. GURNEY. Mr. Chairman, I had not intended to talk on this bill because I am not a housing expert. Certainly the debate that has been had on this bill in the last 2 days and today, is some of the best debate we have had in the House this year on both sides of the aisle.

We have heard a good deal about what this is going to do for low-income families and medium-income families and whether it is going to build a lot of units or whether it is not going to build many units. But the reason I am taking the well is this alone; what the issue before this House is, on section 101, as I see it. To many of my colleagues in the House and also to a whole lot of people back home, at least where I come from, and I think where all of us come from, the issue looks like this.

The majority call it a rent-supplement bill. That is the issue they argue. They

also say that the reason for section 101 is to provide more housing.

I spent all last weekend back home and I talked to a lot of people. I did not go back home to talk about politics actually. These were nonpolitical gatherings. But do you know what was on every person's tongue in asking what was going on in Congress? "What in the world are you people doing up there with this screwy rent-supplement idea?"

I will say to the distinguished majority leader that they used the word socialism. That is exactly what they used. I am not saying that is what it is, although after the majority leader finished saying it was not, I did go over to the dictionary and I looked at the definition of the word, and here is one of them:

To distribute income and social opportunity more equitably than they are believed to be distributed now.

That is one of the definitions of socialism. I do not call the rent supplement that, but I will say to you, Mr. Majority Leader, that this is exactly what the people back home are calling it.

I would like to say two other things. Two points that they are talking about are these. One, that this is going to destroy homeownership and the initiative to build a home. This is also the issue as I see it. I wish all of the Members of the House could have heard the presentation made on the floor of the House yesterday by the gentlewoman from Ohio, because this was the point she made, and a very telling point and an able presentation. And this is precisely what the people back home are thinking we are up to doing.

The other thing they say is this—and this is also the issue to me. That is, that it is going to destroy a good deal of initiative. On the majority side they say, Sure, it is private enterprise, and so it is as far as the building of the houses is concerned and the rental of the houses. But as far as the incentive of the people who get the rent supplement, it strikes at the very heart of their incentive and it strikes at the very heart of what makes this Nation tick. The desire to get ahead, to better oneself, to do for oneself, all these terribly important motives are being struck down by their fantastic rent supplement idea. That is what the people back home are thinking about, and that is why they ask, "What in the world are you people doing in Congress?"

I should hope this section 101 will be rejected out of hand, the way it ought to be.

Mr. BOGGS. Mr. Chairman, I move to strike the requisite number of words.

(Mr. BOGGS asked and was given permission to revise and extend his remarks.)

Mr. BOGGS. Mr. Chairman and Members of the Committee, I rise in support of the Stephens amendment.

Mr. Chairman and Members of the Committee, some years ago I had the great privilege of serving on the Committee on Banking and Currency of the House of Representatives. As I look about this Chamber I see that there are not too many Members here who were on

the committee when I served on it. As a matter of fact, on the minority side I do not believe there are any.

Mr. Chairman, one of the great debates that we had on that committee when I served there involved the subject of housing. We had concluded World War II and all over our Nation we had suspended the building of all kinds of housing, private housing and rental housing. We had practically no public housing program.

Mr. Chairman, the late great Senator from Ohio, Senator Taft, sponsored along with the late Senator from New York, Mr. Wagner, and the present senior Senator from my own State, Senator ELLENDER, what was called the Taft-Ellender-Wagner bill. As a matter of fact its name varied as to who happened to be in charge of the Congress. At one time it was the Taft-Ellender-Wagner bill, but when the Democrats came back in, it was the Wagner-Ellender-Taft bill.

In the 80th Congress, which was Republican, and to which my distinguished friend, the gentleman from Indiana gave very great leadership, the former distinguished Member from Michigan, Mr. Walcott, was chairman of the Committee on Banking and Currency. The Democrats on that committee attempted to report out the Taft-Ellender-Wagner bill, but we were not able to do so. At one point we had a one-vote majority because a former Member of this body from the great city of Philadelphia—incidentally named Scott, but not the present Senator SCOTT—shifted his vote because the then Republican mayor of Philadelphia called this Member and told him that he was very much interested in that bill.

Mr. Chairman, the reason we could not report that bill was because of the public housing provisions contained in the bill. My good friends on the Republican side said that this was pure socialism and said that despite the fact that the senior Senator from Ohio, who as everybody knows had what one might call a liberal record on housing and education and health matters and many other matters, but despite his support of that measure we were unable to report that bill in that Congress. We did pass a housing bill but it did not include any phase of public housing.

We came back in the 81st Congress with the Democrats back in control and we passed that bill. As a matter of fact, the Taft-Ellender-Wagner bill, if my memory is correct, was H.R. 1. That year it had the title of "H.R. 1." It was hailed as a historic housing bill. It is still the basic housing legislation in this country.

But, Mr. Chairman, even then our Republican colleagues opposed, by and large, with some exceptions, of course, the public housing provisions of the bill and they said it was "socialism."

Today we hear from our Republican friends in connection with the new provisions of the bill that what we are doing is some radical departure from public housing. It is in that it moves to private enterprise.

I have great respect and great admiration for my Republican colleagues, but by and large—and I direct my remarks

principally to my fellow Democrats—they have opposed these programs. They opposed in 1935, by and large, the social security program. Today most Members of this body support the program, although every time we make an innovation in it they say the same thing. Medicare is one example, education is another example, and there are countless others.

This week here in Washington there was a meeting of the Republican National Committee, in which the distinguished gentleman from Ohio, chairman of the Republican National Committee, made the point that the Republican Party had to broaden its base, it had to have appeal to people all over the United States. Maybe he is right, maybe he is wrong.

But the point is, as I see it, the Democratic Party has been the party that has been willing to look at problems and seek a solution.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. BOGGS. Mr. Chairman, I ask unanimous consent to proceed for 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BOGGS. Mr. Chairman, as I see it, what we are trying to do here is to follow in the traditions of the Democratic Party. I would ask my fellow Democrats not to be deceived by the arguments, sincere though they may be, coming from the Republican side of the aisle, because they are arguments that have been heard ever since there has been a division in this aisle, ever since there has been a division between these two parties.

I hope when the vote comes on this amendment the Democratic Party, the traditional party of progress and growth will be for this program and not against it.

Mr. DEL CLAWSON. Mr. Chairman, I rise in opposition to the pending amendment.

(Mr. DEL CLAWSON asked and was given permission to revise and extend his remarks.)

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. DEL CLAWSON. I yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. I thank the gentleman. We have just heard the very distinguished majority whip on the subject of the Ellender-Wagner-Taft proposal. Of course, there are many Members of this House who did not have the opportunity of serving at that time. Being one of those, I sent to the Library of Congress. I was curious as to what one whom I admired had to say about this particular program.

I would like to call to the attention of the House and to the gentleman from California a remark and conditions that the late and distinguished Senator from Ohio said as he proposed this particular bill, and then you can draw your own conclusions as to what he would think today about the rent supplement program.

This is what he said and I quote:

If we adopt this theory—

And there he was referring to the Government's responsibility in the field of public housing—with which I totally agree—he said:

If we adopt this theory and wish to avoid a complete centralization of authority in Washington, there must be certain, definite limitations.

Then he went on to list those—one, two, and three and he came to No. 2 and said—this was his second limitation, I would point to my friend, the gentleman from Louisiana:

The man who is aided must not be better off than the man who earns his own way.

Then his fourth limitation was this:

The cost must not be so great as to bear too heavily on the other four-fifths who have to work harder to pay the bill.

I submit this to you as qualifications to those of you who advocate rent supplements in contrast to public housing.

Mr. Chairman, I thank the gentleman for yielding.

Mr. DEL CLAWSON. Mr. Chairman, we have heard a number of comments today about the difference of opinion as to the meaning of free enterprise. Some have questioned whether or not this section 101 is a free enterprise provision in the housing act.

Free enterprise to me implies a number of things besides just the building of housing units by men who are contractors and the financing by big bankers. It implies, I think, the risk that is involved when men are competing—business and corporations competing with each other. There is a financial risk and their risk of capital as well as the competition among contractors and businessmen is part of the free enterprise system. May I add this. We use the term private and free enterprise because freedom to me means the removal of some of the shackles that are binding our private enterprise system today and giving it increased freedom, rather than tying its existence to the patronage of the Federal Government.

In view of the statements that have been made, some factual statistics, I think, might be enlightening, particularly with reference to those families now in need of housing who are housed in slums or blighted areas and who need decent, safe, and sanitary housing. There has been used the statistic of 500,000 who are on the public housing waiting list for admission.

During the course of the hearings, the figure was used of 550,000 families who are waiting for this kind of housing.

Let us examine the statistics just for a moment and see what this bill and the existing program might do in connection with these waiting families. There is an average turnover in public housing, existing public housing today, of 125,000 units. These are on the public housing availability list as the turnover takes place because of normal vacancies or because of increased income limits making families ineligible to continue occupancy. To this can be added 240,000 units which the present bill authorizes and 170,000 units which the public housing administration has in its various stages of readiness today.

Now over a 4-year period covered by this bill, this means there would be available for use 410,000 new units—new units available to low-income families—under the public housing program. That is 410,000 new units. Added to these 410,000 new units provided in this bill, separate and apart from the rent supplement section, would be the 500,000 vacated units in public housing according to the statistics we have available to us. Surely, this total of 910,000 available units in the time allowed makes doubtful the pressing need for the 375,000 units that the amendment would provide in the rent supplement program so far as our public housing is concerned.

I see no reason for adding this kind of program to that which is already in existence and which would provide the housing if we move along without the dilatory practices that have caused the delay up to this point in the public housing program.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORHEAD. Mr. Chairman, I move to strike the requisite number of words.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I am delighted to yield to the chairman of the committee.

Mr. PATMAN. I should like to determine whether we can agree on a time limit. The gentleman from Pennsylvania [Mr. MOORHEAD] wishes to speak, in answer to the gentleman from California [Mr. DEL CLAWSON]. I understand there is a Member on the other side wishes to speak, and we have one other. That would require 15 minutes. How many other Members wish to speak?

Mr. GERALD R. FORD. Mr. Chairman, would the chairman of the Committee on Banking and Currency defer requesting any limitation on time for 5 or 10 minutes?

Mr. PATMAN. I shall be glad to.

(Mr. MOORHEAD asked and was given permission to revise and extend his remarks.)

Mr. MOORHEAD. Mr. Chairman, throughout the development of this legislation in the Housing Subcommittee there was an almost unanimous bipartisan support of 68 of the 69 sections of this legislation. This has been accomplished by a very healthy process of give and take and a mutual respect for the ideas of members of the opposite party.

Mr. Chairman, it is in that spirit the Stephens amendment was offered.

Under the bill as reported by the committee, the Administrator could have provided rent supplements to families with incomes above the level for qualifying for public housing, and fear was expressed that the Administrator would use his discretionary authority to assist those only in the level above public housing and completely disregard those in the public housing level of income.

Now, I do not believe he would have done so, but whether he would have or not, it is clear that if the Stephens amendment is adopted rent supplements will go exclusively to the lowest income levels, to those people who are eligible for public housing.

As the chairman of the full committee said, this amendment answers many of the objections made in the debate. It is in the spirit of the accord with and respect which we have for the Members across the aisle.

I believe that it answers the objection of the gentleman from Michigan [Mr. HARVEY] who said of section 101:

It is intended to benefit not the low-income group but the moderate income group.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I am glad to yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. I submit to the gentleman that I still have before me the statement of Mrs. McGuire, which shows that persons earning \$11,200 a year in New York will be eligible for this rent supplement program, at 5¾ percent interest. I still do not believe those to be low-income persons, at least not in Saginaw, Mich., where I come from.

Mr. MOORHEAD. I suggest to the gentleman, who supports public housing, that when we get to that section of the bill, if the gentleman has an amendment to offer to correct any abuses, I am sure we will be glad to entertain it.

That is where the amendment should be offered, rather than to section 101.

If I may, I will proceed.

The gentleman from New York [Mr. FINO] said in debate about the unamended section 101:

It does not aim at building low-income housing.

If the Stephens amendment is adopted, that is exactly what section 101 would do.

The gentleman from Tennessee [Mr. BROCK] said:

We are going to subsidize the middle-income group.

If the Stephens amendment is adopted, that is exactly what we will not do.

The gentleman from California [Mr. TALCOTT] said:

I do favor Federal assistance for families with low incomes.

If the Stephens amendment is adopted, that is exactly what section 101 will provide.

The major objections which have been made to section 101, in a spirit of give and take on this side of the aisle, have been met. I hope it will be successful and that we may have bipartisan support for section 101 and the Stephens amendment.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I am glad to yield to the distinguished majority leader.

Mr. ALBERT. Are we not tying the rent supplement to public housing? If the rent supplement in the bill is too high, then public housing, which the gentleman from Michigan is supporting, is too high, also?

Mr. MOORHEAD. Yes. That is where any amendment should be made. We have no other criterion with respect to income level in housing than the public housing level. That is why the public housing level was used in the Stephens amendment.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I am delighted to yield to my colleague on the Housing Subcommittee.

Mr. BROCK. The gentleman referred to section 101, and stated I had said it was written primarily for middle-income people. I should like for the gentleman to show me where the Stephens amendment would eliminate the subsidy for middle-income people.

Under his amendment the limit is still \$10,500 a year. I do not consider that to be low income and neither does anyone else.

Mr. MOORHEAD. I will say to the gentleman from Tennessee that 99 percent, if not more, of the people occupying public housing are at the lowest income level. If there are abuses under the public housing law, then we should amend it to correct those abuses, because we are using a standard here which is successful at least in 99 percent of the cases. If there is some unusual aberration or some quirk, then there is where we should amend the law. Let us not defeat this supplemental program, this good program which will supplement public housing which may, if it works very well, eliminate the need for some of the public housing. If there are flaws and abuses, let us amend the public housing law.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. GERALD R. FORD. Mr. Chairman, I move to strike out the requisite number of words.

(Mr. GERALD R. FORD asked and was given permission to revise and extend his remarks.)

Mr. GERALD R. FORD. Mr. Chairman, for the last hour or so we have heard many soothing observations and recommendations from the other side of the aisle trying to gloss over the fundamental weakness in the rent supplement program.

For example, my good friend, the gentleman from Pennsylvania [Mr. BARRETT], in his remarks, as I recall them, said that the substitute offered at this late date pours oil on troubled waters. Anyone who has had any experience with troubled waters at sea knows that the pouring of oil on the troubled water does not get to the basic root of the difficulty. It does not calm the storm which the ship faces. You do not dissolve the storm with surface oil. You do not eradicate the fundamental cancer by pouring oil on troubled waters.

The gentleman from Texas [Mr. PATMAN], in his very subtle and smooth way, said this substitute corrects many—and I underline “many”—of the abuses and many of the deficiencies. I think it is well to emphasize that by the careful words that he used he admitted it did not cure all of the deficiencies, far from it.

Again the gentleman from Pennsylvania, my friend [Mr. BARRETT], in his remarks emphasized that there were some changes from the original version of section 101 but that there was no basic abandonment of the fundamental concept with which many of us disagree.

Then my very close friend, the distinguished majority leader, as I recall his observation, said, "This proposed substitute rewrites the original version of section 101."

Well, ladies and gentlemen, there can be no rewriting of section 101 that eradicates the basic evil of the concept. The facts are that this substitute makes very minor adjustments. The facts are that the changes are minimal. The facts are that the intent, the purpose, of the original section 101 is included in the substitute. Make no mistake about that. Have no doubts about that.

Those who oppose section 101 in its original form were aiming at a \$8 billion contract. To substitute a \$6 billion contract does not make it a better deal. It is still a \$6 billion program that is basically unsound.

We who objected to the original section 101 had bona fide reservations about the long-term commitments that this Congress was making—40 years. The Congress today should not take that step. If we do we are obligating a great many Congresses in the years ahead that deserve better consideration from us. We will be freezing in those Congresses that succeed us. I do not think with an experimental program such as this that we ought to freeze the Treasury of the United States, our taxpayers, and subsequent Congresses to the extent of the next 40 years.

Let me make this crystal clear. This is a palliative that is being offered to us at this late date. To my friend, the gentleman from Pennsylvania [Mr. MOORHEAD], if this was a bona fide gesture to gain the support of the minority Members of this body as he alleged, I should have thought there would have been consultation by the proponents with those on the minority side. To my knowledge no such effort was made to consult anybody on the minority side.

So, in effect, this is an attempt to have the intents and purposes of the original section 101 rammed through this body.

I would like to point out what we think should be done on this occasion. I feel that all people who basically oppose section 101 in the first instance ought to oppose this minor modification. We ought to vote down the substitute categorically. And I can assure those who do this that later in this debate, for certain when we have the motion to recommit, there will be a clear-cut issue to strike section 101 from the bill. I assure everybody here that if we defeat this phony substitute, this palliative, there will be a clear-cut opportunity later to vote on the original section 101.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. GERALD R. FORD] has expired.

Mr. McCORMACK. Mr. Chairman, I ask unanimous consent that the gentleman from Michigan have permission to proceed for 5 additional minutes.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. GERALD R. FORD. I thank the distinguished Speaker.

I wish to repeat, if this substitute is defeated, as I hope it will be, then there will be an opportunity for us to vote

solely on whether or not the original section 101 with all its evils will be retained in the bill.

Let me conclude with this observation. This 5-page substitute is a pure camouflage, and not a very good one.

It is very transparent in its aim and objective. This 5-page, lately born substitute is a pure and simple subterfuge. It will not fool anybody who has written any one of us saying, "We urge you to vote against this rent supplement proposal." Yes, it is obvious to me, and I am sure to everyone, that the attempt here is to do indirectly what could not be done directly. The facts are that section 101 in a straight test would be defeated.

One of the proponents of this bill said earlier in this debate that this substitute was an attempt to plug some of the obvious loopholes.

Mr. Chairman, I conclude by saying that if this substitute is approved, the net result will be that this will open the floodgates to rent-supplement legislation from now on.

Therefore, Mr. Chairman, I hope it is defeated.

Mr. McCORMACK. Mr. Chairman, I move to strike the requisite number of words.

(Mr. McCORMACK asked and was given permission to revise and extend his remarks.)

(Mr. McCORMACK (at the request of Mr. PATMAN) was granted permission to proceed for 5 additional minutes.)

Mr. McCORMACK. Mr. Chairman, I rise in support of the amendment which has been offered by the gentleman from Georgia [Mr. STEPHENS].

Now, Mr. Chairman, my distinguished friend, the minority leader, the gentleman from Michigan [Mr. GERALD R. FORD] has definitely placed himself—and that means, I assume, the great majority of his party, but I hope not all of his party—in the position of opposition to any efforts being made along the lines outlined in the amendment offered by the distinguished gentleman from Georgia [Mr. STEPHENS]. He makes it a clear-cut issue.

The gentleman from New York [Mr. FINO] also takes the same position, that he is absolutely and unconditionally opposed to legislation of this kind.

The gentleman from Michigan [Mr. HARVEY] made a most ingenious observation, the first time I had ever heard it made by a Republican Member in my 38 years of membership in the House of Representatives, when he said it would be a "big bankers' project" and "a big bankers' dream."

Mr. Chairman, I never thought I would see the day when I would hear a Republican Member directly or indirectly attack big bankers in any respect. And, might I say for the benefit of the gentleman from Michigan, that I defend the big bankers. I believe it is wrong to indict and convict any economic group of our citizens, whether they are big or little or medium sized. I am for big banks. I am for big business. I am for small business. I am for small banks.

Mr. HALLECK. Mr. Chairman, will the distinguished gentleman from Massachusetts yield?

Mr. McCORMACK. In just a minute. I am for the big businessman when he is right. So, when my friend from Michigan talks about a big bankers' project and that the program of rental supplement is a good deal for the big bankers—there cannot be any big bankers in his district or he would have thrown in some others—I was amazed and surprised, coming from a Republican Member of the House.

Mr. Chairman, again I say I have got to rise in defense of our big bankers against this Republican attack as a Democratic Member of the House.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. McCORMACK. And, by the way, I am trying to help you out in your deal, too.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. McCORMACK. I have already yielded.

Mr. HALLECK. Well, I thank the gentleman.

I might say to the gentleman first of all that I appreciate his solicitude for me and the solicitude that he has always expressed through the years. I really appreciate it.

Now, Mr. Chairman, the gentleman from Massachusetts has spoken of the people. He is right, but he has mentioned the big bankers and small bankers, the big business people and the small business people—

Mr. McCORMACK. When they are right.

Mr. HALLECK. But, he forgot to mention the taxpayers. Now, is he the forgotten man in this thing?

Mr. McCORMACK. Well, I think we remember the taxpayers, for the Democratic administration has given to the taxpayers the biggest tax-reduction bill in the history of our country.

Mr. HALLECK. Mr. Chairman, will the gentleman yield further?

Mr. McCORMACK. And just recently this year there has been signed into law an approximately \$5 billion reduction in excise taxes. And, so my friend, you speak words. We Democrats give action.

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. McCORMACK. I am happy to yield to the gentleman from Louisiana.

Mr. BOGGS. As the gentleman has already pointed out, it is a fact in the past 3 years there has been a total tax reduction of \$17 billion.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. I want the gentleman to know I am also for both the big bankers and little bankers.

Mr. McCORMACK. The gentleman is apologizing now.

Mr. HARVEY of Michigan. The gentleman will permit me to continue?

Mr. McCORMACK. Not for too long, though.

Mr. HARVEY of Michigan. I am not certain that the gentleman was in the room when I made the distinction between the 5¼-interest rate and the 3¼-interest rate.

Mr. McCORMACK. The gentleman is very adroit, but I have had enough experience to know when I see adroitness. I was simply defending the big bankers that my friend from Michigan apparently attacked when he said this is a big bankers' dream.

Now, let us come to the amendment. There are about 6 million families in this country, as has been stated, who live under substandard conditions. Many Members of this House when they were youngsters, like myself, lived under substandard conditions, some of us under sub-substandard conditions. There is no monopoly on that as far as parties are concerned.

We are dealing with human beings. Those of us who started as youngsters under adverse economic conditions took advantage of the opportunities of our country and have made progress. But there are 6 million families in America who are faced with economic distress and economic adversity.

The rental question is a very vital one. A large percentage of our families with \$2,000 a year or less income pay 35 percent or more of their income for rent. Those getting between \$2,000 and \$3,000, another large percentage of the families of America, pay 35 percent or more for rent out of their income.

We are faced with and we are considering a problem dealing with human beings. I like to think of the conduct of our Government in connection with human beings, whether they are in the city or on the farm. That is why I always vote for farm legislation, because I want to try and cooperate in every way I can in connection with meeting the problems that confront the agricultural communities of our country.

We have to bear in mind that we have subsidies, direct and indirect, now, in various ways. Yes, this is a subsidy, but it is a subsidy for human beings who have been forgotten to a great extent, yet they are human beings who are Americans, our own American citizens. I support people abroad in the cause of humanity. Certainly I do not have to make this argument to Republicans or Democrats. I am talking to your mind—the human mind and the human heart. We are dealing with Americans. We are faced with a condition, not a theory. The Public Housing Law was incapable of meeting the problem. This is the natural and logical manner in which to do it; that is, as between having it financed and carried on in all aspects by private enterprise.

I think it is a very wise policy. I think it is a necessary policy in this year, 1965, and in the years ahead.

We are not talking about conditions as they existed 50 years ago and 100 years ago. We are talking about conditions as they exist today and tomorrow. The economic conditions confronting all of us are intense and those conditions bear particularly heavily on those who from an economic angle are not blessed with much of the world's goods. I know that my colleagues in this legislative body will think of those people who need help and

will want to help them just as I do—I understand that.

The question obviously is to put into practical operation a program that will enable us to the best of our ability to do what we can among the segment of our people who are possessed of deep faith—and I find that the poor do have that strong loyalty to our country. There is no question of any lack of faith or lack of loyalty among the underprivileged and poor families of our country.

From another angle, may I say, and when anyone disagrees with me I respect them in disagreement—but when I do anything—when a condition exists that requires consideration, when I as a legislator can do anything that will strengthen the family life of our country I feel I am strengthening our country itself. Because the very basis of society and the strength of any nation is the collective strength of the families of the Nation and the more we strengthen the families of our Nation economically, the more we strengthen our country itself.

So, without going into politics—and my opening remarks were more or less facetious—pointed but facetious—but as I say without going into politics, I am making an appeal on the level of one human being to another.

The CHAIRMAN. The time of the distinguished Speaker, the gentleman from Massachusetts, has expired.

Mr. PATMAN. Mr. Chairman, if it is agreeable to my colleague, the gentleman from New Jersey [Mr. WIDNALL], I ask unanimous consent that all debate on section 101, and all amendments thereto, close in 20 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. RYAN. Mr. Chairman, I object.

Mr. PATMAN. Mr. Chairman, I move that all debate on section 101, and all amendments thereto, close in 20 minutes.

The motion was agreed to.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Chairman, I wish time only to say that I have a deep and abiding affection for my native State of Michigan.

Public housing was part and parcel of the Michigan of my boyhood. When I was a boy years ago in Michigan the largest house in Berrien County, located between the county seat at Berrien Springs and the railroad at Berrien Center, was the poorhouse. That was true in almost every county in Michigan. The poorhouse was the largest house in the county and the poorhouse was public housing in its finest human expression.

But a few counties in Michigan did not have enough money to build a poorhouse, so the county officials got together and said to the poor people, "we will chip in a little bit to help pay your rent."

I am sure that the distinguished minority leader will be happy to know that the rent subsidy or settlement feature of the bill before us, which some rash

souls on this side have called both rank socialism and big bankerism on rampage, is really a native of Michigan, something that the good people of Michigan with slender purses but big hearts, tried out in the dying years of the 19th century and found out that it worked in relieving human suffering. Mr. Speaker, the urges of good hearts and the vehicles for their delivery are ageless. The housing bill before us is such a vehicle.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. RYAN].

(Mr. RYAN asked and was given permission to revise and extend his remarks.)

Mr. RYAN. Mr. Chairman and Members of the Committee, I regret we are confronted with this compromise amendment. I prefer the bill in its present form as it has been brought to the floor of the House. It may be that the realities of the legislative situation and the count of the House have convinced the Committee to support this compromise. Nevertheless, I must express my disappointment and my concern about the various changes in the rent supplement concept since it was originally proposed by the administration.

This rent supplement concept is a bold new idea. It should be used to reach those families whose incomes are above the public housing limit yet who cannot, because of the cost of housing, obtain decent housing at one-fifth of their income. That was the original intent of the program.

As proposed by the administration, it did not cover those who are eligible for public housing.

H.R. 7984, as reported out by the committee, changed the program. It provides that the rent supplement payment may not exceed the difference between 25 percent of the tenant's income and the rent—instead of 20 percent. It also includes low- and moderate-income people. According to the committee report—report No. 365:

Rent supplement payments could not be made on behalf of anyone whose income was more than four times the minimum rent required to obtain standard private housing in the area.

Now the pending amendment requires that the income be below the income limitations for occupancy in public housing dwellings in the area.

What is happening is that the original intent is being compromised, and we are now asked to say this program shall only be tied to public housing. Let me point out that this is also tied to a program called the section 221(d)(3) program. That program was adopted in 1961, and to date no housing has been built under that program in the city of New York. It has not been implemented. FHA regulations are so drawn as to prevent it. Construction costs are too high.

I suspect very strongly, although I will reluctantly support this amendment, that the program will not build the housing which is needed in the big cities. We really need a massive public housing program, a program which will build hun-

dreds of thousands of units. In New York City today there are 100,000 applications pending for public housing. There are 500,000 substandard housing units in the city of New York today. We need a crash public housing program.

This bill will not meet the need. Under the statute, there is a 15-percent limitation on the amount of public housing which can be allocated to any State. In the State of New York this means under the bill only 5,250 new units, and the city of New York will get even less than that. For H.R. 7984 provides for only 35,000 units of new construction per year.

I fear we are being misled. This rent supplement program is being tied to a program which has not been effective in the city of New York. It is doubtful that it will provide the housing we need. It is time we faced the realities of the situation and recognized that we need a bold and imaginative program of public housing.

The National Housing Conference recommended 125,000 units of public housing per year.

We should also provide a rent supplement program along the line originally proposed by the administration, under which people whose incomes are higher than the limits for public housing would be reached.

Mr. Chairman, there are too many individuals and families who cannot obtain decent housing for one-fifth of their income, to say nothing of one-quarter of their income.

Under the original rent supplement concept, a tenant would remain as his income increased, and the rent subsidy would be reduced. This was important in helping to stabilize communities. Under the proposed amendment, when a tenant's income goes above public housing eligibility limits, what will happen to him?

Mr. Chairman, when I appeared before the Housing Subcommittee, I urged that rent supplements should be provided for State and city subsidized middle-income housing, such as the Mitchell-Lama limited profit programs in New York State and New York City. This would enable localities to expand middle-income housing plans, something that is sorely needed in New York and elsewhere. Tax abatement subsidy programs should have the benefit of the rent supplement concept.

I also proposed that the tenant selection process under the rent supplement program should not only be free from racial discrimination, but it should promote integrated housing. If tenant selection is put in the hands of private sponsors, as the bill proposes, the new housing will not be racially integrated. Either the HHFA should retain control of tenant selection or it should be done by a local public agency under HHFA supervision.

Mr. Chairman, while I do not believe we are being sufficiently imaginative in formulating this program, it is a new step which should be taken in the interests of housing the people of America.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. FARBSTEIN].

AMENDMENT OFFERED BY MR. FARBSTEIN

Mr. FARBSTEIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FARBSTEIN as an amendment to the amendment offered by Mr. STEPHENS:

In section 101(b) of the matter proposed to be inserted, after "corporation, which" insert "(1)".

In such section 101(b), before the colon, insert the following: "or (2) is a mortgagor under section 231 of such Act, or a borrower under section 202 of the Housing Act of 1959, which has been approved after the enactment of this section (with respect to any project the construction of which has not been completed on the date of such enactment) for receiving the benefits of this section".

Mr. FARBSTEIN. Mr. Chairman, this is a very simple amendment. All I seek to do is to provide rent supplements, if it is eventually adopted, to developers specifically engaged in providing housing for the aged. That is all it does, and I hope that the committee will accept the amendment.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. FARBSTEIN. I yield to the gentleman.

Mr. BARRETT. I very much sympathize with the amendment of the gentleman from New York, but this is a situation where it would be a double subsidy. As much as the committee would like to take it, we are unable to take it, because it is a further subsidy on the rent subsidy which we are now discussing.

Mr. FARBSTEIN. If the gentleman will read section 101, subdivision B, he will see that it refers to section 221(d) (3). Section 221 (d) (3) of the National Housing Act applies to supplements dealing with everything except housing for the aged. Section 231 of such act deals with the aged. All I seek to do is incorporate that section which applies to the aged so that the building for the aged will be entitled to a supplement just like everyone else.

I cannot understand why there should be any objection to this amendment. I do hope that the chairman of the subcommittee will reconsider and accept it.

Mr. PATMAN. Mr. Chairman, I rise in opposition to the amendment to the amendment.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Pennsylvania [Mr. BARRETT].

Mr. BARRETT. Mr. Chairman, we have already covered the substitute for the elderly in the bill. Therefore I ask for an immediate vote against the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York to the amendment of the gentleman from Georgia [Mr. STEPHENS].

The amendment to the amendment was rejected.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey [Mr. JOELSON].

(Mr. JOELSON asked and was given permission to revise and extend his remarks.)

Mr. JOELSON. Mr. Chairman, I intend to support H.R. 7984 in its entirety, including the hotly disputed section 101.

I was perplexed yesterday to hear one of my colleagues warn that the rent supplement provision would destroy morale. I would like to know what is more destructive to a man's morale than to have him and his family live in a stinking, rat-infested slum.

It is all very well to talk, as my colleague did yesterday, about how her grandparents took their children on horseback over Indian trails. It so happens there are no Indian trails in the district which I represent, and I have not even seen a horse there lately. Unfortunately, however, there are people required to live in hell-holes that are an insult to the human spirit.

If we really want to help boost morale, we had better stop talking in meaningless platitudes and do something to help disadvantaged people live in decent surroundings. To state, as my colleague did yesterday, that people should build their own homes is to be completely out of touch with reality.

How can a man who earns so little as to be qualified for public housing, and is otherwise disabled or disadvantaged possibly build his own home? To suggest, as my colleague did yesterday, that the person who fails to do so is spineless is as unkind as it is unrealistic.

Let us stop mouthing empty phrases about the good old days and let us legislate for the present and the future so that American men and women can be helped to help themselves live in self-respect and decency.

The CHAIRMAN. The Chair recognizes the gentleman from Florida [Mr. HERLONG].

MOTION OFFERED BY MR. HERLONG

Mr. HERLONG. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. HERLONG moves that the Committee rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

Mr. HERLONG. Mr. Chairman, this whole business of attempting to embark on a program of rent subsidies or supplements has caused me to ponder just what comes next. If a man has substandard clothing, would we not have to give him a subsidy so that he can wear as expensive clothes as others? Recreation has become an integral part of our lives—would we not have to subsidize recreation to keep a man from feeling frustrated because he cannot afford the same recreational activities and clubs that his neighbor enjoys?

Speaking of recreation, a couple of months ago James J. Kilpatrick, writing in the Washington Star, satirically envisioned just what might happen when the Government, for example, invaded the recreational field of our national game—baseball. Because it so appropriately points up the ludicrousness of what is being attempted in this rent subsidy I would like to abridge and quote a bit of it.

It was opening day of the season, the Mets were playing the Dodgers at Shea

Stadium. The usual pregame conference with the managers was held along the left field foul line.

Most of the new rules since the Government had taken over had been explained in spring training many times, but Casey Stengel, the manager of the Mets, could not get it straight.

"It is assumed," said the umpire with great patience, "that any team that wins fewer than 50 percent of its games is the victim of insidious discrimination which is a blatant affront to the conscience of this generation of Americans."

"Quite so," said Casey. "Last season we won 53 and lost 109."

"The new rules," the umpire said, "will not permit this. The acid of the Cards shall not be allowed to corrode the soul of the Mets. Neither can a prosperous nation tolerate islands of poverty in a sea of plenty. The Mets therefore begin the season with 15 games in the win column—and each of their hitters gets one extra strike."

After some argument the teams took the field. In the first inning the Dodgers loaded the bases and Willie Davis clobbered one into the stands. As he came trotting around third base the umpire came out and stopped him. "The challenge before us is clear and immediate," the umpire said. "You are flouting the Constitution. You are frustrating the intent of the Mets. The hymns of the oppressed have summoned us to justice. You are out."

Of course, this caused quite an argument but the umpire won it by putting Dodger manager, Walt Alston, out of the game.

By the end of the fifth inning the score was the Mets 3 and the Dodgers 8. It would have been much more one-sided but for the fact that, in the interest of social justice, the umpire had cut the Dodgers down to seven men. Willie Davis was playing the entire outfield by himself—but even with four strikes to the batter, the Mets were not making any progress. So the umpire summoned Stengel to discuss appropriate legislation.

"Unless we act anew," said the umpire, "with dispatch and resolution, we shall sanction a sad and sorrowful course for the future."

"What we need," said Casey, "is a few runs."

"The most crucial new instrument in our effort to improve the American pastime is the run supplement," said the umpire. "It now proposes to add to the rules through direct payment of a portion of the score of needy individuals and ball clubs."

So the umpire took two runs away from the Dodgers and gave them to the Mets. This made the score 6 to 5 in favor of the Dodgers. Then, in the bottom of the eighth, the Mets tied it up on a home run into short center field. It would have been a single in any other game, but the umpire ruled that inasmuch as the hitter had a batting average of less than .250 he was entitled to special benefits under the poverty program.

The game finally ended 6 hours after it began, with the score, Mets, 44; Dodgers, 41, but it would not have ended then

if the umpire had not decided that all managers over 65 were entitled to a bonus.

Yes, this is ridiculous—and this whole rent supplement idea is just as ridiculous when you think about it. And that is why I cannot vote for it. The image that Congress, in the eyes of many people, already has of yielding to whatever comes up here just because some arms are twisted is already bad enough.

Mr. Chairman, I ask unanimous consent to withdraw my preferential motion.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. HALLECK. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HALLECK. Was unanimous consent granted for the withdrawal of that motion?

The CHAIRMAN. I am sure it was.

Mr. HALLECK. Then it would be in order to offer it again, would it not?

The CHAIRMAN. The Chair recognizes the gentleman from Ohio [Mr. AYRES].

(Mr. AYRES asked and was given permission to revise and extend his remarks.)

Mr. AYRES. Mr. Chairman, those of us who have not had the privilege of serving on the Committee on Banking and Currency and who have not had the privilege of analyzing this amendment that was just brought in today are somewhat confused as to just what the amendment proposes to do regarding those people who qualify for public housing but who cannot find a unit available.

I would like to ask the gentleman from Pennsylvania [Mr. BARRETT] a question. Assuming the head of a family here in the District of Columbia has a gross income of \$300, they would qualify for a \$75, or 25 percent of \$300, public housing unit. The unit is not available. No unit is available. So, they rent a winterized cottage on Chesapeake Bay and they buy a dozen pullets, a hog, and plant a garden. But they have to pay \$150 a month for this.

How much would the Government pay them for not being able to get a public housing unit out on East Capital Street?

Mr. BARRETT. The necessary payment.

Mr. AYRES. Even though he is paying \$150, half of his income in rent?

Mr. BARRETT. That is right.

Mr. AYRES. Well, then, who does this program help?

Mr. BARRETT. It helps the people in four groups. It helps the handicapped, the displaced people, the elderly, and those people who are living in slums, a term we have sophisticated and now say "substandard" housing. But we are talking about those who are living in filth and in slums. It is those people.

And the bill also limits the program to new or rehabilitated housing financed under FHA section 221(d) (3).

The CHAIRMAN. The Chair recognizes the gentleman from Missouri [Mr. ICHORD].

(Mr. ICHORD asked and was given permission to revise and extend his remarks.)

Mr. ICHORD. Mr. Chairman, I take this time to inquire of the subcommittee chairman as to section 101.

As I understand it, if the amendment is adopted the eligibility standards of public housing will become the standards of rental supplements.

Let me put a hypothetical question to the gentleman from Pennsylvania. Assuming a man is earning \$6,200 a year, and he qualifies and receives a rent supplement. He later gets a better job, making \$9,000 a year.

Would his rent supplement be reduced?

Mr. BARRETT. This is a very good point, and I am glad the gentleman brought this point up. This is the simplicity of the legislation which has been neglected in the discussion for the last couple of days. If that party were eligible in the beginning for rent supplementation, and if his family increased its earnings, his supplementation would go down. The best practical answer that I can give this House is to look at the two escalators contained herein. As the family income rises, the rent supplement would go down. When he reaches a point that he is financially capable of paying the economic rent, he can stay in the apartment, and he is not evicted as he would be in public housing.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. CEDERBERG].

(Mr. CEDERBERG asked and was given permission to revise and extend his remarks.)

Mr. CEDERBERG. Mr. Chairman, I think we have made just a little bit of progress here today when the gentleman from New York offered an amendment and it was opposed by the gentleman from Pennsylvania, on the grounds that it represented a double subsidy.

Certainly I believe we can only stand with one subsidy of this kind in a day and I am glad that the gentleman did not accept it.

Mr. Chairman, this represents the very worst program that has been presented to the Congress in the time I have served here.

Mr. HARVEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. CEDERBERG. I yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. Mr. Chairman, I want to take this time to point out to the Members of the House that there is another program in this housing bill, and if this section 101 and this amendment is defeated—because we know now it was hastily conceived in the last minute, a six-page amendment, after days of laborious hearings were held on the general legislation—we know it will not work—there is another section, section 103, that is a good substitute for it that is already in the bill. It is a much cheaper section where you are dealing with the rent situation for a period of 12 to 36 months instead of 40 years. You are dealing with existing dwellings of which there is a surplus, instead of going out and constructing

new ones at this immense cost and at an interest rate of 5¼ percent.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio [Mr. STANTON].

Mr. STANTON. Mr. Chairman, I yield to the gentleman from New York [Mr. GOODELL].

Mr. GOODELL. Mr. Chairman, a few moments ago the majority Whip made reference to the social security issue. I have heard this dead horse beaten many times, and I think the RECORD ought to be absolutely clear that the Republicans did not oppose social security. The vote on April 19, 1935, in the House was 77 Republicans voting for it, and 18 opposed to it. Some people seem to enjoy re-writing history, but let us stick to the facts.

Mr. PATMAN. What about the motion to recommit?

The CHAIRMAN. The Chair recognizes the gentleman from Tennessee [Mr. BROCK].

Mr. BROCK. Mr. Chairman, just one further comment on the comparison between sections 101 and 103 that the gentleman from Michigan [Mr. HARVEY] has made.

We should point out 103 has a cost of \$500 million instead of \$6 billion. In addition section 103 goes into immediate effect. Existing houses are available now instead of having to wait for 2 or 3 years.

Finally, we have been talking a lot about human beings, but you can never strengthen a family by destroying its incentive to own its own home.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. GUBSER].

(Mr. GUBSER asked and was given permission to revise and extend his remarks.)

Mr. GUBSER. Mr. Chairman, I listened with great interest to the sterling words of the Speaker when he told of his desire to help human beings. We all agree and are sincere in that desire. But I wonder, perhaps, with the great surplus of programs which are being enacted these days for that purpose, if we are not choking the poor to death with legislation.

In my time we have enacted hundreds of laws to benefit the economically underprivileged. We have enacted unemployment insurance, social security, WPA, PWA, NYA, public housing, urban redevelopment, slum clearance, manpower training and development, aid to needy children, welfare programs, Appalachia, the food stamp bill, the poverty bill, accelerated public works, area redevelopment, vocational education, the Job Corps which spends \$7,000 annually on each of the underprivileged and hundreds of other programs.

Yet in spite of this endless stream of legislation each of which was billed as the millenium for the poor each year we hear someone come before us citing figures showing that poverty is on the increase; unemployment figures remain immune to Government programs designed to lower them, and new slums are being created each day.

In view of this dismal record perhaps we had better unlegislate for poverty instead of legislating for it.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey [Mr. WIDNALL].

Mr. WIDNALL. Mr. Chairman, I would just like to reiterate what I said before in the well of the House. I urge defeat of this amendment. The original proposition that was criticized so severely by so many, I supported, and will support it again if the pending amendment is defeated.

Before closing, would like to compliment the very able chairman Mr. FLOOD for the very able way he has handled the debate today and for the good humor he has shown and fair treatment he has accorded to both the majority and minority Members. Believe me, we need some good laughs in Washington many times and we are doubly grateful for your contribution to consideration of this bill.

The CHAIRMAN. All time on the pending amendment has expired.

The question is on the amendment offered by the gentleman from Georgia [Mr. STEPHENS].

Mr. FINO. Mr. Chairman, I ask for a teller vote on this amendment.

Tellers were ordered, and the Chairman appointed as tellers Mr. WIDNALL and Mr. PATMAN.

The Committee divided and the tellers reported that there were—ayes 190, noes 159.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Extension of FHA section 221 programs; modification of interest rate; pooling of mortgages for sale

SEC. 102. (a) The fifth sentence of section 221(f) of the National Housing Act is amended by striking out "subsection (d) (2) or (d) (4) after September 30, 1965, or under subsection (d) (3) after September 30, 1965," and inserting in lieu thereof "this section after October 1, 1969."

(b) The proviso in section 221(d) (5) of such Act is amended by striking out "not less than the annual rate of interest determined" and inserting in lieu thereof "not less than the lower of (A) 3 per centum per annum, or (B) the annual rate of interest determined".

(c) Section 302(c) of such Act is amended by inserting before the last sentence thereof the following: "If there shall be included within one or more of the trusts or other agencies created pursuant to the authority of this subsection any mortgages bearing a below-market interest rate and insured under section 221(d) (3) after the date of the enactment of the Housing and Urban Development Act of 1965, there are authorized to be appropriated from time to time such amounts as may be necessary to reimburse the Association for the amount of the differential (including interest, other costs, and a fair proportion of administrative expense) between (1) the total outlay with respect to outstanding participations or other instruments in an amount not to exceed the dollar amount of such below-market interest rate mortgages, and (2) the total receipts from such mortgages."

Low-rent housing in private accommodations

SEC. 103. (a) The United States Housing Act of 1937 is amended by redesignating section 23 as section 24, and by adding after section 22 the following new section:

"Low-rent housing in private accommodations"

"SEC. 23. (a) For the purpose of providing a supplementary form of low-rent housing which will aid in assuring a decent place to live for every citizen and promote efficiency and economy in the program under this Act by taking full advantage of vacancies or potential vacancies in the private housing market, each public housing agency shall, to the maximum extent consistent with the achievement of the objectives of this Act, provide low-rent housing under this Act in the form of low-rent housing in private accommodations in accordance with this section where such housing in private accommodations can be provided at a cost equal to or less than housing in projects assisted under other provisions of this Act. As used in this section the term 'low-rent housing in private accommodations' means dwelling units in an existing structure, leased from a private owner, which provide decent, safe, and sanitary dwelling accommodations and related facilities effectively supplementing the accommodations and facilities in low-rent housing assisted under the other provisions of this Act in a manner calculated to meet the total housing needs of the community in which they are located. As used in this section, the term 'owner' means any person or entity having the legal right to lease or sublease property containing one or more dwelling units as described in this section.

"(b) Beginning as soon as practicable after the date of the enactment of this section, each public housing agency shall conduct a continuing survey and listing of the available dwelling units within the community or communities under its jurisdiction which provide decent, safe, and sanitary dwelling accommodations and related facilities and are, or may be made, suitable for use as low-rent housing in private accommodations under this section.

"(c) Each public housing agency, by notification to the owners of housing listed under subsection (b), or by publication or advertisement, or otherwise, shall from time to time make known to the public in the community or communities under its jurisdiction the anticipated need for dwelling units in such community or communities to be used as low-rent housing in private accommodations under this section, inviting the owners of such dwelling units to make available for purposes of this section one or more of such units (not exceeding 10 per centum of the units in any single structure except to the extent that the agency, because of the limited number of units in the structure or for any other reason, determines that such limit should not be applied). The public housing agency shall conduct appropriate inspections of the units offered to be made available in any residential structure by the owner thereof in response to such invitation, and if—

"(1) it finds that such units are, or may be made, suitable for use as low-rent housing in private accommodations within the meaning of subsection (a), and

"(2) the rentals to be charged for such units, as negotiated and agreed to by the agency and the owner of the structure in a manner consistent with subsection (d) (2), are within the financial range of families of low income, such agency may approve such units for use as low-rent housing in private accommodations in accordance with (and subject to the applicable limitations contained in) this section. Each public housing agency shall maintain and keep current a list of units approved by it under this subsection, including such information with respect to each such unit as it may consider necessary or appropriate.

"(d) To the extent of contracts for annual contributions entered into by the Authority with a public housing agency under section 10(e), such agency may enter into contracts with the owners of structures containing dwelling units approved under subsection (c) for the use of such units in accordance with this section. Each such contract with an owner shall provide (with respect to any unit) that—

"(1) the selection of tenants for such unit shall be the function of the owner, subject to the provisions of the contract between the Authority and the agency;

"(2) the rental and other charges to be received by the owner shall be negotiated and agreed to by the agency and the owner, and the rental and other charges to be paid by the tenant shall be determined in accordance with the standards applicable to units in low-rent housing projects assisted under the other provisions of this Act;

"(3) the agency shall have the sole right to give notice to vacate, with the owner having the right to make representations to the agency for termination of a tenancy;

"(4) maintenance and replacements (including redecoration) shall be in accordance with the standard practice for the building concerned, as established by the owner and agreed to by the agency; and

"(5) the agency and the owner shall carry out such other appropriate terms and conditions as may be mutually agreed to by them. Each contract between a public housing agency and an owner entered into under this subsection shall be for a term of not less than twelve months nor more than thirty-six months, and shall be renewable by such agency and owner at the expiration of such term.

"(e) The annual contribution under this Act for a project of a public housing agency for low-rent housing in private accommodations under this section in lieu of any other guaranteed contribution authorized by section 10 shall not exceed the amount of the fixed annual contribution which would be established under this Act for a newly constructed project by such public housing agency designed to accommodate the comparable number, sizes, and kinds of families. The period over which payments will be made to a public housing agency for a project of low-rent housing in private accommodations under this section, and the aggregate amount of such payments, under a contract for annual contributions, shall be determined on the basis of the number of units in the community or communities under the jurisdiction of such agency which are in use (or can reasonably be expected to be placed in use) as low-rent housing in private accommodations under this section, taking into account the terms of the leases under which such units are (or will be) so used. In addition, contracts for financial assistance entered into by the Authority with a public housing agency pursuant to this section shall provide for reimbursement of reasonable and necessary expenses incurred by such agency in conducting surveys, listings, and inspections described in subsections (b) and (c).

"(f) On or before January 1, 1968, the Authority shall submit to the Congress a full report of operations under this section, together with its recommendations with respect thereto."

(b) The last sentence of section 2(1) of such Act is amended by striking out "Income limits for occupancy and rents" and inserting in lieu thereof "Except as otherwise provided in section 23, income limits for occupancy and rents".

(c) The provisions of sections 10(h) and 15(7) of the United States Housing Act of 1937, and the workable program requirement in section 10(e) of such Act and section 101(c) of the Housing Act of 1949, shall not apply to low-rent housing in private accom-

modations provided under section 23 of the United States Housing Act of 1937.

Low-rent public housing

SEC. 104. (a) Section 10(e) of the United States Housing Act of 1937 is amended by inserting after "per annum," the following: "which limit shall be increased by \$47,000,000 on the date of the enactment of the Housing and Urban Development Act of 1965, and by further amounts of \$47,000,000 on July 1 in each of the years 1966, 1967, and 1968, respectively."

(b) Section 10(c) of such Act is amended by striking out "And provided further" and inserting in lieu thereof "Provided further", and by inserting before the period at the end thereof the following: "And provided further, That the amount of the fixed annual contribution which would be established under this Act for a newly constructed project by a public housing agency designed to accommodate a number of families of a given size and kind may be established, as a maximum annual contribution in lieu of any other guaranteed contribution authorized under this section, for a project by such public housing agency which would provide housing for the comparable number, sizes, and kinds of families through the acquisition, acquisition and rehabilitation, or use under lease of existing structures which are suitable for low-rent housing use and obtainable in the local market".

(c) Section 2(2) of such Act is amended to read as follows:

"(2) The term 'families of low income' means families (including elderly and displaced families) who are in the lowest income group and who cannot afford to pay enough to cause private enterprise in their locality or metropolitan area to build an adequate supply of decent, safe, and sanitary dwellings for their use. The term 'families' includes families consisting of a single person in the case of elderly families and displaced families, and includes the remaining member of a tenant family. The term 'elderly families' means families whose heads (or their spouses), or whose sole members, have attained the age at which an individual may elect to receive an old-age benefit under title II of the Social Security Act, or are under a disability as defined in section 223 of that Act, or are handicapped within the meaning of section 202 of the Housing Act of 1959. The term 'displaced families' means families displaced by urban renewal or other governmental action."

(d) Section 15(7)(b) of such Act is amended by striking out "(ii)" and all that follows down through "and (iii)", and by inserting in lieu thereof "and (ii)".

Direct loans to provide housing for the elderly or handicapped

SEC. 105. (a) Section 202(a)(4) of the Housing Act of 1959 is amended by striking out "not to exceed \$350,000,000" and inserting in lieu thereof "such sums as may be necessary for purposes of this section."

(b) Effective with respect to loans made on or after the date of the enactment of this Act, section 202(a)(3) of such Act is amended by striking out "the higher of (A) 2¾ per centum per annum, or" and inserting in lieu thereof "the lower of (A) 3 per centum per annum, or".

(c) Section (202)a of such Act is further amended by adding at the end thereof the following new paragraph:

"(5) No loan shall be made under this section after October 1, 1969, except pursuant to a commitment entered into on or before such date."

Rehabilitation grants to homeowners in urban renewal areas

SEC. 106. (a) Title I of the Housing Act of 1949 is amended by adding at the end thereof the following new section:

"Rehabilitation grants"

"SEC. 115. (a) Notwithstanding any other provision of this title, the Administrator may authorize a local public agency to make grants (and the urban renewal project may include the making of such grants) as prescribed in this section. Any such grant may be made only to an individual or family, as described in subsection (b), who owns and occupies a structure in an urban renewal area, and only for the purpose of covering the cost of repairs and improvements necessary to make such structure conform to public standards for decent, safe, and sanitary housing as required by applicable codes or other requirements of the urban renewal plan for the area. Any contract for financial assistance under this title shall provide that the capital grant otherwise payable for the project shall be increased by an amount equal to the total amount of the grants under this section and that no part of the total amount of such grants shall be required to be contributed as part of the local grant-in-aid.

"(b) A grant authorized by this section may be made to an individual or family whose income does not exceed \$2,000 a year, and such grant may be in an amount which does not exceed the lesser of (1) the actual (and approved) cost of the repairs and improvements involved, or (2) \$1,500. In case the income of the individual or family exceeds \$2,000 a year, a grant may be made under this section, subject to the limitations specified in clauses (1) and (2) of the preceding sentence, but only in an amount not to exceed that portion of the cost of the repairs and improvements which cannot be paid for with any available loan that can be amortized as part of such individual's or family's monthly housing expense without requiring such monthly housing expense to exceed 25 per centum of such individual's or family's monthly income."

(b) Any contract with a local public agency which was executed under title I of the Housing Act of 1949 before the date of enactment of this Act may be amended to provide for grants authorized by section 115 of the Housing Act of 1949.

TITLE II—FHA INSURANCE OPERATIONS

Land development

SEC. 201. (a) The National Housing Act is amended by adding at the end thereof the following new title:

"TITLE X—MORTGAGE INSURANCE FOR LAND DEVELOPMENT

"Definitions

"SEC. 1001. As used in this title—

"(a) the term 'mortgage' means a lien or liens on real estate in fee simple, or on a leasehold (1) under a lease for not less than ninety-nine years which is renewable or (2) under a lease having a period of not less than fifty years to run from the date the mortgage was executed;

"(b) the term 'first mortgage' includes such classes of first liens as are commonly given to secure advances (including but not limited to advances during construction) on, or the unpaid purchase price of, real estate under the laws of the State in which the real estate is located, together with the credit instrument or instruments, if any, secured thereby, and may be in the form of trust mortgages or mortgage indentures or deeds of trusts securing notes, bonds, or other credit instruments;

"(c) the terms 'mortgagee', 'mortgagor', and 'State' have the same meaning as in section 207 of this Act;

"(d) the term 'improvements' means waterlines and water supply installations, sewerlines and sewage disposal installations, roads, streets, curbs, gutters, sidewalks, storm drainage facilities, and other installations or work, whether on or off the site, which the

Commissioner deems necessary or desirable to prepare land primarily for residential and related uses or to provide, for public or common use, facilities which (1) shall include only such buildings as are needed in connection with water supply or sewage disposal installations and such buildings, other than schools, as the Commissioner considers appropriate, and (2) are to be owned and maintained jointly by the property owners; and

"(e) the term 'land development' means the process of making, installing, or constructing improvements.

"Basic conditions for insurance"

"SEC. 1002. The Commissioner is authorized (1) to insure, upon such terms and conditions as he may prescribe, any first mortgage (including advances on such mortgage) in accordance with the provisions of this title and (2) to make a commitment for the insurance of such mortgage prior to the date of execution of such mortgage or prior to the date of disbursement of the mortgage proceeds. No mortgage shall be insured under this title after October 1, 1969, except pursuant to a commitment to insure issued before such date.

"SEC. 1003. The mortgage shall—

"(a) be executed by a mortgagor, other than a public body, approved by the Commissioner;

"(b) be made to and held by a mortgage approved by the Commissioner; and

"(c) cover the land to be developed and the improvements to be made with the assistance of the mortgage insurance under this title, except facilities intended for public use and in public ownership.

"SEC. 1004. The principal obligation of the mortgage shall (1) not exceed 75 per centum of the Commissioner's estimate of the value of the property upon completion of the land development, and (2) not exceed the sum of 50 per centum of the Commissioner's estimate of the value of the land before development and 90 per centum of his estimate of the cost of such development. The outstanding principal obligations of mortgages involving a single land development undertaking, as defined by the Commissioner, shall at no time exceed \$12,500,000.

"SEC. 1005. The mortgage shall—

"(a) have a maturity, not to exceed seven years, and contain repayment provisions satisfactory to the Commissioner;

"(b) bear interest at a rate satisfactory to the Commissioner, and such interest shall be exclusive of premium charges for mortgage insurance and such service charges and fees as may be approved by the Commissioner; and

"(c) contain such terms and provisions with respect to protection of the security, payment of taxes, delinquency charges, prepayment, additional and secondary liens, and other matters as the Commissioner may in his discretion prescribe.

"SEC. 1006. A property or project to be financed by a mortgage insured under this title shall—

"(a) represent a good mortgage insurance risk; and

"(b) involve improvements that comply with all applicable State and local governmental requirements and with minimum standards approved by the Commissioner.

"Land planning"

"SEC. 1007. (a) The land development covered by a mortgage insured under this title shall be undertaken pursuant to a schedule, conforming to such requirements and procedures as the Commissioner may prescribe, that will assure the use of the land for the purposes for which it is to be developed within the shortest reasonable period consistent with the objectives of sound and economic community growth or urban development.

"(b) The land development shall be undertaken in accordance with an overall development plan, appropriate to the scope and character of the undertaking, which—

"(1) has received all governmental approvals required by State or local law or by the Commissioner;

"(2) is acceptable to the Commissioner as providing reasonable assurance that the land development will contribute to good living conditions in the area being developed, which area (i) will have a sound economic base and a long economic life, (ii) will be characterized by sound land-use patterns, and (iii) will include or be served by such shopping, school, recreational, transportation, and other facilities as the Commissioner deems adequate or necessary; and

"(3) is consistent with a comprehensive plan which covers, or with comprehensive planning being carried on for, the area in which the land is situated, and which meets criteria established by the Housing and Home Finance Administrator for such plans or planning.

"Encouragement of small builders and moderate cost housing"

"SEC. 1008. The Commissioner shall adopt such requirements as he deems necessary in land development covered by mortgages insured under this title to encourage the maintenance of a diversified local homebuilding industry, broad participation by builders, and the inclusion of a proper balance of housing for families of moderate or low income.

"Water and sewerage facilities"

"SEC. 1009. After development of the land it shall be served by public systems for water and sewerage which are consistent with other existing or prospective systems within the area. If the Commissioner determines that public ownership of such a system is not feasible, he may approve an adequate privately or cooperatively owned system which will be regulated, during the period of such ownership, in a manner acceptable to him with respect to user rates and charges, capital structure, methods of operation, and rate of return. Approval of such system shall be given only where the Commissioner receives assurances, satisfactory to him, with respect to eventual public ownership and operation of the system and with respect to the conditions and terms of any sale or transfer.

"Releases"

"SEC. 1010. The Commissioner may, on such terms and conditions as he may prescribe, consent to the release or subordination of a part or parts of the mortgaged property from the lien of the mortgage.

"Premiums and fees"

"SEC. 1010. The Commissioner may, on lect reasonable premiums for the insurance of any mortgage under this title and make such charges as he determines are reasonable for the analysis of the land development plan and the appraisal and inspection of the property and improvements. On or before January 1, 1967, the Commissioner shall make a report to the Congress concerning the premium rates and other charges under this title that he estimates will be adequate to provide income sufficient for a self-supporting program.

"Insurance benefits"

"SEC. 1012. The provisions of subsections (e), (g), (h), (i), (j), (k), (l), and (n) of section 207 of this Act shall be applicable to mortgages insured under this title, except that as applied to such mortgages (1) any reference therein to section 207 shall be deemed to refer to this title, and (2) any reference to an annual premium shall be deemed to refer to such premiums as the Commissioner may designate under this title.

"Incontestability provisions"

"SEC. 1013. Any contract of insurance executed by the Commissioner under this title shall be conclusive evidence of the eligibility of the mortgage for insurance, and the validity of any contract of insurance so executed shall be incontestable in the hands of an approved mortgagee from the date of the execution of such contract, except for fraud or material misrepresentation on the part of such approved mortgagee.

"Rules and regulations"

"SEC. 1014. The Commissioner is authorized to make such rules and regulations and to require such agreements as he may deem necessary or desirable to carry out the provisions of this title.

"Taxation provisions"

"SEC. 1015. Nothing in this title shall be construed to exempt any real property acquired and held by the Commissioner under this title from taxation by any State or political subdivision thereof to the same extent, according to its value, as other real property is taxed.

"Cost certification"

"SEC. 1016. (a) The Commissioner shall adopt such requirements as he determines necessary to assure, at reasonable intervals of time during land development and upon completion of such development, that the amount of the mortgage loan outstanding at each such interval does not exceed with respect to that portion of the land remaining under the lien of the mortgage (1) 50 per centum of the Commissioner's estimate of the value of such remaining land before development, plus (2) 90 per centum of the actual costs of the development allocated by the Commissioner to such remaining land.

"(b) From time to time during, and upon completion of, the development, the Commissioner shall require the mortgagor to certify as to the actual costs of development of the land.

"(c) Certifications required pursuant to this section shall be accompanied by such data and records as the Commissioner shall prescribe.

"(d) A mortgagor's certification approved by the Commissioner shall be final and incontestable except for fraud or material misrepresentation on the part of the mortgagor.

"(e) As used in this section, the term 'actual costs' means the costs (exclusive of kickbacks, rebates, or trade discounts) to the mortgagor of the improvements involved. These costs may include amounts paid for labor, materials, construction contracts, land planning, engineers' and architects' fees, surveys, taxes, and interest during development, organizational and legal expenses, such allocation of general overhead expenses as are acceptable to the Commissioner, and other items of expense incidental to development which may be approved by the Commissioner. If the Commissioner determines there is an identity of interest between the mortgagor and the contractor, there may be included an allowance for contractor's profit in an amount deemed reasonable by the Commissioner."

(b) (1) Section 302(b) of the National Housing Act is amended by striking out "the term 'mortgages'" in the last sentence and inserting in lieu thereof "the terms 'mortgages' and 'home mortgages'".

(2) The first paragraph of section 24 of the Federal Reserve Act is amended by inserting before the next to last sentence the following new sentence: "Notwithstanding the foregoing limitations and restrictions in this section, any national banking association may make loans for land development which are secured by mortgages insured under title X of the National Housing Act."

(3) Section 5(c) of the Home Owners Loan Act of 1933 is amended by adding at the end thereof the following new paragraph:

"Without regard to any other provision of this subsection, any such association may, to such extent as the Federal Home Loan Bank Board may by regulation permit, invest in loans, and interests in loans, secured by mortgages as to which the association has the benefit of insurance under title X of the National Housing Act or of a commitment or agreement for such insurance, and investments under this sentence shall not be included in any percentage of assets or other percentage referred to in this subsection."

Extension of insurance authorizations

SEC. 202. (a) Section 2(a) of the National Housing Act is amended by striking out "October 1, 1965" and inserting in lieu thereof "October 1, 1969".

(b) Section 217 of such Act is amended—

(1) by striking out "title VIII" and inserting in lieu thereof "title VIII, or title X", and

(2) by striking out "October 1, 1965" and inserting in lieu thereof "October 1, 1969".

(c) The second sentences of sections 809 (f) and 810(k) of such Act are each amended by striking out "October 1, 1965" and inserting in lieu thereof "October 1, 1969".

Multifamily mortgage limits for four or more bedroom units

SEC. 203. (a) Section 207(c)(3) of the National Housing Act is amended—

(1) by striking out "and \$18,500 per family unit with three or more bedrooms" and inserting in lieu thereof "\$18,500 per family unit with three bedrooms, and \$21,000 per family unit with four or more bedrooms"; and

(2) by striking out "and \$22,500 per family unit with three or more bedrooms" and inserting in lieu thereof "\$22,500 per family unit with three bedrooms, and \$25,500 per family unit with four or more bedrooms".

(b)(1) Section 213(b)(2) of such Act is amended—

(A) by striking out "and \$18,500 per family unit with three or more bedrooms" and inserting in lieu thereof "\$18,500 per family unit with three bedrooms, and \$21,000 per family unit with four or more bedrooms"; and

(B) by striking out "and \$22,500 per family unit with three or more bedrooms" and inserting in lieu thereof "\$22,500 per family unit with three bedrooms, and \$25,500 per family unit with four or more bedrooms".

(2) Section 213(c) of such Act is amended by striking out "and not to exceed" and all that follows and inserting in lieu thereof the following: "and not to exceed a sum computed on the basis of a separate mortgage for each single-family dwelling (irrespective of whether such dwelling has a party wall or is otherwise physically connected with another dwelling or dwellings) comprising the property or project, equal to the total of each of the maximum principal obligations of such mortgages which would meet the requirements of section 203(b)(2) if the mortgagor were the owner and occupant who had made any required payment on account of the property prescribed in such paragraph."

(c) Section 220(d)(3)(B)(iii) of such Act is amended—

(1) by striking out "and \$18,500 per family unit with three or more bedrooms" and inserting in lieu thereof "\$18,500 per family unit with three bedrooms, and \$21,000 per family unit with four or more bedrooms"; and

(2) by striking out "and \$22,500 per family unit with three or more bedrooms" and inserting in lieu thereof "\$22,500 per family unit with three bedrooms, and \$25,500 per family unit with four or more bedrooms".

(d) Section 221(d) of such Act is amended—

(1) by striking out "and \$17,000 per family unit with three or more bedrooms" in

paragraphs (3)(ii) and (4)(ii) and inserting in lieu thereof "\$17,000 per family unit with three bedrooms, and \$19,250 per family unit with four or more bedrooms"; and

(2) by striking out "and \$20,000 per family unit with three or more bedrooms" in paragraphs (3)(ii) and (4)(ii) and inserting in lieu thereof "\$20,000 per family unit with three bedrooms, and \$22,750 per family unit with four or more bedrooms".

(e) Section 231(c)(2) of such Act is amended—

(1) by striking out "and \$17,000 per family unit with three or more bedrooms" and inserting in lieu thereof "\$17,000 per family unit with three bedrooms, and \$19,250 per family unit with four or more bedrooms"; and

(2) by striking out "and \$20,000 per family unit with three or more bedrooms" and inserting in lieu thereof "\$20,000 per family unit with three bedrooms, and \$22,750 per family unit with four or more bedrooms".

(f) Section 234(e)(3) of such Act is amended—

(1) by striking out "and \$18,500 per family unit with three or more bedrooms" and inserting in lieu thereof "\$18,500 per family unit with three bedrooms, and \$21,000 per family unit with four or more bedrooms"; and

(2) by striking out "and \$22,500 per family unit with three or more bedrooms" and inserting in lieu thereof "\$22,500 per family unit with three bedrooms, and \$25,500 per family unit with four or more bedrooms".

Rehabilitation in urban renewal areas

SEC. 204. Section 220(d)(3)(A) of the National Housing Act is amended—

(1) by striking out the second proviso in clause (i); and

(2) by striking out clause (ii) and inserting in lieu thereof the following:

"(i) in a case where the mortgagor is not the occupant of the property and intends to hold the property for rental purposes, have a principal obligation in an amount not to exceed 93 per centum of the amount computed under the provisions of clause (1);

"(iii) in a case where the mortgagor is not the occupant of the property and intends to hold the property for the purpose of sale, have a principal obligation in an amount not to exceed 85 per centum of the amount computed under the provisions of clause (1), or in the alternative, in an amount equal to the amount computed under the provisions of clause (f) if the mortgagor and mortgagee assume responsibility in a manner satisfactory to the Commissioner for the reduction of the mortgage by an amount not less than 15 per centum of the outstanding principal amount thereof, or by such greater amount as may be required to meet the limitations of clause (iv), in the event the mortgaged property is not, prior to the due date of the eighteenth amortization payment of the mortgage, sold to a purchaser acceptable to the Commissioner who is the occupant of the property and who assumes and agrees to pay the mortgage indebtedness; and

"(iv) in no case involving refinancing (except as provided in clause (iii)) have a principal obligation in an amount exceeding the sum of the estimated cost of repair and rehabilitation and the amount (as determined by the Commissioner) required to refinance existing indebtedness secured by the property or project, plus any existing indebtedness incurred in connection with improving, repairing, or rehabilitating the property; or".

Nondwelling facilities for urban renewal housing

SEC. 205. Section 220(d)(3)(B) of the National Housing Act is amended by striking out clause (iv) and inserting in lieu thereof the following:

"(iv) include such nondwelling facilities as the Commissioner deems desirable and consistent with the urban renewal plan: *Provided*, That the project shall be predominantly residential and any nondwelling facility included in the mortgage shall be found by the Commissioner to contribute to the economic feasibility of the project."

Larger insured mortgages for servicemen

SEC. 206. Section 222(b) of the National Housing Act is amended—

(1) by striking out "\$20,000" in paragraph (2) and inserting in lieu thereof "\$30,000"; and

(2) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) have a principal obligation not in excess of the amount derived by applying the maximum ratio of loan to value prescribed in the first sentence of section 203 (b)(2); and".

Refinancing of insured mortgages

SEC. 207. Section 223(a)(7) of the National Housing Act is amended by striking out "section 608 of title VI prior to the effective date of the Housing Act of 1954 or under section 220, 221, 903, or section 908" and inserting in lieu thereof "this Act".

Consolidation of FHA insurance funds

SEC. 208. Title V of the National Housing Act is amended by adding at the end thereof the following new section:

"Establishment of general insurance fund"

"SEC. 519. (a) There is hereby created a General Insurance Fund which shall be used by the Commissioner, on and after the date of the enactment of the Housing and Urban Development Act of 1965, as a revolving fund for carrying out all the insurance provisions of this Act with the exception of those specified in subsection (e). All mortgages or loans insured under this Act pursuant to commitments issued on or after the date of the enactment of the Housing and Urban Development Act of 1965, except those specified in subsection (e), and all loans reported for insurance under section 2 on or after the date of the enactment of the Housing and Urban Development Act of 1965, shall be insured under the General Insurance Fund. The Commissioner shall transfer to the General Insurance Fund—

"(1) the assets and liabilities of all insurance accounts and funds, except the Mutual Mortgage Insurance Fund, existing under this Act immediately prior to the enactment of the Housing and Urban Development Act of 1965;

"(2) all outstanding commitments for insurance issued prior to the date of the enactment of the Housing and Urban Development Act of 1965, except those specified in subsection (e);

"(3) the insurance on all mortgages and loans insured prior to the date of the enactment of the Housing and Urban Development Act of 1965, except insurance specified in subsection (e); and

"(4) the insurance of all loans made by approved financial institutions pursuant to section 2 prior to the date of the enactment of the Housing and Urban Development Act of 1965.

"(b) The general expenses of the operations of the Federal Housing Administration relating to mortgages and loans which are the obligation of the General Insurance Fund may be charged to the General Insurance Fund.

"(c) Moneys in the General Insurance Fund not needed for the current operations of the Federal Housing Administration with respect to mortgages and loans which are the obligation of the General Insurance Fund shall be deposited with the Treasurer of the United States to the credit of such Fund, or invested in bonds or other obligations of, or in bonds or other obligations guaranteed as to principal and interest by, the United States. The Commissioner may,

with the approval of the Secretary of the Treasury, purchase in the open market debentures issued as obligations of the General Insurance Fund or issued prior to the enactment of the Housing and Urban Development Act of 1965 under other provisions of this Act, except debentures issued under the Mutual Mortgage Insurance Fund. Such purchases shall be made at a price which will provide an investment yield of not less than the yield obtainable from other investments authorized by this section. Debentures so purchased shall be canceled and not reissued.

"(d) Premium charges, adjusted premium charges, and appraisal and other fees received on account of the insurance of any mortgage or loan which is the obligation of the General Insurance Fund, the receipts derived from the property covered by such mortgages and loans and from the claims, debts, contracts, property, and security assigned to the Commissioner in connection therewith, and all earnings on the assets of the Fund shall be credited to the General Insurance Fund. The principal of, and interest paid and to be paid on, debentures which are the obligation of such Fund, and cash insurance payments and adjustments, and expenses incurred in the handling, management, renovation, and disposal of properties acquired, in connection with mortgages and loans which are the obligation of such Fund, shall be charged to such Fund.

"(e) The General Insurance Fund shall not be used for carrying out the provisions of sections 203(b), 203(h), and 203(i), or the provisions of section 213 to the extent that they involve mortgages the insurance for which is the obligation of the Cooperative Management Housing Insurance Fund created by section 213(k); and nothing in this section shall apply to or affect any mortgages, loans, commitments, or insurance under such provisions."

Mutuality for management-type cooperatives

SEC. 209. (a) Section 213 of the National Housing Act is amended by adding at the end thereof the following new subsections:

"(k) There is hereby created a Cooperative Management Housing Insurance Fund (hereinafter referred to as the 'Management Fund'). The Management Fund shall be used by the Commissioner as a revolving fund for carrying out the provisions of this section with respect to mortgages or loans insured, on or after the date of the enactment of this subsection, under subsections (a)(1), (a)(3) (if the project is acquired by a cooperative corporation), (i), and (j). The Management Fund shall also be used as a revolving fund for mortgages, loans, and commitments transferred to it pursuant to subsection (m). The Commissioner is directed to transfer to the Management Fund from the General Insurance Fund established pursuant to section 519 such amount as the Commissioner determines to be necessary and appropriate. General expenses of operation of the Federal Housing Administration relating to mortgages or loans which are the obligation of the Management Fund may be charged to the Management Fund.

"(l) The Commissioner shall establish in the Management Fund, as of the date of the enactment of this subsection, a General Surplus Account and a Participating Reserve Account. The aggregate net income thereafter received or any net loss thereafter sustained by the Management Fund, in any semiannual period, shall be credited or charged to the General Surplus Account or the Participating Reserve Account or both in such manner and amounts as the Commissioner may determine to be in accord with sound actuarial and accounting practice. Upon termination of the insurance obligation of the Management Fund by payment of any mortgage or loan insured under this section, and at such time or times prior to

such termination as the Commissioner may determine, the Commissioner is authorized to distribute to the mortgagor or borrower a share of the Participating Reserve Account in such manner and amount as the Commissioner shall determine to be equitable and in accordance with sound actuarial and accounting practice: *Provided*, That in no event shall the amount of the distributable share exceed the aggregate scheduled annual premiums of the mortgagor or borrower to the year of payment of the share less the total amount of any share or shares previously distributed by the Commissioner to the mortgagor or borrower: *And provided further*, That in no event may a distributable share be distributed until any funds transferred from the General Insurance Fund to the Management Fund pursuant to subsection (k) or (o) have been repaid in full to the General Insurance Fund. No mortgagor, mortgagee, borrower, or lender shall have any vested right in a credit balance in any such account or be subject to any liability arising out of the mutuality of the Management Fund. The determination of the Commissioner as to the amounts to be paid by him to any mortgagor or borrower shall be final and conclusive.

"(m) The Commissioner is authorized to transfer to the Management Fund commitments for insurance issued under subsections (a)(1), (i), and (j) prior to the date of the enactment of this subsection, and to transfer to the Management Fund the insurance of any mortgage or loan insured prior to the date of the enactment of this subsection under subsection (a)(1), (a)(3) (if the project is acquired by a cooperative corporation), (i), or (j), but only in cases where the consent of the mortgagee or lender to the transfer is obtained or a request by the mortgagee or lender for the transfer is received by the Commissioner within such period of time after the date of the enactment of this subsection as the Commissioner shall prescribe: *Provided*, That the insurance of any mortgage or loan shall not be transferred under the provisions of this subsection if on the date of the enactment of this subsection the mortgage or loan is in default and the mortgagee or lender has notified the Commissioner in writing of its intention to file an insurance claim. Any insurance or commitment not so transferred shall continue to be an obligation of the General Insurance Fund.

"(n) Notwithstanding the limitations contained in other provisions of this Act, premium charges for mortgages or loans insured under this section and sections 207, 231, and 232 may be payable in debentures issued in connection with mortgages or loans transferred to the Management Fund or in connection with mortgages or loans insured pursuant to commitments transferred to the Management Fund, as provided in subsection (m) of this section.

"(o) Notwithstanding any other provision of this Act, the Commissioner is authorized to transfer funds between the Cooperative Management Housing Insurance Fund and the General Insurance Fund in such amounts and at such times as he may determine, taking into consideration the requirements of each such Fund, to assist in carrying out effectively the insurance programs for which such Funds were respectively established."

(b) Section 213 of such Act is further amended—

(1) by inserting before the period at the end of subsection (a) the following: "*Provided*, That as applied to mortgages the mortgage insurance for which is the obligation of the Management Fund, the reference to the General Insurance Fund in section 207 (b)(2) shall be construed to refer to the Management Fund"; and

(2) by inserting before the period at the end of subsection (e) the following: "*Provided*, That as applied to mortgages or loans

the insurance for which is the obligation of the Management Fund (1) all references to the General Insurance Fund shall be construed to refer to the Management Fund, and (2) all references to section 207 shall be construed to refer to subsections (a)(1), (a)(3) (if the project involved is acquired by a cooperative corporation), (i), and (j) of this section".

Optional cash payment of insurance benefits

SEC. 210. Title V of the National Housing Act is amended by adding at the end thereof (after the new section added by section 208 of this Act) the following new section:

"Optional cash payment of insurance benefits"

"Sec. 520. (a) Notwithstanding any other provisions of this Act with respect to the payment of insurance benefits, the Commissioner is authorized, in his discretion, to pay in cash or in debentures any insurance claim or part thereof which is paid on or after the date of the enactment of the Housing and Urban Development Act of 1965 on a mortgage or a loan which was insured under any section of this Act either before or after such date. If payment is made in cash, it shall be in an amount equivalent to the face amount of the debentures that would otherwise be issued plus an amount equivalent to the interest which the debentures would have earned, computed to a date to be established pursuant to regulations issued by the Commissioner.

"(b) The Commissioner is authorized to borrow from the Treasury from time to time such amounts as the Commissioner shall determine are necessary to make payments in cash (in lieu of issuing debentures guaranteed by the United States, as provided in this Act) pursuant to the provisions of this section. Notes or other obligations issued by the Commissioner in borrowing under this subsection shall be subject to such terms and conditions as the Secretary of the Treasury may prescribe. Each sum borrowed pursuant to this subsection shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such notes or other obligations."

FHA mortgage financing for veterans

SEC. 211. Section 203(b)(2) of the National Housing Act is amended—

(1) by striking out "and not to exceed" and inserting in lieu thereof "and (except as provided in the last sentence of this paragraph) not to exceed"; and

(2) by adding at the end thereof the following new sentence: "If the mortgagor is a veteran (as defined in section 101(2) of title 38, United States Code) who has not received any direct, guaranteed, or insured loan under laws administered by the Veterans' Administration for the purchase, construction, or repair of a dwelling (including a farm dwelling) which was to be owned and occupied by him as his home, and the mortgage to be insured under this section covers property upon which there is located a dwelling designed principally for a one-family residence, the principal obligation may be in an amount equal to the sum of (i) 100 per centum of \$20,000 of the appraised value of the property as of the date the mortgage is accepted for insurance, and (ii) 85 per centum of such value in excess of \$20,000."

Mortgage limit for homes in outlying areas under FHA section 203(i) program

SEC. 212. Section 203(i) of the National Housing Act is amended by striking out "\$11,000" and inserting in lieu thereof "\$12,500".

TITLE III—URBAN RENEWAL

Study of housing and building codes, zoning, tax policies, and development standards

SEC. 301. (a) The Congress finds that the general welfare of the Nation requires that local authorities be encouraged and aided to prevent slums, blight, and sprawl, preserve natural beauty, and provide for decent, durable housing so that the goal of a decent home and a suitable living environment for every American family may be realized as soon as feasible. The Congress further finds that there is a need to study housing and building codes, zoning, tax policies, and development standards in order to determine how (1) local property owners and private enterprise can be encouraged to serve as large a part as they can of the total housing and building need, and (2) Federal, State, and local governmental assistance can be so directed as to place greater reliance on local property owners and private enterprise and enable them to serve a greater share of the total housing and building need. The Housing and Home Finance Administrator is therefore directed to study the structure of (1) State and local urban and suburban housing and building laws, standards, codes, and regulations and their impact on housing and building costs, how they can be simplified, improved, and enforced, at the local level, and what methods might be adopted to promote more uniform building codes and the acceptance of technical innovations including new building practices and materials; (2) State and local zoning and land use laws, codes, and regulations, to find ways by which States and localities may improve and utilize them in order to obtain further growth and development; and (3) Federal, State, and local tax policies with respect to their effect on land and property cost and on incentives to build housing and make improvements in existing structures.

(b) The Administrator shall submit a report based on such study to the President and to the Congress within 18 months after the enactment of the Housing and Urban Development Act of 1965 or the appropriation of funds for the study, whichever is later.

(c) There are authorized to be appropriated such funds as may be necessary to carry out the purposes of this section. Any funds so appropriated shall remain available until expended.

General neighborhood renewal plans

SEC. 302. Section 102(d) of the Housing Act of 1949 is amended—

(1) by striking out the fifth sentence and inserting in lieu thereof the following:

"In order to facilitate proper preliminary planning for the attainment of the urban renewal objectives of this title, the Administrator may also make advances of funds (in addition to those authorized above) to local public agencies for the preparation of General Neighborhood Renewal Plans (as herein defined). A General Neighborhood Renewal Plan may be prepared for an area which consists of an urban renewal area or areas together with any adjoining areas, and which is of such size that the urban renewal activities in the urban renewal area or areas may have to be carried out in stages, consistent with the capacity and resources of the respective local public agency or agencies, over an estimated period of not more than ten years."; and

(2) by striking out clause (1) of the sixth sentence and inserting in lieu thereof the following:

"(1) in the interest of sound community planning it is desirable that the urban renewal activities proposed for the area be planned in their entirety";

Increase in authorization for capital grants

SEC. 303. (a) The first sentence of section 103(b) of the Housing Act of 1949 is

amended by striking out "\$4,725,000,000" and inserting in lieu thereof "\$4,700,000,000, which amount shall be increased by \$675,000,000 on the date of the enactment of the Housing and Urban Development Act of 1965, by \$725,000,000 on July 1, 1966, and by \$750,000,000 on July 1, in each of the years 1967 and 1968".

(b) The proviso in the first sentence of section 103(b) of such Act, and the second sentence of section 6(b) of the Urban Mass Transportation Act of 1964, are repealed.

Use of grant or loan funds in code enforcement and rehabilitation projects

SEC. 304. The unnumbered paragraph immediately following clause (8) in section 110(c) of the Housing Act of 1949 is amended—

(1) by inserting "(A)" before "no contract"; and

(2) by inserting before the period at the end of the paragraph the following: ", and (B) not less than 10 per centum of the aggregate amount of (i) grants authorized to be contracted for under this title by the Housing and Urban Development Act of 1965 and subsequent Acts, and (ii) loans authorized to be made under section 312 of the Housing Act of 1964, shall be available for projects assisted with such grants or loans which involve primarily code enforcement and rehabilitation".

Strengthened workable program requirement

SEC. 305. Section 101 of the Housing Act of 1949 is amended by adding at the end thereof the following new subsection:

"(e) No loan or grant contract may be entered into by the Administrator for an urban renewal project unless he determines that (A) the workable program for community improvement presented by the locality pursuant to subsection (c) is of sufficient scope and content to furnish a basis for evaluation of the need for the urban renewal project; and (B) such project is in accord with the program."

Rehabilitation loans

SEC. 306. (a) Section 312(d) of the Housing Act of 1964 is amended to read as follows:

"(d) In order to provide moneys for loans in accordance with this section, the Administrator is authorized to establish a revolving fund which shall comprise all moneys heretofore or hereafter appropriated pursuant to this section, together with all repayments and other receipts heretofore or hereafter received in connection with loans made under this section. There are authorized to be appropriated to such revolving fund, in addition to amounts authorized for the purposes of this section prior to the date of the enactment of the Housing and Urban Development Act of 1965, such funds as may be necessary to carry out the purposes of this section. All funds so appropriated shall remain available until expended."

(b) Section 312 of such Act is further amended by adding at the end thereof the following new subsection:

"(h) No loan shall be made under the authority of this section after October 1, 1969, except pursuant to a contract, commitment, or other obligation entered into pursuant to this section before that date."

Lease guaranties for small-business concerns displaced by urban renewal projects

SEC. 307. (a) Section 7 of the Small Business Act is amended by adding at the end thereof the following new subsection:

"(e)(1) The Administration also is empowered, in order to assist small-business concerns which have been displaced by urban renewal projects in obtaining leases of property for use in the conduct of their business operations, to insure the owner or lessor of any such property, or the lending institution

financing the construction thereof, against losses which such owner, lessor, or institution might sustain as a result of the failure of the small-business concern to perform the lease in accordance with its terms.

"(2) No insurance under this subsection shall be granted by the Administration with respect to any lease unless—

"(A) the lease is for a period of not more than ten years and contains or is subject to such other terms and conditions as the Administration may require in order to protect the interests of the small-business concern and to insure that the lease will assist in carrying out the purpose of this Act; and

"(B) the small-business concern is financially sound and efficiently managed, and has provided satisfactory assurances that it will comply with the terms of the lease and any related documents and with such additional terms and conditions as the Administration may specify.

"(3) There is hereby established an insurance fund for use by the Administration in carrying out this subsection. Each person granted insurance under this subsection shall be required to pay premiums for such insurance, at such times and in such manner as may be prescribed by the Administration, in amounts which shall be fixed by the Administration but which shall not exceed, in the case of any lease, an amount equivalent to 1 per centum of the annual rental (or minimum rental) payable under such lease. Such premiums, together with any other receipts under the insurance program established by this subsection, shall be placed in the insurance fund. Moneys in such fund not needed for the payment of current operating expenses of the insurance program or for the payment of claims arising thereunder may be invested in bonds or other obligations of, or bonds or other obligations guaranteed as to principal and interest by, the United States; except that moneys made available to provide initial capital for such fund under the sixth sentence of section 4(c) shall be returned to the revolving fund established by such section, in such amounts and at such times as the Administration determines to be appropriate, whenever the level of such insurance fund (by reason of premiums and receipts from other sources) is sufficiently high to permit the return of such moneys without danger to the solvency of the insurance program under this subsection.

"(4) The Administration is authorized and directed to prescribe such rules and regulations as may be necessary to carry out this subsection."

(b) Section 4(c) of such Act is amended—

(1) by inserting "7(e)," after "7(b)," in the first sentence; and

(2) by inserting after the fifth sentence the following new sentence: "Not to exceed \$5,000,000 shall be made available to provide initial capital for the insurance fund established by section 7(e) (3)."

(c) Section 5(b) of such Act is amended—

(1) by inserting after "loans granted" in paragraphs (2) and (3) the following: "or the performance of leases insured";

(2) by striking out "loans made" each place it appears in paragraphs (4) and (7) and inserting in lieu thereof "loans made or leases insured"; and

(3) by striking out "and 7(b)" in paragraph (5) and inserting in lieu thereof "7(b), and 7(e)".

Relocation of displacees from urban renewal areas

SEC. 308. (a) Section 105(c) of the Housing Act of 1949 is amended to read as follows:

"(c) There shall be a feasible method for the temporary relocation of individuals and families displaced from the urban renewal area, and there are or are being provided, in the urban renewal area or in other areas not

generally less desirable in regard to public utilities and public and commercial facilities and at rents or prices within the financial means of the individuals and families displaced from the urban renewal area, decent, safe, and sanitary dwellings equal in number to the number of and available to such displaced individuals and families and reasonably accessible to their places of employment. The Administrator shall issue rules and regulations to aid in implementing the requirements of this subsection and in otherwise achieving the objectives of this title. Such rules and regulations shall require that there be established, at the earliest practicable time, for each urban renewal project involving the displacement of individuals, families, and business concerns occupying property in the urban renewal area, a relocation assistance program which shall include such measures, facilities, and services as may be necessary or appropriate in order (A) to determine the needs of such individuals, families, and business concerns for relocation assistance; (B) to provide information and assistance to aid in relocation and otherwise minimize the hardships of displacement, including information as to real estate agencies, brokers, and boards in or near the urban renewal area which deal in residential or business property that might be appropriate for the relocating of displaced individuals, families, and business concerns; and (C) to assure the necessary coordination of relocation activities with other project activities and other planned or proposed governmental actions in the community which may affect the carrying out of the relocation program, particularly planned or proposed low-rent housing projects to be constructed in or near the urban renewal area. As a condition to further assistance after the enactment of this sentence with respect to each urban renewal project involving the displacement of individuals and families, the Administrator shall require, within a reasonable time prior to actual displacement, satisfactory assurance by the local public agency that decent, safe, and sanitary dwellings as required by the first sentence of this subsection are available for the relocation of each such individual or family."

(b) The requirements imposed by the amendment made by subsection (a) of this section shall not be applicable to any project receiving Federal recognition prior to the date of the enactment of this Act.

Redevelopment in accordance with urban renewal plan

SEC. 309. Section 106 of the Housing Act of 1949 is amended by adding at the end thereof the following new subsection:

"(h) Notwithstanding any other provision of this title, no contract shall be entered into for any loan or capital grant under this title with any local public agency unless the local public agency establishes, by evidence satisfactory to the Administrator, that any urban renewal project with respect to which such local public agency has received a loan or capital grant under this title has been, or will be, undertaken and carried out in substantial accordance with the urban renewal plan, and any amendments thereto, approved with respect to such project, and the terms of the contract for loan or capital grant covering such project."

Limitation on noncash grant-in-aid credit allowed for publicly owned parking facilities

SEC. 310. The parenthetical phrase in clause (3) of the first sentence of section 110(d) of the Housing Act of 1949 is amended by striking out "and" and inserting in lieu thereof a comma, and by inserting at the end thereof (within the parentheses) the following: ", and publicly owned parking facilities to the extent that the cost thereof is anticipated to be recovered from revenues".

Eligibility of communities in depressed areas for urban renewal assistance

SEC. 311. (a) Subparagraph (B) of section 103(a) (2) of the Housing Act of 1949 is amended to read as follows:

"(B) three-fourths of the aggregate net project costs of any such projects which are located in (i) a municipality having a population of fifty thousand or less according to the most recent decennial census, or (ii) a municipality situated in a labor market area which, at the time the contract or contracts involved are entered into or at such earlier time as the Administrator may specify in order to avoid hardship, is designated as a redevelopment area under the second sentence of section 5(a) of the Area Redevelopment Act or any other legislation enacted after the date of the enactment of the Housing and Urban Development Act of 1965 containing standards for designation as a redevelopment area generally comparable to those set forth in the second sentence of section 5(a) of the Area Redevelopment Act, and"

(b) The amendment made by subsection (a) shall apply only with respect to urban renewal projects placed under contract for capital grant on or after the date of the enactment of this Act; except that such amendment shall apply with respect to all urban renewal projects in the city of Providence, Rhode Island, placed under contract for capital grant during the period Providence was designated as a redevelopment area under section 5(a) of the Area Redevelopment Act (or at such earlier time as the Administrator may specify in order to avoid hardship) and not completed prior to the date of the enactment of this Act.

Local grants-in-aid for urban renewal project in Philadelphia

SEC. 312. Notwithstanding any other provision of law, moneys heretofore expended by the University of Pennsylvania for land included in the overall development plan proposed by the university and utilized, or to be utilized, in connection with new university facilities within one mile of urban renewal project Pennsylvania 5-3 (University City) shall (if otherwise eligible) be allowed as local grants-in-aid for such project.

TITLE IV—COMPENSATION OF CONDEMNNEES

Declaration of policy

SEC. 401. In order to encourage the acquisition of real property in a manner which affords fair and equitable treatment to owners and tenants of such property and on as nearly uniform a basis as practicable, the Congress hereby establishes a Federal policy of uniform land acquisition procedures for real property to be acquired in the course of Federally assisted development programs.

Definitions

SEC. 402. For the purposes of this title—

(1) the term "development program" means any program established by or conducted under any of the following provisions of law:

- (A) the United States Housing Act of 1937;
- (B) title I of the Housing Act of 1949;
- (C) title IV of the Housing Act of 1950;
- (D) title II of the Housing Amendments of 1955;
- (E) section 202 of the Housing Act of 1959; and

(F) title VII of the Housing Act of 1961;

(2) the term "Federal assistance" means a grant, loan, contract of guaranty, annual contribution, or other assistance provided by the United States:

(3) the term "applicant" means any public body or other agency or nonprofit institution authorized to receive Federal assistance under a development program;

(4) the term "interest" means any interest in real property and includes future, nonpossessory, and leasehold interests;

(5) the term "real property" means any

land, or any interest in land, and (A) any building, structure, or other improvements embedded in or affixed to land, and any article so affixed or attached to such building, structure, or improvement as to be an essential or integral part thereof; (B) any article affixed or attached to such real property in such manner that it cannot be removed without material injury to itself or the real property; and (C) any article so designed, constructed, or specially adapted to the purpose for which such real property is used that (i) it is an essential accessory or part of such real property, (ii) it is not capable of use elsewhere, and (iii) it would lose substantially all its value if removed from the real property; and

(6) the term "Administrator" means the Housing and Home Finance Administrator.

Land acquisition policy

SEC. 403. (a) As a condition of eligibility for Federal assistance pursuant to a development program, each applicant for such assistance shall satisfy the Administrator that the following policies will be followed in connection with the acquisition of real property by eminent domain in the course of such program—

(1) the applicant shall make every reasonable effort to acquire the real property by negotiated purchase;

(2) the real property shall be appraised before the initiation of negotiations, and the owner or his designated representative shall be given an opportunity to accompany the appraiser during his inspection of the property;

(3) before the initiation of negotiations for acquisition of real property, the applicant shall establish a price believed to be fair and reasonable and shall offer to acquire the property for the price so established;

(4) if only a part of or an interest less than a fee title to real property is to be acquired, the applicant shall provide the owner with a statement of its estimate of—

(A) the fair value of the entire property immediately before the acquisition,

(B) the fair value of the property remaining immediately after the acquisition,

(C) the fair value of the part of or interest in the property actually acquired,

(D) the damages, if any, resulting to the remaining property (or interest therein), and

(E) the benefits, if any, accruing to the remaining property (or interest therein);

(5) no owner shall be required to surrender possession of real property before the applicant pays to the owner (A) the agreed purchase price arrived at by negotiation, or (B) in any case where only the amount of the payment to the owner is in dispute, not less than 75 per centum of the most recent fair and reasonable price established under paragraph (3);

(6) the construction or development of any public improvements shall be so scheduled that no person lawfully occupying the real property shall be required to surrender possession on account of such construction or development without at least 90 days' written notice from the applicant of the date on which such construction or development is scheduled to begin;

(7) if the applicant does not require the use of a building, structure, or other improvement on the real property to be acquired, the applicant shall offer to permit its owner to remove it upon agreement that the fair value of the building, structure, or other improvement to be removed from the real property, as determined by the applicant, will be deducted from the compensation otherwise to be paid for the real property, or will be paid to the applicant by the owner;

(8) if the applicant permits an owner or tenant to rent acquired real property for a short term or for a period subject to termination by the applicant on short notice, the

amount of rent required shall not exceed the fair rental value of the property to the owner or tenant for such term or period, as determined by the applicant;

(9) the applicant shall not advance the time of eminent domain, nor defer eminent domain or the deposit of funds in court for the benefit of the owner, in order to compel an agreement on the price to be paid for the real property;

(10) if the acquisition of only a part of any real property would leave its owner with an uneconomic remnant, the applicant shall acquire the entire property; and

(11) in determining the boundaries of a proposed public improvement, the applicant shall take into account human considerations, including the economic and social effects of the proposed public improvement on owners and tenants of real property in the area, in addition to engineering and other factors.

(b) Nothing in this section shall be construed as superseding or otherwise affecting the provisions of any State or local law, or as affecting the validity of any property acquisition by purchase or eminent domain.

Relocation payments under federally assisted development programs

SEC. 404. (a) To the extent not otherwise authorized under any Federal law, financial assistance extended to an applicant under any federally assisted development program may include grants for relocation payments, as herein defined. Such grants may be in addition to other financial assistance under such federally assisted development programs, and may cover the full amount of such relocation payments. The term "relocation payments" means payments by the applicant which are (1) made to an individual, family, business concern, or nonprofit organization displaced by a project on or after the date of the enactment of the Housing and Urban Development Act of 1965, and (2) made on such terms and conditions and subject to such limitations (to the extent applicable, but not including the date of displacement) as are provided for relocation payments, at the time such payments are approved, by sections 114 (b), (c), and (d) of the Housing Act of 1949 with respect to projects assisted under title I thereof. Relocation payments authorized by this subsection shall be made subject to such rules and regulations as may be prescribed by the Administrator.

(b) Section 114(b) (2) of the Housing Act of 1949 is amended by striking out "\$1,500" and inserting in lieu thereof "\$2,500".

(c) (1) Section 114 of such Act is further amended by redesignating subsection (d) as subsection (e) and by inserting after subsection (c) the following new subsection:

"(d) In addition to payments authorized to be made under subsections (b) and (c), a local public agency may pay to any displaced individual, family, business concern, or nonprofit organization reasonable and necessary expenses incurred for (1) recording fees, transfer taxes, and similar expenses incidental to conveying real property to a project assisted under this title, (2) penalty costs for prepayment of any mortgage encumbering such real property, and (3) the pro rata portion of real property taxes allocable to a period subsequent to the date of vesting of title or the effective date of the acquisition of such real property by such agency, whichever is earlier."

(2) Section 15(8) of the United States Housing Act of 1937 is amended by striking out "section 114 (b) or (c)" and inserting in lieu thereof "section 114 (b), (c), and (d)".

(d) Subsection (a) shall not be applicable to any project receiving financial assistance under a development program prior to the date of the enactment of this Act.

Funds for certain payments in eminent domain

SEC. 405. Notwithstanding any other provision of law, financial assistance under any federally assisted development program may include amounts necessary for financing, in the same manner that other costs of a project assisted under such program are financed, the payments described in paragraph (5) (B) of section 403(a) of this Act.

TITLE V—COLLEGE HOUSING

Increase in authorization for college housing loans

SEC. 501. Section 401(d) of the Housing Act of 1950 is amended by striking out "through 1965" each place it appears and inserting in lieu thereof "through 1968".

Interest rate on college housing loans

SEC. 502. (a) Effective with respect to loan contracts entered into after the date of the enactment of this Act, section 401(c) of the Housing Act of 1950 is amended by striking out "the higher of (1) 2½ per centum per annum, or" and inserting in lieu thereof "the lower of (1) 3 per centum per annum, or".

(b) Effective with respect to notes or other obligations financing loan contracts entered into after the date of the enactment of this Act, section 401(e) of such Act is amended by striking out "the higher of (1) 2½ per centum per annum, or" and inserting in lieu thereof "the lower of (1) 2½ per centum per annum, or".

Parking facilities for colleges and universities

SEC. 503. Section 404(h) of the Housing Act of 1950 is amended by adding at the end thereof the following new sentence: "In addition, such term includes parking facilities primarily to serve the needs of students and faculty."

TITLE VI—COMMUNITY FACILITIES

Purpose

SEC. 601. The purpose of this title is to assist and encourage the communities of the Nation fully to meet the needs of their citizens by making it possible, with Federal grant assistance, for their governmental bodies (1) to construct adequate basic water and sewer facilities needed to promote the efficient and orderly growth and development of the communities; and (2) to construct neighborhood facilities needed to enable them to carry on programs of necessary social services.

Grants for basic water and sewer facilities

SEC. 602. (a) The Housing and Home Finance Administrator (hereinafter in this title referred to as the "Administrator") is authorized to make grants to local public bodies and agencies to finance specific projects for basic public water and sewer facilities (including works for the storage, treatment, purification, and distribution of water.)

(b) The amount of any grant made under the authority of this section shall not exceed 50 per centum of the development cost of the project.

(c) No grant shall be made under this section in connection with any project unless the Administrator determines that the project is necessary to provide adequate water or sewer facilities for, and will contribute to the improvement of the health or living standards of, the people in the community to be served, and that the project is (1) designed so that an adequate capacity will be available to serve the reasonably foreseeable growth needs of the area, (2) consistent with a program meeting criteria, established by the Administrator, for a unified or officially coordinated areawide water or sewer facilities system as part of the comprehensively planned development of the area, except that prior to July 1, 1968, grants may, in the dis-

cretion of the Administrator, be made under this section when such a program for an areawide water and sewer facilities system is under active preparation, although not yet completed, if the facility or facilities for which assistance is sought can reasonably be expected to be required as a part of such program, and there is urgent need for the facility or facilities, and (3) necessary to orderly community development.

Grants for neighborhood facilities

SEC. 603. (a) The Administrator is authorized to make grants, in accordance with the provisions of this section, to local public bodies and agencies to finance specific projects for neighborhood facilities.

(b) The amount of any grant made under the authority of this section shall not exceed 66⅔ per centum of the development cost of the project for which the grant is made (or 75 per centum of such cost in the case of a project located in an area which at the time the grant is made is designated as a redevelopment area under section 5 of the Area Redevelopment Act or under any other legislation enacted after the date of the enactment of this Act containing standards for designation as a redevelopment area generally comparable to those set forth in section 5 of the Area Redevelopment Act).

(c) No grant shall be made under this section for any project unless the Administrator determines that the project will provide a neighborhood facility which is (1) necessary for carrying out a program of health, recreational, social, or similar community service (including a community action program approved under title II of the Economic Opportunity Act of 1964) in the area, (2) consistent with comprehensive planning for the development of the community, and (3) so located as to be available for use by a significant portion (or number in the case of large urban places) of the area's low- or moderate-income residents.

(d) For a period of twenty years after a grant has been made under this section for a neighborhood facility, such facility shall not, without the approval of the Administrator, be converted to uses other than those proposed by the applicant in its application for the grant. The Administrator shall not approve any conversion in the use of such a neighborhood facility during such twenty-year period unless he finds that such conversion is in accord with the then applicable program of health, recreational, social, or similar community services in the area and consistent with comprehensive planning for the development of the community in which the facility is located. In approving any such conversion, the Administrator may impose such additional conditions and requirements as he deems necessary.

(e) The Administrator shall give priority to applications for projects designed primarily to benefit members of low-income families or otherwise substantially further the objectives of a community action program approved under title II of the Economic Opportunity Act of 1964.

General provisions

SEC. 604. (a) In the performance of, and with respect to, the functions, powers, and duties vested in him by this title, the Administrator shall (in addition to any authority otherwise vested in him) have the functions, powers, and duties set forth in section 402, except subsections (a), (c) (2), and (f) of the Housing Act of 1950.

(b) The Administrator is authorized, notwithstanding the provisions of section 3648 of the Revised Statutes, to make advance or progress payments on account of any grant made pursuant to this title. No part of any grant authorized to be made by the provisions of this title shall be used for the payment of ordinary governmental operating expenses.

Definitions

SEC. 605. As used in this title—

(a) The term "State" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

(b) The term "local public bodies and agencies" includes public corporate bodies and political subdivisions; public agencies or instrumentalities of one or more States, municipalities, or political subdivisions of one or more States (including public agencies and instrumentalities of one or more municipalities or other political subdivisions of one or more States); Indian tribes; and boards or commissions established under the laws of any State to finance specific capital improvement projects.

(c) The term "development cost", with respect to any facility, means costs of the construction of the facility and the land on which it is located, including necessary site improvements to permit its use as a site for the facility.

Labor standards

SEC. 606. All laborers and mechanics employed by contractors or subcontractors on projects assisted under sections 602 and 603 shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a-276a-5). No such project shall be approved without first obtaining adequate assurance that these labor standards will be maintained upon the construction work. The Secretary of Labor shall have, with respect to the labor standards specified in this section, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 133z-15), and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948; 40 U.S.C. 276c).

Appropriations; termination of program

SEC. 607. (a) There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this title. All funds so appropriated shall remain available until expended.

(b) No grant shall be made under this title after October 1, 1969, except pursuant to a contract or commitment entered into on or before such date.

TITLE VII—FEDERAL NATIONAL MORTGAGE ASSOCIATION

Increase in FNMA special assistance authority

SEC. 701. (a) Section 305(c) of the National Housing Act is amended by inserting before the period at the end thereof the following: "which limit shall be increased by \$100,000,000 on the date of the enactment of the Housing and Urban Development Act of 1965, by \$450,000,000 on July 1, 1966, by \$550,000,000 on July 1, 1967, and by \$525,000,000 on July 1, 1968".

(b) Section 305(f) of such Act is amended by inserting before the period at the end thereof the following: "Provided further, That any portion of the total amount of authority set forth in the first proviso of this subsection which, on the date of the enactment of the Housing and Urban Development Act of 1965 and on each July 1 thereafter, would otherwise be available for making purchases and commitments pursuant to this subsection, shall be transferred to and merged with the authority granted by subsection (a) and added to the amount of such authority as set forth in subsection (c); and the total amount of authority set forth in the first proviso of this subsection shall progressively be reduced by the amount of each such transfer".

Increase in limitation on mortgages for dwelling units having four or more bedrooms

SEC. 702. Section 302(b) of the National Housing Act is amended by inserting before

the period at the end of the first sentence the following: "(plus an additional \$2,500 for each such family residence or dwelling unit which has four or more bedrooms)".

TITLE VIII—OPEN-SPACE LAND AND URBAN BEAUTIFICATION AND IMPROVEMENT

Change in name of program; findings and purpose

SEC. 801. (a) The heading of title VII of the Housing Act of 1961 is amended to read as follows: "TITLE VII—OPEN-SPACE LAND AND URBAN BEAUTIFICATION AND IMPROVEMENT".

(b) Section 701 of such Act is amended by redesignating subsection (b) as subsection (c) and by inserting after subsection (a) the following new subsection:

"(b) The Congress further finds that there is an urgent need both for the additional provision of parks and other open-space areas in the developed portions of the Nation's urban areas and for greater and better coordinated local efforts to beautify and improve open space and other public land throughout urban areas, to facilitate their increased use and enjoyment by the Nation's urban population."

(c) The subsection of section 701 of such Act redesignated as subsection (c) by subsection (b) of this section is amended—

(1) by inserting "(1) provide and" before "preserve open-space land", and

(2) by inserting before the period at the end thereof the following: "and (2) beautify and improve open-space and other public urban land, in accordance with programs to encourage and coordinate local public and private efforts toward this end".

Increased grant level for preservation of open-space land

SEC. 802. Section 702(a) of the Housing Act of 1961 is amended by striking out "20 per centum" and "30 per centum" and inserting in lieu thereof "30 per centum" and "40 per centum", respectively.

Substitution of appropriation authority for grant contract authority

SEC. 803. (a) Section 702(a) of the Housing Act of 1961 is amended—

(1) by striking out "enter into contracts to" in the first sentence, and

(2) by striking out all of the third sentence.

(b) Section 702(b) of such Act is amended by striking out the first two sentences and inserting in lieu thereof the following: "There are hereby authorized to be appropriated such amounts as may be necessary to carry out the purposes of this title."

(c) Section 702 of such Act is further amended by adding at the end thereof the following new subsection:

"(f) No grant shall be made under this title after October 1, 1969, except pursuant to a contract or commitment entered into on or before such date."

(d) Section 703(a) of such Act is amended by striking out "enter into contracts to".

Grants for provision of open-space land in built-up urban areas

SEC. 804. Title VII of the Housing Act of 1961 is amended by redesignating sections 705 and 706 as sections 708 and 709 respectively, and by inserting after section 704 the following new section:

"Grants for provision of open-space land in built-up urban areas"

"SEC. 705. (a) The Administrator is further authorized to make grants to States and local public bodies to help finance the acquisition of title to, or other permanent interests in, developed land in built-up portions of urban areas to be cleared and used as permanent open-space land, as defined herein. The Administrator shall make such grants only where the local governing body determines that adequate open-space land cannot effectively be provided through the use of existing undeveloped or predominantly undeveloped land and the Admin-

istrator determines that the proposed acquisition is important to the comprehensively planned development of the locality. Grants under this section shall not exceed the lesser of (1) \$500,000 or (2) 40 per centum of the cost of acquiring such title or other interests and of necessary demolition and removal of improvements.

"(b) Financial assistance extended to any project under this title may include grants for relocation payments, as herein defined. Such grants may be in addition to other financial assistance under this title, and no part of the amount of such relocation payments shall be required to be contributed as a local grant. The term 'relocation payments' means payments by the applicant which are (1) made to an individual, family, business concern, or nonprofit organization displaced, after March 4, 1965, by a project assisted under this title, (2) not otherwise authorized under any Federal law, and (3) made only on such terms and conditions and subject to such limitations (to the extent applicable, but not including the date of displacement) as are provided for relocation payments, at the time such payments are approved, by sections 114 (b), (c), and (d) of the Housing Act of 1949. Relocation payments authorized by this subsection shall be made subject to such rules and regulations as may be prescribed by the Administrator."

Grants for urban beautification and improvement

SEC. 850. (a) Title VII of the Housing Act of 1961 is further amended by inserting after section 705 (as added by section 804 of this Act) the following new section:

"Grants for urban beautification and improvement"

"SEC. 706. The Administrator is authorized to make grants, as herein provided, to States and local public bodies to assist in carrying out local programs for the greater use and enjoyment of open-space and other public land in urban areas. The Administrator shall establish criteria for such programs to assure that each (1) represents significant and effective efforts, involving all available public and private resources, for the beautification of such land and its improvement for open-space uses, and (2) is important to the comprehensively planned development of the locality. Grants made under this section shall not exceed 40 per centum of the amount by which the cost of the activities carried on by an applicant during a fiscal year under an approved program exceeds its usual expenditures for comparable activities: *Provided*, That, notwithstanding any other provision of this section, the Administrator may use not to exceed \$5,000,000 of the funds available for grants under this section to make grants in amounts up to the full cost of activities which he determines to have special value in developing and demonstrating new and improved methods and materials for use in carrying out the purposes of this section."

(b) Section 702(c) of such Act is amended by inserting after "development costs" the following: "(except as authorized under section 706), or the additional price which is attributable to improvements to be retained on open-space land which are not incidental to the proposed open-space uses."

Labor standards

SEC. 806. Title VII of the Housing Act of 1961 is further amended by inserting after section 706 (as added by section 805 of this Act) the following new section:

"Labor standards"

"SEC. 707. (a) The Administrator shall take such action as may be necessary to insure that all laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed with the assistance of grants under this title shall be paid wages at rates not less than those prevailing on similar construc-

tion in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended. The Administrator shall not approve any such grant without first obtaining adequate assurance that these labor standards will be maintained upon the construction work.

"(b) The Secretary of Labor shall have, with respect to the labor standards specified in subsection (a), the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 1332-15), and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948; 40 U.S.C. 276c)."

Use of funds for studies and publication

SEC. 807. The second sentence of the section of the Housing Act of 1961 redesignated as section 708 by section 804 of this Act is amended to read as follows: "The Administrator is authorized to use during any fiscal year not to exceed \$100,000 of the funds available for grants under this title to undertake such studies and publish such information."

Conforming amendments

SEC. 808. (a) The heading of section 702 of the Housing Act of 1961 is amended to read as follows: "GRANTS FOR PRESERVATION OF OPEN-SPACE LAND".

(b) Section 702(a) of such Act is amended by striking out "provisions of this title" and "purposes of this title" and inserting in lieu thereof "provisions of this section" and "purposes of this section", respectively.

(c) Section 702(e) of such Act is amended by striking out "served by the open-space land acquired" in the second sentence and inserting in lieu thereof "assisted".

(d) Section 703(a) of such Act is amended by striking out "this title" and inserting in lieu thereof "section 702(a)".

(e) Section 704 of such Act is amended by striking out "for which" in the first sentence and inserting in lieu thereof "for the acquisition of which".

TITLE IX—RURAL HOUSING

Loans for previously occupied buildings and minimum site acquisition

SEC. 901. (a) Section 501(a) of the Housing Act of 1949 is amended—

(1) by inserting after "their farms," in clause (1) the following: "and to purchase previously occupied buildings and land constituting a minimum adequate site, in order"; and

(2) by inserting after "rural areas" in clause (2) the following: "for the construction, improvement, alteration, or repair of dwellings, related facilities, and farm buildings and to rural residents for such purposes and for the purchase of previously occupied buildings and the purchase of land constituting a minimum adequate site, in order".

(b) Section 501(c) of such Act is amended by inserting "or a rural resident" in clause (1) after "or that he is the owner of other real estate in a rural area."

Interest rate on direct rural housing loans

SEC. 902. Section 502(a) of the Housing Act of 1949 is amended by striking out "with interest at a rate not to exceed 4 per centum per annum on the unpaid balance of principal," and inserting in lieu thereof the following: "with interest in the case of loans under this section pursuant to clauses (1) and (2) of section 501(a) at a rate not to exceed 5 per centum per annum on the unpaid balance of principal and in the case of loans under this section pursuant to clause (3) of section 501(a) and under sections 503 and 504 at a rate not to exceed 4 per centum per annum on such unpaid balance. Borrowers with loans made or insured under this title shall pay such fees and other charges as the Secretary may require."

Insured rural housing loans

SEC. 903. (a) Title V of the Housing Act of 1949 is amended by adding at the end thereof the following new sections:

"Insurance of loans"

"SEC. 517. (a) The Secretary is authorized to insure and to make loans to be sold and insured in accordance with the provisions of sections 501, 502, 514, and 515, and this section, other than the provisions of section 514(a) (3) and (5) and (b) and section 515 (a) and (b) (4), except that such loans in accordance with sections 501 and 502—

"(1) to persons of low or moderate income as defined by the Secretary shall not exceed amounts necessary to provide adequate housing modest in size, design, and cost, as determined by the Secretary, and shall bear interest at a rate not to exceed 5 per centum per annum; and the aggregate of such loans made and insured in any one fiscal year shall not exceed \$300,000,000; and

"(2) to persons other than those of low or moderate income shall bear interest and provide for insurance or service charges (at rates determined by the Secretary) comparable to the combined rate of interest and premium charges then in effect under section 203 of the National Housing Act.

"(b) The Secretary may use the Rural Housing Insurance Fund created by this section for the purpose of making loans to be sold and insured under this section, provided that the aggregate of such loans made and not disposed of at any one time shall not exceed \$100,000,000.

"(c) The Secretary may insure loans advanced by lenders other than the United States, and may sell and insure loans made from or held in the Rural Housing Insurance Fund by the Secretary, for the payment of principal and interest thereon as it becomes due. The Secretary is authorized to make agreements with respect to servicing loans held by or insured by the Secretary under this section and purchasing such insured loans on such terms and conditions as he may prescribe: *Provided*, That no purchase agreement shall obligate the Secretary to purchase such an insured loan before the expiration of an initial period of five years from the date of the note. Any contract of insurance executed by the Secretary shall be an obligation supported by the full faith and credit of the United States and incontestable except for fraud or material misrepresentation of which the holder has actual knowledge. In connection with loans insured under this section the Secretary may take liens running to the United States notwithstanding the fact that the notes evidencing such loans may be held by lenders other than the United States. Notes evidencing such loans shall be freely assignable but the Secretary shall not be bound by any assignment until notice thereof is given to and acknowledged by the Secretary.

"(d) After ninety days after the original capitalization of the Rural Housing Insurance Fund, no loans, other than loans then held or insured by the Secretary pursuant to section 514 or 515(b), shall be made or insured under section 514 or 515(b) except in accordance with this section.

"(e) There is hereby created the Rural Housing Insurance Fund (hereinafter in this section referred to as the 'Fund') which shall be used by the Secretary as a revolving fund for carrying out the provisions of this section. There are authorized to be appropriated to the Secretary such sums as may be necessary for the purposes of the Fund.

"(f) Money in the Fund not needed for current operations shall be invested in direct obligations of the United States or obligations guaranteed by the United States.

"(g) All funds, claims, notes, mortgages, contracts, and property acquired by the Secretary under this section, and all collections and proceeds therefrom, shall constitute assets of the Fund; and all liabilities and obligations of such assets shall be liabilities and obligations of the Fund. Loans may be held in the Fund and collected in accordance with their terms or may be sold by the Secretary with or without agreements for in-

sureance thereof. Loans may be sold by the Secretary at prices within the range of market prices for the particular class or classes of loans involved, as determined by the Secretary from time to time. The aggregate of (1) any amount by which the balance outstanding on loans at the time of sale exceeds the price at which the loans are sold and (2) the amount of any fees and charges paid in connection with any sales of loans shall be reimbursed to the Fund by annual appropriations.

"(h) The Secretary is authorized to issue notes to the Secretary of the Treasury to obtain funds necessary for discharging obligations under this section and for authorized expenditures out of the Fund, but, except as may be authorized in appropriation Acts, not for the original capital or any additional capital of the Fund or to reimburse the Fund for losses from any sales of loans at less than par value. Such notes shall be in such form and denominations and have such maturities and be subject to such terms and conditions as may be prescribed by the Secretary with the approval of the Secretary of the Treasury. Each note shall bear interest at such rate as may be determined by the Secretary of the Treasury, taking into consideration the current average market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of the loans held by the Secretary in the Fund, adjusted to the nearest one-eighth of 1 per centum, during the month of June preceding the fiscal year in which the loans were made. The Secretary of the Treasury is authorized and directed to purchase any notes of the Secretary issued hereunder, and for that purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, and the purposes for which such securities may be issued under such Act are extended to include purchases of notes issued by the Secretary under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes shall be treated as public debt transactions of the United States. The notes issued by the Secretary to the Secretary of the Treasury shall constitute obligations of the Fund.

"(i) The Secretary may retain out of interest payments by the borrower an annual charge in an amount specified in the insurance or sale agreement applicable to the loan. Of the charges retained by the Secretary, if any, not to exceed 1 per centum per annum of the unpaid balance of the loan shall be deposited in the Fund. Any retained charges not deposited in the Fund shall be available for administrative expenses in carrying out the provisions of this title, to be transferred annually and become merged with any appropriation for administrative expenses of the Farmers Home Administration, when and in such amounts as may be authorized in appropriation Acts.

"(j) The Secretary may also utilize the Fund—

"(1) to pay amounts to which the holder of a note is entitled in accordance with an insurance or sale agreement under this section accruing between the date of any prepayment by the borrower to the Secretary and the date of transmittal of such prepayment to the holder of the note; and, in the discretion of the Secretary, prepayments other than final payments need not be remitted to the holder until due;

"(2) to pay the holder of any note insured under this section any defaulted installment or, upon assignment of the note to the Secretary at the Secretary's request, the entire balance outstanding on the note;

"(3) to purchase notes in accordance with agreements previously entered into;

"(4) to pay taxes, insurance, prior liens, expenses necessary to make fiscal adjustments in connection with the application

and transmittal of collections, and other expenses and advances to protect the security for loans which are insured under this section or held in the Fund, and to acquire such security at foreclosure sale or otherwise; and

"(5) to pay fees and charges in connection with sales by the Secretary of loans insured under this section.

"Rural housing direct loan account"

"SEC. 518. (a) There is hereby created the Rural Housing Direct Loan Account (hereinafter in this section referred to as the 'Account') which shall be used by the Secretary for carrying out the provisions of this section. There are authorized to be appropriated to the Secretary such sums as may be necessary for the purposes of the Account.

"(b) There are hereby transferred to the Account (1) all funds, claims, notes, mortgages, contracts, and property, and all collections and proceeds therefrom, held by the Secretary under the direct loan provisions of this title, including those securing notes issued by the Secretary to the Secretary of the Treasury under section 511 and any unexpended balance of amounts borrowed upon such notes, and (2) all unexpended balances of appropriations for direct loans under this title, including the fund authorized by section 515(a). All amounts hereafter borrowed by the Secretary from the Secretary of the Treasury under section 511 shall be deposited in the Account. All collections and proceeds from assets acquired by the Account shall be deposited in the Account.

"(c) When and in such amounts as may be authorized in appropriation Acts, the Secretary may issue notes to the Secretary of the Treasury to obtain funds to be deposited in the Account. The form, denominations, maturities, and other terms and conditions of such notes shall be prescribed by the Secretary with the approval of the Secretary of the Treasury. Each note shall bear interest at such rate as may be determined by the Secretary of the Treasury, taking into consideration the current average market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of the loans held by the Secretary in the Account, adjusted to the nearest one-eighth of 1 per centum, during the month of June preceding the fiscal year in which the loans were made. The Secretary of the Treasury is authorized and directed to purchase any notes of the Secretary issued hereunder, and for that purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, and the purposes for which such securities may be issued under such Act are extended to include the purchase of notes issued by the Secretary under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes shall be treated as public debt transactions of the United States.

"(d) The Account shall remain available to the Secretary for the payment of interest and principal on notes issued by the Secretary to the Secretary of the Treasury under section 511 or this section, and for direct loans and related advances under this title in such amounts as are now authorized by law and in such further amounts as shall be authorized in appropriation Acts. Amounts so authorized for such loans and advances shall remain available until expended."

(b) Section 511 of such Act is amended—

(1) by inserting "direct" after "making", and by striking out "(other than loans under section 504(b) or 515(a))", in the first sentence;

(2) by striking out ", of which \$50,000,000 shall be available exclusively for assistance to elderly persons as provided in clause (3)

of section 501(a)", and by striking out "September 30, 1965" and inserting in lieu thereof "October 1, 1969", in the second sentence; and

(3) by striking out "rate on outstanding marketable obligations of the United States as of the last day of the month preceding the issuance of the notes or obligations by the Secretary" in the fifth sentence and inserting in lieu thereof the following: "yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of the loans held by the Secretary in the Rural Housing Direct Loan Account, adjusted to the nearest one-eighth of 1 per centum, during the month of June preceding the fiscal year in which the loans were made".

Federal National Mortgage Association secondary market operations for insured rural housing loans

SEC. 904. (a) Section 302(b) of the National Housing Act is amended—

(1) by inserting immediately after "which are insured under the National Housing Act" the following: "or title V of the Housing Act of 1949";

(2) by inserting after "any mortgage" in clause (2) of the proviso the following: ", except a mortgage insured under title V of the Housing Act of 1949"; and

(3) by inserting before the period in the last sentence the following: "or title V of the Housing Act of 1949".

(b) Section 303(b) of such Act is amended by inserting "and other" after "private" in the first sentence.

Extension of rural housing authorizations

SEC. 905. (a) Section 512 of the Housing Act of 1949 is amended by striking out "September 30, 1965" and inserting in lieu thereof "October 1, 1969".

(b) Section 513 of such Act is amended—

(1) by striking out "September 30, 1965" in clause (b) and inserting in lieu thereof "October 1, 1969";

(2) by striking out "\$10,000,000" in clause (c) and inserting in lieu thereof "\$50,000,000", and by striking out "September 30, 1965" in the same clause and inserting in lieu thereof "October 1, 1969"; and

(3) by striking out "September 30, 1965" in clause (d) and inserting in lieu thereof "October 1, 1969".

(c) Section 515(b)(5) of such Act is amended by striking out "September 30, 1965" and inserting in lieu thereof "October 1, 1969".

(d) Section 506(a) of such Act is amended by striking out "sections 501 to 504, inclusive, and sections 514-516", each place it occurs and inserting in lieu thereof "this title".

Payment of interest to the Treasury on appropriations for rural housing loans

SEC. 906. Title V of the Housing Act of 1949 is amended by adding at the end thereof (after the new sections added by section 903 of this Act) the following new section:

"Interest on appropriations for rural housing loans"

"SEC. 519. (a) The Secretary shall pay to the Secretary of the Treasury interest at a rate determined under the formula contained in section 517(h) or 518(c) (as may be applicable) on any portion of any future appropriations deposited in the Rural Housing Insurance Fund or the Rural Housing Direct Loan Account for the purpose of making loans (as distinguished from appropriations for the purpose of restoring losses or expenditures from such Fund or Account). Such interest shall be payable annually upon any sum so deposited until an amount equal to such sum is paid from the Fund or Account to which it was deposited and returned to miscellaneous receipts of the Treasury.

"(b) Any sums in the Rural Housing In-

surance Fund or the Rural Housing Direct Loan Account which the Secretary determines are in excess of amounts needed to meet the obligations and carry out the purposes of such Fund or Account shall be returned to miscellaneous receipts of the Treasury."

TITLE X—MISCELLANEOUS

Authorization for urban planning grants

SEC. 1001. (a) Section 701(b) of the Housing Act of 1954 is amended by striking out "not exceeding \$105,000,000" in the fifth sentence and inserting in lieu thereof "such amounts as may be necessary".

(b) Section 701 of such Act is further amended by adding at the end thereof the following new subsection:

"(g) No grant shall be made under this section after October 1, 1969, except pursuant to a contract or commitment entered into on or before such date."

Authorization for Federal-State training programs

SEC. 1002. (a) Section 802(d) of the Housing Act of 1964 is amended (1) by striking out "for grants under this part", and (2) by striking out "not to exceed \$10,000,000" and inserting in lieu thereof "such amounts as may be necessary to carry out the purposes of this part".

(b) Section 802 of such Act is further amended by adding at the end thereof the following new subsection:

"(e) No grant shall be made under this part after October 1, 1969, except pursuant to a contract or commitment entered into on or before such date."

(c) Section 803 of such Act is amended (1) by striking out "authorized to be", and (2) by striking out "by section 802(d)" and inserting in lieu thereof "for the purposes of this part".

Authorization for Public Works Planning Advances

SEC. 1003. (a) The second sentence of section 702(e) of the Housing Act of 1954 is amended (1) by striking out "Housing Act of 1964" and inserting in lieu thereof "Housing and Urban Development Act of 1965", and (2) by striking out ", not to exceed \$20,000,000,".

(b) Section 702 of such Act is further amended by adding at the end thereof the following new subsection:

"(i) No advance shall be made under this section after October 1, 1969, except pursuant to a contract or commitment entered into on or before such date."

Advisory committees—technical provision

SEC. 1004. Section 601 of the Housing Act of 1949 is amended by striking out the second sentence.

Public facility loans to nonprofit corporations

SEC. 1005. Section 202(c) of the Housing Amendments of 1955 is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provision of this title, the Administrator may extend financial assistance, as otherwise authorized by clause (1) of subsection (a) of this section, to private nonprofit corporations to finance the construction of works for the storage, treatment, purification, or distribution of water or the construction of sewage, sewerage treatment, and sewer facilities, if needed to serve such smaller municipalities, upon a determination that no existing public body is able to construct and operate such facilities."

FHA conforming amendments

SEC. 1006. (a) Section 2(f) of the National Housing Act is amended by striking out all that follows the first sentence.

(b) Section 8 of such Act is amended—

(1) by striking out "Title I Housing Insurance Fund" in subsection (g) and inserting in lieu thereof "General Insurance Fund"; and

(2) by striking out subsections (h) and (i).

(c) Section 203(k) of such Act is amended—

(1) by striking out "a separate section 203 Home Improvement Account to be maintained as hereinafter provided under the Mutual Mortgage Insurance Fund" in clause (3) of the first sentence and inserting in lieu thereof "the General Insurance Fund";

(2) by striking out "the section 203 Home Improvement Account or in debentures executed in the name of such Account" in clause (4) of the first sentence and inserting in lieu thereof "the General Insurance Fund or in debentures executed in the name of such Fund";

(3) by striking out all of the third sentence which follows "refer to this section 203(k)" and inserting in lieu thereof a period; and

(4) by striking out the fourth, fifth, and sixth sentences.

(d) Section 204 of such Act is amended—

(1) by striking out "or section 210" in the first sentence of subsection (a);

(2) by striking out all of the second sentence of subsection (c) after "the mortgagee" and inserting in lieu thereof "from the Mutual Mortgage Insurance Fund";

(3) by striking out all of the first sentence of subsection (d) after "shall be negotiable" the first place it appears and inserting in lieu thereof a period;

(4) by striking out "the Fund" each place it appears in subsection (d) and inserting in lieu thereof "the Mutual Mortgage Insurance Fund";

(5) by striking out "or the Housing Fund, as the case may be," in the fifth sentence of subsection (d);

(6) by striking out "or the Housing Fund" in the sixth sentence of subsection (d); and

(7) by striking out the matter in subsection (f)(1)(i) which follows "section 203" and precedes the colon.

(e) Section 207 of such Act is amended—

(1) by striking out "and section 210" in the first sentence of subsection (d);

(2) by striking out "of the Housing Insurance Fund issued by the Commissioner under this title" in the first sentence of subsection (d) and inserting in lieu thereof the following: "Issued by the Commissioner under any title and section of this Act, except debentures of the Mutual Mortgage Insurance Fund";

(3) by striking out subsections (f), (m), and (p); and

(4) by striking out "the Housing Insurance Fund" and "the Housing Fund" each place they appear in subsections (b), (h), (i), (j), (k), and (l) and inserting in lieu thereof "the General Insurance Fund".

(f) Section 209 of such Act is amended by striking out "or account or accounts," in the second sentence.

(g) Section 213 of such Act is amended—

(1) by striking out "the Housing Fund" in subsection (a)(3) and inserting in lieu thereof "the General Insurance Fund"; and

(2) by striking out "(l), (m), (n), and (p)" in subsection (e) and inserting in lieu thereof "(l), and (n)".

(h) Section 220 of such Act is amended—

(1) by striking out "the section 220 Housing Insurance Fund" each place it appears in subsections (d)(2) and (f) and inserting in lieu thereof "the General Insurance Fund";

(2) by inserting "and" immediately before "(B)" in the second full sentence in subsection (f)(3), and by striking out ", and (C)" and all that follows in such sentence and inserting in lieu thereof a period;

(3) by striking out subsections (g) and (h)(4); and

(4) by striking out "the section 220 Home Improvement Account" each place it appears in subsections (h)(5) and (h)(7) and inserting in lieu thereof "the General Insurance Fund".

(1) Section 221 of such Act is amended—

(1) by striking out "the section 221 Housing Insurance Fund" each place it appears in subsections (d)(4), (f), (g)(1), and (g)(3) and inserting in lieu thereof "the General Insurance Fund";

(2) by striking out all of subsection (g)(2) after "mortgages insured under this section" and inserting in lieu thereof "; or";

(3) by inserting "and" immediately before "(B)" in the first full sentence in subsection (g)(3), and by striking out ", and (C)" and all that follows in such sentence and inserting in lieu thereof a period; and

(4) by striking out subsection (h).

(j) Section 222 of such Act is amended—

(1) by striking out "Servicemen's Mortgage Insurance Fund" in subsection (e) and inserting in lieu thereof "General Insurance Fund"; and

(2) by striking out subsection (f).

(k) Section 229 of such Act is amended by striking out "and Accounts" in the first sentence.

(1) Section 231 of such Act is amended—

(1) by striking out "the section 207 Housing Insurance Fund" in subsection (c)(4) and inserting in lieu thereof "the General Insurance Fund"; and

(2) by striking out "(f), (g), (h), (i), (j), (k), (l), (m), (n), and (p)" in subsection (e) and inserting in lieu thereof "(g), (h), (i), (j), (k), (l), and (n)".

(m) Section 232 of such Act is amended—

(1) by striking out "the section 207 Housing Insurance Fund" in subsection (d)(1) and inserting in lieu thereof "the General Insurance Fund"; and

(2) by striking out "(f), (g), (h), (i), (j), (k), (l), (m), (n), and (p)" in subsection (f) and inserting in lieu thereof "(g), (h), (i), (j), (k), (l), and (n)".

(n) Section 233 of such Act is amended—

(1) by striking out "the Experimental Housing Insurance Fund" in clause (1) of the third sentence of subsection (f) and inserting in lieu thereof "the General Insurance Fund";

(2) by inserting "and" immediately before "(2)" in the third sentence of subsection (f), and by striking out ", and (3)" and all that follows and inserting in lieu thereof a period; and

(3) by striking out subsection (g).

(o) Section 234 of such Act is amended—

(1) by striking out "the Apartment Unit Insurance Fund" in subsections (d)(2) and (g) and inserting in lieu thereof "the General Insurance Fund";

(2) by striking out subsection (h) and inserting in lieu thereof the following:

"(h) The provisions of subsections (d), (e), (g), (h), (i), (j), (k), (l), and (n) of section 207 shall be applicable to mortgages insured under subsection (d) of this section."; and

(3) by striking out subsection (i) and redesignating subsection (j) as subsection (i).

(p) Section 604 of such Act is amended by striking out "the War Housing Insurance Fund" each place it appears in subsections (c), (d) and (f)(1)(i) and inserting in lieu thereof "the General Insurance Fund".

(q) Section 608 of such Act is amended—

(1) by striking out "the War Housing Insurance Fund" each place it appears in subsections (b)(1) and (d) and inserting in lieu thereof "the General Insurance Fund"; and

(2) by striking out subsection (f) and inserting in lieu thereof the following:

"(f) The provisions of section 207(k) of this Act shall be applicable to mortgages insured under this section, except that, as applied to such mortgages, the reference therein to subsection (g) shall be construed to refer to subsection (c) of this section."

(r) The first sentence of section 609(f) of such Act is amended by striking out clause (1) and redesignating clauses (2), (3), and (4) as clauses (1), (2), and (3), respectively.

(s) Section 707 of such Act is amended by striking out "the Housing Investment Insurance Fund" and inserting in lieu thereof "the General Insurance Fund".

(t) Section 708 of such Act is amended by striking out "the Housing Investment Insurance Fund" each place it appears in subsections (c), (e), (g), and (h) and inserting in lieu thereof "the General Insurance Fund".

(u) Section 803 of such Act is amended—

(1) by striking out "the Armed Services Housing Mortgage Insurance Fund" each place it appears in subsections (b)(1), (b)(2), (e), (f), and (g) and inserting in lieu thereof "the General Insurance Fund"; and

(2) by striking out subsection (h) and inserting in lieu thereof the following:

"(h) The provisions of section 207(k) and section 207(l) of this Act shall be applicable to mortgages insured under this title and to property acquired by the Commissioner hereunder, except that, as applied to such mortgages and property, the reference in section 207(k) to subsection (g) shall be construed to refer to subsection (d) of this section."

(v) Section 809 of such Act is amended by striking out "the Armed Services Housing Mortgage Insurance Fund" each place it appears in subsections (b), (e), and (g) and inserting in lieu thereof "the General Insurance Fund".

(w) Section 810 of such Act is amended—

(1) by striking out "the Armed Services Housing Mortgage Insurance Fund" in subsection (e) and inserting in lieu thereof "the General Insurance Fund";

(2) by striking out "(l), (m), (n), and (p)" in subsection (j) and inserting in lieu thereof "(l), and (n)"; and

(3) by striking out the proviso in subsection (j) and inserting in lieu thereof the following: "Provided, That wherever the words 'Fund' or 'Mutual Mortgage Insurance Fund' appear in section 204, such reference shall refer to the General Insurance Fund with respect to mortgages insured under this section".

(x) Section 903 of such Act is amended by striking out "the National Defense Housing Insurance Fund" each place it appears in subsection (a) and inserting in lieu thereof "the General Insurance Fund".

(y) Section 904 of such Act is amended—

(1) by striking out "the National Defense Housing Insurance Fund" each place it appears in subsections (c) and (d) and inserting in lieu thereof "the General Insurance Fund"; and

(2) by striking out all of subsection (e) which follows "of this Act" and inserting in lieu thereof a period.

(z) Section 908 of such Act is amended—

(1) by striking out "the National Defense Housing Insurance Fund" in subsection (b)(1) and inserting in lieu thereof "the General Insurance Fund";

(2) by striking out all of subsection (d) which follows "of this Act" and inserting in lieu thereof a period; and

(3) by striking out subsection (f) and inserting in lieu thereof the following:

"(f) The provisions of section 207(k) and section 207(l) of this Act shall be applicable to mortgages insured under this section and to property acquired by the Commissioner hereunder, except that, as applied to such mortgages and property, the reference therein to subsection (g) shall be construed to refer to subsection (c) of this section."

(aa) Sections 219, 602, 605, 710, 802, 804, 902, and 905 of such Act are repealed.

Savings and loan associations

Sec. 1007. Section 5(c) of the Home Owners' Loan Act of 1933 is amended—

(1) by adding at the end of the first paragraph the following new sentence: "Loans on the security of buildings substantially all of which are used or are to be used after

completion for college dormitories, fraternity houses, or sorority houses, or for residential purposes by the staffs of community hospitals, shall be considered as loans on 'other dwelling units' for the purposes of this subsection."

(2) by inserting before the period at the end of the next to last paragraph (as determined without regard to the new paragraphs added by this Act) the following: "Provided, That in any State or area within a State where the Board shall find that a substantial part of the land occupied by or suitable for residential structures is available for purchase only on a leasehold basis, any such association may make a loan on the security of a first lien on the remainder of the term of any such leasehold which extends or is renewable for at least ten years beyond the maturity of such loan"; and

(3) by adding at the end thereof (after the new paragraph added by section 201(b) (3) of this Act) the following new paragraph:

"Any building association, building and loan association, or savings and loan association organized and operating under the laws of the District of Columbia shall have the same powers with respect to the investment of its assets as are authorized for Federal savings and loan associations under this subsection, and shall be governed by such regulations as the Board may prescribe in relation to the exercise of such powers by Federal savings and loan associations."

Urban renewal project in Johnson City, Tennessee

Sec. 1008. Notwithstanding the date of commencement of the installation of certain underground electrical wiring in Johnson City, Tennessee, expenditures made in connection with such installation shall, to the extent otherwise eligible, be counted as a local grant-in-aid to Johnson City's proposed downtown urban renewal project (Tennessee R-80) in accordance with the provisions of title I of the Housing Act of 1949.

Repayment of certain planning grants

Sec. 1009. Notwithstanding any other provision of law, no advance made under section 501 of Public Law 458, Seventy-eighth Congress; Public Law 352, Eighty-first Congress; or section 707, Housing Act of 1954, Public Law 560, Eighty-third Congress, for the planning of any public works project shall be required to be repaid if construction of such project has been heretofore or is hereafter initiated as a result of a grant-in-aid made from an allocation made by the President under the Public Works Acceleration Act.

Mr. PATMAN (interrupting the reading of the bill). Mr. Chairman, I ask unanimous consent that the bill be considered as read and open for amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. FARBSTEIN

Mr. FARBSTEIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FARBSTEIN: Page 53, after line 11, add the following new section:

"REQUIREMENT OF LOW- AND MIDDLE-INCOME HOUSING IN REDEVELOPMENT OF URBAN RENEWAL AREAS

"Sec. 308. (a) Section 105(b) of the Housing Act of 1949 is amended by striking out 'and (iii)' and inserting in lieu thereof the following: '(iii) to give satisfactory assurances that any rental housing or cooperative housing which may be constructed on such

property in the redevelopment of the area will be designed for occupancy by persons from the low- and middle-income segments of the population (as determined by the local public agency), and that the rentals (or, in the case of cooperative housing, the purchase price) to be established for living accommodations in such housing will not exceed the level (as determined by such agency) which such persons can reasonably be expected to pay; and (iv)'.

"(b) Paragraph (4) of section 110(c) of such Act is amended by striking out 'for uses in accordance with the urban renewal plan' and inserting in lieu thereof 'for uses in accordance with (A) the urban renewal plan, and (B) the applicable contract made with the local public agency as provided in section 105,'.

"(c) The amendments made by this section shall apply only with respect to contracts for loan or capital grant entered into under title I of the Housing Act of 1949 on or after the date of the enactment of this Act; except that such amendments shall not apply in the case of any developer who has made a proposal to or has entered into negotiations or discussions with the local public agency involved, prior to the date of the enactment of this Act, with respect to the possible development by him within the urban renewal area of housing other than housing described in clause (iii) of section 105(b) of the Housing Act of 1949 as amended by subsection (a) of this section."

And redesignate the succeeding sections accordingly.

(Mr. FARBSTEIN asked and was given permission to revise and extend his remarks.)

Mr. FARBSTEIN. Mr. Chairman, this amendment would prohibit the Federal Government from providing any subsidy for the construction of luxury housing. The amendment would restrict all federally aided rental or cooperative housing in urban renewal projects to occupancy by middle- or low-income families, as determined by the local public agency.

The only exception I would make is that the applications of developers for Government loans or capital grants for the construction of urban renewal projects filed prior to the date of enactment of this act should not be barred from consideration.

This amendment which I have offered, Mr. Chairman, is designed to make available to the inhabitants of our cities more low- and middle-income housing. It is a simple matter of economics. Our resources permit only so much Federal aid to housing developers. And since our resources are limited, are we to permit Federal money to be squandered where it is not needed?

Mr. Chairman, I represent a heavily populated district in the very heart of New York City, and as a result no one is more painfully aware than I of the critical shortage of low- and middle-income housing in our urban areas today.

I emphasize low- and middle-income housing, Mr. Chairman, not luxury housing. In my home district, there are 68,000 families with incomes of less than \$6,000. There are 67,000 deteriorating or dilapidated housing units, and only 55.5 percent of the total housing stock is sound with all plumbing facilities. Of our existing housing stock, 172,000 units were built before 1940. And my district is not atypical, Mr. Chairman. It is, in fact, representative of many of the urban

concentrations across our Nation. The problems of my constituents are identical with the problems of millions of people in Chicago, Philadelphia, Baltimore, and right here in the District of Columbia.

The people in my district do not want luxury housing, Mr. Chairman, and they cannot afford it. All they want is a decent place to live and bring up their children. If the Federal Government is to participate in the eradication of slums from our cities, it must provide alternative housing for the families which have been displaced. These families will not be able to afford to move into a luxury apartment building. Thus, they will have to live either in a reasonably priced attractive, modern, low- or middle-income housing development or else they will have to relocate into another miserable and degrading slum.

In other words, Mr. Chairman, any money this Congress permits to be spent on luxury housing developments is money wasted, money poured down the drain. We will have lined the pockets of the developers of luxury housing—they will have had Federal aid, and certainly they will have no shortage of tenants who can afford high rents in this booming economy of ours. But we will have betrayed the people of this Nation who desperately need housing. We will have played Robin Hood in reverse—taking from the poor to give to the rich. I hope my colleagues in this Chamber will see fit to incorporate my amendment to H.R. 7984, which would prevent this eventuality from occurring.

Now, Mr. Chairman, last year I offered the same amendment. The objection to the amendment at that time was that those people who had already filed applications would be precluded from the benefits thereof. Well, Mr. Chairman, I added language today to the amendment to afford those who have already filed their applications for luxury housing to be permitted to be considered as valid. However, from now on, no Federal money or no taxpayer moneys should be used for the purpose of building luxury housing. I do not think it is right. I think all public moneys should be restricted to low- and middle-income housing.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. FARBSTEIN. I yield to the gentleman from Ohio.

Mr. ASHLEY. Is it not true that each local community and the local government of that community passes on the plans, the Federal urban renewal plan, and what is going to go into that urban renewal project? Is it not true that at the present time the people of the community are able to answer for themselves as to whether they want to go into an urban renewal project and what they want in that project?

Mr. FARBSTEIN. Well, let me tell the gentleman what has occurred in my district. Some years ago under an urban renewal project the Federal Government paid two-thirds of the cost and the municipality paid one-third and undertook a project to clean up some slums. Thereupon, the area was sold to a developer and that developer agreed, or it

was so understood, that he would build medium-income houses.

The CHAIRMAN. The time of the gentleman from New York has expired. (Mr. FARBSTEIN asked and was given permission to proceed for 1 additional minute.)

Mr. FARBSTEIN. What happened was that instead of building medium-income housing, they built luxury housing. That development is now known as the Washington Square development and you have to pay at least \$70 a room in order to secure an apartment there.

Mr. Chairman, I believe this is wrong and I do not think this should be permitted. I think it should be written into the law that no Federal moneys under urban renewal development can be used for anything except low- and medium-income housing.

Mr. Chairman, I hope this amendment will be adopted.

Mr. BARRETT. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I do want to say to the gentleman from New York that he works inexhaustibly for his constituents. I believe that fact has been demonstrated here this afternoon.

However well intentioned, this would be a highly destructive amendment and would strike a body blow to the urban renewal program. Low-cost housing must be built but not necessarily on extremely high-cost land. The local officials and local experts must have a free hand in determining the type of buildings which would be compatible to the urban renewal project.

On the subject I would like to quote from our distinguished former colleague, Robert Taft, Jr., who spoke on a similar amendment in last year's housing bill. He knows the urban renewal program well, both in Cincinnati and country-wide. He opposed the amendment as being impractical because it would call for, and I quote, "Radical changes in some plans already underway for urban renewal."

I hope the amendment will be defeated.

Mr. FARBSTEIN. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I would be glad to yield to the gentleman from New York.

Mr. FARBSTEIN. Let me remind the gentleman from Pennsylvania that I state in here, in talking about my amendment, that one of the objections raised was that there were those who had filed applications who would be excluded.

The former Member of this House whom you mentioned, the gentleman from Ohio [Mr. Taft], was the gentleman who raised that objection. However, I cover that very objection in my amendment when I say, "All those applications that have already been filed will not be restricted." They will be continued but from here on in there will not be any moneys provided for luxury housing.

Mr. BARRETT. Mr. Chairman, I do hope we can move along on this. There are Members on both sides of the aisle who have a very important engagement

later this evening and therefore I ask for an immediate vote and hope this amendment is voted down.

Mr. RYAN. Mr. Chairman, I move to strike the requisite number of words.

(Mr. RYAN asked and was given permission to revise and extend his remarks.)

Mr. RYAN. Mr. Chairman and Members of the Committee, we have heard a great deal of talk this afternoon particularly from the other side of the aisle about the subsidy of poor people in public housing. And there has been a great reluctance on the part of some Members to adopt a program of rent supplements.

This amendment is directed at subsidies which are intended for the rich. I would think anyone who opposes subsidies for the poor would certainly oppose subsidies for the rich. The use of title I funds for luxury housing is a question that has been before this House on previous occasions. It has been before the Subcommittee on Housing. It has been one of the fundamental questions involved in the application of urban renewal programs in every city in the country. For a number of years I have been concerned about the fact that luxury housing has been subsidized and that Congress has not insisted on limiting urban renewal write-downs to low- and middle-income housing.

There have been a whole series of programs in New York where the rents have been set at \$60, \$75, and, in one instance, as high as \$246 a room. Time and again high-cost housing has been constructed, displacing site tenants who cannot afford the rents in the new apartments. As long as there is a critical shortage of housing for low- and middle-income people, they must have priority.

Unfortunately, the bill only provides for 35,000 units a year of new public housing and with the 15-percent limitation which the Congress has not seen fit to remove, this means only 5,250 new units for the State of New York.

We should concentrate our attention, our energies, and our resources on the great need which we face in this country, and that is to build houses for the million and a half people in New York City and for some 6 million people in all parts of the country who are now living under substandard conditions.

When the Housing Act of 1961 was on the floor I offered an amendment at that time to prohibit the construction of luxury housing with urban renewal funds. I have testified before the subcommittee on this matter, and I have introduced legislation (H.R. 3964) to accomplish this purpose.

The argument that high-priced urban land should be used for luxury housing is simply wrong. It is necessary to provide houses for people who need them.

As a matter of public policy, we should make fundamentally clear the sense of the Congress there shall be no further construction in any city in the country of high-priced housing under the title I program.

I urge that all Members support the pending amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. FARBSTEIN].

The amendment was rejected.

Mr. PATMAN. Mr. Chairman, I ask unanimous consent that all debate on the pending bill and all amendments thereto close at 4:40.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. DOWDY. Mr. Chairman, I object.

Mr. PATMAN. Mr. Chairman, I move that all debate on the bill and all amendments thereto close at 4:45.

The motion was agreed to.

The CHAIRMAN. For what purpose does the gentleman from Ohio [Mr. ASHLEY], a member of the committee, rise?

AMENDMENT OFFERED BY MR. ASHLEY

Mr. ASHLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASHLEY: Page 65, strike out line 20, and all that follows down through page 66, line 8.

And redesignate the succeeding section accordingly.

Mr. ASHLEY. Mr. Chairman, the purpose of this amendment is to keep the college housing loan program as it is presently operating.

This program authorizes the HHFA to make loans to finance college dormitories and related facilities at an interest rate formula determined annually by the average market yield on all interest-bearing obligations of the United States, plus a quarter of 1 percent—the present rate being 3¾ percent. The program also requires that financing is not available from other sources on equally favorable terms.

The administration's housing bill called for \$300 million additional authority for these loans for each of the next 4 years but it did not request any change in the interest rate for these loans—that is to say, it did not request a reduction to the 3 percent which we find in the bill.

My reason for introducing this amendment is that the private investment market has supplied very substantial sums of money for college housing and would be precluded from doing so with the 3-percent rate.

College housing bonds sold on the private market in 1964 totaled over \$222 million and from February to May of 1965 the amount was almost \$100 million. All of these bonds are sold at interest rates above 3 percent but below 4 percent—so it is clear that if the proposed 3-percent rate had been in effect all of these bonds would have been eligible for purchase by the Federal Government, although the fact is that they were sold in the private market.

The only reasons set forth in the report on H.R. 7984 for the proposed reduction to 3 percent are that, first, the assistance intended by Congress has been greatly reduced; and, second, dormitory quarters financed with money at 3 percent can be rented to a student for

\$380 a year while the same housing at 4 percent must be rented at \$430 a year.

Neither of these reasons seem to me valid. There is considerable evidence that many additional hundreds of millions of dollars will be needed for expanded college housing facilities in the years ahead and there is also positive evidence that in many instances annual dormitory rental fees range between \$200 and \$300 although the dormitories are financed at net interest costs ranging from 3.4 to 3.7 percent.

I urge adoption of this amendment to strike section 502 because I feel strongly that the proposed 3 percent rate would actually delay construction of needed college dormitories—many institutions which otherwise would obtain financing promptly in the private market will wait to obtain 3-percent funds and the proposed authorization will not satisfy this increased demand—because the proposed 3-percent rate would completely preempt college dormitory financing by the Federal Government—despite the fact that the present program has worked effectively—and because there is no evidence of need for the subsidy 3-percent rate.

Mr. WIDNALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this was my amendment and it was the result of hearings before our committee where we were told a very, very successful program, the college housing program, was being phased out because of an increase in the interest rate. The current interest rate was going up as of June 30 to 4 percent or over. The 3 percent rate will be in recognition of what is needed in this program to keep it going and provide low rental housing in college dormitories.

It is a program that I know all of the colleges of the country are very much interested in and they heartily support it. The program has been successful with a much lower interest rate. It started out at 2½ percent and it has gradually climbed up with the market. This is a small subsidy but the alternative would be coming in here and requesting hundreds of millions of dollars by way of grants to the colleges for their college dormitories.

Mr. Chairman, I think this is a far more suitable approach, to provide the 3 percent rate in this bill which is realistic and which is the same as we are proposing in the housing for the elderly program and also the 221(d)(3) program.

Mr. Chairman, it is with great reluctance that I oppose the amendment, because the gentleman is a member of the committee, and a very valuable and able one. I cannot agree with this amendment. I do agree with the ranking minority Member, the gentleman from New Jersey [Mr. WIDNALL].

This amendment, if adopted, would force colleges to charge higher dormitory room rates to college students and that is something I do not think the Congress wants to do. We all know about the tremendous problems facing our institutions of higher learning and we all know that the advanced education of our youth is one of the highest objectives of national welfare and security.

The facts are that most private colleges and many State colleges and universities are dependent on the college housing loan program for their borrowings. The flat 3-percent rate fixed in this bill will help lower costs to students in all types of colleges, public and private, and is particularly needed to keep down spiralling college costs.

I ask that the amendment be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio [Mr. ASHLEY].

The amendment was rejected.

AMENDMENT OFFERED BY MR. MULTER

Mr. MULTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MULTER: Page 106, strike out "and" in line 9, "; and" at the end of line 20, and after line 20 insert the following:

"(4) by adding at the end thereof (after all other additions made by this Act) the following new paragraph:

"No building and loan association incorporated under the laws of the District of Columbia or organized in said District or doing business in said District shall establish any branch or move its principal office or any branch without the prior written approval of the Federal Home Loan Bank Board, and no other building and loan association shall establish any branch in said District or move its principal office or any branch in said District without such approval. As used in the sentence next preceding, "branch" means any office, place of business, or facility, other than the principal office as defined by said Board, of a building and loan association at which accounts are opened or payments thereon are received or withdrawals therefrom are paid, or any other office, place of business, or facility of a building and loan association defined by said Board as a branch within the meaning of said sentence, and as used in said sentence and in this sentence "building and loan association" means any incorporated or unincorporated building, building or loan, building and loan, savings and loan, or homestead association or cooperative bank."

Mr. MULTER (interrupting the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD. I understand it is acceptable to both sides.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. PATMAN. Mr. Chairman, the majority members of the committee are willing to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. MULTER].

Mr. HALL. Mr. Chairman, a point of order. We do not know what the amendment is.

Mr. MULTER. Mr. Chairman, I will explain the amendment.

This amendment was considered in the committee and found acceptable. It merely provides that the Home Loan Bank Board shall exercise the same jurisdiction in the District of Columbia over all savings and loan associations, as to their right to establish a branch, or to move the home office or a branch office, as it now exercises with reference to sav-

ings and loan associations outside the District of Columbia. This would merely give the Board the right which it does not now have to require an application to be filed with it and to obtain the consent of the Home Loan Bank Board to establish a branch, to move a branch or to move a head office in the District of Columbia.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. MULTER].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MOORHEAD

Mr. MOORHEAD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MOORHEAD: On page 57, strike out line 21 and all that follows down through page 58, line 5, and insert the following:

"Local grants-in-aid for urban renewal projects in Philadelphia and Wilkes-Barre, Pa.

"SEC. 312. Notwithstanding any other provision of law, moneys heretofore expended by the University of Pennsylvania and Wilkes College for land (and related expenditures for demolition and relocation) included in the overall development plans proposed by such institutions and utilized, or to be utilized, in connection with new facilities of such institutions within one mile of urban renewal projects Pennsylvania 5-3 (University City) and Pennsylvania R-149 (Wright Street), respectively, shall, if otherwise eligible be allowed as local grants-in-aid for such projects."

(Mr. MOORHEAD asked and was given permission to revise and extend his remarks.)

Mr. MOORHEAD. Mr. Chairman, this amendment to section 312 of H.R. 7984 will rectify a situation that has arisen in connection with Wilkes-Barre's Wright Street urban renewal project that is similar to the one being provided for in the section with respect to Philadelphia's University City urban renewal project. The Wilkes-Barre project was undertaken in conjunction with the expansion of the campus facilities of Wilkes College. Because of the long and narrow nature of this campus, some of the land acquired in accordance with the college's development plan is more than one-quarter mile from the urban renewal project boundaries, the limit for grant-in-aid credit determined by the Housing and Home Finance Agency to be required by section 112 of the Housing Act of 1949. This amendment would permit grant-in-aid credit to be obtained for those acquisitions and any related demolition and relocation expenditures.

I have discussed this amendment with the ranking minority member of the committee and I understand there is no objection.

If there is no objection I ask for immediate action on the amendment.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I am glad to yield to the chairman of the subcommittee.

Mr. BARRETT. I rise in support of the gentleman's amendment. It will correct the unfair situation in Wilkes-Barre. I understand the administration has no objection to the amendment. I

believe that the minority members will also agree.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I am glad to yield to the gentleman from New Jersey.

Mr. WIDNALL. Mr. Chairman, we on this side will accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. MOORHEAD].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FINO

Mr. FINO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FINO: On page 28, following line 6, add the following:

"(4) Section 212(a) of the National Housing Act is amended by inserting at the end thereof the following new sentence: 'The provisions of this section shall also apply to insurance under title X with respect to laborers or mechanics employed in land development financed with the proceeds of any mortgage insured under that title.'"

Mr. FINO. Mr. Chairman, this amendment that has been offered is a Davis-Bacon Act amendment. It is applicable to a new title which has been added to the housing bill.

Mr. PATMAN. Mr. Chairman, if the gentleman will yield, we are willing on the majority side to accept the gentleman's amendment.

(Mr. PATMAN asked and was given permission to revise and extend his remarks.)

Mr. PATMAN. Mr. Chairman, I rise in support of the amendment of the gentleman from New York. The prevailing wage requirements of the Davis-Bacon Act were, as a matter of fact, inadvertently omitted in committee, which is understandable in view of the many titles and sections of the bill. We all want to see the American worker receive a fair wage and I am happy to support the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. FINO].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WIDNALL

Mr. WIDNALL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIDNALL: Page 44, in line 2, insert "(a)" after "SEC. 211," and after line 22 insert the following:

"(b) Section 203(b)(9) of such Act is amended by inserting after 'on account of the property' the following: '(except in a case to which the last sentence of paragraph (2) applies)'."

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I will be glad to yield to the chairman of the committee.

Mr. PATMAN. Mr. Chairman, we have discussed the amendment of the gentleman from New Jersey on the majority side, and we are willing to accept his amendment.

Mr. WIDNALL. Mr. Chairman, this is a technical and perfecting amendment. Without it, the amendment made by section 211 could not operate. The intent was to permit veterans a no-downpayment mortgage program.

Section 211 increases the maximum mortgage amount for veterans from 97 to 100 percent on the first \$20,000. It inadvertently does not eliminate the 3-percent requirement of FHA. This perfecting amendment does this.

Mr. Chairman, a number of outstanding provisions of this year's housing bill, reported with bipartisan backing from the Banking and Currency Committee, have been largely ignored as the result of the controversy over one particular section of the proposed legislation. One such provision is a new mortgage insurance program for veterans under the Federal Housing Administration, which I proposed, and which was cosponsored by the three other minority members of the Housing Subcommittee, the gentleman from New York [Mr. FINO], the gentlewoman from New Jersey [Mrs. DWYER], and the gentleman from Michigan [Mr. HARVEY].

The new program applies to any veteran having had active military service, and who was discharged or released from service under conditions other than dishonorable. It would not apply, however, to any veteran who has received any direct, guaranteed, or insured loan under any Veterans' Administration program for the purchase, construction, or repair of his residential property. Those who have not used up their eligibility under any Veterans' Administration loan program would also be eligible for the FHA program.

Under the new program, the FHA would insure 100 percent of the first \$20,000 value of a home mortgage, and 85 percent of any additional value to the present FHA maximum of \$30,000. In other words, a veteran would have a no-downpayment, insured mortgage for the first \$20,000, and need only a 5-percent downpayment for a \$30,000 home. A mortgagee would pay the standard FHA interest rate of 5¼ percent, which is the same rate as the VA programs require, plus an additional one-half of 1 percent to cover the cost of insurance.

By enacting this program, Congress, for the first time, will take major recognition of the sacrifices of America's cold war veterans who have served their country and the defense of freedom. The Veterans' Administration estimates that there are 3,503,000 post-Korea ex-servicemen, alone. These are the Americans in uniform who have landed on the beaches of Lebanon, patrolled the Formosa Strait, guarded the truce line in Korea, and manned the Checkpoint Charlies of the free world wherever they might be.

Nor should we ignore the efforts of those men and women presently serving on active duty within our Military Establishment. The Defense Department preliminary estimate for May 1965 shows 2,639,296 Americans in uniform. They, and the millions to follow in the crucial decades ahead, will be called upon whenever and wherever the prospect of armed hostility threatening the security of the Nation occurs. They are the veterans of tomorrow, fully deserving recognition by the country they serve. And they include thousands of servicemen with wartime

experience, who, by choosing the service as a career could well serve past the expiration dates for the VA program.

Over the past 20 years, 6,334,479 veterans of World War II and the Korean conflict have taken advantage of the loan guarantee program administered by the Veterans' Administration. A total of \$60.2 billion in mortgage loans has been guaranteed, with a remarkable record of payment by our veterans. Only 2.5 percent of the loans guaranteed have resulted in defaults. I am particularly pleased to note that in my own State of New Jersey, the figure has been even lower, at 1.9 percent. Some 34.8 percent of the eligible veterans under the program have taken advantage of this special opportunity to become homeowners. The program has done an outstanding job, both for our veterans and the homebuilding industry, but it has reached a plateau from which a slow decline in activity has already begun.

Furthermore, although 12,765,000 veterans still remain eligible for the program, their eligibility under the law is phasing out. The law provides for a 10-year eligibility from the date of discharge, plus 1 year of eligibility for each 3 months of active duty. No one's eligibility could expire, however, until July 5, 1962, in the case of World War II veterans, and January 31, 1965, for veterans of the Korean conflict. As can be noted from these dates, the phasing out process has begun, and will be completed, in the case of World War II veterans, by July of 1967, and, in the case of Korean veterans, by January 31, 1975. The new program, then, will not only cover those who have never been eligible for VA benefits, but those who have not had reason to use their eligibility as yet, but are faced with eventual cutoff dates, if their dates have not already arrived.

I do not see how anyone could argue against the idea of benefiting and recognizing our cold war veterans, particularly in light of recent activity by our military forces in combat conditions in South Vietnam and the Dominican Republic. There is, however, another important element to the proposal. Many of our servicemen are unable to afford the down payments necessary to begin homeownership, once they have been released from the service. Considering the inadequate pay scales of the Armed Forces, the ability to save toward this goal is often negligible. Yet they represent a potential market for homes that could do a great deal for the homebuilding industry, a vitally important segment of our national economic picture. By providing opportunities and assistance to our veterans through this new program, we are also strengthening the country's economic position as a whole.

This potential can clearly be seen in the following figures. I have already noted 12,765,000 veterans who have not used their eligibility under present programs, 3.5 million post-Korean ex-servicemen, and 2.6 million servicemen on active duty. If to these we add the 2.6 million war veterans prior to World War II, we have a potential of over 21 million eligible veterans under the new FHA mortgage insurance program I have pro-

posed. Should only 35 percent of these veterans make use of the new program, which is the percentage of eligibles who have made use of their VA opportunities, it would stimulate 6.4 million new housing starts, or more than the entire VA program has produced to date. I cannot think of a more valuable built-in stabilizer for our economy.

(Mr. WIDNALL asked and was given permission to revise and extend his remarks.)

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. WIDNALL].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BARRETT

Mr. BARRETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARRETT: Page 7, after line 20, insert the following new subsection:

"(c) The third sentence of section 212(a) of such Act is amended by striking out 'described in subsection (d)(3)' and all that follows and inserting in lieu thereof 'described in subsection (d)(3) or (d)(4).'"

Page 7, line 21, strike out "(c)" and insert "(d)".

Mr. BARRETT. Mr. Chairman, in the 1961 act the prevailing wage requirements of the Davis-Bacon Act were omitted inadvertently for the nonprofit corporations under section 221(d)(3). This amendment corrects that and should be adopted. I am sure the gentleman from New Jersey would be willing to accept it.

Mr. WIDNALL. Mr. Chairman, if the gentleman will yield, the minority side is willing to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. BARRETT].

The amendment was agreed to.

The CHAIRMAN. The Chair recognizes the gentleman from Georgia [Mr. FLYNT].

AMENDMENT OFFERED BY MR. FLYNT

Mr. FLYNT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FLYNT: On page 107, after line 14, add the following new section:

"TRANSFER OF LAND FOR URBAN RENEWAL PURPOSES BY HOUSING AUTHORITY OF THE CITY OF MACON, GEORGIA

"SEC. 1010. (a) Notwithstanding the provisions of title I of the Housing Act of 1949 and the United States Housing Act of 1937, the Housing and Home Finance Administrator and the Public Housing Commissioner are authorized and directed to consent to the transfer by the Housing Authority of the City of Macon, Georgia, to the Urban Renewal Department of the City of Macon, Georgia of all property acquired by the Housing Authority for low-rent housing project numbered Georgia 7-8, on condition that (1) an amount which, together with any funds of the Housing Authority available for the purpose, is sufficient to pay and discharge all obligations incurred by the Housing Authority in connection with such low-rent housing project and owing at the time of transfer, will be paid by the Urban Renewal Department of the City of Macon to the Public Housing Administration to be applied in satisfaction of the Housing Authority's obligations which it cannot meet

with its own funds available for the purpose, and (2) the total amount so paid by the Urban Renewal Department of the City of Macon will be included in the gross project cost of its Coliseum Urban Renewal Project, Georgia R-95.

"(b) The Housing and Home Finance Administrator and the Public Housing Commissioner are authorized to modify any contracts heretofore entered into and to take any other appropriate action necessary to carry out the provisions of subsection (a)."

Mr. FLYNT. Mr. Chairman, I ask unanimous consent to dispense with further reading of the amendment and that it be printed in full in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. STEPHENS. Mr. Chairman, will the gentleman yield?

Mr. FLYNT. I yield to my colleague from Georgia.

Mr. STEPHENS. I should like to ask the gentleman if this is the amendment we talked about yesterday.

Mr. FLYNT. This is the amendment which was placed in the RECORD on Monday, June 28, 1965, at page 14350. It appears there in full. Copies have been presented to the majority and minority of the committee. As I understand, it meets their approval.

Mr. STEPHENS. There is no money involved in this?

Mr. FLYNT. That is correct.

Mr. STEPHENS. It authorizes a swap of land; is that correct?

Mr. FLYNT. Exactly.

Mr. STEPHENS. Mr. Chairman, I recommend the approval of the amendment. Since it has been cleared, I recommend that we adopt it as a committee amendment.

Mr. PATMAN. Mr. Chairman, we are willing to accept the amendment.

Mr. WIDNALL. Mr. Chairman, there is no objection to the amendment on the part of the minority.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. FLYNT].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PELLY

The CHAIRMAN. The Chair recognizes the gentleman from Washington [Mr. PELLY].

Mr. PELLY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PELLY: On page 42, line 23, strike out "(a)".

On page 43, line 10, insert quotation marks after the period.

On page 43, strike out lines 11 through 25.

Mr. PELLY. Mr. Chairman, my amendment is very simple. It would strike out the paragraph that has been included in H.R. 7984 which gives the Housing Commissioner authority to borrow from the Treasury in order to pay cash under the FHA guarantee fund. In other words, my amendment would cut out the so-called back-door spending authority that has been added by the bill and which is completely superfluous and unnecessary.

Mr. Chairman, it is now 2 years since the once frequently heard and conten-

tious term "back-door spending" has entered into the debate in this Chamber. It is really longer than that, because the last time a proposal for financing a new program by authorizing expenditures from public debt receipts was in connection with the extension of the Export-Import Bank in 1963, and at that time, as I recall, the chairman of the Banking and Currency Committee, the gentleman from Texas [Mr. PATMAN], himself offered an amendment to eliminate the back-door provision.

Mr. Chairman, at one time back-door spending—thereby avoiding the necessity of representatives of Government agencies coming before the Committees on Appropriations each year to justify their budget request—was a hot issue in this House. Back in 1960, with the help of some friends, I organized a bipartisan anti-back-door spending committee. As I recall, about 175 Members of both political parties signed up in support of a change in the House rules so as to require all bills carrying spending authority to come from the Committee on Appropriations. We had the votes in the House in support of our resolution but we could not muster a majority in the Rules Committee to report it.

For new Members who are not familiar with the history of appropriations jurisdiction in the House I might just mention that originally the House had one committee—the Committee on Ways and Means—which had jurisdiction over both taxes and expenditures. This system contributed to fiscal responsibility because spending and revenue raising were under the same people.

But the workload as the Government and the Nation grew became too heavy and about the time of the Civil War, or shortly thereafter, certain legislative committees were given the power to report their own appropriation bills. However, this system provided little in the way of overall control. Spending got out of hand in relation to Government income.

In 1916 both the Democratic and Republican Party platforms called for expenditure reform and promised reorganization with a single committee to scrutinize all appropriations and to weigh the urgency and need of one program as against another in relation to the condition of the Treasury.

That was the way the Committee on Appropriations was established in 1920 and for the ensuing decade the single committee plan worked. In fact, the Government averaged about \$1 billion surplus each year for the next 10 years.

In due course, however, the device known as back-door spending, so legislative committees could bypass the Committee on Appropriations, became popular, and since that time Congress has authorized in excess of \$150 billion of back-door borrowing authority and some \$16 billion of such borrowing has had to be forgiven.

But, fortunately of late years this House has come to frown on this method of financing new programs. I think the issue that turned the tide was when the proposal came from downtown to finance foreign aid by borrowing from public

debt receipts. Congress rejected this plan whereby it would have abdicated its control and annual scrutiny of foreign aid expenditures.

So, as I say, for the past 2 years, since that issue was resolved, there have been no new back-door programs.

Meanwhile, the bipartisan anti-back-door spending committee, which I was instrumental in organizing, has been inactive and, of course, many of its one time members are no longer in Congress.

However, the other day when I suddenly woke up to the fact that the new omnibus housing bill reported by the Committee on Banking and Currency contained a provision to authorize the Housing Commissioner to use this method of funding the purchase of defaulted mortgages under FHA guarantees, I thought it advisable to get busy lest this crack open up the old floodgates. I got in touch with some of the former opponents of back-door spending and today I am joined by 57 of our colleagues in opposing this provision in the bill which my amendment would strike out.

After all, as I should explain, there is more than \$1 billion in the insurance guarantee fund, invested in Government bonds, to take up defaults, and furthermore should there ever reoccur a major depression such as in the 1930s, the Commissioner would have the authority to use debentures as was done successfully by FHA's predecessor organization, the old Home Owners Loan Corporation.

There is no need or justification for this back-door spending authority. In 1964, the Committee on Banking and Currency itself deleted this language.

Under permission granted by the House I include at this point a copy of a letter to the gentleman from Pennsylvania [Mr. BARRETT], who is floor manager of this legislation. It contains the names of our colleagues who support my amendment:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., June 22, 1965.

HON. WILLIAM A. BARRETT,
Rayburn House Office Building,
House of Representatives.

DEAR BILL: As you know for years I have been opposing back-door spending and on learning that this type of financing was included in H.R. 7984 I asked a few of our colleagues to join me in trying to eliminate its provision which gives borrowing authority to the Housing Commissioner to make insurance payments in cash.

Herewith is a list of 57 Members of the House of both parties who have authorized me to use their names in this connection.

The purpose of this letter is to ask you, on behalf of the undersigned, to consider accepting an amendment which I will offer to strike section 520(b) and leave the insurance as in the past, to be paid from the guarantee fund or if necessary by debentures.

We don't see the justification of adding borrowing authority and apparently your committee in the past felt the same way.

Sincerely,

THOMAS M. PELLY.

In conclusion, Mr. Chairman, I wish to reiterate our strong opposition to including back-door spending under FHA guarantee program.

Let us not revive this old controversy. The FHA has a sound insurance plan. There is no need or justification for changing or adding to it. Let us keep it the way it is.

I urge support of my amendment.

Mr. PATMAN. Mr. Chairman, this amendment comes up every time there is opposition to a bill, particularly for the small business people or the poor people. Now, of course, "back-door spending" is a misleading and emotional phrase and is not truthful or genuine as used in this instance. There is no reason why we should approve this amendment and handicap the housing program, because it will handicap it. What good will it do? It should be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington [Mr. PELLY].

The question was taken; and on a division (demanded by Mr. PELLY) there were—ayes 37, noes 92.

So the amendment was rejected.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. PUCINSKI].

(Mr. PUCINSKI asked and was given permission to revise and extend his remarks.)

Mr. PUCINSKI. Mr. Chairman, it had been my hope to offer an amendment to section 101. However, I have been advised by the Chairman and by the Parliamentarian that when the House adopted the substitute amendment to section 101 earlier today, no further amendments would be possible.

Mr. Chairman, it should be a source of concern to all of us that we are passing a bill which will make the Federal Public Housing Administrator a virtual czar over every single community in this country.

I had hoped that the Committee would at least give a municipality some voice in selecting the "housing owners" under section 101.

Under the present language of the bill any organization can work out an arrangement for a housing project with the Housing Administrator in Washington, and neither the mayor nor the city council, nor the city alderman, nor any local alderman, nor the Governor, no one has any veto power over anything or any say about the projects that are going into a city or community. I am unequivocally opposed to such a procedure and shall vote against section 101.

It seems to me that this House is really putting the Federal Government into the backyard of every single American community in this country. This proposal is just another move to dilute the powers of local government and superimpose the Federal Government on our people. The erosion of autonomy by local governments in some of these Federal programs is a growing trend which should alarm all of us.

The whole concept of rent subsidies, in my opinion, is a most dangerous precedent. Where do you intend to stop? How do you intend to justify to a middle-income American that he should continue to sweat in meeting his obligations for rent or payment on his house, while the less fortunate have the Federal Government pay part of their rent for the same housing.

Mr. Chairman, I believe the proposal needs a great deal more study. It is my hope that if we cannot write some safeguards into the provision here in the House then the Senate certainly should do it when the measure comes up there.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. McDADE].

(Mr. McDADE asked and was given permission to revise and extend his remarks.)

AMENDMENT OFFERED BY MR. McDADE

Mr. McDADE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McDADE: On page 58 after line 5 insert the following new section:

"LOCAL GRANT-IN-AID CREDIT FOR CERTAIN COAL ROYALTIES

"SEC. 313. (a) Section 110(d) of the Housing Act of 1949 is amended by adding at the end thereof the following new paragraph:

"Where a project in any municipality includes an area affected by an underground mine fire or by a coal mine subsidence and where it is necessary in such project to remove any underlying coal deposits in order to stabilize the soil or to control the under-

ground mine fire, then any royalties received by the project from the removal and sale of such coal deposits shall be credited to the project as a local grant-in-aid made by such municipality.

"(b) Any contract under title I of the Housing Act of 1949 executed prior to the date of the enactment of this Act shall, at the request of the municipality involved, be amended to reflect the amendment made by subsection (a)."

Mr. McDADE. Mr. Chairman and gentlemen of the Committee, the purpose of this amendment is to attempt to rectify a situation which literally threatens 10,000 people in my district in northeast Pennsylvania. They are threatened by a raging underground mine fire. This city, the city of Carbondale, is right smack dab in the heart of Appalachia. It has for many years faced the problem of unemployment and all the privations that go with it.

Mr. Chairman, all this amendment proposes to do is to permit the city, instead of paying a coal royalty which is now paid when the coal is extracted to fight this fire to the local redevelopment authority, that this be paid to the local municipality and thus reduce the amount which the city must contribute as part of its redevelopment cost.

Mr. Chairman, all this amendment will do is say to the city of Carbondale, you may now use the 22 cents a ton which you have been getting as a royalty for the use of the local redevelopment authority as a part of the project cost and use it as a part of the local contribution.

This amendment will permit this vital project to continue. This amendment will enable this fire to be extinguished. This amendment, Mr. Chairman, will save a city of 10,000 people.

I urge its adoption.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

The question is on the amendment offered by the gentleman from Pennsylvania [Mr. McDADE].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROGERS OF COLORADO

Mr. ROGERS of Colorado. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROGERS of Colorado: On page 58, add the following after line 5:

"LOCAL GRANTS-IN-AID FOR URBAN RENEWAL PROJECT IN DENVER

"SEC. 313. Notwithstanding the extent to which the cultural and convention center proposed to be built adjacent to urban renewal project Colorado R-15 (Skyline) in Denver, Colorado, may benefit areas other than the urban renewal area, expenses incurred by the city of Denver in constructing such center shall, to the extent otherwise eligible, be counted as a grant-in-aid toward such project."

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. ROGERS of Colorado. I yield to the gentleman from Texas.

Mr. PATMAN. We have considered this amendment on the majority side, and we are willing to accept the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado [Mr. ROGERS].

The amendment was agreed to.

Mr. LINDSAY. Mr. Chairman, I rise in support of this legislation and I urge the House to support it.

Mr. Chairman, not too many weeks ago I had occasion to state that "cities are for people and for living." I believe very deeply in the truth of that statement. Yet our cities are in an age of crisis, and for too many of our people they offer no place in which to live.

Too many of our people inhabit substandard housing. Too many of our people cannot find decent housing at a rental they can afford. Too many of our people want to leave our cities because they cannot find housing.

New York City suffers from a housing shortage more acutely than any city in the Nation.

The bill before us is not a cure-all for the diverse and complex housing ills which plague our cities. But it is an important bill that will help. It is deserving of our support.

Certain portions of the bill deserve particular comment.

The bill will increase by \$2.9 billion the capital grant authorization for urban renewal over the next 4 years. The committee recognized, in its report, that a serious problem of urban blight remains, which can be solved only with the aid of the Federal Government. I have maintained for some time that conquest of these slum conditions requires the mobilization of all resources—Federal, State, and local.

We have benefited from our experience by updating the general neighborhood renewal program to permit spot renewal of areas which are in partly good condition. We have also learned that it is often preferable to rehabilitate rather than destroy existing housing.

The neighborhood facilities grants authorized under title VI, and liberalization of the urban beautification and improvement programs of title VIII, can be of great benefit to New York and other cities with high density population concentrations. The cost to society of providing treatment for illness, making welfare payments, combating crime, and meeting the problems of the aged can be greatly reduced by the type of preventive measures which the neighborhood facilities will provide. The concept of acquiring and clearing developed land for small parks, squares, playgrounds, pedestrian malls, and the like is one which I have long favored. In built-up urban areas such as New York, where all too little thought has been given to such facilities, it is a way of providing needed recreational and breathing space.

The use of existing private housing in addition to new public housing to provide greater numbers of low-rent accommodations is one of the most important and constructive parts of this bill. The rent certificate program can, in many areas, provide badly needed additional units immediately at a cost to the taxpayer well below that of new public

housing. I commend our colleague from New Jersey [Mr. WIDNALL], on this important contribution he has made to the bill. The gentleman has significantly contributed to the whole bill, but this portion carries his special mark.

Direct housing loans to our elderly and handicapped citizens represent a partial answer to one of our most pressing needs. Our senior citizens are often living on fixed incomes substantially lower than those required to meet the increasing cost of adequate housing. These loans will enable many of them to continue to live near their families, in those areas in which they have made their homes for most of their lives. Of great help along these lines will also be the grants authorized to permit low-income homeowners to finance necessary repairs and improvements to avoid displacement in urban renewal areas.

The most important, as well as the most controversial, section in this bill is the rent supplement provision. This program would provide Federal assistance to low and moderate income families and individuals for partial rental of nonpublic housing. The persons benefiting from this section would be limited to those displaced by governmental action, such as urban renewal, 62 years of age or older, physically handicapped, or living in substandard housing.

These groups need and deserve more help than our present public housing programs can provide. There simply is not enough public housing now in existence, underway, or contemplated for the foreseeable future to shelter our low-income families. Furthermore, many of those with very moderate incomes are caught betwixt and between. They earn too much to qualify for public housing, yet not enough to afford decent private housing.

Our cities will be what we make of them. Unless we make it possible for our skilled low and middle income groups to find decent housing, we will drive them and their economic talents from our cities. This is as good a way to weaken the economy of our cities as anything I can think of; and weaken them in every other way too, most especially in human values.

The rent supplement program should not be regarded by anyone as a radical proposal. It is, in fact, far less "radical," as long as that word is being used by some, than straight public housing. Public housing includes rent supplements; it is also bricks and mortar; it is total government. The proposal before us on rent supplements is partial government and, together with the rent certificate program authored by Mr. WIDNALL, will make immediately available decent, safe, and sanitary shelter to those who badly need it.

Furthermore, public housing too often has been stereotyped and has resulted in an unhealthy economic segregation. The rent certificate and rent supplement programs avoid this.

I intend to vote for this bill and all its provisions and I ask for its support.

(Mr. LINDSAY asked and was given permission to revise and extend his remarks.)

Mr. KUNKEL. Mr. Chairman, I offer two amendments.

The Clerk read as follows:

Amendments offered by Mr. KUNKEL: After line 4 on page 24, insert two new sections, as follows:

"ACQUISITION OF CERTAIN PROPERTIES SITUATED AT OR NEAR MILITARY BASES WHICH HAVE BEEN ORDERED TO BE CLOSED

"SEC. 1009. (a) The Secretary of Defense is authorized to acquire title to any property, improved with a one- or two-family dwelling, which is situated at or near a military base or installation which the Department of Defense has, subsequent to November 1, 1964, ordered to be closed in whole or in part, if he determines—

"(1) that the owner of such property is, or has been, employed or performing military service at such base or installation;

"(2) that the closing of such base or installation, in whole or in part, has required or will require the termination of such owner's employment or service at such base or installation; and

"(3) that as the result of the actual or pending closing of such base or installation there is no present market for the sale of such property upon reasonable terms and conditions.

"(b) The purchase price of any property which is situated at or near a military base or installation and is acquired under this section shall be equal to an amount determined by the Secretary of Defense to be the average price at which properties, similar in size, construction, condition, and location to that of the property to be acquired, were sold during a representative period, as determined by the Secretary, prior to the announcement of the intention of the Department of Defense to close all or part of such base or installation.

"(c) The title to any property acquired under this section shall be free and clear of any outstanding liens or encumbrances and shall conform to such requirements as the Secretary of Defense shall by regulation require. Such regulations shall also prescribe the terms and conditions under which payments may be made under this section, and decisions by the Secretary regarding such payments, and the terms and conditions under which the same are approved or disapproved, shall be final and conclusive and shall not be subject to judicial review.

"(d) Properties acquired under this section shall be transferred to the Federal Housing Commissioner, and the Federal Housing Commissioner shall have the power to deal with, rent, renovate, or sell for cash or credit any properties so transferred. Receipts from the management or sale of any such properties may be utilized by the Commissioner to defray expenses arising in connection with the management of such properties, and any part of such receipts not required for such expenses shall be covered into the Treasury as miscellaneous receipts.

"(e) Section 223(a) of the National Housing Act is amended—

"(1) by striking out the period at the end of paragraph (7) and inserting in lieu thereof "; or"; and

"(2) by inserting after paragraph (7) a new paragraph as follows:

"(a) executed in connection with the sale by the Commissioner of any housing acquired pursuant to section 108 of the Housing and Urban Development Act of 1965."

"(f) Such sums as may be necessary to carry out the provisions of this section are hereby authorized to be appropriated, and any sums so appropriated shall remain available until expended.

"MORTGAGE RELIEF FOR HOMEOWNERS WHO ARE UNEMPLOYED AS THE RESULT OF THE CLOSING OF A FEDERAL INSTALLATION

"SEC. 1010. (a) For the purposes of this section—

"(1) The term 'mortgage' means a mortgage which (A) is insured under the National Housing Act, or (B) secures a home loan guaranteed or insured under the Serviceman's Readjustment Act of 1944 or chapter 37 of title 38, United States Code.

"(2) The term 'Federal mortgage agency' means—(A) the Federal Housing Commissioner when used in connection with mortgages insured under the National Housing Act, and (B) the Administrator of Veterans' Affairs when used in connection with mortgages securing home loans guaranteed or insured under the Servicemen's Readjustment Act of 1944 or chapter 37 of title 38, United States Code.

"(3) The term 'distressed mortgagor' means an individual who (A) is unemployed, although willing to work, as the result of the closing (in whole or in part) of a Federal installation, and (B) is the owner-occupant of a dwelling upon which there is a mortgage securing a loan which is in default because of the inability of such individual to make payments of principal and/or interest under such mortgage.

"(b) (1) Any distressed mortgagor, for the purpose of avoiding foreclosure of his mortgage, may apply to the appropriate Federal mortgage agency for a determination that suspension of his obligation to make payments of principal and/or interest under such mortgage during a temporary period is necessary in order to avoid such foreclosure.

"(2) Upon receipt of an application made under this subsection by a distressed mortgagor, the Federal mortgage agency shall issue to such mortgagor a certificate of moratorium if it determines, after consultation with the interested mortgagee, that (A) the mortgagor is not in default with respect to any condition or covenant of the mortgage other than that requiring the payment of installments of principal and/or interest under the mortgage, and (B) such action is the only available means whereby a foreclosure of such mortgage can be avoided.

"(3) Prior to the issuance to any distressed mortgagor of a certificate of moratorium under paragraph (2), the Federal mortgage agency shall require such mortgagor to enter into a binding agreement under which he will be required to make payments to such agency, after the expiration of such certificate, in an aggregate amount equal to the amount paid by such agency in behalf of such mortgagor as provided in subsection (c). The manner and time in which such payments shall be made shall be determined by the Federal mortgage agency having due regard to the purposes sought to be achieved by this section.

"(4) Any certificate of moratorium issued under this subsection shall expire on whichever of the following dates is the earliest (A) three years from the date on which such certificate is issued; (B) thirty days after the date on which the mortgagor to whom such certificate is issued ceases to be a distressed mortgagor as defined in subsection (a); or (C) the date on which such mortgagor becomes in default with respect to any condition or covenant in his mortgage other than that requiring the payment by him of installments of principal and/or interest under the mortgage.

"(c) (1) Whenever a Federal mortgage agency issued a certificate of moratorium to any distressed mortgagor with respect to any mortgage, it shall transmit to the mortgagee a copy of such certificate, together with a notice stating that, while such certificate is in effect, such agency will assume the obligation of such mortgagor to make payments

of principal, and if so specified in the certificate, of interest, under the mortgage.

"(2) Payments made by any Federal mortgage agency pursuant to a certificate of moratorium issued under this section with respect to the mortgage of any distressed mortgagor shall include, in addition to the payments referred to in paragraph (1), an amount equal to the unpaid principal and interest charges which had accrued under such mortgage prior to the issuance of such certificate and subsequent to the date on which such mortgagor became a distressed mortgagor as defined in subsection (a).

"(3) While any certificate of moratorium issued under this section is in effect with respect to the mortgage of any distressed mortgagor, no further payments of principal, and if so specified in the certificate, of interest, under the mortgage shall be required of such mortgagor, and no action (legal or otherwise) shall be taken or maintained by the mortgagee to enforce or collect such payments. Upon the expiration of such certificate, the mortgagor shall again be liable for the payment of all amounts due under the mortgage in accordance with its terms.

"(4) Each Federal mortgage agency shall give prompt notice in writing to the interested mortgagor and mortgagee of the expiration of any certificate of moratorium issued by it under this section.

"(d) The Federal mortgage agencies are authorized to issue such individual and joint regulations as may be necessary to carry out this section and to insure the uniform administration thereof.

"(e) There shall be in the Treasury (1) a fund which shall be available to the Federal Housing Commissioner for the purpose of extending financial assistance in behalf of distressed mortgagors as provided in subsection (c), and (2) a fund which shall be available to the Administrator of Veterans' Affairs for the same purpose. The capital of each such fund shall consist of such sums as may, from time to time, be appropriated thereto, and any sums so appropriated shall remain available until expended. Receipts arising from the programs of assistance under subsection (c) shall be credited to the fund from which such assistance was extended. Moneys in either of such funds not needed for current operations, as determined by the Federal Housing Commissioner, or the Administrator of Veterans' Affairs, as the case may be, shall be invested in bonds or other obligations of the United States, or paid into the Treasury as miscellaneous receipts.

"(f) Section 1816 of title 38, United States Code, is amended by inserting '(a)' before the text of such section, and by adding at the end thereof a new subsection as follows:

"(b) With respect to any loan made under section 1811 which has not been sold as provided in subsection (g) of such section, if the Administrator finds after there has been a default in the payment of any installment of principal or interest owing on such a loan, that the default was due to the fact that the veteran who is obligated under the loan has become unemployed as the result of the closing (in whole or in part) of a Federal installation, he shall (1) extend the time for curing the default to such time as he determines is necessary and desirable to enable such veteran to complete payments on such loan, including an extension of time beyond the stated maturity thereof, or (2) modify the terms of such loan for the purpose of changing the amortization provisions thereof by recasting, over the remaining term of the loan, or over such longer period as he may determine, the total unpaid amount then due with the modification to become effective currently or upon the termination of an agreed-upon extension of the period for curing the default."

Mr. KUNKEL. Mr. Chairman, one of these amendments provides for people who are unemployed as a result of the closing of a Federal installation.

This amendment has already been included in the Senate bill. The second amendment provides for the acquisition of certain property situated at or near military bases which have been ordered to be closed and it will protect those who are forced to sell their houses at a low price when they have to move to a far-off installation.

Mr. BARRETT. Mr. Chairman, the majority side has no objection to the amendment.

Mr. WIDNALL. Mr. Chairman, the minority has no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. KUNKEL].

The amendment was agreed to.

The CHAIRMAN. The Chair recognizes the gentleman from Georgia [Mr. HAGAN].

AMENDMENT OFFERED BY MR. HAGAN
OF GEORGIA

Mr. HAGAN of Georgia. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HAGAN of Georgia: On page 107, after line 14, add the following new section:

"URBAN RENEWAL PROJECT IN SAVANNAH, GA.

"Sec. 1010. (a) Notwithstanding any provision of the Housing Act of 1949 or any other provision of law, the urban renewal project in Savannah, Ga., known as Project 'J' in the General Neighborhood Renewal Plan for the Broad Street-Canal Urban Renewal Area adopted by resolution of the mayor and aldermen of the city of Savannah on November 18, 1958, may include the donation by housing authority of Savannah, by a suitable instrument of conveyance, of the right, title, and interest of the authority in and to all or any portion of the land included within the boundaries of such Project 'J' in the city of Savannah, Chatham County, Ga., the area of such Project 'J' being generally bounded on the north by properties of the Central of Georgia Railway Co., on the east by West Broad Street, in the south by the right-of-way for Interstate Highway No. I-16, and on the west by the Savannah and Ogeechee Canal and West Boundary Street.

"(b) The conveyance authorized to be included in the urban renewal project under subsection (a) of this section shall be made only if the donee represents, and furnishes such assurances as may be required by housing authority of Savannah, that such donee will develop, preserve, and operate such property on a nonprofit basis as a historical site or monument."

Mr. STEPHENS. Mr. Chairman, will the gentleman yield?

Mr. HAGAN of Georgia. I am delighted to yield to my colleague, the gentleman from Georgia.

Mr. STEPHENS. As I understand this amendment, this will provide for authority only for the housing authority of the city of Savannah to set aside a parcel of land to be used as a part to commemorate the valiant service of that great Polish count, Count Pulaski, in the American Revolution.

Mr. HAGAN of Georgia. That is correct.

Mr. STEPHENS. And there is no money involved here at the present time?

Mr. HAGAN of Georgia. None whatsoever.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. HAGAN].

The amendment was agreed to.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. SAYLOR].

AMENDMENT OFFERED BY MR. SAYLOR

Mr. SAYLOR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SAYLOR: On page 24, line 3, add the following new sentence to section 1009:

"For the purpose of this section, public ownership and public systems are defined to include investor-owned enterprises rendering water, or sewer services as public utilities and subject to regulation by State regulatory authorities with respect to user rates and charges, capital structure, methods of operation, and rate of return."

Mr. SAYLOR. Mr. Chairman, the purpose of this amendment is to make sure that organizations which are now regulated by the State are given the same authority as other bodies.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I am happy to yield to the gentleman.

Mr. PATMAN. I would like to ask the gentleman a question. This amendment says "to include investor-owned enterprises rendering water, or sewer service as public utilities and subject to regulation by State regulatory authorities." This does not exclude any entity such as the REA; does it?

Mr. SAYLOR. It does not.

Mr. PATMAN. It does not exclude them. It includes them. Why do you think an amendment is necessary to include them? Does the language specifically exclude them?

Mr. SAYLOR. Because the people in Pennsylvania who are in the Pennsylvania Utility Commission have said if the language remains as it is in the bill at the present time, they will be excluded.

Mr. PATMAN. What is the language that would cause them to be excluded?

Mr. SAYLOR. It is the whole section.

Mr. PATMAN. I have read the language there and I am only trying to help the gentleman, but I do not see the language that would exclude them.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. SAYLOR].

The amendment was rejected.

AMENDMENT OFFERED BY MR. HAGAN OF
CALIFORNIA

Mr. HAGAN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HAGAN of California: On page 93, after line 20, insert the following new section:

"DEFINITION OF A RURAL AREA

"Sec. 907. Title V of the Housing Act of 1949 is amended by adding at the end thereof (after the new section added by section 906 of this Act) the following new section:

"Sec. 520. The terms 'rural' and 'rural area' as used in this title mean any area, open country, place, town, village, or city having a population of 5,500 inhabitants or

less than is not part of or associated with an urban area.'"

(Mr. HAGAN of California asked and was given permission to revise and extend his remarks.)

Mr. HAGAN of California. Mr. Chairman and Members of the committee, we have been washed by a beneficent flood all afternoon, and I do not wish to disturb the spirit of this occasion.

I have a very fine amendment, which establishes a statutory definition of a "rural area" for the Farmers Home Administration's nonfarm rural loan program.

The general impetus for services for the low-income groups in any housing and urban development program, must also, equally include services for those of the rural areas under deprivation, and in particular, the seasonal farmworker.

One of the most viable tools for a sustained attack on the deficiencies of seasonal farm labor housing has been self-help housing. Self-help housing is a technique whereby the farm laborer adds his own "sweat equity" with that of his neighbors in concert, in building his own home during the period of the dearth of harvest winter work. A project in self-help housing, sponsored by the American Friends Service Committee in Tulare County, Calif., over the past 3 years has been a signal success in farm labor housing as well as reshaping the lives of its participants. Finding that one can creatively contribute to the shelter for one's family has given confidence to scores of people in realizing success in other endeavors, such as better jobs and better education for one's self and one's children.

These successes in the self-help housing have led to the expansion of the program in California by two grants from the Office of Economic Opportunity for technical assistance. Similar projects are either in operation or in the planning stages in such diversely scattered States as New Jersey, Texas, Arizona and Pennsylvania.

Without the cooperation of the Farmers Home Administration, and in particular its rural home loan program, self-help housing could never be a success.

The long-term 33 year loans, at an interest rate of 4 percent, now available from Farmers Home Administration are a necessary component of any program that will sensibly coincide with the ability of farmworkers to meet the financial obligations of a regular, monthly payment.

If the interest rates were raised over the 4 percent by Farmers Home, it is certain that this would preclude a large number of farm laborers from ever owning their own homes, since it is the low interest rate, coupled with the 1,000 man-hours average of work contributed by the owner-builder, that makes this program financially feasible.

Woodlake, Calif., is an agricultural community of about 3,000, in the heart of the citrus-olive and grape belt, couched in the foothills of the Sierra, in the east side of Tulare County. Two years ago, the City Council of Woodlake, realizing that some of the housing in the area

violated every normal code of health, safety, and decency, instituted a program whereby they condemn at least two "shacks" a month.

They realize that the concern that caused them to condemn these structures would eventually lead to the situation where they would, in fact, be "throwing away the baby with the wash water," unless the dilapidated housing in Woodlake was replaced, as the bulk of its seasonal farmworker residents use this community as a "home base," harvesting the diverse crops in the region.

Groups of farmworkers, as well as township officials, were eager to involve themselves of the self-help technique through the use of Farmers Home rural home loans. This was denied them, since it is a policy that loans are only forthcoming for communities of 2,500 population or under.

Restrictions of loans to communities of 2,500 in population precludes participation of much of the bulk of seasonal or migratory farmworkers in California. The majority of these workers do not live in ranch-based camps but in fringe complexes or clumps attached to the towns and cities of rural California, and the more agriculturally diversified the area, the more the farmworker has become an integrated part of the community in which he lives.

This strong stabilizing force also depends so much on home ownership, and with it, the pride and commitment of which it entails. Easier access to health and educational facilities available to residents of community based housing is itself an impetus to self-betterment.

The 2,500 population base, used by the USDA census tract to delineate non-rural from rural, therefore penalizes a seasonal farmworker who lives in a labor intensive agricultural area from realizing the fruits of the Farmers Home rural home loan program. The California sister counties of Tulare, Kern, and Fresno, and the communities within them, are certainly not "urban" communities of as defined by an arbitrary, outmoded census delineation. These three counties are, in fact, the most productive agricultural counties from the viewpoint of crop value in all of the United States, and have been so for more than a decade.

I realize that the Farmers Home use of the 2,500 population policy limitation on rural home loans stems mainly from a lack of loan funds to broaden their program. I therefore urge the following:

First. That the Farmers Home Administration consider broadening their administrative policy to include agriculturally dependent communities of 5,500 or less population, instead of 2,500.

Second. And that added and sufficient loan funds be made available to the rural home loan program coincident to the broadened policy of servicing communities of 5,500 in population.

When the seasonal or migrant farmworker section of the Economic Opportunity Act of 1964—Section 3B—included "housing" as an area for succor, it

was expected that the existing rural home loan programs of Farmers Home Administration would be the primary vehicle for implementation of a program for satisfying this need.

It was felt the prime need for family housing for seasonal farmworkers would also encourage those individuals so motivated to help build their own, and the growing thrust of self-help and self-betterment would not be blunted by program limitations.

I have discussed the amendment with the Chairman of the committee and the chairman of the subcommittee and presented it to the gentleman from New Jersey. I believe it is acceptable.

Mr. PATMAN. Mr. Chairman, we are willing to accept the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. HAGEN].

The amendment was agreed to.

The CHAIRMAN. Under the motion of the gentleman from Texas, all time having expired, amendments at the Clerk's desk can be read but cannot be debated.

AMENDMENT OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DINGELL: On page 67, before the period in line 7, insert the following:

"Provided, That no grant shall be made under this section for any sewer facilities unless the Secretary of Health, Education, and Welfare certifies to the Administrator that any waste material carried by such facilities will be adequately treated before it is discharged into any public waterway, so as to meet applicable Federal, State, interstate, or local water quality standards".

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. DINGELL].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BANDSTRA

Mr. BANDSTRA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BANDSTRA: On page 107, after line 14, add the following:

"URBAN RENEWAL PROJECT IN OTTUMWA, IOWA
"SEC. 1010. Notwithstanding the June 1956 commencement of certain flood control work in Ottumwa, Iowa, local expenditures in connection with such flood control work shall, to the extent otherwise eligible, be counted as a local grant-in-aid to the Marina Gateway urban renewal project (Iowa R-12) in accordance with the provisions of title I of the Housing Act of 1949."

Mr. BANDSTRA. Mr. Chairman, I rise to offer an amendment to the Housing and Urban Development Act of 1965. This amendment deals only with the city of Ottumwa, in south-central Iowa, and it is designed to clear up a problem in connection with the city's urban renewal program.

The city is moving ahead with plans for the Marina Gateway urban renewal project, directly adjacent to the Des Moines River as it flows through Ottumwa. The city already has con-

structed a flood control project, financed almost entirely by local funds, which serves to protect the urban renewal area.

Normally, under title I of the Housing Act of 1949, Ottumwa would be eligible to receive Federal grant-in-aid credit for the flood control project which would offset, in large measure, the local cost for urban renewal work.

The Housing Act of 1949 provides for such grant-in-aid credit if a city-financed project, such as the flood prevention work, is of direct and substantial benefit to the urban renewal program. This is clearly the case in Ottumwa, for the Marina Gateway project is in a low-lying area that would be subject to flooding if it were not for the levees constructed by the city.

Ottumwa, however, is faced with a problem stemming from another provision in the Housing Act. This requires that, for a city to be eligible for grant-in-aid credit toward the local share of the urban renewal cost, work on the urban renewal project must start within 3 years from the completion of a related project, such as Ottumwa's flood prevention work.

In Ottumwa's case, this 3-year limit ran out on May 15. The purpose of the amendment I am offering, therefore, is to waive this 3-year limit, as it applies to the Marina Gateway project in Ottumwa, and thereby make the city eligible to receive grant-in-aid credit.

It should be pointed out that in 1947 Ottumwa was subjected to severe flooding. About one-third of the city, including what is now the Marina Gateway urban renewal area, was under water. In all, the flood caused an estimated \$22 million in damage.

Because of the severity of the 1947 flood, the city proceeded as quickly as possible to avoid a similar disaster in the future. Ottumwa decided to finance the flood control project almost entirely from local funds, rather than wait to receive substantial Federal aid for the flood prevention work.

Since a heavy financial obligation was involved, the city could proceed on only one large undertaking at a time. Ottumwa went ahead with the flood control project, and waited until that was finished before starting its urban renewal planning. Hence there was an unavoidable time-lag between the flood control and urban renewal projects.

If Ottumwa does not receive grant-in-aid credit for the flood control work, the city and its citizens would, in effect, be penalized for going ahead on the flood prevention work at local expense. The amendment I am offering would remove that inequity, and I strongly urge its passage.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. BANDSTRA].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DUNCAN OF OREGON

Mr. DUNCAN of Oregon. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DUNCAN of Oregon: On page 45, line 6, after section 212 of H.R. 7984, insert:

"REFINANCING OF HOUSING FOR ELDERLY PROJECTS"

"SEC. 213. Section 231(c)(7) of the National Housing Act is amended by striking out 'with 50 per centum' and inserting in lieu thereof 'or involves the refinancing of a mortgage covering an existing property or project in which it has been determined by the Commissioner that such refinancing is necessary or desirable in order to avoid hardship for elderly or handicapped persons or families who are tenants or prospective tenants of such project: *Provided*, That in either case, such property or project shall contain 50 per centum.'"

Mr. DUNCAN of Oregon. Mr. Chairman, the amendment would authorize FHA mortgage insurance for refinancing existing housing for the elderly where it is determined by the commissioner that such refinancing is necessary or desirable to avoid hardship for elderly or handicapped persons.

Briefly, the circumstances which occasioned the need for this amendment involve the Rouge Valley Manor, a retirement home in Medford, Ore., with just under 400 units. At the time of construction, this nonprofit corporation, and others in Oregon, justifiably assumed that they would be exempt from real property taxes under Oregon law as are similar projects in many other States. Their financing was, therefore, planned accordingly. A subsequent Oregon Supreme Court decision disabused them of this assumption and held that they would have to pay real property taxes. They are now faced with a back tax liability of just under \$500,000 in addition to payment of a short-term loan and mortgage and are facing a tax foreclosure proceeding in August.

While this amendment would not add any new units, it provides the tool which will prevent the loss of almost 400 units already in existence. With long-term financing and the renegotiation of care contracts and loans from residents, it appears that all of their obligations can be met. An FHA guarantee is available for new construction and for refinancing housing for the elderly where the initial financing was through FHA. It seems incongruous not to make the FHA guarantee available to prevent the loss of housing where the project is otherwise sound and the loan has a reasonable chance of repayment simply because the institution was originally funded privately. This amendment closes this gap and I urge its adoption.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon [Mr. DUNCAN].

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. DOWDY

Mr. DOWDY. Mr. Chairman, I offer three amendments.

The CHAIRMAN. Without objection, the amendments will be considered en bloc. The Clerk will state the amendments.

The Clerk read as follows:

Amendment offered by Mr. Dowdy: At page 55, following line 13, insert the following new section:

"REHABILITATION OF STRUCTURES IN URBAN RENEWAL AREAS"

"SEC. 309. Section 105 of the Housing Act of 1949 is amended by adding at the end thereof the following new subsection:

"(f) Unless the owner thereof consents thereto, no privately owned structure within an urban renewal area shall be acquired if (1) such structure, and the property on which it is located, can be economically improved or modified for use in conformity with the project plan approved for redevelopment or rehabilitation of a project area, and (2) the owner (or lessee, with the approval of the owner) of such structure promptly presents satisfactory evidence that he is willing and able to make the necessary improvements or modifications to conform such structure and property to the approved project plan for the project area in a reasonable period of time."

And redesignate the succeeding sections accordingly.

Mr. DOWDY. Mr. Chairman, the amendment to H.R. 7984, which I have presented to the House, is a very sound and very simple one. It will save needless expenditure of Federal funds. It will save needless expenditure of funds in local communities which have or may have urban renewal projects. It will enable every Member of this body to face his local homeowners and the owners of local business and commercial structures to tell his constituents honestly that he supported provisions in the law which would permit them to retain ownership of their property if they were ready and willing to improve and rehabilitate it for use in accordance with an approved project plan. I do not believe Members of the House would stand before their constituents and state publicly that they favored a procedure under which the private property of one person can be condemned and then sold to another private person to be used for the identical purposes under the same renewal plan.

The amendment simply provides that any privately-owned building or structure, which can be rehabilitated to conform to a project plan, cannot be condemned if the owner or lessee, on agreement with the owner, is ready, willing, and able to make the necessary changes to comply with the approved project plan. In the event the owner is agreeable to the acquisition of his property, the Agency may acquire it. Under the amendment a structure will not remain in an urban renewal project area unless it harmonizes with the design and the uses which are provided in the project plan.

The amendment would apply to residential structures as well as business and commercial structures.

Not only will the amendment save Federal and local taxpayers' funds, but it supports and augments the basic purposes and the intent of Congress in the concept of urban renewal, namely, the conservation and rehabilitation of property, and the redevelopment of substandard and blighted areas. Nothing in the amendment, in any way, diminishes the power of removal of slum or blight in any urban renewal area.

Further, the amendment is in complete harmony with the views expressed

by the President of the United States. In his message to Congress on "The Problems and Future of the Central City," on March 2, 1965, the President stated:

We have concentrated on almost all our past efforts on building new units, when it is often possible to improve, rebuild, and rehabilitate existing homes with less cost and less human dislocation. Even some areas now classed as slums can be made decent places to live with intensive rehabilitation. In this way it may often be possible to meet our housing objectives without tearing people away from their familiar neighborhoods and friends.

The amendment which I have presented would merely require that the President's objectives, which I have just stated, are actually carried out in the course of urban renewal redevelopment.

At the time he signed the Housing Act of 1964 on September 2, 1964, the President stated:

The plight of property owners in urban renewal areas is recognized in this measure. Provision is made so that they can rehabilitate their homes and businesses instead of having to move from the path of the bulldozer. Looking ahead, this measure assists local communities in enforcing housing codes so blight does not develop or persist in the future.

While the President's comment was directed to the matter of assisting communities and property owners by maintaining housing code standards so as to prevent blight, the amendment I have offered supplements to the President's recognition of the plight of property owners in urban renewal areas by giving to the owners of homes and business properties the full right to retain their ownership and be relieved from the process of condemnation where they are willing and able to improve, rehabilitate, or repair structures in harmony with the design and the uses contained in an urban renewal area project plan.

This amendment preserves the basic concept and right of citizens in the United States to the ownership and enjoyment of their property. The entire urban renewal program is based on the concept that the condemnation of privately-owned property is necessary and desirable for a public purpose and a public use. The property owner, under this amendment, does the same thing that would be accomplished after condemnation of his property, and there is no public use of public purpose to be served by taking his property from him. Without the approval of this amendment the Members of this House in substance and in legal effect will be saying to every property owner of the Nation that it is proper to use the public power of condemnation to take private property of one person for the sole purpose of turning the ownership of that property over to another person, for the same purpose, and using the taxes paid by the property owner in the process of doing it. Any such idea is utterly alien to any concept in our Constitution or any purpose or need in any community in the Nation.

In connection with the question of savings to the Federal and local governments, I call attention to studies which

have been made by the Comptroller General of the United States. I am sure that his findings would be supplemented greatly if there were any comprehensive study made in urban renewal projects throughout the United States regarding the present practice of acquisition of and, in many instances, the demolition of sound usable structures which could have been retained within the project plan for use in harmony with the program.

The review of the Erie View project in Cleveland, Ohio, by the Comptroller General showed that millions of dollars in needless expenditures to the public had been accrued by the acquisition of sound structures which could have been used in connection with a program. Some of these structures were valued at amounts approaching a million dollars and the deficiencies in those structures, on the basis of which they were declared substandard, were no more than items which could be taken care of in normal annual maintenance. Yet the Comptroller General found in structure after structure this kind of arbitrary assessment of deficiencies had been used to characterize a building as substandard paving the way for acquisition and demolition.

The Clerk read as follows:

Amendment offered by Mr. Dowdy: At page 56, after line 13, insert the following new section:

"RELOCATION PAYMENTS

"SEC. 311. Section 114(b) is amended to read as follows:

"(b) a local public agency—

"(1) shall pay to any displaced business concern or nonprofit organization, its reasonable and necessary moving expenses and any actual direct losses of property, except goodwill or profit: provided, that such payment shall not exceed \$3,000 (or if greater, the total certified actual moving expenses); and

"(2) may pay to any displaced business concern or nonprofit organization, an additional \$1,500 in the case of a private business concern with annual net earnings of less than \$10,000 per year which (A) was doing business in a location in an urban renewal area on the date of local approval of the urban renewal plan (or of acquisition of real property under the third sentence of sec. 102(a)), (B) is displaced on or after January 27, 1964, and (C) is not a part of an enterprise having establishments outside the urban renewal area.

"Notwithstanding the provisions of clause (1) of the preceding sentence, a business concern which is not being displaced from an urban renewal area shall be eligible for payments under such clause (1) of its certified moving expenses with respect to its outdoor advertising displays being removed from the urban renewal area in the same manner as though such business concern were being displaced."

And redesignate the succeeding sections accordingly.

Mr. DOWDY. Mr. Chairman, the amendment which I have offered is essential if thousands of small businesses are to be treated with justice and fairness under the urban renewal program. The amendment provides that within urban renewal areas there shall be paid to displaced businesses the total amount of actual certified moving expenses, regardless of the amount of those expenses. There is no intent in this amendment that any person receive any

special benefits or privileges, but that businesses merely be made whole for their out-of-pocket costs when they are forced to move because of urban renewal. At the present time, under regulation, a displaced business cannot be reimbursed more than \$25,000, regardless of what amount he must spend to move his business.

The purpose of this amendment is to assure that displacees will be reimbursed for their actual certified moving costs when they are compelled, by reason of an urban renewal plan, to move to another location. There is no justifiable basis on which, as a part of a public program, some businesses may receive the full amount of their moving costs, and other businesses likewise compelled to move, are reimbursed only part of their actual moving costs. If the program is for the benefit of the public, those who are displaced should not be compelled to pay a subsidy to urban renewal over and above that paid by others. Their losses from disruption of business can be staggering enough without being forced to bear additional costs for benefit of the program.

It may be noted that some businesses have been forced or will be forced to move the second time with allowance of only part of their actual moving costs. I do not believe that any Member of this body would go before the public and advocate that such a procedure of urban renewal has any of the elements of fairness and justice. In hearings before the subcommittee of which I was chairman, one displacee, had moving costs far in excess of the allowance paid by the renewal agency. After the costs of the first move, the loss of business, inconvenience, and the expenditure of thousands of dollars for the erection of a new structure, he is threatened with a second dislocation by urban renewal. He stated that if he were forced to move again he thought he would go to New Zealand.

The economic shock of urban renewal on small businesses cannot be denied. The facts are too well documented. In testimony before the House Small Business Committee, the Administrator of the Small Business Administration stated that 3 out of each 10 businesses displaced by urban renewal do not survive. He estimated that 30,000 businesses might be put out by urban renewal between now and 1972.

It is not uncommon to find that 40 percent or more of the businesses displaced by urban renewal in a community do not survive. Those who do continue often have serious business losses. Small Business Administrator Foley cited the experience of the businesses displaced by urban renewal in Providence, R.I. There 40 percent did not survive. Very small businesses which did relocate experienced a 60-percent drop in income. Medium small businesses had a loss of 32 percent in income. Larger small businesses suffered income losses of 34.7 percent.

In hearings before my subcommittee of the House District Committee, wit-

nesses were confronted with similar facts about local displaced businesses. A remedy suggested was legislation providing for the payment of subsidies to businesses displaced by urban renewal. This means on one hand you operate a federally subsidized program to put small businesses out of business and then apply more subsidies to put them back in business.

The amendment I have presented does no such thing. All this amendment says is that whatever cost a business is compelled to pay because of the urban renewal program will be repaid to the displaced business in full. That is the only honest, just and fair thing to do.

The executive director of the District of Columbia Redevelopment Land Agency testified on business problems under urban renewal on June 8 this month before the House Small Business Committee. He stated—and I quote:

In my opinion the greatest deficiency in redevelopment regulations—as they are now administered—is the \$25,000 limitation on business relocation payments.

The amendment which I have presented will remedy this situation. On the ground of plain American fair play, it should be approved overwhelmingly by the House.

The Clerk read as follows:

Amendment offered by Mr. Dowdy: at page 56, following line 4, insert the following new section:

"STANDARDS OF ELIGIBILITY FOR URBAN RENEWAL AREAS

"SEC. 310. Section 106 of the Housing Act of 1949 is amended by adding at the end thereof (after the new subsection added by section 309 of this Act) the following new subsection:

"Notwithstanding any other provision of this title, no new contract for a loan or capital grant under this title with respect to any project in an urban renewal area shall be entered into with any local public agency unless the local public agency shall have furnished satisfactory evidence to the Administrator that the standards used for finding and declaring such area suitable for urban renewal shall, in the case of housing, building, health, and public safety codes and regulations, be in accordance with the housing, building, health, and public safety codes and regulations of the locality."

And redesignate the succeeding sections accordingly.

Mr. DOWDY. Mr. Chairman, this amendment would make sure that urban renewal planners would not overrule city codes and regulations; thus, homeowners on opposite sides of the same street, dividing a project area from another area, would all be governed by the same codes. Unfortunately, this Congress will be in session only 5 or 6 months longer this year, so we must be limited to only 45 minutes for consideration of amendments to the last 100 pages of this bill containing dozens of sections.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Texas [Mr. Dowdy].

The amendments were rejected.

H.R. 7984

Mr. McGRATH. Mr. Chairman, I am in favor of this bill—all of it. I voted for it in Committee and expect to vote for its passage.

I would like to call attention to the provisions in the bill which I consider of special importance. These are the new aids to housing for the elderly.

The older age group is growing more rapidly than the population as a whole. Many retired people live in my district—especially in Atlantic City. I am well acquainted with their problems. Many of them live in housing that is far from adequate for their needs.

Generally speaking, their incomes are substantially lower than those of other families. These elderly people do not have the ways and means of increasing their incomes that younger families have. Many cannot afford decent housing. Most of them have made substantial contributions to their country during their productive years. They deserve to have adequate housing during their autumn years.

Of most significance are the provisions in the bill to provide rent supplements for elderly persons of low or moderate incomes. Over 100,000 elderly with incomes of \$3,000 to \$5,000 would be provided with decent housing under the rent supplement provisions. They would have to pay one-fourth of their incomes as rent. The Federal Government would make up what is required over that amount to pay the fair market rental for the housing. Without this help, many of these elderly will continue to live in substandard housing.

The direct loan program for housing for the elderly would be continued for 4 years. The limit on the amount of appropriations that can be made for loans under this program would be lifted, in order to assure that there is ample authority for appropriations for loans.

Most important, however, is the reduction of the interest rate on these loans to not more than 3 percent per annum. Under the present law, the interest rate on the loans is 3½ percent and is expected to rise to 4 percent at the beginning of the new fiscal year.

This lower interest rate would reduce the monthly debt service on a typical \$12,000 dwelling unit by around \$6. A corresponding reduction could be made in the monthly rents charged for these dwelling units. Compared to conventionally financed projects this program can reduce rents by \$20 a month.

The bill also provides additional public housing for the low-income elderly families. Somewhere between 20 and 25 percent of the present low-rent public housing is occupied by the elderly.

These dwelling units for the elderly are specially designed for them. For example, they are provided with nonskid floors and levers instead of knobs on doors and faucets. Kitchens and baths are planned for more safe use by the elderly. Many of the projects have space for activities and entertainment of the tenants. This leads to a happier and fuller life for our senior citizens.

The bill would continue for 4 years the mortgage insurance programs administered by the Federal Housing Administration and the Farmers Home Administration for rental housing for the elderly. These too are important tools for providing housing for our elders—both in

town and in rural areas. They are means of encouraging private investment in elderly housing that would otherwise go into other investments.

Another provision in the bill of special interest to elderly would authorize grants to homeowners in urban renewal areas who are required to rehabilitate their homes to bring them up to the required standards.

Without these grants, many elderly people will be forced to move from their homes because they cannot afford to pay for the necessary repairs. The bill would remove a real hardship to elderly persons who have paid for their homes over the years with the expectation that they would have a place to live during the last years of their lives when their incomes are low.

Because of these provisions for the elderly, and because the bill does much more to provide decent homes and good communities, I urge that it be approved by the House.

Mr. BINGHAM. Mr. Chairman, I should like to address a question to the distinguished ranking minority member of the subcommittee with regard to subparagraph (1) of section 23(d), which appears on page 11 of the bill, beginning on line 13.

I am somewhat troubled by the fact that under this provision it will be up to the owner to select those tenants who will not be paying the full rental for their accommodations. Judging from the situation in my district, where there is a far greater demand for public housing accommodations than the available supply, there will be great pressure from potential tenants for admission to the private accommodations under this section, and consequently there may be abuses—kickbacks and the like—in the selection of tenants. I would like to know specifically whether, in the opinion of the minority member of the subcommittee, the selection of tenants under this subsection shall be carried on under the supervision of the public housing agency involved and whether the selections made would be subject to its approval.

Mr. WIDNALL. The answer is in the affirmative.

Mr. WATSON. Mr. Chairman, it is difficult for one to remain long in Washington and retain his sensibility to shock, particularly in view of some of the fantastic proposals made by the administration. But I daresay that even the wildest of dreamers could not have been prepared for some of the proposals in the pending bill, particularly the rent supplement provisions.

My first impression was to dismiss such a suggestion as ridiculous, little dreaming that a committee of this body would dare bring such a proposition to the floor for serious consideration. Yet here we are in that situation and my sensibility to shock has been lessened by a few more degrees.

Pray tell us what will next be proposed for subsidization? Will it be the house at the beach, or in the mountains? Will it be the family automobile, or perhaps the second family car? Or will it be the family TV set so that the occupant of

the White House can be assured that his message reach all the people all the time?

You know as well as I that this measure has stamped on it in bold letters, "I want votes." It is another poorly masked bid for guaranteed, everlasting success at the ballot box by the unfettered wasting of public funds. And, more importantly, it is designed to accomplish in sinister fashion many of the administration's goals in the field of "social reform." The minority report has used the term "across-the-board economic integration." I fully believe the objectives are more far reaching than that.

The rent supplement feature is not the only undesirable provision of this bill but that proposition has served as a smokescreen to divert close examination of other parts of the bill during this debate. With every fiber of my being, I urge you to eliminate this so-called experiment, this \$8 billion experiment, from the bill.

Mr. DANIELS. Mr. Chairman, I rise in support of H.R. 7984, the Housing and Urban Development Act of 1965.

I shall take only a few minutes time to go on record in support of this singularly worthwhile measure. The substance of this bill has been well explained by the gentleman from Texas [Mr. PATMAN] and the gentleman from Pennsylvania [Mr. BARRETT] who in his first attempt at presenting an omnibus housing bill has done a truly outstanding job.

I represent an area where almost all the features of this bill will be very popular but I am not supporting this bill merely because it is good for Hudson County—although it certainly is that—but rather because this bill is good for America.

Eight million Americans live in housing that is considered to be substandard and the reason in almost every case is the same—they cannot afford better housing. This bill proposes to do something about this situation.

The most controversial feature of this bill is contained in title I, section 101, the so-called rent supplement provision which President Johnson has called "the most crucial new instrument in our effort to improve the American city."

It is important for us to remember that this will apply to privately constructed housing. In this way, Mr. Chairman, we shall insure that decent housing is provided for millions of Americans who otherwise would be living in substandard homes without threatening the home building industry which provides some 5 percent of our gross national product.

It is significant to note in this bill that the tenant would pay 25 percent of his income for rent as contrasted with 20 percent or less in public housing.

In public housing, the average unit requires a subsidy of about \$58 a month. The distinguished chairman of the Banking and Currency Committee, Mr. PATMAN, has estimated that the average rent supplement will amount to \$40 per month per unit.

I would also like to point out that this bill also includes an adequate provision for the continuation of our programs for the construction of public housing units. This bill authorizes the construction of an additional 60,000 units a year for the next 4 years or a total of almost one-quarter million units.

This bill also provides for low interest loans to nonprofit groups for the construction of homes for the elderly; extends FHA insurance programs for 4 years; authorizes a new program for providing FHA mortgage insurance of private loans to private subdivision developers who may or may not be home builders and provides an additional \$2.9 billion over the next 4 years for the urban renewal program.

H.R. 7984 also provides for increased compensation for condemned property owners and for the construction of additional college housing to help ease the strain on our colleges and universities.

This bill also authorizes matching grants to local public bodies to finance 50 percent of construction costs of basic public water and sewage facilities and two-thirds of the construction cost of neighborhood facilities.

These are only some of the outstanding provisions of this bill which I heartily recommend for passage.

In his second inaugural address, President Franklin Delano Roosevelt called attention to the fact that one-third of the Nation was "ill fed, ill clad, ill housed: I would like it said of my second administration that these forces met their master." Thirty years later, we have a chance to help finish the task that this great man started. This bill gives every Member of this House an opportunity to strike a blow for a better America.

I commend all who have had a hand in drafting this bill which will do so much for those for whom we have done not nearly enough. We have spent billions to raise the standard of living for people around the globe. And I am not one to say that this is not a worthwhile endeavor. Today, however, we are going to do just a little something for those people who are literally the salt of the earth—the Americans in the middle and lower income brackets.

For a better life for all, I urge all Members to support H.R. 7984.

Mr. DERWINSKI. Mr. Chairman, this rent subsidy plan should properly be labeled as an "antihomewhore" program since it would frustrate middle-income families who are purchasing their homes and making mortgage payments without the benefit of a Federal subsidy.

One of the great phenomena of the post-World War II period has been the growth of homeownership. The dream of homeownership has motivated millions of Americans to purchase and pay for homes of their own. It is completely contradictory to embark on a massive, costly, unworkable rent subsidy program of the kind before us.

Of all the legislative hallucinations of the Great Society, this one takes the cake. It is an insult to the intelligence of the public, a direct thievery of the taxpayers, and makes a mockery of the thrifty

citizen who is purchasing his own home. It sets up a potential boondoggle of Federal funds that will rival the costly and ill-conceived farm subsidies.

As a former member of the House Banking and Currency Committee, I urge House Members to reject the rent subsidy proposal.

Mr. ASHLEY. Mr. Chairman, the minority views attacking the rent supplement program insist that the American public will not "buy" this program. It is charged that this program is foreign to American concepts.

Just which Americans do they mean will be against this new program?

They cannot mean our labor union members, for the supplement approach has been endorsed by housing spokesmen for the AFL-CIO.

They cannot mean our senior citizens, for the supplements have been endorsed by several groups representing the elderly, including the American Association of Homes for the Aging, the National Council on the Aging, and National Council of Senior Citizens.

They cannot mean those in the cooperative movement, because the supplements are strongly endorsed by the Cooperative League of the USA.

They cannot be referring to builders of new or rehabilitated housing because the program is endorsed by the General Improvement Contractors Association as well as by the National Association of Home Builders.

They cannot be referring to the Nation's bankers because the American Bankers Association has endorsed the program, as has the far-sighted National Association of Mutual Savings Banks, which reaffirmed its support in a telegram I received this morning.

They cannot mean the mayors of our cities, for the rent supplement program has been endorsed by mayors like Robert Wagner of New York, Theodore McKeldin of Baltimore, and others.

They cannot mean the social service people who know the problems of the poor, for the program has been supported by the National Federation of Settlements, the National Conference of Catholic Charities, the Community Service Society, and others.

I know of no testimony from any group or individuals who said this rent supplement program is contrary to American concepts.

I can recall no other new housing program which received such general support.

As a matter of fact, seldom does any housing proposal receive support from such a broad range of organizations and interests.

The minority report chose to ignore these facts. Small wonder that they describe their report as a minority view.

Mr. CLEVELAND. Mr. Chairman, with the exception of the curious and unfair rent supplement plan, H.R. 7984, the Housing and Urban Development Act of 1965, represents a fine bipartisan effort to help provide the means by which every American can acquire a decent home in wholesome surroundings. I firmly believe that when this goal is achieved, family life in America will be strength-

ened and this of itself may well cause the crime rate and even the disease rate to go down dramatically.

The rent supplement proposal is entirely the administration's. The Democrats are welcome to claim it for their own. Republicans had nothing to do with it and I oppose it vigorously. It makes no sense at all to me for the Federal Government to pay any part of the rent for persons whose incomes are more than triple the \$3,000 a year poverty level established by the administration. Yet this would be possible under the administration's original proposal. The Stevens amendment, which would modify the original plan to some degree, is still unsatisfactory. It is regrettable that this radical proposal should be lumped into this omnibus bill but, of course, it is clear this was done because the proposal could not probably live a life of its own. I hope the next Congress will undertake to knock out this feature.

It is unfortunate that the controversy over this section has obscured the rest of this bill. Although I am not a member of the Committee on Banking and Currency, which drafted the bill, I am proud of the work the Committee has done. In particular, I am proud of my party for the key role it has played in the formation of this bill.

Republican-originated features include:

First. A new FHA mortgage insurance program for all veterans who have not yet used their entitlements under existing Veterans' Administration loan programs. An estimated 21 million veterans would be eligible under the program, if it is accepted by the Senate. A veteran would need no down payment on housing up to \$20,000 in value and would pay only a 5-percent down payment on a house which is worth \$30,000, which is the FHA maximum.

Second. The first comprehensive program for uniform and fair "eminent domain" procedures where property is taken under a federally assisted urban renewal or housing program. This includes a very important provision for the immediate award to the property owner of 75 percent of the appraised value of the property taken, even if he goes on into court to contest the full award. This will protect many individuals from bankruptcy or from the necessity for going into heavy debt in order to relocate and protect their businesses.

Third. Additional funds for the low-interest urban renewal rehabilitation loan program begun last year to assist the tenant, homeowner and small businessman to upgrade his property instead of losing it to the bulldozer.

Fourth. A new, Republican approach to public housing, which would use existing private rental housing on a voluntary basis for those qualifying for public housing. Both income and rental levels would be confined to present public housing standards. This new approach avoids costly construction, keeps property at full value on the local tax rolls, and provides immediate relief in many areas for those now faced with long waiting lists for conventional public housing. As many as 100,000 units over the next 4

years could be made available under the bill.

Fifth. Three percent interest rates for the highly successful college and elderly housing loan programs, which enables these programs to continue serving areas of need at reasonable rental levels.

Sixth. Improvements in the urban renewal program, particularly through new relocation assistance provisions which feature a new small-business lease guarantee program for those forced to move as a result of an urban renewal project.

Seventh. Increases in mortgage limits for homes in rural outlying areas from \$11,000 to \$12,500 under the FHA program.

Eighth. Numerous other perfecting contributions to housing programs including elimination of the "new towns" proposal and encouraging greater participation by private enterprise.

This then, Mr. Chairman, truly can be called a major, bipartisan housing bill, with the reservation noted above. I am glad to support it.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. Flood, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 7984) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities, pursuant to House Resolution 425, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment?

Mr. WIDNALL. Mr. Speaker, I demand a separate vote on section 101 as amended.

The SPEAKER. Is a separate vote demanded on any other of the amendments? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote is demanded, the Stephens amendment.

The Clerk read as follows:

Strike out section 101 (beginning on page 2, line 3, and ending page 7, line 7) and insert the following:

"FINANCIAL ASSISTANCE TO ENABLE CERTAIN PRIVATE HOUSING TO BE AVAILABLE FOR LOWER INCOME FAMILIES WHO ARE ELDERLY, HANDICAPPED, DISPLACED, OR OCCUPANTS OF SUBSTANDARD HOUSING

"Sec. 101. (a) The Housing and Home Finance Administrator (hereinafter referred to as the 'Administrator') is authorized to make, and contract to make, annual payments to a 'housing owner' on behalf of 'qualified tenants', as those terms are defined herein, in such amounts and under such circumstances as are prescribed in or pursuant to this section. In no case shall a contract provide for such payments with respect to any housing for a period exceeding forty years. The aggregate amount of the con-

tracts to make such payments shall not exceed amounts approved in appropriation Acts and shall not exceed \$30,000,000 per annum prior to July 1, 1966, which maximum dollar amount shall be increased by \$35,000,000 on July 1, 1966, by \$40,000,000 on July 1, 1967, and by \$45,000,000 on July 1, 1968.

"(b) As used in this section, the term 'housing owner' means a private nonprofit corporation or other private nonprofit legal entity, a limited dividend corporation or other limited dividend legal entity, or a cooperative housing corporation, which is a mortgagor under section 221(d)(3) of the National Housing Act and which, after the enactment of this section, has been approved for mortgage insurance thereunder and has been approved for receiving the benefits of this section: *Provided*, That no payments under this section may be made with respect to any property financed with a mortgage receiving the benefits of the interest rate provided for in the proviso in section 221(d)(5) of that Act.

"(c) As used in this section, the term 'qualified tenant' means any individual or family who has, pursuant to criteria and procedures established by the Administrator, been determined—

"(1) to have an income below the maximum amount which can be established in the area, pursuant to the limitations prescribed in section 2(2) of the United States Housing Act of 1937, for occupancy in public housing dwellings; and

"(2) to be one of the following—

"(A) displaced by governmental action;

"(B) sixty-two years of age or older (or, in the case of a family, to have a head who is, or whose spouse is, sixty-two years of age or over);

"(C) physically handicapped (or, in the case of a family, to have a head who is, or whose spouse is, physically handicapped); or

"(D) occupying substandard housing.

"(d) The amount of the annual payment with respect to any dwelling unit shall not exceed the amount by which the fair market rental for such unit exceeds one-fourth of the tenant's income as determined by the Administrator pursuant to procedures and regulations established by him.

"(e) (1) For purposes of carrying out the provisions of this section, the Administrator shall establish criteria and procedures for determining the eligibility of occupants and rental charges, including criteria and procedures with respect to periodic review of tenant incomes and periodic adjustment of rental charges. The Administrator shall issue, upon the request of a housing owner, certificates as to the following facts concerning the individuals and families applying for admission to, or residing in, dwellings of such owner:

"(A) the income of the individual or family; and

"(B) whether the individual or family was displaced by governmental action, is elderly, is physically handicapped, or is (or was) occupying substandard housing.

"(2) Procedures adopted by the Administrator hereunder shall provide for recertifications of the incomes of occupants, except the elderly, at intervals of two years (or at shorter intervals in cases where the Administrator may deem it desirable) for the purpose of adjusting rental charges and annual payments on the basis of occupants' incomes, but in no event shall rental charges adjusted under this section for any dwelling exceed the fair market rental of the dwelling.

"(3) The Administrator may enter into agreements, or authorize housing owners to enter into agreements, with public or private agencies for services required in the selection of qualified tenants, including those who may be approved, on the basis of the probability of future increases in their incomes, as lessees under an option to purchase (which will give such approved qualified tenants an exclusive

right to purchase at a price established or determined as provided in the option) dwellings or cooperative ownership interests therein, and in the establishment of rentals. The Administrator is authorized (without limiting his authority under any other provision of law) to delegate to any such public or private agency his authority to issue certificates pursuant to this subsection.

"(f) Section 101(c) of the Housing Act of 1949 is amended by inserting '(i)' after 'a mortgage under' in the first proviso and by inserting immediately before the colon at the end of such proviso the following: ', or (ii) section 221(d)(3) of the National Housing Act if payments with respect to the mortgaged property are made or are to be made under section 101 of the Housing and Urban Development Act of 1965, except that no such mortgage shall be insured, and no commitment to insure such a mortgage shall be issued, with respect to property in any community for which a workable program for community improvement was required and in effect at the time a contract for a loan or capital grant was entered into under this title, or a contract for annual contributions or capital grants was entered into pursuant to the United States Housing Act of 1937, unless there is a workable program for community improvement which meets the requirements of this subsection in effect in such community at the time of such insurance or commitment'.

"(g) The Administrator is authorized to make such rules and regulations, to enter into such agreements, and to adopt such procedures as he may deem necessary or desirable to carry out the provisions of this section. Nothing contained in this section shall affect the authority of the Federal Housing Commissioner with respect to any housing assisted under this section and under section 221(d)(3) of the National Housing Act, including his authority to prescribe occupancy requirements under other provisions of law or to determine the portion of any such housing which may be occupied by qualified tenants.

"(h) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section, including, but not limited to, such sums as may be necessary to make annual payments as prescribed in this section, pay for services provided under (or pursuant to agreements entered into under) subsection (e), and provide administrative expenses.

"(i) Section 114(c)(2) of the Housing Act of 1949 is amended by inserting before the colon at the end of the first proviso the following: ', or a dwelling unit assisted under section 101 of the Housing and Urban Development Act of 1965'.

"(j) On or before January 1, 1968, the Administrator shall submit to the Congress a full report of operations under this section, together with his recommendations with respect thereto."

Mr. WIDNALL (interrupting the reading of the amendment). Mr. Speaker, I ask unanimous consent that the amendment be considered as read.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER. The question is on the amendment.

The question was taken; and the Speaker announced that the "ayes" appeared to have it.

Mr. WIDNALL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 240, nays 179, answered "present" 1, not voting 14, as follows:

ANSWERED "PRESENT"—1

Scheuer

NOT VOTING—14

Addabbo	Keogh	Springer
Bonner	Martin, Mass.	Thomas
Bow	Morton	Toll
Evins, Tenn.	Rostenkowski	Tupper
Harvey, Ind.	Shipley	

So the amendment was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Keogh for, with Mr. Bow against.
 Mr. Thomas for, with Mr. Springer against.
 Mr. Addabbo for, with Mr. Morton against.
 Mr. Toll for, with Mr. Martin of Massachusetts against.
 Mr. Shipley for, with Mr. Harvey of Indiana against.

Until further notice:

Mr. Evins with Mr. Rostenkowski.

Mr. ROBERTS changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. HARVEY OF MICHIGAN

Mr. HARVEY of Michigan. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. HARVEY of Michigan. I am, Mr. Speaker, in its present form.

The SPEAKER. The gentleman qualifies; the Clerk will report the motion. The Clerk read as follows:

Mr. HARVEY of Michigan moves to recommit the bill (H.R. 7984) to the Committee on Banking and Currency with instructions to report the same back to the House forthwith with the following amendment: Strike out title I (beginning on page 2, line

1, and ending on page 18, line 10) and insert in lieu thereof the following:

"TITLE I—HOUSING FOR DISADVANTAGED PERSONS

*"Extension of FHA section 221 programs; modification of interest rate; pooling of mortgages for sale**"SEC. 101. (a) The fifth sentence of section 221(f) of the National Housing Act is amended by striking out 'subsection (d) (2) or (d) (4) after September 30, 1965, or under subsection (d) (3) after September 30, 1965,' and inserting in lieu thereof 'this section after October 1, 1969,'**"(b) The proviso in section 221(d) (5) of such Act is amended by striking out 'not less than the annual rate of interest determined' and inserting in lieu thereof 'not less than the lower of (A) 3 per centum per annum, or (B) the annual rate of interest determined'.**"(c) Section 302(c) of such Act is amended by inserting before the last sentence thereof the following: 'If there shall be included within one or more of the trusts or other agencies created pursuant to the authority of this subsection any mortgages bearing a below-market interest rate and insured under section 221(d) (3) after the date of the enactment of the Housing and Urban Development Act of 1965, there are authorized to be appropriated from time to time such amounts as may be necessary to reimburse the Association for the amount of the differential (including interest, other costs, and a fair proportion of administrative expense) between (1) the total outlay with respect to outstanding participations or other instruments in an amount not to exceed the dollar amount of such below-market interest rate mortgages, and (2) the total receipts from such mortgages.'**"Low-rent housing in private accommodations**"SEC. 102. (a) The United States Housing Act of 1937 is amended by redesignating section 23 as section 24, and by adding after section 22 the following new section:**"Low-rent housing in private accommodations**"SEC. 23. (a) For the purpose of providing a supplementary form of low-rent housing which will aid in assuring a decent place to live for every citizen and promote efficiency and economy in the program under this Act by taking full advantage of vacancies or potential vacancies in the private housing market, each public housing agency shall, to the maximum extent consist with the achievement of the objectives of this Act, provide low-rent housing under this Act in the form of low-rent housing in private accommodations in accordance with this section where such housing in private accommodations can be provided at a cost equal to or less than housing in projects assisted under other provisions of this Act. As used in this section the term "low-rent housing in private accommodations" means dwelling units in an existing structure, leased from a private owner, which provide decent, safe, and sanitary dwelling accommodations and related facilities effectively supplementing the accommodations and facilities in low-rent housing assisted under the other provisions of this Act in a manner calculated to meet the total housing needs of the community in which they are located. As used in this section, the term "owner" means any person or entity having the legal right to lease or sublease property containing one or more dwelling units as described in this section."**"(b) Beginning as soon as practicable after the date of the enactment of this section, each public housing agency shall conduct a continuing survey and listing of the available dwelling units within the community or communities under its jurisdiction which provide decent, safe, and sanitary dwelling accommodations and related facilities."*

ties and are, or may be made, suitable for use as low-rent housing in private accommodations under this section.

"(c) Each public housing agency, by notification to the owners of housing listed under subsection (b), or by publication or advertisement, or otherwise, shall from time to time make known to the public in the community or communities under its jurisdiction the anticipated need for dwelling units in such community or communities to be used as low-rent housing in private accommodations under this section, inviting the owners of such dwelling units to make available for purposes of this section one or more of such units (not exceeding 10 per centum of the units in any single structure except to the extent that the agency, because of the limited number of units in the structure or for any other reason, determines that such limit should not be applied). The public housing agency shall conduct appropriate inspections of the units offered to be made available in any residential structure by the owner thereof in response to such invitation, and if—

"(1) it finds that such units are, or may be made, suitable for use as low-rent housing in private accommodations within the meaning of subsection (a), and

"(2) the rentals to be charged for such units, as negotiated and agreed to by the agency and the owner of the structure in a manner consistent with subsection (d) (2), are within the financial range of families of low income.

such agency may approve such units for use as low-rent housing in private accommodations in accordance with (and subject to the applicable limitations contained in) this section. Each public housing agency shall maintain and keep current a list of units approved by it under this subsection, including such information with respect to each such unit as it may consider necessary or appropriate.

"(d) To the extent of contracts for annual contributions entered into by the Authority with a public housing agency under section 10(e), such agency may enter into contracts with the owners of structures containing dwelling units approved under subsection (c) for the use of such units in accordance with this section. Each such contract with an owner shall provide (with respect to any unit) that—

"(1) the selection of tenants for such unit shall be the function of the owner, subject to the provisions of the contract between the Authority and the agency;

"(2) the rental and other charges to be received by the owner shall be negotiated and agreed to by the agency and the owner, and the rental and other charges to be paid by the tenant shall be determined in accordance with the standards applicable to units in low-rent housing projects assisted under the other provisions of this Act;

"(3) the agency shall have the sole right to give notice to vacate, with the owner having the right to make representations to the agency for termination of a tenancy;

"(4) maintenance and replacements (including redecoration) shall be in accordance with the standard practice for the building concerned, as established by the owner and agreed to by the agency; and

"(5) the agency and the owner shall carry out such other appropriate terms and conditions as may be mutually agreed to by them.

Each contract between a public housing agency and an owner entered into under this subsection shall be for a term of not less than twelve months nor more than thirty-six months, and shall be renewable by such agency and owner at the expiration of such term.

"(e) The annual contribution under this Act for a project of a public housing agency for low-rent housing in private accommoda-

tions under this section in lieu of any other guaranteed contribution authorized by section 10 shall not exceed the amount of the fixed annual contribution which would be established under this Act for a newly constructed project by such public housing agency designed to accommodate the comparable number, sizes, and kinds of families. The period over which payments will be made to a public housing agency for a project of low-rent housing in private accommodations under this section, and the aggregate amount of such payments, under a contract for annual contributions, shall be determined on the basis of the number of units in the community or communities under the jurisdiction of such agency which are in use (or can reasonably be expected to be placed in use) as low-rent housing in private accommodations under this section, taking into account the terms of the leases under which such units are (or will be) so used. In addition, contracts for financial assistance entered into by the Authority with a public housing agency pursuant to this section shall provide for reimbursement of reasonable and necessary expenses incurred by such agency in conducting surveys, listings, and inspections described in subsections (b) and (c).

"(f) On or before January 1, 1968, the Authority shall submit to the Congress a full report of operations under this section, together with its recommendations with respect thereto.

"(b) The last sentence of section 2(1) of such Act is amended by striking out 'Income limits for occupancy and rents' and inserting in lieu thereof 'Except as otherwise provided in section 23, income limits for occupancy and rents'.

"(c) The provisions of sections 10(h) and 15(7) of the United States Housing Act of 1937, and the workable program requirement in section 10(e) of such Act and section 101 (c) of the Housing Act of 1949, shall not apply to low-rent housing in private accommodations provided under section 23 of the United States Housing Act of 1937.

"Low-rent public housing"

"Sec. 103. (a) Section 10(e) of the United States Housing Act of 1937 is amended by inserting after 'per annum,' the following: 'which limit shall be increased by \$47,000,000 on the date of the enactment of the Housing and Urban Development Act of 1965, and by further amounts of \$47,000,000 on July 1 in each of the years 1966, 1967, and 1968, respectively.'

"(b) Section 10(c) of such Act is amended by striking out 'And provided further' and inserting in lieu thereof 'Provided further', and by inserting before the period at the end thereof the following: ': And provided further, That the amount of the fixed annual contribution which would be established under this Act for a newly constructed project by a public housing agency designed to accommodate a number of families of a given size and kind may be established, as a maximum annual contribution in lieu of any other guaranteed contribution authorized under this section, for a project by such public housing agency which would provide housing for the comparable number, sizes, and kinds of families through the acquisition and rehabilitation, or use under lease of existing structures which are suitable for low-rent housing use and obtainable in the local market'.

"(c) Section 2(2) of such Act is amended to read as follows:

"(2) The term 'families of low income' means families (including elderly and displaced families) who are in the lowest income group and who cannot afford to pay enough to cause private enterprise in their locality or metropolitan area to build an adequate supply of decent, safe, and sanitary dwellings for their use. The term 'families' includes families consisting of a

single person in the case of elderly families and displaced families, and includes the remaining member of a tenant family. The term 'elderly families' means families whose heads (or their spouses), or whose sole members, have attained the age at which an individual may elect to receive an old-age benefit under title II of the Social Security Act, or are under a disability as defined in section 223 of that Act, or are handicapped within the meaning of section 202 of the Housing Act of 1959. The term 'displaced families' means families displaced by urban renewal or other governmental action.'

"(d) Section 15(7)(b) of such Act is amended by striking out '(ii)' and all that follows down through 'and (iii)', and by inserting in lieu thereof 'and (ii)'.

"Direct loans to provide housing for the elderly or handicapped"

"Sec. 104. (a) Section 202(a)(4) of the Housing Act of 1959 is amended by striking out 'not to exceed \$350,000,000' and inserting in lieu thereof 'such sums as may be necessary for purposes of this section.'

"(b) Effective with respect to loans made on or after the date of the enactment of this Act, section 202(a)(3) of such Act is amended by striking out 'the higher of (A) 2¾ per centum per annum, or' and inserting in lieu thereof 'the lower of (A) 3 per centum per annum, or'.

"(c) Section 202(a) of such Act is further amended by adding at the end thereof the following new paragraph:

"(5) No loan shall be made under this section after October 1, 1969, except pursuant to a commitment entered into on or before such date."

Mr. HARVEY of Michigan (interrupting the reading of the motion). Mr. Speaker, I ask unanimous consent that the motion be considered as read, inasmuch as it makes only two simple changes in title I; strike out section 101 as amended, and the second change would strike out section 106 which would establish a new grant program under urban renewal wherein the Government would pay 100 percent instead of the normal two-thirds.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. PATMAN. Mr. Speaker, this is a rather important provision that the gentleman is attempting to write into this bill. I just wonder if we should not have it read.

Mr. HARVEY of Michigan. Mr. Speaker, I withdraw my request.

Mr. PATMAN. Mr. Speaker, I did not reserve the right to object.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER. The question is on the motion to recommit.

Mr. HARVEY of Michigan. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 202, nays 208, answered "present" 5, not voting 19, as follows:

Toll
Tupper

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Todd for, with Mr. Keogh against.

Mr. Teague of Texas for, with Mr. Thomas against.

Mr. Cabell for, with Mr. Toll against.

Mr. White of Texas for, with Mr. Brown of California against.

Mr. Bow for, with Mr. Mackay against.

Until further notice:

Mr. Addabbo with Mr. Martin of Massachusetts.

Mr. Evins with Mr. Springer.

Mr. Rostenkowski with Mr. Tupper.

Mr. Bonner with Mr. Kunkel.

Mr. Dulski with Mr. Harvey of Indiana.

Mr. Shipley with Mr. Morton.

Mr. TODD. Mr. Speaker, I have a live pair with the gentleman from New York [Mr. KEOGH]. If he were present, he would have voted "nay." I voted "yea." I withdraw my vote and vote "present."

Mr. DOWNING changed his vote from "nay" to "yea."

Mr. TEAGUE of Texas. Mr. Speaker, I have a live pair with the gentleman from Texas [Mr. THOMAS]. If he were present, he would have voted "nay." He is absent because of illness. I voted "yea." I withdraw my vote and vote "present."

Mr. CABELL. Mr. Speaker, I have a live pair with the gentleman from Pennsylvania [Mr. TOLL] who is ill. If he were present, he would have voted "nay." I voted "yea." I withdraw my vote and vote "present."

Mr. WHITE of Texas. Mr. Speaker I have a live pair with the gentleman from California [Mr. BROWN]. If he were present, he would have voted "nay."

I voted "yea." I withdraw my vote and vote "present."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on passage of the bill.

Mr. PATMAN. On that, Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 245, nays 169, answered "present" 3, not voting 17, as follows:

ANSWERED "PRESENT"—3

Cabell	Scheuer	Todd
--------	---------	------

NOT VOTING—17

Addabbo	Keogh	Springer
Bonner	Mackay	Staggers
Bow	Martin, Mass.	Thomas
Brown, Calif.	Morton	Toll
Evins, Tenn.	Rostenkowski	Tupper
Harvey, Ind.	Shipley	

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Keogh for, with Mr. Todd against.
Mr. Toll for, with Mr. Cabell against.
Mr. Tupper for, with Mr. Bow against.
Mr. Martin of Massachusetts for, with Mr. Springer against.

Until further notice:

Mr. Addabbo with Mr. Morton.
Mr. Mackay with Mr. Harvey of Indiana.
Mr. Evins with Mr. Bonner.
Mr. Staggers with Mr. Shipley.
Mr. Brown of California with Mr. Rostenkowski.

Mr. CABELL. Mr. Speaker, I have a live pair with the gentleman from Pennsylvania [Mr. TOLL] who is ill. If he were present, he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

Mr. TODD. Mr. Speaker, I have a live pair with the gentleman from New York [Mr. KEOGH]. If he were present, he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHEUER. Mr. Speaker, I would like to clarify for the RECORD that on rollcall Nos. 162, 163, and 164 concerning the Housing and Urban Development Act of 1965 I was present but did not vote because I felt I had a direct personal interest in the legislation, and, under rule 8 of the House, was precluded from voting.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. ARRINGTON, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 4525. An act to amend the Merchant Marine Act, 1936, to provide for the continuation of authority to develop American-flag carriers and promote the foreign commerce of the United States through the use of mobile trade fairs; and

H.R. 5283. An act to provide for the inclusion of years of service as judge of the District Court for the Territory of Alaska in the computation of years of Federal judicial service for judges of the U.S. District Court for the District of Alaska.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 7105. An act to provide for continuation of authority for regulation of exports, and for other purposes.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 8147) entitled "An act to amend the Tariff Schedules of the United States with respect to the exemption from duty for returning residents, and for other purposes."

GENERAL LEAVE TO EXTEND

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks and include any germane extraneous matter in connection with the housing bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE ON AGRICULTURE

Mr. PURCELL. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight tonight to file certain reports on H.R. 9497.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

CORRECTION OF ROLL CALL

Mr. DADDARIO. Mr. Speaker, on rollcall No. 162 I am not recorded. I was present and voted "yea." I ask unanimous consent that the permanent RECORD be corrected accordingly.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

PERSONAL EXPLANATION

Mr. FULTON of Pennsylvania. Mr. Speaker, on Monday, June 28, 1965, I arranged for consultations at my Pittsburgh office on the basis that no vote was expected at the House session that day.

I was advised by responsible representatives of both the majority and the minority that there would be no vote expected on the new housing bill H.R. 7984.

An automatic rollcall was unexpectedly called on the rule. If present I would have voted "nay" on rollcall No. 157 on June 28, 1965.

EXEMPTION FROM DUTY FOR RETURNING RESIDENTS

Mr. MILLS submitted the following conference report and statement on the bill (H.R. 8147) to amend the Tariff Schedules of the United States with respect to the exemption from duty for returning residents, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 570)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 8147) to amend the Tariff Schedules of the United States with respect to the exemption from duty for returning residents, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1 and 4 and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: Restore the matter proposed to be stricken out by the Senate amendment and on page 2, lines 19 and 20, of the House engrossed bill strike out "possessions, if the remainder is brought or shipped from such"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: On page 1, line 6, of the Senate engrossed amendments strike out "(a)" after "SEC. 3."; and the Senate agree to the same.

HIGHLIGHTS: Senate committee reported agricultural appropriation bill. Senate committee reported bill exempting REA coops from FPC jurisdiction. Senate agreed to conference report on cigarette labeling bill. Sen. Smith inserted letters critical of surplus food distribution program.

SENATE

1. **AGRICULTURAL APPROPRIATION BILL, 1966.** The Appropriations Committee reported with amendments this bill, H. R. 8370 (S. Rept. 423)(p. 14998). Attached to this Digest is the committee report, which includes a statement of committee actions. Sen. Holland submitted amendments intended to be proposed to this bill (p. 15001).
2. **LEGISLATIVE BRANCH APPROPRIATION BILL, 1966.** The Appropriations Committee reported with amendments this bill, H. R. 8775 (S. Rept. 424). p. 14998
3. **ELECTRIFICATION.** The Commerce Committee reported with amendment (on July 1) S. 1459, to exempt certain cooperatives engaged in rural electrification from Federal Power Commission jurisdiction (S. Rept. 420). p. 14997
Received from REA reports on the approval of loans to the Northern Michigan Electric Cooperative, Inc., Boyne City, Mich., and to the Wolverine Electric Cooperative, Inc., Big Rapids, Mich. p. 14998

4. CIGARETTE LABELING. Agreed to the conference report on S. 559, the cigarette labeling bill. pp. 15032-4
 5. RESEARCH. The Commerce Committee reported with amendment (on July 1) S. 949, to promote the economic growth by supporting State and regional centers to place the findings of science usefully in the hands of American enterprise (S. Rept. 421). p. 14997
 6. HEALTH. Debated H. R. 6675, to provide a hospital insurance program for the aged under the Social Security Act with a supplementary health benefits program and an expanded program of medical assistance, to increase benefits under the old-age, survivors, and disability insurance system, etc. pp. 15037-69
 7. SURPLUS FOODS. Sen. Smith inserted letters from officials of Freeport, Maine, raising "some very serious questions about the administration of the donated surplus commodities program of the Department of Agriculture." p. 15034
 8. HOUSING LOANS. H. R. 7984, the housing and urban development bill, was placed on the Senate calendar. p. 14997
 9. FORESTRY. Received from this Department a proposed bill to authorize the Secretary of Agriculture, in exchanges under land exchange authority, to accept and use cash to equalize the value of the Federal lands offered; to Agriculture and Forestry Committee. p. 14998
 10. PATENTS. Sen. Long, La., inserted an editorial in support of his position that patent rights to discoveries made as a result of taxpayer-financed research should be held by the Government, rather than by private companies. p. 15010
 11. ECONOMICS. Sen. Douglas inserted an article, "U. S. Blueprint of Economic Growth: 1970 Forecast: \$10 Billion Surplus." pp. 15014-5
 12. FOREIGN AID. Sen. McGee inserted an article reviewing failures in the Russian foreign aid program. p. 15015
- HOUSE
13. DISASTER RELIEF. A subcommittee of the Banking and Currency Committee voted to report to the full committee H. R. 7397, to authorize a study of methods of helping to provide financial assistance to victims of future natural disasters p. D613
 14. AGING. Concurred in Senate amendments to H. R. 3708, to help older persons through grants to States for community planning and services and for training, research, etc., through HEW (p. 15072). This bill will now be sent to the President.
 15. TRANSPORTATION. Rep. Hicks spoke in support of proposed legislation to insure the adequacy of the national railroad freight car supply. p. 15102
 16. POVERTY. Rep. Harsha stated the poverty act "has had the effect of holding out additional hope to poverty-stricken people, but the promises of the benefits that they will reap from this legislation are as empty as last year's bird's nest." pp. 15102-3
 17. ECONOMICS. Reps. Thomson, Wisc., and Curtis expressed doubt about the economic prosperity of the Nation and inserted supporting articles. pp. 15103, 15108-11

Calendar No. 408

89TH CONGRESS
1ST SESSION

H. R. 7984

IN THE SENATE OF THE UNITED STATES

JULY 6, 1965

Read twice and ordered to be placed on the calendar

AN ACT

To assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities.

- 1 *Be it enacted by the Senate and House of Representa-*
- 2 *tives of the United States of America in Congress assembled,*
- 3 That this Act may be cited as the "Housing and Urban
- 4 Development Act of 1965".

1 TITLE I—HOUSING FOR DISADVANTAGED
2 PERSONS

3 FINANCIAL ASSISTANCE TO ENABLE CERTAIN PRIVATE
4 HOUSING TO BE AVAILABLE FOR LOWER INCOME FAM-
5 ILIES WHO ARE ELDERLY, HANDICAPPED, DISPLACED,
6 OR OCCUPANTS OF SUBSTANDARD HOUSING

7 SEC. 101. (a) The Housing and Home Finance Ad-
8 ministrator (hereinafter referred to as the "Administrator")
9 is authorized to make, and contract to make, annual pay-
10 ments to a "housing owner" on behalf of "qualified tenants",
11 as those terms are defined herein, in such amounts and under
12 such circumstances as are prescribed in or pursuant to this
13 section. In no case shall a contract provide for such pay-
14 ments with respect to any housing for a period exceeding
15 forty years. The aggregate amount of the contracts to make
16 such payments shall not exceed amounts approved in appro-
17 priation Acts and shall not exceed \$30,000,000 per annum
18 prior to July 1, 1966, which maximum dollar amount shall
19 be increased by \$35,000,000 on July 1, 1966, by \$40,000,-
20 000 on July 1, 1967, and by \$45,000,000 on July 1, 1968.

(b) As used in this section, the term “housing owner” means a private nonprofit corporation or other private nonprofit legal entity, a limited dividend corporation or other limited dividend legal entity, or a cooperative housing corporation, which is a mortgagor under section 221 (d) (3) of

1 the National Housing Act and which, after the enactment of
2 this section, has been approved for mortgage insurance there-
3 under and has been approved for receiving the benefits of
4 this section: *Provided*, That no payments under this section
5 may be made with respect to any property financed with a
6 mortgage receiving the benefits of the interest rate provided
7 for in the proviso in section 221 (d) (5) of that Act.

8 (c) As used in this section, the term “qualified tenant”
9 means any individual or family who has, pursuant to criteria
10 and procedures established by the Administrator, been deter-
11 mined—

12 (1) to have an income below the maximum amount
13 which can be established in the area, pursuant to the
14 limitations prescribed in section 2 (2) of the United
15 States Housing Act of 1937, for occupancy in public
16 housing dwellings; and

17 (2) to be one of the following—

18 (A) displaced by governmental action;

19 (B) sixty-two years of age or older (or, in the
20 case of a family, to have a head who is, or whose
21 spouse is, sixty-two years of age or over) ;

22 (C) physically handicapped (or, in the case of
23 a family, to have a head who is, or whose spouse is,
24 physically handicapped) ; or

25 (D) occupying substandard housing.

1 (d) The amount of the annual payment with respect
2 to any dwelling unit shall not exceed the amount by which
3 the fair market rental for such unit exceeds one-fourth of
4 the tenant's income as determined by the Administrator pur-
5 suant to procedures and regulations established by him.

6 (e) (1) For purposes of carrying out the provisions
7 of this section, the Administrator shall establish criteria
8 and procedures for determining the eligibility of occupants
9 and rental charges, including criteria and procedures with
10 respect to periodic review of tenant incomes and periodic
11 adjustment of rental charges. The Administrator shall issue,
12 upon the request of a housing owner, certificates as to the
13 following facts concerning the individuals and families apply-
14 ing for admission to, or residing in, dwellings of such owner:

15 (A) the income of the individual or family; and

16 (B) whether the individual or family was displaced
17 by governmental action, is elderly, is physically handi-
18 capped, or is (or was) occupying substandard housing.

19 (2) Procedures adopted by the Administrator here-
20 under shall provide for recertifications of the incomes of
21 occupants, except the elderly, at intervals of two years (or
22 at shorter intervals in cases where the Administrator may
23 deem it desirable) for the purpose of adjusting rental charges
24 and annual payments on the basis of occupants' incomes,
25 but in no event shall rental charges adjusted under this

1 section for any dwelling exceed the fair market rental of
2 the dwelling.

3 (3) The Administrator may enter into agreements, or
4 authorize housing owners to enter into agreements, with
5 public or private agencies for services required in the selec-
6 tion of qualified tenants, including those who may be ap-
7 proved, on the basis of the probability of future increases in
8 their incomes, as lessees under an option to purchase (which
9 will give such approved qualified tenants an exclusive right
10 to purchase at a price established or determined as provided
11 in the option) dwellings or cooperative ownership interests
12 therein, and in the establishment of rentals. The Adminis-
13 trator is authorized (without limiting his authority under any
14 other provision of law) to delegate to any such public or
15 private agency his authority to issue certificates pursuant to
16 this subsection.

17 (f) Section 101 (c) of the Housing Act of 1949 is
18 amended by inserting “ (i) ” after “a mortgage under” in the
19 first proviso and by inserting immediately before the colon at
20 the end of such proviso the following: “, or (ii) section
21 221 (d) (3) of the National Housing Act if payments with
22 respect to the mortgaged property are made or are to be
23 made under section 101 of the Housing and Urban Devel-
24 opment Act of 1965, except that no such mortgage shall
25 be insured, and no commitment to insure such a mortgage

1 shall be issued, with respect to property in any community
2 for which a workable program for community improvement
3 was required and in effect at the time a contract for a loan
4 or capital grant was entered into under this title, or a con-
5 tract for annual contributions or capital grants was entered
6 into pursuant to the United States Housing Act of 1937,
7 unless there is a workable program for community improve-
8 ment which meets the requirements of this subsection in
9 effect in such community at the time of such insurance or
10 commitment”.

11 (g) The Administrator is authorized to make such rules
12 and regulations, to enter into such agreements, and to adopt
13 such procedures as he may deem necessary or desirable to
14 carry out the provisions of this section. Nothing contained
15 in this section shall affect the authority of the Federal
16 Housing Commissioner with respect to any housing assisted
17 under this section and under section 221 (d) (3) of the
18 National Housing Act, including his authority to prescribe
19 occupancy requirements under other provisions of law or to
20 determine the portion of any such housing which may be
21 occupied by qualified tenants.

22 (h) There are authorized to be appropriated such sums
23 as may be necessary to carry out the provisions of this sec-
24 tion, including, but not limited to, such sums as may be

1 necessary to make annual payments as prescribed in this
 2 section, pay for services provided under (or pursuant to
 3 agreements entered into under) subsection (e), and provide
 4 administrative expenses.

5 (i) Section 114(c) (2) of the Housing Act of 1949
 6 is amended by inserting before the colon at the end of the
 7 first proviso the following: “, or a dwelling unit assisted
 8 under section 101 of the Housing and Urban Development
 9 Act of 1965”.

10 (j) On or before January 1, 1968, the Administrator
 11 shall submit to the Congress a full report of operations under
 12 this section, together with his recommendations with respect
 13 thereto.

14 EXTENSION OF FHA SECTION 221 PROGRAMS; MODIFICA-
 15 TION OF INTEREST RATE; POOLING OF MORTGAGES FOR
 16 SALE

17 SEC. 102. (a) The fifth sentence of section 221(f) of
 18 the National Housing Act is amended by striking out “sub-
 19 section (d) (2) or (d) (4) after September 30, 1965, or
 20 under subsection (d) (3) after September 30, 1965,” and
 21 inserting in lieu thereof “this section after October 1, 1969.”

22 (b) The proviso in section 221(d) (5) of such Act is
 23 amended by striking out “not less than the annual rate of
 24 interest determined” and inserting in lieu thereof “not less

1 than the lower of (A) 3 per centum per annum, or (B) the
2 annual rate of interest determined”.

3 (c) The third sentence of section 212 (a) of such Act is
4 amended by striking out “described in subsection (d) (3)”
5 and all that follows and inserting in lieu thereof “described
6 in subsection (d) (3) or (d) (4).”

7 (d) Section 302 (c) of such Act is amended by insert-
8 ing before the last sentence thereof the following: “If there
9 shall be included within one or more of the trusts or other
10 agencies created pursuant to the authority of this subsection
11 any mortgages bearing a below-market interest rate and in-
12 sured under section 221 (d) (3) after the date of the enact-
13 ment of the Housing and Urban Development Act of
14 1965, there are authorized to be appropriated from time to
15 time such amounts as may be necessary to reimburse the
16 Association for the amount of the differential (including
17 interest, other costs, and a fair proportion of administrative
18 expense) between (1) the total outlay with respect to out-
19 standing participations or other instruments in an amount not
20 to exceed the dollar amount of such below-market interest
21 rate mortgages, and (2) the total receipts from such
22 mortgages.”

1 LOW-RENT HOUSING IN PRIVATE ACCOMMODATIONS

2 SEC. 103. (a) The United States Housing Act of 1937
3 is amended by redesignating section 23 as section 24, and by
4 adding after section 22 the following new section:

5 “LOW-RENT HOUSING IN PRIVATE ACCOMMODATIONS

6 “SEC. 23. (a) For the purpose of providing a supple-
7 mentary form of low-rent housing which will aid in assuring
8 a decent place to live for every citizen and promote efficiency
9 and economy in the program under this Act by taking full
10 advantage of vacancies or potential vacancies in the private
11 housing market, each public housing agency shall, to the
12 maximum extent consistent with the achievement of the
13 objectives of this Act, provide low-rent housing under this
14 Act in the form of low-rent housing in private accommoda-
15 tions in accordance with this section where such housing in
16 private accommodations can be provided at a cost equal to or
17 less than housing in projects assisted under other provisions
18 of this Act. As used in this section the term ‘low-rent hous-
19 ing in private accommodations’ means dwelling units in an
20 existing structure, leased from a private owner, which provide
21 decent, safe, and sanitary dwelling accommodations and
22 related facilities effectively supplementing the accommoda-

1 tions and facilities in low-rent housing assisted under the
2 other provisions of this Act in a manner calculated to meet
3 the total housing needs of the community in which they are
4 located. As used in this section, the term 'owner' means
5 any person or entity having the legal right to lease or sub-
6 lease property containing one or more dwelling units as
7 described in this section.

8 “(b) Beginning as soon as practicable after the date of
9 the enactment of this section, each public housing agency
10 shall conduct a continuing survey and listing of the available
11 dwelling units within the community or communities under
12 its jurisdiction which provide decent, safe, and sanitary
13 dwelling accommodations and related facilities and are, or
14 may be made, suitable for use as low-rent housing in private
15 accommodations under this section.

16 “(c) Each public housing agency, by notification to
17 the owners of housing listed under subsection (b), or by
18 publication or advertisement, or otherwise, shall from time
19 to time make known to the public in the community or com-
20 munities under its jurisdiction the anticipated need for dwell-
21 ing units in such community or communities to be used as
22 low-rent housing in private accommodations under this sec-
23 tion, inviting the owners of such dwelling units to make
24 available for purposes of this section one or more of such
25 units (not exceeding 10 per centum of the units in any single

1 structure except to the extent that the agency, because of
2 the limited number of units in the structure or for any other
3 reason, determines that such limit should not be applied).
4 The public housing agency shall conduct appropriate inspec-
5 tions of the units offered to be made available in any
6 residential structure by the owner thereof in response to
7 such invitation, and if—

8 “(1) it finds that such units are, or may be made,
9 suitable for use as low-rent housing in private accom-
10 modations within the meaning of subsection (a), and

11 “(2) the rentals to be charged for such units, as
12 negotiated and agreed to by the agency and the owner
13 of the structure in a manner consistent with subsection
14 (d) (2), are within the financial range of families of
15 low income,

16 such agency may approve such units for use as low-rent
17 housing in private accommodations in accordance with (and
18 subject to the applicable limitations contained in) this sec-
19 tion. Each public housing agency shall maintain and keep
20 current a list of units approved by it under this subsection,
21 including such information with respect to each such unit
22 as it may consider necessary or appropriate.

23 “(d) To the extent of contracts for annual contributions
24 entered into by the Authority with a public housing agency
25 under section 10 (e), such agency may enter into contracts

1 with the owners of structures containing dwelling units ap-
2 proved under subsection (c) for the use of such units in
3 accordance with this section. Each such contract with an
4 owner shall provide (with respect to any unit) that—

5 “(1) the selection of tenants for such unit shall be
6 the function of the owner, subject to the provisions of
7 the contract between the Authority and the agency;

8 “(2) the rental and other charges to be received by
9 the owner shall be negotiated and agreed to by the
10 agency and the owner, and the rental and other charges
11 to be paid by the tenant shall be determined in accord-
12 ance with the standards applicable to units in low-rent
13 housing projects assisted under the other provisions of
14 this Act;

15 “(3) the agency shall have the sole right to give
16 notice to vacate, with the owner having the right to
17 make representations to the agency for termination of
18 a tenancy;

19 “(4) maintenance and replacements (including
20 redecoration) shall be in accordance with the standard
21 practice for the building concerned, as established by
22 the owner and agreed to by the agency; and

23 “(5) the agency and the owner shall carry out such
24 other appropriate terms and conditions as may be
25 mutually agreed to by them.

1 Each contract between a public housing agency and an
2 owner entered into under this subsection shall be for a term
3 of not less than twelve months nor more than thirty-six
4 months, and shall be renewable by such agency and owner
5 at the expiration of such term.

6 “(e) The annual contribution under this Act for a proj-
7 ect of a public housing agency for low-rent housing in private
8 accommodations under this section in lieu of any other guar-
9 anteed contribution authorized by section 10 shall not exceed
10 the amount of the fixed annual contribution which would be
11 established under this Act for a newly constructed project
12 by such public housing agency designed to accommodate the
13 comparable number, sizes, and kinds of families. The
14 period over which payments will be made to a public hous-
15 ing agency for a project of low-rent housing in private
16 accommodations under this section, and the aggregate
17 amount of such payments, under a contract for annual
18 contributions, shall be determined on the basis of the number
19 of units in the community or communities under the juris-
20 diction of such agency which are in use (or can reasonably
21 be expected to be placed in use) as low-rent housing in
22 private accommodations under this section, taking into ac-
23 count the terms of the leases under which such units are (or
24 will be) so used. In addition, contracts for financial assist-
25 ance entered into by the Authority with a public housing

1 agency pursuant to this section shall provide for reimburse-
2 ment of reasonable and necessary expenses incurred by such
3 agency in conducting surveys, listings, and inspections de-
4 scribed in subsections (b) and (c).

5 “(f) On or before January 1, 1968, the Authority shall
6 submit to the Congress a full report of operations under this
7 section, together with its recommendations with respect
8 thereto.”

9 (b) The last sentence of section 2(1) of such Act is
10 amended by striking out “Income limits for occupancy and
11 rents” and inserting in lieu thereof “Except as otherwise pro-
12 vided in section 23, income limits for occupancy and rents”.

13 (c) The provisions of sections 10(h) and 15(7) of the
14 United States Housing Act of 1937, and the workable pro-
15 gram requirement in section 10(e) of such Act and section
16 101(c) of the Housing Act of 1949, shall not apply to low-
17 rent housing in private accommodations provided under sec-
18 tion 23 of the United States Housing Act of 1937.

19 LOW-RENT PUBLIC HOUSING

20 SEC. 104. (a) Section 10(e) of the United States
21 Housing Act of 1937 is amended by inserting after “per
22 annum,” the following: “which limit shall be increased by
23 \$47,000,000 on the date of the enactment of the Housing
24 and Urban Development Act of 1965, and by further

1 amounts of \$47,000,000 on July 1 in each of the years
2 1966, 1967, and 1968, respectively.”.

3 (b) Section 10 (c) of such Act is amended by striking
4 out “*And provided further*” and inserting in lieu thereof
5 “*Provided further*”, and by inserting before the period at
6 the end thereof the following: “: *And provided further*, That
7 the amount of the fixed annual contribution which would be
8 established under this Act for a newly constructed project by
9 a public housing agency designed to accommodate a number
10 of families of a given size and kind may be established, as a
11 maximum annual contribution in lieu of any other guaranteed
12 contribution authorized under this section, for a project by
13 such public housing agency which would provide housing
14 for the comparable number, sizes, and kinds of families
15 through the acquisition, acquisition and rehabilitation, or use
16 under lease of existing structures which are suitable for low-
17 rent housing use and obtainable in the local market”.

18 (c) Section 2 (2) of such Act is amended to read as
19 follows:

20 “(2) The term ‘families of low income’ means families
21 (including elderly and displaced families) who are in the
22 lowest income group and who cannot afford to pay enough
23 to cause private enterprise in their locality or metropolitan
24 area to build an adequate supply of decent, safe, and sanitary

1 dwellings for their use. The term 'families' includes families
 2 consisting of a single person in the case of elderly families
 3 and displaced families, and includes the remaining member
 4 of a tenant family. The term 'elderly families' means families
 5 whose heads (or their spouses), or whose sole members, have
 6 attained the age at which an individual may elect to receive
 7 an old-age benefit under title II of the Social Security Act,
 8 or are under a disability as defined in section 223 of that
 9 Act, or are handicapped within the meaning of section
 10 202 of the Housing Act of 1959. The term 'displaced fami-
 11 lies' means families displaced by urban renewal or other
 12 governmental action."

13 (d) Section 15 (7) (b) of such Act is amended by strik-
 14 ing out "(ii)" and all that follows down through "and
 15 (iii)", and by inserting in lieu thereof "and (ii)".

16 DIRECT LOANS TO PROVIDE HOUSING FOR THE ELDERLY
 17 OR HANDICAPPED

18 SEC. 105. (a) Section 202 (a) (4) of the Housing Act
 19 of 1959 is amended by striking out "not to exceed \$350,-
 20 000,000" and inserting in lieu thereof "such sums as may
 21 be necessary for purposes of this section,".

22 (b) Effective with respect to loans made on or after
 23 the date of the enactment of this Act, section 202 (a) (3) of
 24 such Act is amended by striking out "the higher of (A)

1 $2\frac{3}{4}$ per centum per annum, or” and inserting in lieu thereof
2 “the lower of (A) 3 per centum per annum, or”.

3 (c) Section 202 (a) of such Act is further amended
4 by adding at the end thereof the following new paragraph:

5 “(5) No loan shall be made under this section after
6 October 1, 1969, except pursuant to a commitment entered
7 into on or before such date.”

8 REHABILITATION GRANTS TO HOMEOWNERS IN URBAN

9 RENEWAL AREAS

10 SEC. 106. (a) Title I of the Housing Act of 1949 is
11 amended by adding at the end thereof the following new
12 section:

13 “REHABILITATION GRANTS

14 “SEC. 115. (a) Notwithstanding any other provision
15 of this title, the Administrator may authorize a local public
16 agency to make grants (and the urban renewal project may
17 include the making of such grants) as prescribed in this sec-
18 tion. Any such grant may be made only to an individual or
19 family, as described in subsection (b), who owns and oc-
20 cupies a structure in an urban renewal area, and only for the
21 purpose of covering the cost of repairs and improvements
22 necessary to make such structure conform to public standards
23 for decent, safe, and sanitary housing as required by appli-

1 cable codes or other requirements of the urban renewal plan
2 for the area. Any contract for financial assistance under this
3 title shall provide that the capital grant otherwise payable
4 for the project shall be increased by an amount equal to the
5 total amount of the grants under this section and that no part
6 of the total amount of such grants shall be required to be con-
7 tributed as part of the local grant-in-aid.

8 “(b) A grant authorized by this section may be made
9 to an individual or family whose income does not exceed
10 \$2,000 a year, and such grant may be in an amount which
11 does not exceed the lesser of (1) the actual (and approved)
12 cost of the repairs and improvements involved, or (2)
13 \$1,500. In case the income of the individual or family
14 exceeds \$2,000 a year, a grant may be made under this
15 section, subject to the limitations specified in clauses (1) and
16 (2) of the preceding sentence, but only in an amount not to
17 exceed that portion of the cost of the repairs and improve-
18 ments which cannot be paid for with any available loan that
19 can be amortized as part of such individual's or family's
20 monthly housing expense without requiring such monthly
21 housing expense to exceed 25 per centum of such individual's
22 or family's monthly income.”

23 (b) Any contract with a local public agency which was
24 executed under title I of the Housing Act of 1949 before the
25 date of enactment of this Act may be amended to provide for

1 grants authorized by section 115 of the Housing Act of
2 1949.

3 TITLE II—FHA INSURANCE OPERATIONS

4 LAND DEVELOPMENT

5 SEC. 201. (a) The National Housing Act is amended
6 by adding at the end thereof the following new title:

7 “TITLE X—MORTGAGE INSURANCE FOR LAND
8 DEVELOPMENT

9 “DEFINITIONS

10 “SEC. 1001. As used in this title—

11 “(a) the term ‘mortgage’ means a lien or liens on
12 real estate in fee simple, or on a leasehold (1) under a
13 lease for not less than ninety-nine years which is renew-
14 able or (2) under a lease having a period of not less
15 than fifty years to run from the date the mortgage was
16 executed;

17 “(b) the term ‘first mortgage’ includes such classes
18 of first liens as are commonly given to secure advances
19 (including but not limited to advances during construc-
20 tion) on, or the unpaid purchase price of, real estate
21 under the laws of the State in which the real estate is
22 located, together with the credit instrument or instru-
23 ments, if any, secured thereby, and may be in the form
24 of trust mortgages or mortgage indentures or deeds of
25 trusts securing notes, bonds, or other credit instruments;

1 “(c) the terms ‘mortgagee’, ‘mortgagor’, and
2 ‘State’ have the same meaning as in section 207 of
3 this Act;

4 “(d) the term ‘improvements’ means waterlines and
5 water supply installations, sewerlines and sewage dis-
6 posal installations, roads, streets, curbs, gutters, side-
7 walks, storm drainage facilities, and other installations
8 or work, whether on or off the site, which the Com-
9 missioner deems necessary or desirable to prepare land
10 primarily for residential and related uses or to provide,
11 for public or common use, facilities which (1) shall
12 include only such buildings as are needed in connection
13 with water supply or sewage disposal installations and
14 such buildings, other than schools, as the Commissioner
15 considers appropriate, and (2) are to be owned and
16 maintained jointly by the property owners; and

17 “(e) the term ‘land development’ means the process
18 of making, installing, or constructing improvements.

19 “BASIC CONDITIONS FOR INSURANCE

20 “SEC. 1002. The Commissioner is authorized (1) to
21 insure, upon such terms and conditions as he may prescribe,
22 any first mortgage (including advances on such mortgage)
23 in accordance with the provisions of this title and (2) to
24 make a commitment for the insurance of such mortgage prior
25 to the date of execution of such mortgage or prior to the date

1 of disbursement of the mortgage proceeds. No mortgage
2 shall be insured under this title after October 1, 1969, except
3 pursuant to a commitment to insure issued before such date.

4 “SEC. 1003. The mortgage shall—

5 “(a) be executed by a mortgagor, other than a pub-
6 lic body, approved by the Commissioner;

7 “(b) be made to and held by a mortgagee approved
8 by the Commissioner; and

9 “(c) cover the land to be developed and the im-
10 provements to be made with the assistance of the mort-
11 gage insurance under this title, except facilities intended
12 for public use and in public ownership.

13 “SEC. 1004. The principal obligation of the mortgage
14 shall (1) not exceed 75 per centum of the Commissioner’s
15 estimate of the value of the property upon completion of the
16 land development, and (2) not exceed the sum of 50 per
17 centum of the Commissioner’s estimate of the value of the
18 land before development and 90 per centum of his estimate
19 of the cost of such development. The outstanding principal
20 obligations of mortgages involving a single land development
21 undertaking, as defined by the Commissioner, shall at no
22 time exceed \$12,500,000.

23 “SEC. 1005. The mortgage shall—

24 “(a) have a maturity, not to exceed seven years,

1 and contain repayment provisions satisfactory to the
2 Commissioner;

3 “(b) bear interest at a rate satisfactory to the Com-
4 missioner, and such interest shall be exclusive of premium
5 charges for mortgage insurance and such service charges
6 and fees as may be approved by the Commissioner; and

7 “(c) contain such terms and provisions with respect
8 to protection of the security, payment of taxes, de-
9 linquency charges, prepayment, additional and secondary
10 liens, and other matters as the Commissioner may in his
11 discretion prescribe.

12 “SEC. 1006. A property or project to be financed by a
13 mortgage insured under this title shall—

14 “(a) represent a good mortgage insurance risk;
15 and

16 “(b) involve improvements that comply with all
17 applicable State and local governmental requirements
18 and with minimum standards approved by the Com-
19 missioner.

20 “LAND PLANNING

21 “SEC. 1007. (a) The land development covered by a
22 mortgage insured under this title shall be undertaken pur-
23 suant to a schedule, conforming to such requirements and
24 procedures as the Commissioner may prescribe, that will

1 assure the use of the land for the purposes for which it is to
2 be developed within the shortest reasonable period consistent
3 with the objectives of sound and economic community growth
4 or urban development.

5 “(b) The land development shall be undertaken in
6 accordance with an overall development plan, appropriate
7 to the scope and character of the undertaking, which—

8 “(1) has received all governmental approvals re-
9 quired by State or local law or by the Commissioner;

10 “(2) is acceptable to the Commissioner as provid-
11 ing reasonable assurance that the land development will
12 contribute to good living conditions in the area being
13 developed, which area (i) will have a sound economic
14 base and a long economic life, (ii) will be characterized
15 by sound land-use patterns, and (iii) will include or be
16 served by such shopping, school, recreational, transpor-
17 tation, and other facilities as the Commissioner deems
18 adequate or necessary; and

19 “(3) is consistent with a comprehensive plan which
20 covers, or with comprehensive planning being carried
21 on for, the area in which the land is situated, and which
22 meets criteria established by the Housing and Home
23 Finance Administrator for such plans or planning.

1 "ENCOURAGEMENT OF SMALL BUILDERS AND MODERATE
2 COST HOUSING

3 "SEC. 1008. The Commissioner shall adopt such require-
4 ments as he deems necessary in land development covered
5 by mortgages insured under this title to encourage the main-
6 tenance of a diversified local homebuilding industry, broad
7 participation by builders, and the inclusion of a proper bal-
8 ance of housing for families of moderate or low income.

9 "WATER AND SEWERAGE FACILITIES

10 "SEC. 1009. After development of the land it shall be
11 served by public systems for water and sewerage which are
12 consistent with other existing or prospective systems within
13 the area. If the Commissioner determines that public own-
14 ership of such a system is not feasible, he may approve an
15 adequate privately or cooperatively owned system which
16 will be regulated, during the period of such ownership, in
17 a manner acceptable to him with respect to user rates and
18 charges, capital structure, methods of operation, and rate
19 of return. Approval of such system shall be given only
20 where the Commissioner receives assurances, satisfactory
21 to him, with respect to eventual public ownership and op-
22 eration of the system and with respect to the conditions
23 and terms of any sale or transfer,

"RELEASES

"SEC. 1010. The Commissioner may, on such terms and conditions as he may prescribe, consent to the release or subordination of a part or parts of the mortgaged property from the lien of the mortgage.

"PREMIUMS AND FEES

"SEC. 1011. The Commissioner shall collect reasonable premiums for the insurance of any mortgage under this title and make such charges as he determines are reasonable for the analysis of the land development plan and the appraisal and inspection of the property and improvements. On or before January 1, 1967, the Commissioner shall make a report to the Congress concerning the premium rates and other charges under this title that he estimates will be adequate to provide income sufficient for a self-supporting program.

"INSURANCE BENEFITS

"SEC. 1012. The provisions of subsections (e), (g), (h), (i), (j), (k), (l), and (n) of section 207 of this Act shall be applicable to mortgages insured under this title, except that as applied to such mortgages (1) any reference therein to section 207 shall be deemed to refer to this title, and (2) any reference to an annual premium shall

1 be deemed to refer to such premiums as the Commissioner
2 may designate under this title.

3 "INCONTESTABILITY PROVISIONS

4 "SEC. 1013. Any contract of insurance executed by the
5 Commissioner under this title shall be conclusive evidence of
6 the eligibility of the mortgage for insurance, and the validity
7 of any contract of insurance so executed shall be incontest-
8 able in the hands of an approved mortgagee from the date of
9 the execution of such contract, except for fraud or material
10 misrepresentation on the part of such approved mortgagee.

11 "RULES AND REGULATIONS

12 "SEC. 1014. The Commissioner is authorized to make
13 such rules and regulations and to require such agreements
14 as he may deem necessary or desirable to carry out the pro-
15 visions of this title.

16 "TAXATION PROVISIONS

17 "SEC. 1015. Nothing in this title shall be construed to
18 exempt any real property acquired and held by the Com-
19 missioner under this title from taxation by any State or
20 political subdivision thereof to the same extent, according
21 to its value, as other real property is taxed.

22 "COST CERTIFICATION

23 "SEC. 1016. (a) The Commissioner shall adopt such re-
24 quirements as he determines necessary to assure, at reason-
25 able intervals of time during land development and upon

1 completion of such development, that the amount of the
2 mortgage loan outstanding at each such interval does not
3 exceed with respect to that portion of the land remaining
4 under the lien of the mortgage (1) 50 per centum of the
5 Commissioner's estimate of the value of such remaining
6 land before development, plus (2) 90 per centum of the
7 actual costs of the development allocated by the Commis-
8 sioner to such remaining land.

9 “(b) From time to time during, and upon completion
10 of, the development, the Commissioner shall require the
11 mortgagor to certify as to the actual costs of development
12 of the land.

13 “(c) Certifications required pursuant to this section
14 shall be accompanied by such data and records as the Com-
15 missioner shall prescribe.

16 “(d) A mortgagor's certification approved by the Com-
17 missioner shall be final and incontestable except for fraud
18 or material misrepresentation on the part of the mortgagor.

19 “(e) As used in this section, the term ‘actual costs’
20 means the costs (exclusive of kickbacks, rebates, or trade
21 discounts) to the mortgagor of the improvements involved.
22 These costs may include amounts paid for labor, materials,
23 construction contracts, land planning, engineers' and archi-
24 tects' fees, surveys, taxes, and interest during development,
25 organizational and legal expenses, such allocation of general

1 overhead expenses as are acceptable to the Commissioner,
2 and other items of expense incidental to development which
3 may be approved by the Commissioner. If the Commis-
4 sioner determines there is an identity of interest between
5 the mortgagor and the contractor, there may be included
6 an allowance for contractor's profit in an amount deemed
7 reasonable by the Commissioner."

8 (b) (1) Section 302 (b) of the National Housing Act is
9 amended by striking out "the term 'mortgages' " in the last
10 sentence and inserting in lieu thereof "the terms 'mortgages'
11 and 'home mortgages' ".
12

13 (2) The first paragraph of section 24 of the Federal
14 Reserve Act is amended by inserting before the next to last
15 sentence the following new sentence: "Notwithstanding the
16 foregoing limitations and restrictions in this section, any na-
17 tional banking association may make loans for land develop-
18 ment which are secured by mortgages insured under title X
19 of the National Housing Act."

20 (3) Section 5 (c) of the Home Owners Loan Act of
21 1933 is amended by adding at the end thereof the following
22 new paragraph:

23 "Without regard to any other provision of this sub-
24 section, any such association may, to such extent as the
Federal Home Loan Bank Board may by regulation permit,

1 invest in loans, and interests in loans, secured by mortgages
2 as to which the association has the benefit of insurance under
3 title X of the National Housing Act or of a commitment or
4 agreement for such insurance, and investments under this
5 sentence shall not be included in any percentage of assets
6 or other percentage referred to in this subsection.”

7 (4) Section 212 (a) of the National Housing Act is
8 amended by inserting at the end thereof the following new
9 sentence: “The provisions of this section shall also apply
10 to insurance under title X with respect to laborers or me-
11 chanics employed in land development financed with the
12 proceeds of any mortgage insured under that title.”

13 EXTENSION OF INSURANCE AUTHORIZATIONS

14 SEC. 202. (a) Section 2 (a) of the National Housing
15 Act is amended by striking out “October 1, 1965” and insert-
16 ing in lieu thereof “October 1, 1969”.

17 (b) Section 217 of such Act is amended—

18 (1) by striking out “title VIII” and inserting in
19 lieu thereof “title VIII, or title X”, and

20 (2) by striking out “October 1, 1965” and insert-
21 ing in lieu thereof “October 1, 1969”.

22 (c) The second sentences of sections 809 (f) and 810 (k)
23 of such Act are each amended by striking out “October 1,
24 1965” and inserting in lieu thereof “October 1, 1969”.

1 MULTIFAMILY MORTGAGE LIMITS FOR FOUR OR MORE

2 BEDROOM UNITS

3 SEC. 203. (a) Section 207 (c) (3) of the National
4 Housing Act is amended—

5 (1) by striking out “and \$18,500 per family unit
6 with three or more bedrooms” and inserting in lieu
7 thereof “\$18,500 per family unit with three bedrooms,
8 and \$21,000 per family unit with four or more bed-
9 rooms,”; and

10 (2) by striking out “and \$22,500 per family unit
11 with three or more bedrooms” and inserting in lieu
12 thereof “\$22,500 per family unit with three bedrooms,
13 and \$25,500 per family unit with four or more bed-
14 rooms”.

15 (b) (1) Section 213 (b) (2) of such Act is amended—

16 (A) by striking out “and \$18,500 per family unit
17 with three or more bedrooms” and inserting in lieu
18 thereof “\$18,500 per family unit with three bedrooms,
19 and \$21,000 per family unit with four or more bed-
20 rooms,”; and

21 (B) by striking out “and \$22,500 per family unit
22 with three or more bedrooms” and inserting in lieu
23 thereof “\$22,500 per family unit with three bedrooms,
24 and \$25,500 per family unit with four or more bed-
25 rooms”.

1 (2) Section 213 (c) of such Act is amended by strik-
2 ing out “and not to exceed” and all that follows and insert-
3 ing in lieu thereof the following: “and not to exceed a sum
4 computed on the basis of a separate mortgage for each
5 single-family dwelling (irrespective of whether such dwell-
6 ing has a party wall or is otherwise physically connected
7 with another dwelling or dwellings) comprising the prop-
8 erty or project, equal to the total of each of the maximum
9 principal obligations of such mortgages which would meet
10 the requirements of section 203 (b) (2) if the mortgagor
11 were the owner and occupant who had made any required
12 payment on account of the property prescribed in such
13 paragraph.”

14 (c) Section 220 (d) (3) (B) (iii) of such Act is
15 amended—

16 (1) by striking out “and \$18,500 per family unit
17 with three or more bedrooms” and inserting in lieu
18 thereof “\$18,500 per family unit with three bedrooms,
19 and \$21,000 per family unit with four or more bed-
20 rooms”; and

21 (2) by striking out “and \$22,500 per family unit
22 with three or more bedrooms” and inserting in lieu
23 thereof “\$22,500 per family unit with three bedrooms,
24 and \$25,500 per family unit with four or more bed-
25 rooms”.

1 (d) Section 221 (d) of such Act is amended—

2 (1) by striking out “and \$17,000 per family unit
3 with three or more bedrooms” in paragraphs (3) (ii)
4 and (4) (ii) and inserting in lieu thereof “\$17,000 per
5 family unit with three bedrooms, and \$19,250 per family
6 unit with four or more bedrooms”; and

7 (2) by striking out “and \$20,000 per family unit
8 with three or more bedrooms” in paragraphs (3) (ii)
9 and (4) (ii) and inserting in lieu thereof “\$20,000 per
10 family unit with three bedrooms, and \$22,750 per
11 family unit with four or more bedrooms”.

12 (e) Section 231 (c) (2) of such Act is amended—

13 (1) by striking out “and \$17,000 per family unit
14 with three or more bedrooms” and inserting in lieu
15 thereof “\$17,000 per family unit with three bedrooms,
16 and \$19,250 per family unit with four or more bed-
17 rooms”; and

18 (2) by striking out “and \$20,000 per family unit
19 with three or more bedrooms” and inserting in lieu
20 thereof “\$20,000 per family unit with three bedrooms,
21 and \$22,750 per family unit with four or more bed-
22 rooms”.

23 (f) Section 234 (e) (3) of such Act is amended—

24 (1) by striking out “and \$18,500 per family unit
25 with three or more bedrooms” and inserting in lieu

1 thereof “\$18,500 per family unit with three bedrooms,
2 and \$21,000 per family unit with four or more bed-
3 rooms”; and

4 (2) by striking out “and \$22,500 per family unit
5 with three or more bedrooms” and inserting in lieu
6 thereof “\$22,500 per family unit with three bedrooms,
7 and \$25,500 per family unit with four or more bed-
8 rooms”.

9 REHABILITATION IN URBAN RENEWAL AREAS

10 SEC. 204. Section 220 (d) (3) (A) of the National
11 Housing Act is amended—

12 (1) by striking out the second proviso in clause
13 (i) ; and

14 (2) by striking out clause (ii) and inserting in
15 lieu thereof the following:

16 “(ii) in a case where the mortgagor is not the
17 occupant of the property and intends to hold the prop-
18 erty for rental purposes, have a principal obligation in
19 an amount not to exceed 93 per centum of the amount
20 computed under the provisions of clause (i) ;

21 “(iii) in a case where the mortgagor is not the
22 occupant of the property and intends to hold the prop-
23 erty for the purpose of sale, have a principal obligation
24 in an amount not to exceed 85 per centum of the amount

1 computed under the provisions of clause (i), or in the
2 alternative, in an amount equal to the amount computed
3 under the provisions of clause (i) if the mortgagor and
4 mortgagee assume responsibility in a manner satisfactory
5 to the Commissioner for the reduction of the mortgage
6 by an amount not less than 15 per centum of the out-
7 standing principal amount thereof, or by such greater
8 amount as may be required to meet the limitations of
9 clause (iv), in the event the mortgaged property is not,
10 prior to the due date of the eighteenth amortization pay-
11 ment of the mortgage, sold to a purchaser acceptable to
12 the Commissioner who is the occupant of the property
13 and who assumes and agrees to pay the mortgage in-
14 debtedness; and

15 “(iv) in no case involving refinancing (except as
16 provided in clause (iii)) have a principal obligation
17 in an amount exceeding the sum of the estimated cost
18 of repair and rehabilitation and the amount (as deter-
19 mined by the Commissioner) required to refinance ex-
20 isting indebtedness secured by the property or project,
21 plus any existing indebtedness incurred in connection
22 with improving, repairing, or rehabilitating the prop-
23 erty; or”.

1 NONDWELLING FACILITIES FOR URBAN RENEWAL HOUSING

2 SEC. 205. Section 220 (d) (3) (B) of the National
3 Housing Act is amended by striking out clause (iv) and
4 inserting in lieu thereof the following:

5 “(iv) include such nondwelling facilities as the
6 Commissioner deems desirable and consistent with the
7 urban renewal plan: *Provided*, That the project shall
8 be predominantly residential and any nondwelling fa-
9 cility included in the mortgage shall be found by the
10 Commissioner to contribute to the economic feasibility
11 of the project.”

12 LARGER INSURED MORTGAGES FOR SERVICEMEN

13 SEC. 206. Section 222 (b) of the National Housing Act
14 is amended—

15 (1) by striking out “\$20,000” in paragraph (2)
16 and inserting in lieu thereof “\$30,000”; and

17 (2) by striking out paragraph (3) and inserting
18 in lieu thereof the following:

19 “(3) have a principal obligation not in excess of
20 the amount derived by applying the maximum ratio of
21 loan to value prescribed in the first sentence of section
22 203 (b) (2) ; and”.

REFINANCING OF INSURED MORTGAGES

SEC. 207. Section 223 (a) (7) of the National Housing Act is amended by striking out "section 608 of title VI prior to the effective date of the Housing Act of 1954 or under section 220, 221, 903, or section 908" and inserting in lieu thereof "this Act".

CONSOLIDATION OF FHA INSURANCE FUNDS

SEC. 208. Title V of the National Housing Act is amended by adding at the end thereof the following new section:

"ESTABLISHMENT OF GENERAL INSURANCE FUND

"SEC. 519. (a) There is hereby created a General Insurance Fund which shall be used by the Commissioner, on and after the date of the enactment of the Housing and Urban Development Act of 1965, as a revolving fund for carrying out all the insurance provisions of this Act with the exception of those specified in subsection (e). All mortgages or loans insured under this Act pursuant to commitments issued on or after the date of the enactment of the Housing and Urban Development Act of 1965, except those specified in subsection (e), and all loans reported for insurance under section 2 on or after the date of the enactment of the Housing and Urban Development Act of 1965, shall be insured under the General Insurance Fund. The Commissioner shall transfer to the General Insurance Fund—

1 “(1) the assets and liabilities of all insurance ac-
2 counts and funds, except the Mutual Mortgage Insurance
3 Fund, existing under this Act immediately prior to
4 the enactment of the Housing and Urban Development
5 Act of 1965;

6 “(2) all outstanding commitments for insurance
7 issued prior to the date of the enactment of the Housing
8 and Urban Development Act of 1965, except those
9 specified in subsection (e) ;

10 “(3) the insurance on all mortgages and loans in-
11 sured prior to the date of the enactment of the Housing
12 and Urban Development Act of 1965, except insur-
13 ance specified in subsection (e) ; and

14 “(4) the insurance of all loans made by approved
15 financial institutions pursuant to section 2 prior to the
16 date of the enactment of the Housing and Urban De-
17 velopment Act of 1965.

18 “(b) The general expenses of the operations of the Fed-
19 eral Housing Administration relating to mortgages and loans
20 which are the obligation of the General Insurance Fund
21 may be charged to the General Insurance Fund.

22 “(c) Moneys in the General Insurance Fund not needed
23 for the current operations of the Federal Housing Admin-
24 istration with respect to mortgages and loans which are the
25 obligation of the General Insurance Fund shall be deposited

1 with the Treasurer of the United States to the credit of such
2 Fund, or invested in bonds or other obligations of, or in
3 bonds or other obligations guaranteed as to principal and
4 interest by, the United States. The Commissioner may, with
5 the approval of the Secretary of the Treasury, purchase in
6 the open market debentures issued as obligations of the Gen-
7 eral Insurance Fund or issued prior to the enactment of the
8 Housing and Urban Development Act of 1965 under other
9 provisions of this Act, except debentures issued under the
10 Mutual Mortgage Insurance Fund. Such purchases shall be
11 made at a price which will provide an investment yield of not
12 less than the yield obtainable from other investments author-
13 ized by this section. Debentures so purchased shall be can-
14 celed and not reissued.

15 “(d) Premium charges, adjusted premium charges, and
16 appraisal and other fees received on account of the insurance
17 of any mortgage or loan which is the obligation of the Gen-
18 eral Insurance Fund, the receipts derived from the property
19 covered by such mortgages and loans and from the claims,
20 debts, contracts, property, and security assigned to the Com-
21 missioner in connection therewith, and all earnings on the
22 assets of the Fund shall be credited to the General Insurance
23 Fund. The principal of, and interest paid and to be paid on,
24 debentures which are the obligation of such Fund, and cash
25 insurance payments and adjustments, and expenses incurred

1 in the handling, management, renovation, and disposal of
 2 properties acquired, in connection with mortgages and loans
 3 which are the obligation of such Fund, shall be charged to
 4 such Fund.

5 “(e) The General Insurance Fund shall not be used
 6 for carrying out the provisions of sections 203 (b), 203 (h),
 7 and 203 (i), or the provisions of section 213 to the extent
 8 that they involve mortgages the insurance for which is the
 9 obligation of the Cooperative Management Housing Insur-
 10 ance Fund created by section 213 (k); and nothing in this
 11 section shall apply to or affect any mortgages, loans, com-
 12 mitments, or insurance under such provisions.”

13 MUTUALITY FOR MANAGEMENT-TYPE COOPERATIVES

14 SEC. 209. (a) Section 213 of the National Housing Act
 15 is amended by adding at the end thereof the following new
 16 subsections:

17 “(k) There is hereby created a Cooperative Manage-
 18 ment Housing Insurance Fund (hereinafter referred to as
 19 the ‘Management Fund’). The Management Fund shall
 20 be used by the Commissioner as a revolving fund for carry-
 21 ing out the provisions of this section with respect to
 22 mortgages or loans insured, on or after the date of the enact-
 23 ment of this subsection, under subsections (a) (1), (a) (3)
 24 (if the project is acquired by a cooperative corporation),
 25 (i), and (j). The Management Fund shall also be used as

1 a revolving fund for mortgages, loans, and commitments
2 transferred to it pursuant to subsection (m). The Commis-
3 sioner is directed to transfer to the Management Fund from
4 the General Insurance Fund established pursuant to section
5 519 such amount as the Commissioner determines to be
6 necessary and appropriate. General expenses of operation
7 of the Federal Housing Administration relating to mort-
8 gages or loans which are the obligation of the Management
9 Fund may be charged to the Management Fund.

10 “(1) The Commissioner shall establish in the Manage-
11 ment Fund, as of the date of the enactment of this subsec-
12 tion, a General Surplus Account and a Participating Reserve
13 Account. The aggregate net income thereafter received or
14 any net loss thereafter sustained by the Management Fund,
15 in any semiannual period, shall be credited or charged to
16 the General Surplus Account or the Participating Reserve
17 Account or both in such manner and amounts as the Com-
18 missioner may determine to be in accord with sound actu-
19 arial and accounting practice. Upon termination of the
20 insurance obligation of the Management Fund by payment
21 of any mortgage or loan insured under this section, and at
22 such time or times prior to such termination as the Commis-
23 sioner may determine, the Commissioner is authorized to
24 distribute to the mortgagor or borrower a share of the Par-
25 ticipating Reserve Account in such manner and amount as

1 the Commissioner shall determine to be equitable and in ac-
2 cordance with sound actuarial and accounting practice: *Pro-*
3 *vided*, That in no event shall the amount of the distributable
4 share exceed the aggregate scheduled annual premiums of the
5 mortgagor or borrower to the year of payment of the share
6 less the total amount of any share or shares previously dis-
7 tributed by the Commissioner to the mortgagor or borrower:
8 *And provided further*, That in no event may a distributable
9 share be distributed until any funds transferred from the Gen-
10 eral Insurance Fund to the Management Fund pursuant to
11 subsection (k) or (o) have been repaid in full to the General
12 Insurance Fund. No mortgagor, mortgagee, borrower, or
13 lender shall have any vested right in a credit balance in any
14 such account or be subject to any liability arising out of the
15 mutuality of the Management Fund. The determination of
16 the Commissioner as to the amount to be paid by him to any
17 mortgagor or borrower shall be final and conclusive.

18 “(m) The Commissioner is authorized to transfer to the
19 Management Fund commitments for insurance issued under
20 subsections (a) (1), (i), and (j) prior to the date of the
21 enactment of this subsection, and to transfer to the Manage-
22 ment Fund the insurance of any mortgage or loan insured
23 prior to the date of the enactment of this subsection under
24 subsection (a) (1), (a) (3) (if the project is acquired by a
25 cooperative corporation), (i), or (j), but only in cases

1 where the consent of the mortgagee or lender to the transfer
2 is obtained or a request by the mortgagee or lender for the
3 transfer is received by the Commissioner within such period
4 of time after the date of the enactment of this subsection as
5 the Commissioner shall prescribe: *Provided*, That the insur-
6 ance of any mortgage or loan shall not be transferred under
7 the provisions of this subsection if on the date of the enact-
8 ment of this subsection the mortgage or loan is in default and
9 the mortgagee or lender has notified the Commissioner in
10 writing of its intention to file an insurance claim. Any
11 insurance or commitment not so transferred shall continue to
12 be an obligation of the General Insurance Fund.

13 “(n) Notwithstanding the limitations contained in
14 other provisions of this Act, premium charges for mortgages
15 or loans insured under this section and sections 207, 231, and
16 232 may be payable in debentures issued in connection with
17 mortgages or loans transferred to the Management Fund or
18 in connection with mortgages or loans insured pursuant to
19 commitments transferred to the Management Fund, as pro-
20 vided in subsection (m) of this section.

21 “(o) Notwithstanding any other provision of this Act,
22 the Commissioner is authorized to transfer funds between
23 the Cooperative Management Housing Insurance Fund and
24 the General Insurance Fund in such amounts and at such
25 times as he may determine, taking into consideration the

1 requirements of each such Fund, to assist in carrying out
2 effectively the insurance programs for which such Funds
3 were respectively established.”

4 (b) Section 213 of such Act is further amended—

5 (1) by inserting before the period at the end of
6 subsection (a) the following: “: *Provided*, That as ap-
7 plied to mortgages the mortgage insurance for which is
8 the obligation of the Management Fund, the reference
9 to the General Insurance Fund in section 207 (b) (2)
10 shall be construed to refer to the Management Fund”;
11 and

12 (2) by inserting before the period at the end of
13 subsection (e) the following: “: *Provided*, That as ap-
14 plied to mortgages or loans the insurance for which is
15 the obligation of the Management Fund (1) all refer-
16 ences to the General Insurance Fund shall be construed
17 to refer to the Management Fund, and (2) all refer-
18 ences to section 207 shall be construed to refer to sub-
19 sections (a) (1), (a) (3) (if the project involved is
20 acquired by a cooperative corporation), (i), and (j)
21 of this section”.

22 OPTIONAL CASH PAYMENT OF INSURANCE BENEFITS

23 SEC. 210. Title V of the National Housing Act is
24 amended by adding at the end thereof (after the new sec-

1 tion added by section 208 of this Act) the following new
2 section:

3 "OPTIONAL CASH PAYMENT OF INSURANCE BENEFITS

4 "SEC. 520. (a) Notwithstanding any other provisions
5 of this Act with respect to the payment of insurance benefits,
6 the Commissioner is authorized, in his discretion, to pay in
7 cash or in debentures any insurance claim or part thereof
8 which is paid on or after the date of the enactment of the
9 Housing and Urban Development Act of 1965 on a mort-
10 gage or a loan which was insured under any section of this
11 Act either before or after such date. If payment is made in
12 cash, it shall be in an amount equivalent to the face amount
13 of the debentures that would otherwise be issued plus an
14 amount equivalent to the interest which the debentures would
15 have earned, computed to a date to be established pursuant
16 to regulations issued by the Commissioner.

17 "(b) The Commissioner is authorized to borrow from
18 the Treasury from time to time such amounts as the Com-
19 missioner shall determine are necessary to make payments
20 in cash (in lieu of issuing debentures guaranteed by the
21 United States, as provided in this Act) pursuant to the pro-
22 visions of this section. Notes or other obligations issued
23 by the Commissioner in borrowing under this subsection
24 shall be subject to such terms and conditions as the Secretary
25 of the Treasury may prescribe. Each sum borrowed pur-

1 suant to this subsection shall bear interest at a rate deter-
2 mined by the Secretary of the Treasury, taking into consid-
3 eration the average market yield on outstanding marketable
4 obligations of the United States of comparable maturities
5 during the month preceding the issuance of such notes or
6 other obligations.”

7 FHA MORTGAGE FINANCING FOR VETERANS

8 SEC. 211. (a) Section 203 (b) (2) of the National
9 Housing Act is amended—

10 (1) by striking out “and not to exceed” and in-
11 serting in lieu thereof “and (except as provided in the
12 last sentence of this paragraph) not to exceed”; and

13 (2) by adding at the end thereof the following
14 new sentence: “If the mortgagor is a veteran (as de-
15 fined in section 101 (2) of title 38, United States Code)
16 who has not received any direct, guaranteed, or insured
17 loan under laws administered by the Veterans’ Admin-
18 istration for the purchase, construction, or repair of a
19 dwelling (including a farm dwelling) which was to be
20 owned and occupied by him as his home, and the mort-
21 gage to be insured under this section covers property
22 upon which there is located a dwelling designed prin-
23 cipally for a one-family residence, the principal obliga-
24 tion may be in an amount equal to the sum of (i) 100
25 per centum of \$20,000 of the appraised value of the

1 property as of the date the mortgage is accepted for
2 insurance, and (ii) 85 per centum of such value in
3 excess of \$20,000.”

4 (b) Section 203 (b) (9) of such Act is amended by
5 inserting after “on account of the property” the following:
6 “(except in a case to which the last sentence of paragraph
7 (2) applies)”.

8 MORTGAGE LIMIT FOR HOMES IN OUTLYING AREAS UNDER
9 FHA SECTION 203(i) PROGRAM

10 SEC. 212. Section 203 (i) of the National Housing Act
11 is amended by striking out “\$11,000” and inserting in lieu
12 thereof “\$12,500”.

13 REFINANCING OF HOUSING FOR ELDERLY PROJECTS

14 SEC. 213. Section 231 (c) (7) of the National Housing
15 Act is amended by striking out “with 50 per centum” and
16 inserting in lieu thereof “or involves the refinancing of a
17 mortgage covering an existing property or project in which
18 it has been determined by the Commissioner that such re-
19 financing is necessary or desirable in order to avoid hardship
20 for elderly or handicapped persons or families who are tenants
21 or prospective tenants of such project: *Provided*, That in
22 either case, such property or project shall contain 50 per
23 centum”.

TITLE III—URBAN RENEWAL

STUDY OF HOUSING AND BUILDING CODES, ZONING, TAX
POLICIES, AND DEVELOPMENT STANDARDS

SEC. 301. (a) The Congress finds that the general welfare of the Nation requires that local authorities be encouraged and aided to prevent slums, blight, and sprawl, preserve natural beauty, and provide for decent, durable housing so that the goal of a decent home and a suitable living environment for every American family may be realized as soon as feasible. The Congress further finds that there is a need to study housing and building codes, zoning, tax policies, and development standards in order to determine how (1) local property owners and private enterprise can be encouraged to serve as large a part as they can of the total housing and building need, and (2) Federal, State, and local governmental assistance can be so directed as to place greater reliance on local property owners and private enterprise and enable them to serve a greater share of the total housing and building need. The Housing and Home Finance Administrator is therefore directed to study the structure of (1) State and local urban and suburban housing and building laws, standards, codes, and regulations and their impact on housing and building costs, how they can be simplified, im-

1 proved, and enforced, at the local level, and what methods
2 might be adopted to promote more uniform building codes
3 and the acceptance of technical innovations including new
4 building practices and materials; (2) State and local zoning
5 and land use laws, codes, and regulations, to find ways by
6 which States and localities may improve and utilize them in
7 order to obtain further growth and development; and (3)
8 Federal, State, and local tax policies with respect to their
9 effect on land and property cost and on incentives to build
10 housing and make improvements in existing structures.

11 (b) The Administrator shall submit a report based on
12 such study to the President and to the Congress within 18
13 months after the enactment of the Housing and Urban De-
14 velopment Act of 1965 or the appropriation of funds for the
15 study, whichever is later.

16 (c) There are authorized to be appropriated such funds
17 as may be necessary to carry out the purposes of this section.
18 Any funds so appropriated shall remain available until
19 expended.

20 GENERAL NEIGHBORHOOD RENEWAL PLANS

21 SEC. 302. Section 102 (d) of the Housing Act of 1949
22 is amended—

23 (1) by striking out the fifth sentence and inserting
24 in lieu thereof the following:

25 “In order to facilitate proper preliminary planning for

1 the attainment of the urban renewal objectives of this title,
 2 the Administrator may also make advances of funds (in addi-
 3 tion to those authorized above) to local public agencies for
 4 the preparation of General Neighborhood Renewal Plans (as
 5 herein defined). A General Neighborhood Renewal Plan
 6 may be prepared for an area which consists of an urban re-
 7 newal area or areas together with any adjoining areas, and
 8 which is of such size that the urban renewal activities in the
 9 urban renewal area or areas may have to be carried out in
 10 stages, consistent with the capacity and resources of the
 11 respective local public agency or agencies, over an estimated
 12 period of not more than ten years.”; and

13 (2) by striking out clause (1) of the sixth sentence
 14 and inserting in lieu thereof the following:

15 “(1) in the interest of sound community planning,
 16 it is desirable that the urban renewal activities proposed
 17 for the area be planned in their entirety;”.

18 INCREASE IN AUTHORIZATION FOR CAPITAL GRANTS

19 SEC. 303. (a) The first sentence of section 103 (b) of
 20 the Housing Act of 1949 is amended by striking out
 21 “\$4,725,000,000” and inserting in lieu thereof “\$4,700,-
 22 000,000, which amount shall be increased by \$675,000,000
 23 on the date of the enactment of the Housing and Urban
 24 Development Act of 1965, by \$725,000,000 on July 1,

1 1966, and by \$750,000,000 on July 1 in each of the years
2 1967 and 1968”.

3 (b) The proviso in the first sentence of section 103 (b)
4 of such Act, and the second sentence of section 6 (b) of
5 the Urban Mass Transportation Act of 1964, are repealed.

6 USE OF GRANT OR LOAN FUNDS IN CODE ENFORCEMENT
7 AND REHABILITATION PROJECTS

8 SEC. 304. The unnumbered paragraph immediately fol-
9 lowing clause (8) in section 110 (c) of the Housing Act
10 of 1949 is amended—

11 (1) by inserting “(A)” before “no contract”; and

12 (2) by inserting before the period at the end of the
13 paragraph the following: “, and (B) not less than 10
14 per centum of the aggregate amount of (i) grants
15 authorized to be contracted for under this title by the
16 Housing and Urban Development Act of 1965 and sub-
17 sequent Acts, and (ii) loans authorized to be made
18 under section 312 of the Housing Act of 1964, shall be
19 available for projects assisted with such grants or loans
20 which involve primarily code enforcement and reha-
21 bilitation”.

1 STRENGTHENED WORKABLE PROGRAM REQUIREMENT

2 SEC. 305. Section 101 of the Housing Act of 1949 is
3 amended by adding at the end thereof the following new
4 subsection:

5 “(e) No loan or grant contract may be entered into
6 by the Administrator for an urban renewal project unless
7 he determines that (A) the workable program for com-
8 munity improvement presented by the locality pursuant to
9 subsection (c) is of sufficient scope and content to furnish a
10 basis for evaluation of the need for the urban renewal project;
11 and (B) such project is in accord with the program.”

12 REHABILITATION LOANS

13 SEC. 306. (a) Section 312 (d) of the Housing Act of
14 1964 is amended to read as follows:

15 “(d) In order to provide moneys for loans in accord-
16 ance with this section, the Administrator is authorized to
17 establish a revolving fund which shall comprise all moneys
18 heretofore or hereafter appropriated pursuant to this
19 section, together with all repayments and other receipts
20 heretofore or hereafter received in connection with loans
21 made under this section. There are authorized to be

1 appropriated to such revolving fund, in addition to amounts
2 authorized for the purposes of this section prior to the date
3 of the enactment of the Housing and Urban Development
4 Act of 1965, such funds as may be necessary to carry out
5 the purposes of this section. All funds so appropriated shall
6 remain available until expended."

7 (b) Section 312 of such Act is further amended by
8 adding at the end thereof the following new subsection:

9 " (h) No loan shall be made under the authority of this
10 section after October 1, 1969, except pursuant to a contract,
11 commitment, or other obligation entered into pursuant to
12 this section before that date."

13 LEASE GUARANTIES FOR SMALL-BUSINESS CONCERNS

14 DISPLACED BY URBAN RENEWAL PROJECTS

15 SEC. 307. (a) Section 7 of the Small Business Act is
16 amended by adding at the end thereof the following new
17 subsection:

18 " (e) (1) The Administration also is empowered, in
19 order to assist small-business concerns which have been dis-
20 placed by urban renewal projects in obtaining leases of
21 property for use in the conduct of their business operations,
22 to insure the owner or lessor of any such property, or the
23 lending institution financing the construction thereof, against
24 losses which such owner, lessor, or institution might sustain

1 as a result of the failure of the small-business concern to
2 perform the lease in accordance with its terms.

3 “(2) No insurance under this subsection shall be granted
4 by the Administration with respect to any lease unless—

5 “(A) the lease is for a period of not more than
6 ten years and contains or is subject to such other terms
7 and conditions as the Administration may require in
8 order to protect the interests of the small-business con-
9 cern and to insure that the lease will assist in carrying
10 out the purpose of this Act; and

11 “(B) the small-business concern is financially sound
12 and efficiently managed, and has provided satisfactory
13 assurances that it will comply with the terms of the lease
14 and any related documents and with such additional
15 terms and conditions as the Administration may specify.

16 “(3) There is hereby established an insurance fund for
17 use by the Administration in carrying out this subsection.
18 Each person granted insurance under this subsection shall be
19 required to pay premiums for such insurance, at such times
20 and in such manner as may be prescribed by the Administra-
21 tion, in amounts which shall be fixed by the Administration
22 but which shall not exceed, in the case of any lease, an
23 amount equivalent to 1 per centum of the annual rental (or
24 minimum rental) payable under such lease. Such premiums,

1 together with any other receipts under the insurance program
2 established by this subsection, shall be placed in the insurance
3 fund. Moneys in such fund not needed for the payment of
4 current operating expenses of the insurance program or for
5 the payment of claims arising thereunder may be invested in
6 bonds or other obligations of, or bonds or other obligations
7 guaranteed as to principal and interest by, the United States;
8 except that moneys made available to provide initial capital
9 for such fund under the sixth sentence of section 4 (c) shall
10 be returned to the revolving fund established by such section,
11 in such amounts and at such times as the Administration
12 determines to be appropriate, whenever the level of such
13 insurance fund (by reason of premiums and receipts from
14 other sources) is sufficiently high to permit the return of
15 such moneys without danger to the solvency of the insurance
16 program under this subsection.

17 “(4) The Administration is authorized and directed
18 to prescribe such rules and regulations as may be necessary
19 to carry out this subsection.”

20 (b) Section 4 (c) of such Act is amended—

21 (1) by inserting “7 (e),” after “7 (b),” in the first
22 sentence; and

23 (2) by inserting after the fifth sentence the fol-
24 lowing new sentence: “Not to exceed \$5,000,000 shall

be made available to provide initial capital for the insurance fund established by section 7 (e) (3)."

(c) Section 5 (b) of such Act is amended—

(1) by inserting after "loans granted" in paragraphs (2) and (3) the following: "or the performance of leases insured";

(2) by striking out "loans made" each place it appears in paragraphs (4) and (7) and inserting in lieu thereof "loans made or leases insured"; and

(3) by striking out "and 7 (b)" in paragraph (5) and inserting in lieu thereof ", 7 (b), and 7 (e)".

RELOCATION OF DISPLACED FROM URBAN RENEWAL

AREAS

SEC. 308. (a) Section 105 (c) of the Housing Act of 1949 is amended to read as follows:

"(c) There shall be a feasible method for the temporary relocation of individuals and families displaced from the urban renewal area, and there are or are being provided, in the urban renewal area or in other areas not generally less desirable in regard to public utilities and public and commercial facilities and at rents or prices within the financial means of the individuals and families displaced from the urban renewal area, decent, safe, and sanitary dwellings equal in number to the number of and available to such dis-

1 placed individuals and families and reasonably accessible
2 to their places of employment. The Administrator shall
3 issue rules and regulations to aid in implementing the
4 requirements of this subsection and in otherwise achiev-
5 ing the objectives of this title. Such rules and regula-
6 tions shall require that there be established, at the earli-
7 est practicable time, for each urban renewal project in-
8 volving the displacement of individuals, families, and
9 business concerns occupying property in the urban
10 renewal area, a relocation assistance program which shall
11 include such measures, facilities, and services as may be
12 necessary or appropriate in order (A) to determine the
13 needs of such individuals, families, and business concerns
14 for relocation assistance; (B) to provide information and
15 assistance to aid in relocation and otherwise minimize the
16 hardships of displacement, including information as to real
17 estate agencies, brokers, and boards in or near the urban
18 renewal area which deal in residential or business property
19 that might be appropriate for the relocating of displaced
20 individuals, families, and business concerns; and (C) to
21 assure the necessary coordination of relocation activities
22 with other project activities and other planned or proposed
23 governmental actions in the community which may affect
24 the carrying out of the relocation program, particularly

1 planned or proposed low-rent housing projects to be con-
2 structed in or near the urban renewal area. As a condition
3 to further assistance after the enactment of this sentence with
4 respect to each urban renewal project involving the displace-
5 ment of individuals and families, the Administrator shall
6 require, within a reasonable time prior to actual displacement,
7 satisfactory assurance by the local public agency that decent,
8 safe, and sanitary dwellings as required by the first sentence
9 of this subsection are available for the relocation of each such
10 individual or family.”

11 (b) The requirements imposed by the amendment
12 made by subsection (a) of this section shall not be ap-
13 plicable to any project receiving Federal recognition prior
14 to the date of the enactment of this Act.

15 REDEVELOPMENT IN ACCORDANCE WITH URBAN RENEWAL
16 PLAN

17 SEC. 309. Section 106 of the Housing Act of 1949 is
18 amended by adding at the end thereof the following new
19 subsection:

20 “(h) Notwithstanding any other provision of this title,
21 no contract shall be entered into for any loan or capital grant
22 under this title with any local public agency unless the local
23 public agency establishes, by evidence satisfactory to the
24 Administrator, that any urban renewal project with respect

1 to which such local public agency has received a loan or
 2 capital grant under this title has been, or will be, undertaken
 3 and carried out in substantial accordance with the urban re-
 4 newal plan, and any amendments thereto, approved with re-
 5 spect to such project, and the terms of the contract for loan
 6 or capital grant covering such project.”

7 **LIMITATION ON NONCASH GRANT-IN-AID CREDIT ALLOWED**
 8 **FOR PUBLICLY OWNED PARKING FACILITIES**

9 **SEC. 310.** The parenthetical phrase in clause (3) of
 10 the first sentence of section 110 (d) of the Housing Act of
 11 1949 is amended by striking out “and” and inserting in lieu
 12 thereof a comma, and by inserting at the end thereof (within
 13 the parentheses) the following: “, and publicly owned park-
 14 ing facilities to the extent that the cost thereof is anticipated
 15 to be recovered from revenues”.

16 **ELIGIBILITY OF COMMUNITIES IN DEPRESSED AREAS FOR**
 17 **URBAN RENEWAL ASSISTANCE**

18 **SEC. 311.** (a) Subparagraph (B) of section 103 (a)
 19 (2) of the Housing Act of 1949 is amended to read as
 20 follows:

21 “(B) three-fourths of the aggregate net project costs
 22 of any such projects which are located in (i) a munici-
 23 pality having a population of fifty thousand or less ac-
 24 cording to the most recent decennial census, or (ii) a

1 municipality situated in a labor market area which, at
2 the time the contract or contracts involved are entered
3 into or at such earlier time as the Administrator may
4 specify in order to avoid hardship, is designated as a re-
5 development area under the second sentence of section
6 5 (a) of the Area Redevelopment Act or any other
7 legislation enacted after the date of the enactment of the
8 Housing and Urban Development Act of 1965 contain-
9 ing standards for designation as a redevelopment area
10 generally comparable to those set forth in the second
11 sentence of section 5 (a) of the Area Redevelopment
12 Act, and”.

13 (b) The amendment made by subsection (a) shall apply
14 only with respect to urban renewal projects placed under
15 contract for capital grant on or after the date of the enact-
16 ment of this Act; except that such amendment shall apply
17 with respect to all urban renewal projects in the city of
18 Providence, Rhode Island, placed under contract for capital
19 grant during the period Providence was designated as a
20 redevelopment area under section 5 (a) of the Area Rede-
21 velopment Act (or at such earlier time as the Administrator
22 may specify in order to avoid hardship) and not completed
23 prior to the date of the enactment of this Act.

1 LOCAL GRANTS-IN-AID FOR URBAN RENEWAL PROJECTS IN
 2 PHILADELPHIA AND WILKES-BARRE, PENNSYLVANIA

3 SEC. 312. Notwithstanding any other provision of law,
 4 moneys heretofore expended by the University of Pennsyl-
 5 vania and Wilkes College for land (and related expenditures
 6 for demolition and relocation) included in the overall devel-
 7 opment plans proposed by such institutions and utilized, or
 8 to be utilized, in connection with new facilities of such
 9 institutions within one mile of urban renewal projects Penn-
 10 sylvania 5-3 (University City) and Pennsylvania R-149
 11 (Wright Street), respectively, shall, if otherwise eligible,
 12 be allowed as local grants-in-aid for such projects.

13 LOCAL GRANTS-IN-AID FOR URBAN RENEWAL PROJECTS IN
 14 DENVER

15 SEC. 313. Notwithstanding the extent to which the
 16 cultural and convention center proposed to be built adjacent
 17 to urban renewal project Colorado R-15 (Skyline) in
 18 Denver, Colorado, may benefit areas other than the urban
 19 renewal area, expenses incurred by the City of Denver in
 20 constructing such center shall, to the extent otherwise eligi-
 21 ble, be counted as a grant-in-aid toward such project.

22 LOCAL GRANT-IN-AID CREDIT FOR CERTAIN COAL
 23 ROYALTIES

24 SEC. 314. (a) Section 110 (d) of the Housing Act of
 25 1949 is amended by adding at the end thereof the following
 26 new paragraph:

1 “Where a project in any municipality includes an area
2 affected by an underground mine fire or by a coal mine
3 subsidence and where it is necessary in such project to
4 remove any underlying coal deposits in order to stabilize
5 the soil or to control the underground mine fire, then any
6 royalties received by the project from the removal and sale
7 of such coal deposits shall be credited to the project as a
8 local grant-in-aid made by such municipality.”

9 (b) Any contract under title I of the Housing Act of
10 1949 executed prior to the date of the enactment of this Act
11 shall, at the request of the municipality involved, be amended
12 to reflect the amendment made by subsection (a).

13 TITLE IV—COMPENSATION OF CONDEMNNEES

14 DECLARATION OF POLICY

15 SEC. 401. In order to encourage the acquisition of real
16 property in a manner which affords fair and equitable treat-
17 ment to owners and tenants of such property and on as
18 nearly uniform a basis as practicable, the Congress hereby
19 establishes a Federal policy of uniform land acquisition pro-
20 cedures for real property to be acquired in the course of
21 federally assisted development programs.

22 DEFINITIONS

23 SEC. 402. For the purposes of this title—

24 (1) the term “development program” means any
25 program established by or conducted under any of the
26 following provisions of law:

1 (A) the United States Housing Act of 1937;

2 (B) title I of the Housing Act of 1949;

3 (C) title IV of the Housing Act of 1950;

4 (D) title II of the Housing Amendments of
5 1955;

6 (E) section 202 of the Housing Act of 1959;

7 and

8 (F) title VII of the Housing Act of 1961;

9 (2) the term "Federal assistance" means a grant,
10 loan, contract of guaranty, annual contribution, or other
11 assistance provided by the United States;

12 (3) the term "applicant" means any public body
13 or other agency or nonprofit institution authorized to
14 receive Federal assistance under a development program;

15 (4) the term "interest" means any interest in real
16 property and includes future, nonpossessory, and lease-
17 hold interests;

18 (5) the term "real property" means any land, or
19 any interest in land, and (A) any building, structure,
20 or other improvements embedded in or affixed to land,
21 and any article so affixed or attached to such building,
22 structure, or improvement as to be an essential or integral
23 part thereof; (B) any article affixed or attached to such
24 real property in such manner that it cannot be removed
25 without material injury to itself or the real property; and

1 (C) any article so designed, constructed, or specially
2 adapted to the purpose for which such real property is
3 used that (i) it is an essential accessory or part of such
4 real property, (ii) it is not capable of use elsewhere, and
5 (iii) it would lose substantially all its value if removed
6 from the real property; and

7 (6) the term "Administrator" means the Housing
8 and Home Finance Administrator.

9 LAND ACQUISITION POLICY

10 SEC. 403. (a) As a condition of eligibility for Federal
11 assistance pursuant to a development program, each applicant
12 for such assistance shall satisfy the Administrator that the
13 following policies will be followed in connection with the
14 acquisition of real property by eminent domain in the course
15 of such program—

16 (1) the applicant shall make every reasonable effort
17 to acquire the real property by negotiated purchase;

18 (2) the real property shall be appraised before the
19 initiation of negotiations, and the owner or his designated
20 representative shall be given an opportunity to accom-
21 pany the appraiser during his inspection of the property;

22 (3) before the initiation of negotiations for acqui-
23 sition of the real property, the applicant shall establish a
24 price believed to be fair and reasonable and shall offer
25 to acquire the property for the price so established;

1 (4) if only a part of or an interest less than a fee
2 title to real property is to be acquired, the applicant shall
3 provide the owner with a statement of its estimate of—

4 (A) the fair value of the entire property imme-
5 diately before the acquisition,

6 (B) the fair value of the property remaining
7 immediately after the acquisition,

8 (C) the fair value of the part of or interest in
9 the property actually acquired,

10 (D) the damages, if any, resulting to the
11 remaining property (or interest therein), and

12 (E) the benefits, if any, accruing to the remain-
13 ing property (or interest therein) ;

14 (5) no owner shall be required to surrender pos-
15 session of real property before the applicant pays to the
16 owner (A) the agreed purchase price arrived at by
17 negotiation, or (B) in any case where only the amount
18 of the payment to the owner is in dispute, not less than
19 75 per centum of the most recent fair and reasonable
20 price established under paragraph (3) ;

21 (6) the construction or development of any public
22 improvements shall be so scheduled that no person law-
23 fully occupying the real property shall be required to
24 surrender possession on account of such construction or
25 development without at least 90 days' written notice

1 from the applicant of the date on which such construction
2 or development is scheduled to begin;

3 (7) if the applicant does not require the use of a
4 building, structure, or other improvement on the real
5 property to be acquired, the applicant shall offer to
6 permit its owner to remove it upon agreement that the
7 fair value of the building, structure, or other improve-
8 ment to be removed from the real property, as deter-
9 mined by the applicant, will be deducted from the
10 compensation otherwise to be paid for the real property,
11 or will be paid to the applicant by the owner;

12 (8) if the applicant permits an owner or tenant to
13 rent acquired real property for a short term or for a
14 period subject to termination by the applicant on short
15 notice, the amount of rent required shall not exceed the
16 fair rental value of the property to the owner or tenant
17 for such term or period, as determined by the applicant;

18 (9) the applicant shall not advance the time of
19 eminent domain, nor defer eminent domain or the deposit
20 of funds in court for the benefit of the owner, in order to
21 compel an agreement on the price to be paid for the real
22 property;

23 (10) if the acquisition of only a part of any real
24 property would leave its owner with an uneconomic

1 remnant, the applicant shall acquire the entire property;
2 and

3 (11) in determining the boundaries of a proposed
4 public improvement, the applicant shall take into account
5 human considerations, including the economic and social
6 effects of the proposed public improvement on owners
7 and tenants of real property in the area, in addition to
8 engineering and other factors.

9 (b) Nothing in this section shall be construed as super-
10 seding or otherwise affecting the provisions of any State or
11 local law, or as affecting the validity of any property acqui-
12 sition by purchase or eminent domain.

13 RELOCATION PAYMENTS UNDER FEDERALLY ASSISTED
14 DEVELOPMENT PROGRAMS

15 SEC. 404. (a) To the extent not otherwise authorized
16 under any Federal law, financial assistance extended to an
17 applicant under any federally assisted development program
18 may include grants for relocation payments, as herein de-
19 fined. Such grants may be in addition to other financial as-
20 sistance under such federally assisted development programs,
21 and may cover the full amount of such relocation payments.
22 The term "relocation payments" means payments by the
23 applicant which are (1) made to an individual, family, busi-
24 ness concern, or nonprofit organization displaced by a project
25 on or after the date of the enactment of the Housing and

1 Urban Development Act of 1965, and (2) made on such
2 terms and conditions and subject to such limitations (to the
3 extent applicable, but not including the date of displacement)
4 as are provided for relocation payments, at the time such
5 payments are approved, by sections 114 (b), (c), and (d)
6 of the Housing Act of 1949 with respect to projects assisted
7 under title I thereof. Relocation payments authorized by
8 this subsection shall be made subject to such rules and regu-
9 lations as may be prescribed by the Administrator.

10 (b) Section 114 (b) (2) of the Housing Act of 1949
11 is amended by striking out "\$1,500" and inserting in lieu
12 thereof "\$2,500".

13 (c) (1) Section 114 of such Act is further amended by
14 redesignating subsection (d) as subsection (e) and by in-
15 serting after subsection (c) the following new subsection:

16 " (d) In addition to payments authorized to be made
17 under subsections (b) and (c), a local public agency may
18 pay to any displaced individual, family, business concern,
19 or nonprofit organization reasonable and necessary expenses
20 incurred for (1) recording fees, transfer taxes, and similar
21 expenses incidental to conveying real property to a project
22 assisted under this title, (2) penalty costs for prepayment
23 of any mortgage encumbering such real property, and (3)
24 the pro rata portion of real property taxes allocable to a
25 period subsequent to the date of vesting of title or the

1 effective date of the acquisition of such real property by
2 such agency, whichever is earlier.”

3 (2) Section 15 (8) of the United States Housing Act
4 of 1937 is amended by striking out “section 114 (b) or
5 (c)” and inserting in lieu thereof “section 114 (b), (c),
6 and (d)”.

7 (d) Subsection (a) shall not be applicable to any proj-
8 ect receiving financial assistance under a development pro-
9 gram prior to the date of the enactment of this Act.

10 FUNDS FOR CERTAIN PAYMENTS IN EMINENT DOMAIN

11 SEC. 405. Notwithstanding any other provision of law,
12 financial assistance under any federally assisted development
13 program may include amounts necessary for financing, in
14 the same manner that other costs of a project assisted under
15 such program are financed, the payments described in para-
16 graph (5) (B) of section 403 (a) of this Act.

17 TITLE V—COLLEGE HOUSING

18 INCREASE IN AUTHORIZATION FOR COLLEGE HOUSING

19 LOANS

20 SEC. 501. Section 401 (d) of the Housing Act of 1950
21 is amended by striking out “through 1964” each place it
22 appears and inserting in lieu thereof “through 1968”.

23 INTEREST RATE ON COLLEGE HOUSING LOANS

24 SEC. 502. (a) Effective with respect to loan contracts
25 entered into after the date of the enactment of this Act, sec-

1 tion 401 (c) of the Housing Act of 1950 is amended by
2 striking out "the higher of (1) $2\frac{3}{4}$ per centum per annum,
3 or" and inserting in lieu thereof "the lower of (1) 3 per
4 centum per annum, or".

5 (b) Effective with respect to notes or other obligations
6 financing loan contracts entered into after the date of the
7 enactment of this Act, section 401 (e) of such Act is amended
8 by striking out "the higher of (1) $2\frac{1}{2}$ per centum per annum,
9 or" and inserting in lieu thereof "the lower of (1) $2\frac{3}{4}$ per
10 centum per annum, or".

11 PARKING FACILITIES FOR COLLEGES AND UNIVERSITIES

12 SEC. 503. Section 404 (h) of the Housing Act of 1950
13 is amended by adding at the end thereof the following new
14 sentence: "In addition, such term includes parking facilities
15 primarily to serve the needs of students and faculty."

16 TITLE VI—COMMUNITY FACILITIES

17 PURPOSE

18 SEC. 601. The purpose of this title is to assist and en-
19 courage the communities of the Nation fully to meet the needs
20 of their citizens by making it possible, with Federal grant
21 assistance, for their governmental bodies (1) to construct
22 adequate basic water and sewer facilities needed to promote
23 the efficient and orderly growth and development of the com-
24 munities; and (2) to construct neighborhood facilities needed

1 to enable them to carry on programs of necessary social
2 services.

3 GRANTS FOR BASIC WATER AND SEWER FACILITIES

4 SEC. 602. (a) The Housing and Home Finance Ad-
5 ministrator (hereinafter in this title referred to as the "Ad-
6 ministrator") is authorized to make grants to local public
7 bodies and agencies to finance specific projects for basic pub-
8 lic water and sewer facilities (including works for the storage,
9 treatment, purification, and distribution of water) : *Provided*,
10 That no grant shall be made under this section for any sewer
11 facilities unless the Secretary of Health, Education, and
12 Welfare certifies to the Administrator that any waste ma-
13 terial carried by such facilities will be adequately treated
14 before it is discharged into any public waterway, so as to
15 meet applicable Federal, State, interstate, or local water
16 quality standards.

17 (b) The amount of any grant made under the authority
18 of this section shall not exceed 50 per centum of the develop-
19 ment cost of the project.

20 (c) No grant shall be made under this section in con-
21 nection with any project unless the Administrator deter-
22 mines that the project is necessary to provide adequate
23 water or sewer facilities for, and will contribute to the im-
24 provement of the health or living standards of, the people
25 in the community to be served, and that the project is (1)

1 designed so that an adequate capacity will be available to
2 serve the reasonably foreseeable growth needs of the area,
3 (2) consistent with a program meeting criteria, established
4 by the Administrator, for a unified or officially coordinated
5 areawide water or sewer facilities system as part of the
6 comprehensively planned development of the area, except
7 that prior to July 1, 1968, grants may, in the discretion of
8 the Administrator, be made under this section when such
9 a program for an areawide water and sewer facilities system
10 is under active preparation, although not yet completed, if
11 the facility or facilities for which assistance is sought can
12 reasonably be expected to be required as a part of such
13 program, and there is urgent need for the facility or facilities,
14 and (3) necessary to orderly community development.

15 GRANTS FOR NEIGHBORHOOD FACILITIES

16 SEC. 603. (a) The Administrator is authorized to make
17 grants, in accordance with the provisions of this section, to
18 local public bodies and agencies to finance specific projects
19 for neighborhood facilities.

20 (b) The amount of any grant made under the authority
21 of this section shall not exceed $66\frac{2}{3}$ per centum of the devel-
22 opment cost of the project for which the grant is made (or
23 75 per centum of such cost in the case of a project located
24 in an area which at the time the grant is made is designated
25 as a redevelopment area under section 5 of the Area Redevel-

1 opment Act or under any other legislation enacted after the
2 date of the enactment of this Act containing standards for
3 designation as a redevelopment area generally comparable
4 to those set forth in section 5 of the Area Redevelopment
5 Act).

6 (c) No grant shall be made under this section for any
7 project unless the Administrator determines that the project
8 will provide a neighborhood facility which is (1) necessary
9 for carrying out a program of health, recreational, social, or
10 similar community service (including a community action
11 program approved under title II of the Economic Oppor-
12 tunity Act of 1964) in the area, (2) consistent with compre-
13 hensive planning for the development of the community, and
14 (3) so located as to be available for use by a significant por-
15 tion (or number in the case of large urban places) of the
16 area's low- or moderate-income residents.

17 (d) For a period of twenty years after a grant has
18 been made under this section for a neighborhood facility,
19 such facility shall not, without the approval of the Adminis-
20 trator, be converted to uses other than those proposed by
21 the applicant in its application for the grant. The Adminis-
22 trator shall not approve any conversion in the use of such
23 a neighborhood facility during such twenty-year period un-
24 less he finds that such conversion is in accord with the then
25 applicable program of health, recreational, social, or similar

1 community services in the area and consistent with compre-
2 hensive planning for the development of the community in
3 which the facility is located. In approving any such con-
4 version, the Administrator may impose such additional con-
5 ditions and requirements as he deems necessary.

6 (e) The Administrator shall give priority to applica-
7 tions for projects designed primarily to benefit members of
8 low-income families or otherwise substantially further the
9 objectives of a community action program approved under
10 title II of the Economic Opportunity Act of 1964.

11 GENERAL PROVISIONS

12 SEC. 604. (a) In the performance of, and with respect
13 to, the functions, powers, and duties vested in him by this
14 title, the Administrator shall (in addition to any authority
15 otherwise vested in him) have the functions, powers, and
16 duties set forth in section 402, except subsections (a), (c)
17 (2), and (f) of the Housing Act of 1950.

18 (b) The Administrator is authorized, notwithstanding
19 the provisions of section 3648 of the Revised Statutes, to
20 make advance or progress payments on account of any
21 grant made pursuant to this title. No part of any grant
22 authorized to be made by the provisions of this title shall be
23 used for the payment of ordinary governmental operating
24 expenses.

DEFINITIONS

SEC. 605. As used in this title—

(a) The term “State” means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

(b) The term "local public bodies and agencies" includes public corporate bodies and political subdivisions; public agencies or instrumentalities of one or more States, municipalities, or political subdivisions of one or more States (including public agencies and instrumentalities of one or more municipalities or other political subdivisions of one or more States); Indian tribes; and boards or commissions established under the laws of any State to finance specific capital improvement projects.

(c) The term “development cost”, with respect to any facility, means costs of the construction of the facility and the land on which it is located, including necessary site improvements to permit its use as a site for the facility.

LABOR STANDARDS

20 SEC. 606. All laborers and mechanics employed by con-
21 tractors or subcontractors on projects assisted under sections
22 602 and 603 shall be paid wages at rates not less than those
23 prevailing on similar construction in the locality as deter-
24 mined by the Secretary of Labor in accordance with the
25 Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5).

1 No such project shall be approved without first obtaining
 2 adequate assurance that these labor standards will be main-
 3 tained upon the construction work. The Secretary of Labor
 4 shall have, with respect to the labor standards specified in
 5 this section, the authority and functions set forth in Re-
 6 organization Plan Numbered 14 of 1950 (15 F.R. 3176;
 7 64 Stat. 1267; 5 U.S.C. 133z-15), and section 2 of the
 8 Act of June 13, 1934, as amended (48 Stat. 948; 40
 9 U.S.C. 276c).

10 APPROPRIATIONS; TERMINATION OF PROGRAM

11 SEC. 607. (a) There are hereby authorized to be appro-
 12 priated such sums as may be necessary to carry out the
 13 provisions of this title. All funds so appropriated shall
 14 remain available until expended.

15 (b) No grant shall be made under this title after
 16 October 1, 1969, except pursuant to a contract or commit-
 17 ment entered into on or before such date.

18 TITLE VII—FEDERAL NATIONAL MORTGAGE

19 ASSOCIATION

20 INCREASE IN FNMA SPECIAL ASSISTANCE AUTHORITY

21 SEC. 701. (a) Section 305 (c) of the National Housing
 22 Act is amended by inserting before the period at the end
 23 thereof the following: “, which limit shall be increased by
 24 \$100,000,000 on the date of the enactment of the Housing
 25 and Urban Development Act of 1965, by \$450,000,000 on

1 July 1, 1966, by \$550,000,000 on July 1, 1967, and by
 2 \$525,000,000 on July 1, 1968”.

3 (b) Section 305 (f) of such Act is amended by inserting
 4 before the period at the end thereof the following: “: *Pro-*
 5 *vided further*, That any portion of the total amount of
 6 authority set forth in the first proviso of this subsection
 7 which, on the date of the enactment of the Housing and
 8 Urban Development Act of 1965 and on each July 1 there-
 9 after, would otherwise be available for making purchases and
 10 commitments pursuant to this subsection, shall be transferred
 11 to and merged with the authority granted by subsection (a)
 12 and added to the amount of such authority as set forth in sub-
 13 section (c) ; and the total amount of authority set forth in the
 14 first proviso of this subsection shall progressively be reduced
 15 by the amount of each such transfer”.

16 INCREASE IN LIMITATION ON MORTGAGES FOR DWELLING
 17 UNITS HAVING FOUR OR MORE BEDROOMS

18 SEC. 702. Section 302 (b) of the National Housing Act
 19 is amended by inserting before the period at the end of the
 20 first sentence the following: “(plus an additional \$2,500
 21 for each such family residence or dwelling unit which has
 22 four or more bedrooms)”.

1 TITLE VIII—OPEN-SPACE LAND AND URBAN
2 BEAUTIFICATION AND IMPROVEMENT

3 CHANGE IN NAME OF PROGRAM; FINDINGS AND PURPOSE

4 SEC. 801. (a) The heading of title VII of the Housing
5 Act of 1961 is amended to read as follows: "TITLE VII—
6 OPEN-SPACE LAND AND URBAN BEAUTIFICA-
7 TION AND IMPROVEMENT".

8 (b) Section 701 of such Act is amended by redesignig-
9 nating subsection (b) as subsection (c) and by inserting
10 after subsection (a) the following new subsection:

11 " (b) The Congress further finds that there is an urgent
12 need both for the additional provision of parks and other
13 open-space areas in the developed portions of the Nation's
14 urban areas and for greater and better coordinated local
15 efforts to beautify and improve open space and other public
16 land throughout urban areas, to facilitate their increased use
17 and enjoyment by the Nation's urban population."

18 (c) The subsection of section 701 of such Act redesignig-
19 nated as subsection (c) by subsection (b) of this section is
20 amended—

21 (1) by inserting "(1) provide and" before "pre-
22 serve open-space land", and

1 (2) by inserting before the period at the end
2 thereof the following: “, and (2) beautify and improve
3 open-space and other public urban land, in accordance
4 with programs to encourage and coordinate local public
5 and private efforts toward this end”.

6 INCREASED GRANT LEVEL FOR PRESERVATION OF OPEN-
7 SPACE LAND

8 SEC. 802. Section 702 (a) of the Housing Act of 1961
9 is amended by striking out "20 per centum" and "30 per
10 centum" and inserting in lieu thereof "30 per centum" and
11 "40 per centum", respectively.

12 SUBSTITUTION OF APPROPRIATION AUTHORITY FOR GRANT
13 CONTRACT AUTHORITY

14 SEC. 803. (a) Section 702 (a) of the Housing Act of
15 1961 is amended—

16 (1) by striking out “enter into contracts to” in the
17 first sentence, and

18 (2) by striking out all of the third sentence.

(b) Section 702 (b) of such Act is amended by striking out the first two sentences and inserting in lieu thereof the following: "There are hereby authorized to be appropriated such amounts as may be necessary to carry out the purposes of this title."

24 (c) Section 702 of such Act is further amended by

1 adding at the end thereof the following new subsection:

2 “(f) No grant shall be made under this title after
3 October 1, 1969, except pursuant to a contract or commit-
4 ment entered into on or before such date.”

5 (d) Section 703 (a) of such Act is amended by striking
6 out “enter into contracts to”.

7 GRANTS FOR PROVISION OF OPEN-SPACE LAND IN BUILT-UP
8 URBAN AREAS

9 SEC. 804. Title VII of the Housing Act of 1961 is
10 amended by redesignating sections 705 and 706 as sections
11 708 and 709, respectively, and by inserting after section
12 704 the following new section:

13 “GRANTS FOR PROVISION OF OPEN-SPACE LAND IN BUILT-
14 UP URBAN AREAS

15 “SEC. 705. (a) The Administrator is further author-
16 ized to make grants to States and local public bodies to help
17 finance the acquisition of title to, or other permanent in-
18 terests in, developed land in built-up portions of urban areas
19 to be cleared and used as permanent open-space land, as
20 defined herein. The Administrator shall make such grants
21 only where the local governing body determines that ade-
22 quate open-space land cannot effectively be provided through
23 the use of existing undeveloped or predominantly undevel-
24 oped land and the Administrator determines that the pro-

1 posed acquisition is important to the comprehensively
2 planned development of the locality. Grants under this
3 section shall not exceed the lesser of (1) \$500,000 or (2)
4 40 per centum of the cost of acquiring such title or other
5 interests and of necessary demolition and removal of im-
6 provements.

7 “(b) Financial assistance extended to any project under
8 this title may include grants for relocation payments, as
9 herein defined. Such grants may be in addition to other
10 financial assistance under this title, and no part of the
11 amount of such relocation payments shall be required to be
12 contributed as a local grant. The term ‘relocation payments’
13 means payments by the applicant which are (1) made to an
14 individual, family, business concern, or nonprofit organization
15 displaced, after March 4, 1965, by a project assisted under
16 this title, (2) not otherwise authorized under any Federal
17 law, and (3) made only on such terms and conditions and
18 subject to such limitations (to the extent applicable, but not
19 including the date of displacement) as are provided for relo-
20 cation payments, at the time such payments are approved, by
21 sections 114 (b), (c), and (d) of the Housing Act of 1949.
22 Relocation payments authorized by this subsection shall be
23 made subject to such rules and regulations as may be pre-
24 scribed by the Administrator.”

1 GRANTS FOR URBAN BEAUTIFICATION AND IMPROVEMENT

2 SEC. 805. (a) Title VII of the Housing Act of 1961
3 is further amended by inserting after section 705 (as added
4 by section 804 of this Act) the following new section:

5 "GRANTS FOR URBAN BEAUTIFICATION AND IMPROVEMENT

6 "SEC. 706. The Administrator is authorized to make
7 grants, as herein provided, to States and local public bodies
8 to assist in carrying out local programs for the greater use
9 and enjoyment of open-space and other public land in urban
10 areas. The Administrator shall establish criteria for such
11 programs to assure that each (1) represents significant and
12 effective efforts, involving all available public and private
13 resources, for the beautification of such land and its improve-
14 ment for open-space uses, and (2) is important to the com-
15 prehensively planned development of the locality. Grants
16 made under this section shall not exceed 40 per centum of
17 the amount by which the cost of the activities carried on by
18 an applicant during a fiscal year under an approved program
19 exceeds its usual expenditures for comparable activities:
20 *Provided, That,* notwithstanding any other provision of this
21 section, the Administrator may use not to exceed \$5,000,000
22 of the funds available for grants under this section to make
23 grants in amounts up to the full cost of activities which he

1 determines to have special value in developing and demon-
2 strating new and improved methods and materials for use in
3 carrying out the purposes of this section.”

4 (b) Section 702 (c) of such Act is amended by insert-
5 ing after “development costs” the following: “(except as
6 authorized under section 706) , or the additional price which
7 is attributable to improvements to be retained on open-space
8 land which are not incidental to the proposed open-space
9 uses,”.

10

LABOR STANDARDS

11 SEC. 806. Title VII of the Housing Act of 1961 is
12 further amended by inserting after section 706 (as added by
13 section 805 of this Act) the following new section:

14

“LABOR STANDARDS

15 “SEC. 707. (a) The Administrator shall take such ac-
16 tion as may be necessary to insure that all laborers and
17 mechanics employed by contractors or subcontractors in the
18 performance of construction work financed with the assist-
19 ance of grants under this title shall be paid wages at rates
20 not less than those prevailing on similar construction in the
21 locality as determined by the Secretary of Labor in accord-
22 ance with the Davis-Bacon Act, as amended. The Admin-
23 istrator shall not approve any such grant without first obtain-
24 ing adequate assurance that these labor standards will be
25 maintained upon the construction work.

1 “(b) The Secretary of Labor shall have, with respect to
 2 the labor standards specified in subsection (a), the authority
 3 and functions set forth in Reorganization Plan Numbered
 4 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 133z-
 5 15), and section 2 of the Act of June 13, 1934, as amended
 6 (48 Stat. 948; 40 U.S.C. 276c).”

7 USE OF FUNDS FOR STUDIES AND PUBLICATION

8 SEC. 807. The second sentence of the section of the
 9 Housing Act of 1961 redesignated as section 708 by section
 10 804 of this Act is amended to read as follows: “The Admin-
 11 istrator is authorized to use during any fiscal year not to
 12 exceed \$100,000 of the funds available for grants under
 13 this title to undertake such studies and publish such
 14 information.”

15 CONFORMING AMENDMENTS

16 SEC. 808. (a) The heading of section 702 of the Hous-
 17 ing Act of 1961 is amended to read as follows: “GRANTS
 18 FOR PRESERVATION OF OPEN-SPACE LAND”.

19 (b) Section 702 (a) of such Act is amended by striking
 20 out “provisions of this title” and “purposes of this title” and
 21 inserting in lieu thereof “provisions of this section” and
 22 “purposes of this section”, respectively.

23 (c) Section 702 (e) of such Act is amended by striking
 24 out “served by the open-space land acquired” in the second
 25 sentence and inserting in lieu thereof “assisted”.

1 (d) Section 703 (a) of such Act is amended by striking
2 out “this title” and inserting in lieu thereof “section 702 (a) ”.

3 (e) Section 704 of such Act is amended by striking
4 out “for which” in the first sentence and inserting in lieu
5 thereof “for the acquisition of which”.

6 TITLE IX—RURAL HOUSING

7 LOANS FOR PREVIOUSLY OCCUPIED BUILDINGS AND

8 MINIMUM SITE ACQUISITION

9 SEC. 901. (a) Section 501 (a) of the Housing Act of
10 1949 is amended—

11 (1) by inserting after “their farms,” in clause (1)
12 the following: “and to purchase previously occupied
13 buildings and land constituting a minimum adequate site,
14 in order”; and

15 (2) by inserting after “rural areas” in clause (2)
16 the following: “for the construction, improvement, al-
17 teration, or repair of dwellings, related facilities, and
18 farm buildings and to rural residents for such purposes
19 and for the purchase of previously occupied buildings and
20 the purchase of land constituting a minimum adequate
21 site, in order”.

22 (b) Section 501 (c) of such Act is amended by insert-
23 ing “or a rural resident” in clause (1) after “or that he is
24 the owner of other real estate in a rural area”.

1 INTEREST RATE ON DIRECT RURAL HOUSING LOANS

2 SEC. 902. Section 502 (a) of the Housing Act of 1949
3 is amended by striking out "with interest at a rate not to
4 exceed 4 per centum per annum on the unpaid balance of
5 principal." and inserting in lieu thereof the following: "with
6 interest in the case of loans under this section pursuant to
7 clauses (1) and (2) of section 501 (a) at a rate not to ex-
8 ceed 5 per centum per annum on the unpaid balance of prin-
9 cipal and in the case of loans under this section pursuant to
10 clause (3) of section 501 (a) and under sections 503 and
11 504 at a rate not to exceed 4 per centum per annum on such
12 unpaid balance. Borrowers with loans made or insured
13 under this title shall pay such fees and other charges as the
14 Secretary may require."

15 INSURED RURAL HOUSING LOANS

16 SEC. 903. (a) Title V of the Housing Act of 1949 is
17 amended by adding at the end thereof the following new
18 sections:

19 "INSURANCE OF LOANS

20 "SEC. 517. (a) The Secretary is authorized to insure
21 and to make loans to be sold and insured in accordance with
22 the provisions of sections 501, 502, 514, and 515, and this
23 section, other than the provisions of section 514 (a) (3)

1 and (5) and (b) and section 515 (a) and (b) (4), except
2 that such loans in accordance with sections 501 and 502—

3 “(1) to persons of low or moderate income as de-
4 fined by the Secretary shall not exceed amounts neces-
5 sary to provide adequate housing modest in size, design,
6 and cost, as determined by the Secretary, and shall bear
7 interest at a rate not to exceed 5 per centum per an-
8 num; and the aggregate of such loans made and insured
9 in any one fiscal year shall not exceed \$300,000,000;
10 and

11 “(2) to persons other than those of low or moderate
12 income shall bear interest and provide for insurance or
13 service charges (at rates determined by the Secretary)
14 comparable to the combined rate of interest and premium
15 charges then in effect under section 203 of the National
16 Housing Act.

17 “(b) The Secretary may use the Rural Housing Insur-
18 ance Fund created by this section for the purpose of making
19 loans to be sold and insured under this section, provided that
20 the aggregate of such loans made and not disposed of at any
21 one time shall not exceed \$100,000,000.

22 “(c) The Secretary may insure loans advanced by
23 lenders other than the United States, and may sell and insure
24 loans made from or held in the Rural Housing Insurance
25 Fund by the Secretary, for the payment of principal and

1 interest thereon as it becomes due. The Secretary is author-
2 ized to make agreements with respect to servicing loans
3 held by or insured by the Secretary under this section and
4 purchasing such insured loans on such terms and conditions
5 as he may prescribe: *Provided*, That no purchase agreement
6 shall obligate the Secretary to purchase such an insured loan
7 before the expiration of an initial period of five years from
8 the date of the note. Any contract of insurance executed
9 by the Secretary shall be an obligation supported by the full
10 faith and credit of the United States and incontestable except
11 for fraud or material misrepresentation of which the holder
12 has actual knowledge. In connection with loans insured
13 under this section the Secretary may take liens running to
14 the United States notwithstanding the fact that the notes evi-
15 dencing such loans may be held by lenders other than the
16 United States. Notes evidencing such loans shall be freely
17 assignable but the Secretary shall not be bound by any
18 assignment until notice thereof is given to and acknowledged
19 by the Secretary.

20 “(d) After ninety days after the original capitalization
21 of the Rural Housing Insurance Fund, no loans, other than
22 loans then held or insured by the Secretary pursuant to
23 section 514 or 515(b), shall be made or insured under
24 section 514 or 515(b) except in accordance with this section.

25 “(e) There is hereby created the Rural Housing In-

1 surance Fund (hereinafter in this section referred to as the
2 'Fund') which shall be used by the Secretary as a revolving
3 fund for carrying out the provisions of this section. There
4 are authorized to be appropriated to the Secretary such sums
5 as may be necessary for the purposes of the Fund.

6 “(f) Money in the Fund not needed for current opera-
7 tions shall be invested in direct obligations of the United
8 States or obligations guaranteed by the United States.

9 “(g) All funds, claims, notes, mortgages, contracts, and
10 property acquired by the Secretary under this section, and
11 all collections and proceeds therefrom, shall constitute assets
12 of the Fund; and all liabilities and obligations of such assets
13 shall be liabilities and obligations of the Fund. Loans may
14 be held in the Fund and collected in accordance with their
15 terms or may be sold by the Secretary with or without agree-
16 ments for insurance thereof. Loans may be sold by the
17 Secretary at prices within the range of market prices for the
18 particular class or classes of loans involved, as determined by
19 the Secretary from time to time. The aggregate of (1) any
20 amount by which the balance outstanding on loans at the
21 time of sale exceeds the price at which the loans are sold
22 and (2) the amount of any fees and charges paid in con-
23 nection with any sales of loans shall be reimbursed to the
24 Fund by annual appropriations.

25 “(h) The Secretary is authorized to issue notes to the

1 Secretary of the Treasury to obtain funds necessary for
2 discharging obligations under this section and for author-
3 ized expenditures out of the Fund, but, except as may be
4 authorized in appropriation Acts, not for the original capi-
5 tal or any additional capital of the Fund or to reimburse the
6 Fund for losses from any sales of loans at less than par
7 value. Such notes shall be in such form and denominations
8 and have such maturities and be subject to such terms and
9 conditions as may be prescribed by the Secretary with the
10 approval of the Secretary of the Treasury. Each note shall
11 bear interest at such rate as may be determined by the
12 Secretary of the Treasury, taking into consideration the
13 current average market yields on outstanding marketable
14 obligations of the United States with remaining periods to
15 maturity comparable to the average maturities of the loans
16 held by the Secretary in the Fund, adjusted to the nearest
17 one-eighth of 1 per centum, during the month of June
18 preceding the fiscal year in which the loans were made.
19 The Secretary of the Treasury is authorized and directed
20 to purchase any notes of the Secretary issued hereunder, and
21 for that purpose the Secretary of the Treasury is authorized
22 to use as a public debt transaction the proceeds from the
23 sale of any securities issued under the Second Liberty Bond
24 Act, and the purposes for which such securities may be is-
25 sued under such Act are extended to include purchases of

1 notes issued by the Secretary under this subsection. All re-
2 demptions, purchases, and sales by the Secretary of the
3 Treasury of such notes shall be treated as public debt trans-
4 actions of the United States. The notes issued by the Secre-
5 tary to the Secretary of the Treasury shall constitute obliga-
6 tions of the Fund.

7 “(i) The Secretary may retain out of interest payments
8 by the borrower an annual charge in an amount specified
9 in the insurance or sale agreement applicable to the loan.
10 Of the charges retained by the Secretary, if any, not to
11 exceed 1 per centum per annum of the unpaid balance of the
12 loan shall be deposited in the Fund. Any retained charges
13 not deposited in the Fund shall be available for administra-
14 tive expenses in carrying out the provisions of this title, to
15 be transferred annually and become merged with any appro-
16 priation for administrative expenses of the Farmers Home
17 Administration, when and in such amounts as may be author-
18 ized in appropriation Acts.

19 “(j) The Secretary may also utilize the Fund—

20 “(1) to pay amounts to which the holder of a
21 note is entitled in accordance with an insurance or sale
22 agreement under this section accruing between the date
23 of any prepayment by the borrower to the Secretary and
24 the date of transmittal of such prepayment to the
25 holder of the note; and, in the discretion of the Secre-

1 tary, prepayments other than final payments need not
2 be remitted to the holder until due;

3 “(2) to pay the holder of any note insured under
4 this section any defaulted installment or, upon assign-
5 ment of the note to the Secretary at the Secretary’s
6 request, the entire balance outstanding on the note;

7 “(3) to purchase notes in accordance with agree-
8 ments previously entered into;

9 “(4) to pay taxes, insurance, prior liens, expenses
10 necessary to make fiscal adjustments in connection with
11 the application and transmittal of collections, and other
12 expenses and advances to protect the security for loans
13 which are insured under this section or held in the Fund,
14 and to acquire such security at foreclosure sale or other-
15 wise; and

16 “(5) to pay fees and charges in connection with
17 sales by the Secretary of loans insured under this
18 section.

19 “RURAL HOUSING DIRECT LOAN ACCOUNT

20 “SEC. 518. (a) There is hereby created the Rural
21 Housing Direct Loan Account (hereinafter in this section
22 referred to as the ‘Account’) which shall be used by the Sec-
23 retary for carrying out the provisions of this section. There
24 are authorized to be appropriated to the Secretary such sums
25 as may be necessary for the purposes of the Account.

1 “(b) There are hereby transferred to the Account (1)
2 all funds, claims, notes, mortgages, contracts, and property,
3 and all collections and proceeds therefrom, held by the
4 Secretary under the direct loan provisions of this title, in-
5 cluding those securing notes issued by the Secretary to the
6 Secretary of the Treasury under section 511 and any un-
7 expended balance of amounts borrowed upon such notes,
8 and (2) all unexpended balances of appropriations for direct
9 loans under this title, including the fund authorized by sec-
10 tion 515 (a). All amounts hereafter borrowed by the
11 Secretary from the Secretary of the Treasury under section
12 511 shall be deposited in the Account. All collections and
13 proceeds from assets acquired by the Account shall be
14 deposited in the Account.

15 “(c) When and in such amounts as may be authorized
16 in appropriation Acts, the Secretary may issue notes to the
17 Secretary of the Treasury to obtain funds to be deposited in
18 the Account. The form, denominations, maturities, and other
19 terms and conditions of such notes shall be prescribed by
20 the Secretary with the approval of the Secretary of the
21 Treasury. Each note shall bear interest at such rate as may
22 be determined by the Secretary of the Treasury, taking into
23 consideration the current average market yields on outstand-
24 ing marketable obligations of the United States with remain-
25 ing periods to maturity comparable to the average maturi-

1 ties of the loans held by the Secretary in the Account, ad-
2 justed to the nearest one-eighth of 1 per centum, during the
3 month of June preceding the fiscal year in which the loans
4 were made. The Secretary of the Treasury is authorized and
5 directed to purchase any notes of the Secretary issued here-
6 under, and for that purpose the Secretary of the Treasury is
7 authorized to use as a public debt transaction the proceeds
8 from the sale of any securities issued under the Second
9 Liberty Bond Act, and the purposes for which such securities
10 may be issued under such Act are extended to include the
11 purchase of notes issued by the Secretary under this sub-
12 section. All redemptions, purchases, and sales by the Sec-
13 retary of the Treasury of such notes shall be treated as public
14 debt transactions of the United States.

15 “(d) The Account shall remain available to the Secre-
16 tary for the payment of interest and principal on notes issued
17 by the Secretary to the Secretary of the Treasury under sec-
18 tion 511 or this section, and for direct loans and related
19 advances under this title in such amounts as are now author-
20 ized by law and in such further amounts as shall be authorized
21 in appropriation Acts. Amounts so authorized for such loans
22 and advances shall remain available until expended.”

23 (b) Section 511 of such Act is amended—

24 (1) by inserting “direct” after “making”, and by

1 striking out “(other than loans under section 504 (b)
2 or 515 (a))”, in the first sentence;

3 (2) by striking out “, of which \$50,000,000 shall
4 be available exclusively for assistance to elderly persons
5 as provided in clause (3) of section 501 (a)”, and by
6 striking out “September 30, 1965” and inserting in
7 lieu thereof “October 1, 1969”, in the second sentence;
8 and

9 (3) by striking out “rate on outstanding marketable
10 obligations of the United States as of the last day of the
11 month preceding the issuance of the notes or obligations
12 by the Secretary” in the fifth sentence and inserting
13 in lieu thereof the following: “yields on outstanding
14 marketable obligations of the United States with remain-
15 ing periods to maturity comparable to the average ma-
16 turities of the loans held by the Secretary in the Rural
17 Housing Direct Loan Account, adjusted to the nearest
18 one-eighth of 1 per centum, during the month of June
19 preceding the fiscal year in which the loans were made”.

20 FEDERAL NATIONAL MORTGAGE ASSOCIATION SECONDARY
21 MARKET OPERATIONS FOR INSURED RURAL HOUSING
22 LOANS

23 SEC. 904. (a) Section 302 (b) of the National Housing
24 Act is amended—

(1) by inserting immediately after “which are insured under the National Housing Act” the following:

“or title V of the Housing Act of 1949”;

(2) by inserting after “any mortgage” in clause (2) of the proviso the following: “, except a mortgage insured under title V of the Housing Act of 1949,”; and

(3) by inserting before the period in the last sentence the following: “or title V of the Housing Act of 1949”.

(b) Section 303 (b) of such Act is amended by inserting “and other” after “private” in the first sentence.

EXTENSION OF RURAL HOUSING AUTHORIZATIONS

SEC. 905. (a) Section 512 of the Housing Act of 1949 is amended by striking out “September 30, 1965” and inserting in lieu thereof “October 1, 1969”.

(b) Section 513 of such Act is amended—

(1) by striking out “September 30, 1965” in clause

(b) and inserting in lieu thereof “October 1, 1969”;

(2) by striking out “\$10,000,000” in clause (c) and inserting in lieu thereof “\$50,000,000”, and by striking out “September 30, 1965” in the same clause and inserting in lieu thereof “October 1, 1969”; and

(3) by striking out “September 30, 1965” in clause

(d) and inserting in lieu thereof “October 1, 1969”.

1 (c) Section 515 (b) (5) of such Act is amended by
2 striking out "September 30, 1965" and inserting in lieu
3 thereof "October 1, 1969".

4 (d) Section 506 (a) of such Act is amended by strik-
5 ing out "sections 501 to 504, inclusive, and sections 514-
6 516", each place it occurs and inserting in lieu thereof "this
7 title".

8 PAYMENT OF INTEREST TO THE TREASURY ON

9 APPROPRIATIONS FOR RURAL HOUSING LOANS

10 SEC. 906. Title V of the Housing Act of 1949 is
11 amended by adding at the end thereof (after the new sec-
12 tions added by section 903 of this Act) the following new
13 section:

14 "INTEREST ON APPROPRIATIONS FOR RURAL HOUSING
15 LOANS

16 "SEC. 519. (a) The Secretary shall pay to the Secretary
17 of the Treasury interest at a rate determined under the
18 formula contained in section 517 (h) or 518 (c) (as may be
19 applicable) on any portion of any future appropriations
20 deposited in the Rural Housing Insurance Fund or the
21 Rural Housing Direct Loan Account for the purpose of mak-
22 ing loans (as distinguished from appropriations for the
23 purpose of restoring losses or expenditures from such Fund
24 or Account). Such interest shall be payable annually upon

1 any sum so deposited until an amount equal to such sum
 2 is paid from the Fund or Account to which it was deposited
 3 and returned to miscellaneous receipts of the Treasury.

4 “(b) Any sums in the Rural Housing Insurance Fund
 5 or the Rural Housing Direct Loan Account which the Sec-
 6 retary determines are in excess of amounts needed to meet
 7 the obligations and carry out the purposes of such Fund or
 8 Account shall be returned to miscellaneous receipts of the
 9 Treasury.”

10 DEFINITION OF A RURAL AREA

11 SEC. 907. Title V of the Housing Act of 1949 is
 12 amended by adding at the end thereof (after the new section
 13 added by section 906 of this Act) the following new section:

14 “SEC. 520. The terms ‘rural’ and ‘rural area’ as used
 15 in this title mean any area, open country, place, town, vil-
 16 lage, or city having a population of 5,500 inhabitants or less
 17 that is not part of or associated with an urban area.”

18 TITLE X—MISCELLANEOUS

19 AUTHORIZATION FOR URBAN PLANNING GRANTS

20 SEC. 1001. (a) Section 701 (b) of the Housing Act of
 21 1954 is amended by striking out “not exceeding \$105,000,-
 22 000” in the fifth sentence and inserting in lieu thereof “such
 23 amounts as may be necessary”.

1 (b) Section 701 of such Act is further amended by
2 adding at the end thereof the following new subsection:

3 “(g) No grant shall be made under this section after
4 October 1, 1969, except pursuant to a contract or commit-
5 ment entered into on or before such date.”

6 AUTHORIZATION FOR FEDERAL-STATE TRAINING PROGRAMS

7 SEC. 1002. (a) Section 802 (d) of the Housing Act of
8 1964 is amended (1) by striking out “for grants under this
9 part”, and (2) by striking out “not to exceed \$10,000,000”
10 and inserting in lieu thereof “such amounts as may be
11 necessary to carry out the purposes of this part”.

12 (b) Section 802 of such Act is further amended by
13 adding at the end thereof the following new subsection:

14 “(e) No grant shall be made under this part after
15 October 1, 1969, except pursuant to a contract or commit-
16 ment entered into on or before such date.”

17 (c) Section 803 of such Act is amended (1) by striking
18 out “authorized to be”, and (2) by striking out “by section
19 802 (d)” and inserting in lieu thereof “for the purposes of
20 this part”.

21 AUTHORIZATION FOR PUBLIC WORKS PLANNING ADVANCES

22 SEC. 1003. (a) The second sentence of section 702 (e)
23 of the Housing Act of 1954 is amended (1) by striking out
24 “Housing Act of 1964” and inserting in lieu thereof

1 “Housing and Urban Development Act of 1965”, and (2)
2 by striking out “, not to exceed \$20,000,000,”.

3 (b) Section 702 of such Act is further amended by
4 adding at the end thereof the following new subsection:

5 “(i) No advance shall be made under this section after
6 October 1, 1969, except pursuant to a contract or commit-
7 ment entered into on or before such date.”

8 ADVISORY COMMITTEES—TECHNICAL PROVISION

9 SEC. 1004. Section 601 of the Housing Act of 1949
10 is amended by striking out the second sentence.

11 PUBLIC FACILITY LOANS TO NONPROFIT CORPORATIONS

12 SEC. 1005. Section 202 (c) of the Housing Amend-
13 ments of 1955 is amended by adding at the end thereof
14 the following new sentence: “Notwithstanding any other
15 provision of this title, the Administrator may extend finan-
16 cial assistance, as otherwise authorized by clause (1) of
17 subsection (a) of this section, to private nonprofit corpora-
18 tions to finance the construction of works for the storage,
19 treatment, purification, or distribution of water or the con-
20 struction of sewage, sewage treatment, and sewer facilities,
21 if needed to serve such smaller municipalities, upon a deter-
22 mination that no existing public body is able to construct
23 and operate such facilities.”

FHA CONFORMING AMENDMENTS

SEC. 1006. (a) Section 2 (f) of the National Housing Act is amended by striking out all that follows the first sentence.

(b) Section 8 of such Act is amended—

(1) by striking out “Title I Housing Insurance Fund” in subsection (g) and inserting in lieu thereof “General Insurance Fund”; and

(2) by striking out subsections (h) and (i).

(c) Section 203 (k) of such Act is amended—

(1) by striking out “a separate section 203 Home Improvement Account to be maintained as hereinafter provided under the Mutual Mortgage Insurance Fund” in clause (3) of the first sentence and inserting in lieu thereof “the General Insurance Fund”;

(2) by striking out “the section 203 Home Improvement Account or in debentures executed in the name of such Account” in clause (4) of the first sentence and inserting in lieu thereof “the General Insurance Fund or in debentures executed in the name of such Fund”;

(3) by striking out all of the third sentence which follows “refer to this section 203 (k)” and inserting in lieu thereof a period; and

1 (4) by striking out the fourth, fifth, and sixth
2 sentences.

3 (d) Section 204 of such Act is amended—

4 (1) by striking out “or section 210” in the first
5 sentence of subsection (a) ;

6 (2) by striking out all of the second sentence of
7 subsection (c) after “the mortgagee” and inserting in
8 lieu thereof “from the Mutual Mortgage Insurance
9 Fund.”;

10 (3) by striking out all of the first sentence of sub-
11 section (d) after “shall be negotiable” the first place it
12 appears and inserting in lieu thereof a period;

13 (4) by striking out “the Fund” each place it ap-
14 pears in subsection (d) and inserting in lieu thereof
15 “the Mutual Mortgage Insurance Fund”;

16 (5) by striking out “or the Housing Fund, as the
17 case may be,” in the fifth sentence of subsection (d) ;

18 (6) by striking out “or the Housing Fund” in the
19 sixth sentence of subsection (d) ; and

20 (7) by striking out the matter in subsection (f) (1)
21 (i) which follows “section 203” and precedes the
22 colon.

23 (e) Section 207 of such Act is amended—

1 (1) by striking out “and section 210” in the first
2 sentence of subsection (d) ;

3 (2) by striking out “of the Housing Insurance
4 Fund issued by the Commissioner under this title” in
5 the first sentence of subsection (d) and inserting in lieu
6 thereof the following: “issued by the Commissioner
7 under any title and section of this Act, except debentures
8 of the Mutual Mortgage Insurance Fund”;

9 (3) by striking out subsections (f), (m), and (p) ;
10 and

11 (4) by striking out “the Housing Insurance Fund”
12 and “the Housing Fund” each place they appear in
13 subsections (b), (h), (i), (j), (k), and (l) and in-
14 serting in lieu thereof “the General Insurance Fund”.

15 (f) Section 209 of such Act is amended by striking out
16 “or account or accounts,” in the second sentence.

17 (g) Section 213 of such Act is amended—

18 (1) by striking out “the Housing Fund” in subsec-
19 tion (a) (3) and inserting in lieu thereof “the General
20 Insurance Fund”; and

21 (2) by striking out “(l), (m), (n), and (p)” in
22 subsection (e) and inserting in lieu thereof “(l), and
23 (n)”.

24 (h) Section 220 of such Act is amended—

25 (1) by striking out “the section 220 Housing

Insurance Fund" each place it appears in subsections (d) (2) and (f) and inserting in lieu thereof "the General Insurance Fund";

(2) by inserting "and" immediately before "(B)" in the second full sentence in subsection (f) (3), and by striking out ", and (C)" and all that follows in such sentence and inserting in lieu thereof a period;

(3) by striking out subsections (g) and (h) (4);

and

(4) by striking out "the section 220 Home Improvement Account" each place it appears in subsections (h) (5) and (h) (7) and inserting in lieu thereof "the General Insurance Fund".

(i) Section 221 of such Act is amended—

(1) by striking out "the section 221 Housing Insurance Fund" each place it appears in subsections (d) (4), (f), (g) (1), and (g) (3) and inserting in lieu thereof "the General Insurance Fund";

(2) by striking out all of subsection (g) (2) after "mortgages insured under this section" and inserting in lieu thereof "; or";

(3) by inserting "and" immediately before "(B)" in the first full sentence in subsection (g) (3), and by striking out ", and (C)" and all that follows in such sentence and inserting in lieu thereof a period; and

1 (4) by striking out subsection (h).

2 (j) Section 222 of such Act is amended—

3 (1) by striking out “Servicemen’s Mortgage In-
4 surance Fund” in subsection (e) and inserting in lieu
5 thereof “General Insurance Fund”; and

6 (2) by striking out subsection (f).

7 (k) Section 229 of such Act is amended by striking out
8 “and Accounts” in the first sentence.

9 (l) Section 231 of such Act is amended—

10 (1) by striking out “the section 207 Housing In-
11 surance Fund” in subsection (c) (4) and inserting in
12 lieu thereof “the General Insurance Fund”; and

13 (2) by striking out “(f), (g), (h), (i), (j), (k),
14 (l), (m), (n), and (p)” in subsection (e) and in-
15 serting in lieu thereof “(g), (h), (i), (j), (k), (l),
16 and (n)”.

17 (m) Section 232 of such Act is amended—

18 (1) by striking out “the section 207 Housing In-
19 surance Fund” in subsection (d) (1) and inserting in
20 lieu thereof “the General Insurance Fund”; and

21 (2) by striking out “(f), (g), (h), (i), (j), (k),
22 (l), (m), (n), and (p)” in subsection (f) and insert-
23 ing in lieu thereof “(g), (h), (i), (j), (k), (l),
24 and (n)”.

1 (n) Section 233 of such Act is amended—

2 (1) by striking out “the Experimental Housing
3 Insurance Fund” in clause (1) of the third sentence
4 of subsection (f) and inserting in lieu thereof “the
5 General Insurance Fund”;

6 (2) by inserting “and” immediately before “(2)”
7 in the third sentence of subsection (f), and by striking
8 out “, and (3)” and all that follows and inserting in
9 lieu thereof a period; and

10 (3) by striking out subsection (g).

11 (o) Section 234 of such Act is amended—

12 (1) by striking out “the Apartment Unit Insurance
13 Fund” in subsections (d) (2) and (g) and inserting
14 in lieu thereof “the General Insurance Fund”;

15 (2) by striking out subsection (h) and inserting
16 in lieu thereof the following:

17 “(h) The provisions of subsections (d), (e), (g),
18 (h), (i), (j), (k), (l), and (n) of section 207 shall be
19 applicable to mortgages insured under subsection (d) of this
20 section.”; and

21 (3) by striking out subsection (i) and redesignat-
22 ing subsection (j) as subsection (i).

23 (p) Section 604 of such Act is amended by striking out

1 “the War Housing Insurance Fund” each place it appears in
2 subsections (c), (d), and (f) (1) (i) and inserting in lieu
3 thereof “the General Insurance Fund”.

4 (q) Section 608 of such Act is amended—

5 (1) by striking out “the War Housing Insurance
6 Fund” each place it appears in subsections (b) (1) and
7 (d) and inserting in lieu thereof “the General Insur-
8 ance Fund”; and

9 (2) by striking out subsection (f) and inserting
10 in lieu thereof the following:

11 “(f) The provisions of section 207 (k) of this Act shall
12 be applicable to mortgages insured under this section, except
13 that, as applied to such mortgages, the reference therein to
14 subsection (g) shall be construed to refer to subsection (c)
15 of this section.”

16 (r) The first sentence of section 609 (f) of such Act is
17 amended by striking out clause (1) and redesignating clauses
18 (2), (3), and (4) as clauses (1), (2), and (3),
19 respectively.

20 (s) Section 707 of such Act is amended by striking
21 out “the Housing Investment Insurance Fund” and insert-
22 ing in lieu thereof “the General Insurance Fund”.

23 (t) Section 708 of such Act is amended by striking out
24 “the Housing Investment Insurance Fund” each place it

1 appears in subsections (c), (e), (g), and (h) and inserting
2 in lieu thereof "the General Insurance Fund".

3 (u) Section 803 of such Act is amended—

4 (1) by striking out "the Armed Services Housing
5 Mortgage Insurance Fund" each place it appears in
6 subsections (b) (1), (b) (2), (e), (f), and (g) and
7 inserting in lieu thereof "the General Insurance Fund";
8 and

9 (2) by striking out subsection (h) and inserting in
10 lieu thereof the following:

11 "(h) The provisions of section 207 (k) and section 207
12 (l) of this Act shall be applicable to mortgages insured un-
13 der this title and to property acquired by the Commissioner
14 hereunder, except that, as applied to such mortgages and
15 property, the reference in section 207 (k) to subsection (g)
16 shall be construed to refer to subsection (d) of this section."

17 (v) Section 809 of such Act is amended by striking out
18 "the Armed Services Housing Mortgage Insurance Fund"
19 each place it appears in subsections (b), (e), and (g)
20 and inserting in lieu thereof "the General Insurance Fund".

21 (w) Section 810 of such Act is amended—

22 (1) by striking out "the Armed Services Housing
23 Mortgage Insurance Fund" in subsection (e) and in-
24 serting in lieu thereof "the General Insurance Fund";

1 (2) by striking out “(l), (m), (n), and (p)” in
2 subsection (j) and inserting in lieu thereof “(l), and
3 (n)” ; and

4 (3) by striking out the proviso in subsection (j)
5 and inserting in lieu thereof the following: “: *Provided*,
6 That wherever the words ‘Fund’ or ‘Mutual Mortgage
7 Insurance Fund’ appear in section 204, such reference
8 shall refer to the General Insurance Fund with respect
9 to mortgages insured under this section”.

10 (x) Section 903 of such Act is amended by striking
11 out “the National Defense Housing Insurance Fund” each
12 place it appears in subsection (a) and inserting in lieu
13 thereof “the General Insurance Fund”.

14 (y) Section 904 of such Act is amended—

15 (1) by striking out “the National Defense Housing
16 Insurance Fund” each place it appears in subsections
17 (c) and (d) and inserting in lieu thereof “the General
18 Insurance Fund”; and

19 (2) by striking out all of subsection (e) which
20 follows “of this Act” and inserting in lieu thereof a
21 period.

22 (z) Section 908 of such Act is amended—

23 (1) by striking out “the National Defense Housing
24 Insurance Fund” in subsection (b) (1) and inserting in
25 lieu thereof “the General Insurance Fund”;

1 (2) by striking out all of subsection (d) which
2 follows "of this Act" and inserting in lieu thereof a
3 period; and

4 (3) by striking out subsection (f) and inserting in
5 lieu thereof the following:

6 “(f) The provisions of section 207(k) and section
7 207(1) of this Act shall be applicable to mortgages insured
8 under this section and to property acquired by the Com-
9 missioner hereunder, except that, as applied to such mort-
10 gages and property, the reference therein to subsection (g)
11 shall be construed to refer to subsection (c) of this section.”

12 (aa) Sections 219, 602, 605, 710, 802, 804, 902, and
13 905 of such Act are repealed.

14 SAVINGS AND LOAN ASSOCIATIONS

15 SEC. 1007. Section 5(c) of the Home Owners' Loan
16 Act of 1933 is amended—

17 (1) by adding at the end of the first paragraph
18 the following new sentence: “Loans on the security of
19 buildings substantially all of which are used or are to be
20 used after completion for college dormitories, fraternity
21 houses, or sorority houses, or for residential purposes by
22 the staffs of community hospitals, shall be considered as
23 loans on ‘other dwelling units’ for the purposes of this
24 subsection.”;

1 (2) by inserting before the period at the end of
2 the next to last paragraph (as determined without re-
3 gard to the new paragraphs added by this Act) the
4 following: “: *Provided*, That in any State or area within
5 a State where the Board shall find that a substantial part
6 of the land occupied by or suitable for residential struc-
7 tures is available for purchase only on a leasehold basis,
8 any such association may make a loan on the security of
9 a first lien on the remainder of the term of any such
10 leasehold which extends or is renewable for at least ten
11 years beyond the maturity of such loan”;

12 (3) by adding at the end thereof (after the new
13 paragraph added by section 201 (b) (3) of this Act)
14 the following new paragraph:

15 “Any building association, building and loan association,
16 or savings and loan association organized and operating
17 under the laws of the District of Columbia shall have the
18 same powers with respect to the investment of its assets
19 as are authorized for Federal savings and loan associations
20 under this subsection, and shall be governed by such regula-
21 tions as the Board may prescribe in relation to the exercise
22 of such powers by Federal savings and loan associations; and

23 (4) by adding at the end thereof (after all other ad-
24 ditions made by this Act) the following new paragraph:
25 “No building and loan association incorporated under

1 the laws of the District of Columbia or organized in said Dis-
2 trict or doing business in said District shall establish any
3 branch or move its principal office or any branch without the
4 prior written approval of the Federal Home Loan Bank
5 Board, and no other building and loan association shall estab-
6 lish any branch in said District or move its principal office or
7 any branch in said District without such approval. As used
8 in the sentence next preceding, 'branch' means any office,
9 place of business, or facility, other than the principal office
10 as defined by said Board, of a building and loan association
11 at which accounts are opened or payments thereon are re-
12 ceived or withdrawals therefrom are paid, or any other office,
13 place of business, or facility of a building and loan association
14 defined by said Board as a branch within the meaning of
15 said sentence, and as used in said sentence and in this sen-
16 tence 'building and loan association' means any incorporated
17 or unincorporated building, building or loan, building and
18 loan, savings and loan, or homestead association or coopera-
19 tive bank."

20 URBAN RENEWAL PROJECT IN JOHNSON CITY, TENNESSEE

21 SEC. 1008. Notwithstanding the date of commencement
22 of the installation of certain underground electrical wiring in
23 Johnson City, Tennessee, expenditures made in connection
24 with such installation shall, to the extent otherwise eligible,
25 be counted as a local grant-in-aid to Johnson City's proposed

1 downtown urban renewal project (Tennessee R-80) in ac-
2 cordance with the provisions of title I of the Housing Act of
3 1949.

4 ACQUISITION OF CERTAIN PROPERTIES SITUATED AT OR
5 NEAR MILITARY BASES WHICH HAVE BEEN ORDERED TO
6 BE CLOSED

7 SEC. 1009. (a) The Secretary of Defense is authorized
8 to acquire title to any property, improved with a one- or
9 two-family dwelling, which is situated at or near a military
10 base or installation which the Department of Defense has,
11 subsequent to November 1, 1964, ordered to be closed in
12 whole or in part, if he determines—

13 (1) that the owner of such property is, or has been,
14 employed or performing military service at such base
15 or installation;

16 (2) that the closing of such base or installation, in
17 whole or in part, has required or will require the ter-
18 mination of such owner's employment or service at
19 such base or installation; and

20 (3) that as the result of the actual or pending
21 closing of such base or installation there is no present
22 market for the sale of such property upon reasonable
23 terms and conditions.

24 (b) The purchase price of any property which is situ-
25 ated at or near a military base or installation and is acquired

1 under this section shall be equal to an amount determined by
2 the Secretary of Defense to be the average price at which
3 properties, similar in size, construction, condition, and loca-
4 tion to that of the property to be acquired, were sold during
5 a representative period, as determined by the Secretary,
6 prior to the announcement of the intention of the Depart-
7 ment of Defense to close all or part of such base or
8 installation.

9 (c) The title to any property acquired under this sec-
10 tion shall be free and clear of any outstanding liens or encum-
11 brances and shall conform to such requirements as the
12 Secretary of Defense shall by regulation require. Such reg-
13 ulations shall also prescribe the terms and conditions under
14 which payments may be made under this section, and deci-
15 sions by the Secretary regarding such payments, and the
16 terms and conditions under which the same are approved or
17 disapproved, shall be final and conclusive and shall not be
18 subject to judicial review.

19 (d) Properties acquired under this section shall be
20 transferred to the Federal Housing Commissioner, and the
21 Federal Housing Commissioner shall have power to deal
22 with, rent, renovate, or sell for cash or credit any properties
23 so transferred. Receipts from the management or sale of
24 any such properties may be utilized by the Commissioner
25 to defray expenses arising in connection with the manage-

1 ment of such properties, and any part of such receipts not
 2 required for such expenses shall be covered into the Treas-
 3 ury as miscellaneous receipts.

4 (e) Section 223 (a) of the National Housing Act is
 5 amended—

6 (1) by striking out the period at the end of para-
 7 graph (7) and inserting in lieu thereof “; or”; and

8 (2) by inserting after paragraph (7) a new para-
 9 graph as follows:

10 “(8) executed in connection with the sale by the
 11 Commissioner of any housing acquired pursuant to sec-
 12 tion 108 of the Housing and Urban Development Act
 13 of 1965.”

14 (f) Such sums as may be necessary to carry out the
 15 provisions of this section are hereby authorized to be appro-
 16 priated, and any sums so appropriated shall remain available
 17 until expended.

18 MORTGAGE RELIEF FOR HOMEOWNERS WHO ARE UNEM-
 19 PLOYED AS THE RESULT OF THE CLOSING OF A FED-
 20 ERAL INSTALLATION

21 SEC. 1010. (a) For the purposes of this section—

22 (1) The term “mortgage” means a mortgage which

23 (A) is insured under the National Housing Act, or (B)

24 secures a home loan guaranteed or insured under the Service-

1 men's Readjusment Act of 1944 or chapter 37 of title 38,
2 United States Code.

3 (2) The term "Federal mortgage agency" means—

4 (A) the Federal Housing Commissioner when used
5 in connection with mortgages insured under the National
6 Housing Act, and

7 (B) the Administrator of Veterans' Affairs when
8 used in connection with mortgages securing home loans
9 guaranteed or insured under the Servicemen's Readjust-
10 ment Act of 1944 or chapter 37 of title 38, United
11 States Code.

12 (3) The term "distressed mortgagor" means an indi-
13 vidual who—

14 (A) is unemployed, although willing to work, as
15 the result of the closing (in whole or in part) of a
16 Federal installation, and

17 (B) is the owner-occupant of a dwelling upon
18 which there is a mortgage securing a loan which is in
19 default because of the inability of such individual to
20 make payments of principal and/or interest under such
21 mortgage.

22 (b) (1) Any distressed mortgagor, for the purpose
23 of avoiding foreclosure of his mortgage, may apply to the
24 appropriate Federal mortgage agency for a determination

1 that suspension of his obligation to make payments of prin-
2 cipal and/or interest under such mortgage during a tem-
3 porary period is necessary in order to avoid such foreclosure.

4 (2) Upon receipt of an application made under this sub-
5 section by a distressed mortgagor, the Federal mortgage
6 agency shall issue to such mortgagor a certificate of mora-
7 torium if it determines, after consultation with the interested
8 mortgagee, that—

9 (A) the mortgagor is not in default with respect to
10 any condition or covenant of the mortgage other than
11 that requiring the payment of installments of principal
12 and/or interest under the mortgage, and

13 (B) such action is the only available means where-
14 by a foreclosure of such mortgage can be avoided.

15 (3) Prior to the issuance to any distressed mortgagor of
16 a certificate of moratorium under paragraph (2), the Fed-
17 eral mortgage agency shall require such mortgagor to enter
18 into a binding agreement under which he will be required to
19 make payments to such agency, after the expiration of such
20 certificate, in an aggregate amount equal to the amount paid
21 by such agency in behalf of such mortgagor as provided in
22 subsection (c). The manner and time in which such pay-
23 ments shall be made shall be determined by the Federal
24 mortgage agency having due regard to the purposes sought
25 to be achieved by this section.

1 (4) Any certificate of moratorium issued under this
2 subsection shall expire on whichever of the following dates
3 is the earliest—

4 (A) three years from the date on which such
5 certificate is issued;

6 (B) thirty days after the date on which the mort-
7 gator to whom such certificate is issued ceases to be a
8 distressed mortgagor as defined in subsection (a); or

9 (C) the date on which such mortgagor becomes in
10 default with respect to any condition or covenant in his
11 mortgage other than that requiring the payment by him
12 of installments of principal and/or interest under the
13 mortgage.

14 (c) (1) Whenever a Federal mortgage agency issues
15 a certificate of moratorium to any distressed mortgagor
16 with respect to any mortgage, it shall transmit to the mort-
17 gagee a copy of such certificate, together with a notice stat-
18 ing that, while such certificate is in effect, such agency will
19 assume the obligation of such mortgagor to make payments
20 of principal, and if so specified in the certificate, of interest,
21 under the mortgage.

22 (2) Payments made by any Federal mortgage agency
23 pursuant to a certificate of moratorium issued under this
24 section with respect to the mortgage of any distressed mort-

1 gagor shall include, in addition to the payments referred to
2 in paragraph (1), an amount equal to the unpaid principal
3 and interest charges which had accrued under such mort-
4 gage prior to the issuance of such certificate and subsequent
5 to the date on which such mortgagor became a distressed
6 mortgagor as defined in subsection (a).

7 (3) While any certificate of moratorium issued under
8 this section is in effect with respect to the mortgage of any
9 distressed mortgagor, no further payments of principal, and
10 if so specified in the certificate, of interest, under the mort-
11 gage shall be required of such mortgagor, and no action
12 (legal or otherwise) shall be taken or maintained by the
13 mortgagee to enforce or collect such payments. Upon the
14 expiration of such certificate, the mortgagor shall again be
15 liable for the payment of all amounts due under the mort-
16 gage in accordance with its terms.

17 (4) Each Federal mortgage agency shall give prompt
18 notice in writing to the interested mortgagor and mortgagee
19 of the expiration of any certificate of moratorium issued by
20 it under this section.

21 (d) The Federal mortgage agencies are authorized to
22 issue such individual and joint regulations as may be neces-
23 sary to carry out this section and to insure the uniform
24 administration thereof.

25 (e) There shall be in the Treasury (1) a fund which

1 shall be available to the Federal Housing Commissioner for
2 the purpose of extending financial assistance in behalf of
3 distressed mortgagors as provided in subsection (c), and (2)
4 a fund which shall be available to the Administrator of Vet-
5 erans' Affairs for the same purpose. The capital of each
6 such fund shall consist of such sums as may, from time to
7 time, be appropriated thereto, and any sums so appropriated
8 shall remain available until expended. Receipts arising from
9 the programs of assistance under subsection (c) shall be
10 credited to the fund from which such assistance was ex-
11 tended. Moneys in either of such funds not needed for cur-
12 rent operations, as determined by the Federal Housing
13 Commissioner, or the Administrator of Veterans' Affairs,
14 as the case may be, shall be invested in bonds or other
15 obligations of the United States, or paid into the Treasury
16 as miscellaneous receipts.

17 (f) Section 1816 of title 38, United States Code, is
18 amended by inserting "(a)" before the text of such section,
19 and by adding at the end thereof a new subsection as
20 follows:

21 "(b) With respect to any loan made under section
22 1811 which has not been sold as provided in subsection
23 (g) of such section, if the Administrator finds after there
24 has been a default in the payment of any installment of

1 principal or interest owing on such loan, that the default
2 was due to the fact that the veteran who is obligated under
3 the loan has become unemployed as the result of the closing
4 (in whole or in part) of a Federal installation, he shall
5 (1) extend the time for curing the default to such time
6 as he determines is necessary and desirable to enable such
7 veteran to complete payments on such loan, including an
8 extension of time beyond the stated maturity thereof, or
9 (2) modify the terms of such loan for the purpose of chang-
10 ing the amortization provisions thereof by recasting, over
11 the remaining term of the loan, or over such longer period
12 as he may determine, the total unpaid amount then due
13 with the modification to become effective currently or upon
14 the termination of an agreed-upon extension of the period
15 for curing the default.”

16 REPAYMENT OF CERTAIN PLANNING GRANTS

17 SEC. 1011. Notwithstanding any other provision of law,
18 no advance made under section 501 of Public Law 458,
19 Seventy-eighth Congress; Public Law 352, Eighty-first Con-
20 gress; or section 702, Housing Act of 1954, Public Law 560,
21 Eighty-third Congress, for the planning of any public works
22 project shall be required to be repaid if construction of such
23 project has been heretofore or is hereafter initiated as a result
24 of a grant-in-aid made from an allocation made by the Presi-
25 dent under the Public Works Acceleration Act.

1 TRANSFER OF LAND FOR URBAN RENEWAL PURPOSES BY
2 HOUSING AUTHORITY OF THE CITY OF MACON, GEORGIA

3 SEC. 1012. (a) Notwithstanding the provisions of title
4 I of the Housing Act of 1949 and the United States Housing
5 Act of 1937, the Housing and Home Finance Administrator
6 and the Public Housing Commissioner are authorized and
7 directed to consent to the transfer by the Housing Authority
8 of the City of Macon, Georgia, to the Urban Renewal De-
9 partment of the City of Macon, Georgia, of all property ac-
10 quired by the Housing Authority for low-rent housing project
11 numbered Georgia 7-8, on condition that (1) an amount
12 which, together with any funds of the Housing Authority
13 available for the purpose, is sufficient to pay and discharge all
14 obligations incurred by the Housing Authority in connec-
15 tion with such low-rent housing project and owing at the time
16 of transfer, will be paid by the Urban Renewal Department
17 of the City of Macon to the Public Housing Administration
18 to be applied in satisfaction of the Housing Authority's obli-
19 gations which it cannot meet with its own funds available for
20 the purpose, and (2) the total amount so paid by the Urban
21 Renewal Department of the City of Macon will be included
22 in the gross project cost of its Coliseum Urban Renewal
23 Project, Georgia R-95.

24 (b) The Housing and Home Finance Administrator and

1 the Public Housing Commissioner are authorized to modify
2 any contracts heretofore entered into and to take any other
3 appropriate action necessary to carry out the provisions of
4 subsection (a).

5 URBAN RENEWAL PROJECT IN SAVANNAH, GEORGIA

6 SEC. 1013. (a) Notwithstanding any provision of the
7 Housing Act of 1949 or any other provision of law, the
8 urban renewal project in Savannah, Georgia, known as
9 Project "J" in the General Neighborhood Renewal Plan for
10 the Broad Street-Canal Urban Renewal Area adopted by
11 resolution of the Mayor and Aldermen of the City of
12 Savannah on November 18, 1958, may include the donation
13 by Housing Authority of Savannah, by a suitable instrument
14 of conveyance, of the right, title, and interest of the Author-
15 ity in and to all or any portion of the land included within
16 the boundaries of such Project "J" in the City of Savannah,
17 Chatham County, Georgia, the area of such Project "J"
18 being generally bounded on the North by properties of the
19 Central of Georgia Railway Company, on the East by West
20 Broad Street, on the South by the right-of-way for Interstate
21 Highway No. I-16, and on the West by the Savannah and
22 Ogeechee Canal and West Boundary Street.

23 (b) The conveyance authorized to be included in the
24 urban renewal project under subsection (a) of this section
25 shall be made only if the donee represents, and furnishes such

1 assurances as may be required by Housing Authority of
2 Savannah, that such donee will develop, preserve, and
3 operate such property on a non-profit basis as a historical
4 site or monument.

5 URBAN RENEWAL PROJECT IN OTTUMWA, IOWA

6 SEC. 1014. Notwithstanding the June, 1956 commence-
7 ment of certain flood control work in Ottumwa, Iowa, local
8 expenditures in connection with such flood control work
9 shall, to the extent otherwise eligible, be counted as a local
10 grant-in-aid to the Marina Gateway urban renewal project
11 (Iowa R-12) in accordance with the provisions of Title I
12 of the Housing Act of 1949.

Passed the House of Representatives June 30, 1965.

Attest:

RALPH R. ROBERTS,

Clerk.

89TH CONGRESS
1ST SESSION

H. R. 7984

AN ACT

To assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities.

JULY 6, 1965

Read twice and ordered to be placed on the calendar

United States

Congressional Record

PROCEEDINGS AND DEBATES OF THE 89th CONGRESS, FIRST SESSION

Vol. 111

WASHINGTON, TUESDAY, JULY 6, 1965

No. 121

Senate

The Senate met at 12 o'clock meridian, and was called to order by the President pro tempore.

Rev. Clair M. Cook, Th. D., Methodist clergyman, and legislative assistant to Senator VANCE HARTKE, offered the following prayer:

O Thou God of our fathers, we recall today the mercy and the bounty Thou hast shown this fair land in the 189 years of our Nation's independence.

O Thou God of our children, we look to the future years far beyond our own lifespan, in the confidence that Thou wilt continue to raise up wise and righteous leaders.

O Thou God of our own confession, as we resume our labors once more this day, let our vision range from the far past to the unseen future, with imaginative dedication to the needs of our people.

To these representatives of the old, the young, and of all citizens of all kinds and conditions, Thou, as well as they, hast entrusted a heavy responsibility, for this is a nation of laws whose basic concepts of right and wrong derive from Thine own laws of truth and righteousness.

Before us are great issues whose decisions will alter the lives of millions in the years to come. Give guidance as those decisions are debated and determined in the free processes of free government. As the sweep of history moves forward in time, let us be aware that we are a part of Thy will for the destinies of men upon the earth.

Lift up our spirits, and inspire our vision. Let us see beyond the narrow range of political issues to the deepest meaning of the consequence of decision. Infuse us with strong desire for the greatest good, that we may be in harmony with Thine own desires. Thus may we this day be lifted above the petty to the greatness that is our national heritage, and to the expanding of life's good for all, in compassion, in wisdom, and in truth. Amen.

THE JOURNAL

On request by Mr. LONG of Louisiana, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, July 1, and Friday, July 2, 1965, was dispensed with.

REPORTS OF A COMMITTEE SUBMITTED DURING ADJOURNMENT

Under authority of the order of the Senate of July 1, 1965, the following reports of a committee were submitted on July 1, 1965:

By Mr. MAGNUSON, from the Committee on Commerce, with amendments:

S. 949. A bill to promote economic growth by supporting State and regional centers to place the findings of science usefully in the hands of American enterprise (Rept. No. 421); and

S. 1459. A bill to amend the Federal Power Act, as amended, in respect of the jurisdiction of the Federal Power Commission over nonprofit cooperatives (Rept. No. 420).

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States, transmitting nominations, was communicated to the Senate by Mr. Geisler, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States submitting sundry nominations, which was referred to the Committee on Post Office and Civil Service.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to each of the following bills of the House:

H.R. 3708. An act to provide assistance in the development of new or improved programs to help older persons through grants to the States for community planning and services and for training, through research, development, or training project grants, and to establish within the Department of Health, Education, and Welfare an operating agency to be designated as the "Administration on Aging"; and

H.R. 5874. An act to amend Public Law 815, 81st Congress, with respect to the con-

struction of school facilities for children in Puerto Rico, Wake Island, Guam, or the Virgin Islands for whom local educational agencies are unable to provide education.

The message also announced that the House had passed a bill (H.R. 7984) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities, in which it requested the concurrence of the Senate.

The message communicated to the Senate the intelligence of the death of Hon. T. Ashton Thompson, late a Representative from the State of Louisiana, and transmitted the resolutions of the House thereon.

HOUSE BILL PLACED ON CALENDAR

The bill (H.R. 7984) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, and community facilities was read twice by its title and ordered to be placed on the calendar.

LIMITATION ON STATEMENTS DURING TRANSACTION OF ROUTINE MORNING BUSINESS

On request by Mr. LONG of Louisiana, and by unanimous consent, statements during the transaction of routine morning business were ordered limited to 3 minutes.

COMMITTEE MEETINGS DURING SENATE SESSION

On request by Mr. LONG of Louisiana, and by unanimous consent, the Committee on Foreign Relations and the Subcommittee on Trade Marks, Patents, and Copyrights of the Committee on the Judiciary were authorized to meet during the session of the Senate today.

EXECUTIVE COMMUNICATIONS,
ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

CASH EQUALIZATION OF EXCHANGES FOR
CERTAIN LANDS

A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to authorize the Secretary of Agriculture to accept a cash equalization of exchanges for lands under his jurisdiction, and for other purposes (with an accompanying paper); to the Committee on Agriculture and Forestry.

APPROVAL OF CERTAIN LOANS BY RURAL
ELECTRIFICATION ADMINISTRATION

A letter from the Administrator, Rural Electrification Administration, Department of Agriculture, Washington, D.C., reporting, pursuant to law, the approval of a loan by that Administration to the Northern Michigan Electric Cooperative, Inc., of Boyne City, Mich. (with an accompanying paper); to the Committee on Appropriations.

A letter from the Administrator, Rural Electrification Administration, Department of Agriculture, Washington, D.C., reporting, pursuant to law, the approval of that Administration of a loan to the Wolverine Electric Cooperative, Inc., of Big Rapids, Mich. (with an accompanying paper); to the Committee on Appropriations.

REPORT ON ENTITLEMENTS FOR FEDERALLY
AFFECTED SCHOOL DISTRICTS UNDER PUBLIC
LAWS 874 AND 815

A letter from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, a report of the Commissioner of Education on Public Laws 815 and 874 (with accompanying papers); to the Committee on Labor and Public Welfare.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BARTLETT, from the Committee on Commerce, without amendment:

H.R. 4526. An act to extend the provisions of title XII of the Merchant Marine Act, 1936, relating to war risk insurance, for an additional 5 years, ending September 7, 1970 (Rept. No. 422).

By Mr. HOLLAND, from the Committee on Appropriations, with amendments:

H.R. 8370. An act making appropriations for the Department of Agriculture and related agencies for the fiscal year ending June 30, 1966, and for other purposes (Rept. No. 423).

By Mr. MONRONEY, from the Committee on Appropriations, with amendments:

H.R. 8775. A bill making appropriations for the legislative branch for the fiscal year ending June 30, 1966, and for other purposes (Rept. No. 424).

REPORT ON DISPOSITION OF
EXECUTIVE PAPERS

Mr. MONRONEY, from the Joint Select Committee on the Disposition of Executive Papers, to which was referred for examination and recommendation a list of records transmitted to the Senate by the Archivist of the United States that appear to have no permanent value or historical interest, submitted a report thereon, pursuant to law.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. DIRKSEN (by request):
S. 2243. A bill for the relief of Walter Jacobsen; to the Committee on the Judiciary.

By Mr. BREWSTER (for himself and Mr. TYDINGS):

S. 2244. A bill to authorize the Secretary of the Army to conduct a complete investigation and study of water utilization and control of the Chesapeake Bay Basin; to the Committee on Public Works.

(See the remarks of Mr. BREWSTER when he introduced the above bill, which appear under a separate heading.)

By Mr. HART:
S. 2245. A bill for the relief of Margaret Yueh Chiaio; to the Committee on the Judiciary.

RESOLUTIONS

AMENDMENTS OF STANDING RULES
OF THE SENATE

Mr. COOPER submitted two resolutions (S. Res. 124) to amend the Standing Rules of the Senate to regulate Members, officers, and employees of the Senate to file certain reports as to their nongovernmental businesses, professional, or employment activities, and (S. Res. 125) to amend the Standing Rules of the Senate to prohibit the solicitation, custodianship, or distribution of political campaign funds by officers and employees of the Senate, which were referred to the Committee on Rules and Administration.

(See the above resolutions printed in full when submitted by Mr. COOPER, which appear under a separate heading.)

DEATH OF THE LATE T. ASHTON
THOMPSON OF LOUISIANA

Mr. LONG of Louisiana (for himself and Mr. ELLENDER) submitted a resolution (S. Res. 126) relative to the death of Representative T. Ashton Thompson, of Louisiana, which was considered and agreed to.

(See the above resolution printed in full when submitted by Mr. LONG of Louisiana (for himself and Mr. ELLENDER), which appears under a separate heading.)

STUDY OF WATER UTILIZATION
AND CONTROL OF THE CHESA-
PEAKE BAY BASIN

Mr. BREWSTER. Mr. President, earlier this week, I was pleased to participate in a meeting between Secretary of the Interior Udall and the Governors of the four States of the Potomac Valley. I am pleased to report that the leadership which the President has given to efforts at conserving and beautifying this river valley have already resulted in significant moves toward interstate and intergovernmental cooperation in the planning and execution of a vast conservation and development program.

Mr. President, I am proud to have played some part in this planning for the Potomac, but I am here today to demand that the Chesapeake Bay receive similar attention. I believe this major waterway to be one of the most neglected resources in this part of the country.

Through this giant 180-mile gateway pass American products whose manufac-

ture and shipment provide hundreds of thousands of jobs for Americans everywhere. Its geographical and navigational features attract ships from other nations and visitors from every State. They are the key to the history and prosperity of this part of our country.

The development of the bay and of the port city of Baltimore, with its modern industrial and transportation complex, have provided us with an artery of national and international commerce without parallel. This development has enabled us to continue to compete successfully in the world marketplace.

What is needed now is the corresponding development of the other rich resources of this waterway. Much too little attention has been given to its world renowned fishing grounds, its unsurpassed recreational possibilities, and its natural features of extreme beauty.

Local, State, and Federal agencies all participate today in numerous bay-connected studies and activities. The Maryland Port Authority, Department of Chesapeake Bay Affairs, Department of Health, and Board of Natural Resources are continually engaged in bay matters. So also is the Army Corps of Engineers and the U.S. Fish and Wildlife Service. The conclusions drawn by each are sometimes contradictory, and the coordination has been traditionally ad hoc.

What is lacking is central direction and testing facilities where individual proposals can be studied and evaluated, and conclusions objectively tested. What is needed is an hydraulic model of the bay with an associated technical center. This model of the bay and its associated tributaries would be capable of demonstrating tide changes, current flow, silt movements, salinity, erosion, and other important factors. It would enable scientists and engineers to work out solutions to problems for which there are now no absolute answers. It would avoid the kind of differences of opinion which have characterized the discussions of spoil disposal. It would assist the existing agencies in the performance of their missions by providing a clearinghouse and test center for all information and planning regarding the bay and its environment.

The problems of the bay and her tributaries are growing too great to be handled on a piecemeal basis. This great basin is one of the few such waterways in the United States which is not duplicated in a working scale model. The Delaware Bay, San Francisco Bay, and the Mississippi River are no more important to our Nation than the Chesapeake Bay.

Mr. President, on behalf of myself, and my colleague from Maryland [Mr. TYDINGS], I am today introducing legislation which would authorize the construction in Maryland of a 12-acre, hydraulic model of the Chesapeake Bay and an associated technical center. This legislation would also require the Army Corps of Engineers to conduct a complete study of water utilization and control in the bay and Baltimore Harbor. It would direct that the study consider problems of navigation, fisheries, flood control, water pollution, water quality control, beach

HIGHLIGHTS: Senate passed agricultural appropriation bill and independent offices appropriation bill. Senate took up housing and urban development bill. House agreed to conference report on cigarette labeling bill. House agreed to conference report on water resources bill. Rep. Cooley introduced farm bill.

SENATE

1. AGRICULTURAL APPROPRIATION BILL, 1966. By a vote of 86 to 2, passed with amendments this bill, H. R. 8370 (pp. 16034, 16035-55). Conferees were appointed (p. 16055). House conferees have not yet been appointed. Agreed to the committee amendments en bloc (pp. 16039-40). Agreed to an amendment by Sen. Hart to provide \$157 million for the school lunch program, rather than \$155 million as reported by committee, with the additional \$2 million to be used for special assistance to needy schools (pp. 16040-3). Agreed to an amendment by Sen. Bass to provide an additional \$75,000 for watershed protection which he stated was "for the purpose of allowing a comprehensive river basin study of all streams draining through Shelby County, Tenn." (pp. 16043-4).

2. INDEPENDENT OFFICES APPROPRIATION BILL, 1966. By a vote of 84 to 2, passed with amendments this bill, H. R. 7997 (pp. 16008-27). Conferees were appointed (p. 16027). House conferees have not yet been appointed. A point of order was sustained against a proposed amendment by Sen. Dirksen to provide \$6,386,800,000 for financing the U. S. liability on payments to the Civil Service retirement fund (pp. 16016-26). This bill includes funds for civil defense and defense mobilization functions of Federal agencies; disaster relief fund of the President; Civil Service Commission; Federal Power Commission; Federal Trade Commission; General Accounting Office; General Services Administration; Housing and Home Finance Agency; Interstate Commerce Commission, and National Science Foundation.
 3. D. C. APPROPRIATION BILL, 1966. Agreed to the conference report on this bill, H. R. 6453. This bill will now be sent to the President. pp. 16079-16111
 4. HOUSING. S. 2213, the housing and urban development bill was made the unfinished business (~~p. 16056~~) Sen. Douglas reviewed the purpose and certain provisions of the bill (pp. 16057-67). Sens. Tower, Javits, and Miller submitted amendments intended to be proposed to this bill (pp. 16033, 16120).
 5. SILK; FOREIGN TRADE. The Finance Committee reported with amendments H. R. 5768, to extend for an additional temporary period the existing suspension of duties on certain classifications of yarn of silk (S. Rept. 433). p. 16120
 6. MARKETING. Sen. Hart spoke in support of S. 985, the proposed truth-in-packaging bill, and inserted a letter by Mrs. Esther Peterson in support of the bill. pp. 16056-7
 7. BUDGET DEFICIT. Sen. Smathers commended the announcement that the U. S. budget deficit for fiscal 1965 was lower than originally predicted and inserted an article on the matter. pp. 16074-5
 8. RESEARCH. Sen. Proxmire expressed concern over possible Federal domination of research at colleges and universities as a result of increasing financial support of science by the Government, and inserted an article, "The Support of Science in the United States." pp. 16075-7
 9. AGRICULTURE. Sen. Morse inserted a letter reviewing economic development in Ore., including agriculture and forestry. pp. 16111-3
 10. LEGISLATIVE PROGRAM. Sen. Mansfield announced that the housing and urban development will be considered today, July 14, and, possibly, the conference report on the water resources development bill. p. 16056
- HOUSE
11. CIGARETTE LABELING. Agreed to the conference report on S. 559, the cigarette labeling bill (pp. 15959-66, 15998-9). This bill will now be sent to the President.
 12. WATER RESOURCES. Agreed to the conference report on S. 21, the proposed Water Resources Planning Act (pp. 15966, 16001-2). See digest 123 for provisions of this bill.

ing an investigation of milk price fixing, which he said apparently did exist. His information was turned over to State investigators and, as far as we know, that was the last that was heard of that, despite litigation brought by private individuals to get the above-mentioned reports made public.

As a third example—the women's hosiery industry appears to be one of the most unregulated industries extant. There is no standard for quality: we discovered many a pair of stockings labeled "first quality" to have entire rows of skipped stitches. Lengths vary at will: we found size 9 stockings, for example, to run anywhere from 28 to 33 inches in length. Each manufacturer has different lengths for the same sizes; but even a single box of stockings from one manufacturer will sometimes have a discrepancy of several inches between the various stockings in the box. A popular explanation of this fact, we found, is that "the manufacturer tries to please everybody—the short, the medium, and the tall—by giving them a variety of sizes in one box." The problem is that, usually, it is one woman who is stuck with all the different sizes in one box.

Is there anything that consumers can do in cases such as the above, Mrs. Peterson? Which agencies do handle such problems?

As a final word, I would like to say that the truth-in-packaging hearings must be receiving more publicity in other parts of the country than here. Around here, hardly anybody that I talk to seems to be aware of the hearings. It is a shame, but the bill appears to be getting very little publicity here.

Thank you very much, Mrs. Peterson, for your attention.

Sincerely yours,

REBECCA PRESS
Mrs. Stephen Press.

MAY 10, 1965.

Mrs. STEPHEN PRESS,
New York, N.Y.

DEAR MRS. PRESS: My sincere thanks to you for your thoughtful letter. It was received just before I left for a speaking engagement and a television program. I took it with me and quoted extensively from it. Would you have any objection to having your letter inserted in the CONGRESSIONAL RECORD? It is a good letter and I would like to have others have the same opportunity to study it as I had.

Because of your interest, I am taking the liberty of sending you a copy of my testimony before the Senate Commerce Committee on the truth-in-packaging bill. The hearings (which are still being conducted) are receiving a great deal of publicity so I hope more housewives around the country will become aware of Senator HART's efforts in this field.

You mentioned the work of your consumer group and the fact that there did not seem to be any agency to which you could turn with consumer problems. There are 23 Federal agencies working in various areas on behalf of consumers. The President's Committee on Consumer Interests works closely with these agencies and any time you have a problem or suggestion, if you will send it to me I will make sure it gets to the proper Government agency.

Again, my thanks for your taking the time to write your views.

Sincerely,

Mrs. ESTHER PETERSON,
Special Assistant to the President
for Consumer Affairs.

NEW YORK, N.Y.,
May 3, 1965.

Mrs. ESTHER PETERSON,
U.S. Department of Labor,
Washington, D.C.

DEAR MRS. PETERSON: I have read Senator SCOTT's comment at the truth-in-packaging

hearings to the effect that "the bill proceeds on the premise the housewife is dumb, which I deny, being married." I have also read the claims of various manufacturers that the proposed bill underestimates the intelligence of American housewives, who have no trouble slogging through the labyrinths of the retail markets.

I am not a dumb housewife. I have a master's degree and work in the professional world (as a translator). And I, as a housewife, resent many of the practices now in existence in the packaging industry.

I presume that the above-mentioned Senator's wife does not mind the fact that soap bars usually bears no indication of weight on them; but I do. Does his wife know that it costs less proportionally to buy the small cakes of some soaps—such as Ivory—than the large double ones? As a matter of fact, does she know that in many cases it costs less proportionally to buy the smaller boxes of soap flakes and laundry detergents than the larger ones? Most women do not—they assume (on the basis of many years of advertising by manufacturers) that the larger size is always more economical. Unless you carry a slide rule with you (I have been considering learning how to use one), there is no easy way of figuring out this fact—in view of all the fantastic combinations of weight that the packagers manage to devise for their products. With the soap bars, of course, you either have to carry a portable scale or else use the grocer's scale if you want to determine the proportional cost of what you are getting. I even discovered that a popular brand of hard candy—Charms—charges more proportionally for a larger package than for a small one.

I see no crime in wanting to know the relative costs of products that you are buying—especially in a freely competitive society. This is, of course, a tremendously difficult task under the present circumstances, where weight denominations on every single package vary—not only in the amount of ounces, but even in fractions of ounces. There may be some justification, I suppose, for small packages of spices to weigh odd amounts—for example, McCormick's bay leaves, which weigh either eight-fourteenths or nine-fourteenths ounce (the print is so small that I cannot tell which it is), or McCormick's minced onion, which weighs 1½ ounces—but I am not sure what this justification is, since other spices seem to manage well with one-fourth-, one-half-, or three-fourth-ounce denominations. When we get to bigger packages, though, there is really no justification for "giant" sizes of laundry detergent, for example, to weigh 3 pounds 1¼ ounces. The manufacturers claim that their "creativity" would be hampered if the present bill were passed. I do not see why one cannot be as creative with a 3-pound box of laundry detergent as with a 3-pound, 1¼ ounce one.

I am equally annoyed with misleading labeling of products, as in the case of pork and beans. Why should a can be labeled "pork and beans" when the contents include beans with a tiny piece of pork fat? I wrote to the Heinz Co. asking them where I could find the pork in their can of pork and beans. They answered me with a very placating letter, explaining that, as I ate the contents of the can, I should look for a piece of pork fat—that, they stated, constituted the federally approved requirement for pork in a can of pork and beans.

"To suggest that [the American housewife] needs additional laws to help her determine value" is not, as Mr. Halverstadt would have it, to underestimate her intelligence and shopping ability. Some women are perfectly satisfied with conditions as they are because they do not care how much money they spend at the supermarket. Some women do care, but throw their hands up in despair after trying to calculate the relative values of

many products. Some women just buy the package that costs less, even though it costs proportionally more than a higher-priced, bigger package standing next to it. Some women, who are determined to get the most for their money, resort to walking around the markets with pencil and paper in hand.

I have done research on a number of consumer problems and headed a local consumer group for a while, but our success was limited because there did not seem to be any agency to which we could turn with consumer problems.

I feel that the second section of the proposed bill is a long-overdue imperative and fervently hope that it will be passed.

If Mr. Halverstadt and other industrialists are so sure that consumers are happy, they should have no fear of testing their premise by endorsing the establishment of an agency or agencies to which housewives (and other consumers) could turn if and when they do have problems or concerns. They could then hear the preferences of the public and not have to fear Federal officials "imposing their own preferences * * * upon the public."

Please extend my warmest thanks to Senator HART for his concern. I think that if his efforts were more widely publicized to housewives around the country, he would receive a great deal more support. Is there any chance of that? Is there any chance of having comparative value surveys made public?

Finally, is there any chance of having the type of consumer agencies that I mentioned above created—agencies to which a consumer could bring his problems for attention and some kind of action?

Thank you for your attention.

Sincerely yours,

REBECCA PRESS,
Mrs. Stephen Press.

THE 1965 HOUSING BILL

Mr. DOUGLAS. Mr. President, tomorrow the Senate will consider S. 2213, the omnibus housing bill. This bill is the most significant step yet taken by Congress in fulfilling its 1949 commitment to provide a decent home for every American family. As a member of the Banking and Currency committee, I was privileged to have had a hand in shaping this important bill and I will be proud to support it on the floor of the Senate.

In many ways the bill is better than the one originally introduced and the credit must go to my hard-working colleagues on the Housing subcommittee and its able chairman, the Senator from Alabama. So that Members may have an adequate record for the debate tomorrow, I am making this speech and inserting certain material in the RECORD today.

The basic purpose of the bill is simple—to make our cities and towns better places in which to work and live. For better or for worse we live in an urban society and the health of our Nation can be measured to a considerable extent by the health of our cities. Most of our wealth, talent, and cultural achievements are located in urban centers. If we permit them to decay and stagnate—if we fail to preserve their vitality and diversity—if we ignore the basic fact that cities were built for people to serve human needs—our entire Nation will soon falter and decline.

Seven out of every 10 Americans now live in urban areas. Only 1 in 10 lives on a farm. But in spite of this predominantly urban environment the

presumed superiority of rural values still permeates our culture. We see it reflected in the Federal budget, where the expenditures for agriculture are 14 times greater than urban expenditures—thus in 1966, the President's budget contains \$6.4 billion for the Department of Agriculture and \$454 million for the Housing and Home Finance Agency—and, on a per capita basis, 140 times greater. And there are some who still argue that it is too dangerous to permit city dwellers a full voice in State government.

This is not to suggest that the Government should ignore the problems of agriculture. I believe in adequate help to low-income farmers; but I would also like to see somewhat more recognition to those who live in cities and towns.

The Housing and Urban Development Act is a step in this direction. It extends for 4 years the existing programs which we have thus far developed to meet the problems of our cities and towns. Many of these programs, such as public housing and urban renewal, were once bitterly opposed; they now seem established beyond serious dispute. In addition, the bill contains several new programs for helping our communities to secure better housing and create a better life for all their citizens.

I. IMPROVEMENTS IN THE HOUSING PROGRAM

The most significant new proposal in the bill is the rent supplement program which President Johnson termed the "most crucial new instrument in our effort to improve the American city." But there are other improvements in the bill which we should not ignore.

First. The bill permits the public housing program to make greater use of vacant housing already available on the private housing market. These vacancies exist in many cities but are generally still beyond the reach of lower income families. The local housing authority would be permitted to lease or purchase up to 100,000 of these vacant units over the next 4 years and to rent them, at a reduced rate, to poor families who are otherwise eligible for public housing. Thus the needs of the poor are met while at the same time the city makes more efficient use of its total supply of housing which otherwise would lie idle.

Second. The bill will provide more housing for moderate income and elderly families in the \$4,000 to \$6,000 income bracket. It does so by reducing to 3 percent the interest rate on mortgages which finance this type of housing. The present rate, which is tied to the interest rate on Federal obligations is close to 4 percent and otherwise would soon go even higher.

We adopted these two special programs in 1959 and 1961 when interest rates were around 3 percent. Our original purpose was to encourage the construction of housing for families with incomes too high for public housing but not high enough for decent private housing. Unfortunately this aim is being defeated by the rise in interest rates. Rentals are being forced beyond the reach of the groups for which the housing was intended. The return to a 3-percent rate will therefore restore these programs to their original purpose.

Third. The bill provides over a 4-year period \$700 million in matching grants to cities and towns for basic water and sewer facilities. These facilities are extremely important in shaping the growth of a city or town. The funds will thus help our communities to assume more control over their residential growth and economic development. Cities are now faced with ever-increasing needs and a constantly dwindling tax base. Basic investments in critical facilities such as water and sewage systems must often be neglected in favor of immediate and pressing requirements. I hope this provision of the bill will restore a proper balance.

Fourth. The bill continues our efforts to humanize the impact of the urban renewal program. Homeowners in urban renewal areas are sometimes bulldozed out of their homes merely because they lack the money to repair their property. This situation was partially corrected last year when we authorized a new program for loaning these individuals the funds necessary to rehabilitate their homes.

There are many families, however, that are not helped even by the loan program. They are so impoverished they cannot afford to repay any loan no matter how liberal the terms. The obvious solution is to pay for the needed repairs with Federal funds thereby saving demolition and relocation expenses, not to mention the human cost of displacing a family. The bill authorizes up to \$1,500 for such repairs for families with incomes under \$3,000.

II. HOUSING FOR THE POOR

In discussing this bill, I want to call particular attention to the problem of finding decent housing for low-income families. I also want to bring attention to the proposed new method for meeting this problem—the rent supplement program.

During the days of the depression many people looked to the public housing program as a way of providing for that one-third of the Nation that was ill-housed, ill-clothed, and ill-fed. By 1949 Congress lowered its sights and declared we would build 810,000 units of public housing within 6 years. Sixteen years later, and 10 years past the deadline, we still have yet to reach even this modest goal. Only 575,000 public housing units have actually been constructed.

There are many reasons for the failure of Public Housing to house an adequate number of the poor. Of course the program has always evoked controversy and Congress has not always been overly generous in authorizing funds. But the program has also run into great difficulties on the local level. The selection of a public housing site often provokes an extended political tug of war that may take years to resolve. As a result, public housing is having less and less of an impact upon the slum dweller in our larger cities where new projects have been reduced to a trickle. Last year 21 out of the 25 largest cities did not begin any public housing projects at all. The program has been shifting, instead, into smaller towns and also has been focusing

on the needs of the elderly. Nearly half of all the units upon which construction began in 1964 were in cities of under 50,000 in population. Half were built for the elderly.

Although Public Housing has failed to house an adequate proportion of the urban slum dweller, private enterprise has also failed. Almost all new housing is now being constructed for the affluent middle class. There are some who argue that we need not build new homes for the poor—that older homes will trickle down to serve their needs. The evidence shows, however, that by the time this housing trickles down to the poor much of it is either dilapidated or ready for demolition.

For example during the decade of the 1950's private enterprise built over 12 million new housing units. At the same time there has been some reduction in the total number of substandard units. But there has been little change in the worst category of slum housing—units classified by the Census Bureau as dilapidated. This is housing nearly unfit for human habitation.

In 1950 there were 4.5 million families living in dilapidated housing. By 1960 the number had only declined to 4 million. However these figures do not tell the entire story. We did manage to get rid of 3 million dilapidated units during the 1950's but nearly 2.5 million existing units became dilapidated. In other words, despite the housing construction boom during this decade, we created new slums almost as fast as we got rid of the old slums. At this rate it will take 80 years before the worst of our slums are eliminated. I hope that this simple arithmetic will once and for all dispose of the trickle down theory.

The 1960 census also revealed that 8.5 million American families still live in dilapidated and all other categories of substandard housing. The term "substandard housing," by the way, is the euphemism used by statisticians to refer to what we once called slum housing. As might be expected, most of the families who live in substandard housing are poor. Half had incomes under \$2,200; nearly two-thirds made less than \$3,000 a year; three-fourths earned less than \$4,000 a year.

One of the key players in this depressing story is the slum lord who preys upon the ignorance and misfortunes of the poor and extracts an exorbitant profit out of his rundown and rat-infested tenements. In many cases, lax or token code enforcement activities help to maintain the slum lord in the prosperous style of life to which he has become accustomed.

Racial prejudice also works to the advantage of the slum lord. More and more of our cities are being surrounded by suburban subdivisions which exclude members of minority groups. When it comes to housing, members of minority groups have a limited choice and frequently must pay excessive rents to a slum lord for a rundown apartment in or near the core of the city. Of course, this has always been true in our history, starting with the great waves of Irish immigrants who came to America in the

last century. Today, the problem is often with Negro families, but not exclusively. Three out of every four families living in substandard housing are white.

When confronted by local housing authorities, the slum lord often hides behind the plight of his impoverished and shunned tenants. He argues that if his rickety and unsafe structures were to be condemned, its occupants would have no other place to go. Unfortunately, he is often right.

No one has computed the true cost of perpetuating slum neighborhoods, but it must be tremendous. One study has found that for every tax dollar collected from a slum, the city must pay back \$9 in municipal services and welfare benefits. I wonder how long General Motors would tolerate one of its divisions running 900 percent in the red? Unfortunately we as a nation do not keep our books as meticulously as General Motors.

It is clear that slums are one of the heaviest drains on municipal budgets. Slums also are a drag upon economic growth since people who grow up in these neighborhoods are often unable to compete in today's complex job market.

I do not mean to imply that better housing is the only road to salvation. Poverty, ignorance, lack of motivation, cultural deprivation, and crime will not automatically disappear once a slum family moves into a new and decent apartment with all the requisite plumbing facilities. In this respect, perhaps the expectations of the public housers have been too high.

What I am suggesting is that we cannot have an effective war on poverty without at the same time improving the physical environment of millions of impoverished families. Just as the war on poverty seeks to help the individual to help himself, so must the housing program rebuild the material conditions of his everyday life. It is difficult to see how we can succeed in motivating slum children to reach for something better if they continue to live in miserable squalor.

To enrich the environment of the individual, then, is the true purpose of our housing program. We must find a way to break the endless chain of crime, ignorance and poverty perpetuated by our slums. Better housing for low-income families need not be a permanent subsidy—it can also be an investment in the future of America. We now have the resources and the know-how to permit every citizen to realize his full potential and participate in the abundance of American life. The war on poverty combined with an invigorated housing program can be the catalyst we need to improve the quality of life for all our people.

III. THE POOR TAKE PRIORITY

I now want to describe some of the changes we have recommended in the rent supplement program which, in my opinion, are a vast improvement over the original proposal.

The original version of the bill provided rent supplements to families with incomes too high for public housing but

too low to afford decent standard housing on the private market. In most communities this narrowed the assistance to families with incomes between \$4,000 and \$6,000 per year. But the families with the greatest need would not be eligible. For example, there are 3.6 million families earning less than \$4,000 who rent substandard housing while there only 1.1 million families who earn between \$4,000 and \$6,000 and who rent substandard housing.

Under the original administration proposal, only the 1.1 million families with middle incomes would have been eligible for rent supplements. In other words, only one slum-dwelling family out of four would have been helped. The other three-quarters would have been excluded, not because they were too rich, but because they were too poor. Yet these are the very families who had the most desperate need of rent supplements.

The administration's original proposal was therefore amended in the Senate Banking and Currency Committee as well as on the floor of the House to restrict the rent supplement program only to those families eligible for continued occupancy in public housing. In other words, the income ceiling was reduced and the legislative income floor was eliminated.

In addition to eliminating the legislative income floor and reducing the income ceiling the House and Senate bills also increase the amount of the rent to be paid by the tenant. We increased the amount from 20 percent of income, as originally proposed, to 25 percent of income.

These two actions are largely offsetting in terms of cost and the number of families to be assisted.

For example, the administration estimated its proposal would ultimately help 500,000 families at an average cost of \$400 per family or an ultimate cost of \$200 million per year. The elimination of the income floor would tend to increase vastly the average cost per family. With the same funds, fewer families would be assisted.

On the other hand the increase in the tenant's share of the rent from 20 to 25 percent of income has the effect of reducing the cost per family. With the same amount of funds, more families can be assisted.

As a result of these two actions, the amended bill is still expected to assist 500,000 families at an average cost of \$400 per family and a yearly cost of \$200 million; but the income levels of those assisted will be lower while their share of the rent will be higher. More money can be spent by the poor for decent housing.

As we have seen, the public housing program has not, and in all probability, cannot meet the housing needs of all low-income families. Yet there are some people closely identified with public housing who resent any intrusion upon their special preserve. They have staked out a claim upon the poor and seek to prevent any competitor from entering the field.

This deference to the public housing program seems to be the only real rea-

son for originally excluding the poor from rent supplements. I can appreciate the position of those who do not wish to antagonize the professional public housing interests but Congress does not have to operate under such a restraint. There are more than enough low-income families to be helped by both programs. We cannot discriminate against the poor in order to maintain the jurisdictional claims of the housing bureaucrats. No one should have a vested interest in poverty.

IV. RENT SUPPLEMENTS ARE NOTHING NEW

In the bill under consideration, the rent supplement program is contained in section 101.

The basic purpose of the rent supplement program is to increase the supply of decent housing available to low-income families. Rent supplements are a means to this end and not an end in themselves. This bill does not subsidize the rent of every single poor family in the United States as some have wrongly believed.

The effect of the rent supplement provision is far more modest—it will encourage the private market to build about 500,000 units of decent, safe, and sanitary housing for low-income families. There are more than 6 million low-income families living in substandard housing today who apparently have not been able to obtain better housing.

I have already recounted the inability of the public housing program to solve the low-income housing problem. There are 500,000 families on the admission list for public housing and no doubt there are millions more who are discouraged by the futility of such an endless wait.

Since public housing cannot do the entire job, something more is needed. That something is the rent supplement program. Its basic concept is simple—instead of subsidizing the construction of a publicly owned facility, why not encourage the construction of privately owned units by promising to supplement the rent of their prospective tenants?

Far from being a radical or new idea, this proposal has been advanced for years by the homebuilders and just last year we adopted the concept on a limited scale for those families displaced by urban renewal. A number of communities have also experimented with the technique of rent supplements under the low-income housing demonstration program, and the results have been favorable. Further, the use of nonprofit or limited dividend corporations to build and manage housing projects is nothing new. We have relied upon this method for 4 years under FHA's section 221(d)(3) program.

And so the rent supplement program is not a new, or radical, or untested idea. It has been discussed for years and its basic features have been partially implemented or experimented with over the last 5 years. It is really difficult to understand, therefore, what all the controversy is about.

V. HOW THE RENT SUPPLEMENT PROGRAM WORKS

Here, Mr. President, is how the program will work.

First of all, a group within a particular community must decide they want to build and manage a low-income housing project. It is also possible for the group to buy and rehabilitate existing housing. Regardless of the method, the group must either be a nonprofit organization such as a church or labor union, a cooperative, or a limited dividend corporation.

Once the group has been formed and has made a decision, it will then have to borrow the money to construct the housing from a private lending institution. At this point the loan would be insured by the FHA under their 221(d)(3) market rate program. This program insures mortgages up to the cost of replacement if the sponsor is a nonprofit organization or cooperative; if the sponsor is a limited dividend corporation the maximum insurable mortgage is 90 percent of the replacement cost. The terms are at the full market rate of 5¼ percent over 40 years.

In order to qualify for 221(d)(3) insurance, a project must conform to FHA's construction standards, including modest design criteria which already have been established and operating for 4 years. Under these criteria, FHA cannot insure a mortgage if the rentals required to amortize the mortgage exceed what a moderate-income family can afford to pay. In the 4 years the 221(d)(3) program has been operating, mortgages have averaged about \$12,500 per unit.

Once the financing has been completed, the sponsor would then negotiate an agreement with the housing agency. The sponsor would agree to make a specified number of the units available to low-income families who would be assisted by rent supplements. The sponsor would be free, of course, to rent the remainder of the units on the open market. The housing agency would agree to pay rent supplements for the low-income families with a maximum on the total amount which could be paid in 1 year. The agreement for annual payments would run over the 40-year life of the mortgage.

The amount of the rent supplement paid on behalf of each family would vary. The family would have to pay 25 percent of its total income toward the fair economic rent of the unit; the Housing agency would provide the rest. Assume, for example, that a two bedroom apartment constructed under the program rented for \$80 a month. Assume further that a prospective tenant was making \$2,880 a year or \$240 per month. This family would be charged 25 percent of its income for rent, or \$60 per month; the housing agency would pay to the owner of the apartment the remaining \$20 per month.

The owner of the housing would select each tenant; however the housing agency would have to certify their eligibility for rent supplements. In order to qualify a family must meet two conditions:

First. Its total income must be below the ceiling for occupying public housing in the area. These limits which can be set lower by administrative action, will vary from city to city but should average between \$4,000 and \$5,000 per year.

Second. In addition to meeting the income test, the family must also fall within at least one of the following five groups: first, families who live in substandard housing; or second, families whose head is age 62 or over; or third, families whose head is physically handicapped; or fourth, families who are displaced by a Government program such as urban renewal; or fifth, families who are victims of a natural disaster.

Thus, all poor are not eligible for the program nor are all slum dwellers eligible.

With the exception of the elderly, whose incomes generally do not increase over the years, the housing agency would recertify the incomes of aided tenants at least once every 2 years. If a family's income increases its rent supplement would be reduced. Once the family could pay its way with 25 percent of its income, rent supplements would stop. Unlike public housing, however, the family could continue to live in its apartment. It would not be forced to move. This is a great advantage. People can work themselves out of dependency.

Rent supplement payments made under this program could not exceed appropriations of \$50 million in fiscal year 1966 and this amount would increase by \$50 million per year in each of the next 3 fiscal years. Thus by the fourth year the bill would authorize annual rent supplements of up to \$200 million per year; however, the increase in the incomes of assisted families should drastically reduce these payments by the end of the mortgage period.

With this level of financing, the bill provides the means for helping 500,000 families obtain better housing by 1969.

VI. ADVANTAGES OF RENT SUPPLEMENTS

The advantages of this type of rent supplement program are numerous.

First. It permits greater flexibility in helping low-income families to find decent housing. The interminable bickering involved in the public housing site selection would be avoided. Since the projects would be built by private sponsors, much of the redtape now encumbering public housing projects can be bypassed.

Second. Because of this increased flexibility, rent supplement projects could be smaller in size and scattered over a wider area. It would not be necessary to concentrate them in massive, ghetto-like developments.

Third. The amount of the Federal payment would be reduced as family income rises. Rent supplements would stop when the family is able to pay its own way. This feature of the program should be contrasted with subsidizing low-income housing through lower interest rates as some have urged. If this were done, the subsidy would extend the life of the mortgage regardless of any increase in the income of the assisted family.

Fourth. The amount of the Federal payment would vary in accordance with the need. It would be larger for those of lower income and smaller for those of higher income. Again, the comparison with an alternative interest rate subsidy is appropriate.

Fifth. Families could continue to occupy their dwelling units and pay the full rent when their incomes rose beyond the ceiling. They would not be forced to leave.

Sixth. The variation in the amount of rent supplements will avoid a rigid stratification of projects by narrow income levels. Thus the program will provide more diversity in our urban environment and enrich the lives of all.

Seventh. By encouraging the sponsorship of civic minded nonprofit groups, the program will vitalize these organizations. It will provide a constructive outlet for their energies, which when mobilized, will inevitably spill over into the general war on poverty.

Eighth. By encouraging new construction or rehabilitation, the program will add to our long-term stock of standard housing. It will also create construction jobs in hundreds of communities and generate at least \$6 billion of private construction activity.

In short, we will provide decent housing for 500,000 families and around 2 million people under private ownership, private financing, private construction, and private management. The Government will help, but the work will be decentralized, and private groups of a nonprofit nature will be encouraged to take up the tasks. The rent supplement program joins together private initiative and private enterprise with Government to achieve a basic public purpose.

VII. THE PAUPER IN THE PENTHOUSE AND OTHER MYTHS

It is inevitable that new proposals always engender a certain amount of blind criticism. Rent supplements are no exception, as is evidenced by the House minority report. Generating more heat than reason, this report bristles and crackles with philosophical indignation. Just reading the report reminds me of Winston Churchill's famous admonition:

The right honorable gentleman ought not to muster more indignation than he is capable of containing.

I do not want to take all the time to refute every charge made against the rent supplement program, but let me answer some of the more flagrant claims.

First. The cry that rent supplements are socialistic hardly needs comment. This wornout shibboleth has been leveled at virtually every major new program over the last 30 years from social security to medicare. By now the cry should fall upon deaf ears. Actually, the program involves less governmental direction and supervision than the existing public housing program which has been on the books for 28 years. Projects under rent supplements would be built, owned, and managed by private enterprise. But perhaps the most telling refutation can be found in the support given to rent supplements by such entrenched bastions of socialism as the National Association of Home Builders, the Mortgage Bankers Association, the American Bankers Association, and the General Improvement Contractors Association.

Second. It has been charged that poor people can be maintained in luxury housing. The House minority report trembled at the prospect of low income slum dwellers living it up in \$100,000 penthouse apartments. Such an obsession can only be described as the "pauper-in-the-penthouse" psychosis.

In point of fact, construction costs per unit would have to conform to the modest design criteria contained in FHA's 221(d)(3) program. Under that program, FHA cannot insure a mortgage if the rentals required to amortize the mortgage exceed the rent a moderate income family can pay. Per unit mortgages have averaged around \$12,500.

Third. Critics have contended that rent supplements could be extended to cover upper-middle income groups who earn far more than the national median.

The people who make this claim are basing it on inaccurate information. The income ceilings would vary in each community, but they would be based upon the occupancy ceilings for public housing in the area. An HHFA study of 23 cities showed the income ceilings for a family of four would range from \$3,625 to \$6,125 per year and would average about \$4,858 compared to the national median family income of \$6,400. Moreover, the housing agency has said it intends to administratively restrict these ceilings to even lower levels so that the average ceiling would be about \$4,100 per year.

Of course those whose incomes approach the ceiling and who occupy a unit built through the program would receive virtually no rent supplement. The supplement would only become significant for those with incomes well below the ceiling. Thus the program is clearly confined to lower income families.

Fourth. It has been claimed that the rent supplement program will destroy the public housing program. This charge is obviously being made with tongue in cheek, for many who are now shedding crocodile tears over public housing have been lambasting the program for years as being too socialistic. If their charge that rent supplements would destroy public housing were really correct then rent supplements, from their point of view, would be a good thing. They ought to support it.

As a matter of fact, there are enough needy to be assisted by programs. There are 8.5 million families living in substandard housing and nearly two-thirds, or 5 million families make less than the poverty level of \$3,000 per year. By way of contrast the bill we are now considering only authorizes 240,000 units of public housing and 500,000 units under rent supplements over the next 4 years. Both programs combined make but a small dent in the need for better housing.

Fifth. Critics charge that the Housing Administrator is delegated too much power—that he can set income limits and make other determinations in each community.

For those who stress State and local diversity, this is a curious charge. Presumably these critics would write into

the bill national standards to be rigidly applied to each and every community.

In point of fact, the bill allows very little discretion to the Housing Administrator. He could not decide such matters as income ceilings on the basis of his personal whim. He would have to follow the procedures and policies which are clearly set forth in the bill. Thus the policies adopted by us would be tailored to meet the individual circumstances of each community.

Sixth. The claim is made that rent supplements are an \$8 billion experiment. Those who make this claim usually forget to say that first, this figure is the theoretical maximum and is about double the probable cost; and second, the cost is spread over 40 years. Since when have we computed our Federal budget over 40 years? If this is our new standard then the \$4 to \$5 billion rent supplement program ought to be weighed against a \$160 billion farm subsidy program, a \$200 billion space program, and a \$2 trillion defense program.

Seventh. The argument is made that rent supplements destroy a family's incentive to increase its income—that it will forgo added income in order to avoid paying higher rent.

This argument ignores the fact that only 25 percent of each added dollar of income would go to rent. The family would be free to spend the other 75 percent on its other needs. Since most poor families have a large backlog of unmet needs such as clothing or furniture or education, it is difficult to see how an incentive to earn more will be weakened.

Like socialism, the charge of corrupting the poor is an old one. The moral fiber of the poor has long been protected by these self-appointed guardians who profess to see an ominous danger in nearly every piece of major legislation which might benefit the poor. Somehow these warnings sound a little hollow, especially when they are made from the comforts of an FHA-insured home, for which many of the expenses are tax deductible. Millions of middle class homeowners receive an indirect subsidy each year through these special tax privileges. Their moral fiber has seemed to survive.

VIII. THE \$80-BILLION HIDDEN HOUSING SUBSIDY

Let us examine these tax privileges accorded homeowners. It is conservatively estimated that American homeowners pay approximately \$10 billion a year in interest on their home mortgages. These payments, of course, are tax deductible. Assuming an average tax bracket of 20 percent, these special privileges amount to an indirect subsidy of about \$2 billion a year or \$80 billion over a full 40-year period. This is 10 times the maximum cost of the rent supplement program and nearly 20 times its probable cost. This comparison ignores the other special tax privileges available to homeowners such as the ability to deduct State property taxes from Federal income tax payments.

Now I have nothing against homeowners I am one myself. I am delighted that our Federal tax policies have helped

millions of Americans to own their own homes. But these special tax benefits do nothing for families who rent, and generally, this group includes the great bulk of the poor and very little for the low-income homeowner.

Why is the cry of socialism raised whenever we try to extend a small portion of the benefits provided middle income families to those who are in the most desperate need of assistance—the poor and the needy? We are giving an indirect subsidy of \$80 billion over 40 years to middle income homeowners. What is so terrible or immoral about providing a similar subsidy of \$4 to \$5 billion over 40 years to low-income families that cannot afford to buy their own homes?

Can it be that only well to do homeowners have moral fibers sufficiently strong to avoid being corrupted by subsidies? Like matches for children, are subsidies too dangerous for the poor? I think not. I think we can and must extend a helping hand to every American family—rich and poor alike—to provide a decent living environment.

IX. CONCLUSION

Mr. President, I believe a careful reading of the bill will show the rent supplement plan to be a most conservative proposal. Most of its features have been tested, in one form or another, over the last few years.

It will build at least 500,000 units of low-income housing over a 4-year period or an average of 125,000 per year. This will provide the tools to generate at least \$6 billion worth of private construction activity in our economy. Thus should we eliminate the rent supplement program we will not only deprive low-income families of a chance to find better housing—we will deprive our entire economy of a needed stimulus over the next 4-year period.

The housing under this program would be built, owned, and operated by private groups rather than the Government.

It will give 500,000 families a chance to break out of the slums and raise their children in a decent environment.

It will rescue families caught in the endless chain of poverty, ignorance, and crime, and permit them to realize the full promise of American life.

It will renew the vitality and vigor of our American cities and make them better places in which to live and work.

It will help fulfill a commitment Congress made in 1949 to insure a decent home for every American family.

In short, the rent supplement program furthers the basic assumption of American democracy that every citizen should be given a chance to realize his full potential and participate in the benefits of American life.

I call upon all my colleagues to join with me in voting for this bill and for the rent supplement program.

Mr. President, I ask unanimous consent to insert in the RECORD at this point the answers to several questions which I asked the housing agency, together with other materials on the housing bill. These questions deal with the procedures of the proposed rent supplement program, its relationship to the FHA

221(d)(3) program, limitations on the cost of units to be constructed and income ceilings for eligible tenants. I believe the answers, as prepared by the housing agency, will clear up similar questions in the minds of other Members.

The PRESIDENT pro tempore. There being no objection, the questions and other materials are ordered to be printed in the RECORD as follows:

Question. How does FHA process applications from a nonprofit sponsor under its 221(d)(3) program which is the insurance program to be used in conjunction with rent supplements?

Answer. This outline of procedures, which would be employed by the Housing Administrator and the FHA in processing applications under the proposed rent supplement program, is based on the provisions contained in the bill (S. 2213) reported by the Senate Banking and Currency Committee.

This bill provides that three types of private sponsors would be eligible to finance housing projects financed under FHA's section 221(d)(3) program at market interest rates and also to receive from the Housing Administrator rent supplement contracts to make up the difference between the market rent required for such units and the rent which qualified low-income tenants can afford, paying 25 percent of their income for rent. The sponsors are nonprofit, limited-dividend, and cooperative sponsors.

Following are outlines of the step-by-step procedures which FHA would employ in reviewing applications for mortgage insurance for nonprofit sponsors.

The above mortgagor entities are eligible for a maximum 100 percent mortgage except as indicated below for the builder-seller. The terms "housing owner" and "mortgagor" are used interchangeably. A nonprofit mortgagor must be a corporation or other entity organized for purposes other than the making of profit or gain for itself or persons identified therewith and which the FHA Commissioner finds is in no manner controlled by, nor under the direction of, persons or firms seeking to derive profit or gain therefrom. Such entity must execute an appropriate regulatory agreement under which its rents, charges, and methods of operation are subject to control by the Commissioner. Under the nonprofit procedure, FHA requires a nonprofit sponsor in addition to the nonprofit mortgagor as a means of assuring the continuity of the mortgagor. The sponsor normally has historical existence in the field of charitable endeavors or community betterment. Typical of (d)(3) nonprofit sponsors have been individual churches, church groups, conferences, dioceses, or synods, labor unions, fraternal and service organizations, and also eleemosynary foundations. It causes to be formed a nonprofit mortgagor, the officers and directors of which must come from, or be designated by, the officers and directors of the nonprofit sponsor. Under this phase the sponsor and the mortgagor are two separate legal entities even though the power to control the latter is vested in the former. The general contractor may be paid a fee not in excess of that generally applicable in the community for the building of a similar type of structure. This also applies to the builder-seller arrangement.

Under the builder-seller arrangement, a unique marriage combines two mortgagors, an interim or temporary builder-mortgagor and a permanent nonprofit private mortgagor. The former must enter into a contract of sale with the latter under which the

project will be sold to the permanent nonprofit mortgagor at a price not to exceed the actual certified cost of the project. A 100-percent mortgage may issue, 10 percent of which is held in escrow pending consummation of the sale to the nonprofit mortgagor. If for some reason the sale cannot be consummated, at final closing, according to the contract of sale, the interim mortgagor operates the project as a limited distribution mortgagor and executes a special regulatory agreement under the terms of which the Commissioner controls the rents, charges, and methods of operation of such limited distribution entity. Under such circumstances the builder-seller mortgagor is entitled only to a maximum 90 percent mortgage and all requirements pertaining to a limited distribution entity apply. Normally, the changeover from a temporary interim mortgagor to the permanent nonprofit mortgagor takes place at final closing.

Typical processing procedures are as follows:

1. In the very early stage and before any documents, informal or formal, have been filed, representatives of the sponsor or builder-seller discuss with the insuring office their intent to submit a proposal and the need for it in the community.

2. Assuming favorable reaction, a preliminary application without fee, form No. 2012, is filed with the insuring office briefly describing the location, number and composition of units by bedrooms, and the rental rates proposed to be charged. If on analysis the proposal appears feasible, the representatives are advised to obtain architectural drawings and submit a formal application, form No. 2013, with appropriate fee. At the same time an analysis is made of the eligibility of the sponsor to act in such capacity. The determination is predicated on the submission of a form No. 3433 showing all proposed relationships that do, or may, exist between the nonprofit sponsor and mortgagor on the one hand and those seeking a gain or profit from the proposal. This normally will include the general contractor, subcontractors, land ownership, architect, lawyer, housing consultant, and management after completion. We must be assured that there are no adverse identities of interest and that there is no possibility of control by those seeking to make a gain or profit over either the sponsor or the mortgagor.

In some few communities where there has been difficulty in obtaining typical nonprofit sponsorship, FHA, in order to further the program, has permitted a group of public spirited citizens to band together and form a nonprofit corporation under the domiciliary requirements of the jurisdiction and also meet FHA requirements. In order to assure the continuity which normally would be provided by the existence of a sponsorship having historical background, there is substituted a requirement that an official of the community be designated, by office, to at all times serve on the board or as an officer of the nonprofit mortgagor corporation. This is a continuing responsibility of the community and is attested to by its attorney or other officer authorized to certify that the action taken is within the power of the community and legally capable of accomplishment.

3. Such form No. 2013 should generally conform in all substantial aspects to the preapplication proposal and should indicate a financial ability of the sponsor to go forward with the proposal. This latter subsequently is verified by the submission to the

insuring office of financial statement and credit report.

4. Plans and specifications are routed through the architectural section for adequacy and the estimating of the construction costs. A prevailing wage determination if required is obtained from the Labor Department. During this period of review the sponsor will submit a quantity and cost survey prepared by a recognized engineering firm. When considered architecturally acceptable, the case is routed to the valuation section.

5. The valuation section estimates obtainable rentals and operating expenses. Rental rates, including utilities, are also checked against established family incomes. Maximum rentals, including utilities, cannot exceed FHA's judgment of the effective market.

6. Debt service limitations usually control the mortgage amount. This is found by taking 95 percent of the estimated net annual income and dividing this amount by the debt service factor at the market rate of interest.

7. The mortgage credit section then processes the case as to statutory requirements and the financial ability of the sponsor, and the capability of the sponsor to carry out effective management under the rent supplement program.

8. A commitment is then issued with the customary commitment fee payable within 30 days.

9. Between the issuance of the commitment and the initial closing, which usually takes place before start of construction, all legal forms are prepared by the attorney for the sponsor. These include such items as the building loan agreement, trade breakdown for payment of advances, agreements to cost certify, regulatory agreements, and so forth.

A meeting is also held with the sponsor, builder, and others in which prevailing wage requirements if applicable and reporting are explained.

10. At initial closing the sponsor meets all cash requirements and usually draws mortgage funds for costs and fees advanced and for the land, if not used for equity purposes. The note and mortgage are executed at this closing and recorded.

11. After initial closing, the sponsor may start construction. In a few cases construction may be started after issuance of the commitment, upon approval by the Commissioner, and at the risk of the sponsor.

12. Upon completion of the construction, and prior to final closing of the mortgage, the sponsor must certify all costs. These are reviewed by FHA. Statements of rental income must also be submitted. If the allowable costs are less than the mortgage amount, the mortgage is reduced accordingly. If the project shows an operating profit the amount may be applied as an offset against higher than estimated actual costs or placed in the residual receipts account which is under the control of FHA pursuant to the regulatory agreement.

13. Under the regulatory agreement executed between the mortgagor and the FHA Commissioner, the FHA has continual supervision over the general operation of the project for so long as the mortgage is insured or held by the FHA Commissioner.

Question. How does FHA process applications from a limited dividend corporation under its 221(d)(3) program?

Answer. A limited dividend sponsor under section 221(d)(3) is limited to an annual cumulative return of 6 percent of an estimated 10 percent equity. The mortgage

ratio for this type of sponsor cannot exceed 90 percent of the FHA estimate of cost.

A limited dividend sponsor may be an individual, partnership, or corporation. The limited dividend sponsor is entitled to a 10-percent builder's and sponsor's profit and risk allowance, provided there is an identity of interest between the builder and the sponsor. If the builder and sponsor do not have an identity of interest, the builder's profit is limited to the amount prevalent in the area.

The processing procedures, typical of all FHA projects are as follows:

1. A preapplication request is submitted by the sponsor to the local FHA insuring office. This briefly describes the location and the proposed number and composition of the units and the rental rates to be charged.

If the proposal appears acceptable, the sponsor is advised to obtain architectural drawings and submit an application with fee.

2. The formal application which is submitted to the lending institution making the loan, should conform largely to the preapplication proposed and will indicate the financial ability of the sponsor to complete the project. The financial stability of the sponsor is later verified by receipt of a financial statement and a credit report.

3. Plans and specifications are routed through the architectural section for adequacy and the estimating of construction costs. A prevailing wage determination is obtained from the Labor Department. During this period of review the sponsor will submit a quantity and cost survey prepared by a recognized engineering firm. When considered architecturally acceptable, the case is routed to the valuation section.

4. The valuation section estimates obtainable rentals and operating expenses. Rental rates, including utilities, are also checked against established family incomes. Maximum rentals, including utilities, cannot exceed FHA's judgment of the effective market.

5. Debt service limitations usually control the mortgage amount. This is found by taking 90 percent of the estimated net annual income and dividing this amount by the debt service factor at the market rate of interest. The 10 percent of income not computed is to pay the 6 percent return on equity and to provide a residual fund necessary for all project operations.

6. The mortgage is also controlled by 90 percent of the estimated costs.

7. The mortgage credit section then processes the case as to statutory requirements and the financial capability of the sponsor, and the capability of the sponsor carry out effective management under the rent supplement program.

8. A commitment is then issued with the customary commitment fee payable within 30 days.

9. Between the issuance of the commitment and the initial closing, which usually takes place before start of construction, all legal forms are prepared by the attorney for the sponsor. These include such items as the building and loan agreement, trade breakdown for payment of advances, agreements to cost certify, regulatory agreements, etc.

A meeting is also held with the sponsor, builder, and others in which prevailing wage requirements and reporting are explained.

A determination is also made as to escrow requirements and any funds over and above the mortgage proceeds that may be required from the sponsor.

10. At initial closing the sponsor meets all cash requirements and usually draws mortgage funds for costs and fees advanced and for the land, if not used for equity purposes. The note and mortgage are executed at this closing and recorded.

11. After initial closing, the sponsor may start construction. In a few cases con-

struction may be started after issuance of the commitment, upon approval by the Commissioner, and at the risk of the sponsor.

12. Upon completion of the construction, and prior to final closing of the mortgage, the sponsor must certify all costs. These are reviewed by FHA. Statements of rental equipment must also be submitted. If the allowable costs are less than the mortgage amount, the mortgage is reduced accordingly. If the project shows an operating profit the amount may be applied toward amortization of the mortgage, as an offset against higher than estimated actual costs or placed in the reserve escrow account.

13. Under a regulatory agreement executed between the mortgagor (sponsor) and the FHA Commissioner, the FHA has continual supervision over the general operation of the project during the life of the mortgage.

Question. How does FHA process applications from a cooperative under its 221(d) (3) program?

Answer. Under FHA's program of mortgage insurance for cooperatives, applications may be initiated either by an already formed nonprofit cooperative organization, or by a sponsor who intends to assist in organizing a cooperative and ultimately to enable it to acquire the project. If the investor-sponsor fails to make the transfer to the cooperative so as to vest ownership in it, the investor-sponsor retains and operates it as a limited dividend rental project with a 90-percent mortgage ratio rather than the 100 percent allowed for nonprofit cooperatives (see section B above).

In the event the builder-sponsor does not succeed in transferring the project to a management-type cooperative, the builder-sponsor is limited to an annual cumulative return of 6 percent of an estimated 10 percent equity. The builder's fee is held in escrow until the project is transferred to a cooperative. Normal multifamily housing builder's fees are provided for except that in urban renewal areas a 10-percent builder's and sponsor's profit and risk allowance is applicable.

The processing procedures, typical of all FHA projects, are as follows:

1. A preapplication request is submitted by the sponsor to the local FHA insuring office. This briefly describes the location and the proposed number and composition of the units and the rental rates to be charged.

If the proposal appears acceptable, the sponsor is advised to obtain architectural drawings and submit an application with fee.

2. The formal application which is submitted by the lending institution making the loan should conform largely to the preapplication proposed and will indicate the financial ability of the sponsor to complete the project. The financial stability of the sponsor is later verified by receipt of a financial statement and a credit report.

3. Plans and specifications are routed through the architectural section for adequacy and the estimating of construction costs. A prevailing wage determination is obtained from the Labor Department. During this period of review the sponsor will submit a quantity and cost survey prepared by a recognized engineering firm. When considered architecturally acceptable, the case is routed to the valuation section.

4. The valuation section estimates obtainable carrying charges and operating expenses. Carrying charges, including utilities, are also checked against established family incomes. Estimated carrying charges, including utilities, cannot exceed FHA's judgment of the effective market.

5. Debt service limitations come into play only so as to limit the amount of mortgage proceeds available to an investor-sponsor prior to the time the project is transferred to a cooperative. This is found by taking 90 percent of the estimated net annual income and dividing this amount by the debt

service factor at the market rate of interest. The 10 percent of income not computed is to pay the 6 percent return on equity and to provide a residual fund necessary for all project operations.

6. The mortgage in management type cases is controlled by 100 percent of the estimated costs. A cooperative purchasing the project from an investor-sponsor is eligible for the same loan which is applicable to projects initiated on a management type basis.

7. The mortgage credit section then processes the case as to statutory requirements and the financial capability of the sponsor, and the capability of the sponsor to carry out effective management under the rent supplement program.

8. A commitment is then issued with the customary commitment fee payable within 30 days.

9. Between the issuance of the commitment and the initial closing, which usually takes place before start of construction, all legal forms are prepared by the attorney for the sponsor. These include such items as the building and loan agreement, trade breakdown for payment of advances, agreements to cost certify, regulatory agreements, etc.

A meeting is also held with the sponsor, builder and others in which prevailing wage requirements and reporting are explained.

A determination is also made as to escrow requirements and any funds over and above the mortgage proceeds that may be required from the sponsor.

10. Before closing a management type loan, it is normally required that 90 percent of the units be subscribed for by families within the prescribed income limits who are cleared by FHA credit processing as having the financial ability to meet the projected carrying charges. There might need to be some variation of this procedure under a rent supplement program. In investor-sponsor cases no sales are required prior to the start of construction.

11. At initial closing the sponsor meets all cash requirements and usually draws mortgage funds for costs and fees advanced and for the land, if not used for equity purposes. The note and mortgage are executed at this closing and recorded.

12. After initial closing, the sponsor may start construction. In a few cases construction may be started after issuance of the commitment, upon approval by the Commissioner, and at the risk of the sponsor.

13. Upon completion of the construction, and prior to final closing of the mortgage, the sponsor must certify all costs. These are reviewed by FHA. Statements of income must also be submitted. If the allowable costs are less than the mortgage amount, the mortgage is reduced accordingly. If the project shows an operating profit the amount may be applied toward amortization of the mortgage, as an offset against higher than estimated actual costs or placed in the reserve escrow account.

14. Under a regulatory agreement executed between the mortgagor (sponsor) and the FHA Commissioner, the FHA has continual supervision over the general operation of the project during the life of the mortgage.

Question. How will the proposed rent supplement program effect the procedures under the 221(d) (3) program?

Answer. (a) Reservation of rent supplement funds: In processing the loan application for mortgage insurance, FHA would negotiate with the project sponsor to determine the amount of funds which should be reserved for the rent supplement contract, under standards to be prescribed by the Administrator and from an allocation of funds for the area made by the Administrator to the FHA. These standards would be designed to assure that the project would provide a specified minimum number of rent supplement units for low-income families within the range of incomes established for the area. A formal reservation of funds for

the rent supplement contract would be made at or before the time that FHA issues its commitments to insure the mortgage on the project.

(b) Tenant selection: Tenant applicants who believe themselves to be eligible for rent supplement units would apply to the project sponsor who would decide whether the applicants were acceptable in the usual landlord-tenant selection relationship.

(c) Certification of tenants: Among tenant applicants found acceptable to the project sponsor, the eligibility of those applying for rent supplements would be established in accordance with standards and procedures to be established by the Administrator. The determination of eligibility for rent supplements would be delegated to a designated local agent of the Administrator, either an agency employee, or a competent outside group. The eligibility finding would be based on income and one of the following: (1) displaced by Government action; (2) 62 years of age or older; (3) physically handicapped; (4) occupant of substandard housing; (5) occupant of housing extensively damaged or destroyed as a result of a natural disaster.

For applicants who apply for lease-with-option to purchase as authorized by the bill, the income verification would be expanded, in accordance with guidelines to be provided by the Administrator, to assure selection of those applicants who give promise of upward income ability. This determination also would be delegated to a designated local agent of the Administrator.

Rent supplement contract: The amount of rent to be charged to each tenant eligible for a rent supplement as well as the amount of the rent supplement would then be calculated. The rent supplement would amount to the difference between 25 percent of certified tenants income and gross rent required for the unit. The aggregate of such rent supplement payments for the rent supplement units in the project would represent the rent supplement funds needed for the project. Based on this, a formal 40-year rent supplement contract would be negotiated between the project sponsor and the Administrator or his agent for the payment of rent supplements on behalf of the tenants.

Payments under rent supplement contract: The rent supplement contract would specify the maximum dollar amount to be paid, but the periodic payments to be made under the contract would be based on the actual amount of rent supplement payments required. The actual amount of payments required would be reduced as incomes of tenants increased, and other changes would be made when tenants move out and new tenants move in. Such payments would be subject to review and audit. The occupancy and condition of the dwelling units occupied by families on whose behalf rent supplements were paid would be checked by FHA in the course of normal annual inspections of properties covered by FHA-insured mortgages. It will be noted also that, as is customary with all FHA-multi-family projects, the rents for all units in the project would be initially approved by FHA and any subsequent rent increases would also have to be approved by FHA.

The procedure described above for the certification of income would be repeated at least every 2 years for all occupants, except the elderly. On the basis of the incomes thus recertified, the rent to be charged would be recomputed for each tenant (25 percent of income) and correspondingly the amount of the rent supplement payment (gross rent for the unit less rent charged to the tenant). For any tenant whose income increases to the point that 25 percent of his income is sufficient to pay the gross rent, the rent supplement payments with respect to that tenant would cease, but he could continue to occupy the unit by paying the full rent.

A similar procedure would be applied to lease-option cases. When the income of such a tenant increases so that 25 percent of his income is sufficient to enable him to purchase the unit, he would exercise his option to purchase and rent supplement payments would cease.

Question. How will the lease-with-option-to-purchase provision of the rent supplement program operate?

Answer. The lease-with-option-to-purchase part of the rent supplement program will make it possible for families, who have the potential to raise their incomes to the point where they can carry a modest home without subsidy, to rent the home at a price they can afford with their present incomes and exercise their option to purchase the home when they can afford, without assistance, to carry it.

Operation of lease-with-option-to-purchase program

Under the lease-with-option-to-purchase part of the rent supplement program, an eligible family would rent a detached, semi-detached, or row house in a project of such homes and rent supplements would be paid in the same manner as for rent supplement units in other projects. When the income of the family had increased sufficiently so that it could afford to pay the full rent, the rent supplements would be terminated and the family would purchase the unit it occupied with the aid of an FHA-insured section 221 home mortgage.

It is estimated that perhaps 20 percent of the units receiving rent supplements would be the lease-with-option-to-purchase type.

The families selected to occupy lease-with-option-to-purchase units will be those which give evidence of upward income mobility. This would include families where the head of the family has a skill or is improving his skills in such a manner that there is a probability of increased income.

A tenant moving into a lease-with-option-to-purchase unit will be advised beforehand that when his income rises to the point that he can exercise the purchase option, he will be expected to do so. If he does not exercise the option within a reasonable time after an adequate income level is reached, the sponsor could require him to vacate the unit.

No windfall to lease-with-option purchaser or owner of project

Neither the tenant under a lease-with-option-to-purchase arrangement, nor the project owner, will receive a windfall when the tenant exercises his option and purchases the unit with respect to which rent supplement payments have been made.

The Housing Agency contract with the owner-sponsor will require that the option to purchase give the tenant the right to buy at the FHA-appraised value of the unit at the time he exercises his option. If the FHA-appraised value and the sales price are greater than the outstanding balance in the original 221(d)(3) market-rate mortgage with respect to that unit, the amount by which the sales price exceeds the outstanding balance will be returned to the Federal Government.

In the usual case, the house will have depreciated in value approximately to the same extent that the original mortgage has been amortized and there would be no sales proceeds in excess of the outstanding mortgage balance.

In no event, would it be feasible to sell a unit for less than the outstanding mortgage balance since the sponsor would not be able to repay the debt secured by the unit if the sales price did not equal at least the outstanding balance.

Question. What has been the experience under FHA's 221(d)(3) below-market program. How many projects have there been, what has been their cost, and who have been their sponsors?

Answer. From the beginning of the section 221(d)(3) below-market interest rate program through March 1965, a total of 537 project applications were received involving 72,995 units with a mortgage amount of \$879,558,293. During this period, FHA insured commitments on 296 projects containing 39,371 units with a mortgage amount of \$465,739,285. Also, during this period, FHA insured 210 projects containing 29,967 units with a total mortgage amount of \$353,210,000.

The following table shows the average amount of mortgage allocable to dwelling units under the below-market rate program for 1962 and 1963:

Average amount of mortgage per dwelling unit	Percentage distribution of dwelling units	
	1963	1962
Less than \$8,000.....	0.4	9.4
\$8,000 to \$8,999.....	15.9	27.5
\$9,000 to \$9,999.....	27.5	6.1
\$10,000 to \$10,999.....	10.3	23.8
\$11,000 to \$11,999.....	13.5	33.7
\$12,000 to \$12,999.....	10.9	7.8
\$13,000 to \$13,999.....	15.6	1.3
\$14,000 to \$14,999.....	1.3	10.0
\$15,000 to \$15,999.....	4.6	7.9
\$16,000 to \$16,999.....		
\$17,000 to \$17,999.....		
\$18,000 to \$18,999.....		
Total.....	100.0	100.0
Median.....	\$10,601	\$11,317

Through June 1964 (the latest date for which figures are available), of 347 projects for which applications had been received: 137 were sponsored by limited dividend corporations; 95 by private nonprofit corporations or associations; 81 by management-type cooperatives; and 34 by investor sponsors.

(An investor sponsor is a special type of limited dividend corporation organized to build or rehabilitate a project and subsequently transfers it to a cooperative.)

The various types of nonprofit sponsors are nonprofit corporations, church groups, labor unions, foundations, associations, colleges, and local public agencies.

Question. How would per unit limitations be imposed under the rent supplement program?

Answer. The rent supplement program authorized by the bill would be limited to certain housing, low in cost and of modest design, constructed to standards prescribed by the Federal Housing Administration for families of moderate income.

The maximum mortgage limits under the section 221(d)(3) moderate-income housing program vary according to the number of bedrooms in each unit, as follows: \$8,000 per family unit without a bedroom, \$11,250 per family unit with one bedroom, \$13,500 per family unit with two bedrooms, and \$17,000 per family unit with three or more bedrooms. In the case of elevator projects, the limits are \$9,500, \$13,500, \$16,000, and \$20,000, respectively. The dollar limits per unit can be increased by not to exceed 45 percent in high cost areas.

However, rent supplement payment will be made only with respect to housing constructed in accordance with the standards that have been set for the existing section 221(d)(3) below-market interest rate moderate-income housing program. Under that program, the FHA cannot insure a mortgage if the rentals required to amortize the mortgage are greater than the rent that can be paid by a family whose income is less than the median income in the community. Mortgage limits for each community are restricted to the amount required to build in that community a garden-type project of modest standards that such a family can afford to rent. Elevator-type projects are permitted only if they can be built within the cost

limitations prescribed for garden-type projects.

In the 4 years that the section 221(d)(3) below-market interest rate program has been in operation, the average amount of a mortgage per unit under the program has been approximately \$12,500. If the rent supplement program had been in operation during this 4-year period, the average amount of a mortgage per unit under the program would have been about the same.

Question. How does the subsidy under the rent supplement compare to the subsidy under the public housing program?

Answer. The amount of the rent supplement payment that may be made on behalf of a particular family will never be greater than the amount of the subsidy that would be paid for that same family in a public housing unit. As to average costs, it is estimated that the average subsidy cost under rent supplements would run about \$40 a month per unit—the level of the subsidy for public housing units currently being built runs about \$58 a month per unit.

There are several reasons for the lower subsidy cost in the rent supplement programs. Land and construction costs in the rent supplement program would be less than in the public housing program. There will be available to sponsors of rent supplement projects a much wider range of selections of sites, including suburban and outlying land, and generally no clearance would be involved. In addition, certain special construction requirements that add to the cost of public housing would not apply to housing constructed under the rent supplement program.

Under the rent supplement program, the occupant would be required to pay 25 percent of his income for rent compared to the general 20 percent requirement under the public housing program.

These factors alone—lower land and construction costs and greater payments by occupants—will offset the advantages of low-interest rate loans through tax exemptions in

the public housing program. In addition, of course, the tax exemption accorded income on bonds issued in the public housing program involves a very substantial loss of revenue to the Treasury and this represents a cost that must be borne by other tax sources. It is estimated that the tax exemption of the income on public housing bonds now costs the Treasury \$48 million a year in revenues.

Finally, the local property tax exemption accorded public housing represents a very substantial local contribution and is also a part of the economic cost of public housing.

Question. What income limits would be established for tenants under the rent supplement program?

Answer. S. 2213 contains the Muskie amendment which makes clear that the rent supplement program would cover the same income group identified in the public housing law.

The only families eligible for rent supplement payments will be those who meet both of these requirements:

1. Have incomes below the maximum amount which can be established for occupancy in public housing under the Federal public housing law, the U.S. Housing Act of 1937, and

2. Are elderly, handicapped, displaced from their homes by governmental action, living in slums, or victims of natural disasters which have destroyed or damaged their homes.

DETERMINING THE STATUTORY MAXIMUM

As in the public housing program, the statutory maximum income a family may have and still receive a rent supplement will be determined in each area as follows:

1. A market analysis will be conducted to determine the rentals at which there are available a substantial supply of private decent, safe, and sanitary housing consisting of 1-, 2-, 3-, and 4-bedroom units for families of low income.

2. The statutory maximum income limit

will be established, for the corresponding sized unit in the rent supplement program at five times the rental determined by such market analysis (that is, a 20 percent rent-to-income ratio). However, in the case of housing other than for the elderly, handicapped, or displaced, the limit will be reduced by 20 percent to conform to the public housing law requirement that there be a 20 percent gap between upper rental limits in public housing for such persons and the lowest rentals in private housing.

For example, assume the market analysis for the area shows that \$80 per month is the lowest rental at which a substantial supply of private decent, safe, and sanitary 2-bedroom units is available in an area. The statutory maximum annual income limit for a family of the size that requires a 2-bedroom unit will be \$4,800 (5 times \$80 times 12 months) in the case of a unit for the elderly, handicapped, or displaced.

However, in the case of such a unit for an eligible tenant other than a tenant who is elderly, handicapped, or displaced, the statutory annual income limit for the tenant will be \$3,840 (\$4,800 minus 20 percent).

The statutory maximum income ceilings on a general city-by-city basis cannot be stated until a market analysis is done in each of the cities.

ADMINISTRATIVE LIMITATIONS WITHIN STATUTORY MAXIMUM

Consistent with its understanding of congressional intent, the Housing Agency, in administering the rent supplement programs, would impose administrative limitations upon the amount of income (within the statutory maximum) a family may have and still be eligible for a rent supplement.

Attached is a table setting out maximum income limits that would be imposed administratively in a sampling of 26 cities on the basis of preliminary estimates of rentals required to obtain private decent, safe, and sanitary housing units in these cities:

Preliminary estimates of income limits for families of different sizes under proposed rent supplement program in 26 cities

Cities	2 persons (1 bed- room)	3 or 4 per- sons (2 bedrooms)	5 or 6 per- sons (3 bedrooms)	7 or 8 per- sons (4 bedrooms)	Cities	2 persons (1 bed- room)	3 or 4 per- sons (2 bedrooms)	5 or 6 per- sons (3 bedrooms)	7 or 8 per- sons (4 bedrooms)

A SUMMARY OF THE MAIN PROVISIONS OF S. 2213 AS REPORTED BY THE SENATE BANKING AND CURRENCY COMMITTEE—"THE HOUSING AND URBAN DEVELOPMENT ACT OF 1965"

HOUSING FOR LOW-INCOME FAMILIES

By broadening existing programs and adding new ones, the bill would multiply many times the volume of good housing that can be provided for low-income families, including the elderly, the handicapped, and the displaced. The set of programs in this bill is estimated to provide some 750,000 units of housing for low-income needs in the next 4 years, compared to less than 200,000 in the past 4 years.

Here are the programs that will help to do this under this bill:

EXISTING PROGRAMS FOR LOW INCOME

Low-rent public housing: Provides for 60,000 low-rent public housing units a year—240,000 in 4 years—with an estimated 35,000 a year to be new construction, 15,000 to be bought and rehabilitated from existing housing, and 10,000 units to be leased for low-rent use from private owners. Bill would modify financing formula for public housing to adapt it to financing of existing housing.

FHA moderate-income housing (sec. 221 (d)(3)): This successful 1961 program to provide housing at below-market interest rates for low- and moderate-income families is continued, and the maximum interest rate is reduced to 3 percent to assure lower rents. Support for such FHA-insured mortgages through the Federal National Mortgage Association's special assistance is continued.

Direct loans, housing for the elderly and the handicapped: This active program for nonprofit housing for the elderly and handicapped of moderate means is extended with an additional \$150 million authorization, and the maximum interest rate is reduced to 3 percent.

NEW PROGRAMS FOR LOW INCOME

Rent supplements: This is a major new program to provide a large volume of private housing within the means of low-income families. It is expected to generate some 500,000 units of nonprofit, cooperative, or limited dividend housing over the next 4 years by attracting private capital into the

housing market for low-income families. With some half million families on the public housing waiting lists and some 6 million families with incomes below \$4,000 living in substandard housing, existing programs alone are not sufficient to make large-scale inroads on the problem.

Here is how the rent supplement program would operate:

How the housing is financed: The housing would be built by nonprofit, cooperative, or limited dividend sponsors under FHA's low-cost housing program (section 221) at regular market interest rates (currently 5½ percent plus one-half of 1 percent insurance premium). It would be subject to FHA's requirements in this program which assure that the housing is modest in cost.

Who is eligible: Only those families and individuals whose incomes are below the maximum that can be established for occupancy in public housing and who, in addition, are elderly, handicapped, displaced from their homes by governmental action, living in slums, and victims of disasters, are eligible for rent supplements.

What the rent supplement pays: Eligible tenants would pay 25 percent of their income toward the fair market rents established under the FHA. The rent supplement would pay any difference above that percentage. As family income rises, the supplement would be reduced, and when the family could pay the full rent, it could continue to live in the same unit without a supplement. If the housing is adapted for individual purchase, the family could also have an opportunity to buy it when its income permitted.

Size of the program: The bill would authorize \$50 million for rent supplement payments in the fiscal year 1966, and an additional \$50 million for each of the following 3 years, making a maximum of \$200 million in such annual rent supplements at the end of 4 years.

Experimental program: As an experiment, the bill would authorize a limited amount—up to 10 percent of the grants—to be used for rent supplements on housing provided under FHA's below-market interest rate program (section 221(d)(3)), FHA's housing for the elderly program (section 231), and

housing for the elderly built with direct Federal loans. Not more than 20 percent of the units in a project could have rent supplements under this experimental program.

Rehabilitation grants: The bill authorizes grants to enable low-income homeowners in urban renewal areas, whose homes are required by the urban renewal plan to be rehabilitated, to improve their homes and remain in them, rather than to compel them to leave and be relocated elsewhere. The Senate bill would authorize such grants up to \$1,500 for families whose incomes do not exceed \$3,000 a year or a lower amount, based on needs, for homeowners with higher incomes.

IMPROVING URBAN AREAS

Land acquisition and development: FHA would be authorized to insure mortgages to acquire and develop land for residential and related uses, provided such development is consistent with a comprehensive plan developed or being developed for the area. Improvements financed could include water and sewer facilities, roads, streets, sidewalks, and other site improvements. The intent is to encourage the provision of a large supply of properly planned and improved building sites, to small as well as large builders.

The FHA-insured mortgage could (1) cover up to 75 percent of the estimated value of the property when developed, or (2) 50 percent of the value before development plus 90 percent of the cost of the site improvements, whichever is less. The insured mortgage amount could not exceed \$10 million.

Grants for basic sewer and water facilities: Grants would be authorized to public bodies to finance up to 50 percent of the cost of expanding, enlarging, and improving basic public water and sewer facilities, in accordance with an areawide or comprehensive plan. Grants could not be used to finance ordinary repairs and maintenance of existing facilities. The bill authorizes \$700 million over a 4-year period for this purpose.

Grants for advance purchase of land for public facilities: Grants would be authorized to assist in financing the acquisition of sites to be used in future construction of public works and facilities. Such grants would be equal to the reasonable interest charges on loans for such land purchases up to the time

of construction, but for not more than 5 years. The Housing Administrator would require that construction of the facility would contribute to the economy, efficiency, and the comprehensively planned development of the area. The bill authorizes \$25 million annually for 4 years for this program.

Grants for neighborhood facilities: Grants would be authorized to local public bodies and agencies to help finance projects for neighborhood facilities, such as community or youth centers, health stations, or similar public buildings. Emphasis would be placed on projects which would support a community action program under the Economic Opportunity Act (antipoverty program), and to projects which are of special benefit to low-income families. Grants could cover up to two-thirds of the project cost, or 75 percent in areas approved under the Area Redevelopment Act. The bill provides an annual authorization of \$25 million for 4 years for such grants.

Grants for urban beautification and improvement: Matching grants would be authorized to assist localities in programs of beautification and improvement of open-space and other public lands. Programs could be included for example for such things as street landscaping, park improvements, tree planting, and upgrading of malls and squares. Ordinarily, grants could not exceed 50 percent of the cost over and above the average previous expenditures for such activities. There would, however, be a \$5 million demonstration grant program to encourage experimentation and innovation under which grants could cover up to two-thirds of the total cost.

Open-space land grants: Grants would be authorized to States and local agencies to cover up to 50 percent (an increase over the 20 to 30 percent now authorized) of the cost of acquiring and developing land for recreational, conservation and other public uses, in accordance with comprehensive area plans. The bill would also authorize the purchase and clearance of land in built-up areas for such open-space needs as parks, squares, playgrounds, and pedestrian malls. The authorization for open-space grants is increased from \$75 million to \$310 million, of which not more than \$64 million may be used for the new program in built-up urban areas and not more than \$36 million for the new aids for urban beautification and improvement. Relocation payments would be authorized in connection with these open-space and urban improvement programs.

URBAN RENEWAL

Title I projects: The bill increases the authorization for urban renewal grants by \$675 million on enactment, \$725 million on July 1, 1966, and by \$750 million on July 1 in each of the years 1967 and 1968.

It permits 40 percent of the amount of new capital grant authority to be used for nonresidential renewal in order to promote economic improvement.

The bill would authorize grants to localities to assist them in carrying out concentrated code enforcement programs. The grants could be up to two-thirds (three-fourths for towns of 50,000 or less) of the cost of code enforcement that exceeds the normal code enforcement program of a locality. It would also authorize two-thirds grants to cities and counties to cover the cost of demolition of unsound structures in renewal areas or on a planned neighborhood basis.

The bill increases urban renewal relocation adjustment payments to small businesses from \$1,500 to \$2,500, provides for Small Business Administration to underwrite rental leases for small businesses facing difficulty in financing reestablishment of business, and extends relocation provisions generally to those displaced by the urban mass transportation program.

PRIVATE HOUSING

The bill extends the FHA mortgage insurance authorization for another 4 years—under present law it would expire October 1, 1965. Extended also to the same date is FHA's low-cost housing program (section 221), including the below-market interest program, for which the maximum interest rate is reduced to 3 percent.

The bill increases the FHA property improvement loan (title I) maximum from \$3,500 to \$5,000, and the maximum term from 5 to 7 years.

It makes various improvements in the FHA programs, including higher cost limits for large units in rental housing, more liberal aid for rehabilitation in renewal areas, and higher mortgage limits (from \$20,000 to \$30,000) on insured mortgages for servicemen.

The bill provides progressive increases for the next 4 fiscal years in the FNMA's authority to purchase mortgages under its special assistance programs.

COLLEGE HOUSING

The bill increases the college housing loan authorization by \$110 million on enactment, by \$285 million on July 1 for the years 1966 and 1967, and by \$275 million on July 1, 1968, and makes clear that new colleges can qualify for loans.

RURAL HOUSING

The bill extends the rural housing programs to October 1, 1969.

It increases authority for grants for non-profit sponsors for low-rent housing for farm labor from \$10 million to \$50 million.

The bill provides a new rural housing insured loan program, authorizing \$300 million a year in insured loans for low- and moderate-income families, and for others above that level. It authorizes the FNMA to purchase mortgages insured under the new program in its secondary market operations.

The bill authorizes rural housing loans for purchase of previously occupied dwellings and structures and for suitable sites, in addition to new home construction.

SENATOR GORE MAKES A DISTINCT CONTRIBUTION

Mr. MANSFIELD. Mr. President, as the Senate knows I supported the proposed constitutional amendment providing for presidential inability and for succession to a vacancy in the vice-presidency. I did so because I was aware of the months of intense work which had gone into this measure on the part of the Senator from Indiana [Mr. BAYH], the Senator from Nebraska [Mr. HRUSKA], the distinguished minority leader [Mr. DIRKSEN], and other able Senators of the Judiciary Committee. I did so, too, because I recognize the immense difficulty in arriving at legislative language which will be completely agreeable to every member of a legislative body.

Nevertheless, I believe that the efforts of the distinguished Senator from Tennessee [Mr. GORE] to clarify certain language just prior to passage of the proposed amendment served a highly useful purpose. Even though he did not prevail, the Senator from Tennessee precipitated a debate on a highly significant aspect of the amendment which, on the part of the Senate at least makes very clear the intent.

So while I would point out again that while I did not go along with him in his opposition to final passage, I do respect his high motive and salute the public service which he performed. And, in

this connection, I am delighted to call to the attention of the Senate a lead editorial in the Nashville Banner of July 7 which recognizes and supports the purposes which the distinguished Senator from Tennessee [Mr. GORE] sought to achieve. I ask unanimous consent that the editorial previously referred to be included at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ON REPLACING A PRESIDENT—FORMULA OF CHANGE NEEDS PRECISE DEFINITION

Senator ALBERT GORE is right. Ambiguity (language subject to two or more possible interpretations) does not belong in any legislation. And it is dangerously defective when it relates to a statement of method for replacing a President, when, for any cause, he is incapacitated.

Nevertheless, the ambiguous language of the proposed "disability" amendment stands. The Senate approved it yesterday, and the House already had given it sanction. The responsibility of final decision now rests with the States—three-fourths of whose legislatures would have to ratify to make it effective.

Tennessee's senior Senator does not disagree with the necessity of a constitutional provision covering the question. Obviously the emergency situation to which this proposed solution is addressed could occur. A President can become unable to perform his official duties. In extreme, if hypothetical, cases, it could become necessary for somebody else to decide. Similarly, workable arrangements are in order for filling the Vice Presidency when by death or advancement that office is vacated.

The constitutional provision has been adequate in circumstances to date. The present effort is addressed to a situation not as yet encountered—and its authors are exploring new ground, to provide for any contingency. It is for that reason the more imperative that the steps be clearly spelled out, with no provisos conceivably subject to misconstruction.

Far from convincing is the counterargument, that once the amendment is adopted Congress can enact clarifying legislation to implement it. That is putting the cart before the horse. If the amendment is obscure, or imprecise in its wording, who is to say that legal specification born of it would necessarily be less so?

In being asked to ratify a structural change, bearing so directly on a fundamental point of top elective office, the States are entitled to an accurate picture of what is being proposed; not one possible of different interpretations.

This government of law has been blessed by clarity of purpose attesting to the ability of those drafting its Constitution, and those writing the laws based thereon, to state their meanings precisely.

Vagueness is not a virtue; and double-meanings can provide no safeguard in far-reaching legislation. Ambiguity does not belong in a proposed step of this magnitude. It could be redrawn to say exactly what it means. Senator GORE is right.

RADIO BROADCASTING

Mr. METCALF. Mr. President, radio broadcasting has given the American public many hours of entertainment, news and information. The early days of radio provided a common bond of communication between widely scattered parts of the Nation. I can recall the great fascination it held for me as a

small boy in western Montana, tuning across the dial to hear the great radio voices from east, west, north, and south.

Radio broadcasting has changed a great deal since those early struggling years. Not only has the radio spectrum become crowded with the signals from thousands of AM broadcast stations, the content of the radio programs has changed. I have often been frustrated in attempts to tune in on a good discussion program or an expanded recitation of the day's news developments. Instead I am bombarded with hour upon hour of so-called popular music. It appears that radio broadcasters, in an effort to dominate the ratings, have increasingly cast aside "talk" programs in favor of more music. In some instances, radio broadcasting, 1965, sounds like an automated jukebox.

There are many radio broadcasting stations in Montana which are living up to their public trust: to operate in the public convenience and necessity. These stations are doing an outstanding job of balanced programming.

They are providing a forum for discussion of issues important to the people of Montana.

Recently, during the 35th Institute for Education by Radio-Television at Ohio State University, M. S. Novik, radio consultant in New York City, deplored the lack of discussion programs on radio. His remarks clearly outline what has been allowed to happen on the airwaves and what the consequences may be.

I ask unanimous consent that his remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

RADIO—SOUND WITHOUT MEANING

(Remarks by M. S. Novik, radio consultant)

Technically speaking, radio is a lot of hardware. And that hardware has been making remarkable technical progress from the first crystal set to modern transistorized equipment. The only thing that has not kept pace with the technical advances is its intelligent use by the men who control it.

Instead of using the hardware to retain radio's lead as a medium of information, as a fountain of knowledge, programming has been going downhill, away from its once bright promise. As a result, radio has given up its dynamic role and abdicated its leadership to television. It has become a symbol of intellectual silence.

Indeed what's right with radio or wrong with radio is not in the hardware but in ourselves.

Once upon a time, a million years ago it seems now, there was an Edward R. Murrow, a Raymond Gram Swing, an Elmer Davis—men who made the world come alive through radio, who made continents neighbors to each other. These were no headline screamers. They were men who made us a part of their experience, who shared wisdom with us, so that all of us might share democracy with one another.

Once upon a time there was a "Town Meeting of the Air," when the American people flattered themselves with ideas, to be examined for what they were. Ideas, rather than jingles and slogans. There was still room enough—too much room, perhaps—for the soap operas, but at least there was some room some of the time for something else. The listener did have some sort of choice—if not all the time, some of the time.

How did radio get into its present sad state of programming? Partly because of panic over the competition of television; partly because of competition from a flood of new low-powered, low-cost local stations after World War II.

The battle of the ratings gave the format operator his first breakthrough. Program prestige went out of the window.

Instead of holding the line and improving the radio service, the big stations, the network stations capitulated; some more, some less, some all the way.

The disintegration of network radio in these critical times poses a serious problem not only for the radio industry, but for the Nation.

Look at the world we live in. Great questions of foreign policy are bedeviling the American people. What do we do about Vietnam? The recent teach-ins, the recent Washington debates on the subject have barely been touched on by radio, except for brief summaries.

Not only foreign affairs but also pressing domestic questions demand that we know what we are thinking, talking, and voting about. What about civil rights, unemployment, automation, the art of being a wise consumer, education to meet the rising demands of our society? All these great questions have, among our own people, great people who can discuss them intelligently. But they are not heard on radio.

Take the President's own statements on the crisis in Vietnam or at Santo Domingo, or on the domestic issues of our time that are involved in creating the Great Society. They, too, are summed up in quick headlines.

Radio has time for brief summaries, but no time for anything resembling real information. And this brings us to the all-important question: what is information?

Information is knowledge. It is both fact and opinion. It is the raw material for wisdom. It is not just a shouted headline torn from the teletype machine. It is not just 5 minutes of news on the hour. It is not just whether it's going to rain today or not, or how the traffic is on the bridge. It is, in short, the material men need if they are to make a nation work, especially a democratic nation.

We are a self-governing people. This high order of self-challenge demands that we be an informed people.

Broadcasters speak of radio's forthcoming \$1-billion-a-year income. Is this the ultimate proof of radio's viability? Crime pays three times as much, but you can't quite measure virtue this way. You can't say that you're rich, therefore you're right. It's not quite that simple.

How many radio stations, beginning, say, with the Kennedy-Nixon debates in 1960 and continuing to the current nationwide Vietnam discussions, have carried even portions of these great discussions, or any other discussions? Presidential press conferences, statements of world leaders, community problems presented in forum or debate, any of these?

Radio today has the opportunity, as well as the obligation, to become the medium it might be, it was planned to be long, long ago. For radio to say that television and the newspapers should be doing the informing is equivalent to saying that radio has no responsibilities in this direction. The law says otherwise, and it is high time that Congress and the FCC make sure that the law is clear.

Who was it who decided that none of the American people want anything but music and instant news on their radio sets? I don't know. How is it that a major law of the land, the Communications Act of 1934, can continue in existence if it is not enforced? Respect for law itself, and with it free institutions, depends upon equal treatment under law, enforcement of the law, and clarity of its

meaning. Who has exempted radio men from these truths?

Many of these same radio stations that offer only rock-and-roll and headlines; classical music and headlines, talk jockeys and headlines, or conversation and headlines, excluding all else, are owned by responsible networks, responsible newspapers, magazines, nonprofit institutions, and respectable corporations. Do these people realize these policies are contributing to radio's delinquency?

These station owners are public-spirited citizens, they serve their communities faithfully, they give generously to charity. But they fail their communities where they can best serve—by using their radio facilities to serve the public welfare.

They, of all people, should know that the fastest, quickest buck is not synonymous with the public interest, convenience, and necessity.

The United States is no longer in a position, and I don't think she ever was, to waste great natural resources. Radio is one of the greatest of these treasures.

Radio is not quite a private enterprise. It involves the use of limited frequencies that are available on the publicly owned airwaves. For this reason, the radio station owner is a licensee. He operates under privilege, not by right.

One reason why laws and governments are set up among men is to moderate self-interest in terms of a more generalized public interest, and necessity and convenience. A driver's license is a case in point: certain ground rules are posted under which we operate. But the ground rules for drivers are clearly stated; we even have signs and lights on highways to remind us of the laws.

Radio could use a touch or two of the same.

In 1934, Congress when it passed the Communications Act thought it had spelled out the rules of the airwaves. The rules of the highways made in 1934, are unworkable today, and they have been changed.

But not the rules of the airwaves—they haven't been updated. They've just been ignored. And, mind you, the usage of the airwaves has changed even more than the use of the highways. We now have FM, TV, pay-TV and now the flood of CATV. And it's the people—the public—that are the victims of today's airwave traffic jam.

It is no longer enough to say to the people that you can just turn off the set if you don't like it. The people who don't like radio today pay the same taxes and live in the same times as the people who walk the street with transistors to their heads. Thinking, talking, interested people have the same rights as others. You keep telling them to lump it and the lumps will end up in unexpected places. The public will not be damned indefinitely.

And what is it that the people want? They want, and this is so little, just a bit of time on radio—time to talk, to discuss, to argue, to debate, and to analyze. Is this so much to ask? Will this favor, if that is the word, impoverish the industry?

Too many stations simply have no room for what they call "talk" programs. They will not even sell 15 minutes or half an hour for a political campaign, whether local or national.

Where does this leave a political candidate? He can buy spot announcements. He may even have time for a recording of his own voice, delivering a 60-second commercial for himself.

Does this promote public information? Does this lead to a better understanding of the campaign issues? I doubt it.

Those of us who have been in broadcasting for a long time remember the course of the congressional debates on the Communications Act of 1934. No one in Congress—and very few outside of Congress—anticipated a

accept and use donations of funds, property, personal services, or facilities, (3) to acquire selected areas of lands or interests in lands by donation, acquisition with donated funds, devise, or exchange for acquired lands or public lands under his jurisdiction which he finds suitable for disposition, (4) to administer such lands or interests for experimental purposes, including the observation and manipulation of natural areas, and (5) to issue such regulations as he deems necessary with respect to the administration of such lands.

SEC. 4. Activities authorized by this Act may be carried out on lands under the jurisdiction or control of other departments or agencies of the Government only with the approval of the head of the department or agency concerned.

SEC. 5. The Secretary shall consult with and provide technical assistance to departments and agencies of the Government, and he is authorized to obtain from such departments and agencies such information, data, reports, advice, and assistance as he deems necessary or appropriate and which can reasonably be furnished by such departments and agencies in carrying out the purposes of this Act. Any Federal agency furnishing advice or assistance hereunder may expend its own funds for such purposes, with or without reimbursement by the Secretary.

SEC. 6. Nothing in this Act is intended to give, or shall be construed as giving, the Secretary any authority over any of the authorized programs of any other department or agency of the Government, or as repealing, modifying, restricting, or amending existing authorities or responsibilities that any department or agency may have with respect to the natural environment. The Secretary shall consult with the heads of such departments and agencies for the purpose of identifying and eliminating duplication of effort.

SEC. 7. (a) The Secretary is authorized to establish such advisory committees as he deems desirable for the purpose of rendering advice and submitting recommendations to him relating to the carrying out of the purposes of this Act. Such advisory committees shall render advice and submit recommendations to the Secretary upon his request and may submit recommendations to the Secretary at any time on their own initiative. The Secretary may designate employees of the Department of the Interior to serve as secretaries to the committees.

(b) Members of advisory committees appointed by the Secretary may receive not to exceed \$100 per day when engaged in the actual performance of their duties, in addition to reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties.

SEC. 8. The Secretary is authorized, pursuant to such terms and conditions as he deems desirable, to make grants to public and nonprofit private universities and colleges, as well as to museums and botanical and zoological gardens and other scientific or conservation organizations in the several States and possessions of the United States, for the purpose of training persons, including scientists, technicians, and teachers, needed in the field of ecology and related fields.

SEC. 9. The Secretary is authorized to participate in environmental research in surrounding oceans and in other countries in cooperation with appropriate departments or agencies of such countries or with coordinating international organizations if he determines that such activities will contribute to the objectives and purposes of this Act.

SEC. 10. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

HOUSING AND URBAN DEVELOPMENT ACT OF 1965—AMENDMENT

AMENDMENT NO. 346

Mr. TOWER submitted an amendment, intended to be proposed by him, to the bill (S. 2213) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, urban mass transportation, and community facilities, which was ordered to lie on the table and to be printed.

AMENDMENTS NOS. 347 AND 348

Mr. JAVITS submitted two amendments, intended to be proposed by him, to Senate bill 2213, supra, which were ordered to lie on the table and to be printed.

ADDITIONAL COSPONSORS OF BILLS

Mr. McCARTHY. Mr. President, I ask unanimous consent that the name of the Senator from Arkansas [Mr. FULBRIGHT] be added to the list of cosponsors of Senate Joint Resolution 85, the measure I introduced proposing a constitutional amendment relating to equal rights of men and women, and that his name be listed among the sponsors at the next printing of the bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McCARTHY. Mr. President, I also ask unanimous consent that the name of the Senator from Tennessee [Mr. STENNIS] be added to the list of cosponsors of S. 2143, the Great River Road bill, and that his name be listed among the sponsors at the next printing of the bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HARTKE. Mr. President, at the time I introduced S. 2228, a bill to correct inequities in the basic compensation of overseas teachers, I had hoped to ask unanimous consent that it might lie at the desk. However, I was unable to make the request and subsequently invited other Senators to express their interest with the intent of seeking unanimous consent.

I therefore now ask unanimous consent that the following Senators may be added to the bill as cosponsors: Mr. MAGNUSON, Mr. BOGGS, Mr. McGEE, Mr. McCARTHY, Mr. MOSS, Mr. NELSON, Mr. RIBICOFF, Mr. INOUE, Mr. RANDOLPH, Mr. MONDALE, Mr. CLARK, Mr. MORSE, Mr. TOWER, and Mr. JAVITS.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAYH. Mr. President, I ask unanimous consent that the names of the following Senators be added as cosponsors to S. 1861, which, as the distinguished Presiding Officer knows, is a comprehensive measure designed to provide additional assistance for areas suffering from major disasters: Mr. BOGGS, Mr. COOPER, Mr. FONG, Mr. MURPHY, Mr. MUSKIE, Mr. PEARSON, and Mr. ALLOTT.

The PRESIDENT pro tempore. Without objection, it is so ordered.

NOTICE CONCERNING NOMINATIONS BEFORE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Gerald D. O'Brien, of Maryland, to be an Assistant Commissioner of Patents, vice Horace B. Fay, Jr.

Richard A. Wahl, of Virginia, to be an Assistant Commissioner of Patents, vice Ezra Glaser.

Donald H. Fraser, of Georgia, to be U.S. attorney, southern district of Georgia, term of 4 years. (Reappointment.)

Thomas B. Mason, of Virginia, to be U.S. attorney, western district of Virginia, term of 4 years. (Reappointment.)

Edmund A. Nix, of Wisconsin, to be U.S. attorney, western district of Wisconsin, term of 4 years, vice Nathan S. Heffernan, resigned.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Tuesday, July 20, 1965, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearings which may be scheduled.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the House had passed the bill (S. 26) to authorize the Secretary of the Interior to acquire lands for, and to develop, operate, and maintain, the Golden Spike National Historic Site, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 17) to express the sense of Congress against the persecution of persons by Soviet Russia because of their religion, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H.R. 546. An act to authorize the Secretary of the Army to adjust the legislative jurisdiction exercised by the United States over lands within Camp McCoy Military Reservation, Wis.;

H.R. 722. An act to amend certain provisions of existing law concerning the relationship of the Coast and Geodetic Survey to the Army and Navy so they will apply with similar effect to the Air Force;

H.R. 725. An act to clarify the responsibility for marking of obstructions in navigable waters;

H.R. 728. An act to amend section 510 of the Merchant Marine Act, 1936;

H.R. 729. An act to amend section 510(a) (1) of the Merchant Marine Act, 1936;

H.R. 3037. An act to amend section 1485 of title 10, United States Code, relating to the transportation of remains of deceased dependents of members of the Armed Forces, and for other purposes;

H.R. 3957. An act to authorize establishment of the Fort Union Trading Post Na-

tional Historic Site, N. Dak. and Mont., and for other purposes;

H.R. 5034. An act to amend section 2575 (a) of title 10, United States Code, to authorize the disposition of lost, abandoned, or unclaimed personal property under certain conditions;

H.R. 5041. An act to provide for safety regulation of common carriers by pipeline under the jurisdiction of the Interstate Commerce Commission, and for other purposes;

H.R. 7779. An act to provide for the retirement of enlisted members of the Coast Guard Reserve;

H.R. 8030. An act to provide for the discontinuance of the Postal Savings System, and for other purposes;

H.R. 8095. An act to authorize travel and transportation allowances under certain circumstances for members of the uniformed services when ordered to make changes of permanent station while away from their permanent stations under orders, and for other purposes;

H.R. 8111. An act to establish the Herbert Hoover National Historical Site in the State of Iowa;

H.R. 8211. An act to amend title 37 of the United States Code to provide that a family separation allowance shall be paid to any member of a uniformed service assigned to Government quarters providing he is otherwise entitled to such separation allowance;

H.R. 8720. An act to amend the Organic Act of Guam to provide for the payment of legislative salaries and expenses by the government of Guam;

H.R. 8721. An act to amend the Revised Organic Act of the Virgin Islands to provide for the payment of legislative salaries and expenses by the government of the Virgin Islands;

H.R. 8761. An act to provide an increase in the retired pay of certain members of the former Lighthouse Service;

H.J. Res. 454. Joint resolution to provide for the development of Ellis Island as a part of the Statue of Liberty National Monument, and for other purposes; and

H.J. Res. 481. Joint resolution to amend the joint resolution of March 25, 1953, to expand the types of equipment furnished Members of the House of Representatives.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills:

S. 956. An act to amend the act entitled "An act to provide better facilities for the enforcement of the customs and immigration laws," to extend construction authority for facilities at Guam and the Virgin Islands of the United States (76 Stat. 87; 19 U.S.C. 68);

S. 998. An act to amend section 4 of the Fish and Wildlife Act of 1956 to authorize the Secretary of the Interior to make loans for the financing and refinancing of new and used fishing vessels, and to extend the term during which the Secretary can make fisheries loans under the act;

S. 1462. An act to authorize the Secretary of the Interior to contract with the Middle Rio Grande Conservancy District of New Mexico for the payment of operation and maintenance charges on certain Pueblo Indian funds; and

S. 2154. An act to amend the act establishing the United States-Puerto Rico Commission on the Status of Puerto Rico.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED

The following bills and joint resolutions were severally read twice by their titles and referred as indicated:

H.R. 546. An act to authorize the Secretary of the Army to adjust the legislative jurisdiction exercised by the United States over lands within Camp McCoy Military Reservation, Wis.;

H.R. 3037. An act to amend section 1485 of title 10, United States Code, relating to the transportation of remains of deceased dependents of members of the Armed Forces, and for other purposes;

H.R. 5034. An act to amend section 2575 (a) of title 10, United States Code, to authorize the disposition of lost, abandoned, or unclaimed personal property under certain conditions;

H.R. 8095. An act to authorize travel and transportation allowances under certain circumstances for members of the uniformed services when ordered to make changes of permanent station while away from their permanent stations under orders, and for other purposes; and

H.R. 8211. An act to amend title 37 of the United States Code to provide that a family separation allowance shall be paid to any member of a uniformed service assigned to Government quarters providing he is otherwise entitled to such separation allowance; to the Committee on the Armed Services.

H.R. 722. An act to amend certain provisions of existing law concerning the relationship of the Coast and Geodetic Survey to the Army and Navy so they will apply with similar effect to the Air Force;

H.R. 725. An act to clarify the responsibility for marking of obstructions in navigable waters;

H.R. 728. An act to amend section 510 of the Merchant Marine Act, 1936;

H.R. 729. An act to amend section 510 (a) (1) of the Merchant Marine Act, 1936;

H.R. 7779. An act to provide for the retirement of enlisted members of the Coast Guard Reserve; and

H.R. 8761. An act to provide an increase in the retired pay of certain members of the former Lighthouse Service, to the Committee on Commerce.

H.R. 3957. An act to authorize establishment of the Fort Union Trading Post National Historic Site, N. Dak. and Mont., and for other purposes;

H.R. 8111. An act to establish the Herbert Hoover National Historical Site in the State of Iowa;

H.R. 8720. An act to amend the Organic Act of Guam to provide for the payment of legislative salaries and expenses by the government of Guam;

H.R. 8721. An act to amend the Revised Organic Act of the Virgin Islands to provide for the payment of legislative salaries and expenses by the government of the Virgin Islands; and

H.J. Res. 454. Joint resolution to provide for the development of Ellis Island as a part of the Statue of Liberty National Monument, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 8030. An act to provide for the discontinuance of the Postal Savings System, and for other purposes; to the Committee on Post Office and Civil Service.

H.J. Res. 481. Joint resolution to amend the joint resolution of March 25, 1953, to expand the types of equipment furnished Members of the House of Representatives; to the Committee on Rules and Administration.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE APPENDIX

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the Appendix, as follows:

By Mr. CASE:

Article dealing with the abuse of diplomatic immunity by representatives of foreign governments in connection with violation of traffic laws, published in the New York Daily News on June 23.

elg

DEPARTMENT OF AGRICULTURE AND RELATED AGENCIES APPROPRIATIONS, 1966

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 409, House bill 8370.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 8370) making appropriations for the Department of Agriculture and related agencies for the fiscal year ending June 30, 1966, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

Mr. HOLLAND obtained the floor.

Mr. HOLLAND. Mr. President, I wish to yield briefly to the Senator from Iowa [Mr. MILLER], and then I shall be willing to yield to any other Senator who wishes to speak briefly; but we do have an extremely complicated bill ahead of us, and I should like to get started.

Mr. MILLER. Mr. President, I ask for the yeas and nays on passage of the bill.

The yeas and nays were ordered.

NATIONAL PUERTO RICAN DAY

Mr. JAVITS. Mr. President, I send to the desk, and ask unanimous consent that it may be appropriately referred, a joint resolution on behalf of my colleague [Mr. KENNEDY] and myself, designating July 25 of each year as Puerto Rican Day.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 97) designating July 25 of each year as "Puerto Rican Day in the United States of America," introduced by Mr. JAVITS (for himself and Mr. KENNEDY of New York), was received, read twice by its title, and referred to the Committee on the Judiciary.

Mr. JAVITS. Mr. President, the purpose of this joint resolution is to focus the attention of the Congress and the people of the United States on the strong bonds which exist between us and the people of Puerto Rico.

The Commonwealth of Puerto Rico is an island outpost of democracy in the Caribbean. It serves as a link between the mainland of the United States and our neighbors to the south. Sharing a common language and cultural background with large areas of Latin America, Puerto Rico is a channel through which we can work for increased intra-hemispheric understanding.

The island has often been called the "showcase of democracy." Its economic development is a testament to the strength and vitality of the private enterprise system when welcomed and en-

"Maximum car loading and tire selection"

"The original equipment 4-ply rated 2-ply tires are designed and thoroughly tested to meet all normal requirements of your vehicle and are adequate for occasional full-load service with the inflation pressures recommended above.

"Oversize optional tires are capable of greater load capacity. Their use is applicable to all models, particularly station wagons. These tires are recommended for continued full-load service.

"Full-load service of the car is (each passenger is considered 150 pounds):

"All models except station wagons and convertibles: 3 passengers front seat, 3 passengers rear seat, 200 pounds luggage, 1,100 pounds.

"Convertibles: 3 passengers front seat, 2 passengers rear seat, 300 pounds luggage, 1,050 pounds.

"Classic 6, 2-seat station wagons: 3 passengers front seat, 3 passengers rear seat, 300 pounds of luggage, 1,200 pounds.

"Classic 6, 3-seat station wagons: 3 passengers front seat, 3 passengers second seat, 2 passengers third seat, 100 pounds luggage, 1,300 pounds.

"Classic V-8, 2- and 3-seat station wagons: 3 passengers front seat, 3 passengers second seat, 400 pounds luggage or 2 passengers in third seat, and 100 pounds luggage, 1,300 pounds.

"NOTE.—Station wagon roof rack luggage should be limited to 150 pounds, evenly distributed, included in above capacity. When towing trailers, the allowable passenger and cargo load must be reduced by an amount equivalent to the trailer tongue load.

"For cars driven at sustained rates of high speed or on trips where above-average speeds or loads are maintained, tire pressures may be increased up to 30 pounds (cold before running.) The higher pressure will increase stability with some sacrifice of riding quality. The higher pressure will also improve fuel economy under all driving conditions, and is also recommended when hauling heavy loads. Continued use of higher pressures at light loads will adversely affect tread wear and ride.

"Check tires often for visible underinflation and for signs of uneven wear, which may indicate need for front-end alignment.

"In accordance with the diagram, rotating tires every 4,000 to 8,000 miles (normally) is recommended to assure longer overall tire life by equalizing wear.

"If no spare tire is used, move right to left front and follow balance of diagram." (Not printed in the RECORD.)

"Lifeguard safety tires"

"This special tire is standard equipment in sets of four tires on three-seat station wagons, optional on other models in sets of four or five tires. The single air valve automatically fills both the outer and inner air chambers at the same time. The inner chamber automatically receives a higher pressure of 40 pounds per square inch as the outer chamber is normally filled to 24 pounds per square inch.

"Each tire has a built-in spare tire. The outer tire is of premium-quality construction. The inner tire, which acts as a safety air chamber, has a honeycomb-patterned tread, plus a tube chamber. In the event of outer tire injury, causing pressure loss in the outer air chamber, the inner tire carries the load. In such event, the unique "safety signal," a built-in flat spot on the thread of the inner tire, will produce a thump or vibration warning the driver that repair service is required and to proceed at speeds under 40 miles per hour."

In reply to the second part of the question, we road test our tires under loaded conditions to ascertain satisfactory tread wear and tire fatigue life. Further tire fatigue tests are conducted in connection with our

normal vehicle tests over all types of roads, and include our tortuous proving ground cobblestone surfaces. Tires are also tested for high-speed performance, on test tracks at speeds substantially beyond legal speed limits in this country. These tests subject the tires to abusive treatment far in excess of that which may be encountered in general field operation. Additional tire tests are conducted to determine the satisfactory tire qualities with respect to: Handling (traction and cornering), steering response, stability, ride quality, noise characteristics.

In addition, our tire supplier companies also run laboratory and vehicular tests, and furnish us with these results to further substantiate our ultimate conclusions.

3. Question. How do you explain this discrepancy (regarding statement that some compact station wagons should be equipped with 8-ply instead of 2-ply tires), and what steps are taken by you to notify motorists that they may require much stronger tires than those you supply with new cars?

Answer. In answer to this question, we want to repeat a portion of the information supplied in our owners manual which is quoted as follows:

"MAXIMUM CAR LOADING AND TIRE SELECTION"

"The original equipment 4-ply rated 2-ply tires are designed and thoroughly tested to meet all normal requirements of your vehicle and are adequate for occasional full-load service with the inflation pressures recommended above.

"Oversize optional tires are capable of greater load capacity. Their use is applicable to all models, particularly station wagons. These tires are recommended for continued full-load service."

It should be pointed out that the purpose of offering optional oversize tires is not to increase the safety of the tire, but to assure the vehicle owner of increased tread life to cope with more severe operating conditions.

Question. What is your comment on the Goodyear tire recommendation to use an 8-ply tire? Is a 2-ply rated tire adequate equipment on your large station wagons when fully loaded and used for cross-country travel?

Answer. First, we believe there is a misunderstanding in this part of your question, in that you stated a 2-ply rated, rather than a 4-ply rated 2-ply tire.

Our 4-ply rated 2-ply tires are adequate for cross-country travel and high-speed travel, being within occasional full-load service usage, when inflated in accordance with recommendations outlined in the owners manual. Our Rambler owners manual also recommends the use of optional oversize tires for improved tread wear, where unusually heavy loads or continued high-speed operation is anticipated.

Original equipment tires used on American Motors cars will perform satisfactorily at highway speeds under full-load conditions for the full life of the tread. However, tread life will, of course, be reduced proportionate to the degree of such operation. It is our opinion that the oversize tires provide more overall benefits than the use of 8-ply rated tires.

4. Question. Do you feel that the present labels on automobile tires are adequate to enable a motorist to make an intelligent selection based on his anticipated needs?

Answer. Original equipment tires used on American Motors cars have the manufacturer's name, the tire size, the ply rating, and the tire designation molded on the side of the tire. With regard to our current suppliers, Goodyear's designation is "Power Cushion" and Goodrich's is "Silvertown." We recognize that in the aftermarket the motorist has available numerous brand names, as well as various tire designations, and we would believe it desirable to have such aftermarket tires designed as "original equipment quality."

The above identifications, we believe, adequately identify the quality level of our original equipment tires.

R. H. ISBRANDT.

LETTER SENT BY SENATOR NELSON ON JULY 12 TO THE PRESIDENTS OF FORD, GENERAL MOTORS, CHRYSLER, AND AMERICAN MOTORS

DEAR SIR: On June 7, 1965, I wrote to the four major American automobile manufacturers asking a series of questions on automobile tire safety. All of the manufacturers have answered the questions in that letter, and I have forwarded their replies to the Senate Commerce Committee which is considering my bill (S. 1643) to set up a national system of tire grading and labeling. I thank you for the courtesy and promptness of your reply.

At this time I would like to ask further questions growing out of this earlier exchange of correspondence.

As I stated in my earlier letter, expert testimony before the Federal Trade Commission and the Senate Commerce Committee has indicated that many new-car tires are seriously overloaded when the vehicles are filled to their designed capacity with passengers and luggage.

I think you will agree that your replies to my questions about this testimony have fully confirmed it. The automobile manufacturers concede that most new cars have tires which will not safely carry the full load of the car unless the tires are specially inflated. I think this is a shocking situation.

For example, American Motors, in reply to my June 10 letter, stated that: "Original equipment 4-ply rated 2-ply tires * * * are adequate for occasional full-load service with the inflation pressures recommended above."

This statement concedes that the vehicle as delivered is not adequate for full-load service unless the motorist takes special precaution to inflate his tires to high pressure. Secondly, it indicates that even after taking those precautions the tires are not adequate for more than occasional full-load service.

General Motors stated that its cars could safely carry a full load provided tire inflation was increased from 24 to 30 pounds. Ford stated that its 6-passenger sedan could carry a full load of six passengers and 200 pounds of luggage provided the tires were specially inflated from 24 to 32 pounds, and that a Ford station wagon could carry eight passengers and 100 pounds of luggage if the rear tires were inflated to 36 pounds. Chrysler did not answer in such detail, merely stating that tires were adequate to carry loads "provided they are properly maintained." However, I assume that the same requirement as to overinflation exists with Chrysler cars because they appear to use similar tires and to have similar weights when compared with their competitors.

I think it is both unrealistic and dangerous to expect the average American motorists to calculate the weight of their cars and passengers and their accessories to within 100 pounds, and then inflate and deflate their tires to handle such loads.

Furthermore, a Tire & Rim Association official tells me that the overinflation of tires carries serious risks and that tire pressures as high as some which you recommend—in order to carry a perfectly typical load—create the danger of blowouts.

Your own safety research shows that the tires on many of your cars cannot safely carry the people and the luggage for which the cars are designed without special inflation precautions. Why not correct this situation by supplying the next larger size of tire?

I think it would be much more satisfactory if the manufacturers corrected this situation. However, if it is not corrected, I think legislation is necessary and inevitable.

From my reading of the manuals and other literature which you and the other

automakers have supplied me as a result of my June 7 letter, it would appear that you are already prepared to supply fully adequate tires at prices ranging from \$15 to \$22 extra per car. This would be a very modest increase in the automobile price and would greatly increase highway safety for all.

In my letter of June 7, I asked whether the present labels on tires were adequate in order to enable motorists to make an intelligent selection. All of the automobile makers replied by stating that the tires supplied with their cars were adequately marked with the size and ply rating.

However, it was not indicated that the important matter of ply or ply rating is, in most cases, carried on the inner sidewall of the tire where it is invisible to an automobile customer—where he could not see it, in fact, without crawling under the car or removing the wheel.

Would you please advise me whether the placement of the ply rating on the inside of the tire was done at the request of the auto manufacturers or on the initiative of the tire manufacturers.

If the ply rating label is of any significance at all, it is difficult to understand why it should be placed in a position on the tire so as to be invisible to the customer. The natural assumption arises that it was so placed to conceal this important fact.

I thank you again for the information which you have provided.

Sincerely yours,

GAYLORD NELSON,
U.S. Senator.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent, the following additional routine business was transacted:

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed without amendment the bill (S. 571) for the relief of Denise Hojebane Barrood.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 559) to regulate the labeling of cigarettes, and for other purposes.

The message further announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 8439) to authorize certain construction at military installations, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. RIVERS of South Carolina, Mr. PHILBIN, Mr. HÉBERT, Mr. PRICE, Mr. FISHER, Mr. BATES, Mr. ARENDS, Mr. O'KONSKI, and Mr. BRAY were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 5401) to

amend the Interstate Commerce Act so as to strengthen and improve the national transportation system, and for other purposes; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. HARRIS, Mr. FRIEDEL, Mr. JARMAN, Mr. PICKLE, Mr. SPRINGER, Mr. DEVINE, and Mr. CUNNINGHAM were appointed managers on the part of the House at the conference.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 89. An act to authorize establishment of the Delaware Valley National Recreation Area, and for other purposes;

H.R. 242. An act to extend the apportionment requirement in the Civil Service Act of January 16, 1883, to temporary summer employment, and for other purposes;

H.R. 727. An act to provide for the administration of the Coast Guard Band;

H.R. 1044. An act to authorize the Secretary of the Navy to convey to the city of Norfolk, State of Virginia, certain lands in the city of Norfolk, State of Virginia, in exchange for certain other lands;

H.R. 2035. An act to provide for cost-of-living adjustments in star route contract prices;

H.R. 3320. An act to authorize the establishment of the Hubbell Trading Post National Historic Site, in the State of Arizona, and for other purposes;

H.R. 7466. An act to provide for the disposition of funds appropriated to pay judgments in favor of the Miami Indians of Indiana and Oklahoma, and for other purposes; and

H.R. 7595. An act to amend title 10, United States Code, to authorize transportation at Government expense for dependents accompanying members of the uniformed services at their posts of duty outside the United States, who require medical care not locally available.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles, and referred, as indicated:

H.R. 89. An act to authorize establishment of the Delaware Valley National Recreation Area, and for other purposes;

H.R. 3320. An act to authorize the establishment of the Hubbell Trading Post National Historical Site, in the State of Arizona, and for other purposes; and

H.R. 7466. An act to provide for the disposition of funds appropriated to pay judgments in favor of the Miami Indians of Indiana and Oklahoma, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 242. An act to extend the apportionment requirement in the Civil Service Act of January 16, 1883, to temporary summer employment, and for other purposes; and

H.R. 2035. An act to provide for cost-of-living adjustments in star route contract prices; to the Committee on Post Office and Civil Service.

H.R. 727. An act to provide for the administration of the Coast Guard Band; to the Committee on Commerce.

H.R. 1044. An act to authorize the Secretary of the Navy to convey to the city of Norfolk, State of Virginia, certain lands in the city of Norfolk, State of Virginia, in exchange for certain other lands; and

H.R. 7595. An act to amend title 10, United States Code, to authorize transportation at Government expense for dependents accompanying members of the uniformed services at their posts of duty outside the United States, who require medical care not locally available; to the Committee on Armed Services.

ADDITIONAL REPORT OF A COMMITTEE

The following additional report of a committee was submitted:

By Mr. LONG of Louisiana, from the Committee on Finance, with amendments:

H.R. 5768. An act to extend for an additional temporary period the existing suspension of duties on certain classifications of yarn of silk (Rept. No. 433).

HOUSING AND URBAN DEVELOPMENT ACT OF 1965—AMENDMENT

AMENDMENT NO. 349

Mr. MILLER (for himself and Mr. MORSE) submitted an amendment, intended to be proposed by them, jointly, to the bill (H.R. 7984) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development and to extend and amend laws relating to housing, urban renewal, and community facilities, which was ordered to lie on the table and to be printed.

AMENDMENTS NOS. 350 AND 351

Mr. MILLER submitted two amendments, intended to be proposed by him, to House bill 7984, supra, which were ordered to lie on the table and to be printed.

ADJOURNMENT

Mr. CASE. Mr. President, if there is no further business to come before the Senate, I move, pursuant to the order previously entered, that the Senate adjourn until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 8 o'clock and 3 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Wednesday, July 14, 1965, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate July 13 (legislative day of July 12), 1965:

CALIFORNIA DEBRIS COMMISSION

Brig. Gen. Ellis E. Wilhoit, Jr., Corps of Engineers, to be a member of the California Debris Commission, under the provisions of section 1 of the act of Congress approved March 1, 1893 (27 Stat. 507; 33 U.S.C. 661).

HIGHLIGHTS; Senate debated housing bill, including title on rural housing. Senate agreed to conference report on water resources development bill. Rep. Cabel praised USDA inspection services.

SENATE

1. HOUSING LOANS. Began debate on S. 2213, on housing and urban redevelopment, including a title on rural housing loans (pp. 16132, 16137-42, 16149-90). Sen. Kuchel submitted, but later withdrew, a proposed amendment to provide that the terms "rural" and "rural area" mean any area, open country, place, town, village, or city having a population of 5,500 inhabitants or less that is not part of or associated with an urban area, after Sen. Sparkman assured him that this question would be considered by the conference committee (p. 16172). Agreed to a unanimous-consent agreement by Sen. Mansfield to limit further debate on the bill and amendments beginning Thurs., July 15 (p. 16185).
2. WATER RESOURCES. Agreed to the conference report on S. 21, the proposed Water Resources Planning Act (pp. 16142-4). This bill will now be sent to the President. See Digest 123 for provisions of this bill.

Sens. Anderson, McGee, and Javits expressed concern over the water shortage in many parts of the Nation and inserted an article, "Special Report: A Nation Can Dry Up." pp. 16127-9, 16130-2, 16134-7

3. SALINE WATER. Conferees were appointed on S. 24, to expand, extend, and accelerate the saline water conversion program conducted by Interior (p. 16144). House conferees have not yet been appointed.
4. ELECTRIFICATION. Sen. Thurmond criticized Secretary of the Interior Udall's "attempt to block Duke Power Co. from constructing a proposed \$700 million power generating complex" in S. C., and inserted several items in support of his criticism. pp. 16190-5
5. WATERSHEDS. The Public Works Committee approved plans for works of improvement on the following watersheds: Cooper Creek, Ark.; Lower Little Tallapoosa River, Ga. and Ala.; Limestone Stream, Me.; Long Creek, Miss.; Tuscumbia River, Miss. and Tenn.; Grindstone-Lost-Muddy Creek, Mo.; Stewarts Creek-Lovills Creek, N. C. and Va.; Uncle John Creek, Okla.; Upper Elk Creek, Okla.; Wilson Spring Creek, Tenn.; Attoyac Bayou, Tex.; Castleman Creek, Tex.; Donahoe Creek, Tex.; and Ferron, Utah. pp. 16124-5
6. BUILDINGS. Sen. McNamara submitted a listing of public building prospectuses approved by the Public Works Committee. pp. 16123-4

HOUSE

7. INSPECTION SERVICES. Rep. Cabell praised the "highly valuable but little publicized" quarantine service of USDA stating that it "has saved consumers and the economy untold millions of dollars." p. 16252
8. FARM PROGRAM. Rep. MacGregor inserted an article, "The Back of Freeman's Hand," critical of the Secretary's "ridicule" of those who have "questioned Department proposals." pp. 16260-1
Rep. Findley called the farm bill the "most expensive...in the history of farm legislation" and inserted a 4-year breakdown of the estimated costs. pp. 16261-2
Rep. Purcell spoke in favor of the farm bill and said, "Let us not be fooled by any fraudulent 'bread tax' arguments against it." p. 16281
9. PERSONNEL. The Rules Committee reported a resolution for the consideration of H. R. 8469, to provide certain increases in annuities payable from the civil service retirement and disability fund. p. 16206
10. HIGHWAYS. The Public Works Committee reported with amendment H. R. 6790, to increase the limitation on emergency relief for the repair or reconstruction of highways under 23 U.S.C. 125 (H. Rept. 614). p. 16286
11. ATOMIC ENERGY; ELECTRIFICATION. The Rules Committee reported a resolution for the consideration of H. R. 8856, to amend the Atomic Energy Act to clarify the intent of Congress regarding regulation of the sale, generation, or transmission of electric power produced through the use of nuclear facilities licensed by the Atomic Energy Commission. pp. 16251-2
12. EDUCATION. The Education and Labor Committee was granted until midnight July 14 to file a report on H. R. 9567, the proposed Higher Education Act. p. 16252

In a program modeled on the highly successful agricultural experiment stations, the Federal Government will work with the States to set up water research departments in universities in all 50 States and Puerto Rico. While new knowledge about water is the major goal of the centers, they also are expected to add significantly to the Nation's grossly inadequate pool of scientific manpower in the water resources field.

"This is just a beginning," said Dr. Roland Renne, director of the new agency. "We can't expect impressive results right away, but you can't overestimate the importance of this program over the next few decades."

Scientists all over the country already are sending in suggestions for research projects, and a few show promise of making significant scientific contributions.

Joe R. Eagleman, an assistant professor of meteorology at the University of Kansas, for example, thinks he has found a way to check the amount of moisture in the soil at various depths by measuring the radio waves from commercial broadcasting stations. If his method works, it could give the farmer a quick, easy way to tell how much more water he had to add by irrigation.

THE QUEST FOR CLEAN WATER

When the Department of Health, Education and Welfare's water pollution control agency asked people, in a series of TV spot announcements, to write to "Clean Water, Washington, D.C.," 25,000 letters flooded in. Some people were so concerned about the problem they sent in dead fish and other unpleasant examples of the effects of pollution.

When the Office of Water Resources Research asked for research suggestions, every proposal from scientists in Ohio had to do with a single problem: pollution of streams by acids draining from abandoned mines.

Except for the two extremes of flood and drought, no problem concerned with water is more apparent than pollution. A filthy stream is an offense to sight and smell. A lake unfit for swimming, water skiing, or fishing is a dead loss.

By the time the Delaware River reaches Philadelphia, it has been estimated, its waters already have been used six times. The river, one critic said, is almost literally a part of the human alimentary canal.

Testifying before the Delaware River Basin Commission last week, Samuel S. Baxter, chief engineer for the Philadelphia Water Department, told how much water the city needed from the river and then added, proudly: "We put back in what we take out."

Recently, the skipper of a freighter unloaded a cargo at Cleveland and then started back down the Cuyahoga River. But without his load, the ship was riding too high in the water to go under a bridge across the river. It was suggested that he fill his tanks with river water so he could get under the bridge. He took one look at the dirty river—and ordered his crew to saw off the top of the mast.

Despite a sewage treatment plant that is highly efficient by present standards, the District of Columbia pours a steady stream of pollution into the Potomac River estuary. If methods of treatment are not drastically improved by the year 2000, when the area's population is expected to reach 5 million, the city will foul the river with the equivalent of the untreated sewage of a city of 250,000 persons.

But pollution is not always visible. So many industries in the Youngstown (Ohio) area use the Mahoning River for cooling that its summertime temperature has been measured at 105 degrees—too hot for most fish and virtually worthless for industry.

As population grows, and as the use of water grows even more rapidly, it is becoming increasingly apparent that the available water must be used over and over again before it reaches the sea or is lost by evapora-

tion. And although there still are technical—and financial—problems to be solved, it is now apparent that good water can be produced from raw sewage.

At Santee, in an arid area south of Los Angeles, people swim in water from a series of small lakes whose only source is the city's sewage treatment plant.

A new sewage treatment plant at Lake Tahoe in California produces water of drinking quality. But instead of being fed into the municipal water supply, it will be piped over the hill to help irrigate the farms in the area surrounding Reno.

To the scientists of the Public Health Service, water is no longer something to be taken free and pure from a sparkling stream or a crystal lake. Instead, it is a product to be manufactured, using some pretty unpleasant substances as the raw material.

If this manufacturing process is not completed in the sewage treatment plants of the cities upstream, it has to be finished in the water treatment plants of the downstream cities. A major—though still inadequate—effort is being made to improve sewage treatment facilities so more of the job will be done upstream.

But, it has been suggested, the only way to really force a city to make the ultimate improvements in its treatment facilities is to require it to put its sewage outflow line above its water intake pipe.

FRESH WATER FROM THE SEA

Ever since the first thirsty man stood at the edge of the sea and thought of all that water with not a drop to drink, the mind of man has been fascinated by the possibilities for extracting fresh water from the sea.

That dream is about to come true.

Before this decade is over, a large experimental plant should be operating in southern California, producing 50 million gallons a day. The cost will be high, but it will be competitive with the price Los Angeles will have to pay in the near future to import water for its expanding population.

With the strong backing of Presidents John F. Kennedy and Lyndon B. Johnson, the work of the 12-year-old Office of Saline Water has been vastly expanded in recent years. This year, it will spend \$22.5 million for research, development, and plant construction.

"The program is designed to advance the technology of water desalting so that within the next decade this developing technique will be a significant factor in meeting municipal and industrial requirements for high quality water on a local and regional basis, both in the United States and abroad," Secretary of the Interior Stewart L. Udell and Atomic Energy Commission Chairman Glenn Seaborg said in a report to the President.

Desalting plants could become an important source of supplementary water for major coastal cities. In the current drought, New York could take water from the ocean and Philadelphia wouldn't have to worry about the salt coming up the Delaware River if they each had desalting plants.

"Eventually, every major water utility may incorporate a desalting unit in its treatment plant," Frank C. DiLuzio, Director of the Office of Saline Water, recently told a Senate committee.

For years, desalting probably will remain only a supplement to some other system of water supply in most places because of cost. But in some areas, even the costly processes now available are worthwhile.

In Coalinga, Calif., most homes still have three water faucets. One is marked "hot," another "cold," and the third, "good." Until the city built a water desalting plant to treat the water it takes from the alkaline hills of the west side of California's San Joaquin Valley, the "good" water was trucked in at a cost of \$7.50 a thousand gallons.

Although the problems of Coalinga and Buckeye, Ariz., which also built a desalting plant recently, may be extreme they are not unusual. Of the 19,740 water supply systems in the United States, 1,099 have brackish water—with more salt than the Public Health Service considers permissible in drinking water. Of these, 30 provide water with 3 to 10 times more salt than the permissible level.

Hundreds of these communities might have good water for the first time if the price of desalting can be reduced to a reasonable level.

But DiLuzio also hopes that the techniques being worked out in OSW research may help improve sewage treatment and even provide a way to remove acid mine drainage from streams.

BIG DAMS AND LITTLE ONES

The two big boys in the big dam business are the Army's Corps of Engineers and the Interior Department's Bureau of Reclamation—but the biggest by far is the corps.

The corps budget this year is about \$1.3 billion—somewhat more than the entire Interior budget. Of this, it will spend about \$940 million in its civil works program for a vast variety of projects designed to control the Nation's water resources. It is now working to bring oceangoing ships to Tulsa, Okla. and to the foot of the Rockies at Lewiston, Idaho, and is, not surprisingly, the world's largest single user of concrete.

While the corps can go anywhere in the country that Congress sends it, the Bureau of Reclamation, which was formed in 1902 to "make the deserts bloom," is limited to the Western States, on the Pacific side of the 100th meridian.

While its budget is small (\$146.8 million this year) compared to that of the corps, the bureau has built some of the world's most spectacular and famous dams, including Hoover and Grand Coulee.

The two agencies, once rather notorious rivals, got together just after World War II to develop the Missouri River Basin project and they now find themselves frequently linked together as the "bad guys" when conservationists try to protect scenic damsites from the dam builders.

At the other extreme from the big dam builders is the Agriculture Department's Soil Conservation Service, which has helped farmers create 1,354,000 small ponds in the last 30 years and will spend more than \$98 million this year for small watershed development projects.

In addition, States and private industries have their own plans for dams and water development. California recently voted a \$1.1 billion bond issue to continue with its huge California water plan, designed to carry water nearly a thousand miles from the surplus areas of the north to the arid lands of the south.

THE WILD BLUE YONDER

If the dam building plans of the corps, the bureau, the States and the power companies sometimes seem overly ambitious, they all sink into insignificance beside the North America Water and Power Alliance (NAWAPA) proposed by the Ralph M. Parsons Co., one of the country's major engineering and construction firms.

At a cost of \$100 billion—far more than the cost of putting a man on the moon—the company proposes that water now going to waste in Alaska and northern Canada be diverted south to provide water for seven Provinces of Canada, 33 States in the United States, and the three northern States of Mexico.

The series of reservoirs, lakes, canals, and waterways would solve the problem of the dropping water level in the Great Lakes, provide a \$25 billion payroll, develop up to 150 million kilowatts of electricity, make it possible to sail across the continent—and pay

for itself in 50 years, according to the company proposal.

The plan captured the imagination of Senator Moss, who saw what the added water would do for his State of Utah and he held hearings on the proposal last fall. But in a Senate speech on July 1, he complained:

"There is not an agency in the Federal Government that has the authority or the means to evaluate this proposal in terms of the interest of the United States. All that we have been able to do so far is to assemble from various sources information on their water resources plans and programs and present them in a Senate committee print."

To solve this bureaucratic problem, he suggested turning the Interior Department into a department of natural resources in which all the Nation's efforts toward a solution of its water problems would be grouped under one Assistant Secretary for Water Resources.

But, as one hydrologist noted, if you start putting everything related to water in one place, soon you're got not only water but trees, people, livestock, soil, ships, weather, and the White House fountains in one agency.

When the Interior Department was asked how much it spends on water problems, it took a week to get the answer.

Altogether, the Government will spend about \$2.2 billion this year—nearly half a billion dollars less than the Senate Select Committee recommended on a very conservative basis should be spent each year before 1980.

But Federal spending on water problems may rise sharply in the next few years, with increases for grants for pollution control expected to go up in 1967 and with expected passage in the near future of the Water Resources Planning Act, which provides for orderly development of the Nation's river basins.

And as more people become aware of the country's water problems, there is certain to be increasing pressure on Congress for further action. As Di Luzio told a Senate committee recently:

"It is not always practical to attempt to assign a reasonable market value to water. One thing is absolutely clear—there is no water as expensive as no water."

Mr. MANSFIELD. Mr. President, is there any further morning business?

The PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate.

The PRESIDENT pro tempore. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 2213), to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, urban mass transportation, and community facilities.

The Senate resumed the consideration of the bill.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BASS in the chair). The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I ask unanimous consent that staff members of the Committee on Banking and Currency, both majority and minority, may be granted the privilege of the floor during the consideration of the housing bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I ask unanimous consent that the distinguished Senator from Ohio [Mr. Young] may, out of order, be permitted to speak for 4 minutes.

The PRESIDING OFFICER. Without objection, the Senator from Ohio is recognized for 4 minutes.

THEY DOWNGRADE OHIO STATE UNIVERSITY

Mr. YOUNG of Ohio. Mr. President, on July 8, the board of trustees of the Ohio State University voted to retain the infamous gag rule which has been in existence in that institution since 1951. The vote of the board of trustees was 5 to 3 in favor of retention of the gag rule. I commend the three members of the board of trustees who voted in the minority—Stanley C. Allyn, of Dayton; Jacob E. Davis, of Cincinnati; and Alan B. Loop, of Toledo—for their courageous stand in favor of academic freedom and freedom of speech. It is unfortunate that the majority on the board is still composed of those rightwing, arch-conservatives, who seem to yearn for the William McKinley era.

During the last few years, this speakers' ban rule has come under increased condemnation by students and faculty alike. As a result many outstanding professors and instructors in all fields of learning have left Ohio State University to teach at other colleges and universities where this policy does not exist. Likewise many fine students who might otherwise have attended Ohio State University have elected to enroll in one of the many other excellent State universities in Ohio. The prestige of Ohio State University and the morale of its faculty and student body are at an alltime low. Outstanding educators who might otherwise join the faculty of Ohio State University have made their decisions to go elsewhere.

It is unfortunate that Ohio State University, potentially one of the great centers of learning in our Nation and in the world, is at the mercy of a small group of anti-intellectual reactionaries who are fearful of the liberties guaranteed all Americans in the first amendment to our

constitution guaranteeing freedom of speech. Ohio State University is one of the very few universities in America still employing a speakers' ban rule. Even in the 1950's only eight universities instituted this undemocratic procedure.

I, along with other Ohioans, am proud of the fine colleges and universities in my State. Few States in the Union can match them in quantity and quality. We are proud of our graduates who have distinguished themselves in every field of endeavor in every part of the world. This has been true of Ohio State University, and we would like it to continue to be true. However, this cannot be the case if the board of trustees continues its detrimental, ultra-conservative policy. In fact, if the trustees persist in their stand, they risk the loss of the university of its formal accreditation.

Speaking for the majority on the board of trustees, former U.S. Senator John W. Bricker defended their action by saying:

Communists, Nazis, and Fascists and members of other subversive organizations and their supporters have no right to speak at a tax-supported State university for they are not free men and hence, are incapable of the objectivity which must attach itself to all speakers at a State university.

Mr. President, evidently former Senator Bricker would have us emulate the tactics used by Communists, Nazis, and Fascists who seek to crush by force those who disagree with their ideologies. All of us remember the book burnings of the Nazi era. The whole world knows that there is not a university, a college, or a school in the Communist bloc that permits freedom of expression or permits ideas to be expounded that differ from the official party line.

In any form of government, except in dictatorships of the extreme left and Fascist dictatorships, freedom of speech should be taken for granted. People should be free to criticize to challenge, to expose. There is an implied sense of weakness, and implied lack of confidence and evidence of fear, when citizens' minds are stifled. Fear of speaking our minds can do much more to harm our Nation than Communists or Fascists could ever hope to do. Communist and Fascists ideologies cannot stamp out our faith in human dignity, but fear can.

It may be dangerous to permit certain opinions to be expressed. It is more dangerous to suppress the expression of such opinions. To attempt to prevent and explosion in a boiler by sitting on the safety valve is obviously foolish.

Ideas cannot be exterminated with clubs; clubs only scatter them. Combat wrong opinions with right opinions; combat fallacies with facts.

I have confidence that our young people today have enough faith in our form of government and in our American way of life to reject any foreign ideologies, whether they be communism, fascism, or whatever. In attempting to withhold from them the right to hear the viewpoints of others, we do our young people a disservice. Surely, each generation should be entitled to know what it is we are struggling to preserve and what it is that threatens democracy in our time.

"There is not an agency in the Federal Government that has the authority or the means to evaluate this proposal in terms of the interest of the United States. All that we have been able to do so far is to assemble from various sources information on their water resources plans and programs and present them in a Senate committee print."

To solve this bureaucratic problem, he suggested turning the Interior Department into a department of natural resources in which all the Nation's efforts toward a solution of its water problems would be grouped under one assistant secretary for water resources.

But, as one hydrologist noted, if you start putting everything related to water in one place, soon you've got not only water but trees, people, livestock, soil, ships, weather and the White House fountains in one agency.

When the Interior Department was asked how much it spends on water problems, it took a week to get the answer.

Altogether, the Government will spend about \$2.2 billion this year—nearly 1/2 of a billion dollars less than the Senate Select Committee recommended on a very conservative basis should be spent each year before 1980.

But Federal spending on water problems may rise sharply in the next few years, with increases for grants for pollution control expected to go up in 1967 and with expected passage in the near future of the Water Resources Planning Act, which provides for orderly development of the Nation's river basins.

And as more people become aware of the country's water problems, there is certain to be increasing pressure on Congress for further action. As DiLuzio told a Senate committee recently:

"It is not always practical to attempt to assign a reasonable market value to water. One thing is absolutely clear—there is no water as expensive as no water."

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

The Senate resumed the consideration of the bill (S. 2213) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, urban mass transportation, and community facilities.

Mr. SPARKMAN. Mr. President, before we begin debate on the pending housing bill, S. 2213, I should first like to express my appreciation to members of the Housing Subcommittee and the full Committee of the Banking and Currency Committee for their cooperation and their patience and diligence in considering the many complex matters brought before us in writing this bill and getting it reported to the Senate. Commendation should also go to the staff for its contribution in analyzing and preparing the material for committee consideration.

The bill before us today is a comprehensive bill involving, in one way or another, all of the important programs of housing and urban development in which our Government is involved. It is a 4-year bill carrying all of the programs to October 1, 1969. It carries with it a heavy commitment by the Federal Government to help provide decent housing for needy

American families and to help the cities of our Nation provide a better living environment for their citizens.

I am satisfied that the bill before us is the best bill that we could expect to get out of the committee. As usual, of course, all members did not agree on all of its provisions and I personally have some reservations about some of the items.

The Housing Subcommittee started work on housing legislation back in March, holding 10 days of hearings on 16 bills pending at that time. Subsequent to the hearings, the Housing Subcommittee met in executive session on six different occasions at the conclusion of which recommendations were made to the full committee. The full committee met for 3 days in late June and reported S. 2213 on June 28 for consideration of the Senate.

The PRESIDING OFFICER. The Senator will suspend.

The Chair asks for order in the Chamber; and he is going to have it or the Senate is not going to do business.

The Senator from Alabama.

Mr. SPARKMAN. Mr. President, in general, the bill can be divided into three categories. First, those provisions that would establish new programs; second, those provisions that would continue existing programs either by extending dates, or by authorizing additional funds; and, third, those provisions that would amend and perfect existing programs.

The committee bill is a broad and complex one and is, in general, in keeping with the administration's proposals submitted to the Congress by the President in early March.

Briefly, S. 2213 contains new programs which would establish a new rent supplement program to assist in housing low-income families. Homeowners in urban renewal areas would be assisted through rehabilitation grants. The FHA would be authorized to institute a new insurance program for land development. Grants would be authorized to help finance water and sewer systems; also to finance neighborhood facilities for recreational and community service purposes. Relief would be provided for distressed mortgagors affected by the closing of military bases, and a new mortgage insurance program would be authorized for rural housing.

These are the outstanding new programs, but the bill contains many provisions which the committee believes will give the President the tools he needs to provide decent housing for our people.

I have a brief statement on the principal provisions of the bill, and I ask unanimous consent that it be printed at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

JULY 14, 1965.

SUMMARY OF PRINCIPAL PROVISIONS OF 1965 HOUSING LEGISLATION (S. 2213) AS REPORTED TO THE SENATE

I. NEW PROGRAMS

1. Rent supplements (sec. 101):

(a) To nonprofit, cooperative, or limited dividend sponsors of moderate cost housing financed at market interest rates.

(b) For low-income families (eligible for public housing) who are elderly, handicapped, displaced, victims of natural disaster or living in substandard housing.

(c) For an amount by which market rent exceeds 25 percent of tenants income.

(d) Up to a limit, as authorized by appropriation acts, of \$50 million a year prior to July 1, 1966, which amount would be increased by \$50 million on July 1 of 1966, 1967, and 1968.

(e) To sponsors of housing for the elderly (secs. 202 and 231) and below market 221 (d) (3) housing on an experimental basis up to 10 percent of appropriated funds.

2. Rehabilitation grants up to \$1,500 for low-income families in urban renewal areas (sec. 103).

3. Relief to distressed mortgagors affected by closing of Federal bases (sec. 107, 108).

4. FHA mortgage insurance for land development (sec. 201).

5. Grants for water and sewer facilities at 50 percent of cost—4-year authority, \$700 million (sec. 602).

6. Grants for neighborhood facilities at 66 2/3 percent of cost—4-year authority, \$200 million (sec. 603).

7. Grants to pay interest charges for advance acquisition of public works sites—4-year authority, \$100 million (sec. 604).

II. EXTENSION OF EXISTING PROGRAMS

Extend programs with 4-year authority as follows:

1. All FHA programs (sec. 202).

2. Urban renewal—\$2.9 billion (sec. 302).

3. Urban planning grants (sec. 701)—\$125 million (sec. 1001).

4. Open space grants—\$235 million (sec. 804).

5. Public housing—60,000 units a year (sec. 403).

6. College housing—\$955 million (sec. 501).

7. Housing for elderly—\$150 million (sec. 1004).

8. Public works planning (sec. 702)—\$50 million (sec. 1003).

9. Federal-State training—\$20 million (sec. 1002).

10. FNMA—\$1.625 billion (sec. 701).

11. Low-income housing demonstration program—\$5 million (sec. 1005).

12. Low-rent housing for domestic farm labor—\$40 million (sec. 905).

III. AMENDMENTS TO EXISTING LAW (SELECTED PROVISIONS)

1. Federal Housing Administration:

(a) Require FHA to establish procedures and approve technically suitable materials (sec. 211).

(b) Require community water and sewer facilities where feasible as prerequisite to FHA and VA assistance (sec. 212).

(c) Liberalize the terms for title I home improvement loans and require lenders to assume dealer responsibility (sec. 213).

2. Urban renewal:

(a) Increase nonresidential exception to 40 percent of new funds (in lieu of CBD provision) (sec. 303).

(b) Authorize direct grants to cities for two thirds of cost for demolition of unsafe structures and local code enforcement (sec. 305).

(c) Clarify 1954 Housing Act to authorize nonresidential urban renewal in the District of Columbia (sec. 307).

3. Low-rent housing:

(a) Authorize greater use of existing housing for low-rent public housing (sec. 402).

(b) Authorize sale of public housing to tenants (sec. 407).

4. FNMA: (a) extend FNMA's authority to sell participations and to act as servicing agent for all Government-held residential mortgages (sec. 702).

5. Open space land and urban beautification: (a) Extend grant authority to acquire

developed land and finance cost of beautification of parks and recreation areas, title VIII.

(b) Increase grant to 50 percent of cost, title VIII.

6. Repeal provision in Mass Transit Act which prohibits use of foreign-made manufactured articles (sec. 1010).

7. Institute new mortgage insurance program for rural housing by Department of Agriculture, title IX.

8. Institute new lease-guarantee program by SBA for small businesses displaced by urban renewal (sec. 1008).

9. Authorize FSLIC to require savings and loan associations to deposit up to 1 percent of savings as necessary for liquidity purposes (sec. 1013).

10. Lower maximum interest rate to 3 percent for housing for elderly (sec. 202), and housing for moderate-income families (sec. 221(d)(3), secs. 102, 105).

11. Authorize public facility loans for non-profit groups serving small communities or rural areas (sec. 1007).

Mr. SPARKMAN. Mr. President, it is obvious from this summary that S. 2213 is indeed a comprehensive and involved bill, and it would take too much time of the Senate to explain every phase of it. However, there are several important features which I believe need clarification.

RENT SUPPLEMENTS

First I should like to say something about rent supplements.

This provision represents the most far-reaching effort yet conceived to help private enterprise provide decent housing for low-income families.

The genesis of this legislation goes back to 1949 when, in the Housing Act of that year, a National Housing Policy was established which reads in part:

The general welfare and security of the Nation and the health and living standards of its people require * * * the realization as soon as feasible of the goal of a decent home and a suitable living environment for every American family.

Since 1949, a number of important steps have been taken to reach this goal. Each step has made a significant contribution, but, despite all, here in 1965—16 years later—we still have large numbers of American families living in slums and blight and under deplorable living conditions.

According to the latest census, 8½ million U.S. families live in substandard housing and, in some cities, as high as 30 percent live in slums and blighted neighborhoods. In rural areas, the Census Bureau reported that 3 million families live in deteriorating houses and another 1 million live in dilapidated houses.

In our great Nation, considering all of its resources of materials, manpower, and ingenuity, there is no excuse for these conditions.

The bill before us contains the tools which the committee believes will enable us to solve these housing problems.

Our existing programs, particularly the FHA and VA, have done a remarkable job in helping to provide homeownership and decent rental housing for the great majority of American families of middle and upper-middle income. In fact, 62 percent of our families are homeowners largely due to these programs.

The public housing program, established 28 years ago, has done a reasonably

good job in taking care of the low-income families, but it is not geared to do the whole job, and it has been obvious for some time that new programs would need to be developed to supplement the public housing program.

In 1961, the Congress approved a new FHA program for moderate-income families under section 221 of the National Housing Act. Many of us had high hopes that, by building enough moderate cost housing for middle-income families, existing lower cost housing would be released for the low-income families, thus solving both the middle-income and the low-income housing problems. As time went on and we could see that construction and land costs on the section 221(d)(3) programs were such as to limit the results to a much smaller income class, it was obvious that further action needed to be taken.

The rent supplement program was conceived to fill this need. As I said before, its purpose is to utilize all of the resources of private enterprise, in partnership with the Federal Government, to construct housing at prices that low-income families can afford. This would be accomplished through Federal payments made directly to nonprofit or limited dividend corporations or cooperatives on behalf of low-income tenants.

Rent supplement payments are not new. Such a plan has been advocated for years by certain industry groups. In fact, as early as 1936, witnesses appeared before the Congress advocating rent certificate payments as a substitute for public housing. The rent certificate plan was proposed on and off all through the years up to 1949, and lengthy debate took place on this in 1946 and 1949 on the floor of the Senate.

I have had a memorandum prepared for me on the history of rent certificates, and, without objection, I should like to place it in the RECORD at this point in my remarks.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

SUMMARY OF LEGISLATIVE HISTORY OF CONGRESSIONAL CONSIDERATION OF RENT CERTIFICATE PLANS

Over the period 1936 to 1949 a number of witnesses appeared before various congressional committees advocating a plan of rent certificates as a substitute for public housing for low-income families.

During the hearings preceding enactment of the U.S. Housing Act of 1937, the U.S. Building & Loan League advocated the use of rent relief and differential renting in connection with local administration of relief and public housing programs. The league's plan would have authorized annual contributions to be utilized at the discretion of public housing authorities to provide differential rents or rebates based on the needs and ability of tenant families to pay. Such rent relief would have been administered by the local public housing authorities in collaboration with Federal, State, and local relief authorities in areas where an approved program for safe and sanitary housing for the underprivileged had been established.

The Building & Loan League proposal was apparently based on a similar general plan put forth by the U.S. Chamber of Commerce Special Committee on Housing. The special committee's report suggested that "direct assistance to the family's rent" was the most effective method the Government could use

to find adequate shelter for families of the lowest income groups, and that such assistance should be provided like other forms of relief for such families by local relief agencies. In testifying on behalf of this proposal, the chairman of the chamber's special committee disagreed with the assumption that "the lowest income groups can be housed only in new housing." He stated that there was no essential relationship between slum clearance and the building of Government-subsidized new dwellings for the lowest-income groups and that such groups should instead move into acceptable, second-hand housing vacated by middle-income groups.

These proposals were rejected by the Senate Committee on Education and Labor in 1937. The report of the Senate committee stated:

"The committee is convinced that in dealing with the housing of families of low income, systematic low-rent housing should be substituted for relief. This procedure will be cheaper for the Government, more beneficial to business, and infinitely more desirable to those of our citizens who are now living in slums and blighted areas, both in urban and rural parts of the country."

Similar rent certificate proposals were made in 1943 by the National Association of Real Estate Boards and in 1944 by the Producers' Council. The NAREB proposal was presented in general terms and was substantially identical to the earlier proposals of the Building & Loan League and the chamber of commerce; that is, public assistance was to be given directly to families unable to pay economic rents; such assistance to be administered through local welfare boards in the form of rent certificates adjusted to the needs and requirements of the family.

The Producer's Council presented the first detailed rent certificate program:

1. A local housing board in each community would undertake to find suitable rental accommodations for particular relief families selected by the local government's welfare agency.

2. Such families would be selected from among the neediest in the community by individual case studies made by welfare workers.

3. Selection of properties for such families would be accomplished by inviting private owners to submit properties for approval.

4. Local housing boards would determine, for each family, the amount of rent required to house the family properly and would offer approved units of proper size and character to the family.

5. The amount of the subsidy would consist of the difference between the rent paid to landlord and the amount toward rent paid by the family. (Families whose incomes rise, after admission as tenants, to an amount which is 3½ times the rent of the quarters they occupy would be required to pay the entire rent and would thereafter not receive any assistance.)

6. Actual payment of rents would be in one of two ways, either by furnishing the money directly to the family or by having the housing board collect the family's share and pay the full rent to the landlord.

The Producer's Council plan was strongly objected to by representatives of social welfare agencies and housing groups during the hearings before the Taft Subcommittee on Housing and Urban Redevelopment in 1945. The objections of these organizations may be summarized as follows:

1. A large number of individuals would be added to the rolls of relief agencies, each bearing the stigma of the "relief client."

2. Local administration of rent certificate plans would be costly and complicated and would require greatly increased appropriations for additional staff and facilities.

3. The rent certificate plan would be more costly to taxpayers than the existing public housing programs.

4. A necessary new supply of housing would not be provided.

5. Substandard housing would not be eliminated.

The Taft subcommittee rejected the plan in its final report, stating its reasons as follows:

"It has been argued before the subcommittee that such families should be assisted by rent certificates just as grocery stamps have been furnished to needy families. The number of families entitled to rent certificates upon any such basis would be infinitely larger than those requiring other relief. It is not at all certain that such a plan would bring about improvement in the bad housing accommodations that now exist. In fact, the scheme might work to maintain the profitability of slum areas and, consequently, to retard their elimination. It would certainly require a detailed regulation of private rental quarters both as to condition and rent.

"While rejecting the proposal of rent relief as a solution for the housing difficulties of all low-income families, the subcommittee recognizes that rent relief will, to some extent, have to be given to families in special conditions of poverty or sickness that cannot even pay the rents for public housing."

The plan was discussed again in 1946 and 1949 on the floor of the Senate in the debates leading up to the enactment of the Housing Act of 1949. No arguments were advanced in favor of the plan on the floor. Senator ELLENDER opposed it because it would "most likely prove more expensive to the taxpayer" and because "wherever some such method has been tried in the past it has tended to result not in the subsidization of existing decent housing but in the actual subsidization of slum dwellings." Senator Taft opposed it because "The issuance of rent certificates would not insure the building of new houses or getting rid of slums * * * [It] simply would enable the landlords to obtain more money, and no one would build any new houses or any new rental housing in the hope that when built, there would be a sufficient number of people with rent certificates to rent it. So it seems to us that the rent certificate plan would not in any way accomplish the purpose. Furthermore it would be more expensive. It would cover more people but it would be more expensive because everyone whose income was less than a certain amount would be entitled to an equal division of the rent certificate."

— Mr. SPARKMAN. Mr. President, the rent supplement proposal was intensively discussed at the public hearings and at executive session of both the Housing Subcommittee and the full committee.

The committee amended the original language in several important respects, and I believe that the provision as reported is as good as we can expect to get in carrying out the intent of the committee that this program be utilized for low-income, ill-housed families, and elderly people.

It contains the following principal features:

HOUSING OWNER

Sponsors of projects would be private nonprofit or limited dividend organizations or cooperatives. Church groups sponsoring housing for the elderly will probably be the most common type of sponsor.

QUALIFIED TENANT FOR RENT SUPPLEMENTS

Payments would be limited to—

First. Elderly persons, handicapped persons, displaced persons, persons occupying substandard housing, or victims of a natural disaster.

Second. Those whose gross incomes are below the public housing admission ceiling as determined by Federal law.

Both of the above requirements must be met. There was some disagreement on the precise income level for eligibility. This was largely resolved by an amendment introduced by the Senator from Maine [Mr. MUSKIE] to limit eligibility to the same group eligible for public housing under the Federal law. To clarify this, I have a full explanation of the procedure for establishing income limits under the bill, and I ask unanimous consent that this explanation be placed in the RECORD at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

INCOME LIMITS UNDER RENT SUPPLEMENT PROGRAM (S. 2213)

S. 2213 contains the Muskie amendment which makes clear that the rent supplement program would cover the same income group identified in the public housing law.

The only families eligible for rent supplement payments will be those who meet both of these requirements:

(1) Have incomes below the maximum amount which can be established for occupancy in public housing under the Federal public housing law, the U.S. Housing Act of 1937, and

(2) Are elderly, handicapped, displaced from their homes by governmental action, living in slums, or victims of natural disasters which have destroyed or damaged their homes.

DETERMINING THE STATUTORY MAXIMUM

As in the public housing program, the statutory maximum income a family may have and still receive a rent supplement will be determined in each area as follows:

Preliminary estimates of income limits for families of different sizes under proposed rent supplement program in 26 cities

Cities	2 persons (1 bedroom)	3 or 4 persons (2 bedrooms)	5 or 6 persons (3 bedrooms)	7 or 8 persons (4 bedrooms)
Atlanta, Ga.	\$3,100	\$3,800	\$4,900	\$5,500
Bangor, Maine	3,400	4,300	4,800	5,700
Batavia, N. Y.	3,400	4,100	4,800	6,000
Boston, Mass.	4,400	4,800	5,300	6,000
Bridgeport, Conn.	4,100	4,600	4,800	5,300
Chicago, Ill.	4,300	5,000	5,800	6,500
Columbia, S.C.	3,400	3,700	4,600	5,000
Columbus, Ohio	3,700	3,900	4,600	4,900
Fresno, Calif.	3,900	4,400	5,100	6,100
Huntington, W. Va.	3,200	3,700	4,200	4,700
Jefferson City, Mo.	3,600	4,100	4,600	5,500
Kansas City, Mo.	3,600	4,100	4,800	5,500
Louisville, Ky.	3,700	4,300	5,600	6,200
Milwaukee, Wis.	3,600	4,100	4,600	6,000
Mobile, Ala.	3,900	4,000	4,600	5,100
Newark, N.J.	4,600	5,000	5,500	6,000
Providence, R.I.	3,200	3,700	4,300	4,800
Paterson, N.J.	4,300	4,800	5,300	5,800
Pittsburgh, Pa.	4,200	4,600	5,000	5,600
Port Arthur, Tex.	2,400	3,700	4,300	5,800
San Antonio, Tex.	3,300	3,700	4,400	4,800
St. Louis, Mo.	4,000	4,500	5,600	6,300
Terre Haute, Ind.	3,600	3,900	4,300	4,900
Toledo, Ohio	4,000	4,500	5,500	6,000
Waco, Tex.	3,400	3,700	4,600	5,800
Utica, N. Y.	2,900	3,700	4,500	5,300

(1) A market analysis will be conducted to determine the rentals at which there are available a substantial supply of private decent, safe, and sanitary housing consisting of 1-bedroom, 2-bedroom, 3-bedroom, and 4-bedroom units for families of low income.

(2) The statutory maximum income limit will be established, for the corresponding sized unit in the rent supplement program, at five times the rental determined by such market analysis (that is, a 20-percent rent-to-income ratio). However, in the case of housing other than for the elderly, handicapped, or displaced, the limit will be reduced by 20 percent to conform to the public housing law requirement that there be a "20 percent gap" between upper rental limits in public housing for such persons and the lowest rentals in private housing.

For example, assume the market analysis for the area shows that \$80 per month is the lowest rental at which a substantial supply of private decent, safe, and sanitary 2-bedroom units is available in an area. The statutory maximum annual income limit for a family of the size that requires a 2-bedroom unit will be \$4,800 (5 times \$80 times 12 months) in the case of a unit for the elderly, handicapped, or displaced.

However, in the case of such a unit for an eligible tenant other than a tenant who is elderly, handicapped, or displaced, the statutory annual income limit for the tenant will be \$3,840 (\$4,800 minus 20 percent).

The statutory maximum income ceilings on a general city-by-city basis cannot be stated until a market analysis is done in each of the cities.

ADMINISTRATIVE LIMITATIONS WITHIN STATUTORY MAXIMUM

Consistent with its understanding of congressional intent, the housing agency, in administering the rent supplement program, would impose administrative limitations upon the amount of income (within the statutory maximum) a family may have and still be eligible for a rent supplement.

Attached is a table setting out maximum income limits that would be imposed administratively in a sampling of 26 cities on the basis of preliminary estimates of rentals required to obtain private decent, safe, and sanitary housing units in these cities.

Public housing income limits for admission for families of different sizes in 24 cities ¹

Cities	2 persons (1 bedroom)	4 persons (2 bedrooms)	6 persons (3 bedrooms)	8 persons (4 bedrooms)
Atlanta, Ga.	\$3,000	\$3,200	\$3,500	\$3,500
Boston, Mass.	3,600	3,800	4,100	4,400
Bridgeport, Conn.	4,500	4,900	5,400	5,800
Chicago, Ill.	4,200	4,600	5,000	5,200
Columbia, S.C.	3,200	3,400	3,600	3,600
Columbus, Ohio	3,700	4,400	5,000	5,400
Fresno, Calif.	3,000	3,400	4,000	4,000
Huntington, W. Va.	2,700	2,900	3,200	3,200
Jefferson City, Mo.	3,200	4,000	4,300	4,500
Kansas City, Mo.	3,000	3,600	4,100	4,100
Louisville, Ky.	2,950	3,800	4,100	4,300
Milwaukee, Wis.	3,500	3,800	4,200	4,200
Mobile, Ala.	3,400	3,600	3,900	3,900
Newark, N.J.	4,200	4,560	4,920	5,280
Providence, R.I.	3,800	4,200	4,600	4,800
Paterson, N.J.	3,700	3,900	4,200	4,400
Pittsburgh, Pa.	4,000	4,400	4,600	4,800
Port Arthur, Tex.	2,500	3,000	3,300	3,300
San Antonio, Tex.	2,900	3,100	3,400	3,400
St. Louis, Mo.	3,700	4,400	4,900	4,900
Terre Haute, Ind.	3,800	4,400	4,800	5,100
Toledo, Ohio	4,000	4,400	4,800	5,400
Utica, N.Y.	4,000	4,400	4,800	5,000
Waco, Tex.	2,800	3,000	3,500	3,500

¹ Income limits established by local housing authorities are stated in terms of total family income less deductions and exemptions permitted by the local housing authorities. These deductions and exemptions from total family income vary from locality to locality. They include such items as payroll deductions for social security, unusual medical expenses, expenses of a serviceman living away from home, etc. They also include such exemptions as a flat \$100 per minor or dependent adult, some income exemptions for certain family members (in some cases, all income of secondary wage earners is excluded) and VA service-connected disability and death benefits.

Mr. SPARKMAN. Mr. President, attached to this statement is a table on preliminary estimates of income limits for families of different sizes under the proposed rent supplement program in 26 cities. These have been prepared by the Administrator of the Housing and Home Finance Agency based on information now available to him for these cities.

AMOUNT OF RENT PAYMENT

The amount of the rent supplement payment that could be paid on behalf of any family would not exceed the difference between the full rent for the dwelling unit it would occupy and 25 percent of the tenant's income, as determined by the Administrator pursuant to procedures and regulations established by him.

At present, under the public housing program, local housing authorities are permitted, and do, exempt certain income of minors and secondary wage earners, in computing the total family income upon which the rent charged is based. Similarly, in the rent supplement program, it is expected that the Administrator will establish procedures and regulations spelling out certain exemptions from gross family income for the purposes of determining the rent a family will pay. It is obvious that it is far more difficult for a man, wife, and three children to allocate 25 percent of gross family income for rent than it is, for example, for an elderly couple. It may, therefore, be desirable to establish exemptions from gross income for larger families, and the bill provides sufficient authority for the Administrator to do so.

Such exemptions, if any, would apply only to the requirement in the law that the tenant pay 25 percent of income. It is understood no such exemptions would be recognized in regard to family income for eligibility of a family for rent supplement payments.

COST OF DWELLING UNITS

The rent supplement program authorized by the bill would be limited to certain housing, low in cost and of modest design, constructed to standards prescribed by the Federal Housing Administration for families of moderate income.

AMENDMENT NO. 340

Mrs. NEUBERGER. Mr. President, will the Senator from Alabama yield?

Mr. SPARKMAN. I am glad to yield to the Senator from Oregon.

Mrs. NEUBERGER. I call up my amendment No. 340 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The legislative clerk proceeded to state the amendment.

Mrs. NEUBERGER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD at this point.

The amendment (No. 340) offered by Mrs. NEUBERGER is as follows:

S. 2213

REFINANCING OF HOUSING FOR ELDERLY PROJECTS

SEC. 214. Section 231(c)(7) of the National Housing Act is amended by striking out "with 50 per centum" and inserting in lieu thereof "or involves the refinancing of a mortgage covering an existing property or project in which it has been determined by the Commissioner that such refinancing is necessary or desirable in order to avoid hardship for elderly or handicapped persons or families who are tenants or prospective tenants of such project: *Provided*, That, in either case, such property or project shall contain 50 per centum."

Mrs. NEUBERGER. Before I comment on my brief amendment, I should like to take this opportunity to pay tribute to the Senator from Alabama on whose committee I serve and whom I think of as "Mr. Housing." Since I have been a member of the committee, I find that I am in sympathy with his approach and his generous attitude on providing the public housing which is so sorely needed in this country.

The Senator from Alabama knows the subject of housing legislation forward and backward. It was always a pleasure to work with him on preparation of the bill.

I come somewhat as a supplicant with my amendment because of an unusual hardship case in the State of Oregon regarding a retirement home.

Let me make it clear to the Senate that this home is not poorly financed or ill-conceived but is very well planned. A group of elderly citizens who tried, on their own, to provide for their retirement years, have constructed approximately 400 units into which most of these elderly citizens have invested their life savings. It was planned on the basis that they would be exempt from certain real estate taxes, as is true in many of the States with retirement homes.

Suddenly, their well laid plans "gang aft a-gley."

The best relief I can find for these senior citizens is to ask the Senator from Alabama to accept the amendment that was introduced in the House, and accepted there, which would be a genuine relief program in providing that these persons would receive FHA financing to save their investment in the retirement home.

Mr. President, the amendment would authorize FHA insurance for refinancing existing housing for the elderly where it is determined by the Commissioner that such refinancing is necessary or desirable to avoid hardship for elderly or handicapped persons.

Briefly, the circumstances which occasioned the need for this amendment involve the Rouge Valley Manor, a retirement home in Medford, Oreg., with just under 400 units. At the time of construction, this nonprofit corporation, and others in Oregon, justifiably assumed that they would be exempt from real property taxes under Oregon law as are similar projects in many other States. Their financing was, therefore, planned accordingly. A subsequent Oregon Supreme Court decision disabused them of this assumption and held that they would have to pay real property taxes. They are now faced with a back tax liability of just under \$500,000 in addition to payment of a short-term loan and mortgage and are facing a tax foreclosure proceeding in August.

While this amendment would not add any new units, it would provide the tool which would prevent the loss of almost 400 units already in existence. With long-term financing and the renegotiation of care contracts and loans from residents, it appears that all of their obligations can be met. An FHA guarantee is available for new construction and for refinancing housing for the elderly where the initial financing was through FHA. It seems incongruous not to make the FHA guarantee available to prevent the loss of housing where the project is otherwise sound and the loan has a reasonable chance of repayment simply because the institution was originally funded privately. This amendment closes this gap and I urge its adoption.

I could not serve that especial situation here, and I wish that the Senator could see fit to accept the amendment to ease a situation which I did not know about while the committee was considering the bill.

Mr. SPARKMAN. First, let me express my appreciation to the very able

Senator from Oregon, who is a valuable member of our Banking and Currency Committee, for the remarks which she has just made. Frankly, I must say that the proposal comes to me completely cold.

Mrs. NEUBERGER. Yes; I know that.

Mr. SPARKMAN. I wish to be helpful, and I know that the Senator from Oregon believes me. I am sure that the committee also wishes to be helpful. However, I am so completely unfamiliar with the facts relative to the case that I wonder whether the Senator would not be willing to have it taken to conference—it is already in the House bill—and rely upon my promise to be as sympathetic in conference as the facts will allow me to be, and let us keep it at the stage where at least we can do some further work on it if that should be necessary.

The Senator realizes that if we accept the amendment, then our hands would be tied and it would not go to conference. I should like to take it to conference, because then we can get at the facts and study them, and perhaps receive more information from the Senator from Oregon and work it out with the House conferees.

I am sure that the Senator from Texas [Mr. TOWER] would agree with me that we would be sympathetic to the amendment. I am sure that the Senator from Texas knows more about it than I do.

Mr. TOWER. Mr. President, will the Senator from Alabama yield?

Mr. SPARKMAN. I yield.

Mr. TOWER. Let me say that I associate myself with the position of the Senator from Alabama on this matter, and would like to supplement his pledge with mine that I would be very much inclined to be sympathetic, too, in conference and, therefore, would subscribe to the position of the Senator from Alabama.

Mrs. NEUBERGER. I appreciate those remarks. I know how sympathetic the two Senators would be.

Let me reiterate that adoption of the amendment would not be bailing out anyone. It is just an unfortunate situation which has suddenly arisen. This retirement home is not poorly financed or ill-conceived. It was really getting caught in a bind with the State of Oregon concerning the financing plan. I am sure that my colleague, Mr. MORSE, would agree with me on that.

Mr. MORSE. Mr. President, will the Senator from Alabama yield?

Mr. SPARKMAN. I yield.

Mr. MORSE. Let me say to the Senator from Alabama that I completely associate myself with the position taken by my colleague [Mrs. NEUBERGER]. This is an equitable and a fair amendment. We are not asking for any special consideration. We are simply asking the committee to do equity based on the facts which my colleague has presented.

The Senator from Alabama expresses his sympathetic interest, which is very much appreciated. I hope that in conference, if we can supply any additional information in support of the amendment, the Senator will feel free to call upon us.

Mr. SPARKMAN. I certainly shall do that. If the Senator from Oregon [Mrs. NEUBERGER] would withhold her amendment for the time being, it will be taken to conference and will give us the opportunity to take a good look at it.

Mrs. NEUBERGER. Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. SPARKMAN. Mr. President, under existing law, ceilings on the mortgage amount under section 221(d)(3) housing vary from \$8,000 per unit without a bedroom to \$17,000 per unit with three or more bedrooms. Elevator apartment units may have higher ceilings up to \$20,000 for a three-bedroom unit. On top of this, dollar ceilings may be increased by 45 percent in high cost areas. It is possible therefore to have a \$29,000 maximum in some high cost areas.

However, rent supplement payment will be made only with respect to housing constructed in accordance with the standards that have been met for the existing section 221(d)(3) below-market interest rate, moderate-income housing program. Under that program, the FHA cannot insure a mortgage if the rentals required to amortize the mortgage are greater than the rent that can be paid by a family whose income is less than the median income in the community. Mortgage limits for each community are restricted to the amount required to build in that community a garden-type project of modest standards that such a family can afford to rent. Elevator-type projects are permitted only if they can be built within the cost limitations prescribed for garden-type projects.

In the 4 years that the section 221(d)(3) below-market interest rate program has been in operation, the average amount of a mortgage per unit under the program has been approximately \$12,500. If the rent supplement program had been in operation during this 4-year period, the average amount of a mortgage per unit under the program would have been about the same.

SUBSIDY UNDER RENT SUPPLEMENT COMPARED WITH PUBLIC HOUSING

The amount of the rent supplement payment that may be made on behalf of a particular family will never be greater than the amount of the subsidy that would be paid for that same family in a newly built public housing unit of comparable size. As to average costs, it is estimated that the average subsidy cost under rent supplements would run about \$40 a month per unit—the level of the subsidy for public housing units currently being built runs about \$58 a month per unit.

There are several reasons for the lower subsidy cost in the rent supplement program. Land and construction costs in the rent supplement program would be less than in the public housing program. There will be available to sponsors of rent supplement projects a much wider range of selections of sites, including suburban and outlying land, and generally no clearance would be involved. In addition, certain special construction requirements that add to the cost of pub-

lic housing would not apply to housing constructed under the rent supplement program.

Under the rent supplement program, the occupant would be required to pay 25 percent of his income for rent compared to the general 20-percent requirement under the public housing program.

These factors alone—lower land and construction costs and greater payments by occupants—will offset the advantages of low-interest rate loans through tax exemptions in the public housing program. In addition, of course, the tax exemption accorded income on bonds issued in the public housing program involves a very substantial loss of revenue to the Treasury and this represents a cost that must be borne by other tax sources. It is estimated that the tax exemption of the income on public housing bonds now costs the Treasury \$48 million a year in revenues.

Finally, the local property tax exemption accorded public housing represents a very substantial local contribution and is also a part of the economic cost of public housing.

LEASE WITH OPTION TO PURCHASE

The lease-with-option-to-purchase part of the rent supplement program will make it possible for families, who have the potential to raise their incomes to the point where they can carry a modest home without subsidy, to rent the home at a price they can afford with their present incomes and exercise their option to purchase the home when they can afford, without assistance, to carry it.

OPERATION OF LEASE-WITH-OPTION-TO-PURCHASE PROGRAM

Under the lease-with-option-to-purchase part of the rent supplement program, an eligible family would rent a detached, semidetached, or row house in a project of such homes, and rent supplements would be paid in the same manner as for rent supplement units in other projects. When the income of the family had increased sufficiently so that it could afford to pay the full rent, the rent supplements would be terminated and the family would purchase the unit it occupied with the aid of an FHA-insured section 221 home mortgage.

It is estimated that perhaps 20 percent of the units receiving rent supplements would be the lease-with-option-to-purchase type.

NO WINDFALL TO LEASE-WITH-OPTION PURCHASER OR OWNER OF PROJECT

Neither the tenant under a lease-with-option-to-purchase arrangement, nor the project owner, will receive a windfall when the tenant exercises his option and purchases the unit with respect to which rent supplement payments have been made.

The Housing Agency contract with the owner-sponsor will require that the option to purchase give the tenant the right to buy at the FHA-appraised value of the unit at the time he exercises his option. If the FHA-appraised value and the sales price are greater than the outstanding balance in the original 221(d)(3) market-rate mortgage with respect to that unit, the amount by which the

sales price exceeds the outstanding balance will be returned to the Federal Government.

In the usual case, the house will have depreciated in value approximately to the same extent that the original mortgage has been amortized and there would be no sales proceeds in excess of the outstanding mortgage balance.

In no event, would it be feasible to sell a unit for less than the outstanding mortgage balance since the sponsor would not be able to repay the debt secured by the unit if the sales price did not equal at least the outstanding balance.

DEVELOPMENT OF THE NATION'S NATURAL RESOURCES—CONFERENCE REPORT

Mr. ANDERSON. Madam President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 21) to provide for the optimum development of the Nation's natural resources through the coordinated planning of water and related land resources, through the establishment of a water resources council and river basin commissions, and by providing financial assistance to the States in order to increase State participation in such planning. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER (Mrs. NEUBERGER in the chair). The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of July 8, 1965, pp. 15406-15409, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. ANDERSON. Madam President, today the President of the United States issued a statement pointing out that the water resources of this country need to be mobilized, both in the East and in the West, and stating further that the Water Resources Council, of which Secretary of the Interior Stewart L. Udall is Chairman, will be convened immediately, together with the officials of Federal agencies concerned with water resources "to assess what further actions might be taken to assist the States in meeting the problems now confronting the New England and Middle Atlantic region."

The bill has been before Congress for more than 4 years. The Senate passed it at one time, but the House did not act on it. Now the House has acted on it. There was a difference between the Senate and the House which related to compacts between various groups. That problem has been solved.

I should like to have the attention of the Senator from California and the Senator from Arizona, because they are both interested in this type of legislation. We hope to have it passed in short order.

Mr. TOWER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. TOWER. Madam President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDERSON. Madam President, the conference report provides for the optimum development of the Nation's natural resources through the coordinated planning of water and related land resources, through the establishment of a water resources council and river basin commissions, and by providing financial assistance to the States in order to increase State participation in such planning.

The conferees met and discussed the subject fully. The conference report is signed by all conferees on both sides of the aisle. I hope it may be adopted promptly. I understand that some Senators desire to ask questions. I hope they may be dealt with promptly.

Mr. KUCHEL. Madam President, the purpose of S. 21, to provide for the development of the Nation's natural resources, in the text now before us in the conference report, is of course an admirable and laudable one.

I believe it is fair to say that it is designed to encourage the prudent and reasonable development of the Nation's water and related land resources through comprehensive and coordinated planning in which the governments of our several States would participate.

I ask Senators to listen carefully to my remarks because I want some confirmation of my understanding of the intent of the bill.

The bill is designed to create certain entities and then provide jurisdiction for those entities by which the water resources of each river basin in America, composed in the main of more than one State, would be suitably cataloged under the provisions of the bill.

I invite attention to section 3 of the bill, as it appears in the conference report. I ask unanimous consent that the entire text of section 3 be printed at this point in the RECORD.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

EFFECT OF EXISTING LAWS

SEC. 3. Nothing in this Act shall be construed—

(a) to expand or diminish either Federal or State jurisdiction, responsibility, or rights in the field of water resources planning, development, or control; nor to displace, supersede, limit or modify any interstate compact or the jurisdiction or responsibility of any legally established joint or common agency of two or more States, or of two or more States and the Federal Government; nor to limit the authority of Congress to authorize and fund projects;

(b) to change or otherwise affect the authority or responsibility of any Federal official in the discharge of the duties of his office except as required to carry out the provisions of this Act with respect to the prepa-

ration and review of comprehensive regional or river basin plans and the formulation and evaluation of Federal water and related land resources projects;

(c) as superseding, modifying, or repealing existing laws applicable to the various Federal agencies which are authorized to develop or participate in the development of water and related land resources or to exercise licensing or regulatory functions in relation thereto, except as required to carry out the provisions of this Act, nor to affect the jurisdiction, powers, or prerogatives of the International Joint Commission, United States and Canada, the Permanent Engineering Board and the United States Operating Entity or Entities established pursuant to the Columbia River Basin Treaty, signed at Washington, January 17, 1961, or the International Boundary and Water Commission, United States and Mexico;

(d) as authorizing any entity established or acting under the provisions hereof to study, plan, or recommend the transfer of waters between areas under the jurisdiction of more than one river basin commission or entity performing the function of a river basin commission.

Mr. KUCHEL. Madam President, I refer to section 3, which reads in part:

Nothing in this act shall be construed (d) as authorizing any entity established or acting under the provisions hereof to study, plan, or recommend the transfer of waters between areas under the jurisdiction of more than one river basin commission or entity performing the function of a river basin commission.

I assume the legislative intent to be that the bill, as it is now before the Senate, would restrict the jurisdiction of study by commissions to be set up in any river basin in the country, to the needs of that particular river basin.

My able friend the Senator from New Mexico indicates his agreement by nodding his head.

Mr. ANDERSON. Yes. I inform the distinguished Senator from California that is the purpose.

Mr. KUCHEL. Madam President, I refer to the CONGRESSIONAL RECORD of yesterday, in which the distinguished chairman of the Committee on Interior and Insular Affairs of the House of Representatives, in discussing the conference report, said, at page 15966 of the CONGRESSIONAL RECORD:

The provision adopted by the conference committee prohibiting any entity established by this legislation from studying the transfer of waters between areas under the jurisdiction of more than one river basin commission or a similar planning entity has caused considerable comment. I want to make it clear that this simply means that the authority for such studies is beyond the scope of this legislation. There is no intention to indicate such studies are not needed or to prejudice the merits of any proposal to study the transfer of waters between major river basins. It simply means that the authority for such studies must be based upon other than this legislation or must be obtained by additional authorization by the Congress.

That reflects my understanding of the intention of the legislation.

I ask the able and distinguished Senator from New Mexico if that is correct.

Mr. ANDERSON. That is my understanding.

with which he has had cause to differ in the United Nations as our representative. The world, and the cause of peace through the cooperative efforts of the United Nations, is the poorer for his passing.

I need not expatiate on his career as Governor, as candidate for the Presidency of the United States, as a brilliant diplomat at the seat of world confrontation across the negotiating tables and within the halls of the United Nations. Rather, I wish to suggest that as we contemplate his career of great service there, we should begin immediately to make the most strenuous effort, as a fitting memorial to him, to reorganize the United Nations into a still more effective instrument of international amity and peace. Some of the recurring problems which we need to face realistically there, and to which the great intellect, skill, and urbanity of Adlai Stevenson would have surely been directed in the times ahead, are those of the veto, the position of Red China outside the organization, the financing of peacekeeping operations, and a wide gamut of other internal problems to which attention is due.

Adlai Stevenson was a friend to me, as he was to many others. Out of my deepest regard for him, I was moved to address a letter to the Nobel Peace Prize Committee last August 26 in which I nominated Adlai Stevenson for that great international honor. I believe he deserved it, and it was my intention to submit his nomination again this year, a fact of which I informed him after the Committee made another selection late last year.

One of the bases on which I believe Adlai Stevenson deserved such international recognition, but one which has too often been lost sight of, was his proposal nearly 10 years ago, in 1956, of a nuclear test ban treaty as a national policy. Then, few embraced the idea; now, its acceptance as a great contribution to the world's stability is universal. Here was not only a statesman, but a prophet ahead of his time, who suffered the fate so common to prophets, that others in taking up his vision of the future forgot the source from whence it came.

In my letter to the Nobel Committee I spoke of the great contributions of Adlai Stevenson to the cause of world peace, and a part of my words I quote now as my eulogy to a great American:

To this task (in the United Nations) he has brought the utmost patience, a profound intelligence, the wisdom of humane consideration of all viewpoints, and a deep dedication to the cause of peace in the framework of freedom.

We shall miss Adlai Stevenson, but we shall never forget him.

Mr. McCARTHY. Madam President, by the death of Adlai Stevenson, I lost a great personal friend but more significantly we, that is all of the peoples of the world, have lost the purest politician of our times.

His approach to politics was marked by three principal characteristics:

First, a decent respect to the opinions of mankind in world affairs.

Second, a willingness to accept the judgment of the majority and popular

will in domestic politics, as manifest in party conventions or in general elections.

And third, by unselfish surrender of his own personal reputation and image for the good of the common effort if, in his judgment, that surrender would advance the cause of justice and order and civility.

Adlai Stevenson did not grow in honor and in reputation from the organizations which he served, but rather they grew by virtue of his service.

He demonstrated early in his career and throughout his public life the highest degree of political humility in his indifference to what historians and biographers might say about him.

He was not ahead of his times or outside of his times, as some of his critics said, but he was a true contemporary, passing judgment on his own day, expressing that judgment in words proving his deep concern for the integrity of the language, and finally committing himself to the consequences of his judgment.

He was a "truly perfect, gentle knight," as Chaucer has said, "who from the moment when he first began his ride about the world loved chivalry, truth, honor, freedom, and courtesy."

Mr. DODD. Madam President, I join the countless millions in this country and around the world who mourn the death of Adlai Stevenson.

I mourn his loss as a great patriot and public servant, as one of the few men of our time who could truly be regarded as a citizen of the world, and as a dear personal friend.

Adlai Stevenson was a man of impeccable integrity and luminous intellect, a man with a warm heart for all humanity.

No more eloquent or respected spokesman ever represented the United States at the United Nations.

We have all been diminished by his loss.

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

The Senate resumed the consideration of the bill (S. 2213) to assist in the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, urban mass transportation, and community facilities.

Mr. SPARKMAN. Madam President, I shall conclude the presentation of the bill with a very brief statement.

I have spent considerable time on probably the most outstanding new part of the bill; namely, the rent supplement program.

The bill is made up largely of three parts. The first part deals with new programs, the second part with extensions of existing programs, and the third with amendments to various programs which are made necessary after experience of dealing with existing law.

Madam President, it has been 16 years since Congress passed the Housing Act of 1949. These have been a number of great housing acts since then, but I believe that the Housing Act of 1949 is the basic housing act.

I am pleased to take note of the fact that one of the authors of the bill is with us in the Chamber today. Of course, I refer to the distinguished Senator from Louisiana [Mr. ELLENDER].

At various times, the Housing Act of 1949 was known as the Wagner-Ellender-Taft bill, when the Democrats were in control. It was known as the Taft-Ellender-Wagner bill when the Republicans were in control. The Senator from Louisiana facetiously told me today that he was always in the middle. However, he was one of the mainsprings in the production of that bill. We had a hard time having it enacted into law. There were new programs that many were reluctant to accept, but they were finally accepted. We have improved on these programs from year to year. None of them is perfect, of course, but we have tried to improve them as we forged ahead.

Today, I believe we have a fine overall housing bill with which to carry out the mandate of the housing policy laid down in the Housing Act of 1949.

Madam President, there have been some 20 million housing units built in this country in the last 20 years. The country has changed from a large percentage of tenants to homeowners, mainly due to the incentives and the impulses given by the Housing Act of 1949.

The second part of the bill represents a continuation of existing programs. We have set the date in the bill for all the programs to expire on October 1, 1969. It is a 4-year bill. It is a big bill because it is of 4 years duration. One of the things that we sometimes overlook, in trying to measure how big a bill really is, is the fact that one particular program may involve a great expenditure and another may involve none at all.

Urban renewal, for instance, will cost \$2.9 billion in 4 years in the pending bill. Yet we are continuing this program at the rate it has operated upon for the last several years. FHA, on the other hand, which has more than 20 different programs of its own, costs the country nothing.

FHA and the Federal National Mortgage Association combined make money. They make enough money to carry the housing programs generally. And all of this grows out of what has been developed over the years in housing legislation.

Today we are trying to improve on the existing programs, we are extending them to bring in innovations to improve them and further perfect them.

The rent supplement program for instance, is an innovation, but it is also an effort to improve and possibly to replace the old public housing program.

Madam President, I continue now, with my prepared remarks.

AUTHORIZATION

Under the bill, Federal rent supplement payments could not exceed \$50 million prior to July 1, 1966, \$100 million prior to July 1, 1967, \$150 million prior to July 1, 1968, and \$200 million annually thereafter. The aggregate amount of the contracts could not exceed amounts approved in appropriation acts nor the above amounts.

EXPERIMENTAL PROGRAM

As an experiment, 10 percent of the total funds approved in appropriation acts may be used to determine the market and the effectiveness of rent supplements with respect to housing for the elderly under section 202 and section 231 housing and under section 221(d)(3) below market housing.

I have given a great deal of time in explaining the rent supplement program because of the wide interest in it and the necessity for a full explanation of its terms.

However, the bill before us has many other outstanding features. I should like to explain the more important ones.

FOUR-YEAR AUTHORIZATION RELATIVE TO EXISTING PROGRAMS

First of all, I should restate what I said earlier—this is a 4-year bill and carries authorization for 4 years for urban renewal, urban planning assistance, open-space grants, public housing, college housing, housing for the elderly, public works planning, Federal-State training programs, FNMA, low-income housing demonstration program, and low-rent housing for domestic farm labor.

If the bill did nothing more than extend these very worthwhile programs we could truthfully say this is indeed a great bill.

Now I should like to discuss briefly a few of the more important new programs authorized by the bill.

LAND DEVELOPMENT

One new program would authorize FHA to insure mortgage loans used to acquire and develop large subdivisions held for residential housing purposes. The new title would provide FHA mortgage insurance of private loans to private subdivision developers who may or may not themselves be homebuilders.

This will encourage the provision of a large supply of properly planned and improved residential building sites. It is expected that the mortgage insurance device, which has proven so helpful in providing a stimulus to the construction of good homes, will prove equally helpful in providing a stimulus to the production of good building sites in good neighborhoods.

The availability of FHA credit assistance during the land development stage will enable private developers to provide a more steady supply of improved building sites in an orderly and more economical manner. It should also open up cheaper suburban land for planned economic and marketable development and help to combat the rapid rise of prices for homebuilding sites.

RELIEF TO DISTRESSED MORTGAGORS AFFECTED BY THE CLOSING OF FEDERAL BASES

Sections 107 and 108 of the bill would help provide relief to families caught in the economic chaos resulting from the closing of military bases or Federal installations.

Section 107 would authorize the FHA and VA to grant a 1-year moratorium on principal and interest payments where the mortgagor is unemployed because of the closing of a Federal installation.

Section 108 would authorize the Secretary of Defense to acquire homes near a

military base where the owner's unemployment at the base is terminated by its closing. The purchase price would be established at fair value at the time the announcement was made about the base closing.

GRANTS FOR WATER AND SEWER FACILITIES

Section 602 of the bill would authorize the Housing and Home Finance Administrator to make grants to local public bodies and agencies to finance 50 percent of the cost of projects for basic public water and sewer facilities.

Authority for appropriations for a total of \$700 million for 4 years would be granted.

The most pressing problem facing many American communities is the provision of adequate water and sewer facilities. This has been testified to repeatedly in hearings held by the committee in recent years. The committee found that local governments have not been able to keep pace with the rising need of adequate water and sewer facilities. It is deemed essential, therefore, that local governments be provided with Federal assistance to carry out this very necessary activity.

GRANTS FOR NEIGHBORHOOD FACILITIES

Section 603 of the bill would authorize the Administrator to make grants to local public bodies and agencies to finance specific projects for neighborhood facilities, including neighborhood or community centers, youth centers, health stations, and other public buildings to provide health or recreational or similar social services. The grants generally would be limited to 66⅔ percent of the cost in the case of a project located in an area designated as a redevelopment area under section 5 of the Area Redevelopment Act.

The bill would authorize appropriations of not to exceed \$50 million a year for 4 years.

GRANTS FOR ADVANCE ACQUISITION OF LAND

Section 604 of the bill would authorize the Housing Administrator to make grants to State and local public bodies and agencies to assist in financing the acquisition of sites planned to be utilized in connection with the future construction of public works or facilities. The grant could not exceed the aggregate amount of reasonable interest charges on a loan or other financial obligation incurred to finance the acquisition of such land for a period not exceeding the lesser of, first, 5 years from the date the loan is made, or second, the period between the date the loan is made and the date on which construction of the public work or facility is begun.

Grants totaling \$100 million for 4 years would be authorized to pay interest charges for advance acquisition of public works sites.

FEDERAL HOUSING ADMINISTRATION AMENDMENTS

A number of amendments were made to the National Housing Act to improve and perfect existing programs to make them more effective in carrying out the national housing policy. I should like to mention several of the provisions about which there has been some misunderstanding.

APPROVAL OF TECHNICALLY SUITABLE MATERIALS

Section 211 of the bill would include a provision that the Federal Housing Commissioner shall adopt a uniform procedure for the acceptance of materials and products to be used in housing approved for loans it insures. Under this procedure any material or product which is technically suitable for the use proposed shall be accepted.

The committee's purpose in including this provision was to make certain that no materials or products which are technically suitable will be barred from use in FHA-financed housing. The committee believed that present practice often resulted in discrimination against many newly developed products which are either equally as suitable or more suitable than presently accepted materials. This practice has frustrated improvements in materials and the development of new ideas and has thus held back the technological advances in homebuilding which have been so outstanding in other industries.

By requiring the Commissioner to adopt a uniform procedure for the acceptance of materials, the committee hoped to eliminate many of these restrictions.

WATER AND SEWER FACILITIES WHERE FEASIBLE AS PREREQUISITE TO FHA AND VA ASSISTANCE

Section 212 of the bill would prohibit FHA and VA from financing new home construction if the housing is not served by a public or adequate community water and sewerage system unless, first, the property is served by a system approved by the FHA or VA under the new mortgage insurance program for land development authorized by the bill, or, second, the property is situated in an area certified by appropriate local officials to be an area where the establishment of public or adequate community water and sewerage systems is not economically feasible.

The committee believed this requirement would help prevent water pollution and other health hazards resulting from housing being built without adequate community water and sewerage services. The provision is sufficiently broad, however, to permit the assistance of housing without these services where it is not possible for them to be provided as part of a community system at this time. Existing law provides Federal assistance to the provision of these facilities, and the bill enlarges and supplements these aids.

PROPERTY IMPROVEMENT PROGRAM UNDER TITLE I

Section 213 of the bill increases the limit on the amount of an FHA title I property improvement loan from \$3,500 to \$5,000 and permits the term of a loan to be up to 7 years, rather than the present maximum maturity of 5 years.

In recognition of some of the questionable experiences presently connected with the FHA title I property improvement program, the committee has included a provision which subjects a lender purchasing a property improvement loan from a dealer or home improvement contractor to the same defenses against payment which might be asserted against

the dealer or contractor. Presently, the lender may take the loan instrument as a holder in due course.

The amendment is intended to encourage title I lenders to be more diligent in checking the dealers or contractors from whom they purchase title I loans. Under the present law, a lender can require a homeowner to pay the loan even though it may develop that the dealer or contractor did not perform their contract with the homeowner. The committee believed that the lenders should not rely upon this remedy and should instead be sure that the dealers or contractors are reliable and will perform their responsibilities.

URBAN RENEWAL

In addition to authorizing additional contract authority of \$2.9 billion for 4 years, the bill adds one significant provision about which there has been considerable discussion. This is the increase in the nonresidential exception from 30 percent of funds to 40 percent of the new capital grant authority.

Because a tight limitation on projects being undertaken under the nonresidential exception would have a tendency to distort local urban renewal efforts, the committee believed it desirable to liberalize the present limitation and to depend more on other control factors to obtain the proper mix of residential and nonresidential redevelopment within each local community.

The committee agreed, therefore, to increase the present limitation from 30 percent of aggregate grants not yet contracted for as of the acts of the 1959 Housing Act to 40 percent of the new funds authorized by the 1965 legislation. This will make available nearly \$1.2 billion of the new funds for this purpose.

LOW-RENT PUBLIC HOUSING—NEW CONTRACT AUTHORITY

The committee bill extends the public housing program by adding contract authority adequate to finance about 60,000 units a year for 4 years.

The committee was impressed by the backlog of 50,000 units at the present time and the need for continuing the program at least until such time as the new rent supplement program proved itself as an effective substitute for this program.

GREATER USE OF EXISTING HOUSING

The new annual contributions formula provided in section 402 of the bill would permit local housing authorities to make greater use of the housing supply through the purchase, purchase and rehabilitation, or lease of units which are available on the local market and suitable for low-rent housing purposes. A principal use of this formula would be in the acquisition or leasing of existing structures, with or without rehabilitation, for use over whatever period may be appropriate considering the condition and nature of the property and any other relevant circumstances. Under this new authorization, the PHA would be able to finance acquisition or leasing for any term of units in individual houses or in multifamily structures; it could finance joint private-public owned or leased units; and it could subsidize units financed through

other means such as FHA-insured, conventional, or State or municipal financing. The flexibility provided by this formula is intended to assist efforts of the type already undertaken by the PHA to encourage voluntary association between public and private organizations to provide housing for low- and middle-income families in joint ventures.

Use of existing housing will constitute a valuable supplement—but nevertheless, merely a supplement—to new construction. Existing housing can be effectively used for low-income families only where a combination of certain conditions exist. There must, first, be a supply of vacant housing on the local market, and that housing must freely be made available, since eminent domain will, of course, not be used under the new program. Moreover, the vacant housing, especially that owned by the FHA and VA, could meet the needs of the low-income families. Its cost, design, and physical condition must be appropriate, and its use should be consistent with the community plans and urban renewal programs and in accord with the wishes of the local governing body.

The committee made it clear that a public housing program is a local option and this bill does not remove any of the autonomy found in existing law which is left to local governing bodies in public housing undertakings.

REALLOCATION OF UNITS

The authorization proposed in section 404 would permit the PHA to transfer units from localities which have failed, for a period of 5 years, to place them under construction, to other localities where the units are needed and could be utilized without delay by the local housing authorities, without regard to the statutory limit on funds for any one State. This authorization would be subject to any annual contributions contractual obligations in effect on the date of enactment of the Housing and Urban Development Act of 1965, but would not grant any additional rights to local housing authorities, so that the PHA could reallocate units which have been placed under contract before the enactment date by terminating the contract, even though the local housing authority might object and the PHA might have to absorb the loss of any loan advances.

COLLEGE HOUSING

In addition to new authority for Federal college housing loans amounting to \$955 million, the only amendment to this program clarified the language of "educational institution" to make new colleges eligible under the program.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

In addition to new authority for FNMA to purchase mortgages under its special assistance function of \$1.625 million, the bill also gives FNMA authority to purchase any residential mortgage loan from other Government agencies.

The modifications of FNMA's authority to purchase mortgages under section 306(e) would permit steps to centralize the Government's ownership, management—servicing—and sale of mortgages to the extent determined desirable from time to time. The committee believed

that efficiency and economy would generally be promoted to the extent the FNMA facilities are taken advantage of. Both FNMA and the selling agency would be expected to exercise discretion as to whether there should be any purchase-sale transaction and, if so, discretion would be exercised as to all related factors, including the pricing of the mortgages.

OPEN SPACE LAND AND URBAN BEAUTIFICATION

This title would continue the open space land program authorized by title VII of the Housing Act of 1961 in an expanded and more liberal form to provide aid for built-up areas as well as the suburbs and to encourage communities to increase their expenditures for park improvement and other urban beautification activities that will make towns and cities more attractive and better places in which to live.

In order to assist State and local agencies to realize the full potential of the land acquired with assistance under the open space land program, the bill contains a provision permitting 50-percent grants for the development of such land for open space uses. Open space uses are defined as any use of open space land for park and recreational purposes, conservation of land and other natural resources, or historic or scenic purposes. Grants could be made for developing land acquired under both the present program and the new program, described above, of assistance in acquiring developed land in built-up areas.

RURAL HOUSING

Title IX of the bill would extend the existing rural housing program and institute a new insurance program for farm and rural nonfarm families.

The hearings clearly demonstrated the need for greatly expanding the rural housing program. Almost half of the substandard housing of this Nation is in rural areas although only 30 percent of our population lives there.

A widespread housing credit gap continues to exist in rural areas despite the efforts of the Federal Housing Administration to reach farther and more effectively into rural areas with its existing insured loan programs.

The new rural housing insured loan program of the Farmers Home Administration authorized by title IX will increase the opportunities available to those rural families who cannot qualify for housing loans from other sources. Under this new program, loans up to \$300 million a year could be insured for families of low and moderate income levels who would pay interest at a rate not exceeding 5 percent per annum. Additional loans could be insured for families with incomes above the moderate level. These families would pay rates on their loans comparable to the rates paid on insured Federal Housing Administration loans. The new authority will serve to reduce in some degree the inequality between urban and rural families in the field of housing without increasing the strain on the Federal budget.

Madam President, I ask unanimous consent to have printed in the RECORD a section-by-section analysis of the bill.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION SUMMARY

Section 1: Provides that the bill shall be cited as the "Housing and Urban Development Act of 1965."

TITLE I—SPECIAL PROVISIONS FOR DISADVANTAGED PERSONS

Financial assistance to enable certain private housing to be available for lower income families who are elderly, handicapped, displaced, victims of a natural disaster, or occupants of substandard housing

Section 101: Authorizes the Housing and Home Finance Administrator to make rent supplement payments to help make housing available to individuals and families who are elderly, handicapped, displaced, victims of a natural disaster, or occupants of substandard housing and who have incomes that do not exceed the maximum amount that can be established for occupancy in public housing under the Federal public housing law.

The annual rent supplement payment for any dwelling unit cannot exceed the amount by which the fair market rental for the unit exceeds one-fourth of the tenant's income.

The housing owner can be a private nonprofit or limited dividend corporation or organization, or a cooperative housing corporation who is a mortgagor of housing financed with market interest rate mortgages under the FHA section 221(d)(3) mortgage insurance program. Annual rent supplements can be paid over periods of up to 40 years.

The aggregate amount of the payments that can be contracted for is limited to amounts prescribed in annual appropriation acts but could not exceed \$50 million a year prior to July 1, 1966. The \$50 million limit is increased by \$50 million a year on July 1 in each of the years 1966, 1967, and 1968.

An experimental program of rent supplements is permitted for housing financed with below market interest rates. This includes the FHA section 221(d)(3) below market housing, and housing for the elderly financed under the direct loan program. Another provision of the bill reduces the interest rate to 3 percent on the housing for the elderly loans and the (d)(3) below market mortgages. The experimental program will also be available for FHA section 231 mortgage insurance housing if the mortgage is endorsed for insurance after the date of enactment of the bill.

Under the experimental program not more than 20 percent of the dwelling units in the project can be eligible for rent supplements. Also, not more than 10 percent of the amounts approved in annual appropriation acts for rent supplement payments can be utilized for rent supplements in the below market projects.

The Administrator will provide for certification to the housing owners of eligibility of the tenants. The incomes of the occupants (except the elderly tenants) will be reexamined at least every 2 years.

Tenants may receive rent supplements where they occupy units under leases with an option to purchase their dwelling unit.

The workable program for community improvement requirement for FHA section 221(d)(3) mortgage insurance does not apply in the case of housing to be used under the rent supplement program unless the program was already required and in effect in the community.

On or before January 1, 1968, the Administrator is required to submit a report to the Congress on the rent supplement program, together with his recommendations with respect to the program.

Extension of FHA section 221 programs; modification of interest rate

Section 102(a): Amends section 221(b) of the National Housing Act to continue for 4 years (from September 30, 1965, to October 1, 1969) the authority of FHA to insure mortgages under its section 221 programs of housing for lower income families. This includes extension of the (d)(3) below market rental housing and the (d)(2) low down-payment sales housing programs.

Subsection (b) amends section 221(d)(5) of the act to place an interest rate ceiling of 3 percent (or the rate derived under the existing formula, if lower) on mortgages which may be insured by FHA under the section 221(d)(3) below market interest rate program. (The rate is now 3½ percent and is expected to rise to 4 percent or higher on June 30, 1965.)

Rehabilitation grants to homeowners in urban renewal areas

Section 103: Adds a new section 115 to the Housing Act of 1949 to authorize the limited use of urban renewal capital grant funds for rehabilitation grants to certain homeowners in urban renewal areas whose income does not exceed \$3,000 a year. Such grants may be in an amount up to the lesser of \$1,500 or the cost of the repairs. If the income exceeds \$3,000 a year, grant cannot exceed that portion of cost of repairs which can be paid for with a loan which could be amortized, along with the borrower's other monthly housing expense, with 25 percent of his monthly income.

Existing contracts for Federal assistance to urban renewal can be amended to provide for these rehabilitation grants.

Parity of treatment for the handicapped and elderly in public housing

Section 104: Amends section 2(2) of the U.S. Housing Act of 1937 to establish parity of treatment between the handicapped and elderly in low-rent public housing. It increases by \$1,000 (\$500 in the case of Alaska) the maximum room cost limits applicable to public housing designed specifically for the handicapped; authorizes a special contribution of up to \$120 per unit per year to dwelling units occupied by the handicapped; and exempts the handicapped from the requirement that there be a 20-percent gap between the upper rental limits for admission to a proposed low-rent housing project and the lowest rents at which private enterprise is providing a substantial supply of standard housing.

Modification of interest rate on loans to provide housing for elderly or handicapped

Section 105: Amends section 202(a)(3) of the Housing Act of 1959 to fix the ceiling on interest rates of loans made under the elderly and handicapped direct loan program at a maximum of 3 percent. (By cross-reference in existing law, also fixes 3 percent maximum on rural elderly housing direct loan program; sec. 515, Housing Act of 1949.)

Relocation payments under the Urban Mass Transportation Act of 1964

Section 106: Amends section 7(b) of the Mass Transportation Act of 1964 to make the payments to individuals, families, business concerns, and nonprofit organizations displayed by federally aided urban mass transportation projects after March 4, 1965, the same as those provided under the urban renewal and low-rent public housing programs.

Mortgage relief for homeowners who are unemployed as the result of the closing of a Federal installation

Section 107: Authorizes FHA and VA to pay for not more than 1 year the principal and interest payments on FHA or VA mortgages where the mortgagors are unemployed

as a result of the closing of a Federal installation and such action is the only means whereby a foreclosure can be avoided. The mortgagor must be the occupant of the housing, and he must agree to reimburse the FHA or VA for the payments made by them.

Acquisition of certain properties situated at or near military bases which have been ordered to be closed

Section 108: Authorizes the Secretary of Defense to acquire one- or two-family dwellings situated at or near a military base or installation which is closed or partially closed after November 1, 1964, if he determines that there is no present market for the sale of the property upon reasonable terms and conditions and that the owner's employment at the base or installation is terminated by its closing.

The purchase price shall be equal to the average price at which similar properties in the locality were sold prior to announcement of the closing of the base or installation.

The properties acquired shall be transferred to the Federal Housing Commissioner for disposal. Any net receipts remaining after disposal shall be covered into the U.S. Treasury as miscellaneous receipts.

Appropriations are authorized to carry out the provisions of this section and any sums appropriated shall remain available until expended.

TITLE II—FHA INSURANCE OPERATIONS

Land development

Section 201(a): Adds to the National Housing Act a new title X to authorize a new program of FHA mortgage insurance for land improvement and site development for subdivisions.

FHA would be authorized to insure mortgages to finance the acquisition of land and the installation of improvements such as water and sewer lines, streets, curbs, sidewalks, and storm drainage facilities.

Commissioner would be directed to adopt appropriate requirements to encourage the maintenance of a diversified local homebuilding industry, broad participation by builders, and a proper balance of housing for low- and moderate-income families.

The maximum mortgage for a single land insurance undertaking could not exceed \$10 million. The mortgage maximum would be limited to 50 percent of the Commissioner's estimate of the value of the land before development plus 90 percent of his estimate of the cost of such development, subject to an overall ceiling of 75 percent of the value upon completion.

The maximum maturity of the mortgage would be limited to 7 years, or such longer maturity as the Commissioner deems reasonable in the case of a privately owned system for water or sewerage. The Commissioner is authorized to prescribe maximum interest rates and the premium charges.

To be eligible, the mortgage would have to represent a good mortgage insurance risk in the Commissioner's estimation, and the development would have to be consistent with sound land use patterns and consistent with comprehensive planning being carried on for the area in which the land is situated. It would also have to be served by such shopping, school, recreational, transportation, and other facilities as the Commissioner deems adequate or necessary.

Cost certification would be required to assure that the amount of the mortgage loan outstanding at reasonable intervals during construction does not exceed the maximum loan ratios described above.

No mortgage could be insured under the new program after October 1, 1969, except pursuant to a commitment to insure issued before that date.

(b) Amends various provisions of existing law to make land development mortgages

insured under the new title X eligible for FNMA's regular secondary market program and for investments by national banks and Federal savings and loan associations.

Extension of insurance authorizations

Section 202: Amends sections 2(a), 217, 809(f) and 810(k) of the National Housing Act to continue for 4 years (until October 1, 1969) FHA's authority to insure property improvement loans under the title I program and to insure housing loans and mortgages under all of its programs except the section 221 program which is continued by section 102 of the bill.

Downpayment requirement in case of low-income housing demonstration homes

Section 203: Amends section 203(b) (9) of the National Housing Act to permit the downpayment on the purchase of a home financed with a mortgage insured by FHA under the regular section 203(b) home mortgage insurance program to be made by someone other than the mortgagor in the case of a home being purchased under the low-income housing demonstration program assisted pursuant to section 207 of the Housing Act of 1961.

Multifamily mortgage limits for four or more more bedrooms units

Section 204: Amends sections 207, 213, 220, 221, 231, and 234 of the National Housing Act to increase the dollar limitation on the amount of an insurable mortgage in the case of dwelling units having four or more bedrooms. The amount of the increase would range from \$2,250 to \$2,500 per family unit. No change would be made in the existing limits for dwelling units having less than four bedrooms.

Rehabilitation in urban renewal areas

Section 205: Amends section 220 of the National Housing Act (FHA's urban renewal housing program) to increase the maximum amount of an insurable mortgage in a case where the mortgagor is not the occupant of the property but intends to hold it for rental purposes from 85 percent of the amount which an owner-occupant could receive to 93 percent of such amount. The existing 85-percent limit would continue to apply where the nonoccupant mortgagor intends to hold the property for sale rather than rental. Where refinancing is involved, existing indebtedness for improvement of the property could be included in the computation of the mortgage amount whether or not the indebtedness is secured by a mortgage against the property.

Nondwelling facilities for urban renewal housing

Section 206: Amends section 220 of the National Housing Act (FHA's urban renewal housing program) to permit more nondwelling facilities to be included in a rental housing project financed with a mortgage insured under the section 220 program.

Under the amendment the project could include such nondwelling facilities as the Commissioner deems desirable and consistent with the urban renewal plan. However, the project must be predominantly residential and the Commissioner must find that any nondwelling facility included in the project is essential to the economic feasibility of the project, and that its financing will not result in a disadvantage to other business enterprises in the vicinity of the project.

Larger insured mortgages for servicemen

Section 207: Amends section 222 of the National Housing Act (the FHA mortgage insurance program for servicemen) to increase from \$20,000 to \$30,000 the maximum amount of a mortgage which can be insured by FHA under that program.

The downpayment required would be 5 percent of the first \$20,000 of the appraised

value of the property (or the amount required under the regular sec. 203(b) home mortgage program, which ever is lesser), and 15 percent of the value in excess of \$20,000.

Refinancing of insured mortgages

Section 208: Amends section 223 of the National Housing Act to give FHA the authority to insure mortgages executed for the purpose of refinancing existing mortgages insured under any of FHA's programs. This authority is now available only for mortgages insured under sections 220, 221, 903, 908, and (in certain cases) 608.

Consolidation of FHA insurance funds

Section 209: Adds a new section 519 to title V of the National Housing Act to provide for the consolidation into a single general insurance fund of all of FHA's existing insurance funds except the mutual mortgage insurance fund, which would continue without change in its present coverage of section 203 mortgages (although sec. 203(k) home improvement loans would be transferred to the new fund).

Optional cash payment of insurance benefits

Section 210: Adds a new section 520 to title V of the National Housing Act to authorize the FHA Commissioner in his discretion to pay either in cash or in debentures any insurance claim filed by a mortgagee under any of FHA's programs after the enactment of the bill. (Under existing law payment must be in debentures, except in the case of mortgages insured under secs. 220, 221, and 233 after the enactment of the 1961 Housing Act and loans insured under sec. 203(k) after the enactment of the 1964 act.)

Any such cash payment would be in an amount equivalent to the face amount of the debentures which would otherwise be issued plus the interest such debentures would have earned.

Approval of technically suitable materials

Section 211: Adds a new section 521 to title V of the National Housing Act to require the FHA Commissioner to adopt a uniform procedure for the acceptance of materials and products to be used in housing approved for mortgages or loans insured by the FHA. Under the procedure any material or product which is technically suitable for the use proposed shall be accepted.

Water and sewer facilities in connection with certain federally assisted housing

Section 212(a): Adds a new section 522 to the National Housing Act to prohibit the insurance of any mortgage which covers new construction (except pursuant to a commitment to insure made prior to the date of enactment of the bill) if the housing is not served by a public or adequate community water and sewerage system unless (1) the property is served by a system approved by the Federal Housing Commissioner under the new mortgage insurance program for land development authorized by the bill, or (2) the property is situated in an area certified by appropriate local officials to be an area where the establishment of public or adequate community water and sewerage systems is not economically feasible.

(b) Adds similar provisions to title 38 of the United States Code to be applicable to housing loans under the veterans' housing program administered by the Veterans' Administration.

Property improvement program under title I

Section 213(a): Amends section 2(b) of the National Housing Act to increase the limit on the amount of a property improvement loan that can be insured by the FHA under its title I property improvement program from \$3,500 to \$5,000, and to permit the loans to have a maturity of up to 7 years rather than the present 5 years.

(b) Subjects a lender purchasing FHA title I property improvement loans from a dealer or contractor to the same defenses against payment which might be asserted against the dealer or contractor. Presently, the lender may take as a holder in due course.

TITLE III—URBAN RENEWAL

General neighborhood renewal plans

Section 301: Amends section 102(d) of the Housing Act of 1949 to permit a general neighborhood renewal plan to cover adjoining areas having specially related problems as well as the urban renewal area itself, thereby eliminating the present requirement that the whole area covered by a general neighborhood renewal plan be an urban renewal area, and authorizes such a plan even though the area involved includes subareas which are not themselves so blighted or deteriorated as to require urban renewal treatment.

Increase in authorization for capital grants

Section 302: Amends section 103(b) of the Housing Act of 1949 to increase the urban capital grant authorization by \$2.9 billion in the following manner: \$675 million on enactment, by \$725 million on July 1, 1966, and by \$750 million on July 1 in each of the years 1967 and 1968.

The Housing Administrator is also directed to undertake a study of the existing urban renewal program with a view to making recommendations for strengthening the program, or for establishing a new or alternative program.

Increase in nonresidential exception

Section 303: Amends section 110(c) of the Housing Act of 1949 to increase the limit on nonresidential capital grant authority by permitting, after the date of enactment of the bill, up to 40 percent of the amount of grants authorized by the bill to be available for projects in areas which are predominantly nonresidential both before and after renewal. Under present law 30 percent of the aggregate amount of grants authorized after the Housing Act of 1959 can be used for nonresidential projects.

Relocation payments

Section 304: Amends section 114(b) (2) of the Housing Act of 1949 to increase the relocation adjustment payment for small businesses displaced by urban renewal or public housing activities from \$1,500 to \$2,500.

Demolition of unsafe structures and code enforcement

Section 305(a): Adds a new section 116 to the Housing Act of 1949 to authorize the Housing Administrator to make grants to cities, other municipalities, and counties to assist in financing the cost of demolishing structures which have been determined to be structurally unsound or unfit for human habitation. The amount of the grant cannot exceed two-thirds of the cost of the demolition.

The section also adds a new section 117 to the Housing Act of 1949 to authorize the Housing Administrator to make grants to cities, other municipalities, and counties to assist them in carrying out programs of concentrated code enforcement in deteriorating areas in which the code enforcement, together with public improvements to be provided by the locality, may be expected to arrest the decline of the area. The grants cannot exceed two-thirds (or three-fourths in the case of a city or county having a population of 50,000 or less) of the cost of carrying out a code enforcement program over and above its normal code enforcement program.

(b) Amends section 110(c) of such act to remove existing provisions relating to code enforcement which are inconsistent with the provisions of the bill.

(c) and (d) Amends section 220 of the National Housing Act to make FHA-insured

housing mortgages and home improvement loans insured under that section available for the code enforcement areas assisted under the bill.

(e) Amends section 312(a) of the Housing Act of 1964 to permit the low-interest rate rehabilitation loans authorized by that section to be made for property located in the code enforcement areas assisted under this section of the bill.

Eligibility of certain local grants-in-aid

Section 306: Makes certain local expenditures available as local grants-in-aid to urban renewal in the cities of Jasper, Ala., Joliet, Ill., Johnson City, Tenn., New Brunswick, N.J., and St. Louis, Mo.

Amendment of section 316 of the Housing Act of 1954

Section 307: Amends section 316 of the Housing Act of 1954 to clarify the authority of the Redevelopment Land Agency of the District of Columbia to undertake urban renewal projects in nonresidential areas.

Rehabilitation loans

Section 308(a): Amends section 312 of the Housing Act of 1964 to provide that a rehabilitation loan can be made under that section if the Housing Administrator finds that the applicant is unable to secure the necessary funds from other sources upon comparable terms rather than reasonable terms as now provided.

(b) Amends section 312 of the 1964 act to make it clear that moneys in the revolving fund for the rehabilitation loan program can be used for the necessary expenses of servicing the loans.

TITLE IV—LOW-RENT PUBLIC HOUSING

Acceptance of local certification of equivalent elimination

Section 401: Amends section 10(a) of the U.S. Housing Act of 1937 to permit acceptance of certifications by local governing bodies that they have complied with the equivalent slum housing elimination requirements of that act.

Greater use of existing housing

Section 402: Amends section 10(c) of the U.S. Housing Act of 1937 by perfecting the annual contributions formula to permit local housing authorities to make greater use of the existing housing supply through the purchase, purchase and rehabilitation, or lease of units which are available on the local market and suitable for low-rent housing purposes.

Increase in authorization for annual contributions

Section 403: Amends section 10(e) of the U.S. Housing Act of 1937 to increase by \$47 million immediately, and by an additional \$47 million in each of the years 1966 through 1968, the existing limit on the aggregate amount of contracts for annual contributions which may be entered into by PHA under the low-rent housing program. This increase would provide an estimated 60,000 additional units of low-rent housing annually over the 4-year period, to be available both for conventional low-rent housing projects and for the new approaches to low-rent housing contained in the bill.

Reallocation of units

Section 404: Amends section 10(e) of the U.S. Housing Act of 1937 to provide that, subject to any contractual obligation outstanding on the date of enactment of the bill, any low-rent public housing units not under construction within 5 years from the date they were reserved to a public housing agency may be reallocated and placed under contract for annual contributions in any State without limitation as to the aggregate amount of units which may be placed under contract in any one State.

Sale of federally owned projects to private purchasers

Section 405: Amends section 12(c) of the U.S. Housing Act of 1937 to permit sale of a federally owned public housing project to a nonprofit organization for continued use as low-rent housing.

Increase in per room limitations

Section 406: Amends section 15 of the U.S. Housing Act of 1937 to increase the limitations per room on the cost of construction and equipment of low-rent public housing from \$2,000 to \$2,400 for regular units and from \$3,000 to \$3,500 in the case of Alaska or housing designed specifically for the elderly. The per room limit in the case of housing for the elderly in Alaska is also increased from \$3,500 to \$4,000.

Purchase of units by tenants

Section 407: Amends section 15 of the U.S. Housing Act of 1937 to permit any member of a tenant family in a low-rent public housing project to purchase a dwelling unit which is detached, semidetached, or a row house for his occupancy or occupancy by a member or members of his family.

TITLE V—COLLEGE HOUSING

Increase in authorization for college housing loans

Section 501: Amends section 491(d) of the Housing Act of 1950 to increase the college housing loan authorization by \$110 million upon the enactment of the bill, with further increases of \$285 million on July 1 in each of the years 1966 and 1967, and \$275 million on July 1, 1968. This section would also increase on July 1 in each of the years 1965 through 1968 (1) by \$30 million the ceiling on loans for other educational facilities (such as dining halls, health facilities, and student unions), and (2) by \$15 million the ceiling on loans to hospitals for nurses and intern housing.

Participation by new colleges

Section 502: Amends section 404 of the Housing Act of 1950 to make it clear that a college housing loan can be made to a new educational institution if such institution provide satisfactory assurance to the Housing Administrator that it will offer a baccalaureate degree within a reasonable time after completion of the facilities for which the loan is requested.

TITLE VI—GRANTS FOR BASIC PUBLIC WORKS, NEIGHBORHOOD FACILITIES, AND THE ADVANCE ACQUISITION OF LAND

Purpose

Section 601: States that the purpose of title VI is to assist and encourage the communities of the Nation (1) to construct adequate basic water and sewer facilities needed to promote their efficient and orderly growth and development; (2) to construct neighborhood facilities needed to enable them to carry on programs of necessary social services; and (3) to acquire, in a planned and orderly fashion, land to be utilized in connection with the future construction of public works and facilities.

Grants for basic water and sewer facilities

Section 602: Authorizes the Housing Administrator to make grants (up to 50 percent of the development cost) to local public bodies and agencies to finance basic public water facilities (including works for the storage, treatment, purification, and distribution of water), and basic public sewer facilities (other than "treatment works" as defined in the Federal Water Pollution Control Act). No grant can be made for any sewer facilities unless the Secretary of Health, Education, and Welfare certifies to the Administrator that any waste material carried by the facilities will be adequately treated before it is discharged into any public waterway.

In the case of a community having a population of less than 10,000 which is in dire need of such facilities because of special prescribed circumstances, the Housing Administrator may increase the amount of a grant for a basic public sewer facility to not more than 90 percent of the development cost of the facility.

Grants for neighborhood facilities

Section 603: Authorizes the Housing Administrator to make grants of up to two-thirds of the development cost of the project (except grant could be 75 percent of development cost in case of a project located in a redevelopment area under sec. 5 of the Area Redevelopment Act) to local public bodies and agencies (or through them to private nonprofit organizations) to finance specific projects for neighborhood facilities, including neighborhood of community centers, youth centers, health stations, and other public buildings to provide health or recreational or similar social services.

Advance acquisition of land

Section 604: Authorizes the Housing Administrator to make grants to local public bodies and agencies to assist in financing the acquisition of land to be utilized in connection with the future construction of public works or facilities.

The Administrator may require an applicant for a grant to agree to repay the grant if (1) the land is not utilized within 5 years after the grant agreement is entered into for construction of the public work or facility for which the land was acquired, or (2) the land is diverted to other uses.

General provisions

Section 605: Confers upon the Administrator the usual functions, powers, and duties, and authorizes him to make advance or progress payments on account of any grant made under this title of the bill.

Definitions

Section 606: Defines the terms used in the title.

Labor standards

Section 607: Makes applicable to construction work financed with assistance under sections 602 and 603 the prevailing wage requirements of the Davis-Bacon Act (and the usual time and a half overtime provisions), along with the authority generally available to the Secretary of Labor with respect to the enforcement of the requirements.

Appropriations

Section 608(a): Authorizes appropriations for grants for basic public water and sewer facilities not to exceed \$100 million for the fiscal year commencing July 1, 1965, and \$200 million for each fiscal year commencing after June 30, 1966, and ending prior to July 1, 1969.

(b) Authorizes appropriations for each fiscal year commencing after June 30, 1965, and ending prior to July 1, 1969, not to exceed \$50 million for grants for neighborhood facilities, and not to exceed \$25 million for grants for advance acquisition of land. This section also provides that any amounts appropriated shall remain available until expended, and that any amounts authorized for any fiscal year under the section but not appropriated may be appropriated for any succeeding fiscal year commencing prior to July 1, 1969.

TITLE VII—FEDERAL NATIONAL MORTGAGE ASSOCIATION

Increase in special assistance authority

Section 701(a): Amends section 305(c) of the National Housing Act to increase by \$1,625 million the amount of special assistance that the President of the United States can authorize the Federal National Mortgage

Association to provide for housing and urban development.

(b) Amends section 305(f) of the National Housing Act to increase the President's special assistance authority further by transferring the special assistance authority remaining from a special authorization in that section for FHA title VIII housing for the military, AEC, and NASA, except \$58,750,000 which is required to be reserved for section 809 mortgages.

Purchase of mortgages held by Federal instrumentalities

Section 702: Amends section 302 of the National Housing Act to authorize FNMA to purchase, service, or sell mortgages covering residential property offered to it by other Federal agencies, and other obligations offered to it by the Housing and Home Finance Agency or by any of that Agency's constituent agencies or units. FNMA is also authorized in its fiduciary capacity to deal in obligations of the Housing Agency which are not first mortgages.

Purchase of below-market interest rate mortgages covering properties located in urban renewal areas

Section 703: Amends section 302(b) of the National Housing Act to except FHA section 221(d)(3) below-market interest rate mortgages financing housing in urban renewal areas from the \$17,500 per dwelling unit limit imposed by section 302(b) of the National Housing Act on the amount of a mortgage that can be purchased by FNMA under its special assistance operations.

TITLE VIII—OPEN SPACE LAND AND URBAN BEAUTIFICATION AND IMPROVEMENT

Change in name of program, findings and purpose

Section 801: Amends title VII of the Housing Act of 1961 to make changes in the name of the existing open space land program so that it will include a reference to "urban beautification and improvement." It also expands the existing statement of congressional findings and purpose.

Development grants for open space uses

Section 802 (a) and (b): Amends section 702 of the Housing Act of 1961 to permit grants under that section to be used to assist in the development, for open space uses, of land acquired under title VII.

(c) Adds provisions to section 706 of the Housing Act of 1961 which define the term "open space uses" to mean any use of open space land for (a) park and recreational purposes, (b) conservation of land and other natural resources, or (c) historic or scenic purposes.

Increased grant level for preservation and development of open space land

Section 803: Amends section 702(a) of the Housing Act of 1961 to permit grants for the acquisition of land and its development for open space uses to be up to 50 percent of the total cost of the acquisition and development. Under existing law, the grant limit is 20 percent, except that grants may be made for up to 30 percent where the applicant exercises open space responsibility for all or a substantial part of the urban area.

Contract authorization

Section 804: Amends section 702(b) of the Housing Act of 1961 to increase the limit on grants that can be made for open space land and urban beautification and improvement (as authorized by subsequent sections) from \$75 to \$310 million. Grants for the provision of open space land in built-up urban areas would be limited to \$64 million, and grants for urban beautification and improvement would be limited to \$36 million.

Open space planning and program requirements

Section 805: Amends section 703(a) of the Housing Act of 1961 to require a finding by

the Housing Administrator that each grant for the acquisition and development of open space land is needed for carrying out a unified or officially coordinated program, meeting criteria established by the Housing Administrator, for the provision and development of open space land as part of the comprehensively planned development of the urban area. Under existing law the Administrator must find that (1) the proposed use of the land for open space is important to the execution of a comprehensive plan for the urban area, and (2) a program of comprehensive planning is being actively carried on for the urban area.

Grants for provision of open-space land in built-up urban areas and for urban beautification and improvement

Section 806: Adds new sections 705 and 706 to the Housing Act of 1961. The new section 705 authorizes grants to States and local public bodies to assist in financing the acquisition of developed land in built-up portions of urban areas to be cleared and used as permanent open-space land. The grants cannot exceed 50 percent of the cost of acquiring the interests in the land and of necessary demolition and removal of improvements, and can be made only where the local governing body determines that adequate open-space land cannot effectively be provided through the use of existing undeveloped or predominantly undeveloped land.

(b) Authorizes financial assistance extended under title VII of the Housing Act of 1961 (all open-space land and urban beautification and improvement assistance) to include grants for relocation payments like those provided under the urban renewal program. They will be available to those displaced after March 4, 1965.

The new section 706 authorizes grants to States and local public bodies to assist in carrying out local programs for the greater use and enjoyment of open-space and other public land in urban areas, including beautification of the land and its improvement for open-space uses. The local programs must be important to the comprehensively planned development of the locality.

Grants shall not exceed 50 percent of the amount by which the cost of the activities carried on by an applicant during a year under an approved program exceeds its usual expenditures for comparable activities. However, the Housing Administrator may use up to \$5 million for grants covering two-thirds of the cost of activities that have special value in developing and demonstrating new and improved methods and materials for use in carrying out urban beautification and improvement.

Use of funds for studies and publication

Section 807: Amends section 702 of the Housing Act of 1961 to authorize the Housing Administrator to use not more than \$50,000 of the title VII grant funds to undertake studies of open-space land and urban beautification and improvement problems and activities and to publish information relating thereto.

Conforming amendments

Section 808: Makes technical amendments in title VII of the Housing Act of 1961 to conform to the new provisions added to that title by this title of the bill.

TITLE IX—RURAL HOUSING

Loans for previously occupied buildings and minimum site acquisition

Section 901: This section amends section 501 of the Housing Act of 1949 to authorize the Secretary of Agriculture to make loans to farmers and rural residents for the purchase of previously occupied dwellings and related facilities and farm service buildings and for minimum adequate building sites.

Interest rate on direct rural housing loans

Section 902: This section amends section 502(a) of the Housing Act of 1949 to increase

to 5 percent the maximum interest rate on direct loans under section 502, except for loans to elderly persons in accordance with section 501(a)(3) and loans in accordance with sections 503 and 504, which would remain at 4 percent. It would also authorize the Secretary to charge fees on all title V loans.

Insured rural housing loans

Section 903: Subsection (a) of this section adds to title V of the Housing Act of 1949 two new sections (517 and 518).

The new section 517 would authorize the Secretary of Agriculture to insure loans, and make loans to be sold insured, in accordance with section 502; except that such loans to persons of low or moderate income would bear interest not above 5 percent and be limited to adequate housing modest in size, design, and cost and to an aggregate of \$300 million per year, and such loans to other persons would be made at rates and charges comparable to those in effect under FHA's section 203 program. To assure the marketability of these loans to private investors within the interest ceiling set by this section, it is further provided that the Secretary may enter into repurchase agreements with investors.

The new section 517 would also establish a new rural housing insurance fund to finance insured section 502 loans and to be utilized by the Secretary for various specified purposes. The new fund would be used in lieu of the agricultural credit insurance fund for section 514 domestic farm labor housing and section 515(b) elderly rental housing loans. Loans made out of the fund and held unsold could not exceed \$100 million at any one time. The Secretary would be authorized to borrow from the Treasury to meet loan insurance obligations and to make other authorized expenditures from the fund.

The new section 518 would establish a rural housing direct loan account, and would transfer to such account all rural housing direct loans made under sections 502, 503, 504, and 515(a) of the 1949 act, all collections therefrom, and any funds available from appropriations or Treasury borrowings for such loans. Amounts transferred to the account and such further amounts as may be appropriated would be available for making loans under the above sections and for making repayments to the Treasury.

Subsection (b) of section 903 of the bill amends section 511 of the Housing Act of 1949 to extend for 4 years (to October 1, 1969) the unused balance (approximately \$101 million) of the existing borrowing authority under section 511, and to remove the existing special reservation of \$50 million exclusively for loans to elderly persons in accordance with section 501(a)(3).

Purchase of rural housing loans by the Federal National Mortgage Association

Section 904: This section amends title III of the National Housing Act to authorize FNMA to purchase loans insured under the new provisions of title V of the Housing Act of 1949 in its secondary market operations.

Extension of rural housing authorizations

Section 905: This section amends title V of the Housing Act of 1949 to extend for 4 years (to October 1, 1969) the authority of the Secretary of Agriculture to make section 503 loan contribution commitments, the authority for appropriations to finance assistance under sections 504(a), 504(b), 506, and 516, and the authority of the Secretary to make section 515(b) rental housing loans for elderly persons. It would also increase from \$10 to \$50 million the total amount of appropriations authorized for section 516 assistance to provide low-rent housing for domestic farm labor, and would extend the construction standards and technical services provisions of section 506(a) to operations under the new provisions added to title V by the bill.

Sums excess to the needs of the rural housing insurance for the rural housing direct loan account

Section 906: This section adds to title V of the Housing Act of 1949 a new section 519, directing the Secretary of Agriculture to pay into miscellaneous receipts of the Treasury any surpluses from the new rural housing insurance fund or the new rural housing direct loan account.

TITLE X—MISCELLANEOUS

Urban planning grants

Section 1001(a): Amends section 701(b) of the Housing Act of 1954 to increase the limit on appropriations for urban planning grants from \$105 to \$230 million.

(b) Amends section 701(b) of the Housing Act of 1954 to permit up to 5 percent of funds appropriated for urban planning grants to be used for studies, research, and demonstration projects for the development and improvement of techniques and methods for comprehensive planning and for the advancement of the purposes of the urban planning grant program.

(c) Amends section 701 of the Housing Act of 1954 to authorize the Housing Administrator to make two-thirds grants to organizations composed of elected officials who represent political jurisdictions within a metropolitan area to assist them to undertake studies, collect data, develop regional plans and programs, and engage in other activities desirable for the solution of the metropolitan or regional problems.

Authorization for Federal-State training programs

Section 1002(a): Amends section 802(d) of the Housing Act of 1964 to increase the limit on appropriations for grants to assist Federal-State training programs from \$10 to \$30 million.

(b) Amends section 803 of the Housing Act of 1964 to provide that the limit per State on grants for Federal-State training programs shall be not more than 10 percent of the total amount appropriated for that purpose rather than 10 percent of the amount authorized to be appropriated as now provided.

Authorization for public works planning advances

Section 1003: Amends section 702(e) of the Housing Act of 1954 to increase the limit on appropriations for public works planning advances from \$20 million to \$70 million.

Authorization for housing for the elderly or handicapped

Section 1004: Amends section 202(a) (4) of the Housing Act of 1959 to increase the limit on appropriations for loans for housing for the elderly or handicapped from \$350 million to \$500 million.

Authorization for low-income housing demonstration programs

Section 1005: Amends section 207 of the Housing Act of 1961 to increase the authorization for grants for low-income housing demonstrations from \$10 million to \$15 million.

Advisory committees—Technical provision

Section 1006: Deletes an obsolete provision from section 601 of the Housing Act of 1949 relating to advisory committees.

Public facility loans

Section 1007(a): Adds a provision to section 202(c) of the Housing Amendments of 1955 to authorize the Housing Administrator to make public facility loans to a private nonprofit corporation for the construction of works for the storage, treatment, purification, or distribution of water, or the construction of sewage, sewage treatment, and sewer facilities, if the works or facilities are needed to serve a smaller municipality or rural area, and there is no existing public body able to construct and operate the works or facilities.

(b) Amends section 202(c) of the amendments to make a technical change made necessary by amendments of the Area Redevelopment Act.

(c) Amends section 203(c) of the amendments to permit a public facility loan to be made to a community without regard to its population if a research or development installation of the National Aeronautics and Space Administration is located in or near the community.

Lease guarantees for certain small business concerns

Section 1008: Adds a new title IV to the Small Business Investment Act of 1958 to authorize the Small Business Administration to guarantee payment of rentals under leases of commercial and industrial property entered into by small business concerns that are (1) eligible for loans under section 7(b) (3) of the Small Business Act or (2) eligible for loans under title IV of the Economic Opportunity Act of 1964.

The guarantee powers shall be exercised to the greatest extent practicable in cooperation with qualified surety or other companies on a participation basis.

A uniform annual fee shall be payable for the Administration's share of any guarantee. The fee shall not exceed 2½ percent per annum of the minimum annual guaranteed rental payable under the guaranteed lease. Fees may also be charged for the processing of applications for guarantees.

A revolving fund is established for carrying out the guarantee program. Initial capital of \$5 million for the fund is transferred from the fund established under section 4(c) of the Small Business Act. All receipts from the guarantee program shall be deposited in the fund. The initial capital shall be returned to its source in such amounts and at such times as the Small Business Administrator determines to be appropriate.

FHA conforming amendments

Section 1009: Makes conforming amendments in the National Housing Act made necessary by provisions in the bill which consolidate FHA insurance funds into the general insurance fund.

Repeal of special provision in Urban Mass Transportation Act

Section 1010: Repeals section 9(c) of the Urban Mass Transportation Act of 1964 which requires that contractors, in providing facilities or equipment which have received loan or grant assistance under the act, "shall use only such manufactured articles as have been manufactured in the United States."

Redevelopment areas—technical provision

Section 1011: Amends sections 103 of the Housing Act of 1949 and 701 of the Housing Act of 1954 to add references to acts supplementary to the Area Redevelopment Act.

Federal Reserve Act

Section 1012: Amends section 24 of the Federal Reserve Act to permit national banks to (1) purchase participations in loans secured by real estate and (2) make loans for the construction of industrial or commercial buildings to have maturities up to 30 months (now 18 months).

Savings and loan associations

Section 1013(a): Amends section 5(c) of the Home Owners Loan Act of 1933 to authorize Federal savings and loan associations to make loans outside of their 20-percent limitation secured by college dormitories or fraternity or sorority houses, or housing for staffs of colleges or hospitals.

(b) Amends section 404 of the National Housing Act to require an association to make deposits in FSLIC up to 1 percent of the association's savings as required by call of the Federal Home Loan Bank Board.

Mr. ELLENDER. Madam President, will the Senator from Alabama yield?

Mr. SPARKMAN. I am glad to yield to the Senator from Louisiana.

Mr. ELLENDER. I am proud of the fact that I assisted in the enactment of the Housing Act of 1949. It required considerable work at that time to have it enacted into law. The hearings held and the time consumed in order to enact the bill covered a period of approximately 7 to 8 years. We were fortunate in being able to obtain the assistance of the late Senator Taft during the 80th Congress.

Madam President, I should now like to ask a few questions of the Senator from Alabama. I should like to differentiate as best I can between the Housing Act of 1949 with respect to public housing and the innovation contained in the housing bill. As I understand, the Federal Government would put up by way of subsidy \$50 million a year over a period of 4 years—

Mr. SPARKMAN. Not to exceed \$50 million a year.

Mr. ELLENDER. Yes; that would mean that at the end of 4 years the appropriations—if all the money were used—\$200 million would be spent for that purpose.

Mr. SPARKMAN. The Senator is correct.

Mr. ELLENDER. Under the Housing Act of 1949, the Government subsidized certain construction.

Mr. SPARKMAN. The Government underwrote the bonds.

Mr. ELLENDER. Yes; by agreeing to pay 3½ percent, I believe.

Mr. SPARKMAN. The rate varied depending on the market for public housing bonds.

Mr. ELLENDER. Not to exceed 3½ percent. As I remember, it fluctuated between one-half to as much as 3 percent over the years. Under the act, the Authority was supposed to provide rentals to families wherein they paid 20 percent of their income. As I understand, in this case, with the innovation, 25 percent of a family's income will be required.

Mr. SPARKMAN. The Senator is correct.

Mr. ELLENDER. To what extent, if any, is money provided for the actual construction of these dwellings? As I understand, the bill does not envision that anyone with homes to rent would come into the picture. The homes or facilities would have to be constructed from here on out; is that not correct?

Mr. SPARKMAN. The Senator is correct.

Mr. ELLENDER. To what extent would the Government assist, if at all, in financing new constructions by cooperatives or nonprofit organizations?

Mr. SPARKMAN. The proposed rent supplement program would be on an FHA mortgage insurance basis. The Government would not put up any money.

Mr. ELLENDER. There would be an assurance that a subsidy would be paid on behalf of low-income families. The subsidy would be the difference between

25 percent of the income of the applicant and the reasonable economic rent. Is that correct?

Mr. SPARKMAN. The Senator is correct.

Mr. ELLENDER. If the family income were \$3,000 a year, 25 percent of that would be used as rent. Is that correct?

Mr. SPARKMAN. The Senator is correct.

Mr. ELLENDER. Do I understand that the HHFA would give a guarantee to the builder to pay the difference between the one-fourth of the income of the family and the economic rent, by way of a subsidy?

Mr. SPARKMAN. The Senator knows, of course that under this bill the project would be approved (and incurred) by FHA. The sponsor would have to be a nonprofit organization, a limited dividend corporation, or a cooperative. The sponsor would make application to FHA and state that it desired to build the housing for certain groups.

Mr. ELLENDER. For low-income people?

Mr. SPARKMAN. Yes. There are really two conditions for eligibility. One condition is that the tenant must be elderly, disabled, or handicapped, or displaced by urban renewal; the second condition is that only persons of low income eligible for public housing would be eligible for rent supplements.

We make it possible—this may sound a little strange, but it is true—for the proposed program to go below public housing income levels. As you know, there are actually people whose income are not low enough to justify their getting into public housing.

That may sound peculiar, but it is true. The provision of this bill can go below public housing income levels. Of course the project must be a multifamily project. Let us say a nonprofit corporation is sponsoring a 100-unit project. He promises FHA—and this becomes a part of the agreement—that 50 of the units, or half of them, will be made available for low-income people. FHA works out the plan with the sponsor. They work up an agreement. Of course, as with any FHA agreement, the agency must go through costs very carefully and they must determine what the economic rent would be.

After the building is constructed, the sponsor can fill half his units with people that can afford to pay economic rents, and the Government will help the other 50 percent with their rent.

Mr. ELLENDER. It is not intended that HHFA or FHA shall put up any money for the construction of these projects. FHA will only insure mortgage loans to those who sponsor such projects. Funds for construction would come from private enterprise sources.

Mr. SPARKMAN. The FHA does not put up loans. They insure loans. Private concerns put up the money. It is an insurance program.

Mr. ELLENDER. I wonder if the Senator could place in the RECORD at this point the rules and regulations with respect to low-rent housing. It may be that it will take a little time to obtain the information. What are the conditions under which a low-income family

may obtain assistance through public housing in New Orleans, Boston, or New York, for example, or in 10 or 15 typical cities?

Mr. SPARKMAN. Is the Senator referring to income levels?

Mr. ELLENDER. Yes.

Mr. SPARKMAN. I included that information as a part of my introductory remarks.

Mr. ELLENDER. I am sorry I was not present to hear it.

Mr. SPARKMAN. I did not read it. I had it printed in the RECORD. The information covers 26 cities.

Mr. ELLENDER. Throughout the country?

Mr. SPARKMAN. Yes. If you will read my explanation of the comparison in cost to the Federal Government between public housing and rent supplements you will see that it is extremely unlikely, in fact I believe almost impossible for the rent subsidy paid by the Government to exceed what the Government would pay as a subsidy for public housing of comparable units built at the same time.

Mr. ELLENDER. Is all of this incorporated in the measure that we are now considering?

Mr. SPARKMAN. I have explained how the new program would operate.

Mr. ELLENDER. It is in the bill, is it?

Mr. SPARKMAN. I believe we have laid it out very clearly. We do not spell some of these things in the bill, as the Senator knows. However, the way the bill is drawn and the way it is tied in with existing laws and regulations, what I have said is true.

Mr. ELLENDER. Is it the Senator's considered judgment that under this system, which is an innovation in public housing, in the long run it will be less costly to the Government than at the present time?

Mr. SPARKMAN. That is my belief. Furthermore, it is a private enterprise undertaking. I am not sure whether the Senator from Louisiana is familiar with the experimental program that we authorized the HHFA to make under the 1961 act. We set aside a certain amount of money for that.

Mr. ELLENDER. I recall it, but I do not know what the results were.

Mr. SPARKMAN. The results of one such experiment are set out in the transcript of the hearings. The Senator may wish to refer to those exhibits. He will find them in the hearings on page 127. I am sure he will find this part of the hearings very interesting. It has been a very interesting experiment. We are continuing that experiment by this bill. I believe the Senator from Texas offered the amendment in committee to continue the experimentation.

Mr. TOWER. Yes.

Mr. SPARKMAN. The amendment was adopted by the committee, and it is contained in the bill.

Mr. ELLENDER. I hope the new plan will be an improvement over what we sought to do in 1949.

Mr. SPARKMAN. I do, too. I say that with full understanding and appreciation of the excellent work that has been done under the 1949 program.

Mr. ELLENDER. What is intended in the future, so far as the present Public Housing Act is concerned?

Mr. SPARKMAN. We shall carry on the public housing program.

Mr. ELLENDER. How much is being provided?

Mr. SPARKMAN. Thirty-five thousand units are to be built.

Mr. ELLENDER. Is that over a 4-year period?

Mr. SPARKMAN. No; each year. Also, we authorize the renting of 15,000 units and the acquiring of another 10,000 units. There has been a great deal of complaint about slum clearance and urban renewal programs clearing out housing that could be used.

Furthermore, some military installations may be closed, and several hundred units may be unoccupied at or near those installations. They have to be taken over by FHA or by VA. In the proposed act we authorize these buildings to be made available for public housing projects.

The program must be worked out by the locality. The city could apply to the Public Housing Authority to enter into annual contribution contracts on certain housing projects which are owned by the FHA or VA.

Mr. ELLENDER. That would be done in the same manner as is done with public housing?

Mr. SPARKMAN. That is right.

Mr. ELLENDER. I wonder if the Senator has available for the RECORD the annual amount now being spent by the Government on public housing, and the number of units. I am quite anxious to see if better housing can be provided for under the rent supplement plan than the present program and at less cost.

Mr. SPARKMAN. That information is contained in the hearings. We can find it and incorporate it in the RECORD. As I recall, under the Senator's 1949 bill, an amount program—\$336 million, I believe—was authorized to support a low-rent housing program. In 1961, we authorized the remaining units that could be supported by that amount. I suppose that the entire amount authorized in 1949 is under contract by now.

Mr. ELLENDER. It might be interesting if the Senator from Alabama would have the staff work up a table to indicate the number of units in the 26 cities which the Senator has mentioned. That table might include the number of units and the cost to the Government. We might then try to find out what a similar number of units throughout the country, under the rent supplement plan would cost, so that we might compare that cost with the cost to the Government. I make that suggestion because I believe that the question will become the issue, since under the Public Housing Act there is a requirement of 20 percent of income, and the bill provides 25 percent. I believe it might be well to put such a table into the RECORD.

Mr. SPARKMAN. I believe the Senator from Louisiana is correct. In my statement I brought out some figures that showed the estimates. Those figures can only be estimates. We shall have to wait until the figures are in before we have the accurate result. In the

estimate presented in my statement I brought out the fact that, while the figures vary from one area to another all over the United States, the average subsidy per unit in the United States is \$58 a month. That is public housing under the existing program. Under the rent supplement, it would be \$40.

Mr. ELLENDER. That is in line with the question I previously asked. I believe it would be helpful if we could obtain that information from the 26 cities.

Mr. SPARKMAN. I believe what is already in the record relative to these cities should satisfy the Senator's request. I thank the Senator very much for his clarifying questions.

Madam President, I yield the floor.

Mr. TOWER. Madam President—

Mr. SPARKMAN. Madam President, before the Senator from Texas speaks, may I reclaim the floor?

Mr. TOWER. I yield to my distinguished friend.

Mr. SPARKMAN. In my opening statement I paid my compliment to the subcommittee, the committee as a whole, and the staff. Before the distinguished Senator from Texas speaks, I wish to take advantage of the opportunity to pay my special compliments and commendations to him. He is the ranking minority member on the Housing Subcommittee.

In past years I have often stated on the floor of the Senate what a pleasure it was to work with the Senator's predecessor, Senator Capehart. I am glad to give testimony now to the same effect with reference to the distinguished Senator from Texas. It has been a delight to work with him. He has been most cooperative and helpful in bringing the bill to the floor of the Senate.

Mr. TOWER. I thank my friend the Senator from Alabama for his very kind and generous remarks.

I should like to remark that I, in turn, am deeply grateful to the chairman of the subcommittee for his spirit of fair-mindedness, his willingness to listen to any approach to the housing problem, and his willingness to try to resolve differences in a fair and equitable way.

The chairman has done an excellent piece of work in synthesizing the various ideas that were brought into the Housing Subcommittee on this highly complicated and significant piece of proposed legislation.

It has been a great pleasure for me to work with the Senator, and I have learned a great deal in the process.

Mr. President, I voted to report the housing bill from the full committee. I was the only one of the Republican members of the committee to vote to report the bill.

At the time I stated that although there were things in the bill that I was satisfied with and that I felt were very constructive, there were also portions of the bill with which I could not agree. I noted that I would reserve my judgment on the bill until such time as action was completed on it on the floor of the Senate and it was brought to a vote.

Although there are some constructive provisions in the bill, particularly those relative to doing a little bit of self-examination of the whole housing program and

those providing reports. For example, those provisions providing a moratorium on payments under FHA or VA mortgages for distressed homeowners as a result of business closings, and other constructive provisions are also good. I feel that the rent supplement provision of the bill is a vast, complicated, and radically new program, and that it should be conducted perhaps on a less grand scale than we propose to do in this bill, where we make it an \$8 billion program.

We have no knowledge or experience in this field except for some experimentation under existing programs. This is a matter with which we should have some experience before we enact such a sweeping and comprehensive program.

I disagree with the concept of the rent subsidy. I wonder where it will lead us.

I wonder if this is not the beginning of subsidies for clothing, groceries, and ultimately, perhaps, for a guaranteed annual income for every citizen of this country, whether he chooses to work or not.

Perhaps this program will destroy the incentive of many individuals to try to improve their housing conditions on their own by their own efforts, by improving their own ability to earn income. I wonder if it will not discourage home ownership. The program is rather loosely drawn and is vulnerable to all kinds of abuse.

I intend later to offer an amendment which would take this program out of the bill.

I ask unanimous consent to have printed, as a part of my remarks, the minority views printed in the committee report as well as the individual views of the Senator from South Carolina [Mr. THURMOND] and myself.

There being no objection, the reviews were ordered to be printed in the RECORD, as follows:

MINORITY VIEWS OF Mr. BENNETT, Mr. TOWER, Mr. THURMOND, AND Mr. HICKENLOOPER
BILLIONS IN NEW SPENDING OBLIGATIONS

New and enlarged urban programs bulging with money and power, designed to step up the pace of creeping federalism, are wrapped in the omnibus package approved by this committee as the Housing and Urban Development Act of 1965.

They are—

An \$8 billion, 40-year contract to experiment with rent-supplementals as a new approach to housing low-income families.

Seven hundred million dollars in 4 years to pay half the cost of extending and enlarging water and sewer facilities to meet the anticipated growth of urban communities to be determined by the crystal ball of the HHFA Administrator.

Fifty million dollars a year to develop neighborhood social and recreational facilities to take care of the population growth anticipated by the HHFA Administrator.

Twenty-five million dollars a year to pay the financing costs of the acquisition of land for public works needs anticipated by the HHFA Administrator to meet the expected growth of the community. The location of the land must also coincide with the Administrator's guess as to which direction the community will expand.

These are additions to existing federally controlled urban assistance programs which are constantly being continued and expanded to the point where any local participation in funds or direction is only token in importance.

ADDITIONAL FUNDS FOR EXISTING PROGRAMS

Some of the existing and expanded programs are—

Two billion and nine hundred million dollars more in 4-year authority for urban renewal capital grants; \$125 million more in 4-year authority for urban renewal planning grants; a greater share of urban renewal funds permitted for rebuilding the core of cities and less for homes; agreement to talk soon about a complete revision of the concept of "urban renewal" to involve only the desire of cities to rebuild with no other "qualifications" necessary to obtain Federal funds.

An increase of \$225 million in 4-year, 50-percent grant contract authority to broaden the open-space program in urban areas to include beautification, purchase of land, demolition of buildings, and the relocation of people; a \$50 million increase for 4 years of grants to urban areas for public works planning, and the authority to pay two-thirds of the cost of removing unsafe and unsightly buildings in any part of an urban community under certain conditions.

In every instance of Federal financial participation in urban activities, the HHFA Administrator calls the signals and determines the conditions which must be met before the Federal funds are made available, thus usurping the previously inherent right, duty, and responsibility of the locally elected officials.

RENT SUPPLEMENT AND PUBLIC HOUSING

The new form of the rent supplement program as reported by this committee establishes two systems by which homes are to be provided for low-income groups. Rent supplement is expected to provide 500,000 units. At the same time the bill calls for 240,000 additional units to be used in the public housing program. All families which qualify as low-income families will be eligible for either of the programs.

Under the plan for rent supplements, the housing units may be scattered throughout the community, and it is possible that the rental market in some communities might provide better housing for those under the rent supplement program than under the other low-income housing programs.

Of the 240,000 public housing units requested, 140,000 will be of the conventional type which will be subject to site selection by authorities in the community. There are another 170,000 units of this type still in the so-called pipeline awaiting some action at the local level.

ASK MORE PUBLIC HOUSING UNITS

The remaining 100,000 units in the bill are to be divided between the purchasing and leasing of existing homes; 15,000 per year for 4 years in the first category and 10,000 per year in the latter. These units will not be subject to site selection at the local level and therefore will be scattered helter-skelter through the community.

In view of the administration's expression that it has wanted for some time to devise a low-income housing program which would free it from the charge that it has been creating public housing ghettos, the question arises as to how selection of families will be made for the ghetto type low-income housing as opposed to the scattered-type, low-income housing. Who will get the rent supplements and who will not? If there is a difference in the standard of housing available under each of these programs, who will get the highest standard?

It seems that such a radical change from the historic public housing approach to the problem of low-income housing needs should move more slowly and be more carefully tested than is possible under this bill which would begin immediately to set up contract obligations that could total \$8 billion over 40 years.

It is our hope that if the Senate approves the rent-supplement system as a substitute for public housing safeguards will be

written into the act whereby new 40-year contracting can be halted at any time in the next 4 years in the event there are indications that the program will not produce the intended results.

RENT SUPPLEMENT DESTROYS INCENTIVE

We opposed the original administration rent supplement plan for several reasons, one of which was the very fact it did not offer assistance where we felt assistance is most needed—the lower income groups. The administration sought to pay rent supplements for families above the "public housing" level whose annual incomes, by formula, could be in the neighborhood of \$10,000.

We also opposed the administration proposal because it would place under Federal obligation and control families whose income levels should inspire incentive rather than Government assistance. It would have created an income class, part of which would have been assisted by the Federal Government in its living standards, and part of which would have made sacrifices and used incentive to improve its living standards.

Even the administration sponsors of the rent supplement idea question its potential although they ask for \$8 billion to try it. HHFA Administrator Robert C. Weaver, in his testimony before the committee, used the phrase: "If this program works * * *."

In answering questions raised by Senator WALLACE F. BENNETT concerning the form of contracts to be signed with landlords Dr. Weaver admitted the contracts must enable the sponsors of the buildings to meet their mortgage obligations over a period of 40 years.

Dr. Weaver said the assurance of sufficient tenants for that length of time would be ascertained by surveys.

SURVEY REPORTS QUESTIONABLE

It seems questionable that in the period of 4 years of contract making provided in this bill a survey could be made that would determine the exact number of eligible families needed 40 years hence to fill the available units under contract.

Dr. Weaver also explained that from 20 to 30 percent of the sponsored units in each project would be placed under rent supplement contracts. The remaining 70 to 80 percent of the units would be nonsupplemented with tenants paying full economic rent. We question whether these projects can succeed with 70 to 80 percent occupancy. Therefore, the entire project is dependent on Federal subsidy for its success.

It is also conceivable that assignment of more eligible tenants to one project than to another in the same areas could hasten failure of the less favored one.

It is quite obvious to us that no matter what income class is to be the beneficiary, such a program is not desirable, is not in keeping with American tradition of inspiring incentive in peoples of all classes, and sets up a villain tenure for those eligible for such bondage.

URBAN RENEWAL

In 1954 the Congress adopted the program name of "urban renewal" to replace that of "slum clearance" and thereby forecast the total rebuilding of the Nation's so-called central cities with Federal funds.

The 1965 housing legislation has added a completely new theory, which holds that the Federal Government should assist in paying for increased city services, such as street maintenance, fire and police protection, etc.

An amendment was offered whereby the Federal Government might recapture some of the Federal urban renewal funds from city tax increments that will undoubtedly soar as a result of urban renewal property improvement. In objecting to this amendment, Housing and Home Finance Agency officials listed a number of reasons, among them: "First localities are faced with an immense

and increasing demand for services. This demand is straining their financial resources—resources largely tied to property taxes."

ORDER STUDY OF TAX PROFITS

However, sufficient interest was expressed by the committee in this plan that it ordered a thorough study be made toward creating a practicable means for recovery of Federal funds from city tax profits on urban renewal projects.

The great tax benefits to the cities are largely due to the removal of low-tax buildings by means of an urban renewal project that provides high-tax evaluation buildings as replacement. It is understandable that high-value central city property cannot be used for housing the families who previously lived there.

We find that each housing bill takes the urban renewal program further away from a means of more housing for low-income groups and more toward the new luxurious central city. The original Urban Renewal Act restricted nondwelling funds to 10 percent of the total. By now, as provided in this bill, the restricted nondwelling funds percentage has risen to 40 percent. Actually, an attempt was made to waive all restrictions, and, while this effort was rejected, it did result in a committee recommendation that a study be made of the feasibility of rewriting the formula in a manner directing more urban renewal funds for use in rebuilding the central cities without regard to additional dwellings.

NEED TO BE CLOSE TO WORK

It is our opinion that the growth of low-income population within cities should be high in any reconsideration of Federal assistance priorities. The trend to open spaces and beautification, both of which are given new and extended priorities in this housing bill, may be worthy projects if considered alone, but we believe that the need for close-in dwellings for the lower income classes should be kept in mind because many of those families must rely on employment in the core of the cities.

If the land is made too valuable for low-income housing because of urban renewal, as seems to be the case in many cities, then perhaps a portion of the increased local tax benefits might be used by the cities to assist in the transportation costs of the low-income workers between homes on less valuable land and sources of downtown employment, which might be some distance away.

In its consideration of the 1964 housing bill and again this year, the committee has been urged to increase the room-ceiling costs for the building of low-rent housing in the larger cities because of higher land values and higher building costs. At the present time, through statutory authority and administrative interpretation the top limit on per room costs is \$2,750 and the ceiling on unit construction, including land and other preparations, is \$20,000.

Several of the larger cities are using these top building allowance figures and still find it difficult to provide the dwelling units because of the constant rise in land values and building costs. Further increases in the allowance would force the cost levels for low-income tenants in the large cities up to levels only those with normal medium incomes can pay.

PROGRAM TO HELP BACKFIRES

It is at this point a paradox sets in. Urban renewal has been removing undesirable slums and blighted areas from cities while at the same time making the land too valuable for use by the persons who previously had homes or businesses in the renewed areas—and economical only for commercial or industrial uses—or for high-rent apartments. Those who were to have been helped have been forced out.

Congress now is being asked to realize that

the central cities can no longer house the poor or the little businesses, and city authorities want to be divorced from the concept of slum clearance as a basis of eligibility for Federal funds.

Next year perhaps we will be asked to approve programs for the development of special suburbs for those formerly living in the central cities and forced out of them by urban renewal.

GRANTS FOR THE FUTURE

The HHFA Administrator will obviously have to resort to his crystal ball to properly administer three grant programs which are new this year to the national housing program. He must determine, for benefit of proper administration, the future growth of communities; the direction of that growth, and the proper location within the communities of neighborhood facilities sufficient to provide for the population growth.

Notwithstanding historical experiences of boom-busts, the most recent occurring in Federal Government installations and procurement areas, the HHFA Administrator is authorized under section 602 of the bill to grant 50 percent of the cost of improving and enlarging basic water and sewer facilities in those communities where he foresees a "significant population growth." He would have \$400 million to give away for this purpose during the next 4 years.

Grants are also available in the bill to assist communities to acquire land in advance for future use for public works. The grants would cover the financing charges for the land.

MUST PREDICT GROWTH DIRECTION

In this instance, the Administrator would approve the site selection for the anticipated public works, which would necessitate a prediction as to the direction of the future growth of the community. Private land developers would certainly profit by the Commissioner's decision as to which way the community should grow. For this program the Commissioner will have \$700 million to give away in 4 years.

The signers of this report were able to gain approval for an amendment which would make it necessary for the community to renew its application for Federal assistance if the land has not been used for the intended purpose within 5 years.

The third new grant program for communities would authorize the Administrator to give away \$200 million in 4 years to provide the cities with neighborhood facilities including community centers, youth centers, health stations, and other social services. Operations costs would be met with local funds, but the Administrator would control the use of the facilities for 20 years.

MAKE ELDERLY CENTERS ELIGIBLE

Signers of this report supported a provision in the report on the bill recommending that local official bodies make centers for elderly eligible for Federal assistance.

We feel these three grant programs further exemplify the tendency of the Federal Government to take over the responsibilities of the cities. It is our opinion that the governing forces in the larger cities are welcoming the Federal control programs as a means of escaping the responsibility of assessing their citizens the taxes necessary to meet the costs of increased services.

OVERLAPPING AUTHORITY

The ever-growing tentacles of Federal authority seem to have become entangled now that the Farmers Home Administration and the Federal Housing Administration are both concerned with insuring rural home mortgages.

We feel that no deserving applicant for Federal home mortgage assistance has been neglected through the crossing paths of the two FHA's, but we believe a more clearly

cut line of jurisdiction between the two would be helpful.

At present the Farmers Home Administration, by statute, reaches into rural areas, defined as open country, and small towns up to 2,500 population. At the same time, the Federal Housing Administration has authority to reach any prospective borrower. Commissioner Philip N. Brownstein says the following of the Federal Housing Administration's authority: "It is our continuing responsibility to make FHA-insured mortgage financing available to all eligible borrowers wherever they may reside. * * * FHA has the programs and the procedures to serve all areas."

RESPONSIBILITY NEEDS TO BE DEFINED

We recommend that during the period covered by this bill some effort be made by agency officials and staff members of the Senate Subcommittee on Housing to draft language which will more clearly define the areas of responsibility for the two agencies.

We are pleased to note that the Federal Housing Administration this year urged its approved mortgagees to become more active in the mortgage needs in smaller towns. However, this newly inspired interest in the smaller towns may further the need for a clear definition of authority between the two FHA's.

There appears to be another area of possible overlapping of Federal assistance in the housing bill now before the Senate. There is a provision to grant \$700 million over 4 years toward the payment of 50 percent of the cost of improving, extending, and enlarging basic sewer and water systems.

In the recently approved Public Works and Economic Development Act of 1965 funds are made available for the same purpose. While the Public Works Act is assumed to be directed toward industrial development, the Committee on Public Works said in its report: "For example, if a community has an inadequate sewage treatment plant it can hardly hope to induce industrial development which would further overload its disposal plant, thus creating a health and welfare problem."

REPORT INDICATES POSSIBLE DUPLICATION

The report further sets out that "water and sewage facilities related to residential development" would be eligible for grants and loan under the bill.

Such an intent expressed in the report would indicate the public works assistance could be obtained without the requirement of urgent or existent industrial need. In that case funds would be available from two sources, the public works bill and the housing bill, with grants of 50 percent of cost in each case, plus a low-interest loan possibility under the public works bill.

The administration requested in the housing bill that \$100 million per year for 4 years be authorized for this program, and we believe the \$700 million total for 4 years now in the housing bill should be reduced to the original request for \$400 million with \$100 million authorized for each year.

SUBSIDIZED INTEREST RATES

We bring to the attention of the Senate a growing tendency to incorporate fixed subsidized interest rates in direct loan programs in the Housing Act, which have been operating without fault or complaint for years with interest rates that are tied to the actual cost of money to the U.S. Treasury.

Two programs in this bill will begin operating on fixed subsidized rates if the bill is enacted into law. They are: Elderly housing under the section 202 program and section 221(d)(3) low-rent housing.

We believe that all direct loan programs should carry interest rates of not less than the interest rates on Treasury bonds of comparable maturity.

Our thinking on this subject coincides with the Administration's reasoning in objecting to subsidized interest rates in this bill. Secretary of the Treasury Henry H. Fowler, in a letter to Senator BENNETT on May 18, said:

"I am concerned over the implication of those provisions that a flat 3-percent rate should be established on loans under these programs (college housing, elderly housing, and moderate income rental housing). Past experience suggests that rigid rates of this kind for Federal credit programs have perverse and unintended budgetary, program, and economic effects."

We feel it is morally as well as fiscally wrong to loan to selected elements of the population the taxpayers' money at less interest than the Treasury must pay to replace those funds.

WALLACE F. BENNETT.

JOHN G. TOWER.

STROM THURMOND.

BOURKE B. HICKENLOOPER.

INDIVIDUAL VIEWS OF SENATOR JOHN G. TOWER

INTRODUCTION

In addition to my individual views given here, I have joined in presentation of minority views, since I share in general a number of grave reservations therein expressed.

MERITORIOUS PROVISIONS IN BILL

I voted to report the housing bill out of committee, primarily because of its continuance of several meritorious programs, as for example, the Federal Housing Administration, the Federal National Mortgage Association, housing for the elderly and handicapped, college housing, the low-income housing demonstration program, and the rural housing program.

Also, I voted to report the bill since I wish to accord the Senate the full opportunity to give its consideration to this Nation's housing programs.

IMPROVEMENTS IN MAJOR PROGRAMS

In addition to the meritorious provisions above referred to, bill improvements, though now somewhat tenuous in nature, show promise of marked, advantageous effect on the urban renewal and public housing programs.

URBAN RENEWAL

I am most pleased the minority, with majority support, succeeded in securing the inclusion into the bill, language requiring the HHFA Administrator to make a thorough study of the overall urban renewal program and to report its findings within 2 years.

Urban renewal has been only partially successful in alleviating the problems it was supposed to solve. In some cases, problems have been created instead, as for example, the displacement of low-income families and individuals without adequate provision for housing them elsewhere. The so-called bulldozer approach, whereby comparatively new, structurally sound buildings have been demolished under the guise of slum clearance, has been costly and wasteful.

The HHFA has recently reported an improvement in housing project displaces. Perhaps with the reasonable rehabilitation grants to homeowners in urban renewal areas provided for under this bill, hopefully we will see the beginning of more responsibility in renewal construction.

RECAPTURE OF URBAN RENEWAL GRANTS

Bipartisan, favorable committee interest was expressed in my amendment to require the repayment of urban grants, out of additional tax revenues generated by renewal projects.

Increased tax benefits now inure to the cities, largely through the replacement of low-tax valuation buildings with those of much higher tax valuation. Based on recent

figures, on some 403 projects in which renewal development had begun or was completed, there was a 427-percent increase in assessed valuation, from \$575 million to \$3.031 billion.

Recognizing the weighty constitutional and legal problems raised by my proposal, I withdrew it, upon assurances that a study would be recommended in the majority report toward legislative feasibility of Federal urban grant recapture.

It would be best, I believe, that such study be conducted by the Bureau of the Budget, the General Accounting Office, the Housing and Home Finance Agency, and the committee.

Nonresidential restriction

I am opposed to the increase in the bill of the nonresidential restriction, from 30 to 40 percent. The urban renewal program was initiated primarily, and it should remain so, as a slum clearance program to more adequately house low-income groups, and not as a means to provide a luxurious central city business community.

RENT SUPPLEMENT

As inconceivable as it may seem, the rent supplement program originally offered by the Administration was totally void of assistance provisions to those of the public housing level.

This original proposal provided for the Federal expenditure of rent supplement payments said to average about \$50, and up to \$75 per month, for families of moderate income means, such means generally being between \$4,800 and \$8,000 (but possibly up to \$10,000) per year.

Census figures of 1960 show there were some 19 million families with incomes of \$4,000 to \$8,000, and of this number, only 8.4 percent lived in substandard housing. In contrast, of the 12 million nonfarm families earning incomes of less than \$4,000, 23.8 percent of those owning their homes lived in substandard housing, while one-third of those renting occupied substandard dwelling units. And the original rent supplement program totally ignored any low-income need.

I am, of course, most pleased that the committee flatly refused to accept the administration's moderate-income supplement concept, and instead directed the program to the use of those most in need of it, particularly since the rejection of my earlier suggestion that broad-based demonstration projects be initiated, in lieu of the proposed massive, virtually unlimited administration approach.

However, regardless of the redirection of the rent supplement program, I remain opposed to it.

This country, through its vast store of free enterprise and individual initiative, has produced for our citizenry the finest housing of any country in the world.

I fear such a rent supplement program will be construed as hope to millions now adequately housed that they too are entitled to have a portion of their rent paid by the taxpayer.

But most of all, I fear a stifling of the incentive for homeownership, a trend toward giving to renters the status of Government wards. This is a departure indeed from the American way.

PUBLIC HOUSING

The present public housing program, I believe tends to destroy the desire or interest of thousands of families to participate in the great American privilege of homeownership.

I am hopeful my proposal, now incorporated into the bill, to allow a public housing tenant to purchase his individual unit by counting monthly rentals over a 3-year period as a downpayment, will be a welcome and practical inducement to affected public housing occupants to buy a home.

RELIEF FOR HOMEOWNERS AFFECTED BY CLOSING OF FEDERAL INSTALLATIONS

The committee, in recognizing the hardship caused to some homeowners by Federal base closings, wisely provided for the following:

1. A moratorium on payments under FHA and VA mortgages for distressed homeowners who are unemployed as a result of such base closing.

2. Authorization by the Secretary of Defense to acquire title to homes near closed military bases at a price equal to value of property at time of announcement of base closing.

These provisions, I believe, will be of much assistance to the applicable distressed homeowner, in that he will be spared loss of home or severe financial loss.

NEW PROGRAM STATUS

I am desirous of the Housing and Home Finance Agency initiating periodic reporting measures, which would result in more comprehensive information concerning Agency operations, being furnished the committee.

I am particularly interested in scrutinizing most carefully various new programs provided for in the bill: Land development; grants for basic water and sewer facilities; grants for neighborhood facilities; advance acquisition of land.

Each of these programs, as additions to existing federally controlled urban assistance programs, must be administered sparingly and judiciously, lest they deter private initiative and local participation in solving problems primarily of local concern.

JOHN S. TOWER.

INDIVIDUAL VIEWS OF SENATOR STROM THURMOND

In addition to the objections to this bill contained in the minority views which I signed, I have serious reservations concerning one section which was not contained in the administration bill as introduced, but was added in the Housing Subcommittee. This is section 211 of the bill which adds a new section, section 521, to title V of the National Housing Act. This section would require the Administrator of the Housing and Home Finance Agency to adopt a uniform procedure for the acceptance of materials and products which are found to be technically suitable for the use proposed in structures approved for mortgages and loans under the Housing Act.

I share the concern that has been expressed by members of the committee concerning the seeming reluctance of the FHA, and certain commodity standards groups, to approve new materials which are the result of technological advances in the industry. This is a matter which deserves a searching study by the appropriate congressional committees to assure that new materials can be taken advantage of to reduce the costs of housing to the American public where these materials are as good as, or better than, those presently in use.

Nevertheless, I am disturbed about the words "technically suitable," because the fear has been expressed to me that this amendment could open the door to the FHA accepting substandard items that might be classified as "technically suitable." It is not clear in the wording of the amendment who is to determine if any material is "technically suitable," but it seems apparent that the Administrator of the HHFA would be required to make an independent judgment as to each and every product concerned. This would place an onerous burden upon the Administrator, one that he is not capable of adequately performing at the present time. The cost to the HHFA of testing the materials could greatly increase the administrative expenses of the Agency.

Mr. TOWER. I shall not labor further the bill in its entirety. I shall address myself to various sections of it as amendments are offered, and I shall discuss them in greater detail at that time, not wishing to detain the Senate.

I believe the Senator from Wisconsin has an amendment that he wishes to offer. I am prepared to yield the floor if he is prepared to offer his amendment.

VISIT TO THE SENATE BY HON. DOMINIC MINTOFF, A MEMBER OF THE ASSEMBLY OF MALTA

Mr. McGOVERN. Mr. President, the Senate has as its guest this afternoon a former Prime Minister of Malta who is at present a member of the Assembly of Malta. He is Mr. Dominic Mintoff, the leader of the opposition party.

Mr. Mintoff is an Oxford graduate, a Rhodes scholar, and a practicing architect. He is married to a British girl and is the father of two children. I am happy to present this distinguished legislator to the Senate. [Applause, Senators rising.]

The PRESIDING OFFICER (Mr. MONDALE in the chair). The Chair takes pleasure in welcoming our distinguished guest and hopes that his visit will be enjoyable.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the House had insisted upon its amendments to the bill (S. 1564) to enforce the 15th amendment to the Constitution of the United States, and for other purposes, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. CELLER, Mr. RODINO, Mr. ROGERS of Colorado, Mr. DONOHUE, Mr. McCULLOCH, and Mr. CRAMER were appointed managers on the part of the House at the conference.

The message also announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H.R. 1362. An act for the relief of Mrs. Chu Chai-ho Hay;

H.R. 5830. An act for the relief of CPO James J. Griffin, U.S. Navy;

H.R. 6719. An act for the relief of Mrs. Kazuyo Watanabe Ridgely;

H.R. 7436. An act for the relief of Maj. Victor R. Robinson, Jr., U.S. Air Force;

H.R. 8484. An act to amend section 2634 of title 10, United States Code, relating to the transportation of privately owned motor vehicles of members of the Armed Forces on a change of permanent station; and

H.J. Res. 504. Joint resolution to facilitate the admission into the United States of certain aliens.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated:

H.R. 1362. An act for the relief of Mrs. Chu Chai-ho Hay;

H.R. 5830. An act for the relief of CPO James J. Griffin, U.S. Navy;

H.R. 6719. An act for the relief of Mrs. Kazuyo Watanabe Ridgely;

H.R. 7436. An act for the relief of Maj. Victor R. Robinson, Jr., U.S. Air Force;

H.R. 8484. An act to amend section 2634 of title 10, United States Code, relating to the transportation of privately owned motor vehicles of members of the Armed Forces on a change of permanent station; to the Committee on Armed Services; and

H.J. Res. 504. Joint resolution to facilitate the admission into the United States of certain aliens; to the Committee on the Judiciary.

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

The Senate resumed the consideration of the bill (S. 2213) to assist the provision of housing for low- and moderate-income families, to promote orderly urban development, to improve living environment in urban areas, and to extend and amend laws relating to housing, urban renewal, urban mass transportation, and community facilities.

AMENDMENT NO. 302

Mr. PROXMIRE. Mr. President, I call up my amendment No. 302. I ask unanimous consent that the reading of the amendment be dispensed with but that it be printed in the Record.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12, line 21, before the period insert the following: ", or families whose present or former dwellings are situated in areas determined by the Small Business Administration, subsequent to April 1, 1965, to have been affected by a natural disaster, and which have been extensively damaged or destroyed as the result of such disaster"

Mr. PROXMIRE. Mr. President, this amendment would place disaster victims in the same category as other displaced families as far as eligibility for public housing is concerned and would thus permit more of these disaster victims to qualify for the rent supplement program authorized by S. 2213.

The U.S. Housing Act of 1937 requires that those eligible for public housing must have an income which is at least 20-percent less than the income required to obtain private housing which is decent, safe, and sanitary.

This so-called income gap—that is, the difference between the income of those who are eligible for public housing because their income is 20-percent below the standard and the income of those who can qualify for standard housing because their housing is adequate—does not apply to displaced families, however, because of the emergency nature of their needs. My amendment would simply include, within the definition of displaced families, those whose dwellings have been extensively damaged or destroyed as a result of a natural disaster.

As a consequence, victims of a natural disaster would be eligible for public housing despite the fact that their income falls within the 20-percent income gap area. These families would also become eligible for rent supplement

payments, since S. 2213 provides that those who are eligible for public housing could be eligible for rent supplements.

Mr. President, there is every reason in the world why these families should be classed as displaced families.

First. They have lost their homes through no fault of their own.

Second. They simply do not have enough income to purchase or rent available decent, safe and sanitary private housing in their area.

Third. The number of disaster families falling within the income gap area and needing public housing or rent supplement payments would be so small as to have a minimal impact on the funds available for the public housing and rent supplement programs. This is not to say that the families who qualify under the new definition were not desperately in need of Federal help. But these families will be few and, consequently, the cost will be minimal.

I hope that the Senate will accept this modest amendment which has such potential significance for disaster victims.

The distinguished junior Senator from Minnesota [Mr. MONDALE], who is now presiding over the Senate, well knows that his State, the States of Wisconsin, and Iowa, and many other midwestern States suffered serious disasters from floods this year.

The amendment is calculated to assist people in this category so that they can qualify for rent supplements.

Originally, the Subcommittee on Housing accepted the amendment, but because of a technical development resulting from a subsequent amendment, my amendment was inadvertently eliminated. So it is necessary to have the Senate reconsider this amendment, because technically it is not in the bill at present.

I ask the distinguished Senator from Alabama [Mr. SPARKMAN], the chairman of the Subcommittee on Housing, if he is favorable to accepting the amendment.

Mr. SPARKMAN. As I recall—and I should like to have this verified by the Senator from Wisconsin and the Senator from Texas—that the intent of this amendment had been agreed to by the subcommittee.

Mr. TOWER. That is my recollection. As a matter of fact, I asked myself why the Senator from Wisconsin was offering the amendment. I thought it had already been included in the bill and was surprised to discover that it was not. It was my recollection that it had been in the bill earlier.

Mr. SPARKMAN. I believe that it was the intent of the subcommittee to include this in the bill.

Mr. TOWER. Yes.

Mr. PROXMIRE. I spoke with the Senator from Maine [Mr. MUSKIE] about it, and he was unhappy that his amendment had inadvertently eliminated this amendment.

Mr. SPARKMAN. So far as I am concerned, I will accept the amendment.

Mr. PROXMIRE. I thank the distinguished Senator from Alabama.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment was agreed to.

AMENDMENT NO. 334

Mr. TOWER. Mr. President, I call up my amendment No. 334 and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

On page 31, line 7, strike out the quotation marks.

On page 31, between lines 7 and 8, insert a new section as follows:

"REPORT

"SEC. 1013. On or before January 1, 1968, the Administrator shall submit to the Congress a full report of operations under this title, together with his recommendations with respect thereto."

Mr. TOWER. Mr. President, the provision in the bill to which this amendment is directed, provides for FHA mortgage insurance for private loans to private subdivision developers, up to \$10 million.

The committee wisely deleted the administration's request for some \$500 million for new towns. In the committee report, the HHFA is advised that it does not wish the land development section in the bill to be used for land development which would be used to create new independent towns.

However, this is a new program, and I believe its operation should be carefully scrutinized by the committee and the Congress.

I therefore offer this amendment to require the HHFA to advise Congress of the land development program, and its subsequent operations.

The amendment provides a requirement for a report to Congress.

Mr. SPARKMAN. Mr. President, speaking for myself, this is a reasonable amendment for a requirement that ought to be carried out. I am glad to accept the amendment.

Mr. TOWER. I thank the Senator from Alabama.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment was agreed to.

Mr. ALLOTT. Mr. President, I offer the amendment which I send to the desk. I ask unanimous consent that the reading be dispensed with, but that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, after line 9, insert the following:

"(f) Notwithstanding the extent to which the cultural and convention center proposed to be built adjacent to Urban Renewal Project Colorado R-15 (Skyline) in Denver, Colorado, may benefit areas other than the urban renewal area, expenses incurred by the city of Denver in constructing such center shall, to the extent otherwise eligible, be counted as a grant-in-aid toward such project.

"(g) Notwithstanding the extent to which the cultural and convention center proposed to be built within Urban Renewal Project R-8 in Norfolk, Virginia, may benefit other areas other than the urban renewal area, expenses incurred by the city of Norfolk in constructing such center shall, to the extent otherwise eligible, be counted as a grant-in-aid toward such project."

Mr. ALLOTT. Mr. President, the portion of this amendment which relates to

Denver, Colo., was included in the House bill. It would permit the cost of public facilities, notwithstanding the extent to which they serve an area other than the urban renewal area mentioned in the amendment, to be counted as a local contribution toward the cost of the urban renewal project. This need was reflected in Colorado and some other States which suffered the disastrous consequences of recent floods.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement on the subject. The proposal is supported by the mayor of Denver, the Denver City Council, the Downtown Denver Improvement Association, and many prominent citizens of Denver.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

EXPLANATION OF AMENDMENT TO MAKE COST OF CULTURAL CENTER IN DENVER, COLO., ELIGIBLE AS LOCAL CONTRIBUTION TO URBAN RENEWAL PROJECT

Section 110(d) of the Housing Act of 1949 permits the cost of public facilities, to the extent they serve an urban renewal area, to be counted as a local contribution toward the cost of the urban renewal project.

Excluded from eligibility, however, are facilities which, although they may be located adjacent to or within the urban renewal area, are of such a nature that they serve and benefit the whole community. An example of such a facility is the cultural and convention center proposed to be erected adjacent to Denver, Colo.'s skyline urban renewal project. This center will be the focal point of the skyline project which is the city's major effort to revitalize its downtown area.

However, the recent disastrous floods in the city which caused serious damage to bridges, streets, and other public facilities within the city have put a severe financial strain on the city's resources, jeopardizing the skyline project itself unless financial relief can be provided. It is absolutely necessary for the city to repair the damage caused by the floods, and available local resources for urban renewal must for some time be largely devoted to that purpose. It is also true that the continued viability of the city depends upon the successful redevelopment of its downtown area as evidenced by the proposed skyline project.

Therefore, it is proposed through this amendment to permit the city to obtain urban renewal credit for the funds it expends on the cultural and convention center. This will enable the city to proceed simultaneously with the reconstruction necessitated by the floods and with the redevelopment of its downtown area, to which the skyline project is crucially important.

Mr. DOMINICK. Mr. President, I add my voice in support of the amendment. Denver was hit sharply by recent floods and has thus incurred heavy expenses.

The principal purpose of the amendment is to assist those who have suffered from the disaster to finance their own share of the cost of urban renewal projects which may later be voted.

Mr. ALLOTT. I hope the distinguished Senator from Alabama, the manager of the bill, will accept the amendment and be willing to take it to conference.

Mr. SPARKMAN. Mr. President, I had not been informed of the substance of the amendment before it was taken up on the floor of the Senate. I have had

a discussion with the distinguished Senators from Colorado concerning it. Do I correctly understand that it was incorporated in the bill in the House?

Mr. ALLOTT. Yes; it was incorporated in the bill in the House, and testimony was offered in the House on behalf of the amendment.

Mr. SPARKMAN. Have there been any negotiations with the Housing and Home Finance Agency regarding it?

Mr. ALLOTT. There has been considerable discussion between the city council and the mayor of Denver and various citizens there. It is my understanding from them that this has been approved.

Mr. SPARKMAN. Mr. President, would this remedy apply only to the city of Denver?

Mr. ALLOTT. To the city of Denver and to the city of Norfolk, Va.

Mr. SPARKMAN. The portion dealing with the city of Norfolk is not contained in the House bill.

Mr. ALLOTT. The Senator is correct. However, the amendment deals with a similar situation.

Mr. SPARKMAN. The Senator speaks from knowledge with reference to Denver to the effect that the Agency has approved the proposal.

Mr. ALLOTT. The Senator is correct. The distinguished junior Senator from Virginia has explained his position to me. I do not have firsthand knowledge of that situation. However, the two situations are similar.

Mr. DOUGLAS. Mr. President, may I ask the Senators on the other side of the aisle if they will speak a little louder so that all Senators can hear what is going on. It is very difficult to follow the debate when the questions are addressed in a whisper.

Mr. SPARKMAN. I do not believe that the Senator from Illinois refers to my questions.

Mr. DOUGLAS. No. I refer to the questions from the other side of the aisle. It is difficult to understand the precise question. I wonder if Senators would be willing to raise their voices.

Mr. ALLOTT. I certainly shall. It is the first time that anyone has accused me of speaking in a low key. I may be at my ebb of physical endurance today.

Mr. DOUGLAS. Mr. President, I merely wanted to know what the issue was.

Mr. ALLOTT. There are two parts to the amendment. One relates to Denver and the other to Norfolk, Va. The Denver portion is contained in the House bill. The Norfolk portion is not contained in the House bill.

Mr. DOUGLAS. Is the Senator from Colorado defending both Norfolk and Denver?

Mr. ALLOTT. No. I offered the proposals together. They both deal with the same situation. I do not believe that I could possibly hope to represent the State of Virginia with the same skill and ability that the two distinguished Senators from Virginia do.

Mr. SPARKMAN. Mr. President, I have no objection to the amendment. I understand that it is in keeping with the program of the Housing and Home Finance Agency and has been approved.

Mr. DOUGLAS. Mr. President, I would be tempted to repeat the query which Henry Wadsworth Longfellow wrote concerning what Priscilla is reputed to have said to John Alden when he proposed marriage on behalf of Miles Standish. Priscilla is reputed to have said, "Why don't you speak for yourself, John?"

Mr. ALLOTT. The Senator is correct. The distinguished junior Senator from Virginia was on the floor a while ago and was called to another meeting. He asked me if I would present the matter.

I am speaking for Willis, not John, if the Senator understands.

Mr. DOUGLAS. Why do you not speak for yourself, Gordon?

Mr. SPARKMAN. Mr. President, let me say to the distinguished Senator from Illinois that the chairman of the committee spoke to me before he left the floor. He and the Senator from Colorado had parallel projects.

The PRESIDING OFFICER (Mr. MONDALE in the chair). The question is on agreeing to the amendment offered by the Senator from Colorado.

The amendment was agreed to.

Mr. ALLOTT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMINICK. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMINICK. Mr. President, I ask unanimous consent that two telegrams which I have received, one from the Downtown Denver Improvement Association, by Perry G. Anderson, and the other from Thomas B. Knowles may be printed at this point in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

DENVER, COLO.,
July 3, 1965.

Senator PETER H. DOMINICK,
Senate Office Building,
Washington, D.C.:

We believe Denver will benefit greatly from cost of new convention center being treated as noncash grant-in-aid as proposed in House omnibus bill recently passed by House. Can assure you this is of broad community interest here. Will you support?

THOMAS B. KNOWLES.

DENVER, COLO.,
July 2, 1965.

Senator PETER H. DOMINICK,
Senate Office Building,
Washington, D.C.:

The area this association serves will benefit greatly at this time of need if the cost of the Denver Convention Center can be considered as a noncash grant-in-aid in connection with the Skyline urban renewal project. The House-approved omnibus housing bill makes such provision. May we count on your assistance to secure Senate approval of this amendment?

DOWNTOWN DENVER IMPROVEMENT
ASSOCIATION,
By PERRY G. ANDERSON.
AMENDMENT NO. 316

Mr. TOWER. Mr. President, I call up my amendment No. 316 and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 70, between lines 13 and 14, insert a new section as follows:

REPORTS

SEC. 609. On or before January 1, 1968, the Administrator shall submit to the Congress a full report of operations under this title, together with his recommendations with respect thereto.

Mr. TOWER. Mr. President, my amendment would require the Housing and Home Finance Agency Administrator to submit to the Congress a full report of the operations of the following new programs under title VI of the bill:

Grants for basic water and sewer facilities.

Grants for neighborhood facilities.

Advance acquisition of land.

The first new program here referred to authorizes the expenditure of \$700 million in grants to public bodies for the construction of water and sewer facilities. The bulk of the grants would be for up to 50 percent of the cost of the project, but in some cases the grant may be for 90 percent of the cost of the project.

The second program authorizes \$200 million in funds for the construction of community centers, youth centers, or projects otherwise in accordance with a program of health, recreational, social, or similar community service.

Federal grants would be two-thirds of the cost except in areas designated under the Area Redevelopment Act the grants would be three-fourths of the cost of the project.

The third new grant program authorizes \$100 million for the acquisition of sites for future public works. The amount of the grant would be determined by the aggregate amount of reasonable interest charges on a loan financing the acquisition of the land for the lesser of—

First, a period of 5 years from the date of the loan; and

Second, the time elapsing between the date of the loan and the date construction of the facilities begins.

Mr. President, as I have noted in my individual views on this bill, each of these programs are additions to existing federally controlled urban assistance programs, which must be judiciously administered.

These programs involve problems of primarily local concern. Being so, by far the best place to solve such problems is at the local level.

My reservation regarding Federal assistance in each of these areas is that private initiative and local participation will be materially deterred. However, I am not offering amendments to delete these programs from the bill. I am merely desirous of the Congress being furnished comprehensive information regarding their operation.

Mr. President, I therefore offer my amendment, which is similar to the one which I offered a few moments ago, which was agreed to. The amendment would require the Administrator to submit a report on new programs to Congress at a specified date or by a specified date.

It is my understanding that the distinguished Senator from Alabama is prepared to accept this amendment.

Mr. SPARKMAN. Mr. President, for my part I am willing to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas [Mr. TOWER].

The amendment was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PASTORE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PELL. Mr. President, on behalf of myself and of my distinguished colleague, the senior Senator from Rhode Island [Mr. PASTORE], I offer two amendments to S. 2213, the proposed Housing and Urban Development Act of 1965. These two amendments are identical to two provisions in the bill as passed by the House on June 30, 1965.

The first amendment, proposed section 1011, would remove an inequity resulting from an apparent oversight in the Public Works Acceleration Act of 1962—APW. Included therein was a provision that planning advances for public works projects made under authority of section 702 of the Housing Act of 1954 need not be repaid to the HHFA if such projects receive grants under the APW. Two earlier acts had also provided for planning advances for public works projects, but the APW made no provision for forgiving such advances, on the assumption that planning under the earlier programs had lapsed. As it now turns out there are still a few projects, including one in Woonsocket, R.I., planned under one of the earlier acts and built under APW grants. This amendment would extend the forgiveness provisions to planning advances made under the two earlier acts, thus correcting an inequitable situation and establishing a consistent policy.

I call up my first amendment.

The PRESIDING OFFICER. The amendment offered by the Senator from Rhode Island for himself and his colleague from Rhode Island will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 113, after line 4, insert a new section as follows:

REPAYMENT OF CERTAIN PLANNING GRANTS

SEC. 1014. Notwithstanding any other provision of law, no advance made under section 501 of Public Law 458, Seventy-eighth Congress; Public Law 352, Eighty-first Congress; or section 702, Housing Act of 1954, Public Law 560, Eighty-third Congress, for the planning of any public works project shall be required to be repaid if construction of such project has been heretofore or is hereafter initiated as a result of a grant-in-aid made from an allocation made by the President under the public works acceleration Act.

Mr. DOUGLAS. Mr. President, I have consulted with the manager of the bill, the distinguished Senator from Alabama [Mr. SPARKMAN]. We shall be very happy to accept the amendment, which provision, as I understand, has already been passed by the House.

Mr. PELL. I thank the Senator very much.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island.

The amendment was agreed to.

Mr. PELL. Mr. President, I send to the desk the second amendment, and ask unanimous consent that it not be read in full.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment offered by Mr. PELL is as follows:

On page 55, between lines 5 and 6, insert a new section as follows:

"ELIGIBILITY OF COMMUNITIES IN DEPRESSED AREAS FOR URBAN RENEWAL ASSISTANCE

"SEC. 309. (a) Subparagraph (B) of section 103(a)(2) of the Housing Act of 1949 is amended to read as follows:

"(B) three-fourths of the aggregate net project costs of any such projects which are located in (1) a municipality having a population of 50,000 or less according to the most recent decennial census, or (ii) a municipality situated in a labor market area which, at the time the contract or contracts involved are entered into or at such earlier time as the Administrator may specify in order to avoid hardship, is designated as a redevelopment area under the second sentence of section 5(a) of the Area Redevelopment Act or any other legislation enacted after the date of the enactment of the Housing and Urban Development Act of 1965 containing standards for designation as a redevelopment area generally comparable to those set forth in the second sentence of section 5(a) of the Area Redevelopment Act, and".

"(b) The amendment made by subsection (a) shall apply only with respect to urban renewal projects placed under contract for capital grant on or after the date of the enactment of this Act; except that such amendment shall apply with respect to all urban renewal projects in the city of Providence, Rhode Island, placed under contract for capital grant during the period Providence was designated as a redevelopment area under section 5(a) of the Area Redevelopment Act (or at such earlier time as the Administrator may specify in order to avoid hardship) and not completed prior to the date of the enactment of this Act."

On page 109, strike out lines 20 through 23.

On page 109, line 24, strike out "(b) Section" and insert in lieu thereof "Sec. 1011. Section".

Mr. PELL. Mr. President, this amendment, proposed section 311, would remove the arbitrary 150,000 population ceiling on grants to certain urban renewal projects. Existing law provides for capital grants of three-fourths of a project's cost to depressed areas of less than 150,000 population, while larger areas receive two-thirds grants. This amendment, which is in great part prospective, is merely a logical extension of the existing law—if a higher grant ratio is justified for smaller depressed areas, there is no reason to exclude larger areas.

The retroactive element of the amendment applies only to Providence, R.I., as it is an area of greater than 150,000 population which continued its classification until just last month as a redevelopment area under the Public Works and Economic Development Act of 1965, which replaces the Area Redevelopment Act expiring August 31, 1965. Applying the higher grant ratio retrospectively to Providence renders consistent the judgment that all municipalities in qualified labor market areas should receive three-fourths grants instead of two-thirds grants.

In conclusion, this amendment is identical to the one passed in the House.

Mr. DOUGLAS. Mr. President, will the Senator yield for a question?

Mr. PELL. I yield.

Mr. DOUGLAS. Am I to understand that local contributions will be reduced from one-third to one-quarter in large municipalities in so-called depressed areas where the index of unemployment is more than the national level?

Mr. PELL. This amendment would reduce local contribution from one-third to one-quarter in municipalities over 150,000 if they are in so-called depressed areas.

Mr. PASTORE. Mr. President, I am happy to be a cosponsor of this amendment. It remedies an inequity for which I find no logic. The provision under existing law is that when a municipality has a population less than 150,000 and it is a depressed area, the contribution shall be one-quarter rather than one-third.

The existing law in effect provides that where more people are depressed, they should get less. We are endeavoring to relieve those larger depressed areas by providing that the contributions by those areas shall be one-quarter rather than one-third. We are saying that where there are more depressed people, the need is greater, which is logical. The amendment goes along with the House action which removed the 150,000-population limitation.

Mr. DOUGLAS. As I understand the amendment, the provisions which now apply to municipalities with less than 150,000 people, which are so-called depressed areas, shall apply in this instance to larger communities, such as Providence, R.I.

Mr. PASTORE. One hundred fifty thousand is the category that Providence falls in. The provisions which now apply to municipalities with less than 150,000 people which are so-called depressed areas shall apply retrospectively to the city of Providence and to urban renewal projects which were placed under contract for capital grant during the period that Providence was designated a depressed area.

Mr. DOUGLAS. Mr. President, we will accept the amendment.

Mr. PASTORE. I thank the Senator for his action in the interest of equity and justice.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island.

The amendment was agreed to.

Mr. PELL. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. TOWER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 351

Mr. MILLER. Mr. President, I call up my amendment No. 351.

The PRESIDING OFFICER. The amendment offered by the Senator from Iowa will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 6, line 16, to insert the following after the period:

For the purposes of this Act "income" shall mean economic income, and shall include the adjusted gross income for Federal income tax purposes plus the amount of capital gain, interest, gifts, inheritances, annuities, or other retirement payments or portions thereof not included in adjusted gross income.

Mr. MILLER. Mr. President, if I could have the attention of the acting manager of the bill, the distinguished Senator from Illinois [Mr. DOUGLAS], I should like to point out that the purpose of the amendment is to prevent possible abuses under this act relating to the income provisions of someone who proceeds to take advantage of the provisions of the act.

I am quite sure that the intention is that the economic income of the individual or family concerned to be taken into account is not merely the technical concept of taxable income; this amendment is designed to make clear that economic income is intended.

For example, I believe that there would be no intention on the part of the Senators in charge of the bill, or the committee, or other Senators, that someone whose taxable income might be a relatively small amount, but who had a large amount of capital gains, which is not recognized for income tax purposes, could qualify under the act. Similarly, with respect to someone who had invested all of his resources in tax exempt securities, as many persons frequently do today, this proposal would frustrate the purpose of the act by enabling those to take advantage of it who do not need to take advantage of it and whose economic status is far superior to that which we are trying to cover by the bill.

I would appreciate it if the Senator from Illinois would at least take my amendment to conference, because I believe it is designed to implement the intentions of those who have worked on the proposed legislation.

Mr. DOUGLAS. I am afraid that in practice the amendment would seriously cripple the administration of the rent supplement provisions of the bill. It would impose restrictions on those who receive rent supplements which are not now imposed on public housing. At present, the Public Housing Administration and the administrators of various local bodies which administer public housing have administrative regulations which define income, which is probably much more liberal than the definition in the pending amendment. This amendment would seriously tie the hands of the bodies administering the law, and in many cases would be restrictive.

In connection with old-age security we permit the recipients to have some outside income, and a certain degree of flexibility is permitted. The medicare bill and the new social security bill which we passed the other day contain a provision permitting those on old-age assistance to earn a certain amount of money outside the former old-age assistance granted.

As I see it, these sums would have to be reported. All gifts received by a family during the course of a year would also have to be reported so that, in practice, this would require a large amount of re-

porting. I do not believe that it is the intention to do this, but it could result in a series of hindrances being placed on the administration of such a provision which would be extremely adverse to its application. Therefore, I hope that the amendment will be defeated.

Let me say to my good friend the Senator from Iowa that if he will look at the Report, on page 7, there is this which I think meets some of his concern:

Along with a statement of income, an applicant would also be required to present a statement of his assets. Despite the fact that an applicant's income might technically qualify him for a rent supplement, he would nonetheless be ineligible if his assets exceeded established limits.

We ought to provide some flexibility on an administrative basis with a periodic review, rather than to lay down irrevocable provisions in the basic law.

Mr. MILLER. I am not sure that the Senator from Illinois properly or accurately divines my amendment. It has nothing to do with a periodic review by the administrator of the income status of an individual. This would continue to take place, as the bill provides. All my amendment would do would be to provide guidelines for determining what is income. I believe it would be most unfortunate if the Senator's position on my amendment should go off on something that is not in it and is not intended to be in it. All I seek to do is to make clear what we mean by income.

As I understand, in Chicago, Ill., there has been a preliminary estimate made that two persons with a one-bedroom home who had up to \$4,300 in income would be eligible for a rent supplement. Suppose a married couple had only \$3,500 in income for tax purposes, but had \$50,000 in capital gains. Would the Senator think they should qualify for the rent supplements? I do not believe so.

Mr. DOUGLAS. Did the Senator from Iowa suggest that an applicant for public housing might have \$50,000 in capital gains and still be eligible for public housing?

Mr. MILLER. No; I have not said anything of the sort, except by way of illustration. I am only trying to make clear what the amendment would prevent happening.

Mr. DOUGLAS. No one receiving \$50,000 in capital gains would be eligible either for public housing or for a rent supplement. What the Senator from Iowa is doing is just blowing up another "bogeyman" in an effort to discredit the bill.

Mr. MILLER. I am not trying to stifle the bill by throwing up any shibboleths. We are not necessarily talking about those who have \$50,000 in capital gains before they could get into public housing. I am talking about the situation either before they would get in, or during the interim 2 years, after which time, I understand, there would be a periodic review by the Administrator of the income situation of such persons. The capital gains might occur after they became eligible for housing. That is another thought. Suppose that such a person had only \$3,500 in taxable income for

Federal purposes, but had another \$1,000 in interest income from municipal bonds. Would the Senator think that he should be eligible for rent supplements? In my judgment, he would be put in the \$4,500 economic income bracket. I do not believe the Senator intends that. I hope he does not. My amendment merely makes clear that that would not happen.

Mr. DOUGLAS. The Federal Housing Administration, public housing, and Housing and Home Finance Agency prepared the table which I placed in the RECORD yesterday, on page 16065 of the RECORD, entitled "Preliminary Estimates of Income Limits for Families of Different Sizes Under Proposed Rent Supplement Program in 26 Cities."

The estimates of maximum incomes are already quite low. I believe that the amendment of the Senator from Iowa is a nit-picking amendment. In any effort to arrive at a precise definition of income. There should be some flexibility in the program. If the Senator does not believe that the officials are carrying out their functions properly, we must try to oust them.

Mr. BENNETT. Mr. President, will the Senator from Iowa yield?

Mr. MILLER. One further comment, then I shall be happy to yield to the Senator from Utah.

I am sorry that the Senator from Illinois will not, or refuses to meet the—

Mr. DOUGLAS. Mr. President, may I ask who has the floor?

The PRESIDING OFFICER. The Senator from Iowa [Mr. MILLER].

Mr. DOUGLAS. When did that happen?

The PRESIDING OFFICER. Just now.

Mr. MILLER. The Senator from Illinois is attempting to cast a few names at my amendment, such as "nit-picking," but I assure the Senator that I am interested only in the merits of the amendment, and nothing else. I believe that the taxpayers should be interested in its merits, and not whether someone considers it under the nice little name of "nit-picking." I do not believe that it is nit-picking if someone in public housing seeks a rent supplement from the taxpayers of the country and has an outside income which is not taxable for Federal income tax purposes, which puts him in an economic status far superior to those who are not thought generally to be covered by the bill.

Mr. DOUGLAS. Let me say that I do not expect any—

Mr. MILLER. I am not through yet.

Mr. DOUGLAS. Oh, I see.

Mr. MILLER. That is why I said that for purposes of the act, income should mean economic income. If we are not interested in handling this problem on an economic income basis, I believe that the general public will be very suspicious and probably very indignant over the proposed legislation.

Mr. DOUGLAS. Mr. President, am I privileged to reply to the Senator?

Mr. MILLER. I am happy to yield to the Senator from Illinois.

Mr. DOUGLAS. The Senator uses some indefinite language when he says "economic income." That is susceptible to many differing definitions. I do not

expect that many persons who receive large depletion allowances on oil will be in public housing, or in subsidized housing. It is possible that they might have economic income, but I do not believe that this presents a practical case or a practical objection.

The Senator from Iowa can think of every fantastic possibility imaginable, but he does not get at the realities of the case.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. MILLER. I yield.

Mr. DOUGLAS. In some mysterious fashion the Senator from Idaho has now obtained the floor and is explaining the bill. I do not know quite how or when that happened. I hope at some time or other to obtain the floor.

Mr. BENNETT. Mr. President, did not the Senator from Iowa obtain the floor when he offered his amendment and proceed to discuss it?

The PRESIDING OFFICER. The Senator from Iowa has the floor.

Mr. BENNETT. Is the Senator from Iowa permitted to yield to me?

The PRESIDING OFFICER. For a question.

Mr. BENNETT. Has the Senator from Iowa seen the statement issued by the Housing and Home Finance Administration entitled "Estimate of Income Limits for Families of Different Sizes Under Proposed Rent Supplement Program in 26 Cities," to which schedule of preliminary estimates the Senator from Illinois referred?

Mr. MILLER. The Senator from Iowa has seen it. The Senator from Illinois invited the attention of the Senate to his statement at page 16065 of yesterday's RECORD, which sets forth a table entitled "Preliminary Estimates of Income Limits for Families of Different Sizes Under Proposed Rent Supplement Program in 26 Cities."

Is that the table to which the Senator refers?

Mr. BENNETT. This table is contained in a 4-page memorandum which came to the members of the committee from the agency. On page 2 of the memorandum are these words. I invite the attention of both the Senator from Iowa and the Senator from Illinois to this statement of the Administrator:

In administering the rent supplement program, the Housing Agency will count all income of an individual or family from every source, whether taxable or not, as against the income ceiling administratively established for the area.

It is the intention of the Administrator to do what I believe the Senator seeks to do, namely, to count all income from every source in making the determination of the eligibility of the person applying for this relief.

Mr. MILLER. Will the Senator from Utah tell us whether or not the Administrator intends by that language to take into account gifts and inheritances?

Mr. BENNETT. The Senator from Utah is not the administrator, but the Senator from Utah wonders whether a gift is income.

Mr. MILLER. I believe it is well established in income tax law that a gift is not income. That is why it seems to me it ought to be spelled out in the act. What we are interested in is economic income. In my amendment I seek to include adjusted gross income plus the amount of a capital gain, interest, gifts, inheritances, annuities, or other payments or portions thereof not included in the adjusted gross income. In that way we would have all of it taken into account, without any question about it.

Mr. BENNETT. The Senator from Utah could not agree to that, particularly with respect to gifts. If children of an elderly couple wished to give their parents a hundred dollars, it could move them out of the rent supplement area.

Much as I do not like the rent supplement program, and shall vote against it, the inclusion of gifts in determining the amount of income for purpose of qualifying for any program is a little too irregular.

Mr. MILLER. I am a little surprised by the statement of my friend from Utah. Let us go a little further. Would the Senator feel the same way if the gift amounted to \$2,500, instead of \$100?

Mr. BENNETT. A gift, under the income tax conception, is not income. I do not believe this criterion should be used by the agency in determining a person's eligibility.

Mr. MILLER. I recognize that a gift is not income for Federal income tax purposes. I suggest to him that if the children of one of the rental supplement recipients see fit to give their parents \$2,500 or \$5,000 or \$50,000 as a gift, it ought to be taken into account in evaluating the economic income status of a person who, at the taxpayer's expense, is receiving a subsidy.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. MILLER. I yield.

Mr. TOWER. I assume that the term "gift" means only a money gift, and not gifts of goods or something else.

Mr. MILLER. I do not intend to limit the amendment in that way. What difference does it make whether a gift is in the form of a check or cash or automobile or Government bonds, or something else that can be readily reduced to cash? It would be too easy to dodge the intent of the amendment if we were to so limit the concept of a gift.

Mr. TOWER. In view of the objection raised by the Senator from Utah, would the Senator be prepared to modify his amendment to strike the inclusion, in a gift, of a capital gain, interest, annuity, and other retirement payment?

Mr. MILLER. The difficulty with striking gifts is that if we are to strike gifts, we should strike inheritances.

I wonder if the Senator from Utah would comment on this point. I understand, because of what he said about gifts, that he would have the same reaction about including inheritances. An old friend or a relative might pass on and leave inheritance to a recipient in

the amount of \$50,000 or \$10,000. Do I correctly understand that the Senator would include that sum in the same situation?

Mr. BENNETT. The Senator from Utah feels that an inheritance is an increase in capital, and is not to be considered as income. We are talking about the concept of recurring income.

I feel that the statement of the Administrator of the intent to include all income of an individual or family in making his determination should be enough for us. A man could not even give his parents a Christmas present, because this might carry them over. It would be unnecessary to total up all the little gifts at Christmas and birthdays, and in that way we would be getting down to a very fine point, where it would be impossible to administer the law.

Mr. MILLER. I recognize the importance of having a law that can be efficiently administered. I am not seeking to list every kind of income. The Housing Administrator would have some discretion. My amendment provides that for the purposes of this act income shall mean economic income and shall include—and then I have listed the items that it shall specifically include and that shall be taken into account. If the Administrator wishes to include something else, that is up to him. I believe we could expect the Administrator not to be interested in small Christmas or birthday items, to which the Senator has alluded. I believe we must leave it to the Administrator to exercise some reasonable discretion. My amendment is designed to spell out specifically that we do not want people to receive rent supplements at taxpayers expense except on the basis of their economic income status, and to include in that income status some items that are not included under income tax law, to give certain people an economic status beyond that necessary to qualify for a rental subsidy.

Mr. President, it seems to me that the concept of income is not being uniformly administered by the administrator.

I have in my hand two tables, one relating to Chicago, Ill., and the other relating to New York City, setting forth the exemptions and the deductions that are recognized by the administrators in those regions in determining eligibility for housing.

The deductions that are allowable in Chicago are greater than those allowed in New York.

I notice that there are some deductions which would not be allowable for Federal income tax purposes, but which would be allowable by the Administrator in Chicago, at least.

I ask unanimous consent that the two tables to which I have referred be printed in the RECORD at this point in my remarks.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Locality	Exemptions and deductions ¹	Unit or family size	Net income after exemptions for admission
Chicago, Ill. (April 24, 1963). ²	EXEMPTIONS Principal income recipient: Minor—up to \$600 of income. Head or spouse—none. Not a principal income recipient: Adult—head or spouse—up to \$600 of income. Other adult—up to \$600 of income or \$100 which ever is greater.	1 person.....	\$3,000
		2 (elderly).....	3,600
		2 (nonelderly).....	4,200
		3.....	4,400
		4.....	4,600
		5.....	4,800
		6.....	5,000
	DEDUCTIONS Social security taxes. Union dues and assessments. Compulsory contributions as a condition of employment. Retirement contributions (varies by industry and establishment). Variable stated allowance for uniforms, special clothing, equipment and tools required for job. Excess transportation. Maintenance of automobile if required for employment (up to 50 percent of total maintenance). Child care (up to \$15 per week). Care of incapacitated person in home (up to \$15 per week). Housekeeper if needed to permit employment of sole wage earner. Support of dependents. Room and board (up to \$20 per week) of head of family away from home. Predictable medical expenses (in excess of 3 percent of total income).	7 or more.....	5,200
New York, N.Y. (Dec. 1, 1964). ²	EXEMPTIONS Service-connected death and disability. \$100 for each minor member of the family without income. Up to \$800 of a secondary earner income with a maximum of \$2,400.	2½ rooms (0 bedroom)---	3,888
		3½ rooms (1 bedroom)---	5,266
		4½ rooms (2 bedrooms)---	5,760
		5½ rooms (3 bedrooms)---	6,408
		6½ rooms (4 bedrooms)---	7,896
	DEDUCTIONS Social security taxes. Union dues. Employees involuntary contribution to a retirement or group insurance fund where contribution is a condition of employment. Specified allowances for the cost of uniforms or special work clothing. Allowances for extraordinary daily travel expenses. Specified allowances for costs when working out of town. Cost of care of children when required to permit a family member to be gainfully employed.		

¹ Exemptions include service-connected VA benefits.

² Date of approval of income limits.

Mr. MILLER. Mr. President, as they know, I have a great amount of respect for the Senator from Illinois and the Senator from Utah.

I regret that the Senator from Utah cannot agree to take into account gifts and inheritances in determining the economic income of a person for this purpose; and I regret that my friend from Illinois prefers to leave that question to the Administrator to determine rather than to have the Congress spell out the guidelines for the Administrator to develop. But I believe it is a fair amendment, and I hope it will be supported.

Mr. DOUGLAS. Mr. President, I have listened with much interest to the differences of opinion on the other side of the aisle as to what items should be included under the term "economic income." I have reached the conclusion that if those two able and distinguished Senators, both of them, I believe, opponents of the measure, cannot reach agreement on what the income is, we should not attempt to do so this afternoon.

I agree with the basic purpose of the amendment of the Senator from Iowa, but I believe it would be much better to leave the decision to the Administrator and his staff, particularly when the opponents of the measure cannot really agree upon what the definition of income

should be, whether gifts and many other items should be included, whether the earnings of young persons should be included, and whether the earnings of those receiving old age assistance should be included. There is a whole series of items to be considered.

I believe that the administrative standards laid down by the Housing and Home Finance Agency for public housing are quite clear. We can be certain that equally clear standards would be laid down for a rent supplement program. So I ask that the amendment be defeated.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was rejected.

Mr. HARRIS. Mr. President, I have two amendments to the bill which I believe will correct inadvertent inequities growing out of two situations in my home State and will be good public law in similar situations throughout the country.

I send the first amendment to the desk. I ask unanimous consent that the reading of the amendment be waived but that it be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 55 after line 5, insert the following new section:

"MODIFICATION OF WORKABLE PROGRAM REQUIREMENT AS APPLIED TO INDIANS"

"SEC. 309. Section 101(c) of the Housing Act of 1949 is amended by adding the following sentence at the end thereof: 'Notwithstanding any other provision of law, in the case of a contract with an Indian tribe, band, or nation (or a public housing or other public agency for such tribe, band, or nation established under State or tribal law), the workable program and minimum standards housing code, referred to in the preceding sentence, may be presented to the Administrator by such tribe, band, or nation, and it shall be subject to the requirements of law with respect to such program and code only to the extent that such tribe, band, or nation has the legal jurisdiction and power to carry out such requirements.'"

Mr. HARRIS. Mr. President, on behalf of myself and my senior colleague from Oklahoma [Mr. MONRONEY], I am proposing an amendment to section 101(c) of the Housing and Urban Development Act of 1965 (S. 2213), which, if adopted, will permit the Administrator of Housing to exempt Indian housing authorities in the State of Oklahoma from the execution of a workable program for community improvement in areas in which they undertake projects. Let me stress that I am in complete sympathy with the emphasis by the Housing and Home Finance Agency and the administration generally on the importance of planning and the desirability of developing workable programs. This requirement is a valuable safeguard to all concerned with housing development and is a stimulus for communities to undertake planning which will in the end be of the most benefit to the communities themselves.

However, a special circumstance affecting the Indian people of Oklahoma makes this strict requirement both inappropriate and unwise. Unlike other States having a large Indian population, there are no reservations as such in the State of Oklahoma. This means that the duly constituted tribal governing body, usually a tribal business committee, has absolutely no legal jurisdiction over a given territory. The committee functions mainly to administer the financial affairs of the tribe or tribes it represents. While these committees can and do develop housing authorities for the benefit of Indian people who belong to their tribes, they do not have the authority to enforce building codes, zoning regulations, or any of the other factors that go into a workable plan. Add to this the fact that the vast majority of the Oklahoma Indians do not live in communities, but live on small plots of land in rural areas. The chances, therefore, are remote that workable plans will be created to include these individual rural tracts. The effect of this could be a failure on the part of the Indian housing authorities in Oklahoma to qualify for assistance under the Housing and Urban Development Act of 1965.

Therefore, the purpose of this act will best be accomplished and the emphasis on the importance of a workable plan will in no way be diminished by the inclusion of this amendment providing latitude to the Administrator in dealing

with Oklahoma Indian housing authorities.

In general, the amendment would not bind Indian tribes to have workable programs except as they might have jurisdiction of enforceability.

I hope the amendment will be acceptable to the Senator from Illinois, because I have no desire to do any damage to the bill which he has handled so well.

Mr. DOUGLAS. Mr. President, we have studied the amendment. I see nothing wrong in it. I am glad to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment was agreed to.

Mr. HARRIS. Mr. President, I send to the desk my second amendment. I ask unanimous consent that the reading of the amendment be waived, but that it be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 61, strike out lines 10 through 17, and insert in lieu thereof the following:

"PARTICIPATION BY NEW COLLEGES AND CERTAIN PUBLIC VOCATIONAL AND TECHNICAL INSTITUTIONS"

"Sec. 502. Clause (1) of section 404(b) of the Housing Act of 1950 is amended to read as follows: '(1) (A) any educational institution which offers, or provides satisfactory assurance to the Administrator that it will offer within a reasonable time after completion of a facility for which assistance is requested under this title, at least a 2-year program acceptable for full credit toward a baccalaureate degree (including any public educational institution, or any private educational institution no part of the net earnings of which inures to the benefit of any private shareholder or individual), or (B) any public educational institution which (i) is administered by a college or university which is accredited by a nationally recognized accrediting agency or association, (ii) offers technical or vocational instruction, and (iii) provides residential facilities for some or all of the students receiving such instruction.'"

Mr. HARRIS. Mr. President, this is an amendment to section 502 of the Housing and Urban Development Act of 1965 (S. 2213). It would expand the section authorizing Federal loans for housing construction by colleges and universities to include also certain types of residential vocational schools.

Although in general vocational schools are located in large urban communities and do not provide residential accommodations for students, there is increasing interest in the concept of residential and campus living for such institutions. The vocational education act has recognized the need for these schools and has made provision for several pilot residential institutions to be located throughout the Nation. It seems inappropriate, therefore, in the Housing Act to exclude them from the advantages offered other residential schools.

In order that this extension be limited to the kinds of vocational schools we are concerned with, this amendment provides that they must be publicly supported, administered by a college or university which is fully accredited, that

they be vocational in nature and that they offer residential facilities for some or all of the students.

An institution of this type, Oklahoma State Tech, has been operating at Okmulgee, Okla. for 16 highly successful years. This school is affiliated with the Oklahoma State University at Stillwater and offers a highly competent curriculum of instruction ranging from basic technician skills through highly complicated electronics. In order to help the adult who may not have a high school diploma and in order to maintain its strict vocational character, Oklahoma State Tech has not developed degree work. Therefore, without this amendment, this school and others like it would be treated by this bill in a discriminatory fashion. For this reason I propose this amendment.

Mr. DOUGLAS. Mr. President, may I ask the Senator from Oklahoma how many schools or colleges would come under this general provision?

Mr. HARRIS. I do not know what the number would be. There is only one school of this type in Oklahoma. I am confident that there would be very few others in the country. However, the situation exists in Oklahoma, and others may exist elsewhere in the future. The Vocational Education Act authorizes five pilot residential vocational schools throughout the country. We are hopeful that during this session Congress will appropriate funds to enable at least three of them to get underway.

More and more, I think we shall find that in addition to day schools in urban areas, we shall be interested also in vocational schools, where programs are conducted on a campus to the same degree as they are conducted by degree-granting colleges, and where housing will be needed.

Such a situation exists in Oklahoma in an institution having a history of 16 highly successful years. I see no reason why it should continue to have the housing problems it has had during the last 16 years, when its parent institution, Oklahoma State University, which administers the institution, is able to build residential housing under the financing we are talking about, while the institution is not able to get that type of financing.

My amendment would correct a real inequity in the law. I see no danger in the extension of this concept.

Mr. DOUGLAS. If my memory serves me correctly, I believe there is at least one other such institution, and it is located in Michigan. It was formerly known as Ferris Institute and is now a part of the Michigan system of higher education. Other institutions may crop up from time to time.

So far as I am concerned, I do not remember that this proposal was presented before the committee. I do not believe that any representation was made before the committee on this subject. No evidence has been taken on it.

Would the Senator from Oklahoma be willing to lay the amendment aside for a time, so that I may consult with the manager of the bill [Mr. SPARKMAN] and other members of the committee, and

thus be able to give a more mature judgment? If I were to act at the moment, I should have to oppose the amendment. I should like to have a chance to consult with other members of the committee.

Mr. HARRIS. I thank the distinguished Senator from Illinois for his characteristic generosity and kindness.

Mr. President, I ask unanimous consent that the amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIBLE. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 54, between lines 9 and 10, insert a new subsection as follows:

(f) Expenses incurred in the construction of the Glenn Duncan Elementary School and the Fred W. Traner Junior High School in Reno, Nevada, shall not be deemed to be ineligible as a local grant-in-aid in connection with the Northeast Urban Renewal Project (Nevada R-2) because of any change in the urban renewal plan for such project which is determined by the Housing and Home Finance Administrator to have resulted from the proposed location of a federally aided highway within or adjacent to the urban renewal area in which such project was undertaken. For the purpose of computing the portion of the cost of such schools which may be allowed as a local grant-in-aid, the degree of benefit of the schools to such urban renewal area shall be based on the latest estimate of benefit submitted by the local public agency and accepted by the Administrator prior to such change in the urban renewal plan.

Mr. BIBLE. Mr. President, my amendment which will correct an injustice imposed at no fault of the Urban Renewal Agency, City of Reno, on that agency.

The amendment will add a new subsection between lines 9 and 10 on page 54 of the bill, S. 2213. The amendment will not affect language in the present bill but will correct an inequity. It will not take an appropriation but will permit the Housing and Home Finance Agency to work with the Urban Renewal Agency, City of Reno, in an attempt to secure a more equitable plan, known as the northeast urban renewal project R-2, Urban Renewal Agency, City of Reno.

The Urban Renewal Agency, City of Reno, secured approval of its urban renewal plan and entered into a cooperation agreement on July 10, 1961.

In this agreement, the Federal Government would have granted school credits in the amount of \$669,550 as a result of construction of two schools, one elementary, and one junior high school.

Although the original plan had been approved by the Federal Government; namely, the Housing and Home Finance Agency, and purchase of property and work was moving forward by the local urban renewal agency in an orderly fashion, on March 22, 1963, the Federal Government, through another agency, the Bureau of Public Roads, caused the re-routing of a freeway on Interstate 80 through the Urban Renewal Agency, City of Reno, planned renewal area.

The Bureau of Public Roads had previously approved a routing of the freeway, which did not affect the urban renewal area and following a hearing and investigation of the route, changed the entire routing of the freeway which resulted in cutting the urban renewal area in half and thus causing the Urban Renewal Agency of the City of Reno to change its entire plan.

This caused a serious problem in that the school credits were no longer available and it was necessary for the city of Reno to assume additional costs which, I am advised, are in fact, far in excess of costs borne by similar plans throughout the Nation.

Instead of the city receiving credits in the amount of \$669,550 it is now compelled to advance \$423,027 in cash and in addition, it must contribute \$215,344 in noncash grants-in-aid for streets, curbs, and sidewalks, which in effect is cash expenditures chargeable to the city of Reno.

Due to the change in the freeway at the cause of another arm of the Federal Government, the Housing and Home Finance Agency could not accept the original plan of the urban renewal agency, although it had previously done so.

The Urban Renewal Agency of Reno had to eliminate areas which had previously been planned for residential purposes as the Federal Housing Administration could not approve these areas located in the proximity of the freeway and were in fact not desirable for residential purposes.

The original urban renewal plan had a gross cost of \$3,044,504 with a net project cost of \$1,195,144 after allowances had been made for resale of purchased property.

Now the city of Reno must contribute more than 50 percent of this cost although normal urban renewal plans call for the Federal Government to contribute at least two-thirds of the cost. This has worked a financial hardship on the city and has delayed the progress of a much needed urban renewal area.

I am advised there is precedent for the amendment which is being offered. A similar problem involving noncash grants-in-aid credits for school construction arose in Roanoke, Va., and was solved by enactment of section 312, title III, of Public Law 87-70 on June 30, 1961, the Housing Act of 1961.

I am hopeful that this body will approve the amendment and permit the Housing and Home Finance Agency to negotiate with the Urban Renewal Agency of the City of Reno to correct this inequity.

City authorities, my colleague and I are perfectly willing to stand upon any agreement which can be worked out between the Federal Government and local agency. It is recognized the Congress must give authority to the Housing and Home Finance Agency to correct this inequity and this is the purpose of the amendment.

The amendment has been discussed with the Senator from Alabama [Mr. SPARKMAN]. I am sure that the staff people are completely familiar with the amendment. I hope that the Senator from Illinois will be able to accept the amendment.

I yield to my junior colleague, the Senator from Nevada [Mr. CANNON].

Mr. CANNON. Mr. President, I thank my colleague for yielding. As my distinguished colleague so clearly and eloquently stated, we are dealing here with a matter of equity.

The Urban Renewal Agency, city of Reno, secured more than 4 years ago approval of its urban renewal plan and entered into cooperation agreement with the Housing and Home Finance Agency.

The agreement called for the city of Reno Urban Renewal Agency to be granted noncash school credits totaling \$669,550 based on construction of the Fred W. Traner Junior High School and the Glenn Duncan Elementary School.

After securing approval of its original plan, the Reno Urban Renewal Agency was moving ahead on its project when—through the action of a second Federal agency, the Bureau of Public Roads—a freeway of Interstate 80 was rerouted through the city's renewal area. This action took place in March 1963, nearly 2 years after the city obtained from the HHFA approval of its plan.

It must be emphasized, Mr. President, that the rerouting of the freeway through the urban renewal area was not in any way the fault of the Reno Urban Renewal Agency.

The disruption was caused by an agency of the Federal Government rerouting a freeway.

The result of the rerouting was that the city of Reno lost its schools' credits—upon which it had based a great deal of planning—and was required by the HHFA to contribute \$423,027 in cash, in addition to \$215,344 noncash contributions in the form of streets, curbs, sidewalks, and related facilities.

The cash requirement of \$423,027, in addition to the noncash contribution of \$215,344, totals more than \$638,000, as my colleague pointed out a moment ago.

This figure is well over 50 percent of the net project cost of \$1,195,144, even though almost every urban renewal plan calls for a two-thirds contribution by the Federal Government.

The financial requirements imposed on the Reno Urban Renewal Agency have resulted in a tremendous financial hardship to the city and have caused serious delays in a vital urban renewal project in Reno.

Fortunately, there is precedent for correcting this inequity. It already has been outlined by my colleague.

I am happy to join my colleague in asking that we take the action needed to correct this longstanding inequity and permit the HHFA to negotiate this matter with the city of Reno.

This amendment is necessary to correct the most unfortunate inequity which has been outlined and which was not in any way the fault of the Reno Urban Renewal Agency. It extends to HHFA the authority to correct a serious problem, and I joint my colleague in urging its acceptance.

Mr. DOUGLAS. Mr. President, the two Senators from Nevada have held out the very enticing promise that this amendment would entail no appropriation or expenditure.

Mr. BIBLE. Mr. President, if they were to enter into an agreement, it cer-

tainly might involve the expenditure of Federal funds. I do not want to mislead the Senator from Illinois in this respect. However, this amendment would involve no appropriation insofar as the bill before us is concerned.

It would simply authorize the HHFA to enter into negotiations and attempt to settle the problem with the city of Reno and its urban renewal agency.

Mr. DOUGLAS. Mr. President, I should be very glad to take the amendment to conference in a resolute fashion.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senators from Nevada.

The amendment was agreed to.

Mr. KENNEDY of New York. Mr. President, I send an amendment to the desk and ask that the reading of the amendment be dispensed with and that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, ordered to be printed in the RECORD, is as follows:

On page 73, lines 1 and 2, strike out "and covering property located in an urban renewal area".

Mr. KENNEDY of New York. Mr. President, the proposed amendment would exempt below-market interest rate FHA section 221(d)(3) mortgages covering low- or moderate-rental housing from the statutory \$17,500 per dwelling unit limitation on the amount of a mortgage that can be purchased by FNMA under its special assistance functions.

Under the provisions of S. 2213 as reported, only section 221(d)(3) below-market mortgages covering properties located in urban renewal areas would be exempted from the limitation.

In high-cost areas (both inside and outside urban renewal areas) it is impossible to construct housing within a mortgage amount of \$17,500 per dwelling unit. Higher amounts are permitted in these areas under the FHA ceilings on mortgage amounts, but no corresponding increase is permitted for mortgages purchased under FNMA special assistance. This necessary assistance is therefore not available for FHA mortgages which have dollar amounts required by costs in these areas.

The amendment would make the exemption for FNMA special assistance purposes available to housing with larger mortgage amounts even though the housing is not located in an urban renewal area. The mortgages would remain subject to FHA mortgage amount ceilings.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New York.

Mr. DOUGLAS. Mr. President, I ask the Senator from New York if this is consistent with the policy that we have adopted earlier in the year of raising the insured maximum for four bedroom housing units above the \$17,500?

Mr. KENNEDY of New York. It is.

Mr. DOUGLAS. I believe that statement is correct. May I ask if this is included in the House bill?

Mr. KENNEDY of New York. I am not certain whether it is included in the House bill. We have gone over it with the committee staff.

Mr. DOUGLAS. I am informed that it is included in the House bill. I see no objection to placing it in the Senate bill.

Mr. KENNEDY of New York. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New York.

The amendment was agreed to.

Mr. KENNEDY of New York. Mr. President, I send an amendment to the desk and ask that the reading of the amendment be dispensed with but that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, ordered to be printed in the RECORD, is as follows:

On page 72, line 23, insert "(1)" after "inserting".

On page 73, line 2, strike out "area," and insert the following: " 'area,' and (2) inserting the following after the first sentence: 'Notwithstanding the provisions of clause (3) in the foregoing sentence, the Association may purchase a mortgage with an original principal obligation that exceeds \$17,500 if the mortgage (1) is a below-market interest rate mortgage insured under section 221(d)(3), and (2) covers property which has the benefit of local tax abatement in an amount determined by the Federal Housing Commissioner to be sufficient to make possible rentals not in excess of those that would be approved by the Commissioner if the mortgage amount did not exceed \$17,500, and if local tax abatement were not provided.' "

Mr. KENNEDY of New York. Mr. President, the proposed amendment would make a technical change in the law to give proper recognition to tax abatement in establishing the ceiling for certain FHA mortgages purchased by FNMA under its special assistance functions.

The amendment would except below-market interest rate FHA section 221(d)(3) mortgages covering low- or moderate-income housing which has the benefit of local tax abatement from the statutory \$17,500 per dwelling unit limitation on the amount of a mortgage that can be purchased by FNMA under its special assistance functions. The tax abatement would have to be in an amount sufficient to enable the rentals to be set at approximately the same amounts they would be if no tax abatement existed and the mortgage amount did not exceed \$17,500 per dwelling unit.

In high cost areas it is impossible to construct rental housing within a mortgage amount of \$17,500 per dwelling unit. This limit is imposed by existing law for the purpose of keeping the cost of housing down so that the rentals will be within the reach of low- and moderate-income families. Where tax abatement is provided, this purpose is accomplished even though the construction costs require a higher mortgage amount.

Higher ceilings are already permitted under the FHA statute, and the mortgages would remain subject to those ceilings.

Mr. DOUGLAS. Mr. President, the amendment has just been presented. We have not had a chance to study it. The amendment is perfectly satisfactory. However, I should hesitate to give blanket approval at this time.

I suggest that the Senator from New York withdraw his amendment. We can have a later investigation of the matter and the amendment can be offered at a later date.

Mr. KENNEDY of New York. That is agreeable. Mr. President, I withdraw the amendment.

The amendment was withdrawn.

Mr. KENNEDY of New York. Mr. President, I send an amendment to the desk and ask that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, ordered to be printed in the RECORD, is as follows:

On page 39, after line 11, insert a new section 207 as follows and renumber the following sections and cross-references in title II accordingly.

"LARGER HOME IMPROVEMENT LOANS IN HIGH COST AREAS"

"SEC. 207. (a) Section 220(h)(2)(i) of the National Housing Act is amended by inserting before the semicolon at the end thereof: 'Provided, That the Commissioner may, by regulation, increase such amount by not to exceed 45 percentum in any geographical area where he finds that cost levels so require'.

"(b) Section 220(h)(11) of such Act is amended by inserting before the period at the end thereof 'or such additional amount as the Commissioner has by regulation prescribed in any geographical area where he finds cost levels so require pursuant to the authority vested in him by the proviso in subsection (2)(i) of this section'."

Mr. KENNEDY of New York. Mr. President, my amendment would authorize the Federal Housing Commissioner to increase the maximum amount of a home improvement loan which he may insure—now \$10,000—by up to 45 percent in high-cost areas. The amendment would permit the Commissioner to increase the maximum amount of a home improvement loan made in an urban renewal area under section 220(h) of the National Housing Act, or outside of an urban renewal area under section 302(k) of the National Housing Act. In addition it would permit the maximum amount of rehabilitation loans made under the provisions of section 312 of the Housing Act of 1964—now \$10,000—to be increased by 45 percent in high-cost areas.

Mr. DOUGLAS. Mr. President, I am disposed to accept this amendment, for this reason: It is very inflexible to impose one maximum limit for the country as a whole when there are certain areas where modernization, construction, and repair costs are very much above those of the Nation as an average. I think there must be some flexibility to take into account local conditions. Therefore, I am glad to accept the amendment of the Senator from New York.

Mr. KENNEDY of New York. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to.

Mr. KENNEDY of New York. Mr. President, finally I have an amendment which I send to the desk and ask to have read.

The PRESIDING OFFICER. The amendment offered by the Senator from New York will be stated.

Mr. KENNEDY of New York. I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment offered by Mr. KENNEDY is as follows:

On page 49, line 2, insert "(a)" after "Sec. 304.", and on page 49, after line 4, add to section 304, two new subsections "(b)" and "(c)" as follows:

"(b) Section 110(e) of the Housing Act of 1949 is amended by adding at the end thereof the following new paragraph:

"Gross project cost may include the cost of payments made, pursuant to State or local law, to individuals and families displaced from an urban renewal area and relocated in decent, safe, and sanitary housing, if such payments are required by State or local law to be paid in every program of the State or locality, as the case may be, which results in the displacement of individuals and families.

"(c) Section 15(8) of the United States Housing Act of 1937 is amended by inserting immediately after the end thereof, the following: 'A "relocation payment" as used in this paragraph may include, in addition to the payments described above, the cost of payments made, pursuant to State or local law, to individuals and families displaced from a low-rent housing project site as a result of the acquisition of real property by a public housing agency and relocated in decent, safe, and sanitary housing, if such payments are required by State or local law to be paid in every program of the State or locality, as the case may be, which results in the displacement of individuals and families.' "

Mr. KENNEDY of New York. Mr. President, this amendment deals with the gross project cost, and provides as follows:

(b) Section 110(e) of the Housing Act of 1949 is amended by adding at the end thereof the following new paragraph:

"Gross project cost may include the cost of payments made, pursuant to State or local law, to individuals and families displaced from an urban renewal area and relocated in decent, safe, and sanitary housing, if such payments are required by State or local law to be paid in every program of the State or locality, as the case may be, which results in the displacement of individuals and families.

"(c) Section 15(8) of the United States Housing Act of 1937 is amended by inserting immediately after the end thereof, the following: 'A "relocation payment" as used in this paragraph may include, in addition to the payments described above, the cost of payments made, pursuant to State or local law, to individuals and families displaced from a low-rent housing project site as a result of the acquisition of real property by a public housing agency and relocated in decent, safe, and sanitary housing, if such payments are required by State or local law to be paid in every program of the State or locality, as the case may be, which results in the displacement of individuals and families.' "

In other words, if an individual is displaced because of public housing or urban renewal, and it is required by a State or local community that a certain amount of money be paid for the removal of that family or individual—if that is

required by State or local law—it should be included in the Federal project cost.

Mr. DOUGLAS. Does this mean that payments made for displacement or relocation by localities would be included as a part of the local contribution of one-third?

Mr. KENNEDY of New York. That is correct in part.

Mr. DOUGLAS. It would be counted as a part of the contribution by the locality?

Mr. KENNEDY of New York. That is correct; one-third would be contributed by the locality and two-thirds contributed by the Federal Government. It would be part of the project cost.

Mr. DOUGLAS. So the municipality or State would not have to pay the entire two-thirds, but the Federal Government would meet two-thirds of it?

Mr. KENNEDY of New York. That is correct.

Mr. DOUGLAS. The Federal Government would meet not only its own relocation costs, but two-thirds of the State or local community's cost?

Mr. KENNEDY of New York. Yes.

Mr. DOUGLAS. Has the Senator an estimate as to how much this would cost?

Mr. KENNEDY of New York. The estimate is \$1,800,000.

Mr. DOUGLAS. While I feel very benevolent, this amendment involves a large sum, and I do not want to commit the managers of the bill to accepting an amendment involving an expenditure of \$1,800,000. This would probably be an annual commitment for Congress.

Mr. KENNEDY of New York. I am told this is the procedure that has been followed up to the present time. The language of the legislation as it now appears is such that the housing authorities do not feel they can continue it without the authority of Congress.

Mr. DOUGLAS. It is disconcerting to have amendments proposed without prior consideration by the committee. I wonder if the Senator would not postpone offering it for a day, in order to ascertain whether it is in consonance with the general program.

Mr. KENNEDY of New York. I am glad to do that. May I say, so that Senators will understand, that the amendment was discussed with the Senator from Alabama [Mr. SPARKMAN]—only today, admittedly. The Senator from Alabama thought it was satisfactory. He thought it could be accepted. I talked with the staff, who suggested that it be brought up. I brought it up on the basis of the assumption that it was acceptable and satisfactory, but I admit I did not have an opportunity to talk with the Senator from Illinois about it.

Mr. DOUGLAS. I am sure what the Senator has said is correct and that the Senator from Alabama would undoubtedly accept it. I wish he were present.

Mr. SPARKMAN. Mr. President, I may say to the Senator from Illinois that I have been present for some time. I have been greatly enjoying his handling of the bill.

Mr. President, I have discussed this amendment with the Senator from New York. It seems to be pretty much in keeping with our program. It is a mat-

ter of tying it properly to the credits to be applied. The provision is not in the House bill. My thought was, and I so stated to the Senator from New York, that I would be willing to take the amendment to conference, and between now and then obtain such additional information as we can about the amendment. I advised him that it seems to be in compliance with the policy under which we have been trying adequately to help the people who are displaced by these programs. I am willing to accept the amendment.

Mr. KENNEDY of New York. I appreciate my colloquy with the Senator from Alabama and with the Senator from Illinois, and I am grateful to the Senator from Alabama for accepting the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

Mr. ELLENDER. Mr. President, I wish to ask a question of the Senator from New York. Will this expenditure be an annual charge?

Mr. KENNEDY of New York. Where there are any movements in public housing and urban renewal, these payments would be made. I am informed that this has been the practice since 1960.

Mr. ELLENDER. Would it mean that a dislocated family could be moved from one city to another, if it so desired, and that the gross project cost would include that?

Mr. KENNEDY of New York. No. It is not a question of Federal officials making that decision. It has to be in accord with procedures followed in the State and local communities. There would be no regulations or rules or laws that could be applied only to Federal programs; but they would have to be in effect in local communities, applying to their local programs. If there is a payment made where there is a movement under local law, this kind of payment would be made under Federal programs.

Mr. ELLENDER. In other words, it is to comply with local law.

Mr. KENNEDY of New York. That is correct. It would not create a special situation related only to the Federal Government.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to.

Mr. KUCHEL obtained the floor.

Mr. KUCHEL. I ask unanimous consent that I may yield to the Senator from Iowa, without losing my right to the floor, to offer an amendment which is not controversial.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MILLER. Mr. President, I send an amendment to the desk and ask that it be read.

The PRESIDING OFFICER. The amendment offered by the Senator from Iowa will be stated.

The legislative clerk read as follows:

On page 6, after line 5, add a new subsection (5) as follows:

"(5) No payments under this section may be made with respect to any property for which the costs of operation (including wages and salaries) are determined by the

Administrator to be greater than similar costs of operation of similar housing in the community where the property is situated."

Mr. MILLER. Mr. President, I have discussed the amendment with the distinguished Senator from Illinois, who was acting manager of the bill a few moments ago. He agrees that this is a helpful amendment. It is designed to provide for uniformity in the operation of housing such as is covered by the bill, in line with what the costs are in local communities. It is particularly designed to avoid the abuse where nonprofit corporations might come under the act and then abuse the act by paying excessive wages and salaries.

I hope that the Senator from Alabama, who is now the Senator in charge of the bill, will accept the amendment.

Mr. SPARKMAN. Mr. President, the amendment seems to me to promise a good job and, for my part, I am willing to accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

Mr. KUCHEL. Mr. President, I have a series of amendments of varying controversy, and I send the first one to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 61, between lines 17 and 18, insert a new section as follows:

TECHNICAL AMENDMENT

SEC. 503. The second paragraph of section 404(b) of the Housing Act of 1950 is amended by inserting after "would provide housing," the following: "or to a student housing cooperative corporation described in clause (5) of this subsection."

Mr. KUCHEL. Mr. President, I believe that I can truthfully say that the amendment is technical in nature. My recollection is that the Senate took action along similar lines a year ago. This would make the law covering loans to student cooperatives conform with congressional intent when the law was amended a year ago.

Last year, the amendment apparently contained a technical flaw to prevent groups such as the University Student Cooperative Association on the Berkeley campus of the University of California from qualifying for a nonguaranteed loan.

The amendment has been drafted by the HHFA, and is in correct from technically. I believe that the able Senator from Alabama will find no objection to the amendment.

Mr. SPARKMAN. Mr. President, I believe I am correct in saying that last year a similar amendment was offered, and we accepted it. It makes up for a technical defect in existing law, and I have no objection to it.

The PRESIDING OFFICER. The question is on agreeing to amendment of the Senator from California.

The amendment was agreed to.

Mr. KUCHEL. Mr. President, I now send to the desk another in my series of amendments and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The legislative clerk proceeded to state the amendment.

Mr. KUCHEL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD at this point.

The amendment offered by Mr. KUCHEL is as follows:

On page 90, between lines 19 and 20, insert a new section as follows:

"DEFINITION OF RURAL AREA

"SEC. 907. Title V of the Housing Act of 1949 is amended by adding at the end thereof (after the section added by section 906 of this Act) a new section as follows:

"DEFINITION OF RURAL AREA

"SEC. 520. As used in this title, the terms 'rural' and 'rural area' mean any area, open country, place, town, village, or city having a population of 5,500 inhabitants or less that is not part of or associated with an urban area."

Mr. KUCHEL. Mr. President, the amendment would provide that the figure of 5,500 population would be used by the Farmers Home Administration in defining a rural conglomeration. Presently, the Farmers Home Administration uses the census tract figure of 2,500 to define a rural area. If the 5,500 figure could be applied, additional rural families would be made eligible for Farmers Home Administration loans under existing law. At present loans are made at 4 percent for 33 years.

One of the strongest points in favor of the amendment is that it would allow for the expansion of the "self-help" housing program, wherein rural people can contribute time and talent to the building of their own homes.

Let us say, for example, that a group of 6 families in an area which would be in the neighborhood of 5,000 people should make an application for a self-help project. FHA grants a loan, if no other financing is available, of a size which will finance the materials and the work that cannot be done by the applicants. Subcontractors and supervisors would be hired when necessary. Payments for materials and services would be made out of funds to be provided by FHA.

A somewhat similar provision was accepted in the House of Representatives. If I may use my own State as an example, there are some farm areas in California which are inhabited by American migratory laborers. This would be an incentive for them to become permanent residents of my State and would supply a labor force which is sometimes tragically deficient. I believe it would be in the public interest.

Mr. SPARKMAN. Mr. President, I wish very much that the Senator from California would not press this amendment. It is in the housing bill, and it will be in conference.

Up until a few years ago, in programs relating to farm housing and rural housing for veterans, or any kind of

housing which was rural by name, really meant rural and on the farm.

Finally, 3 years ago, I believe, we amended the act to accept the definition by the Census Bureau of 2,500 and less as being rural.

Even that definition has given us trouble, because there are many small towns of 2,500 population with sewers, water systems, sidewalks, and so forth. The same conditions prevail there as in cities and towns where the FHA makes regular loans. Farm housing and rural housing programs have been set up primarily to take care of those areas which could not qualify under the usual and regular FHA terms.

This figure represents a further expansion—is it 5,500 or 7,500?

Mr. KUCHEL. It is 5,500.

Mr. SPARKMAN. In other words, we are going from 2,500 to 5,500.

There are many towns of 5,000 population and less which have no claim on the special benefits provided under these programs for rural areas.

I say to the Senator from California that this point will come up in conference, and we can study it between now and then and get more information. I did not know the amendment was to be offered here or in committee. We have not had an opportunity to study it. It will be in conference, and if he would be willing to let it rest at that. I assure the Senator that I will give most careful and sympathetic consideration to handling it in a way which will be proper.

The Senator from California may not be aware of this, but at present there is trouble among mortgage finance companies and various lending agencies in connection with our regular FHA program and other programs which go into the 2,500 population size towns, because, it is said, the Government is competing unfairly. In some areas, there is some basis, for that claim. Think how much more trouble there will be if we increase the population limitation to the 5,500 figure proposed in the amendment. It may very well be that we can draft some other descriptive language which will expand to take the areas where they are really needed.

Mr. KUCHEL. Inasmuch as the Senator from Alabama assures me that he will look into the problem sympathetically, and that it will be considered in conference, and inasmuch as I am sure the Senator finds the problem with respect to migratory agricultural labor to be a most important one, I withdraw my amendment and send another amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be withdrawn.

The next amendment of the Senator from California will be stated for the information of the Senate.

The legislative clerk proceeded to state the amendment.

Mr. KUCHEL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD at this point.

The amendment offered by Mr. KUCHEL is as follows:

On page 55, between lines 5 and 6, insert a new section as follows:

"REDEVELOPMENT OF AREAS CONTAINING TEMPORARY WAR HOUSING PROJECTS

"SEC. 309. Notwithstanding any other provision of law, loan and grant assistance under title I of the Housing Act of 1949 for the renewal of any blighted, deteriorated, or deteriorating area of a locality which consists primarily of temporary war housing projects constructed under an Act entitled 'An Act to expedite the provision of housing in connection with national defense, and for other purposes', approved October 14, 1940, as amended (the so-called Lanham Act), may be extended in the same manner and to the same extent as in the case of any other urban renewal area, if—

"(1) such locality has at no time since the acquisition of such housing from the United States received from it any net income, substantially all income therefrom having been utilized for the maintenance and operation of such housing for the benefit of persons of low or moderate incomes;

"(2) there are included in such area at least 1200 dwelling units of such housing at the time an urban renewal plan for such area is submitted; and

"(3) the urban renewal plan for such area provides for a predominance (exclusive of public facilities and open spaces) of housing for persons of low or moderate incomes."

Mr. KUCHEL. Mr. President, in this situation, I speak for the city of San Francisco. The pending amendment would make it possible for the city of San Francisco to qualify for grants-in-aid under the urban renewal program for renewal of Hunters Point war-time housing project.

Any of my colleagues in the Senate who know San Francisco, know Hunters Point. The wartime housing facilities located there are a blight. They are no good. They are dangerous. By law they will have to come down in 3 more years. The HHFA has ruled that San Francisco may not participate in the grants-in-aid program since the law prohibits any city or other body from receiving grants, if it has previously received Government assistance. San Francisco has received "aid," according to the FHA, under the terms of the purchase agreement under which the city acquired property under the Lanham Act.

The Lanham Act made it possible for San Francisco to purchase the Hunters Point project for the original land acquisition cost to the Government. The difference between the actual worth of the project at the time San Francisco acquired Hunters Point and the price paid by the Government is being treated by HHFA as a grant.

According to the San Francisco Redevelopment Agency, Hunters Point, by any standard, is a slum and should be redeveloped. This is what San Francisco wants to do. If it cannot participate in the grant-in-aid program, the land will have to be sold at its market value, which, of course, will mean that the housing built on it will have to be of a type and price not economically available to the people who now occupy Hunters Point. Adjoining it is a military installation, the San Francisco Naval Shipyard.

I ask my able friend from Alabama to accept the amendment and take it to

conference, with the hope that a great American city, in its desire to improve itself and to improve the habitation of the people who live there and work there may not be penalized because it purchased the real property under the Latham Act, and thus subjected itself to an interpretation that at that time it received a benefit.

I sincerely urge my friend from Alabama to accept the amendment.

Mr. SPARKMAN. Mr. President, has the stand of the housing agency been ascertained?

Mr. KUCHEL. I am informed that the head of that agency has no objection. A member of my staff has so informed me.

Mr. SPARKMAN. Do I correctly understand that this amendment is not included in the House bill?

Mr. KUCHEL. It is not included in the House bill. The Senator is correct. A Member of Congress from the San Francisco district endeavored to have it included in the bill.

Mr. SPARKMAN. I do not address myself to this particular point, or merely in connection with this amendment, but I have been rather amazed by the rather large number of amendments dealing with local problems that are being presented. They are problems that we have not had an opportunity to study. There are similar projects in every housing bill that comes up, but usually they are presented to us in the course of committee consideration, and we have an opportunity to examine witnesses and find out exactly what the attitude of the agency is and what the facts are.

I hope Senators realize the burden placed on me, on the subcommittee, and on the committee as a whole in trying to weigh all these individual projects in the balance and to say, "I accept," or "I agree."

I do not mind when a project is called up which sounds reasonable; and I concede that there is some logic in what the Senator from California has said, but there are complications in it too. It is an unusual problem. Here the housing was given, and now the time comes for the housing to be torn down at the expense of the city, and there is a problem as to whether credit will be allowed in connection with the urban renewal program.

Mr. KUCHEL. The Senator is correct.

Mr. SPARKMAN. It can be seen that there are complications in it which we cannot weigh and consider properly and fairly, with the project being brought up for the first time.

I am perfectly willing to take the amendment to conference, as I have other amendments. However, I wish it understood that we shall have an opportunity to consider the amendment and to obtain all the facts and to consider the whole situation so that we shall know how to conduct ourselves in conference.

Mr. KUCHEL. I thank my able friend.

Mr. SPARKMAN. I should like very much to have an expression from the able Senator from Texas.

Mr. TOWER. Mr. President, I hope the distinguished Senator from Alabama will accept the amendment of the Senator from California. We have dealt

with some other special problems today in connection with the bill. I believe we should be consistent and deal with this as well.

Mr. SPARKMAN. Yes. I said I was willing to accept it. I wanted to make my statement to show how difficult it is to consider individual problems that never have been called to our attention. I want it understood that in taking the amendment to conference, we shall have time to check into it, as we normally would do in committee. On that basis I am willing to accept it.

Mr. KUCHEL. I am most grateful to the Senator from Texas for his comment; and thank my friend from Alabama. I recognize that the conference will have before it a number of critical questions which will need all the assistance by way of information that the Senator will be able to obtain. I am grateful that the Senator has seen fit to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California [Mr. KUCHEL].

The amendment was agreed to.

Mr. KUCHEL. Mr. President, I send another amendment to the desk. I ask unanimous consent that it be not stated.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment will be printed in the RECORD.

The amendment is as follows:

On page 10, between lines 7 and 8, insert the following:

"(c) The third sentence of section 212(a) of such Act is amended by striking out 'described in subsection (d)(3)' and all that follows and inserting in lieu thereof 'described in subsection (d)(3) or (d)(4).'"

On page 32, between lines 6 and 7, insert the following:

"(4) Section 212(a) of the National Housing Act is amended by inserting at the end thereof the following new sentence: 'The provisions of this section shall also apply to insurance under title X with respect to laborers and mechanics employed in land development financed with the proceeds of any mortgage insured under that title.'"

On page 76, line 1, strike out "707 and 708" and insert "708 and 709".

On page 78, between lines 8 and 9, insert the following:

"LABOR STANDARDS"

"SEC. 807. Title VII of the Housing Act of 1961 is further amended by inserting after section 706 (as added by section 806 of this Act) the following new section:

"'LABOR STANDARDS"

"'SEC. 707. (a) The Administrator shall take such action as may be necessary to insure that all laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed with the assistance of grants under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended. The Administrator shall not approve any such grant without first obtaining adequate assurance that these labor standards will be maintained upon the construction work.

"(b) The Secretary of Labor shall have, with respect to the labor standards specified in subsection (a), the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 133z-15), and section 2 of the act

of June 13, 1934, as amended (48 Stat. 948; 40 U.S.C. 276c).'"

On page 78, line 10, strike out "807" and "707" and insert in lieu thereof "808" and "708", respectively.

On page 78, line 17, strike out "808" and insert in lieu thereof "809".

Mr. KUCHEL. Mr. President, in a word, the Senate by adopting the amendment I have sent to the desk, would provide that the prevailing wage statutes, the so-called Davis-Bacon Act, would apply to the various titles and sections of the housing bill now pending before us. This would echo the action taken in the housing bill which passed the House of Representatives, and thus would remove any doubt of the application of the Davis-Bacon provisions to whether legislation comes from the conference committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

Mr. KUCHEL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCINTYRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARTKE. Mr. President, I have an amendment at the desk which refers to that part of the bill dealing with Michigan City.

The PRESIDING OFFICER. The Chair wishes to inform the Senator from Indiana that amendments are pending.

Mr. HARTKE. Mr. President, may I inquire what amendments are pending?

The PRESIDING OFFICER. The amendment of the Senator from California.

Mr. HARTKE. Mr. President, I should like to direct a question to the Senator from California. Does the Senator intend to proceed with his amendment now?

Mr. President, I ask unanimous consent that the pending amendment be laid aside temporarily.

The PRESIDING OFFICER. Is there objection to temporarily laying aside the amendment of the Senator from California?

Mr. TOWER. Mr. President, reserving the right to object, we should have an expression from the Senator from California.

Mr. KUCHEL. Mr. President, my amendment is pending. I do not believe that consideration of the amendment will take too long.

Mr. HARTKE. I am not objecting to that. I only wished to move ahead.

The PRESIDING OFFICER. Is there objection?

Mr. HARTKE. Mr. President, I withdraw my unanimous-consent request.

The PRESIDING OFFICER. The request of the Senator from Indiana is withdrawn.

Mr. SPARKMAN. Mr. President, we then revert to the amendments offered by the Senator from California.

The PRESIDING OFFICER. The Senator is correct.

Mr. SPARKMAN. Mr. President, most of the content of the amendment offered by the Senator from California is not subject to serious objection, but there is one provision while I think is objectionable, and should be modified. If it were modified, I would have no objection to taking the amendment to conference.

Year after year, as different programs are put into effect, the question of the application of the Davis-Bacon Act arises. Practically without exception—I believe without exception—we have applied the Davis-Bacon Act to all projects except what we called single-dwelling projects; and I do not believe we ought to upset that policy.

We have built houses under that act. There has been ample protection of the projects that really counted—the big projects—and I do not believe we should upset a policy that has worked so well.

I should like to suggest the language which I understand the Senator from Utah proposes. If the Senator from California would accept that modification, I would have no objection to going along with the proposed amendment.

Mr. KUCHEL. Mr. President, I regret I cannot change the amendment.

I am one of those in this body who believe the theory of prevailing wages is a sound one and ought to be applied across the board where the financial assistance or the credit of the United States is involved.

If one of my colleagues wishes to offer an amendment to the amendment, let us dispose of it; but I regret to say that I cannot voluntarily change the amendment now pending.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield to my able friend the Senator from New York.

Mr. JAVITS. I appreciate the Senator's allowing me to join in sponsoring his amendment with him. Having served on the committee and having had the honor of serving under the chairmanship of the Senator from Alabama, who is one of the greatest friends that housing in this country has ever had—

Mr. KUCHEL. Indeed he is.

Mr. JAVITS. I am very cognizant of what the Senator from Alabama has referred to in respect to single family houses, whatever happens on the pending amendments. We have had a constant feeling on the part of the trade unions, especially the building trade unions, that we have cut around the one-family field precisely because it is the greatest field today for nonunion builders. Hence it is time for us to come to grips with the problem. These things go on and on. I appreciate very deeply the sentiment of the Senator from Alabama. Ultimately we must face the problem. Perhaps this is as good a time as any to face it. It is so much easier and much more engaging and agreeable to have these proposals accepted. But I feel that the Senator from California has had the view—and I share in it—that we have skirted this issue for some time, and I believe that the time has come when we should face it.

Mr. KUCHEL. I thank my able friend.

Mr. BENNETT. Mr. President, my good friend the Senator from California has indicated that he would invite a colleague to offer an amendment to his amendment. Therefore, I accept his invitation, and move that following the language in the first paragraph of his amendment, which ends with the word "described" in subsection (d) (3) or (d) (4), the following words be added, "which covers property on which is located a dwelling or dwellings designed principally for residential use for 12 or more families."

The PRESIDING OFFICER. The amendment to the amendment of the Senator from California will be stated.

The LEGISLATIVE CLERK. Before the period, at the end of paragraph (c), it is proposed to insert the following language: "which covers property on which is located a dwelling or dwellings designed principally for residential use for 12 or more families."

Mr. BENNETT. I think the issue is clear. It has been discussed. I do not feel the necessity of continuing the discussion. If the Senator from California is agreeable, I am willing to ask for the yeas and nays on the amendment.

Mr. JAVITS. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. JAVITS. Mr. President, I wish to make a few observations on the bill and to express my appreciation to the committee for the acceptance of a number of amendments which I proposed to the committee. I wish to express my appreciation especially to the Senator from Texas [Mr. Tower], now the ranking member of the Subcommittee on Housing, who gave my amendments the greatest personal attention and went to considerable personal pains to see to it that they receive the consideration of the committee. I also express appreciation to the distinguished Senator from Alabama [Mr. Sparkman], chairman of the Subcommittee on Housing, and the Senator from Illinois [Mr. Douglas], who have always been most sympathetic to any proposals I have made.

First, the committee adopted an amendment to increase the cost limitations for the construction of rooms in low-rent public housing from \$2,000 to \$2,400 for regular units and from \$3,000 to \$3,500 in the case of units constructed for the elderly in Alaska. The increases are based on the higher costs of construction today. Such increases in the statutory limitation on construction costs for rooms in low-rent housing are vitally important to improve the living conditions of the larger number of lower income citizens who utilize this important program.

In my second amendment, the committee authorized the existing 15-percent limitation for public housing funds for any one State to be implemented in conjunction with the right of the Administrator of the HHFA to reallocate units of public housing not placed under construction within 5 years from the date reserved without regard to that limitation.

In States such as New York, the statutory limit on funds may be reached even though there is urgent need for more low-rent housing, and the local authorities could proceed without delay in providing such additional low-rent housing because of this amendment. For several years, many of us have endeavored to insure that States which have the heaviest need for low-income housing shall not be burdened with the same inflexibility as States not having such heavy, pressing needs.

The committee has dealt with the injustices of the 15 percent limitation in an excellent manner. This action will enhance benefits for those who urgently need public housing in large cities, such as those in my own State of New York.

Third, the committee has adopted an amendment which I proposed to increase the amount of relocation adjustment payments authorized to be made to any small business concern displaced by urban renewal from the present \$1,500 to \$2,500. In the Housing Act of 1964, Congress provided for \$1,500 payments to displaced businesses when earnings were under \$10,000 a year. Since that time the problem has had considerable study.

Incidentally, the Senator from Alabama [Mr. Sparkman] has led in that study, in fairness to families and small business, and the study has shown the difficulty which small business faced with the inadequacy of relocation payments. I now feel that the committee has made a real contribution on that score, and I am hopeful also that the Senate Committee on Government Operations, which is conducting hearings in an effort to establish uniform policy for relocation adjustments, will provide additional means for aiding those displaced by Federal programs.

The Select Subcommittee on Real Property Acquisition of the House Public Works Committee, in a report completed in December of last year, provided new evidence on the insufficiency of certain relocation payments. The study emphasizes the difficulties which small businesses incur in relocating without the loss of established patronage. The variety of costs incurred in establishing a business apart from moving expenses and those required to develop new patronage are not, in many cases, properly provided for. Displacements are particularly difficult for the elderly and non-white displaced. The inadequacy of relocation payment and the absence of advice and counseling also contribute to the high rate of business discontinuance which in many communities ranges between 25 and 40 percent.

I also commend the committee for bringing the focus of the rent supplement program upon lower income families having the greatest need for such housing assistance. The program as it was originally proposed by the administration was intended to aid middle income housing with those having incomes of between \$4,000 and \$6,000. The committee has seen fit to establish an experimental program with respect to housing built by private nonprofit or limited dividend corporations or by cooperatives and financed with section 221(d) (3) be-

low market interest rate mortgages, as well as programs under housing for the elderly. Under the committee bill, only 10 percent of the amounts appropriated for the purpose of making rent supplement payments could be used for this experimental program and rent supplement payments could not be made with respect to more than 20 percent of the dwelling units.

I believe that we should give very careful consideration to helping our middle income housing programs and should give serious attention to the results of this experimental program. The action by the committee in placing an interest rate ceiling of 3 percent on mortgages which may be insured by FHA under the section 221(d) (3) below market interest rate program will do much to reduce the costs of middle income housing and may provide a stimulus to the program which has not existed, in a meaningful way in areas of the Northeast such as New York.

However, I urge the Administrator of HHFA to continue to review ways of improving the existing middle-income housing program. I have this year introduced legislation to establish a program to set up Federal guarantees for tax-free housing bonds issued by local housing authorities for sale on the public market, and allow these authorities to use the revenue to make low-cost, long-term mortgage loans available to nonprofit, or limited-profit corporations for construction of moderate-income housing projects and housing for the elderly.

Mortgage loans would be authorized in an amount up to 90 percent of the development cost of a project with 50-year maturities and at interest rates not in excess of 5 percent. Dividends of the eligible borrowers would be limited to 6 percent and all rents and carrying charges would be subject to the approval of the local housing agency.

Such a program would follow the successful pattern of the New York State Mitchell Lama program established in 1956 and the pioneering program of the New York State Housing Finance Agency which has sold \$429,239,000 in long-term obligations in the open market to permit financing of privately owned housing at rentals low enough to make modern housing available to a vast segment of the population that previously could not afford new housing. Some 130 projects consisting of over 58,000 units have been initiated under this program. I believe that based upon the precedent of New York State's efforts in financing private moderate-income housing that the private enterprise system can and should be stimulated to fill the urgent needs of moderate-income housing to a far greater extent than has been the case up to now. There is strong precedent for such an emphasis on the role of private enterprise throughout existing housing legislation, particularly the congressional declaration of national housing policy in the Housing Act of 1949 which states:

The policy to be followed in attaining the national housing objective established shall be: (1) private enterprise shall be encouraged to serve as large a part of the total need as it can; (2) governmental assistance shall be

utilized where feasible to enable private enterprise to serve more of the total need; (3) appropriate local public bodies shall be encouraged and assisted to undertake positive programs of encouraging and assisting the development of well-planned, integrated residential neighborhoods, the development and redevelopment of communities, and the production, at lower costs, of housing of sound standards of design, construction, livability, and size for adequate family life.

LOW-INCOME HOUSING

The need for greatly increased efforts to assist lower income families to obtain decent housing is also of utmost priority. In 1964, one-fifth of the population—36 million persons—were living in housing that is either dilapidated, deteriorating, or lacking basic plumbing facilities. New York City alone has in excess of 250,000 units of substandard housing. Moreover, 75 percent of families living in the worst housing in the Nation have annual incomes under \$4,000 and 50 percent incomes under \$2,000 a year. The impoverished housing conditions in which low-income families are incarcerated for their lives without hope of change must be remedied. The goal of 810,000 low-cost housing units set by the Congress in the Housing Act of 1949 for construction in a 6-year period remains approximately 25,000 units short 16 years later. Additional and stepped up low-cost housing construction is essential. S. 2213, the administration's housing bill, would continue the low-rent housing program for 4 years, increasing for each year the authority for annual contributions by \$47 million. The additional authority would provide, over the next 4 years, for, first, 35,000 new units per year, second, 25,000 units for acquisition and leasing of privately owned housing. I agree with Administrator Weaver's testimony before the Housing Subcommittee that the "proposed authorization is modest when set against the total current needs." Under an authorization of 60,000 new units, New York, a State in which 18 million people reside, would only receive 9,000 units. This allocation is below the State's present needs and below national needs. Nationally, there are some 500,000 families on the admission list for public housing. Substantially increased construction of units is necessary to more nearly fit the needs of this Nation.

There are a number of other very important sections in the housing bill. Section 602 of the bill would authorize Federal grants to local public bodies and agencies to finance 50 percent of the cost of projects for basic public water and sewer facilities. These water facilities would include facilities to store, supply, and distribute potable water for domestic, commercial, and industrial use. In view of the critical drought in the Northeast area, this matching-grant program is vital and should be implemented promptly. I hope that the program will be particularly directed to helping areas of special need which have been beset with drought conditions.

The Senate bill provides special assistance to communities having a population of 10,000 or less by increasing the amount of a grant for water facilities up to 90 percent of the development cost. This provision would be of great as-

sistance to the smaller communities, and I hope will be retained in conference.

Section 107 of the bill provides important mortgage relief for homeowners who are unemployed as the result of the closing of a Federal installation. Many of the servicemen and civilian employees of Federal installations which have been ordered shut have purchased homes with FHA and VA mortgages. Where installations are closed, these homeowners may lose all or a substantial portion of their equities in their homes. Section 107 provides a helpful moratorium on payments, on principle, and if necessary, interest on FHA insured and VA guaranteed mortgages.

Additional help has been provided for those affected by base closings in section 108 of S. 2213 which would authorize the Secretary of Defense to acquire one or two family housing situated at or near a military installation which the Department of Defense subsequent to November 1, 1964, ordered to be closed.

I am also heartened by the increase in authorization for housing for the elderly by \$150 million from \$350 to \$500 million and by the increase in authorization for college housing loans. These programs have been vital ones and deserve accelerated efforts.

Title VIII of the Senate bill provides essential help for urban areas as well as suburbs to increase their expenditures for park improvement and other beautification activities. The expanded grant program would strengthen the ability of State and local agencies to acquire urban land which has a value for park, recreation, conservation, scenic, or historic purposes.

Mr. KUCHEL. Mr. President, I shall detain the Senate for only a moment. Ever since the late Robert Bacon and the late Jim Davis, two members of my party, wrote the prevailing wage statutes into the laws of the land, the intent by which Congress has operated in the field of construction or in aid of construction has been that where the Federal Government has an interest in construction, the wages prevailing in the area where the construction is located shall be paid.

The law today provides that one shall comply with the prevailing wages if he is building a dwelling having more than 12 family units. If only 12 units are built, he is exempt. He can tell the people in his area that he will not pay the wages which prevail there. He can import labor from some other part of the country and pay lower wages.

I object to that practice and hope, therefore, that the amendment of the distinguished Senator from Utah [Mr. BENNETT] will be rejected.

Mr. BENNETT. Mr. President, I did not expect to carry on the discussion, but I shall not take long. I remind Senators that the FHA program now covers somewhere between 35 and 40 percent of the total residential construction. If this amendment is attached to the bill, the volume will go much below that, because it will be possible to obtain conventional financing without obligating oneself to the prevailing rate.

I come from a State that has many poor rural communities. I have a mem-

ory that I should like to share with the Senate. A community in my State undertook to build a hospital and applied for Hill-Burton funds. When it applied for Hill-Burton funds, it found that it would be required to pay the prevailing wage rate in Salt Lake City, an urban area with a complex typical urban wage scale. They refused the Hill-Burton funds and built that hospital with their own labor, in their own town, at a scale that was satisfactory to the people who worked on the hospital, for less money than they would have been required to expend if they had used Hill-Burton funds.

The United States does not have a homogeneous pattern. If we were to incorporate the Kuchel amendment in the bill and require the payment of prevailing rates for the construction of homes under the program, we would be starting a process which would reduce the use of FHA guarantees to zero.

I hope that the Senate will realize that and will vote for my amendment which would, in effect, confine the use of the Davis-Bacon rate to multifamily apartment type buildings, rather than to impose them on the small dwelling that is being built by a man for his own use.

I have nothing further to say. I suggest that the Senate proceed to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah [Mr. BENNETT] to the amendment offered by the Senator from California [Mr. KUCHEL].

Mr. KUCHEL. Mr. President, the prevailing wage statutes, as the amendment I have offered, would require the payment of wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended.

That, in my mind, is sound public policy. Therefore, I believe that the amendment of the Senator from Utah should be rejected.

Mr. BENNETT. Mr. President, under the Davis-Bacon law, the Administrator determines the prevailing wage. When we go into a rural community in which there is no pattern of wage scales for the community crafts, they must go to the large communities in which the wage pattern has already been determined.

I hope that the Senate will agree to my amendment.

Mr. SPARKMAN. Mr. President, we have never applied the Davis-Bacon Act to single family units. This proposal would not follow the usual FHA pattern.

The amendment would apply to low income people, under section 221(d)(3) and (4).

It would go to those who would get the construction at the current prevailing rate; and others would get the housing at below market interest rate.

We have applied the Davis-Bacon Act to every housing program with the exception of the single-family unit. We know that the inevitable result is to increase the cost of housing. We would be increasing the cost of housing that we have tried to get at a low level so that

people with a lower income could occupy the housing.

It seems to me that this would be a case of cutting off our nose to spite our face.

I do not believe that we ought to change our policy with reference to these two particular programs. The housing would be built for low income families.

Mr. McNAMARA. Mr. President, I associate myself with the remarks of the distinguished Senator from California [Mr. KUCHEL]. The argument is made that the Secretary of Labor would go outside the community in order to establish criteria that would result in a different way than in the area involved.

I do not believe that the history of the Davis-Bacon Act would bear that statement out. I believe that the Secretary of Labor must take into account the areas in which labor is available for the type of work that is to be done in a particular community.

In establishing wages, he must consider the availability of people. That might take him outside the community. That would not mean that he would entirely overlook the wage conditions in the area in which the construction takes place.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Utah to the amendment offered by the Senator from California.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. LONG of Louisiana. I announce that the Senator from Idaho [Mr. CHURCH], the Senator from Alaska [Mr. GRUENING], the Senator from Arizona [Mr. HAYDEN], the Senator from Washington [Mr. MAGNUSON], the Senator from New Mexico [Mr. MONTOYA], the Senator from Maine [Mr. MUSKIE], and the Senator from Virginia [Mr. ROBERTSON] are absent on official business.

I further announce that the Senator from Tennessee [Mr. BASS], the Senator from Virginia [Mr. BYRD], and the Senator from Utah [Mr. MOSS] are necessarily absent.

I further announce that, if present and voting, the Senator from Washington [Mr. MAGNUSON], and the Senator from New Mexico [Mr. MONTOYA] would each vote "nay."

On this vote, the Senator from Alaska [Mr. GRUENING] is paired with the Senator from Virginia [Mr. ROBERTSON]. If present and voting, the Senator from Alaska would vote "nay," and the Senator from Virginia would vote "yea."

Mr. KUCHEL. I announce that the Senator from Kansas [Mr. PEARSON] is absent on official business.

The Senator from Iowa [Mr. MILLER] and the Senator from Vermont [Mr. PROUTY] are necessarily absent.

If present and voting, the Senator from Iowa [Mr. MILLER] and the Senator from Kansas [Mr. PEARSON] would vote "yea."

Mr. MANSFIELD (after having voted in the negative). Mr. President, on this vote I have a pair with the distinguished

senior Senator from Virginia [Mr. BYRD]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withdraw my vote.

The result was announced—yeas 35, nays 51, as follows:

[No. 183 Leg.]

YEAS—35

Allott	Fulbright	Mundt
Bennett	Gore	Russell, S.C.

Church	Miller	Proutty
Gruening	Montoya	Robertson
Hayden	Moss	

So Mr. BENNETT's amendment to Mr. KUCHEL's amendment was rejected.

Mr. KUCHEL. Mr. President, I move that the vote by which the amendment to the Kuchel amendment was rejected be reconsidered.

Mr. JAVITS. Mr. President, I move that the motion to reconsider be laid on the table.

The motion to lay on the table was agreed to.

Mr. KUCHEL. Mr. President, I ask for the yeas and nays on the pending amendment.

The yeas and nays were ordered.

Mr. GORE obtained the floor.

Mr. GORE. Mr. President, I ask unanimous consent that the amendment be stated. I am unable to obtain a copy of it.

The PRESIDING OFFICER (Mr. McGovern in the chair). The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 10, between lines 7 and 8, insert the following:

(c) The third sentence of section 212(a) of such Act is amended by striking out "described in subsection (d)(3)" and all that follows and inserting in lieu thereof "described in subsection (d)(3) or (d)(4)."

On page 32, between lines 6 and 7, insert the following:

(4) Section 212(a) of the National Housing Act is amended by inserting at the end thereof the following new sentence: "The provisions of this section shall also apply to insurance under title X with respect to laborers and mechanics employed in land

development financed with the proceeds of any mortgage insured under that title."

On page 76, line 1, strike out "707 and 708" and insert "708 and 709".

On page 78, between lines 8 and 9, insert the following:

LABOR STANDARDS

SEC. 807. Title VII of the Housing Act of 1961 is further amended by inserting after section 706 (as added by section 806 of this Act) the following new section:

"LABOR STANDARDS

"SEC. 707. (a) The Administrator shall take such action as may be necessary to insure that all laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed with the assistance of grants under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended. The Administrator shall not approve any such grant without first obtaining adequate assurance that these labor standards will be maintained upon the construction work.

"(b) The Secretary of Labor shall have, with respect to the labor standards specified in subsection (a), the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 1332-15), and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948; 40 U.S.C. 276c)."

On page 78, line 10, strike out "807" and "707" and insert in lieu thereof "808" and "708", respectively.

On page 78, line 17, strike out "808" and insert in lieu thereof "809".

Mr. GORE. Mr. President—

Mr. HOLLAND. Mr. President, may I address an inquiry—

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

Mr. GORE. Mr. President, I cannot be sure of the portent of the pending amendment. I am not sure that anyone else can, either, from listening to the reading of the amendment. The remarks of the Senator from California have not entirely clarified its full portent, so far as I am concerned.

If the amendment has the effect of applying the Davis-Bacon Act to all residential contracts insured under FHA, we are about to strike a blow, and perhaps in many cases a fatal blow, at FHA insured mortgages on individual homes.

I have always been charmed by the statement, "A man's home in his castle."

It seems to me that if one is in a fortunate situation in which he can employ his neighbors or relatives, perhaps on a gratuity basis, or has a friend who is a contractor, however small, there should be a way he can build a home as a result of his own initiative and obtain FHA insurance on the mortgage, without having the Davis-Bacon Act apply under any and all circumstances to every tiny, rural community throughout America.

Mr. President, I doubt whether the Senator from California intends the result I foresee, because I understood him to state that this was not his intent. But, if I heard correctly, from listening to the reading of the amendment, it specifically provides for the application of the prevailing wage as determined by the Secretary of Labor under the Davis-

Bacon Act. There is no definite way of obtaining the prevailing wage in a small town. The prevailing wage is not and never has been the wage which prevails in a small town, such as a county seat. It is determined on an area basis. For the most part, it is determined by prevailing wages in a large metropolitan area.

Therefore, Mr. President, if the pending amendment should be really applied, I believe that it would defeat the purpose which we have long had in mind; namely, that of assisting a young couple to build a home in which to rear their children. Adoption of the pending amendment would make it more difficult. The pending amendment would make it more costly. Indeed, the pending amendment would make FHA unworkable in some small towns and communities.

America is increasingly becoming an urbanized society, but there are still millions of citizens who desire to build homes in small communities. The pending amendment might put a stop to that development.

I should like to see consideration of an amendment of such far-reaching effect as the pending one carried over until tomorrow, until at least we can read it, and understand what it would accomplish.

Mr. KUCHEL. Mr. President—

Mr. HOLLAND. Mr. President—

The PRESIDING OFFICER. The Senator from California has the floor.

Mr. HOLLAND. Would the distinguished Senator yield to me for a question?

Mr. KUCHEL. Let me make a few comments to the Senator from Tennessee, and then I shall be happy to yield to the Senator from Florida.

I am a little surprised by the comments of my friend from Tennessee.

What Congress did years ago in enacting the original Davis-Bacon law was to provide that when any Federal construction takes place in a locality, the prevailing wage in that area shall be used. This law was designed not to increase labor costs but rather to prevent the exploitation of local workers and local contractors by cheap labor being imported from other areas. From the coverage of post office construction, over the years the provisions of Davis-Bacon have been expanded to additional Federal construction such as the Interstate Highway System.

If my able friend believes that I did not want the amendment to apply to one-family dwellings, he was incorrect in assuming that that was my position.

We have had in the law for a long time a provision applying the exception of the 12-unit construction or less. The other day, the House of Representatives adopted the amendment. It is a good amendment. It is in the public interest.

I do not care whether a person lives in a big city or in a small town, I do not want to see local workers and local contractors exploited. All the amendment would do would be to provide that if a person goes to the Federal Government for assistance in obtaining credit, he shall pay the prevailing wage in the town where the home is to be con-

structed; not in another State, but in that area.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KUCHEL. I do not believe that anyone needs to apologize for defending that kind of principle. I defend it. I believe the Senate will defend it.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield to my able friend.

Mr. GORE. I know the Senator has had experience with the application of the prevailing wage under the Davis-Bacon Act, as other Senators have had also. That scale is not determined on the basis which the Senator has described. If I read correctly the amendment, the Secretary would determine the prevailing wage in accordance with the Davis-Bacon Act. Is that correct?

Mr. KUCHEL. Yes.

Mr. GORE. That does not mean that a young married couple living in Carthage, Tenn., who wished to build a home can get FHA insurance of their mortgage by paying the prevailing wage in Carthage, Tenn. It does not work that way at all.

Mr. KUCHEL. If my friend will let me interrupt him at this point, it is perfectly true that administratively the Department of Labor makes a determination as to what area shall include the town of Carthage.

Mr. GORE. Carthage is a town of 3,000, and Nashville is a city of 300,000. The prevailing wage rates are determined on an area basis, and therefore the prevailing rate in a small rural community has very little effect upon the final determination.

Mr. KUCHEL. I do not agree with the Senator's statement. Unless the Senator can tell me that the largest city in his State sets the pattern, I am not willing to accept the Senator's statement.

Mr. GORE. We went into this matter rather carefully in connection with the Highway Act in 1956 and 1958. It was my amendment that applied the Davis-Bacon wage standard to the Interstate Highway System. We did not apply it, and declined to apply it, to the farm-to-market roads, I believe we acted wisely. I should like to go along with the Senator from California in applying it to the larger and multifamily units, but I implore him to give some second thought before we rush to require every man and his wife, in whatever conceivable circumstances, to have the Davis-Bacon Act wage standard apply before they can obtain insurance for their mortgage in building a home. I believe that is going too far.

Mr. LAUSCHE. Mr. President, I believe that the amendment offered by the Senator from California is ill-advised. In my State there is a law providing that the prevailing wage rate shall be paid on public construction. The prevailing wage rate is interpreted to be the rate agreed upon between labor unions and individuals engaged in the construction industry. It further provides that if there is a collective bargaining agreement in the particular area where the

construction is to be done, the collective bargaining agreement of the county nearest to it shall apply.

Several years ago we had a situation in which the city of Sydney wished to build a school. It voted a bond issue adequate to cover the estimate of the cost. In estimating the cost they used the prevailing wage rate in Sydney. The labor unions contended that there was no collective bargaining agreement in Sydney, and that therefore the Dayton collective bargaining agreement should apply.

That meant that the bond issue approved was not adequate to finance the cost of construction. We solved that problem for that one instance, but whether it has been solved permanently, I cannot say.

I should like to invite the attention of my colleagues in the Senate to the fact that we are arguing about making it possible for every family in the United States to own a home. We are now proposing to provide a rent subsidy, because the cost of rental quarters is beyond what the people are able to pay.

We are doing that in one breath, and by this amendment we contemplate placing at a still greater disadvantage the family that wishes to buy a home, the family that wishes to rent quarters. I cannot see the logic of it.

Moreover, it is argued that inasmuch as the Federal Government guarantees the payment of the indebtedness, it has an interest, and warrants its controlling what wages shall be paid on the construction. In answer to that argument, I wish to suggest respectfully that when I buy a guarantee from the Federal Government, I pay a premium for it. We deal at arms length. The Federal Government gives me the guarantee, and I pay for it.

Under those circumstances, what right has the Federal Government to say how I shall spend the money which I borrowed and what wages I must pay? I cannot see the logic of that argument. If we wish to help a family that is seeking rental quarters, or if we wish to help a family that desires to buy a home, we should not pump up the price of homes and rental quarters through action taken by the Federal Government.

Approximately 2 years ago I pointed out on the floor of the Senate that in California, the wage of electricians was \$7.70 an hour. In some States, they are asking for a 30-hour week. How will the ordinary worker be able to buy a home or rent quarters under those conditions?

The proposal is not sound, it is not moral, and it ought to be defeated.

Mr. FONG. Mr. President, I believe that the amendment would do a great disservice to the small home buyer. FHA financing is usually obtained for homes costing approximately \$20,000 to \$25,000. As I understand, FHA financing goes only to the buyer; it does not benefit the contractor. When a contractor finishes a home, he advertises it for sale. A buyer comes on the market and says, "I want to buy this home." Then the buyer has to deal with FHA before he can get that type of insurance. The FHA insured home program redounds to the benefit of the buyer and not the contractor.

Mr. President, I have voted for the extension of the Davis-Bacon Act in relation to the construction of highways. We are now considering a situation which is entirely dissimilar to the program of building highways. After all, in the case of highways, the Government is the purchaser. The Government is the agency. The Government pays for it. We can set the prevailing wage as the standard.

But we are now talking about an individual who is a homeowner. He wishes to buy a home, and, if we allow the amendment to be adopted, he will be required to pay a higher price.

If the amendment is agreed to merely because the Federal Government is insuring FHA-financed homes, we might as well tell every individual who borrows money through conventional financing, such as banks and savings and loan associations, whose deposits the Federal Government insures up to \$10,000, that, because the financing is coming from institutions whose deposits are being insured by the Federal Deposit Insurance Corporation, he must pay wages which are comparable to those required by the Davis-Bacon Act.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. FONG. I yield.

Mr. LAUSCHE. The situation which has been described by the Senator from Hawaii will come about eventually. It will be said that since contractors are borrowing from a bank whose deposits are insured by the Federal Deposit Insurance Corporation, they are being aided by the Government, and therefore they will have to pay the wage schedule prescribed by the Davis-Bacon Act.
